Congressional Record

SEVENTY-SECOND CONGRESS, SECOND SESSION

SENATE

TUESDAY, JANUARY 24, 1933

(Legislative day of Tuesday, January 10, 1933)

The Senate met at 11 o'clock a. m., on the expiration of the recess.

Mr. FESS. Mr. President, I suggest the absence of a quorum.

The PRESIDENT pro tempore. The clerk will call the roll.

The legislative clerk called the roll, and the following Senators answered to their names:

Ashurst	Dale	King	Sheppard
Austin	Davis	La Follette	Shipstead
Bailey	Dickinson	Lewis	Shortridge
Bankhead	Dill	Logan	Smith
Barbour	Fess	Long	Smoot
Barkley	Fletcher	McGill	Steiwer
Bingham	Frazier	McKellar	Stephens
Black	George	McNary	Swanson
Blaine	Glass	Metcalf	Thomas, Idaho
Borah	Goldsborough	Moses	Thomas, Okla.
Bratton	Gore	Neely	Townsend
Brookhart	Grammer	Norbeck	Trammell
Bulkley	Hale	Norris	Tydings
Bulow	Harrison	Nye	Vandenberg
Byrnes	Hastings	Oddie	Wagner
Capper	Hatfield	Patterson	Walcott
Caraway	Hayden	Pittman	Walsh, Mass.
Carey	Hebert	Reed	Walsh, Mont.
Connally	Howell	Reynolds	Watson
Coolidge	Hull	Robinson, Ark.	Wheeler
Copeland	Johnson	Robinson, Ind.	White
Costigan	Kean	Russell	
Couzens	Kendrick	Schall	
Cutting	Keyes	Schuyler	

The PRESIDENT pro tempore. Ninety-three Senators have answered to their names. A quorum is present.

THE WASHINGTON, D. C., POST OFFICE

The VICE PRESIDENT laid before the Senate a letter from the Secretary of the Treasury, transmitting draft of proposed legislation designed to place the Washington, D. C., post office under the custody and control of the Secretary of the Treasury to the same extent as courthouses, customhouses, post offices, appraiser's stores, and other public buildings outside the District, which, with the accompanying paper, was referred to the Committee on Public Buildings and Grounds.

NAVAL STATION AND LIGHTHOUSE RESERVATION, KEY WEST, FLA.

The VICE PRESIDENT laid before the Senate a letter from the Acting Secretary of Commerce, transmitting draft of proposed legislation to authorize the Secretary of the Navy and the Secretary of Commerce to exchange portions of the naval station and lighthouse reservation at Key West, Fla., which, with the accompanying paper, was referred to the Committee on Naval Affairs.

CHANGE IN DATE OF THE INAUGURATION

The VICE PRESIDENT laid before the Senate a letter from the Governor of Oklahoma, transmitting certified copy of the preamble and a concurrent resolution of the Legislature of the State of Oklahoma, which, with the accompanying papers, was ordered to lie on the table and to be printed in the RECORD, as follows:

STATE OF OKLAHOMA,
EXECUTIVE CHAMBER,
Oklahoma City, January 18, 1933.

To the honorable the PRESIDING OFFICER OF THE UNITED STATES SENATE, *Washington, D. C.*
Washington, D. C.

SIR: I herewith transmit to you a certified copy of the preamble and concurrent resolution known as House Concurrent Resolution No. 1 of the Fourteenth Legislature of the State of Oklahoma, being a concurrent resolution ratifying a proposed amendment to the Constitution of the United States of America fixing the commencement of the terms of President and Vice President and Members of Congress and fixing the time of the assembling of Congress.

The said house concurrent resolution was adopted by the House of Representatives of the Fourteenth Legislature of the State of Oklahoma January 13, 1933, and signed by Hon. Tom Anglin, speaker, and also passed by the Senate of the Fourteenth Legislature of the State of Oklahoma on the 13th day of January, 1933, and signed by Hon. Robert Burns, president of the senate, and the same was signed and approved by me, as Governor of the State of Oklahoma, on the 18th day of January, 1933.

I shall be glad to have your receipt for said inclosure.

Witness my hand this January 18, 1933.

By the Governor of the State of Oklahoma.

WM. H. MURRAY.

STATE OF OKLAHOMA,
DEPARTMENT OF STATE.

To all to whom these presents shall come, greeting:

I, R. A. Sneed, secretary of state of the State of Oklahoma, do hereby certify that the following and hereto attached is a true copy of enrolled House Concurrent Resolution No. 1 (by Graham and Roberts of the house and Nichols of the senate): Concurrent resolution ratifying a proposed amendment to the Constitution of the United States of America, the original of which is now on file and a matter of record in this office.

In testimony whereof I hereto set my hand and cause to be affixed the great seal of State. Done at the city of Oklahoma City this 19th day of January, A. D. 1933.

[SEAL.]

R. A. SNEED,
Secretary of State.

House Concurrent Resolution 1 (by Graham and Roberts of the house and Nichols of the senate) ratifying a proposed amendment to the Constitution of the United States of America

Whereas both Houses of the Seventy-second Congress of the United States, by a constitutional majority of two-thirds thereof, made the following proposition to amend the Constitution of the United States in the following words, to wit:

"Concurrent resolution proposing an amendment to the Constitution of the United States fixing the commencement of the terms of President and Vice President and Members of Congress, and fixing the time of the assembling of Congress

"*Resolved by the Senate and House of Representatives of the United States of America in Congress assembled (two-thirds of each House concurring therein)*, That the following amendment to the Constitution be, and hereby is, proposed to the States, to become valid as a part of said Constitution when ratified by the legislatures of the several States as provided in the Constitution:

"'ARTICLE —

"'SECTION 1. The terms of the President and Vice President shall end at noon on the 20th day of January, and the terms of Senators and Representatives at noon on the 3d day of January, of the years in which such terms would have ended if this article had not been ratified; and the terms of their successors shall then begin.

"'SEC. 2. The Congress shall assemble at least once in every year, and such meeting shall begin at noon on the 3d day of January, unless they shall by law appoint a different day.

"'SEC. 3. If, at the time fixed for the beginning of the term of the President, the President elect shall have died, the Vice President elect shall become President. If a President shall not have been chosen before the time fixed for the beginning of his term, or if the President elect shall have failed to qualify, then the Vice President elect shall act as President until a President shall have qualified; and the Congress may by law provide for the case wherein neither a President elect nor a Vice President elect shall have qualified, declaring who shall then act as President or the manner in which one who is to act shall be selected, and such person shall act accordingly until a President or Vice President shall have qualified.

"'SEC. 4. The Congress may by law provide for the case of the death of any of the persons from whom the House of Representatives may choose a President whenever the right of choice shall have devolved upon them, and for the case of the death of any of the persons from whom the Senate may choose a Vice President whenever the right of choice shall have devolved upon them.

"'SEC. 5. Sections 1 and 2 shall take effect on the 15th day of October following the ratification of this article.

"'SEC. 6. This article shall be inoperative unless it shall have been ratified as an amendment to the Constitution by the legislatures of three-fourths of the several States within seven years from the date of its submission'":

Therefore be it

Resolved by the Legislature of the State of Oklahoma—

SECTION 1. That the said proposed amendment to the Constitution of the United States of America be, and the same is hereby, ratified by the Legislature of Oklahoma.

SEC. 2. That certified copies of the preamble and concurrent resolution be forwarded by the governor of this State to the Secretary of State at Washington, to the Presiding Officer of the United States Senate, and to the Speaker of the House of Representatives of the United States.

Adopted by the house of representatives this the 13th day of January, 1933.

TOM ANGLIN,
Speaker of the House of Representatives.

Passed by the senate this the 13th day of January, 1933.

ROBERT BURNS,
President of the Senate.

Approved this 18th day of January, 1933, by the Governor of the State of Oklahoma.

WM. H. MURRAY.

Correctly enrolled.

JULIUS W. COX,
Acting Chairman Committee on Enrolled and Engrossed Bills.

The VICE PRESIDENT also laid before the Senate a letter from the Governor of Nebraska, transmitting certified copy of an act of the Legislature of the State of Nebraska, which, with the accompanying paper, was ordered to lie on the table and to be printed in the RECORD, as follows:

STATE OF NEBRASKA,
EXECUTIVE OFFICE,
Lincoln, January 19, 1933.

HON. CHARLES CURTIS,
President United States Senate,
Washington, D. C.

DEAR SIR: In accordance with the provisions of the bill as passed by the Nebraska Legislature, I am transmitting herewith a certified copy of Senate File No. 1, which is a bill ratifying a proposed amendment to the Constitution of the United States of America, fixing the commencement of the terms of the President and Vice President and Members of Congress, and fixing the time of the assembling of Congress.

Very truly yours,

CHARLES W. BRYAN,
Governor of Nebraska.

STATE OF NEBRASKA,
SECRETARY OF STATE.

I, Harry R. Swanson, secretary of state of the State of Nebraska, do hereby certify that the attached is a true and correct copy of Senate File No. 1, as passed by the 1933 session of the legislature.

This bill being an act for a joint and concurrent resolution ratifying a proposed amendment to the Constitution of the United States of America, fixing the commencement of the terms of the President and Vice President and Members of Congress, and fixing the time of the assembling of Congress.

In testimony whereof I have hereunto set my hand and affixed the great seal of the State of Nebraska. Done at Lincoln this 18th day of January, A. D. 1933.

[SEAL.]

HARRY R. SWANSON,
Secretary of State.

Senate File No. 1 (introduced by Senator W. C. Bullard, of Red Willow; Senator C. J. Warner, of Lancaster; Representative Marion J. Cushing, of Valley; and Representative W. H. Meyers, of Red Willow)

A bill for an act for a joint and concurrent resolution ratifying a proposed amendment to the Constitution of the United States of America, fixing the commencement of the terms of the President and Vice President and Members of Congress, and fixing the time of the assembling of Congress

Be it enacted by the people of the State of Nebraska—

PREAMBLE

Whereas before a proposed amendment to the Constitution of the United States may become valid and a part thereof, it should be ratified by the legislatures of three-fourths of the States; and

Whereas both houses of the Seventy-second Congress of the United States of America did propose, by a constitutional majority of two-thirds thereof, to amend the Constitution of the United States in the following words, to wit:

"Joint resolution proposing an amendment to the Constitution of the United States, fixing the commencement of the terms of President and Vice President and Members of Congress, and fixing the time of assembling of Congress

"*Resolved by the Senate and House of Representatives of the United States of America in Congress assembled (two-thirds of each House concurring therein)*, That the following amendment to the Constitution be, and hereby is, proposed to the States, to become valid as a part of said Constitution when ratified by the legislatures of the several States as provided in the Constitution:

"'ARTICLE

"'SECTION 1. The terms of the President and Vice President shall end at noon on the 20th day of January, and the terms of Senators and Representatives at noon on the 3d day of January, of the years in which such terms would have ended if this article had not been ratified; and the terms of their successors shall then begin.

"'SEC. 2. The Congress shall assemble at least once in every year, and such meeting shall begin at noon on the 3d day of January, unless they shall by law appoint a different day.

"'SEC. 3. If, at the time fixed for the beginning of the term of the President, the President elect shall have died, the Vice President elect shall become President. If a President shall not have been chosen before the time fixed for the beginning of his term, or if the President elect shall have failed to qualify, then the Vice President elect shall act as President until a President shall have qualified; and the Congress may by law provide for the case wherein neither a President elect nor a Vice President elect shall have qualified, declaring who shall then act as President, or the manner in which one who is to act shall be selected, and such person shall act accordingly until a President or Vice President shall have qualified.

"'SEC. 4. The Congress may by law provide for the case of the death of any of the persons from whom the House of Representatives may choose a President whenever the right of choice shall have devolved upon them, and for the case of the death of any of the persons from whom the Senate may choose a Vice President whenever the right of choice shall have devolved upon them.

"'SEC. 5. Sections 1 and 2 shall take effect on the 15th day of October following the ratification of this article.

"'SEC. 6. This article shall be inoperative unless it shall have been ratified as an amendment to the Constitution by the legislatures of three-fourths of the several States within seven years from the date of its submission.'

"JNO. N. GARNER,
"*Speaker of the House of Representatives,*
"CHARLES CURTIS,
"*Vice President of the United States and*
President of the Senate.

"I certify that this joint resolution originated in the Senate.

"EDWIN P. THAYER, *Secretary.*"

Therefore,

Be it enacted by the people of the State of Nebraska—

SECTION 1. That the above and foregoing proposed amendment to the Constitution of the United States of America be, and the same is, hereby ratified by the Legislature of the State of Nebraska.

SEC. 2. That certified copies of this joint and concurrent resolution be forwarded by the Governor of this State to the Secretary of State of the United States and to the presiding officers of each House of the National Congress.

WALTER H. JURGENSEN,
President of the Senate.
HOMER H. GRUENTHER,
Secretary of the Senate.
GEO. W. O'MALLEY,
Speaker of the House.
MAX ADAMS,
Chief Clerk of the House.

Approved: January 18, 1933, 11 o'clock a. m.

CHARLES W. BRYAN, *Governor.*

This is to certify that the within Senate file No. 1 originated in the Senate and passed the legislature at its forty-ninth session on the 13th day of January, 1933.

HOMER H. GRUENTHER,
Secretary of the Senate.

PETITIONS AND MEMORIALS

Mr. BROOKHART presented a memorial of sundry citizens of Humboldt County, Iowa, remonstrating against the passage of the bill (H. R. 13742) to provide revenue by the taxation of certain nonintoxicating liquor, and for other purposes, or any other measure that would "override the eighteenth amendment of the Federal Constitution," which was ordered to lie on the table.

He also presented the memorial of Rev. E. L. Sheldon and other citizens of Nevada, Iowa, remonstrating against the repeal of the eighteenth amendment to the Constitution or the modification of the national prohibition law, which was ordered to lie on the table.

Mr. BINGHAM presented a resolution adopted by Branch No. 32, Fleet Reserve Association, of Bridgeport, Conn., opposing any reduction in the pay of enlisted men of the Navy, which was referred to the Committee on Appropriations.

He also presented a resolution adopted by the regents and treasurers of chapters of the Connecticut Daughters of the American Revolution, assembled at New Haven, Conn., protesting against any reductions in appropriations for the

Army, Navy, and Marine Corps, and also any reduction in the personnel of such armed forces, which was referred to the Committee on Appropriations.

He also presented a resolution adopted by the Hartford (Conn.) Chamber of Commerce, protesting against the adoption of the so-called domestic-allotment plan of agricultural relief, which was referred to the Committee on Agriculture and Forestry.

He also presented the petition of the Woman's Home Missionary Society of Kensington, Conn., praying for the prompt ratification of the World Court protocols, which was ordered to lie on the table.

Mr. CAPPER presented resolutions adopted by the Woman's Foreign Missionary Society of Manchester; the Nazarene Woman's Missionary Society, of Plainville; the Wyandotte County Women's Republican Club, of Kansas City, and local chapters of the Woman's Christian Temperance Union of Augusta, Garnett, Hazelton, Holton, Iola, Lawrence, Lecompton, Liberal, Little River, Manchester, Northbranch, Ottawa, Ransom, Robinson, Wathena, and Yates Center, all in the State of Kansas, favoring the passage of legislation to regulate and supervise the motion-picture industry, which were ordered to lie on the table.

He also presented resolutions adopted by local chapters of the Woman's Christian Temperance Union of Denison, Kennard, and Osborne; the Baptist Sunday School of Downs, and the Woman's Christian Temperance Union, together with a public meeting of citizens of Gardner, all in the State of Kansas, remonstrating against the repeal of the eighteenth amendment of the Constitution or the repeal or modification of the national prohibition law, which were ordered to lie on the table.

He also presented memorials numerously signed of the pastor and members of the London Heights Methodist Episcopal Church and sundry citizens of Kansas City, and of sundry citizens of Byers, Enterprise, and Wellington, all in the State of Kansas, remonstrating against the repeal of the eighteenth amendment to the Constitution or the repeal or modification of the national prohibition law, which were ordered to lie on the table.

Mr. GOLDSBOROUGH presented a resolution adopted by the Frederick County (Md.) Medical Society, opposing the furnishing by the Government of medical and surgical treatment to veterans, or their dependents, for disabilities not directly connected with the military service, which was referred to the Committee on Finance.

He also presented the petition of the Janet Montgomery Chapter, Daughters of the American Revolution of Maryland, praying for the prompt passage of the so-called Dies bill, being the bill (H. R. 12044) providing for the exclusion and expulsion of alien communists, which was ordered to lie on the table.

He also presented memorials of sundry citizens of Hagerstown and Smithburg, in the State of Maryland, remonstrating against the repeal of the eighteenth amendment to the Constitution or the modification of the national prohibition law so as to permit the manufacture and sale of beer, which were ordered to lie on the table.

He also presented resolutions adopted by the Tri-Towns Ministerial Association, representing the Protestant churches of Westernport and Luke, Md., and Piedmont, W. Va., and also by members of the Woman's Christian Temperance Union, of Aberdeen, protesting against the repeal of the eighteenth amendment to the Constitution or the repeal or modification of the national prohibition law, which were ordered to lie on the table.

TARIFF ON COPPER

Mr. VANDENBERG. Mr. President, the New York Evening Post in its issue of January 21, 1933, carried a succinct summary of the useful effects of the copper tariff which the Congress wisely attached to the revenue act one year ago. I ask for the publication of this information in the RECORD, and that the article be appropriately referred.

There being no objection, the article was referred to the Committee on Finance and ordered to be printed in the RECORD, as follows:

[From the New York Evening Post of January 21, 1933]

TARIFF ON COPPER FOUND STABILIZER—INROADS OF FOREIGN PRODUCERS THAT THREATENED UNITED STATES MARKET ARE SEEN HALTED

By W. W. Lynch

The tariff on copper imposed by the revenue act of 1932 has been in effect for about six months. The question naturally arises as to whether it is benefiting the domestic copper industry as its proponents anticipated. This article purports to show that the tariff has changed the industry from a situation approaching hopelessness to one of steady recovery.

The fundamental cause which led the domestic producers and the communities involved to seek tariff protection was that foreign producers were making serious inroads on the American market and threatening thereby to destroy a considerable part of the American industry. Such a cause has been commonly recognized in the United States as prima facie evidence of tariff needs when the industry involved is competent to supply domestic requirements at a reasonable price. Such competency on the part of the domestic copper industry is too well known to be questioned.

Loss of home market is to be judged by facts of trade balance. The United States Tariff Commission reported to the Senate of the Seventy-second Congress as follows:

"Before the entry of the United States into the World War the excess of exports averaged, roughly, 200,000 short tons. * * * During 1929, 1930, and 1931, however, not only did the excess disappear, but imports were greater than exports."

SITUATION WAS SERIOUS

During the 12-month period preceding the imposition of the tariff the excess of imports over exports—even including manufactures and scrap—amounted to 228,000,000 pounds. Total domestic consumption in 1932 was about 600,000,000 pounds.

A continuation of the above-mentioned rate of excess imports obviously would have meant the absorption by foreign producers of over one-third of the domestic market in 1932. With new Rhodesian developments coming into production in 1932, the situation gave promise of becoming even more serious.

From the beginning of the depression American producers attempted to offset the declining consumption by curtailment of production, but were forestalled in their efforts by the failure of some important foreign producers to do likewise.

Consequently, with the foreign market lost to American producers, and with foreign copper being poured into the United States, stocks in America increased almost monthly from the beginning of the depression until the tariff finally stopped the excess of imports.

The circumstance of increasing stocks was accompanied by lowering of prices to an eventual low record of 5 cents per pound, a point probably 2 cents per pound below that at which any mine in the United States can make even an operating profit.

The revenue act of 1932 imposed an import tax on copper which, in existing circumstances, has had the effect of a protective tariff. The only way in which the increase in stocks and consequent decrease in price otherwise might have been halted would have been for American mines to admit defeat at the hands of foreign producers and cease operating.

Such a course would have meant desolation of well-established mining communities and additional thousands added to the ranks of unemployed. The hardships now being borne by the people of those communities could well have been increased to the breaking point. It simply would have been an un-American course to follow.

The dire effects of the depression undoubtedly would have been reflected in the price of copper even if the tariff had been in force prior to the depression. The attitude and action of American producers in regard to curtailment clearly indicates, however, that with tariff protection such accumulation of stocks and demoralization of price as actually occurred would have been avoided. Without it the damage was unavoidable and of such proportions that no extraneous action, tariff or otherwise, could possibly have brought about an overnight recovery in price or a betterment in the unemployment situation at the mines and smelters. Only a miraculously high and sudden increase in consumption could have done such a thing.

HUMANITARIAN AID

There are some outspoken opponents of the copper tariff in the United States largely because American capital is involved in some of the foreign production which threatened to wipe out the domestic industry.

The opponents previously argued that the tariff would cost the American public millions of dollars, because it would increase the price of the metal to consumers. Now assertions are made that the tariff has not raised the price and hence is a failure. True, it has failed as yet to restore to stockholders the dividends that have long since been omitted. It has proved an immediate and heroic success to the thousands of families of the mining communities who otherwise would have been driven from their homes into untold privation.

Aside from the humanitarian aspect, however, the informed stockholder knows that the tariff has started the American copper industry on the road to recovery. Production is below consumption, and each month since the tariff became effective has seen a reduction in stocks—not large but, nevertheless, a step in the right direction.

The pressure of stocks still is too strong to permit a benefit in price. With a constant and sure reduction of that pressure, however, the eventual result is obvious.

The low point of domestic consumption was apparently reached last August. A continued improvement in consumption would, of course, speed the recovery. Next summer the domestic industry probably will help matters along by duplicating the temporary shutdowns of last summer.

The consumer of copper products will do well to face the facts. He has been buying his materials at less than the cost of production, due to a great oversupply of the metal, some of which has required immediate liquidation at whatever price it might bring.

The oversupply has started to dwindle, and the necessity for sacrifice prices gradually is being reduced. It would seem that only a further collapse in general business can long keep the domestic price of copper where it is to-day.

STABILIZATION OF THE CURRENCY

Mr. SCHALL. Mr. President, I have received a resolution adopted by the Farmers Holiday Association at Mankato, Minn., which I ask leave to print in the RECORD and have referred to the appropriate committee.

There being no objection, the resolution was referred to the Committee on Banking and Currency and ordered to be printed in the RECORD, as follows:

We, the farmers of the Blue Earth County Holiday Association, in convention assembled at Mankato, Minn., this 12th day of January, 1933, do hereby declare:

That in a nation such as ours, owning 40 per cent of the world's wealth and where 80 per cent of that wealth is owned and controlled by 4 per cent of the people, and where thousands upon thousands of farm homes are being lost by foreclosure, and millions of its people are walking the streets, in the midst of plenty, asking for bread, and where bankruptcy and ruin to thousands of business men is eminent and probable, that all is not well.

That the desires and ambitions of any man or party or any group of men, for political preference or for control of the functions of government, must always give way to the principles and functions which make for greater peace, happiness, and prosperity to our people, if free government is long to endure.

That for more than five years America's basic industry—agriculture—has been forced to sell its products at a price that did not equal the cost of production.

That during the war and the years following the buying power of the American dollar fell to a new low level. Two hours of labor would buy a dollar, 5 pounds of pork would buy a dollar, ½ bushel of wheat would buy a dollar, 2 pounds of butter would buy a dollar, 3 dozen of eggs would buy a dollar, and other prices in proportion. Agriculture and industry were financed on this basis. Then through the Federal reserve system and under the direction of the money changers in the temple began the deflation. Farm values tumbled and fell to a new low level, the farmer's basis for credit was completely kicked out from under him, and his whole credit structure lay a wreck at his feet. As a result the buying power of the dollar rose steadily higher and higher, or, to put it in everyday language, the price of labor and commodities fell steadily lower and lower.

That by this process of manipulation and centralized control and the resultant utter destruction of the entire credit fabric of the people, the buying power of the American dollar rose steadily higher and higher, so that to-day it takes 4 hours of labor, 40 pounds of pork, 3 bushels of wheat, 4 pounds of butter, and 10 bushels of corn to buy a dollar.

That in normal times 90 per cent of the Nation's business is transacted upon a credit basis and only 10 per cent upon the currency or cash basis.

That money and currency is not a commodity the buying power of which should fluctuate as other commodities. It is a governmental function and should be stabilized by governmental control and inflation and deflation so as to maintain its buying power at a normal fixed level. This function should not be delegated to private persons, groups, or interest, but should forever rest exclusively in the Government itself.

That because of the condition above so briefly set out, the buying power of agriculture and agricultural communities has been utterly destroyed, factories closed, millions of people thrown out of employment, and the ghost of utter ruin and bankruptcy is now walking up and down the avenues of trade and commerce in this, our beloved United States, where we produce foodstuffs more than plenty to supply every hungry mouth within the borders of our fair land.

That the American dollar must be made honest by governmental action and our credit fabric rebuilt and reestablished before prosperity will again return to our people.

We hold that governments are useful only to the extent that it serves to make for greater peace, happiness, and prosperity of its people and the establishment of equality and justice between the various classes of its people. That the ultimate functions of government are the establishment and enforcement of laws and rules of conduct that will make for equality and justice for all its people and the greatest amount of peace, happiness, and prosperity.

We hold that in order to bring this about the Congress of the United States must, by a process of deflation, make the American dollar honest and reduce its buying power to a normal level and on an equality and parity with the normal values of commodities and labor in accordance with American standards, and that only by this method can panic be driven from the land, the credit fabric of the people be reestablished, and business again flow normally through the usual arteries of commerce and trade: Be it therefore

Resolved, That we urge upon our Senators and Representatives in Congress the urgent need of immediate action for the stabilization of our currency, the reduction of the buying power of the American dollar to an honest level by the means and processes hereinbefore indicated; be it further

Resolved, That copies of this resolution be given to the press and transmitted to our Senators and Representatives in Congress and to the President of the United States.

Adopted at Mankato, Minn., this 12th day of January, 1933.

CALIX F. BAUER, *Chairman.*

Attest:

RALPH WORTHLEY, *Secretary.*

WOOD PULP AND NEWSPRINT

Mr. SCHALL. Mr. President, in view of the importation of wood pulp and newsprint without duty, it seems to me the information in this letter is vital. I ask unanimous consent to have it published in the RECORD and referred to the appropriate committee.

There being no objection, the letter was referred to the Committee on Finance and ordered to be printed in the RECORD, as follows:

THE MINNEAPOLIS TRIBUNE,
January 19, 1933.

Hon. THOMAS D. SCHALL,
Senate Office Building, Washington, D. C.

DEAR SENATOR: May I bring to your attention the disastrous state of affairs that exists in the paper-mill industry by reason of the depreciated currencies and gold export embargoes that prevail in countries that produce wood pulp and newsprint? No doubt other newsprint manufacturers have brought this situation to your attention.

You may know that the Tribune for years has operated a newsprint mill in the United States, and that wood pulp and newsprint have been imported largely into the United States without any duty. In spite of these importations, which created a highly competitive situation, neither I nor the Tribune has ever advocated a tariff on newsprint or on wood pulp.

Our mill at Manistique, Mich., was built and designed for a capacity of 50 tons. As an illustration of the efficiency of our management, this 50-ton mill has for several years been producing 80 tons of newsprint a day. This efficiency of operation enabled us to hold our own against Canadian and European imports so long as the producing countries were on a gold standard. Now that there has been a recession from the gold standard to the extent of 12 or 15 per cent, it is impossible now for us to compete with these countries.

It may have come to your notice that three ships discharged wood pulp at the port of Duluth this summer, which wood pulp was produced in Estonia. This wood pulp was sold at a price below that which the Minnesota mills a few miles from Duluth could meet.

Newsprint is now being sold in the United States at a price lower than the raw manufacturing cost, to say nothing of depreciation, insurance, and interest on capital invested.

We have had to close our mill at Manistique, throwing men out of employment, and our mill was the only large employer of labor in that community.

The necessity of some sort of protection against depreciated currencies is not confined to the paper makers, but to their employees and the communities in which they operate as well. As you perhaps know, paper mills are located in sparsely settled communities, and for the most part are the communities' only industry.

I am a newspaper publisher as well as a manufacturer, and I can see both sides of the question. As a newspaper publisher I can see the bankruptcy of American mills, which is certain at some future date to make a very sharp and punitive rise in newspaper prices.

I trust that you may find an opportunity to give this matter some thought, and in this hope I have a full realization of the multitude and complexity of the legislative questions that confront you.

With kind personal regards, I am, respectfully,

F. E. MURPHY, *Publisher.*

FISH AND GAME LAWS AS APPLIED TO THE SENECA INDIANS

Mr. SCHALL. Mr. President, I have just had read to me a letter from Robert P. Galloway, representative of the Seneca Nation of Indians in the State of New York. It seems to me it contains some vital suggestions and thoughts that ought to be of interest to us all, and I ask unanimous consent to publish it in the RECORD and to have it appropriately referred.

There being no objection, the letter was referred to the Committee on Indian Affairs and ordered to be printed in the RECORD, as follows:

SILVER CREEK, N. Y., *January 21, 1933.*

Hon. THOMAS D. SCHALL,
United States Senate, Washington, D. C.

MY DEAR SENATOR SCHALL: I represent the Seneca Nation of Indians. I expect to appear before the committee Wednesday.

I think the Indians should be allowed to make their own fish and game laws. The Court of Appeals in New York State in 245 N. Y. 433, Patterson against council of Seneca Nation, July 20, 1927, have conceded the self-government of the Indians on the reservation through their constitution, peace makers' court, surrogate's court, and tribal council, all of which are functioning. It seems clear that there is no reason why the Seneca Nation can not carry on its own laws in relation to hunting and fishing as well as the other aspects of government. The conservation department of the State of New York has been very vindictive toward the Indians. Wilford Kennedy is now imprisoned in the Erie County jail on a body execution on a civil judgment for a penalty involving the catching of 12 fish. This Indian was acquitted by a jury on the criminal charge, and yet that did not satisfy the conservation commission. They also brought an action for a penalty against Charles Conklin, Chester Conklin, and George Seneca for $160. They started actions in justice court, but withdrew the actions. Never, in my experience, has a white jury convicted an Indian on a criminal charge in relation to the conservation laws.

The Indians have their own natural game laws that they follow, and I think they are better than the white men's laws. After all, the reservation is for the Indians, not the white men; yet the white men are trying to make it their business. Officious game wardens flaunt their pretended authority at the Indians.

Let me cite the case of Walter Hill, of Limestone, whom I defended. A game officer stopped him on the reservation, did not find any game, and then turned and said to him, "Don't let me catch you hunting out of season." The Indian boy was angered because after all he was innocent of any offense and should not have been insulted; he replied, "Don't let me catch you on the reservation again." Promptly the conservation officer swore out a warrant for his arrest on the ground that the Indian had threatened him. A jury, of course, acquitted the Indian. I can understand how the petty conservation officers are misguided in their zeal, and think they are doing something noble in getting body executions against the Indians, but there ought to be some brains at the top of this department.

The white man is asking a moratorium on mortgages and debts. This certainly is a fine time to start to collect civil penalties from the Indians. I do not believe they are sincere in trying to collect the penalty, because the Indian has no money. They are merely gloating over the fact that they have put an Indian in jail. What is left of the Indians on their reservations minding their own business ought to have the rights of the reservation, the game and wild flowers around the reservations, because after all the only true lover of nature is the Indian.

Down in Arkansas an alleged American sportsman has imported some lions to shoot at, and he calls himself a sportsman. The New York Conservation Commission is doing the same thing. They are propagating pheasants and rabbits for the game clubs to put out in the woods and shoot at.

The Indian has his strawberry festival, his green-corn dance as an expression of thanks for the gifts of nature. He understands the wild animals; he does not kill them for target practice as the white men do, or in the spirit of competition like our local Hanover Game Club that gives prizes for those who catch the biggest fish. The white man lacks the spiritual approach to the proposition of hunting and fishing. The Indian hunts and fishes as part of his sustenance.

I think it is very shameful on the part of the conservation commission to ignore the fact that New York State is the greatest violator of the conservation laws. The New York State Hospital at Gowanda is dumping raw sewage into the Cattaraugus Creek, the largest stream on the Cattaraugus Reservation. They are now to spend $3,000,000 for additional buildings at the hospital which makes more sewage and no disposal plant. Why don't they spend their time convincing New York State to dispose of its sewage and not destroy the Indians' fishing in Cattaraugus Creek? Why does not the conservation commission of New York State put the president of the glue factory at Gowanda in jail for dumping wastes into Cattaraugus Creek that kill the fish? Why does not the commission sue the Brown Shoe Co. at Gowanda for dumping wastes and acids, etc., into the creek and killing the Indians' fish? Why does not the conservation commission make some protest against the village of Gowanda for dumping sewage into the creek? The white man does not understand the Indian. The Indian has a philosophy of living in his own confines on the reservation; he ought to be allowed to live it.

Do not take the local game club's protest too seriously. The Salamanca Game Club ought to be silent until those residents of Salamanca who owe the Indians for years and years back lease money have paid it.

The act of 1927 was put through although the Indians opposed it. Ninety-five per cent of the Indians opposed the act of 1927. The Indians believe in live and let live. If they have their own way as in the past, in the future there will be more game and more wild life on the reservation.

The white man, after ruining the forests, after exterminating the game, after polluting the streams, lacks a sense of humor when he turns to the Indian and says, "Now I will give you rules and regulations in regard to hunting and fishing."

Yours respectfully,

ROBERT P. GALLOWAY.

ENROLLED BILLS PRESENTED

Mr. VANDENBERG, from the Committee on Enrolled Bills, reported that on the 23d instant that committee presented the following enrolled bills to the President of the United States:

S. 4597. An act to restore to their former retired status in the Regular Army of the United States persons who resigned such status to accept the benefits of the act of May 24, 1928 (45 Stat. 735), and for other purposes;

S. 5260. An act granting the consent of Congress to the Board of Supervisors of Marion County, Miss., to construct, maintain, and operate a free highway bridge across Pearl River at or near Columbia, Miss.; and

S. 5261. An act granting the consent of Congress to the Board of Supervisors of Monroe County, Miss., to construct, maintain, and operate a free highway bridge across Tombigbee River at or near Old Cotton Gin Port, Miss.

BILLS INTRODUCED

Bills were introduced, read the first time, and, by unanimous consent, the second time, and referred as follows:

By Mr. ROBINSON of Indiana:

A bill (S. 5494) for the relief of Henry J. Miley; to the Committee on Finance.

A bill (S. 5495) granting a pension to Fannie Howell (with accompanying papers);

A bill (S. 5496) granting a pension to Sarah A. Redens (with accompanying papers); and

A bill (S. 5497) granting an increase of pension to Lucinda Luse (with accompanying papers); to the Committee on Pensions.

By Mr. SHORTRIDGE:

A bill (S. 5498) to authorize an increase in the limit of cost of one aircraft carrier; to the Committee on Naval Affairs.

By Mr. FRAZIER (by request):

A bill (S. 5499) to amend section 3 of the act entitled "An act to extend the period of restriction in lands of certain members of the Five Civilized Tribes, and for other purposes," approved May 10, 1928 (45 Stat. L. 496), as amended by the act of February 14, 1931 (46 Stat. L. 1108); to the Committee on Indian Affairs.

By Mr. SHIPSTEAD (by request):

A bill (S. 5500) to repeal the revenue act of 1932; to the Committee on Finance.

By Mr. REED:

A bill (S. 5501) to credit certain services as cadets at the United States Military Academy; to the Committee on Military Affairs.

By Mr. McNARY:

A bill (S. 5502) to extend the times for commencing and completing the construction of a bridge across the Columbia River at or near The Dalles, Oreg.; to the Committee on Commerce.

By Mr. TYDINGS:

A bill (S. 5503) authorizing the Chesapeake Bay Bridge Co., its successors and assigns, to construct, maintain, and operate a bridge across the Chesapeake Bay from a point in Baltimore County to a point in Kent County in the State of Maryland; to the Committee on Commerce.

REORGANIZATION OF EXECUTIVE DEPARTMENTS—AMENDMENT TO TREASURY AND POST OFFICE DEPARTMENTS APPROPRIATION BILL

Mr. LOGAN submitted an amendment intended to be proposed by him to House bill 13520, the Treasury and Post Office Departments appropriation bill, which was ordered to lie on the table and to be printed, as follows:

Strike out all of Title IV, beginning at the top of page 83, down to the end of line 25, on page 86, and in lieu thereof to insert the following:

"That there is hereby created a committee on reorganization and consolidation of departments and independent establishments

in the executive branch of the Government of the United States of America, herein and hereafter referred to as the committee, the membership of which, by virtue of their respective offices, shall be the President of the United States, the Speaker of the House of Representatives, the minority leader of the Senate, the Comptroller General of the United States, and the Director of the Bureau of the Budget. It shall be the duty of the committee to make such reorganizations and consolidations in the departments and independent establishments of the executive branch of the Government as a majority of the committee may deem necessary or expedient. It shall be the duty of the committee, and power is hereby conferred upon it so to do, to suspend, until the law shall otherwise direct, any useless, duplication, and/or unnecessary activities, in the judgment or discretion of the committee, now authorized by law, but nothing herein shall authorize any transfers or consolidations or diminution of the jurisdiction of the Interstate Commerce Commission, the General Accounting Office, the Federal Trade Commission as now established by law. Nothing herein shall be construed to mean that the committee may not transfer to these four independent establishments, or any one or more of them, functions of existing agencies of the executive branch of the Government. The committee shall report in detail to the Seventy-third Congress not later than January 15, 1934, the reorganizations and consolidations effected by it, and the activities suspended under authority herein conferred and the savings to the Government as the result thereof. The Congress reserves the right to disapprove by law whatever the committee may do under authority herein conferred."

EXPENSES, SPECIAL COMMITTEE ON CONSERVATION OF WILD-LIFE RESOURCES

Mr. WALCOTT submitted the following resolution (S. Res. 340), which was referred to the Committee to Audit and Control the Contingent Expenses of the Senate:

Resolved, That the special committee authorized and directed by Senate Resolution No. 246 on April 17, 1930, to investigate the conservation of wild-animal life hereby is authorized to expend in furtherance of such purposes $10,000 in addition to the amounts heretofore authorized.

NOTIFICATION OF CONFIRMATIONS TO THE PRESIDENT

Mr. REED. Mr. President, several days ago the Senate confirmed a number of routine Army nominations. It was then believed by the Senators who had charge of the matter that the action of the Senate contemplated an order that the President be notified of the confirmations. It seems that that order was not entered. Therefore, as in executive session, I ask unanimous consent that the President may be notified of the confirmation of Army nominations which have heretofore been acted upon by the Senate.

The PRESIDENT pro tempore. The Senator from Pennsylvania, as in executive session, asks unanimous consent that the President may be notified of the confirmation of nominations in the Army heretofore made. Is there objection?

Mr. ROBINSON of Arkansas. Mr. President, the Senator from Pennsylvania has correctly stated the matter. I know of no objection to the request.

The PRESIDENT pro tempore. Is there objection? The Chair hears none, and the order will be entered.

Mr. McNARY. Mr. President, should not the order apply to nominations in the Navy and Marine Corps?

Mr. ROBINSON of Arkansas. It should apply to all nominations that have been confirmed. As a matter of fact the Chair, at the time of confirmation, stated that, without objection, the President would be notified. I recall that, but for some reason it was not entered of record.

The PRESIDENT pro tempore. Without objection, the order will include confirmations in the Navy and Marine Corps.

"FAR-REACHING INVESTIGATION"—CHAIN STORES

Mr. BROOKHART. Mr. President, I ask leave to have published in the RECORD an editorial from the Journal of Commerce, of New York, December 22, 1932, entitled "Far-Reaching Investigation."

There being no objection, the editorial was ordered to be printed in the RECORD, and it is as follows:

FAR-REACHING INVESTIGATION

Current investigation by the Federal Trade Commission of activities in the grocery industry is aimed primarily at preparing and establishing a possible basis for future legislation concerning the corporate chain and its place in and effect upon the scheme of distribution. It is, however, having another and quite unexpected result. The commission has to date released nine studies in connection with its final report to the Senate on the grocery chain-store situation throughout the country, and each and every one of these studies has disclosed a situation in the merchandising field which demands correction.

The first report issued in July of last year uncompromisingly revealed to the independent wholesale-grocery trade of the country its general weakness, which is high cost of operation. Opportunely timed, and coinciding with the growth of cooperative movements in the grocery trade, such as the so-called voluntary chains, this report had a most cathartic effect on the general grocery situation at that time. The manufacturing trade, though it generally denied that the private-brand report, showing a tremendous growth in this field in two years' time, was an accurate capitulation of conditions such as now exist, nevertheless took it seriously enough to go to considerable expense to improve its own trading position.

The ninth study, just released by the commission, states uncompromisingly that the "latest report shows one-half of items bought in stores selected in four selected cities as lacking in weight." This new study goes into the sale of bulk commodities and their repackaging by both chains and independents. It dispels the widely held theory in the trade that the general run of business in a day or a week will equalize the difference between the over and under weights. That the practice of selling underweight is very general in both chains and independent outlets throughout the country is the only conclusion that can come from a reading of this report.

Carelessness, which is probably the basic reason for underweight, can not be used to discount the damaging evidence which the commission has collected. And the report, like its predecessors, will give impetus to another movement for betterment of grocery trade conditions. Increased package business and a concentration on weighing-scale sales will probably follow.

There is another consideration which is beginning to assume significant proportions. What will be the character of the final report of the commission and what will its recommendations be? One can easily see by studying the reports so far issued that there has been no catering to inside opinion and the facts as interpreted have made tremendous impression on the grocery trade of the country. There are several topics which as yet have been left untouched, and it may be that the operating expenses of chain organizations, the effect of secret rebates, and allowances on profits and chain buying policies may yet be brought into the light of publicity.

THE MERCHANT MARINE

Mr. FLETCHER. Mr. President, I ask leave to have published in the CONGRESSIONAL RECORD an editorial from the Washington (D. C.) Herald of the 21st instant, entitled "Congressional Attacks on Merchant-Marine Policy Aid Foreign Lines."

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

CONGRESSIONAL ATTACKS ON MERCHANT-MARINE POLICY AID FOREIGN LINES

The American attitude toward its merchant marine has been described as "wayward and inconstant."

This is being shown at the present time in recurrent and very shortsighted attacks in Congress on the mail-pay contracts authorized in the Jones-White Act of 1928 and upon other provisions of the act involving Government aid to ship construction.

The purpose of this act is wholly misconceived by some Members of the Senate and also of the House.

The propriety of the outlays made by the Government, pursuant to the provisions of the act, is not to be gaged by direct and immediate returns to the Government in the form of profits nor with strict reference to the extent and commercial value of the immediate carrier services rendered therefor.

Such advances are made with a broad objective in contemplation; that is, the upbuilding and maintenance of a merchant marine.

This purpose can be served only by the creation of ships of efficient type, the establishment of regular services upon which shippers can depend, and the inauguration of trade routes which will become permanent and nourishing arteries of an expanding ocean commerce.

To subject such advances to continual revision to hold over ship owners and operators the constant menace of a possible reversal of the Government program of encouragement and support is to nullify the effects of advances already made, and by discouraging private cooperation and also patronage by well-disposed shippers to defeat the purposes which the Government has in view.

This was forcibly brought to the attention of the Senate Committee on Post Offices and Post Roads by an important trade organization whose membership includes representatives of Ohio, Michigan, Illinois, Indiana, West Virginia, Iowa, Wisconsin, Minnesota, North Dakota, South Dakota, Nebraska, Kansas, Oklahoma, Missouri, Kentucky, and Tennessee.

It is known as the Middle West Foreign Trade Committee. It speaks for important agricultural, industrial, and business groups in the Mid-western States above named.

Declaring that the uncertain status of American shipping, due to attacks in Congress, has created misgivings on the part of American shippers who otherwise would be disposed to use

American vessels, the chairman of this trade committee stated that such attacks gave a distinct advantage to foreign shipping interests in the competition for American export business.

"We are discouraged to find," said he, "that every time an appropriation bill comes up for passage there are proposals to destroy what has been accomplished in the upbuilding of American steamship lines. This discredits us in the face of the whole world, due to the fact that our foreign competitors are frankly expecting the collapse of the American merchant marine every time Congress meets. Representatives of foreign lines say to our shippers: 'Why not patronize a well-established foreign line whose government is always behind it?'

"They capitalize the attacks in Congress on our shipping and assure the American shipper that no continuity of service is to be expected from the American merchant marine."

Speaking particularly for the business interests of the Middle West, he continued:

"Our people of the Middle West are 800 miles or more from the sea. We are compelled to depend on established and continuing services. We must have regular dependable schedules of sailings. Our exporters are not situated like the man at or near the seaport who can avail himself of occasional sailings or tramp ships. Our people must make arrangements for shipping far in advance and must know that the line will have a ship on a certain date."

This is obviously true. Such mischievous attacks should cease.

It is the ocean mail contracts which seem particularly inviting to this form of congressional harassment. The fact that they are not intended as mere compensation for the transportation of mail is lost sight of.

They are the channels through which the assistance of the Government is passed and are designed to offset the difference in cost of operation between American and foreign vessels, due to the higher wages and operating costs of American-built and American-manned ships.

It must not be forgotten that the Government imposes substantial burdens in return for its aid.

It stipulates the routes on which the vessels receiving assistance shall be operated and the frequency of their sailings.

Each line obligates itself to build new vessels "of the best equipped and most suitable types," on plans approved by the Navy Department; and as to old vessels, to reconstruct or recondition them so that they will be suitable as naval or military auxiliaries in time of war or national emergency.

It is unfair to attack these contracts as extravagant without having in mind all the considerations which the Government receives in return, including the assurance which is provided by efficient ships and fixed sailings, that our trade routes will be kept open to our foreign markets and our foreign sources of supply.

Our merchant marine has made distinct progress since the enactment of the Jones-White Act. American steamship lines have more than held their own with foreign competitors, despite the depression.

To conserve our gains and to maintain the progress already made, require, however, that the Government's support of our merchant shipping shall be consistently and not fitfully given, and that the present law shall be administered with loyalty to the broad purposes contemplated in its enactment.

ADDRESSES OF DR. JACOB H. HOLLANDER AND HON. BAINBRIDGE COLBY ON FOREIGN DEBTS

Mr. JOHNSON. Mr. President, I ask unanimous consent to have printed in the RECORD a speech by Dr. Jacob H. Hollander, professor of political economy in the Johns Hopkins University, on American Public Opinion and War Debts, delivered at the round table on war debts and conference on the cause and cure of war in Washington, January 19, 1933; and at the same time, following that address, I ask the same permission to print the address of Hon. Bainbridge Colby, at one time Secretary of State of the United States, delivered at the Hotel Pennsylvania on January 19, 1933, entitled "The International Debts and Their Relation to Business."

There being no objection, the addresses were ordered to be printed in the RECORD, as follows:

ADDRESS OF JACOB H. HOLLANDER, PROFESSOR OF POLITICAL ECONOMY, JOHNS HOPKINS UNIVERSITY

It is, of all things, important in a sober discussion of the subject which is to engage us this evening that at the outset the matters to be discussed should be made precise. I propose, therefore, to define in approved homiletical fashion what I understand to be the meaning of the major terms of my topic, "American Public Opinion and the War Debts."

The phrase "war debts" is simple enough. The statement of the public debt of the United States as of October 31, 1932, the latest date available, reports the total foreign obligations owned by the United States Government to be, in round numbers, $11,777,000,000.

From this we may omit from consideration (a) $250,000,000, being cash advances to Czechoslovakia and Russia; (b) $21,000,000, being payment for surplus war supplies to Czechoslovakia, Nicaragua, and Russia; (c) $19,000,000 for relief supplies sold on credit by the American Relief Administration to Armenia, Czechoslovakia, and Russia; (d) $7,000,000 for relief supplies sold on credit by the United States Grain Corporation to Armenia, Czechoslovakia; (e) $386,000,000 for account of reimbursement of the United States army of occupation in Germany. There remain funded bonds to the aggregate of $11,094,000,000, received under a series of debt-funding agreements as authorized by acts of Congress extending from February 9, 1922, to December 18, 1929. This total of $11,094,000,000 represent debits of 14 separate countries. Of them, the four largest debtors are England, $4,398,000,000; France, $3,864,000,000; Italy, $2,004,000,000; Belgium, $401,000,000. My comments, although applicable to the entire series, will envisage the four enumerated major debtors.

The phrase "American public opinion" is more subtle. Its content has baffled those foreign observers, De Tocqueville, Bryce, Siegfried, who have understood other aspects of our national life. It is imperfectly comprehended, because taken for granted by the American people itself. It is grossly mistaken by the European world.

We shall perhaps simplify the problem by setting forth what American public opinion, in regard to the war debts, is not.

It is not the internationalism of expatriates who, as unofficial ambassadors in Paris, London, Rome, or Brussels deprecate the stupidity of the American people.

It is not the domestic counterpart of this galaxy—the small, distinguished, and extremely voluble intelligentsia in the United States who in or out of academic seclusion frame concepts of international idealism highly creditable to their benevolence but remote from the severities of Real-Politik—much the same company who after the Versailles conference acclaimed Woodrow Wilson and the League of Nations only to suffer the engulfment of the presidential election of 1920.

American public opinion is not the unanimity of American banking circles who, taking their note from the great banks and issue houses, bleat, "Peace on earth and good will to men," with incidental regard to the protection of private credits and loans extended European borrowers in the buoyant optimism of the late twenties.

Neither the press of the United States nor its legislative bodies are representative of American public opinion in the matter of the war debts. Our newspapers are not "inspired" in the European sense; but they are preeminently conservative and prudent. One wide-flung chain has a definite alignment in opposition, and the small-town weeklies, by sheer proximity, reflect something of their readers' opinion. But the great city newspapers inevitably incline, in this as in other matters to the stronger battalions of finance, industry, and commerce. This applies primarily to the editorial page. As to the news columns there is regard for the best traditions of a free press. But a journal can not afford a foreign correspondent whose dispatches are unsympathetic with the views entertained in the quarter to which he must have recourse for fresh information. Nor in any event can it control the garbling of its own news reports by European editors. In a recent senatorial debate on the war debts, speaker after speaker voiced strong anticancellationist views. One speaker alone expressed different opinion. The debate was reported fully, or at least fairly, by important American papers. In the French press, according to return cables, the congenial utterance was featured, almost to the exclusion of the dominant strain.

Instinctively we turn finally to our legislative halls for a faithful echo of public opinion. The textbooks enjoin this upon us. But the political realist knows that the moth-eaten tradition is a pious fraud. The controlling purpose of an elected representative from the day of his election is to insure the likelihood of his reelection. It is a political axiom that the surest way of accomplishing this is to offend; that is, differ in profession from the smallest possible number of constituents. The post of apostle of the forgotten man or of conservator of vested interests may have spiritual appeal, but the safer rôle of the American publicist is to say nothing, do nothing, be nothing except as ordained by political expediency, partisan advantage, and the strength of an organized minority.

If American public opinion be so impalpable and so elusive a thing, what chance is there of appraising it? And yet the attempt must be made if we are to escape from impasse. Vox populi may not be vox Dei, but in all vital matters of public policy it is definitive. Experience and instruction may modify, even reverse, it. But at any given time, with respect to any given issue, it is the court of last resort. No policy can prevail that runs counter to it, no resistance to what it wills can endure. The Monroe doctrine is supported by such opinion. American adherence to the League of Nations is counter to it. The public-school system is an expression of public opinion. Licensed gambling is at variance with it. It is because Europe has failed to accept this truism, because continental foreign offices as if not sufficiently chastened by the penalties of crude acquaintance with the American constitutional system have been unwilling or unable to gage American public opinion—that the war debts remain unpaid.

I shall venture, therefore, of necessity to set forth my conception as to what at this time is American public opinion on the war debts. I can claim no authority other than my own; no virtue beyond objectivity. But it will be refreshing to replace advocacy by photograph. The image may be imperfect or blurred or distorted. Yet at least we shall be dealing with what is rather than sputtering over what ought to be.

Let me accordingly give way on this rostrum to that more interesting speaker—the American citizen. He dwells sometimes on the side streets of small towns, sometimes in the modest 2-story houses of industrial cities, sometimes on simple farms. He lives

in Maine or California, in Dakota or Texas. He is artisan, corner grocer, farmer, school-teacher, bank clerk. On this occasion, at least, he will break his habitual silence and voice the faith that is in him.

"The war debts," he says, "or more accurately the funded bonds of foreign governments now in the Treasury of the United States, are my property. They belong to me as definitely as does the note I hold for the money lent my hard-up neighbor, or as the mortgage on my home belongs to the lending bank. It is my property, not as a fat surplus but as something on which I am relying for economic security in the dreary years to come. Fifteen years ago I had saved up by sacrifice and denial a moderate sum. In 1915–1919 I was persuaded to lend this to Uncle Sam so that he in turn might lend it to beleaguered countries for food, munitions, supplies, and reconstruction purposes. I did so because of emotional appeal and strong-arm propaganda. I was not in the least influenced by the fear, since so solemnly presented, that unless Germany were defeated my own country would be the next to suffer. Had it been urged, I should have said then that as between a truculent Germany and an embattled France there was little choice. Certainly I should say that now. No! I fell for brass bands and brass buttons. 'Bleeding Belgium,' 'stricken France,' 'stout old England,' 'Teuton fury,' 'a war to end wars,' 'making the world safe for democracy'—these were the catchwords with which I was gulled. I emptied out the woolen sock, drew down the savings account, kept John home from college, refused Mary her promised marriage settlement. I bought Liberty bonds—bought them, as I was besought, until it hurt, giving up what I had saved, scaling down what I used, mortgaging what I was to get.

"For what I lent, Government bonds—Liberties—were given me, bearing interest and sinking-fund provision. At the time I did not realize that this in itself was hanky panky; that it was I who would have to pay myself interest, that what came into one hand as coupon money was to be paid over by the other as debt-service taxes. When I awoke to the fact I was reassured, officially, that this was only a temporary delay, that the war over, the borrowing countries would assume debt service, and that Uncle Sam, so paid, would reimburse me for what I had lent without thereafter taking it out of my pocket in taxation.

"The war came to an end. But as Bastable had long before assured me 'borrowing is an agreeable process'; and with so complacement a lender intrepidity in battle was succeeded by readiness in debt. Reconstruction, rehabilitation, purchase of supplies, even rearmament were paid for by me. Only when the habit threatened to become chronic did I post the sign 'No more funds—to lend,' with a reaction ranging from affronted dignity to angry abuse on the part of the chronic borrowers.

"With the Versailles conference the veil first dropped from my eyes. I had been fed on noble phrases—'the parliament of man,' 'self-determination,' 'open covenants,' 'fourteen points,' 'a spoilless triumph.' Instead I saw a Carthaginian victory, a struggle for loot, barnyard amenities, secret treaties, cunning, intrigue, deception. I thought of the sacrifices and denials of my household, of the distress and misery that lay ahead, of my neighbors' boys who had fallen, that American valor might be acclaimed and congressional medals of honor be bestowed, and I suffered a form of mental nausea.

"I believe history will appraise the World War in its net result as definitely a profitable war, for the victors, as the campaigns of Cæsar and Napoleon. The settlements were in the spirit of vae victis, applied with the brutality of Brennus. I realize there is no common denominator for human suffering and material gain. But time brings healing for the first and makes no deduction from the second. The peace treaties are but 14 years behind us, but even now I may venture what another generation hence will assert, that as the life of a nation goes—in territorial gain, in political benefit, in economic advantage, as against blood spilt and treasure wasted, the Allies—France, England, Italy, and Belgium—when the throes of readjustment have subsided will be accounted richer and stronger than before the war, indeed, by reason of the war.

"In the distribution of loot," continues our speaker, "my country took no part, save in the moderation of rapacity; and accepted no share. We were not more virtuous or more tender—our part in the Mexican War and in the Spanish-American is sufficient commentary—but we were neither frenzied in resentment nor competent to gain. So I returned to my appointed place, bruised a little, disillusioned more. The "Lafayette, we are here" and the "Hands across the sea" business had not turned out as they were supposed. Things, moreover, at home had gone topsy-turvy—for one can not drop his tools and run off to help put out a neighbor's fire—and not find a mess when he comes back. But after all, this was in the day's work—even though made a bit sour by grudging thanks from those whom I had aided.

"The worst, however, was yet to come. The one assurance on which I had counted was that the war over and a period of grace given—my savings were to be returned to me at least in payment of interest, without the cheating device of accompanying taxation. This meant that the Allies would at the earliest date begin the service of the war debts. I was skilled neither in the ways of the Quai d'Orsay nor of Downing Street. At first barely audibly, then unmistakably, then noisily, with counterpart accompaniment from defined groups in this country the age-old cry of the reluctant debtor was raised: 'It is not right that I should pay; though I wanted to, I could not pay; and even if I could and did pay it would be bad for you to be paid.'

"The first phase of the debt cancellation case was accordingly advocacy of cancellation for reasons—moral, economic, international:

"1. The war debts ought not be paid, because the war was a common cause to which the Allies contributed men and to which the United States contributed money.

"2. The war debts could not be paid because the Allies had not enough gold with which to pay, and because they lacked an exportable surplus and our tariff walls in any case shut it out.

"3. The war debts must not be paid—in the interest of the United States as well as Europe—because world recovery was only possible if the slate were wiped clean.

"I was not convinced by the logic. But I have had to do with slow debtors before; so I agree to the funding arrangements of 1922–1929. The principal of the debts was scaled down, the interest rates were reduced, the dates of maturity extended. Even more than all this the principle of capacity was inserted in the funding contracts. No debtor country should be asked to repay more at any given date than it was able then to pay—and the issue as to fact might be raised by the debtor at any time.

"The years have passed. Time holds the bank, and history has displaced controversy. It now appears that I was right on all three counts. The moral argument has melted away. The economic argument has been answered by fact. The international argument has become a fantasy. Capacity—the sufficient defense of an honestly distressed creditor—dare not even be raised.

"In this second stage of the war debts, mendicancy has been succeeded by default. The alignment has become clear. One of the great debtors—directed by astute absolutism—has realized how advantageous is the settlement heretofore made; has conformed to it; and has gained in stature. The second—historically a creditor country whose economic existence lies in the fidelity of contracts—has kept faith, even at heavy cost, and is assured of fair, even generous reexamination. From the two remaining countries—where it was least to be expected—there has come default. None of the worn-out defenses are used—except by our domiciled 'foreign legion'—but in lieu a recriminative complaint of seduction and betrayal in the Hoover-Laval conference.

"I know that in conversation among nations, it is conventional never to call a spade a spade—but always an agricultural implement. Yet I believe that as the final act of an administration, which the future is certain to appraise far higher than does the present, President Hoover should directly and categorically, with calm unreserve and full documentation, scotch once and for all this reptilian dialectic.

"This is why," says my somewhat winded spokesman—for he does not often hold forth at such length and with such explicitness—"this is why I see perhaps not red, but pink when there is talk of cancellation or revision, except as provided, to the advantage of the defaulting countries. My opinion is clear, strong, unshakable: They 'hired the money'; they profited by its use; they are able to repay it now and I need it badly. If they do not pay, I shall not go to war. But my memory is long. I had not forgotten Lafayette. I remember Chateau-Thierry and the Argonne, and I shall not forget December 15, 1932."

Thus far, ladies and gentlemen, I have acted as reporter. With that report, let me add, I am in full agreement. But Civis Americanus is a realist, not a seer, certainly not one prone to prevision. My part in this program will not have been filled unless to this imaginary conversation to which you have patiently listened should be added a few comments of what at least one observer conceives to be the wider effects of cancellationist advocacy.

I believe such advocacy involves the gravest consequences—economic, social, and international—to the United States and to the whole civilized world. Economic, because whatever measure of accord society in five centuries of slow progress has reached, is in largest degree assignable to the growth of financial faith between nation and nation. It is in this manner that commerce has grown, that undeveloped countries have expanded, that backward States have been stabilized, that international division of labor has spread, that the surplus income of older societies has found productive use in the needs of newer areas. The one factor which has made all of this possible has been the inviolability of economic contract. It has been incorporated in law; it has been accepted in mores. It is the one secure enduring link in economic association. Abandon it, corrupt it, even challenge it and the economic world falls apart in dissociated nationalism—reluctant and distrustful.

The social menace of cancellationist advocacy is developing with disturbing swiftness before our eyes. The unmistakable appearance, indeed the creeping spread of repudiation sentiment in the United States and in South and Central America—by inflation, by postponement, by cancellation—as to public indebtedness, corporate obligations, mortgage liens, business liabilities—is a direct repercussion of the countenance given to war debt cancellation. If we are able to lighten the burdens of foreigners who are able to pay, why should we not preferentially lighten the burdens of our own citizens who are not able to pay—runs the challenge. If not charity, certainly grace begins at home. It is an amazing thing to me that those in high financial place, with the fullest knowledge of what economic contract means in the well-being of a people—will encourage the project of cancellation abroad, and cry unto heaven at any whisper of repudiation at home.

To a company such as this—dedicated to the cause and cure of war—it is the international consequence of cancellation advocacy that must appear its dire menace. Whatever an unborn

to-morrow may unfold as to a federation of the world and the part the United States shall play in it, we should be blind to international realities, blind as children playing with fire in an arsenal are blind, if we did not recognize that the rôle of this country, now and as far ahead as our generation can scan, is that of moderator. We have no interest in the irritants and provocations of European war. Our wish for peace is as near an undiluted humanitarianism as a political society can conceive. We can not impose our judgment upon armament-expending war-threatening nations by fleets and armies. Our one resource in the cause of peace is our economic strength. Here are food and material and above all capital—to be withheld or supplied as right and justice, in our conception, shall determine. This is the one great chance of serving the cause of peace. Are we to cast it away?

SPEECH OF BAINBRIDGE COLBY

THE INTERNATIONAL DEBTS AND THEIR RELATION TO BUSINESS

It was six weeks ago that I received your invitation to discuss the international debts and their relation to business.

Since then there has occurred the French default, presenting a situation which is yet difficult to appraise in all its implications.

The private debts owed to American institutions and individuals by private borrowers abroad seem to be outside the scope of my subject. Furthermore, repudiation has not yet shown its head in the field of private debts. While their great amount and the pressure for postponement of their maturities is naturally a source of uneasiness to the holders of the loans, there has been no discussion looking to an alteration of their character, beyond informal suggestions of a reduction in the rate of interest. Such international debts with their specific problems we may leave to the bankers who so improvidently made the advances.

American attention is centered upon the war debts owed us by our former allies. These include the postwar advances of large amount for internal rehabilitation, the support of their currencies, and other peace-time aids and subventions, dictated by American generosity and the desire to assist the economic recovery of friendly, and we assumed, grateful nations.

The situation, precipitated by the unlooked for, and still incredible action of France, is tense and growing more so.

In discussing it words should be measured and utterance guarded. The maxim of Benjamin Franklin is a good one to observe—"Say nothing," said he, "unless it is useful."

Much water has gone over the mill in the 14 years during which the war debts have been under discussion. For it must be remembered that hardly had the armistice been signed in November, 1918, when the movement began among our European debtors to bring about the remission of the debts.

The first hint, according to Mr. Lloyd George, in a book recently published, proceeded from England. It was only a little later—to be exact, January, 1919—that Colonel House, then in Paris to attend the peace negotiations, says in his diary:

"There is every evidence that the Allies have a growing intention not to repay us the money we have loaned them."

In 1922 came the famous Balfour proposal of an all-round cancellation—a suggestion which fell flat when it was seen that England and France were relinquishing only what they would be obliged to pay us in turn, and that the proposal meant merely a shift of the residual cost of the war upon the American taxpayer.

The funding of the debts by voluntary agreement with the debtors involved negotiations extending over a period of seven years. The first agreement was made with Finland in 1923, and the last with Austria in 1930. The agreements involved large concessions by us on the obligations as originally incurred, and were formally ratified by the several debtor nations, although by France with significant delay.

All payments abruptly ceased with the declaration of the so-called Hoover moratorium in June, 1931, since which time this country had received nothing on account of its advances until the partial payment of the sum due on December 15, made up chiefly of the payment received from England.

Now we are assured, even by those of our debtors who have paid, that nothing more will be paid until their debts are put upon a new and drastically revised basis.

No request is made for the help or forbearance which a creditor might naturally be asked to extend to a debtor endeavoring against difficulties to meet his debt. Not in that spirit have our debtors at any time approached us.

On the contrary, it has always been with an unconcealed animosity to the obligation itself. They have assailed the fact that their obligations exist, seeming to rebel at the fact that they are debtors, and apparently harboring a resentment toward the United States not only for heeding their cries for succor during the war, but for putting them even under the obligations of gratitude.

I think I may say truthfully that this attitude has been the chief source of the difficulties which, in such thick cluster, have grown up around the subject of the debts in general.

Much has been said of the attitude of Europe to the debts. Too little has been said of the attitude of the United States to the debts.

Strange as it may seem to our allies, there is still an impression in this country that America saved them from defeat—possibly from destruction.

On our part it was the act, not of a government but of a people, persuaded that the Allies were defending the principle of good faith in international relations, the validity of the signatures of governments, the honor of pledges given by nations.

The billions we loaned to Europe were raised by popular subscription.

The great sum required merely to pay the annual interest upon our Liberty bonds is raised by taxation of the people. We were adjured to "pay until it hurt," and we are still paying and must continue to pay indefinitely by way of interest a sum in addition to what we originally contributed.

To the surprise and painful disillusionment of the American people, they find their debtors not only thankless, but apparently determined not to pay.

We can not understand why they should even be desirous of not paying. We can not understand why they should not be solicitous and insistent that we receive back, as fast as they can pay it and in whatever form they find it possible to pay us, the money advanced with such unexampled generosity, in an hour of such sore and utter need, without security, and in sole reliance upon the good will and the good faith of the borrowers.

In fact, there is in this country a feeling that Europe should mass its resistance, not against payment, but against the possibility of nonpayment, which to the obligors of such a debt as theirs should be in the last degree unthinkable and abhorrent.

But we overlooked the international financier and the economists, and at this point, they came marching on the scene. They have done a good job. They have had gratifying success in confusing public thinking and in burying the true elements of the problem under an avalanche of irrelevant facts and near facts, false emphasis and distorted reasoning. They have assembled the entire apparatus of debt evasion, not to use the harsher term, repudiation, which is distasteful to our debtors as a term but not so distasteful, apparently, as a policy.

I do not wish to be understood as speaking derogatorily of economists in general, although as I struggle through their conflicting testimonies, I am often reminded of John Bright's saying in the House of Commons that "The trouble with great thinkers is that they so often think wrong."

One thing, however, will not be disputed and that is, that the chief concern of economists is to refute all other economists. The progress of the science seems marked by the steady rejection of its own claims to accomplishment and the continuous substitution of new for discarded axioms.

That the commerce of the world is sadly dislocated none can deny.

That international payments are in the final analysis made in goods or services is one of the few untoppled axioms of economics.

That the maldistribution of the world's gold supply makes international transfers difficult and in some cases impossible may be admitted.

That further transfers of gold may operate detrimentally to the currencies of some of the debtor countries is perhaps true.

But none of these things, nor all of them together, justify the demand that the United States shall assume Europe's war debts and transfer the burden of them to the American taxpayer.

Our debtors are by no means so resourceless as they would have us believe. Given the will to pay, the way can always be found.

There is a positive as well as a defeatist approach to every problem. There is a smooth avenue to every creditor's cooperation if the debtor is on the level and intends to stand up to his obligations.

Our debtors have not approached us with any display of solicitude that the United States shall not suffer as the result of its confidence in their promises.

None of them has said: "See here, you know how difficult our position is. The approaching payment will strain our available resources. We need a little time."

Or, "We are in a position to do so much, but not more, and what we can we will cheerfully apply upon what we owe. As soon as times improve we will resume the performance of our engagements."

This has not been their mode of approach. Their talk is ever about "equities," obscure and thus far difficult of statement, which may have been in their hearts but were not upon their lips when the debts were contracted. They were not in the lender's contemplation. They were not mentioned in the demand notes given by the debtors, nor in the bonds subsequently given in replacement of the notes. They did not figure in the refunding agreements, which affirmed many years after the advances were made the original undertakings to repay given by the borrowers.

But we are met by the retort that whatever the facts may be about the contraction of the debts, however regrettable that the American taxpayer, having parted with his money to make the loans, should now be obliged to part with his money a second time in order to repay them, the fact remains that the debtors can not pay them—so what can be done about it?

Of course the matter can not end there, agreeable as such a result would doubtless be in many quarters. The rights of the United States as a creditor, as well as the obligations of the debtor nations, can not be quite so easily dissolved.

There is no place in the modern world for the principle of repudiation. Good faith is still the foundation upon which mutually trustful relations between enlightened powers must rest.

The war debts are one of the world's problems which must be solved. Neither repudiation nor remission is a solution. Either would be a desertion, an abandonment of the problem. World recovery will not be brought about by running away from prob-

lems. They must be faced with courage and confidence. Building, not wrecking, is the technique of recovery.

It is an inviting task, which the war debts present, a task for good faith and good will. These are stronger forces than evasion and default.

There are not only economists of the defeatist school. There are also economists and financiers who are constructive. Bernard Baruch, who served the United States so superbly as chairman of the War Industries Board, is such a man.

With his experienced resourcefulness and his habit of constructive approach to a complicated problem, he does not look upon the claims of the United States as impossible to be met.

"Payment can be made," says he, "in foreign exchange or nonperishable commodities which are not produced by American farmers."

As a contribution to the restoration of international prosperity he maintains that the United States could agree to store commodities such as tin, jute, manganese, chrome, and possibly even silver for five years.

"I am opposed to cancellation," says Mr. Baruch. "In the first place, our Government could only cancel its assets—that is, what the Allies owe us—but could not cancel its liabilities which are owned by its own Liberty bond holders.

"To cancel, in order indirectly to relieve Germany of further costs of the war, would be to take $300,000,000 a year from the backs of Germany's industries and put it on ourselves, thus saddling us with a handicap of $600,000,000 a year on our industries, as compared with German industries, in the international struggle for trade.

"Some of the debtor nations say they can only pay in goods and services. Well, that is not an insuperable obstacle. Our Government might accept cash or partly commodities or partly foreign exchange."

Defaulting nations, Mr. Baruch observes, are somewhat in the position of Russia, which can not secure necessary foreign credit without paying exorbitant and uneconomic rates of interest.

Concluding, he observes that "Our foreign debts have a real value, one that we should not pass up too lightly. The $270,000,000 which the associated powers owe the United States for the next fiscal year is a small item compared with the whole of international payments, and it has been grossly exaggerated for propaganda purposes."

These are the words of a distinguished financier and practical economist. He speaks with a deeper insight into the problem than I can claim.

There is no solution of the war debts except by their liquidation. As a factor in world economy they are not eliminated by their transfer as an obligation from Europe to America. As an obstruction to world recovery they will not be removed by shifting their incidence. Two men can not be said to be richer if one assumes the other's debt.

From the American standpoint, the effect of their remission would be a definite addition to our public debt of $11,000,000,000. The annual interest charge which to-day is $300,000,000 and which, under the funding agreements gradually increases, must be deducted from our estimated national income and will increase by that amount our tax burden. This in turn means a reduction by the same amount in the purchasing power of our people.

But we are told there are countervailing benefits of a derivative and indirect character which, if properly appraised, will more than offset these results.

If this is the fact, it should be susceptible of demonstration. The American people can not be expected to renounce claims of such amounts and validity—to disregard equities which have their roots in the sacrifices of our people, and in a generosity which has no parallel in history—for purely conjectural or vaguely anticipated considerations.

When the moratorium of 1931 was announced, it was greeted with rapturous acclaim. The stock market staged a brief return engagement—very brief—in the most popular piece in its repertory, a bull market with resumed pool operations, manipulated advances, and all the old footlight favorites. But after a very short run the realties of the situation again took the stage.

We then witnessed the deepest and most precipitous decline in security and commodity values that had been recorded in the entire course of the depression.

Now, if our trade is to be benefited by relieving Europe's budgets of the annual payments due us, can it reasonably be apprehended that with more than 40 nations on a depreciated currency basis and favored by low-wage scales any increase in Europe's purchasing power will be turned into the American market with our higher production costs due to our stable currency and higher wage and living standards?

It seems to me that this is quite an idle expectation.

On the other hand, how can we, with our grave unemployment problem and the prostrate position of many of our industries, hope to restore either employment or industry if we open still wider our gates to the influx of cheap foreign merchandise?

The advocates of a policy of further sacrifice by the American people in their treatment of the debts seem to be under the spell of certain economic catchwords which do not square with present-day realities.

Of course, transfers are facilitated by credit balances, but how are credit balances to be built up in the face of the established trends of present world commerce?

Of course, foreign lending imparted a very marked, but we now learn, a very costly and false stimulus to our exports in recent years. But this could not continue indefinitely. If debt remission is to be treated as analogous to foreign lending, and justified on that theory, it will find little support from the holders of Europe's private debts, already deeply worried about their position.

There is still to be considered the question of our position as a competitor for world markets—is it helped or hurt?

It can hardly be denied our competitive basis would be fundamentally changed by the assumption of Europe's debt. Not only would the budgets of the debtor nations be instantly lightened, but in the same amount ours would be instantly weighted.

The potential purchasing power of their people would be augmented and the purchasing power of the American people would be diminished by the same amount.

Already at great disadvantage in our struggle to cope with their low production costs, we would find our production costs increased by new and undeserved additions to the tax burden, even now so severe a handicap to American business revival.

You ask: What is the answer? Have we reached an impasse? Is the problem beyond human faculty?

Not by any means!

It may have to be approached from a new angle. It may require some variation of formula.

But unless default has lost its stigma among men and honor is no longer sensitive, but has become callous, the solution can and will be found.

Let us remember that even in France—so ill served by the politicians who compose her present Parliament—the protest against her deault has not been stilled.

When the French Parliament, after its refusal to pay the installment due us on December 15 of $19,000,000, approved a loan of $14,000,000 to Austria, a leading organ of French opinion asked:

"Did we refuse our millions to the United States, to whom we owe something, if only gratitude, to give them to Austria, to whom we owe nothing except the shells she fired at us?"

It was said of Ireland's historic grievances against England that they were things for England to remember and for Ireland to forget.

We shall need to approach the problem of the debts with calmness and detachment—with fairness, and expecting to be met with fairness.

Solution often lurks in the simplest expedients, although the simple formula is sometimes hard to find.

However, thought without aim is wasted. Debate without decision, or conference which does not issue in program is of little value.

With your permission, I will make bold to offer for your consideration a plan of approach to the problem. It is not my own. It is the suggestion of a distinguished American thinker, John Spargo. It has already been broached and has met with respectful and serious reception.

In my opinion it has great merit. It can be stated in a few words.

Suppose that the United States, in conjunction with its European debtors and the former Central Powers, were to form a consortium, by which is meant merely an agreement between nations to act jointly with reference to some mutual financial undertaking.

Let the amount of all intergovernmental debts be ascertained and fixed, including the debts of our late enemies for reparations.

Then let obligations, promises, or bonds, if you choose to call them such, maturing in 40 or 50 years, be issued for the total of these debts by a corporation formed for the purpose, which would act as a formal obligor. This corporation would embrace representatives of the debtor nations, including former allied nations which owed debts to the United States and former enemy nations which owed reparations.

The new bonds would replace all existing bonds covering the different classes of debt. Provision would be made for redemption from a sinking fund to be formed and maintained by contributions representing the agreed and equitable proportion of each nation.

Each of the debtor nations would agree to pay an annual sum, equivalent to an agreed per cent of its actual expenditure upon armaments for the year 1932, to be applied to the payment of interest and the redemption of the bonds. It has been estimated that 11 or 12 per cent of the present military and naval expenditures of the debtor nations would suffice.

The United States, although a creditor nation, would agree to make an annual contribution equivalent to a percentum of its Army and Navy expenditures for 1932, which would be equal to, or have a just relation to the sum paid by the principal debtor nations.

We would do this as our contribution to an effective and practical reduction in world armament.

Furthermore, it would be an act of cooperation with our debtors in liquidating this great mass of debt, and in coping with a situation that is world-embracing.

The United States would be the eventual and ultimate recipient of the sums paid in, as obviously in the consolidation of the total intergovernmental debts the final and effective figure would be the net indebtedness.

This plan could hardly be stated more generally, but its details, both legal and mathematical, could readily be worked out.

It would involve no new taxation but only the better application of revenues which, in the darkest year of the depression, it has been found possible to create.

It would mean a forward step toward reduced armaments, when to date no substantial progress has been found possible.

Perhaps as an alternative to general repudiation, which is unthinkable; to cancellation or revision, which is impossible—and to the existing scheme of payments which we are assured by the debtor nations can not be continued, this proposal has something in it worthy of examination.

THE BANKING ACT

The Senate resumed the consideration of the bill (S. 4412) to provide for the safer and more effective use of the assets of Federal reserve banks and of national banking associations, to regulate interbank control, to prevent the undue diversion of funds into speculative operations, and for other purposes.

The PRESIDENT pro tempore. The question is on the amendment of the Senator from Montana [Mr. WHEELER] in the nature of a substitute for the amendment of the Senator from Louisiana [Mr. LONG].

Mr. WHEELER obtained the floor.

Mr. GLASS. Mr. President, will the Senator yield to me for a moment?

Mr. WHEELER. I yield.

Mr. GLASS. Mr. President, I shall not enter into any discussion of the proposed substitute amendment. It deals with a problem that is totally foreign to the purpose of the bill, and, of course, I shall ask the Senate to reject the amendment; but I want to give notice that hereafter when propositions so entirely foreign to the purposes of the banking bill are presented, I shall undertake to conserve the time of the Senate by moving to lay them on the table and not have the time of the Senate taken up with discussion. The banking bill is designed to prevent bad banking and to insure in some measure good banking and has nothing to do with the issuance of currency, and hereafter I shall treat foreign proposals just in that way.

Mr. LONG. Mr. President, that has not always——

The PRESIDENT pro tempore. Does the Senator from Montana yield to the Senator from Louisiana?

Mr. WHEELER. I yield.

Mr. LONG. That has not always been the position of the Senator from Virginia. During the last session of Congress a bill which he had for the inflation of the currency was offered on the home loan bank bill as being of aid and assistance in connection with that bill and was supported by the Senator from Virginia. I can not see how the Senator can now make fish out of one and fowl out of the other.

Mr. GLASS. That is my position now, Mr. President. That is the important point.

Mr. WHEELER. Mr. President, I appreciate what the Senator from Virginia has said, and I can assure him that I am not offering this amendment for the purpose of delaying his bill, whatever the effect of it may be. I am offering the amendment for the reason that it has become quite apparent that the legislation it contemplates would not have an opportunity to be heard or to be considered at this session of the Congress; and, by reason of the importance of the subject and particularly by reason of existing conditions throughout the world, it seems to me that the Congress of the United States ought to give serious consideration to the problems which I am about to discuss.

First of all, Mr. President, let me say that I offered this bill in the Senate just a little over a year ago and at that time I issued this challenge:

I assert—and challenge intelligent criticism, not mere denial—of the following statements:

First. The enactment of my bill into law would immediately thereafter nearly double the volume of the world's primary money, with the resultant increased conservative credit basis of twenty times the amount of primary money thus added to the world's stock.

Second. Within one year after the enactment of this bill the world's price of wheat, cotton, and all agricultural products would be more than trebled.

Third. The purchasing power of over 50 per cent of the entire world's population now using silver as their sole yardstick of exchange and business transactions would contemporaneously be quadrupled; that is, the value of the silver stock would increase from 30 cents to $1.30, resulting in the creation of a market which would more than absorb all the surplus of our raw materials and manufactured products.

Within two years all our present agricultural land values throughout the United States would be more than quadrupled, thereby transforming the present frozen assets of the country banks in agricultural communities into liquid assets.

The unemployed-labor problem would be rapidly solved.

Both labor and capital would be benefited.

Contentment, happiness, and lucrative occupation would be substituted for discontentment and despair, with their inevitable resultant tragedies to follow.

It would relieve starvation in the midst of plenty.

This legislation would do more than all suggestions heretofore combined toward reviving, encouraging, vitalizing, and resuscitating business in this country and throughout the world.

The market prices of securities, especially the common stocks of all corporations enjoying honest, efficient managements and being properly financed, where listed on some of the great stock exchanges of this country, would almost contemporaneously show increased activity and market value.

Since that time, Mr. President, nobody on either side of this Chamber has risen in his place to deny or to controvert the challenge which I issued at that time. Not only that but during that period of time we have seen an increase in the number of mortgage foreclosures; we have seen an increase in the number of bank failures; we have seen country after country go off the gold standard, until to-day something over 42 nations of the world are off that standard.

I wish to call attention to a statement which was issued by the president of the United States Chamber of Commerce. He said:

For a year and three months depreciated foreign currencies have been exerting an undermining influence upon our economic situation—

First, by negativing our tariffs so that, in our home markets, American goods have been displaced, factory output cut down, and unemployment increased;

Second, by depressing price levels and preventing any upward price movement to a basis of fair return for American labor and capital;

Third, by decreasing much-needed customs revenue to our Government.

Over half of the products coming into the United States are benefiting from the advantage of depreciated currencies. Over 20 foreign countries have the advantage in undercutting the prices of American products.

Mr. President, in addition to that, I desire to call attention to a statement made by President Hoover in his address to the Congress of the United States on December 19, 1932, in which he said:

The depreciation of foreign currencies lowers the cost of production abroad compared to our costs of production, thus undermining the effect of our protective tariffs.

I want particularly to call attention of those on the other side of the Chamber to this statement, because I propose to show before I conclude that, as a matter of fact, the remonetization of silver would do more to make the tariff effective upon manufactured cotton goods and on every other commodity on which a tariff is levied to-day than would any other single piece of legislation that has been offered in this Congress or in any other Congress since the depreciation of the currencies of other countries.

The President continued:

I concur in the conclusions of many thoughtful persons that one of the first and most fundamental points of attack is to reestablish stability of currencies and foreign exchange, and thereby release an infinite number of barriers against the movement of commodities, the general effect of which would be to raise the price of commodities throughout the world.

I propose, Mr. President, to show that the remonetization of silver would do more to stabilize the currencies of the world than any other piece of legislation that has been offered in this branch of the Congress or in the other branch of the Congress. The President further said:

While the gold standard has worked badly since the war, due to the huge economic dislocations of the war, yet it is still the only practicable basis of international settlements and monetary stability so far as the more advanced industrial nations are concerned. The larger use of silver as a supplementary currency would aid stability in many quarters of the world. In any event it is a certainty that trade and prices must be disorganized until some method of monetary and exchange stability is attained.

Then, Mr. President, I want to call the attention of the Senate to an article in the Saturday Evening Post, by Mr. Samuel G. Blythe. In this article he says:

There are rubber boots there, made in Japan, that cost in American money, to land in this country all charges paid, just under 34 cents a pair, and that can not be made in this country for less than 95 cents a pair. There are rubber boots from Czechoslovakia, that cost the Czechs $1.16 to lay down in this country, that can not be made here at less than $1.48 a pair. And plenty of other rubber boots, shoes, overshoes, and so on, that carry out these ranges. There are rubber toys, beach balls, swimming rings, and other beach paraphernalia with the same discrepancies—a swimming float, for instance, that costs 17 cents to get into this country from Japan and costs us $2.46 to make. Rubber dolls that Japan sends here for $4.26 a gross and cost Americans to make $7.84 a gross; celluloid toys that Japan sends over for $20.14 a gross and cost $33 a gross to make here; celluloid combs that Japan offers here for $11.06 a gross and cost us to make $25.86 a gross. Such things by the hundred.

I want to call the attention of those who come from the cotton manufacturing States to this statement:

Japan lands here cotton hit-or-miss rugs at 6 cents each, and we can not make one of these rugs, with our wages, at a less cost than 29 cents. Japan sends grass rugs, 9 by 12 in size, landed here all charges paid for 92 cents each, and they cost our manufacturers $8.88 each to make.

And so on, taking up, item by item, goods manufactured in China and Japan.

Mr. DAVIS. Mr. President——

The PRESIDENT pro tempore. Does the Senator from Montana yield to the Senator from Pennsylvania?

Mr. WHEELER. I am glad to yield to the Senator from Pennsylvania.

Mr. DAVIS. What does the Senator think about putting an embargo upon those products and in that way preventing them from coming in?

Mr. WHEELER. I am glad to answer the Senator's question. I would not advocate such a course for the simple reason that putting an embargo upon those products would not in the slightest degree affect world commodity prices. What we are seeking to do—what everybody wants to do—is to increase the purchasing power of the people, not only of this Nation but of the world.

I submit to the Senator from Pennsylvania that there is only one way that has been suggested by which Congress, acting singly and alone, can raise world commodity prices, and that is to remonetize silver. By doing that we would double the primary money of the world, and we would increase the purchasing power of over 60 per cent of the peoples of the world. It would treble or quadruple the purchasing power of 60 per cent of the people of the world, who now use silver money, so that China, India, and Japan, and the other silver-using countries, instead of being able to sell to us and dump their products in this country, as they are doing to-day, would come into our market and purchase our goods and not be dumping theirs upon the American market.

I have never been a believer in embargoes in any shape or form, because I have always been forced to the conclusion that if we should put embargoes around this country we would thereby destroy our foreign trade, and we being an exporter of raw materials and manufactured goods, we can not confine our industries just to our home consumption without ultimately destroying ourselves.

Mr. DAVIS. Then, the Senator hopes to increase the buying power of China and Japan in the expectation of exporting more of our own manufactured products to them?

Mr. WHEELER. Exactly. In addition to that, Mr. President, we would increase their cost of production so that they would be unable to underbid us in the world market, for by quintupling the price of their money we would quintuple the cost of their production as measured by our production costs.

Mr. DAVIS. Then, the Senator does not take into consideration that practically about 95 per cent of all we produce is consumed at home and that we export only 5 per cent?

Mr. WHEELER. The trouble with that argument is that the 5 per cent of the articles we sell abroad does not include farm products, but only manufactured goods. The surplus wheat and cotton which we export fixes the price the farmer gets for these crops in the United States. My bill would raise the world commodity price level and thereby increase the price of all our commodities of which we have a surplus.

Mr. DAVIS. Then, the low prices on the foreign market of articles shipped here destroy the local prices.

Mr. WHEELER. Of course it is the depreciated currencies of the world to-day that is destroying prices; it is the depreciated value of the money of 60 per cent of the peoples of the world that is destroying the world market and destroying our market.

No country in the world has ever been able to live within itself; and no country, in my humble judgment, will ever be able to build a tariff wall or put an embargo around itself without destroying its own civilization.

Now, Mr. President, I wish to call attention to exactly what the amendment proposed by me will accomplish. First, I want to call attention to the effect of depreciated currencies:

Let me give a simple illustration of how this principle is working to our disadvantage to-day. Let us suppose that Canadian currency depreciated 50 per cent like that of Japan, and that a shoe manufacturer in Boston and one in Toronto were each paying their labor $6 a day, and that the average cost of making a pair of shoes was in each factory $2 a pair. The Canadian dollar, although depreciated 50 per cent (as measured by our gold dollar), would still buy as much labor or pay as much rent or debt in Canada as the United States dollar would purchase or pay in the United States. To all outward appearances, the standards of living and the value of each dollar were identical as long as it operated within its own country. It was only when the dollar crosses from one country to the other that the difference became apparent. The factory cost of production in the Toronto factory and in the Boston factory was $2 per pair of shoes, measured in the dollars respectively of each country. But see what happens when trade crosses from one of these countries to the other. An American merchant goes to the Canadian factory and finds that one American dollar will purchase one pair of $2 Canadian shoes. This seems like a good bargain to the American, so he imports his shoes from Canada. But let us suppose that a Canadian merchant comes to the Boston shoe factory to purchase American-made shoes valued at $2 a pair in United States money. He finds that it will cost him $4 of his Canadian money to buy one pair of $2 American shoes, and the chances are he will not purchase them.

Now, if you will multiply that simple illustration by many thousands, you will understand the great commercial advantage enjoyed by countries with a depreciated currency, and why Japan is able to flood this country with her products at a cost delivered here in the United States of less than one-half our cost of producing them.

Let me call attention to the effect of what is happening with reference to wheat.

By reason of the depreciated currency of Argentina of 40 per cent, the farmer of Argentina gets 40 per cent more of his currency for his wheat. He can pay off 40 per cent more of his fixed charges. His cost of production, to the extent that he has to hire labor, is 40 per cent less than that of the American wheat farmer.

In other words, assume that the world price of wheat was 50 cents gold. The American farmer would get for that wheat 50 cents, less handling charges and transportation charges, while the Argentine farmer would get for his wheat 70 cents of his money, and he could pay off 40 per cent more of his indebtedness and 40 per cent more of his taxes and 40 per cent more of his transportation charges, and so he could undersell us in the world market.

Now, Mr. President, I want to call the attention of the Senate to another matter; and I must hurry, because of the fact that my time is limited.

Mr. LONG. Mr. President——

The PRESIDENT pro tempore. Does the Senator from Montana yield to the Senator from Louisiana?

Mr. WHEELER. I yield for a question.

Mr. LONG. The Senator from Montana has not spoken yet on any amendment we have had up here. I ask unanimous consent that we extend his time 30 minutes in order that he may discuss this question, because a number of us are very anxious to hear him.

Mr. BULKLEY. I object, Mr. President.

The PRESIDENT pro tempore. Objection is made.

Mr. WHEELER. I thank the Senator from Louisiana; but the Senator from Ohio need not object, because I do not want to be unfair to any other Member of the Senate, and I am not asking for any special privileges in this body or anywhere else.

I want to call the attention of the Senate, however, to this matter, and I want to call as witnesses three great economists—two of them, particularly, England's famous economists. They were testifying with reference to the price of wheat and the effect of the depreciation of silver.

We hear so much to-day about the high price of gold being the cause of the fall of prices in this country. I assert without fear of challenge that it is not the high price of gold that is wrong, but the thing that is wrong is the depreciation of the money yardstick of over 60 per cent of the people of the world, and that is the depreciation of silver.

Let me call your attention to the statement of Mr. Nicholson, who in his time was looked upon as the greatest economist of Great Britain. The question was asked about Indian wheat, and he said:

> Indian wheat is the very wheat that is complained of by Secretary Manning, Secretary of the United States Treasury, as having lowered the price of European and American wheat, and he attributes it all to the divergence of gold from silver. You do not think tying gold and silver again would raise the price of English and American wheat by 25 per cent?

In his reply Professor Nicholson discusses the factors entering into the determination of prices under given conditions, and on the point immediately germane to the point under discussion says:

> Now it seems to me probable if the price of silver rose to its old level, wheat could not be profitably exported from India until prices rose in a corresponding degree; for India being a silver country, the price of wheat there is independent of the relative value of gold and silver. An exporter to England at present will give the Indian price in silver, and he can buy his silver for less gold, and thus competition will lower the price. If the price of silver rose, the exporter from India must get more gold. Thus a rise of silver would, on this view, raise the price of wheat to a corresponding degree.

What is true in India, my friend, is likewise true in every silver-using country throughout the world. Mr. Daniels, in his work on the Industrial Competition of Asia, Mr. Bagehot, in his work on the Depreciation of Silver, both of them being gold monometallists, agree in substance with the statement I have just read from Mr. Nicholson.

> At a meeting of the British and Colonial chambers of commerce, held in London, 1886, Sir Robert Fowler, a member of Parliament, a banker and ex-mayor of London, made the following statement:
>
> "The effect of the depreciation of silver must finally be the ruin of the wheat and cotton industries of America and be the development of India as the chief wheat and cotton exporter of the world."

Is there anybody in this body who dares stand here and challenge these statements?

Oh, I know what is being said. The Hearst paper this morning said I was reviving the old Bryan 16-to-1 doctrine. Let me say to you that I have no pride of authorship about this matter. Bryan was not the originator of it. I am simply asking the Members of the Congress of the United States to have the courage to adopt the money of their forefathers.

Is there anybody on the other side of the Chamber who wants to stand here and challenge the wisdom of Alexander Hamilton? Is there anybody on this side of the Chamber who dares stand here and challenge the wisdom of Thomas Jefferson?

Talk about its being a Bryan 16-to-1 doctrine! Silver was the money of Thomas Jefferson. It was the money of Alexander Hamilton. It was the money of James Madison. It was the money of all the great leaders who have gone down in history as the greatest statesmen of America. We were on a bimetallic-standard basis from 1792 down to 1873; and, according to the uncontradicted sworn testimony of Members of Congress, silver was demonetized through trickery and deception. The Rothschilds of England, who controlled the gold of the world, acting through one of the international bankers of this country, brought pressure to bear upon the Congress of the United States to demonetize silver in order that they might more easily control the money and credit of the world.

Oh, I know the fear that is in the hearts of some people here. The statement is frequently made that we would be flooded with silver if we should remonetize silver.

Let me say to the Members of the Senate that I have recently talked with one of the leading financiers of the United States. I talked with him last night in my own home. I asked him the question that many of you are asking yourselves, as to whether the United States alone could adopt bimetallism, and while he is not in favor of bimetallism, but has always been a gold-standard Republican, he said to me last night that in his opinion there was no question but that we could maintain bimetallism on the basis of 16 to 1, or 20 to 1, or 14½ to 1, because of the fact that at the present time the commercial and financial position in the United States is such that the minute we adopted it the world would know that we could carry it out. The trade balances are practically all in favor of the United States.

If we remonetize silver, what do we do? Do we decrease our commercial balances abroad? Not at all. We increase our commercial balances abroad, because we make it possible for countries to buy from us that are unable to buy from us now, due to their depreciated currencies, and consequently we increase trade balances with the Orient, where they are decreasing at the present time.

Talk about taking gold out of this country! How is gold going to be taken away from the United States when the trade balances are in favor of the United States? The only way that gold can be taken out of the United States is by taking up the difference of trade balances; and when the trade balances of China and India with us would be more favorable, it is impossible for them to dump their silver in this country.

Again, Mr. President, let me call attention to this fact. The economist for one of the largest banks in the city of New York, who is against any deflation, made this statement to me in private conversation, but said that he could not be quoted. When I asked him the question as to whether we would be flooded with silver if we should remonetize it, he said, "Why, of course not." He said, "The economic and commercial standing of the country at the present time is so great that the price of silver would immediately go to $1.29^{29}/_{100}$ all over the world. Why should they send their silver here, with the cost of shipping it here, when it would have the same purchasing power in China or in India as it would have here?"

Somebody says to me, "Oh, but they will melt up their silver spoons!" Did they melt up their silver spoons in 1919? At that time the price of silver was more than $1.29^{29}/_{100}$. Did they melt up their silver spoons then? The price of silver generally throughout the world has been $1.30. Did India melt up her silver spoons then? Did she send her jewels and the great mass of silver she is holding into the United States?

Compare, if you will, the standing of the United States of America in the financial world, in the trade world, in the commercial world in 1932, with favorable trade balances all over the world, with her position in 1873. All fears that we would be flooded with silver as a result of passing my bill are based upon misconception relative to the amount of silver in the world to-day, and the further fact that the passage of my bill would raise the price of silver throughout the world to $1.29^{29}/_{100}$ and there would be no profit in shipping it to the United States.

Why, my friends, England went on the single gold standard in 1816, France, if my memory serves me right, about 1870, Germany about 1871, and the United States in 1873, not because we were being flooded with silver, not because it was not beneficial to the United States, but because the international bankers, acting at the behest of the Rothschilds in England, insisted and slipped through a proposal here in the Congress that nobody here understood, except possibly one or two men, and thus they demonetized silver in the United States.

We speak of an international conference, and that we are going to be able to get it now. Why should England, for instance, want to agree with us to remonetize silver? England's manufacturing interests at the present time have the United States by the throat, so to speak. They can get their raw materials, their cotton and their wheat, and their other raw materials from India and from countries that are off the gold standard cheaper than they can get them from the United States.

In addition to that, let me call your attention to the fact that by reason of her depreciated currency she can undersell us in the markets of the world. Also, by reason of the depreciation of silver in China, Shanghai is booming; Hong Kong's factories are booming, while the factories of the United States—the cotton factories at Haverhill, at Lawrence, at Lowell, Mass., and throughout the South—are finding it impossible to compete with the countries whose currencies have depreciated. The same thing is true of all our manufacturing industries whether it relates to boots and shoes or the product of our steel mills. Then why should we expect England or these other countries to join with us in an international conference when they now enjoy a commercial advantage over us, due to their lower production costs?

Oh, it may be said that we should not put a provision of this kind upon this bill, as the Senator from Virginia says; but I want to say without fear of contradiction that we can not go before the 12,000,000 unemployed who are walking the streets of America to-day and offer that as an excuse for not putting this provision upon this bill. We can not go to the millions of farmers who are losing their farms to-day through foreclosure and offer that as an excuse for not voting for this amendment to-day.

Those who represent the cotton mills of Massachusetts, and those from the South, can not go before the manufacturers of their States and the other people of their States, and they can not go before the bankers of this Nation, who have written to me by the score, and say, "I did not want to vote for it because I did not want to put it on the Glass bill," a measure which offers to the people of the country little, if anything, in the way of help to the hundreds of thousands, yea, millions of men, who are tramping the streets of this country to-day.

Mr. President, I am standing here pleading for the United States as against China. I am standing here pleading for the United States as against India. I am standing here pleading for the United States as against Great Britain, and as against every other nation in the world, and I say that no scheme has been offered in Congress during the last year that would do so much to stabilize the currencies of the world as would the remonetization of silver. The only reason why we are not adopting a measure remonetizing silver is that some fear political consequences will follow, such as followed in 1896, when we only copied what the forefathers of the Nation had adopted, only copied what was adopted as the money of the Constitution in 1792.

The PRESIDENT pro tempore. The time of the Senator from Montana has expired.

Mr. SHEPPARD. Mr. President, out of reverence for the enthusiasms of the past, which I have always believed to have had a logical foundation, I am going to vote for the pending amendment. My first two great enthusiasms in life were Bryan and silver. My first public political speech was for free silver and Bryan at Mount Vernon, Tex., in 1896. Bryan was at that time the Democratic nominee for the Presidency on a platform favoring the remonetization of silver.

I can remember how proud I was of the expression which I coined as an aspiring young speaker, after burning a great amount of midnight oil, when I said in the course of that address after picturing the economic gloom of the time, "And God said, let there be light, and there was Bryan."

I recall the wonderful sentences with which Mr. Bryan concluded the address on the money question before the Democratic National Convention of 1896, the address which won him the nomination for the Presidency: "Thou shalt not press down upon the brow of labor this crown of thorns. Thou shalt not crucify mankind upon a cross of gold."

I remember, further, how my youthful soul had been stirred and lifted by Bryan's dramatic description of that thrilling incident in the Battle of Marengo, when the drummer boy, ordered by Napolean to beat a retreat, replied: "My masters never taught me to beat a retreat. Sire, I can not beat a retreat, but I can beat a charge. I can beat a charge that will make the very dead fall into line."

Mr. President, I am frank to say that I do not understand the money question to such degree as to be certain of my ground. I thought I understood it in 1896. I do not understand how to handle price levels in the world or in this country so as to prevent disastrous recessions, and I do not believe anybody else does. But I do know that the basis of Mr. Bryan's contention was the quantitative theory of money, and that after the campaign of 1896 there was a new influx of gold into the world, and that a marvelous era of prosperity followed. I know also that the present congestion of gold in two or three countries gives us the equivalent of another gold famine for the world.

Out of loyalty to the early enthusiasms to which I have referred; and out of the conviction that there is something in the quantitative theory of money, as illustrated in the recognition of silver now proposed, I am going to vote for the pending amendment.

Mr. WHEELER. Mr. President, may I make just one statement?

The PRESIDENT pro tempore. In the time of the Senator from Texas?

Mr. WHEELER. I ask leave to make the statement in the time of the Senator from Texas.

The PRESIDENT pro tempore. Does the Senator from Texas yield to the Senator from Montana?

Mr. SHEPPARD. I yield.

Mr. WHEELER. I just want to make this statement. I have given rather intensive study to this problem during the past year, I have consulted with economists, and if there is anybody who would like to ask a question, I would be only too happy to answer any question which might be propounded.

Mr. SHEPPARD. Is it not a fact that the principle on which Mr. Bryan founded his contention for the remonetization of silver was vindicated by subsequent events? Was it not true that there had been a decrease in the quantity of the basic money of the world, that is, in gold, a decrease continuing over many years, that this scarcity was threatening mankind, that an era of falling prices had accompanied that decrease; that some time after the campaign of 1896 there were new discoveries of gold, a tremendous increase in this basic metal, and a great era of prosperity? Is not that correct?

Mr. WHEELER. There is no doubt about it. I have here a pamphlet which has just been issued by Mr. H. S. Denny, an Englishman now living in Toronto, an expert, and recognized as one of the leading economists of Canada. He points out exactly what the Senator has said, and calls attention to the fact that the reason why the predictions of Mr. Bryan in 1896 did not come true was the tremendous discovery of gold in South Africa, and likewise by reason of the finding of gold in Alaska. Those discoveries helped to increase the quantity of the primary money of the world. But since that time, while there has been some increase in gold, yet due to the maldistribution of gold, much of which is held in France

and the United States, two things are happening to-day: There is not gold enough in the world to finance the expanding commerce of the world, and by reason of the tremendous expansion of the debts of the United States and all the world there is not gold enough to meet those debts.

Mr. SHEPPARD. Mr. President, we have a situation now practically parallel with the conditions in 1896, so far as the supply of basic money is concerned the world over.

Mr. WHEELER. Much worse, may I say.

Mr. SHEPPARD. In addition to the expansion of commerce there has been a tremendous increase in population throughout the world.

Mr. WHEELER. Exactly.

Mr. SHEPPARD. And there is greater need to-day for a larger volume of basic money than ever before.

Mr. WHEELER. Exactly.

Mr. TYDINGS. Mr. President, will the Senator from Texas yield to me to ask a question of the Senator from Montana?

Mr. SHEPPARD. I yield.

Mr. TYDINGS. I would like to ask the Senator from Montana this question: If these countries in South America or in India or in Europe continue to melt up their silver coin, or to debase their silver, will it not put the United States in the position of having to buy silver, because of a surplus, an unnatural surplus, so to speak, forced upon the world market by those countries which are debasing their silver coinage, as in the case of England, and Belgium, and France, and India particularly?

Mr. WHEELER. Let me say to the Senator, in the first place, that there is very much misinformation with reference to those facts. At the present time, according to Mr. H. S. Denny, the Orient is taking 180,000,000 ounces of silver a year, 180,000,000 ounces out of a production of 251,000,000 ounces in 1931, and the greatest production of silver the world has ever seen was in 1929. That year it reached the point of 261,000,000 ounces.

Eighty per cent of the silver of the world is produced as a by-product of copper, lead, zinc, and other metals. Twenty per cent of it is produced in silver mines, much of it in Canada and in Mexico. If the output of silver in the silver mines of Mexico were increased 50 per cent, the world supply would be increased by only approximately 15 per cent, if my memory serves me correctly.

Mr. TYDINGS. Mr. President, I do not think the Senator has gotten my question. For instance, when an attempt was made to put India upon the gold standard the Senator knows the silver coinage of India was gathered up and melted into bullion and sold upon the silver market.

Mr. WHEELER. Some of it.

Mr. TYDINGS. One year over $100,000,000 worth was sold upon the world market, and of course silver coinage is still being melted in India. In fact, they have a tremendous amount of bullion stored, which, due to the decreased price of silver, is not now being offered in the market, as I understand it. My question was purely for information.

Mr. WHEELER. I understand.

Mr. TYDINGS. In other words, if the United States goes into the market with the definite policy of buying the silver whenever its price is so and so, as a matter of fact would not that encourage countries to fly from the silver standard, more or less to debase their coinage, and to dump silver upon the market, so that in effect we would be buying, not the new surplus which comes from the ground, but old silver coinage melted up by these countries because it was financially attractive for them to melt it up, and we would be compelled, under the proposed amendment, to buy it and take it off the market?

Mr. WHEELER. Quite the contrary, let me say to the Senator from Maryland. The minute silver is remonetized at $1.29, we would not be buying. I submit that if we simply went into the market, as is proposed—if the Senator from Texas will permit me——

Mr. SHEPPARD. I yield to the Senator. I am glad to have the Senator make his statement.

Mr. WHEELER. If we went in, as has been proposed, and bought silver and treated it as a favored commodity, then there would be no question but that the Senator would be absolutely right, because of the fact that there would be no unlimited demand, and those countries would simply say, "We want to unload our silver upon the United States, dump it upon the United States market, and get away from it, because it is not going to be used as money."

Under my proposal the price of silver would be immediately stabilized the world over at $1.29^{29}/_{100}$. Consequently, the money of India, the money of China, the money of all the silver-using countries, would immediately have the silver purchasing power of $1.29^{29}/_{100}$ in those countries, and, as a result, it would be worth more in those countries than it would be worth in the United States, because to ship it over here would mean the necessity of paying the cost of transportation, the cost of insurance, and so forth.

Mr. TYDINGS. Mr. President, I still do not make my point clear. Assuming that silver is worth 24 cents an ounce, and the Senator's amendment drove up the price, it strikes me that would be an added inducement to these countries having bullion silver to sell it.

Mr. WHEELER. Not at all. They would not sell it to the United States. They would simply put it into coinage, because of the fact that that silver would then have a higher purchasing power, not only according to my statement, but according to some of the best known financiers of this country. I talked in my home last night with one of the leading economists of this country from New York. He stated that beyond a question of doubt silver would go to $1.29^{29}/_{100}$ the world over. I talked to one of the leading economists of one of the great banks of New York, as I stated a short time ago, who made identically the same statement. I talked to one of the leading economists in the city of Washington, who made the same statement. Unfortunately, these men, by reason of their connections and their holdings, are unwilling to go before some committee of Congress and testify at the present time. But if the price of silver rose to $1.29^{29}/_{100}$ in India, what incentive would there be to send that silver to the United States of America and to sell it to the United States? We would not buy it. My bill does not provide for the buying of silver by the United States.

Mr. TYDINGS. There would be every incentive, may I say to the Senator, because if they could sell for that price they could turn around and buy gold with it, which all nations want, because that is the standard in which trade balances are settled.

Mr. WHEELER. If the price of silver money in India had a purchasing power of $1.29, the same as it had in the United States, the man who would take his silver money and ship it to the United States, and thereby have to pay the expense of shipping it here—the transportation charges, and the insurance costs—it seems to me would be a very poor business man. There is only one way by which that silver would come to the United States, and that would be in exchange for manufactured goods.

Some silver would come here undoubtedly. If we remonetized silver to-morrow, undoubtedly there would be some speculators in India, some speculators throughout the world, who would immediately send their silver here, until such time as they found that we intended to maintain the price ratio provided in my bill and were strong enough in the world to maintain it.

Let me also call attention to this fact: England would immediately have to follow suit, in my judgment, because if she did not we would take the trade of the Orient away from Great Britain and people of the Orient would buy here instead of buying in Great Britain.

Would the Senator rather have silver in payment for manufactured goods, or would he rather have 12,000,000 people continue to be idle throughout the world? Everybody says that what we want is the opening of the factories; and the man who would first benefit by the adoption of my proposal would not be the farmer—it would be the manufacturer. Secondly, it would be the farmer who would benefit by it.

Mr. TYDINGS. If the Senator from Texas will permit an interjection——

Mr. SHEPPARD. Certainly.

Mr. TYDINGS. I want to say to the Senator from Montana that I feel that the stabilization of silver currency is the real foundation stone upon which rehabilitation may be built, and I want to vote for the measure which will best accomplish that result.

My only fear has been that, if the United States acts singly, other countries will continue to debase their silver so we will be in the position of a sponge, and we will have to absorb the silver which other countries will sell in order that they may get money with which to buy gold. My fear is that, if silver rises in Great Britain, she would sell her silver and buy gold which she sorely needs in many of her international relations. Therefore, unless nations act more or less in concert, if we take over the whole burden upon our own shoulders, I am afraid it may be a very staggering weight before we are done.

Mr. WHEELER. As I pointed out a moment ago, this country was on the bimetallic basis up to 1873. England went off the bimetallic basis in 1816, France about 1870, and Germany in 1871. The last two countries that were on the bimetallic standard, and they were there alone, were Germany and the United States. We were on it alone for something over a year when no other country in the world was on it. I challenge anyone to go back through the records and point out where anyone complained of the dumping of silver in this country in 1873.

Mr. TYDINGS. Mr. President——

The PRESIDENT pro tempore. Does the Senator from Texas yield further to the Senator from Maryland?

Mr. SHEPPARD. I am glad to yield.

Mr. TYDINGS. I am not taking issue with the Senator, but I know the Senator will be fair enough to concede that the need for dumping to-day, through national exigencies all over the world, is much greater than obtained in the years to which he has referred, for the reason that since that time the national-debt situation has become a web and every nation is attempting to get out of that web. The only way they can get out of that web is with gold. If they have not the gold, they must remain enmeshed until we make a settlement which will be appropriate.

I come back to the main objection, which to my mind might lie against the Senator's proposal, and I say it without any idea of belittling at all the splendid effort he has made to tackle and solve the question. It seems to me if the price of silver is materially increased the nations having silver will sell that silver at the high price and translate it into gold, because gold is the touchstone with which they must proceed to an orderly progress in their own country. My thought is that it will encourage the sale of silver with the idea of translating it into gold.

Mr. SHEPPARD. May I say at that point that nearly half the people of the world live in the silver-using Orient. They have been accustomed to silver for centuries. They are not accustomed to gold and will not use it in ordinary transactions for many reasons. No people are more weighted down by custom and habit than the people of the Orient. To say that they would change their whole monetary system and put it upon a different basis and substitute gold for silver, making wholesale purchases of gold for that purpose, would be to advance an almost unbelievable idea.

Mr. TYDINGS. Mr. President, will the Senator yield further?

The PRESIDENT pro tempore. Does the Senator from Texas yield further to the Senator from Maryland?

Mr. SHEPPARD. Certainly.

Mr. TYDINGS. Take the question of China as an exact illustration. China is on the silver standard. China is comparatively prosperous at the present time. But suppose the Chinese Government needs 30 or 40 airplanes with which to fight the Japanese or for the purpose of putting down banditry in China or for any other purpose. In order to acquire those airplanes she has to have gold, because there are no airplane factories in China. If she buys them from the United States, she has to take a vast amount of silver and translate it into gold in order to acquire the airplanes.

China at the present time can stand no new internal taxation. She is at the saturation point. She is on the silver standard. The result is that China is impotent. She can not defend herself because she has not the weapon of gold with which to go out into the armament market and buy the equipment she needs to hold off Japan or to establish order in her own country.

Mr. WHEELER. Mr. President——

The PRESIDENT pro tempore. Does the Senator from Texas yield to the Senator from Montana?

Mr. SHEPPARD. I yield.

Mr. WHEELER. The very argument the Senator is using is the very argument that should be used. In the first place China is a buyer of silver. The only thing in the world that China knows is silver. She will not divest herself of silver because her people will not use anything else. If she shipped all of her silver here to-morrow, she would have to buy it back somewhere else in the world, in order to have a currency for domestic and foreign trade. The reason China is in the shape she is now is because of the depreciation of silver. She can not buy airplanes and she can not buy automobiles to-day because her purchasing power has been killed. Remonetize silver, bring it up to where it was for centuries, $1.30, where it has always been until England sought to put India upon the gold standard, sought to debase the silver of the world, and we would put purchasing power in the hands of the Chinese Government.

Mr. TYDINGS. I agree with the Senator.

Mr. WHEELER. We would make it possible for the Chinese Government to come to this country and buy automobiles and shoes and clothing and everything else she may need. We would open the factories of this country, and nothing else under the sun can do it, because we would quintuple the purchasing power of over 60 per cent of the people of the world in that way.

Mr. TYDINGS. Mr. President, will the Senator from Texas yield for one final observation?

Mr. SHEPPARD. I am glad to yield to the Senator from Maryland.

Mr. TYDINGS. I stated in the early part of the brief remarks I have made that, of course, the rehabilitation of silver is one of the prime factors in world recovery. The Senator is, of course, arguing that the rehabilitation of silver will straighten out many of the questions which now confront the world. What I am attempting to say to the Senator is that China, knowing the position of silver is more capricious and uncertain than that of gold, would immediately, if she had wise statesmen, sell her silver at the high price, translate it into gold, and then have something that, no matter what happens to silver, would permit her to acquire the necessities to maintain her national existence.

My fear is that his proposal will encourage the sale of silver by the silver countries and, therefore, undo to a large extent what the Senator proposes to do, unless the United States becomes an international sponge to absorb all of the silver in the international pond.

Mr. WHEELER. Mr. President, will the Senator from Texas yield further to me?

The PRESIDENT pro tempore. Does the Senator from Texas yield further to the Senator from Montana?

Mr. SHEPPARD. I am glad to yield to the Senator from Montana.

Mr. WHEELER. For centuries and centuries England has been trying to get China to do exactly what the Senator says he fears. England went in and deliberately pounded down and debased silver in India because she wanted to drive India upon the gold standard. She could not do it because the Indian people by tradition still cling to silver and nothing under the sun can make them go to gold. How would they get gold and what would they do with it after they got it? They would have to put it in their banks and issue paper currency. No Chinese in China will take the paper currency of China. It is an impossible physical proposition to do it.

On the contrary, the remonetization of silver would do more to open the factories of the Senator's State than any other single piece of legislation that he or anybody else has proposed. Several pieces of legislation have been offered for the purpose of treating silver as a favored commodity. It is proposed to go into the world market and buy up the surplus of silver, just as we tried to do with wheat and as Brazil tried to do with coffee. That has not worked; it could not work; and it will not work. Nobody knows how much of a surplus of silver there is in the world.

There is only one way to carry out the idea of the Senator from Maryland to rehabilitate the world to-day and open the markets, and that is to remonetize silver. If the United States will do it, we need not have the slightest fear, because there is more sentiment, I am told, for the remonetization of silver in Great Britain to-day than there is in the United States, but they are being held back by the same influences that are holding us back—by a little group of selfish bankers of the United States who to-day have practically all of the money in their vaults. They are not lending it to the people of the country, and I do not blame them for that particularly, because, with prices falling and falling, no banker can make a loan to-day that is safe to-morrow. It may be safe to-day but not to-morrow. They have the money, and if they hold it and this depression continues, think of the power they will have. They will be able to take over not only the independent banks of the United States but all of the businesses of the United States.

Last night, as I said, this financier said to me, "The only thing I am afraid of, Senator, is that the remonetization of silver will not inflate enough, and it will not do it quick enough, because," he said, "the sound financial structure of this Nation is tottering." Another great financier in the city of New York said to me, "Senator, you are getting conservative. I do not think your proposal will do enough." Yet we are sitting here in this Chamber with the financial structure of the country tottering and we are doing nothing.

I am simply offering an amendment and asking the Members of the Senate to vote on it to get a start. I have no fear it will go too far. The fear that it will not go far enough to inflate and bring the dollar back in its purchasing power to where it was in 1928 is the fear I have. If they would take silver money for our manufactured goods it would help to bring back the purchasing power of the gold dollar. Remonetize silver and we would double the primary money of the world; we would immediately decrease the value of the purchasing power of the gold of the world; we would increase the purchasing power of the people of the world, the very thing that we want.

We may try to inflate our currency by paper, but we will never for one minute raise the commodity price level. When Germany's mark went to zero it did not affect the world commodity price level. When Austria's mark went to zero, that did not affect the world market price level. When Russia's ruble went to nothing it did not affect the world market.

But, Mr. President, I say that no single act that can be done by the United States Congress will be of so much benefit to the people of the United States as the remonetization of silver—not only to the people of the United States but the people throughout the world. Yet we sit here in the Senate of the United States, with our factories and banks closing, with 12,000,000 people walking the streets unemployed, with the farmers up in arms refusing to pay their taxes. Absolutely there is, as a matter of fact, a small revolution prevailing at the present time in the Middle West, and it is spreading day by day. Yet we sit idly by, afraid to act, afraid to do this, afraid to do that, afraid the national banks will object, afraid that somebody will criticize us when we are only trying to do something. While the house is burning we sit here afraid. We are afraid that some man is going to say, "He is going to vote against it because he does not want to put it upon the Glass bill as an amendment." Senators, go back home and tell your people you did not want to do it because you did not want it as an amendment upon some bill that will not do the country a bit of good—and yet we can not get it another way—and see what the response of your people will be.

Leading editorial from the Portland Sun, dated April 25, 1896:

EFFECT OF THE TWO STANDARDS

It is a fact, not a theory, supported not only by the best known authorities but by the common sense of every individual who carefully investigates the question, that the bullion value of silver directly influences and governs the price of wheat, cotton, and all other products raised in nations on a silver monetary basis. Anyone of ordinary intelligence or rightfully outside the wards of idiocy or the insane asylum, appreciates the fact that the products of all nations on a gold monetary basis which are sold in competition with similar products raised by nations on a silver monetary basis are also directly affected by the bullion value of silver. The prices of such products rise as the bullion value of silver rises, and fall as the bullion value of silver falls. In evidence of the correctness of these statements, the Sun quotes from the report of the British royal commission on gold and silver, held in 1887. Before this commission Mr. J. Shield Nicholson, professor of political economy at the University of Edinburgh and one of the most distinguished economists of Great Britain, gave his evidence in reference to the effect of the competition of India on the price of American and English wheat. The following question, which is precisely to the point, was put to Mr. Nicholson by a member of the commission:

"Indian wheat is the very wheat that is complained of by Secretary Manning, Secretary of the United States Treasury, as having lowered the price of European and American wheat, and he attributes it all to the divergence of gold from silver. You do not think tying gold and silver again would raise the price of English and American wheat by 25 per cent?"

In his reply Professor Nicholson discusses the factors entering into the determination of prices under given conditions, and on the point immediately germane to the point under discussion says:

"Now it seems to me probable if the price of silver rose to its old level, wheat could not be profitably exported from India until prices rose in a corresponding degree. For India, being a silver country, the price of wheat there is independent of the relative value of gold and silver. An exporter to England at present will give the Indian price in silver, and he can buy his silver for less gold, and thus competition will lower the price. If the price of silver rose, the exporter from India must get more gold. Thus a rise of silver would, on this view, raise the price of wheat to a corresponding degree."

What is true of India is true of Russia, the Argentine, Egypt, and every other competitor of the United States that is on a silver monetary basis. What is true of wheat is also true of every other product raised by nations on a silver standard and sold in competition with products of a similar kind raised in the United States or in other gold-standard nations.

Should any of our readers desire further evidence on this point, we would call their attention to Mr. Daniel's work on the Industrial Competition of Asia, also Mr. Bagehot's work on the Depreciation of Silver. Mr. Bagehot was for many years the editor of the London Economist, and is to-day one of the most pronounced gold monometalists of Europe; advocating the tenability of his position for the reason that the lower the bullion price of silver the cheaper can Great Britain get her wheat, cotton, and raw materials, for a supply of which she has to depend upon other nations. Mr. Bagehot, in his work just referred to, on page 54, very tersely expresses this fact as follows:

"The necessary effect of a depreciation of silver as against gold is to give a bounty on exports from India and the other silver-using countries to England. An English merchant can now buy many more rupees than he formerly could with the same number of sovereigns, and therefore he can import from India, though prices at Calcutta are not at a level at which it would have paid him to operate if he had not had the novel facility in getting rupees."

At a meeting of the British and Colonial Chambers of Commerce, held in London, 1886, Sir Robert Fowler, a member of Parliament, a banker and ex-mayor of London, made the following statement:

"The effect of the depreciation of silver must finally be the ruin of the wheat and cotton industries of America and be the development of India as the chief wheat and cotton exporter of the world."

The gentleman's sagacity and farsightedness is clearly demonstrated by present existing conditions. In 1886, the time of the gentleman's prediction, wheat was 87 cents per bushel in Chicago, cotton 10 cents per pound in New York, and silver 99 cents an ounce. Since then wheat has touched 50 cents per bushel in Chicago, cotton 5¼ cents per pound in New York, and silver 56 cents per ounce. To-day there is a speculative rise in silver, due to the probable call by Germany of an international conference, and a consequential rise in cotton, wheat, and all other products of silver-standard nations. A rise approximating 20 per cent is shown by to-day's prices in silver, cotton, and wheat above the lowest figures touched by those commodities.

No better arguments in favor of the free and unlimited coinage of silver can be advanced in the United States than the arguments of the gold monometalists advanced in Europe. The conditions are exactly reversed on the two continents. The United States are producers of breadstuffs and raw materials, exporters, and debtors; Europe, or particularly Great Britain, are consumers of breadstuffs

and raw materials, importers, and creditors. Thus it is seen that if the world's price of silver be nearly doubled by the remonetization of that metal by the United States, the present price of cotton, wheat, and our other cereals will also be nearly doubled, on account of the direct effect and influence that the bullion value of silver has upon the price of those commodities. Under the remonetization of silver the producers of Oregon would receive on a conservative estimate $25,000,000 more for their products annually than they receive on the single gold standard. Every community or State dependent for the greater portion of its wealth upon its agricultural resources has been as directly affected by the demonetization of silver as has the State of Nevada or any other State noted for its silver mines.

CHAMBER OF COMMERCE OF THE UNITED STATES OF AMERICA,
Washington, December 16, 1932.

For a year and three months depreciated foreign currencies have been exerting an undermining influence upon our economic situation:

First, by negativing our tariffs so that, in our home markets, American goods have been displaced, factory output cut down, and unemployment increased.

Second, by depressing price levels and preventing any upward price movement to a basis of fair return for American labor and capital.

Third, by decreasing much-needed customs revenue to our Government.

Over half of the products coming into the United States are benefiting from the advantage of depreciated currencies. Over 20 foreign countries have that advantage in undercutting the prices of American products.

The membership of our chamber urges emergency legislation to meet this condition.

Facts about the situation are set forth in the inclosed report of the foreign commerce department committee of the chamber, together with suggestions as to the legislation needed.

These proposals, you will observe, ask only that the competitive status prevailing prior to September, 1931, be restored—surely a measure which present conditions make highly desirable.

I trust you will give this report your consideration and support the necessary legislation in the interests of increasing revenues, restoring employment, and giving to our American producers a fair competitive position in their own home market.

Very truly yours,

H. I. HARRIMAN, *President.*

[From the Saturday Evening Post, December 3, 1932]

"BUY AMERICAN"

By Samuel G. Blythe

England was in the tumult of her latest national election. The mother country of the vast empire that belts the world, with her back to the topless wall of economic disaster, of political disaster, of social disaster, was fighting a finish fight against powerful foes, both within and without her little home islands, fighting with the desperation and the courage that love of country inculcates when the peril is great.

An American of world-wide interests, on his way to France, walked on a boat at Dover. He met a chief steward he knew.

"Who will win the election?" he asked the steward.

"England will win, sir," the steward told him, his shoulders thrown back and his answer confident. "England will win."

And England did win. He and thousands of his fellows were ready to save their country from the peril they had had a hand in making.

Some years before France was fighting the same sort of a battle, beset by similar economic enemies. Her franc was in danger. Her whole financial structure was being undermined. Debasement of her currency was threatened. Inflation was just ahead. The sappers and miners had their explosives and tunnels under the Bank of France.

Poincaré was making the fight to save the franc—an old man, and a patriot. The opposition was defiant, dangerous, resourceful, relentless, and led by Herriot, the chief of the Socialists. Herriot was always on the old man's flank, always goading, decrying, taunting, torturing Poincaré, even then feeble, but upheld by the love of his country.

Finally, after a vicious attack by Herriot, the aged statesman turned on Herriot, pointed a shaking finger at him, and raising his voice to its utmost limit, urged by that racial ferocity that exists in France as nowhere else, screamed:

"Are you a Frenchman?"

The noisy Chamber of Deputies stilled instantly. There was silence, complete and ominous, for half a minute as the old man stood with his outstretched arm and accusing finger pointing at the bulky Lyonnais. Then there came a howl of rage. The quibbles and sophistries and theories of a financial debate were forgotten. France was in danger, and every man in that chamber was a Frenchman before he was anything else, and before all else. Herriot, Premier himself as this was written, had no answer. France had been invoked. And Poincaré saved the franc and saved France from economic disaster.

It is the belief in France that a good country can not be hurt by loving it, and by serving it first, before all else. It is the belief in England that the interests of England are the paramount interests of all Englishmen. But is it so in the United States?

The answer is that it is not so true of this country, and that answer is based on the fact that conditions in this country—political, economic, and sociological—are such that a national unity is almost impossible of accomplishment because of our vast spread of territory, our vast diversity of population, our vast, complete or partial, assimilation of peoples from all the world, and our unique position of being a self-supporting entity, with almost everything we need for our well-being—save, perhaps, certain luxuries and other nonessentials—producible within our own borders.

The unrestricted immigration of former years brought to this country millions of people from all other countries in the world, but as yet the melting pot has not reduced to an entirely American product all this foreign human material cast into the crucible. France is a French country. Few go there to compete in business or politics with the Frenchmen. England is English, and stays so. Englishmen go out to their dominions, but few Englishmen consider their adventures into any of those dominions as anything more than a temporary absence. England is always home to every English expatriate.

Therefore a national unity, not so difficult to establish at a time of crisis in France or England, say, is almost impossible of accomplishment in this great, far-flung country, with its sections and cross sections of citizenry who originated elsewhere, and who, escaping from the privations of their native lands, came here to enjoy our vast benefits, but at the same time kept a few roots in their natal soil. Instead of being a homogeneous people, we are a heterogeneous people. We get together fairly well—only fairly well—in a great national crisis such as the Great War, but we operate selfishly and sectionally in most of our political and economic situations.

A REAL TEST OF AMERICANISM

There is nothing to our usual political situation save that numerous millions of our people want the Republicans to have the governmental power and perquisites, and numerous other millions want the Democrats to have that power and those perquisites. The result is that we operate under the auspices and with all the maladministrations of a political partisanship instead of an American partisanship. Our political campaigns are all based on the dominance of one major party or the other, rather than on the domination of the real spirit of Americanism.

In this recent presidential campaign we heard countless predictions that the Democrats would win, or the Republicans; but was there anywhere from any source a voice suggesting that the United States would win? Not a whisper, and the reason is that neither party is strong enough permanently to defeat the other party, and that neither party has unlimited or continuing power enough to do anything but conduct a partisan government subject to ceaseless compromise and exigencies and opportunism and sidestepping and buck passing. Our political condition does not allow of a national unity of action. Our actions, in a governmental sense, are either partisanly Democratic or partisanly Republican. And not particularly American.

Now the economic condition of the country is somewhat analogous. Owing to the fact that in its widest sense the criterion of success in this country has been, and still is, first, bigness, and second, money, we have built up a commercial and financial situation that has for its incentive domination along both lines and devil take the hindmost. This structure has had, and still has, its economic troubles since the depression began, and during it, but so have the commercial and financial structures of all the world.

Since its inception it has been ruthless in competition, and that is as it may be. Business is based on getting business, and the way to get business is to produce, distribute, and market cheaper and better than the other fellow. To be sure, this has brought into effect a great number of restrictive laws which, theoretically, give the consumer a chance, a protection against the rapacity of the makers and sellers, but in reality are not so beneficially operative as they were designed to be.

Business is business. That is one of the oldest commercial maxims of the world, emphasized by the principle of "caveat emptor," recognized in both English and American law. Let the buyer beware. Therefore the buyer in all the markets of all the world has bought as cheaply as he could and the seller has always sold as dearly as he could, to his greater consequent profit.

That is human nature. That is an inheritance from the earliest of the bargainings of homo sapiens until the present day. It is as inherent as the instincts of self-preservation and self-reproduction. The whole commercial structure of the world is based on it. It dominates every transaction, save in the case of affluent fools, from San Francisco to Samarkand, from Threadneedle Street in London to the great Mitsui Co. in Japan. Sell as dearly as you can and buy as cheaply as you can. It goes for almost everybody, from the large corporation and its smallest competitor to the butcher, the baker, and the candlestick maker—you, me, and the man up the road.

We operate in theoretical unity, but in reality, environmentally and geographically, every four years in our presidential elections—and, as at present, we all feel the depression in the same way. However, a riot in Boston has no special significance in San Francisco, save as an item of news, and anything that happens in Minneapolis means nothing much in New Orleans. Whereas what happens in Liverpool is of direct and immediate interest in London, and when there is a disturbance in Lyons it is instantly reflected in Paris. Compared to ours, those countries are so small.

Thus this lack of a spirit of national unity can be extenuated. Geography has more to do with it than anything else—geography

and our mixed population. But now a situation has arisen, a condition confronts us wherein every resident of the United States, every American, whether he is a descendant of the Pilgrim Fathers or an immigrant from Finland, whether he is of New Amsterdam ancestry or recently arrived from southern Europe, whether he is a colonial Marylander or Virginian, or of German, or Scandinavian, or of recent Italian descent—now a crisis, national in scope, has arisen that should stir every real American, every naturalized American, every pseudo-American, every intending American, every immigrant American, provided that the prosperity, progress, and perpetuation of the United States is of consequence to them, to determined and concerted action.

Here is a chance for every American to prove whether he is an American or remains a foreigner; whether he has the great commercial and prosperity-bringing interests of this country at heart, or is merely a theorist, a sophist, a malingerer in the busy currents of our national life; whether he is a believer in foreign anti-Americanism, a detractor of his own country, a Francophile, an Anglophile, a promoter of theories rather than a facer of facts. Here is an opportunity for all Americans to do something for America, for the United States.

The prosperity of this country depends on the business done in this country. The business done in this country depends on the support of American business, commercial, and manufacturing institutions. If our people buy what we make, every class of our citizenry profits—the workers, the transporters, the distributors, the sellers, the financiers, and the consumers, for our wage payments are billions and without those billions we could not survive an hour. If we do not consume, we can not make. If we do not make, we can not pay our potential makers. If we do not pay our makers we lapse into bankruptcy, for the real prosperity and progress of this country rest on wages—salaries—income.

All this is true enough in a didactic or expository sense, but it leads up to a present situation that is in no sense either didactic or academic, and is pressing, vital, and of vast consequence to the United States. It lays the groundwork for a statement of a condition that confronts the United States that is of immediate concern to every American, and points a way for every American with any purchasing power to be of great and instant service to his country. It seeks to enlist Americans under banners that should be unfurled in every community, to enroll all Americans under the patriotic injunction, promise, and practice to:

Buy American!

When England saw her trade slipping, as it did, her exports decreasing, her unemployment mounting, her markets flooded with cheaply made foreign goods, her proud pound sterling forced down because England had to abandon the gold standard, her credit impaired, her dominions and colonies seeking other markets than hers, her dole mounting, England enlisted under the slogan:

Buy British!

England appealed to English unity, English tradition, English patriotism. England took immediate steps to perfect reciprocal tariffs with her dominions. England put every Englishman, every Australian, every New Zealander—all the sons of Albion in her widespread possessions—under the patriotic obligation to rally to the trade and prosperity defense of the mother country. "The homeland needs you" was the appeal sent out. "Buy British!"

All the empire rallied. They perfected protective and defensive tariffs. They consolidated the loosely tied empire into a compact, fighting, economic structure. The entire empire put its gigantic shoulder to the Buy-British wheel. The results are already apparent. England is coming through.

WHERE TARIFF PROTECTION ENDS

While our situation is not definitely analogous, our emergency is as great. We are now in a place where it is the duty of every American who is a real American to buy American, and the proof of that assertion is herewith set forth.

Naturally, as this situation relates to imports, the question of tariff would intrude if this were to be a polemical discussion; but this is not a polemical discussion and is a statement of fact. There have been about 40 general revisions of our tariff since George Washington signed the first tariff act on July 4, 1789. More theorists, protagonists, economists, and similar what not have taken hacks at the tariff question, in all probability, than at any other subject of national discussion since this Republic was organized. Also, more speeches have been made about it.

It took almost 18 months to pass the present tariff law through Congress, and the reports of the hearings before the House Ways and Means Committee and the Senate Finance Committee covered some 18,000 printed pages. The only tariff angle that comes into bearing here is the statement on the authority of the United States Commissioner of Customs that of all our imports only 38 per cent are subject to duty and over 60 per cent of those imports are on the free list.

The present situation that is depriving thousands of workers of jobs, closing factories, sending millions of our money abroad for all sorts of things we produce in this country, is based on this fact:

The United States has remained on the gold standard, has kept the dollar worth 100 cents, and about 40 other countries have gone off the gold standard, with the inevitable depreciation of their currency. This depreciation ranges from 50 per cent in Japan to about 10 per cent in Canada. This depreciation also decreases cost of production in these countries by the lowering of wages and the reduced cost of materials, and enables these countries to flood the United States, despite our tariffs, with these cheaply made goods, which are put in direct competition with American goods, after all freight and customs duties are paid and profit taken, at prices below the actual cost of production in this country, to say nothing of an allowance for a reasonable profit for the American maker and the seller.

THE SENATE'S EXHIBIT OF IMPORTS

There is an exhibit in the Senate Office Building at Washington of some of the smaller items in this vast list of goods made by the cheap labor of the countries that have debased their currencies. I saw it on the day this was written—in mid-October—the day, incidentally, that the hearings began before the United States Commissioner of Customs on this very matter, hearings that are vital to every American wage earner and wage payer, almost, in this country. There have been many protests made by manufacturers who have been practically put out of business by these importations, and much discussion of the matter. Finally, after a tremendous amount of harm has been done, the matter has been taken up again.

The Senate Office Building is a large building, with much space in it, but hardly enough to install an exhibit of steel and pig iron, say, or lumber products, and so on. So this exhibit is composed of smaller articles. It covers several long tables, and it is as miscellaneous in character as the stock of the modern drug store. All sorts of goods are there, in large array, from rubber boots and shoes to celluloid combs and dolls, from rugs to pocketknives, from gloves to rubber beach balls.

All the articles in that large collection were made in a foreign country, and the cost of producing them, paying freight on them, paying duty on them, and introducing them into this country to compete with American-made merchandise ranges far below the actual cost of producing these articles in this country; just making them, at our present scale of wages and materials, not at a selling price in the market.

I give a short list of these articles, showing the cost of each article, landed in this country all charges paid and ready to go into the market, and the cost to the American manufacturers, with our scale of wages and our price of materials, both money quotations being in American currency.

There are rubber boots there, made in Japan, that cost in American money to land in this country, all charges paid, just under 34 cents a pair, and that can not be made in this country for less than 95 cents a pair. There are rubber boots from Czechoslovakia that cost the Czechs $1.16 to lay down in this country that can not be made here at less than $1.48 a pair. And plenty of other rubber boots, shoes, overshoes, and so on, that carry out these ranges. There are rubber toys, beach balls, swimming rings, and other beach paraphernalia with the same discrepancies—a swimming float, for instance, that costs 17 cents to get into this country from Japan and costs us $2.46 to make. Rubber dolls that Japan sends here for $4.26 a gross and cost Americans to make $7.84 a gross; celluloid toys that Japan sends over for $20.14 a gross and cost $33 a gross to make here; celluloid combs that Japan offers here for $11.06 a gross and cost us to make $25.86 a gross. Such things by the hundred.

Japan lands here cotton hit-or-miss rugs at 6 cents each, and we can not make one of these rugs, with our wages, at a less cost than 29 cents. Japan sends grass rugs, 9 by 12 in size, landed here all charges paid, for 92 cents each, and they cost our manufacturers $8.88 each to make. They can land vacuum jugs here for 56 cents each, and the cheapest we can make them is 79 cents each. The difference in the price of toothbrushes by the gross is the difference between $9.67 and $15.

They are stuffing the market with electric-light bulbs and flash lights of various sorts. Japan sold in this country in 1932, at a price with which no American manufacturer could compete, 54,500,000 electric-light lamps and bulbs of various sorts. The Foreign Exchange and Trade Institute is authority for the statement that the principal miniature electric-light manufacturing company in this country, employing nearly 2,000 people, has recently closed because of this ruinous competition due to the disparity in exchange and the low wages and prices of materials possible in Japan, with the Japanese yen worth half of the 50 cents it was worth before Japan debased her currency.

BELOW MANUFACTURERS' COST

England sends us men's leather gloves laid down here for $24.89 a dozen pairs that cost us $26 a dozen pairs merely to make, and knives and forks at $4.81 for a set of six that cost our manufacturers $7.42 merely to produce. And so it goes, all through the long list of the goods on those tables in the Senate Office Building—crockery of all sorts, canes, silk goods, cotton handkerchiefs, beads, buttons, cutlery, watch glasses. The list is too long to itemize, but every item on those tables, and hundreds more not exhibited there, can be, and are, laid down in this country, with all charges paid, at prices in every instance below the actual cost of making to the American manufacturer, and to the consequent unemployment and drastic wage reductions of American workers, to say nothing of the vast outpouring of American money for these imports that should be kept at home.

I was sitting in the office of Captain Eble, the United States Commissioner of Customs, when a rag-rug manufacturer called him on the long-distance telephone from a town in Pennsylvania to ask about the new hearings. This man said he had been a rag-rug manufacturer, with a factory employing about 200 hands, and had been forced to close down because he could not make a rug for 29 cents in competition with a rug that Japan lands in this country for 6 cents. Captain Eble asked this man about the general status of the rag-rug industry in this country, and he said it is practically out of business; that it formerly employed 150,000 Americans, most of whom are now out of jobs.

American rag rugs are made from rags, washed and sterilized in sanitary factories. Although the duty on these rugs is 75 per cent, Japan lands them here at 6 cents each wholesale. Both these rugs are the hit-and-miss variety, and while the American article is of better quality, the imported rug has displaced it almost entirely in the markets of this country. And so with many other Japanese manufactures.

The average wage of the Japanese male worker before the country went off the gold standard was 2 yen, or $1 a day. Now it is 46 cents a day. The average wage of the female worker was 1 yen, or 50 cents. Now it is about 24 cents. This wage situation exists in every production. The decline in the china-porcelain industry, for example, is one-third. However, Japanese workers have work. No flood of cheap American goods has thrown them out of jobs.

Of course, these items, largely Japanese, are little things. The Japanese are the greatest imitators and the feeblest originators in the world. They have built a few ships, mostly on plans supplied by the Clyde, and a bridge here and there, but their finest hotel was built by an American, Frank Wright, and their finest building, the Mitsui Bank, in Tokio, was built by another American, Jim Stewart.

A sewing machine or a bicycle is about their limit in constructive effort, but, nevertheless, they do make by billions the sort of stuff that is above enumerated and much more not set down, and they are one of the greatest factors by means of their depreciated currency, their house labor, and their puny wages in the dislocation of our markets on this class of goods and the consequent unemployment of a large number of our own people. Given a sight at a beach ball, or a comb, or a rubber doll, or a pair of rubber shoes or boots, or any of the other hundreds of cheap things flooding the American market, the Japanese can and will imitate, and at production prices lower than elsewhere in the world, especially in the United States.

STEEL UNDER A PROTECTIVE TARIFF

So let us get away from the little things and turn to the bigger ones, steel, for example, and lumber products, and fisheries, and so on. Big things. Take iron and steel.

Japan makes comparatively little iron and steel. So Japan is out of the picture, but into that picture come Belgium, England, Germany, France, and other countries where wages are lower than they are here, where some currencies are depreciated, and where, as in Germany and France, the gold standard persists, with scales of wages and standards of living enormously lower than in the United States.

To bring the tariff into it momentarily, the American steel industry asked for no increase of duty in the Smoot-Hawley bill and received none. The existing rates are those of the Fordney-McCumber bill of 1922. Under normal conditions these rates would reasonably protect American steel workers and steel producers. However, conditions are not normal; steel is being dumped into this country in vast quantities at prices with which no American steel producer can compete. If, with all the protection the present American tariff affords, American steel wages were reduced to 75 cents a day, American steel producers could not possibly meet this foreign competition. The wages referred to are the wages prevalent in steel-producing plants abroad.

In the first quarter of this year the 19 leading steel producers in this country, after a drastic period of cutting production, sales costs, overhead, salaries, wages, and, for the most part, passing dividends, showed a net loss of $29,892,078. Not all of this was due to the dumping of foreign steel, for building slackened greatly in this country. But a large portion of it was due to that foreign cheap steel.

It would require several pages of this magazine even to summarize what has happened to this gigantic steel industry of the United States; but what has happened in one section is relatively what has happened in all sections, and, for illuminating example, let us review the situation on the Pacific coast.

Over a period covering 1931 and the first six months of 1932 there were imported into the Pacific coast territory 183,228 net tons of finished steel, made by cheap foreign labor and sent there under cheap freight rates in foreign ships.

If this steel had been produced by the Pacific coast American steel mills, the American money disbursed in the United States, going to the employ of American workmen, would have been as follows:

Raw materials	$3,201,325.62
Wages	2,671,844.28
Fuel oil	464,314.40
Electric current	382,855.73
General overhead and miscellaneous supplies	1,425,526.67
Total	8,145,866.70

In wages alone, the American workingmen lost more than $2,600,000 by this influx of foreign steel, and in all more than $8,000,000 that rightfully should have remained in this country went to foreign countries and to foreign workingmen, working under conditions and at wages no American would tolerate and no American employer would try to enforce. Moreover, the rotation of this more than $8,000,000 on the Pacific coast would have greatly increased the buying power for other commodities.

Is it good steel? It is not. The National Association of Flat Rolled Steel Manufacturers, comprising 41 makers in all parts of the country, in referring to this phase of the matter in a memorial to Congress, said:

"It is cheap Bessemer steel usually quoted at $5 the ton lower than what is termed 'good open-hearth steel' by the makers themselves. It is a cheap, galvanized product. Samples of a well-known brand made in Belgium averaged eight-tenths of an ounce of zinc coating per square foot. It is so cheap in price that if all the labor charges were eliminated from the cost of galvanizing these sheets, American producers could not compete with it."

WHEN CHEAP IMPORTS ARE EXPENSIVE

"Estimating 30 man-hours of labor to the production of a ton of the heavier grades of finished steel, at the average wage now applying in the American steel industry, one can readily compute from the prices quoted on foreign steel delivered along our seaboard that if all labor charges were eliminated from the cost of American steel producers they could not compete with the freight rates now existing from the foreign mills to the American seaboard."

As an instance of the seriousness of the situation and the loss to American workingmen, the association says that in 1931 the importation of 370,000 net tons of foreign steel caused the loss of a week's work each to 237,000 men in the steel industry, and to 37,000 miners, and the loss of wages and revenues to the railroads for transporting approximately 550,000 cars at an average of 33 tons a car. Every ton of foreign steel imported into the United States means the loss of four days' work to some steel laborer. Also, it means a loss to the railroads and their employees of the transportation of the 4 to 5 tons of raw material necessary to the production of 1 ton of finished steel, together with a proportionate loss to all industries, utilities, and labor serving the steel industry.

So much for steel. Another gigantic industry that has been paralyzed by these cheap importations is the rubber industry. The United States Commissioner of Customs, speaking recently on this phase of this displacement of American goods, said:

"It is the displacement of American labor and American merchandise by these low-priced importations that plays havoc with our economic situation. It is this which is depriving many American men and women of their means of livelihood. The vice presidents of three of the largest rubber companies in the United States told me that 26,000 employees in the rubber boot and shoe industry are affected by the importations now flooding our markets from Japan and Czechoslovakia, and that this industry is threatened with annihilation. One of these concerns last year lost $5,000,000 on this branch of their industry alone.

FOREIGN THREATS TO OUR INDUSTRIES

"The American china, porcelain, and earthenware industries are very seriously affected. Thousands of their employees are working only half time; and if these importations are permitted to come in at their present prices, a representative of the pottery industry tells me, several factories will be forced to close down in this country."

Let us consider lumber and its products. And fish. There is $86,000,000 invested in the wood-pulp mills of the Northwestern United States, and most of this large sum was invested in the past seven years, and there is $50,000,000 invested in the Pacific coast fisheries. As compiled from the industrial insurance rolls of that section of the country, there are now 122,000 men out of employment in the lumbering and fishery industries in the States of Oregon and Washington, to say nothing of the very large number of men not employed in the lumber and fishery industries in California.

The markets are flooded with pulp from Sweden, Norway, and other countries that have debased their currencies, putting their production costs, including wages, at such low levels that American producers can not compete with them.

To show how this works, an instance is cited of an order for 8,000 tons of wood pulp on which a Washington State firm quoted a few months ago. The Swedish krona was then depreciated about 35 per cent and the American firm quoted, on that basis for the krona, a price that would get the business for the United States. The Swedish krona immediately dropped another 15 per cent and the United States did not get the order.

Our investment in fisheries is now in jeopardy because of the cheaper products sent in by Japan, which can catch the fish and pack them, owing to the depreciated yen and the consequent almost negligible wage costs, and sell in the United States at a price with which the packers of the United States can not compete.

The list is long and disastrous. The merest detail of what has been happening, and is happening, to the workingmen and manufacturers of the United States has been given here. There are few industries that have not been crippled by this flooding of cheaply produced foreign merchandise, and few workingmen who have not felt the pinch of it either in loss of jobs or curtailment of wages.

A survey recently issued by the United States Department of Labor shows that the average wage for all American manufacturing establishments is 60 cents an hour, while the corresponding wage in France is 12 cents an hour, in Italy 9 cents, and in Japan 7 cents an hour.

The average American worker is the highest paid worker in the world, but he will not be long if this flooding of the country with cheaply produced foreign merchandise continues; this flood of merchandise that, owing to depreciated currencies, has almost eliminated our tariff protection.

At the time of writing—mid October—almost 43 per cent of the importations arriving in the United States originated in countries, including Canada and Newfoundland, off the gold standard. This is a percentage of value on the basis of depreciated currency and

not of volume, but the volume is constantly increasing. We are too easy for these exporters not to take expert advantage of us.

In speaking of this, Captain Eble, the United States Commissioner of Customs, says:

"So long as a great number of the leading nations of the world ship their commodities into the United States at depreciated-currency prices, such importations will continue to increase and their purchases of our wares will continue to decrease. It is axiomatic that in order to keep their heads above water, such countries will be obliged to buy only from those which have also abandoned the gold standard."

KEEPING COMMERCE ON GOLD

"By the same token, those countries remaining on the gold standard will continue to sell us less and less, since they will be unable to compete with those countries selling us their wares at depreciated-currency prices. At the same time they, too, will be constantly losing trade with countries which have abandoned the gold standard. Thus will the commerce of the world continue to grow more lopsided. Indeed, isn't it possible that greater chaos is facing international trade from this feature rather than from tariffs and import restrictions?"

I said that this was to be no polemical discussion, nor a discussion of remedies of the existing disastrous situation. It is a statement of facts. However, as a suggestion of what is necessary to be done, the following expression of Mr. John J. Underwood, of Seattle, one of the recognized tariff authorities in the country, is of interest:

"There is only one method of correcting this—namely, through equalization of imports into the United States on a gold basis. This will automatically reestablish normal trade flow, if not in volume at least in principle, between the nations and give them an equal chance at our trade. Such a step would likewise have the effect, as quickly as possible, of inducing these foreign nations now enjoying debased-currency trade to go back on the gold standard, as the trade advantage automatically gained by them through their ability to undersell gold-standard countries will be lost as far as the American market is concerned."

All this is of the future. As this is written hearings are in progress in Washington, attended by dozens of great and small manufacturers who are telling their sad stories and seeking a solution of this great peril to American industry, American wages, American standards of living.

On October 24, President Hoover, acutely conscious of what has happened and is happening to American wage earners and American manufacturers because of this dumping of low-priced foreign goods, addressed a letter to the Tariff Commission directing that body to make immediate investigation into the situation as detailed, in part, in this article and report to him without the usual delays incident to such investigations.

A REMEDY IN THE PEOPLE'S HANDS

The President specified as commodities to be investigated as to American landing cost by foreign makers compared to mere production cost here, rag and grass rugs, toothbrushes, hairbrushes, rubber boots and shoes, leather gloves, electric-light bulbs, cutlery, pottery, silverware, jewelry, canned vegetables, canned fish, dried beans, iron and steel products, lumber products, metal goods, and chemical products; and named more than 100 communities where much unemployment has been caused by the flooding of our markets with these goods. Most of our larger cities and many of the smaller cities and manufacturing towns are in this list.

Under the present tariff law the President can not, by virtue of the flexible provisions of that law, change a rate of duty more than 50 per cent up or down. However, if the Tariff Commission so recommends, the President can change the basis on which customs duties are levied from the foreign, or production, value of the imported article to the American selling price of such articles when, as is the disastrous case now, a mere increase in duty would not be effective. This is what he has in mind, but any Executive action will be a considerable time in coming, owing to the slow operations of the Tariff Commission.

A measure of relief is in the hands of Americans themselves. Until the effective laws are made and the proper formulas decided on, the American people can vastly improve the situation by taking a voluntary, an American, a highly patriotic stand. They can demand American-made goods. There are plenty of them, most of which are of far higher grade than this stuff shoved in here from the cheap-waged countries of the world, from the countries where money is debased and labor is paid wages that no American could live on.

We have been greatly excited, in the past, over the influx of cheap foreign labor to this country, and have taken drastic legislative steps to restrict that cheap foreign-labor immigration by establishing quotas and otherwise holding it in strict control; but to what avail is all this as a protection to American labor, if we do nothing to restrict the importation of cheap-labor goods made in foreign countries? That is a more direct and dangerous competition than any influx of cheap foreign labor, because it strikes directly at the wages, the homes, and the standards of living of those who are now Americans.

Christmas is coming. Help American industry, the American workingman, the American merchant, by buying American goods. Do your Christmas shopping early, and confine it to American goods and gifts. Take none of this foreign stuff.

Are you an American? Then buy American!

The VICE PRESIDENT. The Chair must announce that all of this discussion has proceeded by unanimous consent. The Senator from Texas had no authority to parcel out the time and it could only be done by unanimous consent.

Mr. SHEPPARD. Mr. President, it has been a pleasure to hold the floor and thus to enable the Senator from Montana [Mr. WHEELER] to round out his remarks. The recognition of silver as a basic money will do far more to restore world stability than the currencies and financial dealings of certain leading countries of the world without any metallic standard whatever. I refer to such nations as England, which have gone off the gold standard entirely.

Mr. BROOKHART. Mr. President, this amendment raises one of the three questions that are necessary to be considered and acted upon by Congress in order to take us out of the depression. The proposition it presents, in a general way, is one of inflation. The other two propositions are the employment of the unemployed labor of the country and the restoration of agricultural prices to a parity with other commodity prices. Those three things are necessary to be done by the Congress of the United States before the depression can end.

Now, I wish to discuss briefly the question of inflation. What will be the effect if we inflate the currency? I will not particularly distinguish between the free coinage of silver and any other method of inflation. To me that is merely one method of inflating the currency—an effective method, to a certain degree—but whether it will effect the final cure is another question. What will be the effect if we do inflate the currency? What will be the effect on commodities? They will all rise in price, and they will all rise in the same percentage. I was in Berlin in 1923 and the first day I was there I bought 57,000 marks for a dollar. The last day I was there I bought 80,000 marks for a dollar. They were inflating the currency every day, and prices were rising in proportion. An unlimited inflation produces an unreasonable and unlimited rise in price; a controlled inflation is just as safe and sound as any proposition that can be made.

Mr. WHEELER. Mr. President, will the Senator yield for a question?

The VICE PRESIDENT. Does the Senator from Iowa yield to the Senator from Montana?

Mr. BROOKHART. I yield.

Mr. WHEELER. I assume when the Senator talks about "controlled inflation" he means world-controlled inflation and not merely controlled inflation in the United States?

Mr. BROOKHART. No; I refer to the United States. The United States can control its money volume irrespective of the world. The German illustration I am giving relates, of course, to Germany alone, and not to the world.

Mr. WHEELER. What I was going to say was that, of course, we could have an inflation of the currency; I agree that we could have a paper inflation of the currency in this country, and it would help the debtor class by cutting down the purchasing power of the dollar. We could go to the extent, by paper inflation, of wiping out entirely the creditor class in the United States, but we would not thereby, if the Senator will pardon me, it seems to me, in the slightest degree affect world commodity prices or increase the purchasing power of the people of the world. That is the difference.

Mr. BROOKHART. As I see the matter of world exchange, it is one of barter, anyway, carried on according to the value of gold or the value of silver or whatever we may agree upon when we trade with another nation. Other nations do not accept our money except as it has a barter value in their own country. So I am not going to spend much time on the international phase of this question.

What will be the effect of inflation on commodity prices? I think they will all rise in proportion to the inflation; I think there can be no doubt of that whatever. If we provide for the free coinage of silver, that will inflate our currency to a degree, and will, to some extent, increase our commodity prices.

Mr. President, I am one of those who do not believe it will raise them sufficiently. I do not believe there is enough silver in the world at this time to transact the business of the world, even in conjunction with gold. I think the two together are inadequate for that purpose.

Mr. THOMAS of Oklahoma. Mr. President——

The VICE PRESIDENT. Does the Senator from Iowa yield to the Senator from Oklahoma?

Mr. BROOKHART. I yield.

Mr. THOMAS of Oklahoma. In the opinion of the Senator from Iowa, how much inflation should we have? In other words, at what prices should commodities sell to enable the farmer to live, taking, for example, wheat, corn, cotton as stable commodities?

Mr. BROOKHART. In answer to that question, I will say that the economists usually accept the 1926 level as the normal price level of commodities, and the currency should be inflated until we restore that general level. After we have reached that general level, however, there would still be a heavy discrimination against agriculture. The 1926 level of agricultural prices would not be adequate in comparison with prices generally. Agriculture, therefore, demands a special treatment in addition to the inflation of the currency. Inflation alone will not cure the agricultural trouble. However, it will cure one part of the trouble, and that is the ability to day debts. There is where it will help agriculture; but it will raise the price of all commodities which the farmer buys as well as those he sells in the same proportion, and that, of course, will leave him in no better position than he is at present, so far as that feature is concerned.

Mr. THOMAS of Oklahoma. Mr. President, will the Senator yield further?

Mr. BROOKHART. I yield.

Mr. THOMAS of Oklahoma. I have before me some figures which I should like to submit to the Senator and ask his explanation of why these figures are thus. For example, on January 23, 1920—that was 13 years ago yesterday—wheat was selling for $2 a bushel, corn was selling for $1.42 a bushel, May cotton was selling for 38.10 cents a pound. That was at a time when we had the largest volume of circulation of real money—more than $6,000,000,000. On December 15 last year, 1932, when we had no credit in circulation and very little money in circulation, May wheat was selling at 47 cents on the exchange, May corn was selling for 27 cents on the exchange, and May cotton was selling for 6 cents on the exchange. Can the Senator explain the difference in those prices other than on the quantitative theory of money and credit?

Mr. BROOKHART. The quantitative theory of money is in part the cause of that decline, but there was a further cause for the agricultural decline. The railroad law increased agricultural freight rates by 60 per cent and reduced agricultural prices by that amount under the operation of the law, because the farmer's prices are fixed by the sale of his surpluses in the free-trade markets of the world and he must pay the freight to those markets. The Federal-reserve deflation policy was put into effect in 1920, late in that year, and, as we know it, deflated agriculture some $32,000,000,000—some $18,000,000,000 of it in land values and the other on the two crops of 1920 and 1921. Then tariff laws have been enacted which leave agriculture to buy at the high price levels of the protected American market and to sell at the prices fixed by the sale of its surplus at the low level of the free-trade market of the world. Add those things to the deflation of the currency and I think we have the causes of the change in prices which the Senator has mentioned.

Mr. LONG. Mr. President——

The VICE PRESIDENT. Does the Senator from Iowa yield to the Senator from Louisiana?

Mr. BROOKHART. I yield.

Mr. LONG. Does not the Senator know that there can not be what might be termed a healthy flow of currency where wealth continues to become concentrated in a few hands? If I may illustrate the point I am endeavoring to make, in 1916, according to statistics compiled by the Industrial Relations Commission, 2 per cent of the people of this country owned 60 per cent of its wealth; but, according to the statistics of the Federal Trade Commission—and they were certainly not friendly to the purposes—instead of 2 per cent of the people owning 60 per cent of the wealth, 1 per cent owned about 59 or 60 per cent of the wealth, and it has now gone to the point where it is estimated that some 5 or 6 per cent, or, perhaps, even a less percentage than that, own 85 per cent of the wealth. Does not the Senator think that will impede the working of our currency or of our medium of exchange, whatever it may be?

Mr. BROOKHART. Yes I have already pointed out some of the laws which produced the result the Senator has described. In addition to that, I might say that the railroads were inflated some $7,000,000,000 in value by the railroad law. If one had bought them at their market value, although the law fixed their value at $18,900,000,000, they would have been obtained, according to the market quotations, for about $11,750,000,000.

Insull inflated his utilities a couple of billion dollars; Morgan inflated his utilities some billions; every big corporation in the country issued stocks and bonds, and then organized syndicates, pools, and groups on the stock exchange and sold them to the public at enormously inflated values. In addition to that, bank examiners went out and told the banks to buy these long-time bonds as a secondary reserve; that it would be good banking business to do so, and to lay off farmers' loans, and things like that.

All that upset the economic situation; a good deal of it was a special discrimination against agriculture, and hit agriculture harder than it did other lines of business, and agricultural prices were driven lower than any other set of prices. Therefore, when we expand the currency, while that will help agriculture in part, and will make it easier for the farmers to pay their debts, agriculture will still need a special treatment to overcome the discriminations of the various laws that have been set up against it.

Now, Mr. President, I wish to review, as I see it, the effect of inflation on the various lines of business in our country. As I have said, I think the general effect on commodities will be to bring about a general rise in prices. What would be the effect on insurance contracts? I think it would reduce the value of insurance contracts.

What would be the effect on bonds? I think it would have the same effect on bonds.

What would be the effect on debtors and on creditors? It would make it easier for a debtor to pay his debts in the commodity which he produces; so it would be to the advantage of the debtor and the disadvantage of the creditor.

What would be the effect on labor? It would reduce the value of the present scale of wages; there can be no doubt about that.

What would be the effect on stocks? It would boom stocks; it would raise the prices of stocks.

Would there be any compensations? Take the insurance contracts; would there be any compensation for the resultant reduction in the value that would follow from the inflation of the currency? Yes; I think there would be. The defaults and the losses on their securities the insurance companies are now having make the present situation worse than the situation would be if the general value of insurance contracts were reduced. The same thing is true as to bonds. And what about debtors and creditors? The creditors can no longer collect their debts. The defaults and losses and bankruptcies they are sustaining put the creditors in worse shape than they would be if the currency were expanded. The last check I made there were $203,000,000,000 of debts in the United States, and the whole national wealth probably less than $280,000,000,000. This means general bankruptcy, and currency inflation is the only relief.

And about labor? Well, Mr. President, there are 12,000,000 men who are unemployed as a result of this situation. The reduction or apparent reduction in the value of the wage scale would be more than offset by the reemployment that would follow as the result of the expansion of the currency.

As to stocks and bonds, so far as they are concerned, I do not believe there can ever be a stable condition of prosperity established in this country so long as the New York Stock Exchange runs as it is now running. It is the greatest fraud, the greatest inflator, the world has ever known. I think it has got to be curbed and the inflation of paper stock values

stopped before we can ever have a general stable basis for prosperity in the United States.

Now about the gold standard: We have heard a good deal about the divine and sacred value of the gold standard, but what has happened under the gold standard?

Since 1920, 10,000 banks have closed, with the gold standard working and operating every day. Here are 12,000,000 workers unemployed, all under the gold standard. Here are practically all of the farmers of the United States on the verge of bankruptcy under the gold standard. The gold standard did not save us from this situation, so there is nothing sacred about the gold standard. Gold is no more sacred than any other commodity. Gold is one of the commodities of the world; and, in fact, I think its appreciation and its manipulation by the financial powers of the country have contributed a great deal to bringing about this result. Therefore the argument of the gold standard is a fetish. It ought to have no weight in the consideration of this subject.

I shall vote for this amendment. That will help some toward the inflation. I do not think it will help enough. Why? Because the contraction of credit in the United States, according to the last estimate I got, was some $13,000,000,000, so the amount of silver we coin will take only a little part of that place. This contraction of credit, as well as the advance of gold, has helped to bring about this lowering of commodity prices generally.

Then here is a further fact in reference to the gold standard: There are about $45,000,000,000 of bank deposits in the United States now, and every one of those dollars is entitled to have gold payment if it demands it. It can demand money of the United States, and it is all redeemable in gold. There is about four and a half billion dollars of gold in the United States, so if one-tenth of the depositors should go into the banks and demand their gold they would wipe out the gold standard in one day. They would take it all—every bit of it.

I do not think, myself, that any such standard as that is a safe and sound standard for business. I think it will always bring about these inflations and these depressions. Therefore early in the last session I introduced a bill to abolish the gold standard entirely; to make the national wealth the basis of the dollar; to make the dollar a fraction of the national wealth; and increase the denominator of that fraction by the average increase of the wealth of the country, which is less than 4 per cent a year; to replace all our money issues with this new money issue; and then balance the Budget, provide farm relief, unemployment relief, and pay the soldiers' bonus; pay the obligations of the Government in this new money until the price level rose according to the index to the normal level.

Formerly we did not have a safe guide, perhaps, by which to inflate currencies, but we have it now. This index of labor commodities is a perfectly scientific guide. It tells us when to stop, and it tells us how to figure this out scientifically and safely, and that will do justice to everybody at all times. That will stabilize the money standard, instead of our having the present gold standard, which fluctuates the same as any other commodity. Whenever it goes up in price it puts down everything else that it measures in price. That is a dishonest dollar. It could not be any more dishonest than that. It is just as dishonest as the depreciated marks of Germany that I have already described. That ought to be stabilized and ought to be corrected. This silver proposition will do part of it, at any rate. I do not believe it will do all, but because it will do part, and because it is in the right direction, I shall vote for this amendment.

Mr. THOMAS of Oklahoma. Mr. President, I rise in support of the pending amendment. I am for the amendment not because I think it will afford all the relief that ought to be granted or because it will grant the relief in ample time but because this is the only amendment that has been presented that is having any sort of serious consideration.

Mr. President, it has taken a discussion lasting 20 days to get the Senate to a point where it will even consider an amendment that has any influence whatever upon commodity prices. After 20 days of discussion of the provisions of this bill, wherein the junior Senator from Louisiana [Mr. LONG] has undertaken to call to the attention of the Senate some of our distressing existing conditions, on yesterday the Finance Committee reported a resolution providing for an investigation of the causes of our present economic and human distress. These 20 days during which action on this bill has been suspended have brought forth results.

The New York Times of this date contains the following paragraph. I read:

> Notwithstanding the admonitions of the Treasury head or of private bankers who have sought to advise Congress on the subject, the question of inflation is now seen as one that has to be met and solved.

Mr. President, the New York Times, probably the greatest newspaper in the world, admits that an issue has been raised in the Senate that must be met and solved. At least some good has come from this delay.

That, however, is not all. I exhibit to the Senate a copy of to-day's New York Daily Investment News. I take it that every Member of the Senate would like to see commodity prices rise. Is there any Senator who would not like to see the price of wheat go up? Is there any Senator who would not like to see the price of cotton go up? Is there any Senator who would not like to see the price of hogs and the price of cattle and the price of commodities in general go up? If there be, I now pause for a reply.

Mr. President, on yesterday, when the distinguished Senator from Montana [Mr. WHEELER] rose in his place and offered his silver amendment, immediately that act was reflected in the prices on the New York Stock Exchange. Here is the evidence of the statement I have just made. The headlines in this first-column editorial of the New York Investment News are as follows:

> Stocks temporarily under influence of inflation gestures in Congress.

I read. This is by Waldo Young:

> One of those surface waves of inflation psychology that have been appearing from time to time since the Huey Long group in the Senate has been paralyzing legislative proceedings made its appearance again yesterday and exerted for a time its influence upon the markets. * * *
>
> The wheat market rallied before the close from a sinking spell it had had shortly before 2 o'clock. The closing prices of wheat were up fractionally from the closing figures of Saturday and were about the best of the day. Most other commodities were dull and inclined to firmness within narrow ranges. Cotton closed up 2 to 4 points.

Listen:

> Silver, however, with the introduction of the Wheeler proposal in the Senate, advanced a quarter cent an ounce to a new high for the year.

Mr. President, if the mere suggestion of inflation, if the mere offering of an amendment proposing to coin silver, will raise the price of silver, will raise the price of wheat, will raise the price of cotton, will raise the price of corn, will raise the price of copper, then what effect would the adoption of this amendment have upon commodity prices?

This publication, like the New York Times, admits that inflation is the issue not only before the Senate but before the Congress and before the country; and this conservative financial publication published this day has the following to say:

> Perhaps inflation of some sort or other—and the method is just about impossible of forecast—will be the way out of the well-nigh impossible situation of the low-price level for commodities, especially in its relation to the country's tremendous burden of debt contracted at inflated price levels.

Mr. DILL. Mr. President——

The PRESIDING OFFICER (Mr. FESS in the chair). Does the Senator from Oklahoma yield to the Senator from Washington?

Mr. THOMAS of Oklahoma. I yield.

Mr. DILL. It seems to me there is not any doubt at all in the minds of any men who have studied the economic situation with relation to silver but that an increase in the price of silver would increase the price of products throughout the world; but the question I want to ask the Senator is this:

Does the Senator think that to raise the price of silver by one jump from 25 cents an ounce to $1.29 an ounce, as this legislation would do, is the best method of handling this situation?

Mr. THOMAS of Oklahoma. Mr. President, I can not divert at this time to details. I am arguing for a principle. That principle is that we must have more money in circulation; I care not what kind—silver, copper, brass, gold, or paper. I care not what kind it is. Even the printing of certificates, the printing of trade checks—even the printing of slips of wood in the Senator's own State saved the situation there. I can not take time to discuss details, but the principle is that we must have more money of some kind, or else our economic structure will collapse.

Mr. DILL. I agree with the Senator; but while I think an increase in the price of silver is the most vital method that can be used at this time to help the economic condition of the world, I am anxious to get the Senator's view as to the wisdom of doing this by one jump, as the remonetization of silver will do, or of doing it by some method that will bring about that increase gradually throughout the world.

Mr. THOMAS of Oklahoma. Mr. President, when a majority of the Senators accept the principle that we must have more money, then I shall be glad to discuss the question raised by the Senator from Washington.

Mr. President, I exhibit to the Senate a letter just received. At the request of the writer I will not give his name, but I will read one or two paragraphs. This letter is from the chairman of a committee consisting of some of the most wealthy men of the Nation. I read:

A group of business men has been considering problems arising from the change in the price level in the course of the present deflation. They recognize that such changes affect various economic groups unequally, and bear with peculiar severity upon some—for example, small-home owners with mortgages, and agriculture.

In their search for reliable information this group found that there exists at the present time no point at which the best experience and expert knowledge of the country is being brought to focus. As the first step in its work the committee engaged the National Industrial Conference Board to make a systematic analysis of these problems. It is hoped that the results of this investigation will make it possible to crystallize a sound program behind which national support can be mobilized at the earliest possible date.

Not alone the newspapers, but men who have their fortunes at stake, realize that this problem must be met and must be solved.

I call attention to an article reflecting in part the sentiments and statements of the distinguished senior Senator from Idaho [Mr. BORAH]. Recently the Associated Press carried a rather lengthy story about what the Senator from Idaho had said.

I shall read part of this article:

"It is going to be difficult—and I believe impossible—to balance the Budget, certainly to keep it balanced," the Idahoan asserted, "until you balance the budget of the taxpayers.

"Is there any way to bring about the latter until you devise a plan for increasing the price of commodities? Is there any way to do that except through reflation through adjustment of the money problem?"

I now quote from a signed article in the Chicago Tribune of January 18. It is most appropriate that this be read on this side of the aisle. The heading is, "Platform for Sound Money," and the article reads:

PLATFORM FOR SOUND MONEY

The Democratic platform declared for a "sound currency to be preserved at all hazards." The only concession it made to the inflationists was espousal of an international conference for the rehabilitation of silver.

New York financiers, believing that inflation is going to be a big issue during the Roosevelt régime, have been at considerable pains to learn the attitude of the head new dealer. As a result the word was being passed around Wall Street yesterday that the President elect is opposed to inflation of the currency, but is in favor of inflation of credit through the operations of the Federal reserve system.

If this be true, Mr. Roosevelt is in accord with the present policy of the Federal reserve system, which, for nearly a year, has pursued a credit inflation policy through purchasing of more than a billion dollars' worth of Government securities.

One of the purposes of this policy was to boost commodity prices, a purpose which has not been attained up to date, mainly because while the means of credit inflation has been provided there has been no inflation.

Mr. President, the force of this article is that the Federal Reserve Board, through the use of public credit, has tried to raise commodity prices. It has not been done, and it can not be done. Commodity prices can not be raised by the expansion of credit. The only way commodity prices can be raised is through placing more actual money in circulation. An increase or expansion of credit, or deposit money even, will not increase commodity prices.

Mr. President, what controls the price of wheat? It is not the number of contracts of wheat sold and bought on the Chicago exchange. It is the number of actual bushels of wheat in the granaries of the people and in the elevators of the country.

Mr. TYDINGS. Mr. President, will the Senator yield?

Mr. THOMAS of Oklahoma. I yield for a question.

Mr. TYDINGS. Without wishing to delay or to kill the amendment that is pending, may I ask the Senator from Oklahoma and the Senator from Montana, there being many silver bills pending, if it would not be more conducive to the best solution if all these measures were referred to one committee, with the idea that they all be considered, and the best of the bills reported, rather than to take up just one of them?

Mr. THOMAS of Oklahoma. We have the amendment now before us, and I favor voting on it rather than refer or postpone.

Let me call this fact to the attention of the Senate. In 1920, when there was the largest volume of money in circulation, the dollar had the lowest buying power. When the dollar had the lowest buying power, commodities had the highest selling value.

When money is plentiful, money is cheap. When money was the most plentiful, the dollar was the cheapest in buying power. In 1920, when there was this vast sum of money in circulation, the dollar was worth only 64 cents.

Mr. President, this cheap dollar did not suit some of our people. The vast amount of bonds soon floated into the hands and strong boxes of a few people, and the persons who held the bonds wanted the value of the dollar to go up, so that the dollar would buy more, and they took steps to increase the value of the dollar. They proceeded to make dollars valuable by making dollars scarce, and accomplished their purpose by taking money out of circulation.

In the first 17 months after 1921, after the change of administration, the new party coming into power took out of circulation more than a hundred million dollars a month; and as money was taken out of circulation, the buying power of the dollar increased.

I give the following figures from statistics furnished by the United States Department of Labor, Bureau of Labor Statistics.

In 1920 the dollar was worth $0.648. In 1926 it was worth $1. In 1929 it was $1.049. In 1930 it was $1.157. In 1931 it was $1.370, and in 1932 it was $1.543.

Last December, not 30 days ago, the buying power of the dollar was $1.597. There was no credit. Money was scarce, and $1 bought $1.59 worth of the commodities of the people.

How do such statistics apply to farm commodities? The same bureau states that last December the dollar had a buying power of $2.03 in farm commodities. How can the farmer pay his taxes, how can the farmer pay his interest, how can the farmer pay his debts, when he has to pay $2.03 in commodity values to get a dollar?

To give an illustration, in 1920 a farmer in Montana, Idaho, or North Dakota had $100 of taxes to pay on his 160 acres. In my section of the country he could take 1 bale of cotton and, selling that bale of cotton for 40 cents a pound, get $200 for it. He could take a hundred dollars of that and pay his taxes and have a hundred dollars left. This year, with money scarce and therefore high, the farmer perhaps still has his farm and perhaps still has to pay $100 in taxes; but how much cotton does it take to pay

those taxes to-day? He takes 4 bales of cotton to market and sells the 4 bales for $100, takes the $100 and pays his taxes, and has no money left.

That is the reason why taxes are not being paid. That is the reason why interest is not being paid. That is the reason why debts are not being paid. That is the reason why the distinguished Senator from Mississippi [Mr. HARRISON] is proposing to lend the people's credit to the people to pay their taxes. That is the reason why the distinguished Senator from Georgia [Mr. GEORGE] has a bill pending to lend the people's credit to the school districts to keep the schools going the balance of this winter. But, Mr. President, I can not subscribe to such a program of relief.

Mr. LONG. Mr. President——

The PRESIDING OFFICER. Does the Senator from Oklahoma yield to the Senator from Louisiana?

Mr. THOMAS of Oklahoma. I yield.

Mr. LONG. Has the Senator discerned any actual desire on the part of the advocates of this bill to raise commodity prices? Has he seen anything to indicate it in what they have been sponsoring here?

Mr. THOMAS of Oklahoma. The record made and being made here depresses rather than raises commodity prices. Mr. President, I do not know, and I can not understand, why Senators can not see that by placing more money in circulation, by the inflation of the currency—and by inflation I mean expansion or reflation, not inflation in the odious sense—Senators must know that placing more money in circulation will raise commodity prices. As an evidence of that I refer to the editorial read a moment ago. Even the introduction of the amendment raised commodity prices. Last winter when various bills came before Congress suggesting inflation, immediately prices began to go up on the exchanges of the country. If even the suggestion of inflation will raise prices, then what would real inflation do?

I am not in favor of going the route Germany went. I am not in favor of going the route Italy went. I am not in favor of going the route France went. But let us stop and consider a moment. Italy inflated, France inflated, Great Britain is now inflating, and what has been the result? Italy reduced the value of her lire from 19.3 to 5.5 and Italy was the only nation among our debtors abroad that did not ask for a postponement on the 15th of December, but made her payments in gold. France inflated by decreasing the gold value of her franc from 19.3 to 3.91. To-day, next to the United States, France has more gold than any other country in the world. France could have paid her debts on the 15th of December. She did not refuse to pay because she could not pay. She refused to pay for other reasons.

Great Britain went off the gold standard and now is proceeding to inflate her currency. Great Britain, while inflating, paid the debt installment due us in December. Mr. President, expansion, reflation, or inflation, call it what you will, is coming, and the longer delayed the worse it will be for the people of our country.

Mr. President, when my name is called, I shall vote for the Wheeler amendment.

The PRESIDING OFFICER. The question is on the substitute offered by the Senator from Montana [Mr. WHEELER] for the amendment of the Senator from Louisiana [Mr. LONG].

Mr. LONG. Mr. President, I do not desire the discussion to close without the Senator from Minnesota [Mr. SHIPSTEAD] being given an opportunity to speak. I had understood that he wishes to speak on the pending question. I have withheld any comment myself. I should like to cover just one or two points until the Senator from Minnesota can be notified.

Mr. CONNALLY rose.

Mr. LONG. I yield the floor to enable the Senator from Texas to speak.

Mr. CONNALLY. Mr. President, I understood the senior Senator from Idaho [Mr. BORAH] expected to address the Senate at this time. He does not seem to be in the Chamber at the moment, and I shall avail myself of the opportunity to speak briefly.

The PRESIDING OFFICER. The Senator from Idaho is in the Chamber.

Mr. CONNALLY. I did not see him. Does the Senator from Idaho desire to address the Senate?

Mr. BORAH. Not just at present.

The PRESIDING OFFICER. The Senator from Texas is recognized.

Mr. CONNALLY. Mr. President, I desire to embrace this opportunity to make some observations with reference to the money situation in general. I regret that at the moment I am not prepared to address the Senate in the fashion which the importance of the subject seems to require. However, I do desire to state that I am now investigating and studying a measure relating to the revaluation of the gold dollar.

Mr. President, every plan for inflation, whether it be through the issuance of paper currency or through the remonetization of silver, has for its purpose the reduction of the value of the gold dollar. That is the purpose and the object of every plan for monetary inflation—to bring down the value of the gold dollar.

Mr. WHEELER. Mr. President, will the Senator yield?

Mr. CONNALLY. In just a moment.

Mr. President, I submit that if the purpose of proposed legislation is to reduce the value of the gold dollar, the best and most practical way of reducing the value of the gold dollar is to reduce the value of the gold dollar, not indirectly, not by a backstairs method, not by going around and climbing in the kitchen window but by the exercise of the sovereign power of the Congress vested in the Congress by the Constitution to coin money and—to do what? Not to fix its value but to coin money and to regulate its value.

I yield now to the Senator from Montana.

Mr. WHEELER. Let me call the attention of the Senator to the fact that when France revaluated her gold franc, it had absolutely no effect upon world-commodity prices. It did help the debtor class; but the remonetization of silver would not only help the debtor class by bringing down the value of gold, but it would increase the purchasing power of over 60 per cent of the people of the world by increasing the value of their silver. That is the difference.

Mr. CONNALLY. Let me say to the Senator that I do not agree with his conclusion. When France revalued her franc, she increased the commodity prices in France, did she not?

Mr. WHEELER. Oh, yes. She helped the debtor class in France. There is no question about it.

Mr. CONNALLY. She increased the commodity prices of her people's products?

Mr. WHEELER. In France.

Mr. CONNALLY. I am undertaking to legislate for America. If France, by revaluing her franc, enabled the debtor class in France to pay their debts and enabled the price of commodities in France to appreciate and to enhance, then by the same token it ought to have that effect in America. Let me suggest to the Senator from Montana that so long as the other great commercial nations of the earth are on the gold standard, I can not believe that it would help America to go off the gold standard entirely and go to the silver standard. I do not want to argue with the Senator from Montana about the question, and I do not want to discuss the silver question. I want to discuss the gold question.

Mr. WHEELER. The only thing I want to say to the Senator is this: He says he does not want to discuss the silver question; but he is making statements with reference to silver that are not in accordance with the facts.

Mr. CONNALLY. I made no statement with reference to silver until the Senator from Montana interjected silver in the discussion.

Mr. WHEELER. Let me say to the Senator that the difference between the position of France and the position of the United States is this: France is not an exporter of wheat and raw materials. This country is an exporter. The result is that we can not, in my humble judgment, have the same effect by devaluating the gold upon cotton and

wheat as France did, because she is an importer and we are an exporter.

Mr. CONNALLY. I want to say to the Senator from Montana that I am concerned with doing something to aid the debtor class. By that I do not mean that I desire to deprive the creditor class of its just and fair return or repayment of its credits, but I do believe that it is fair and just for the Government of the United States, the repository of the power to regulate money, to exercise that power in justice and in fairness and revalue the dollar at such a figure as will give to the creditor the same fair measure of value which he gave to the debtor when he loaned the money.

I shall not undertake to-day to weary the Senate or to trespass upon its time by rehashing the facts with reference to depreciation in the prices of all commodities save gold. Those prices have not depreciated in the same ratio. But if Senators will investigate the question, they will find that the general price level, the average wholesale price level of commodities, measured by present prices, is wholly out of relation to the price and value of gold as compared with those of prior dates when the vast amount of indebtedness now outstanding was incurred.

Mr. President, so long as we inflate with paper money, so long as we inflate with silver money, so long as we inflate with any other character of money—and it is all anchored back on the supply of gold—when every paper dollar is redeemable in a gold dollar, when every silver dollar is interchangeable with a gold dollar, we have anchored the values of debts and of commodities to the high-priced gold dollar. It holds those values approximately in accordance with the world's standard of gold.

Now let me call the attention of Senators to the fact that this is no new exercise of power by the Government. On at least one former occasion, I believe it was in 1834, the Government of the United States changed the gold content of the eagle or the half eagle. That fact is adverted to by the Supreme Court of the United States in its decision in the Legal Tender cases, and I want to point out that under the authority of the Legal Tender cases the Congress has the power to change the gold content of the dollar and make the new dollar legal tender in the payment of debts not specifically providing for payment in dollars of a particular weight or fineness, contracted either before or after the passage of the act and make it acceptable because it is lawful money of the country.

There are those who contend that the adoption of such a plan of revaluation would cause a temporary disturbance. That is true of any plan. Whether we adopt some method of remonetization of silver, or whether we adopt some plan of controlled currency, or whether we adopt the revaluation plan of gold itself, there will, of course, be a period of transition, a sort of interregnum, in which there will be some slight disturbance. That is true of every exercise of any governmental power if it is of a sweeping character; but that is no reason why the Congress should not exercise the power which the Constitution gave it.

What did the makers of the Constitution mean when they said that Congress should have the power to regulate the value of money? Was it not a power which they expected the Congress to exercise? Did they not, in their far-seeing wisdom, vision the time when economic conditions, some great emergency, the exigencies of war or some other fundamental condition affecting the welfare of the people of the United States, might require, or, at least, suggest to Congress that the monetary measure of value ought to be regulated? What does regulate mean? It means to move up or move down according to the wisdom and the judgment and the patriotism of the Congress. There are those who say that that would be immoral and illegal. Mr. President, in time of war we draft men and send them to the battle front to give up their lives. Why? Because the Constitution reposes in Congress the power to declare war. By reason of that grant of power Congress has the authority to do all that is necessary either with property or with lives to carry on war. Now we are faced with a tremendous economic condition which warrants and demands the most far-seeing action of the Congress. The country is distressed. Mortgagors who have given liens upon their farms, upon their homesteads, and cities, counties, and municipalities are staggering under such a burden of debt, valued by the present standard of the gold dollar, that they will never be able to discharge it. What are the consequences that are sure to follow? Unless commodity prices shall be increased, unless the value of the dollar shall be, in some way, modified or changed, the result will be, I repeat, the wholesale bankruptcy of the people of the United States.

Will the creditor be any better off? The creditor class to-day will never be able to get the value of their bonds; they will never be able to collect the "pound of flesh"; they will never be able to realize, on present values, the nominal amount stipulated in the bond. The creditor class, after they shall have foreclosed and secured possession of the property upon which they hold liens, will be poorer than they were before. The property upon which they foreclose will be worth less in their hands than it was in the hands of the debtor. The debtor will be wiped out, and America, land of plenty, will be a land of paupers and of bankrupts.

But, it is said, the Congress has not the power to enact legislation of this character; the Congress has no right to pass an act infringing upon the obligation of contracts. It is well known that the constitutional limitation on the States which prohibits them from passing any act impairing the obligation of contracts is not a limitation upon the power of the Congress, and it has been held repeatedly by the Supreme Court that the Congress may enact legislation which does impair the obligation of a contract. Let us assume in time of war that an American citizen has a contract for the delivery of goods in the foreign country with which we are at war. The mere declaration of war, in pursuance of the power of the Congress, in effect, abrogates that contract and destroys its value in the hands of that American citizen. Is there any answer to that act of Congress? None whatever. I might cite other instances in which the acts of Congress do infringe upon and impair the obligation of contracts.

However, it is said that a great many of the contracts and bonds outstanding and already incurred carry clauses which provide for the payment of gold dollars "of the present weight and fineness." I readily admit that we are facing a very serious difficulty, but it is not one that is without some question as to its validity. It seems to be fairly established by the decisions of the courts that if a contract calls for so many ounces or so much gold bullion, it is a commodity contract and must be fulfilled according to its terms; but I am not clear as yet—I am investigating the authorities—as to the power of Congress when a contract calls for dollars, even though it may contain the clause "of the present weight and fineness." I am not clear but that is a contract calling for gold dollars, and that it may be fulfilled by a delivery of gold dollars at a subsequent date which the United States Congress, by reason of its exclusive grant of power by the Constitution, may declare to be lawful gold dollars of the United States.

Mr. President, if private individuals, by contract between themselves, may fix the value of the gold money of the United States, then the provision in the Constitution which says that the Congress and Congress alone may fix the value of money becomes nullified to that extent.

But, on the other hand, it is said that the Government has already obligated itself to pay a large volume of bonds in the dollars of the present weight and fineness. That is the most important aspect of this particular angle of the case. It may be that the Government itself, having promised to pay gold dollars of a certain standard of weight and fineness, would probably be estopped to undertake to discharge its debts in dollars of a different value. In order that it might keep faith with its people and in order that it might preserve the credit of the Government beyond the shadow of question in time of emergency and in peril, it probably would be wise and best not to undertake to do otherwise. The Government will have to pay those obligations

anyway; whether we revalue the dollar or whether we do not, it will have to pay them in gold money of the present weight and fineness. But I am thinking, Mr. President, of the millions of Americans who owe debts. I am thinking of school districts, of municipalities, and States throughout the Nation which are covered by a load of bonded indebtedness which they can never, under present values, discharge; and if the revaluation of the gold dollar would aid those debtors, if it would lift commodity prices—and there seems to be no question in the minds of economists that it will have that effect; even the Senator from Montana admits that in the case of France, when she revalued the gold franc, debtors were enabled to pay their debts, and commodity prices within France appreciated and enhanced—if such an act of the Government of the United States would make that kind of a contribution to its people in this hour of great distress, it would, in some measure, have met the tremendous responsibility that is resting upon the shoulders of this Congress.

Mr. President, my own idea as to how much the gold dollar should be reduced is not absolutely fixed, but, on the basis of present values and the indices of commodity prices, my view would be that it ought to be about 65 or 66⅔ per cent of the present amount of gold in the gold dollar.

It is said that this action is drastic. Mr. President, it may be drastic, but we are faced by a drastic condition. This is a case that is going to require a major operation. No absent treatment, no faith cure, no legerdemain is going to bring back health and sanity to the commerce and industry of the United States. It is going to require a major operation. I am firmly of the view that the best plan looking toward inflation yet proposed is that of revaluing the gold dollar. The Senator from Montana says that it would not raise the prices of wheat and cotton because we export them. I submit to the Senator from Montana that if we reduce the amount of gold in the gold dollar, while commodity prices in gold in France would not be increased, the effect would be to increase them here.

Mr. WHEELER. Mr. President, let me say to the Senator——

The VICE PRESIDENT. Does the Senator from Texas yield to the Senator from Montana?

Mr. CONNALLY. I yield.

Mr. WHEELER. I think the Senator misunderstood me or I misspoke myself, one of the two.

Mr. CONNALLY. Either is probable.

Mr. WHEELER. I simply said it would not raise the price of wheat and cotton on the world market. I do not want the Senator to misunderstand me. I think that the revaluation of gold as suggested by the Senator would do tremendous good without a question of doubt, and he and I are working for exactly the same purpose. I think he has explained the situation. I agree with him that we have got to take some drastic steps. I am in thorough accord with his views in reference to it. It is only a question, in my judgment, as to whether we should do it by the revaluation of gold or whether we should do it by the inflation of paper currency or whether we should do it by the remonetization of silver. My own view about it is—and I am not infallible—that the greater benefit would come by raising world commodity prices, as would be brought about by the remonetization of silver. In that way, it seems to me, we would accomplish what the Senator wants, and, at the same time, raise world commodity prices for cotton and other commodities that have to be sold on the world market.

Mr. LONG. Mr. President, will the Senator yield?

Mr. CONNALLY. I yield.

Mr. LONG. I desire to say that I am in sympathy with both the Senator from Texas and the Senator from Montana. I intend to vote for the proposition of each of them, whichever one can get passed first. They both aim at the same result. I do not know which one is going to be most general in its wide-sweeping effect. I think probably silver will be, but I know that what the Senator from Texas is advocating will also be of great help.

Mr. WHEELER. To be sure.

Mr. CONNALLY. I thank the Senator from Montana for agreeing in principle with the views I have expressed, but I still do not desire to retract anything I have said as to his former observation with reference to raising world prices. So long as foreign countries are on a gold standard, so long as France measures her values in gold, I dare say that even with silver as an auxiliary money base, values in France would still be measured largely in gold, and therefore in the French market wheat and cotton which might be exported from America to France would still be valued in gold.

Mr. WHEELER. Mr. President, will the Senator yield?

Mr. CONNALLY. Just a moment. I submit to the Senator from Montana, however, that even though the value of commodities such as wheat and cotton does not appreciate in France, measured in bullion gold, if we devaluate or revaluate the dollar at home, the dollar which your citizen gets for his wheat and the dollar which my citizen gets for his cotton will be a better dollar, and he will get more of them than he would under the present conditions; and with those dollars he will be able to pay more debts, he will be able to buy more commodities in the market, because of the rise in value of his own products, than he would if the dollar were not revalued.

The Senator from Montana assumes that by an edict or a fiat of pumping value into silver he would thereby raise commodity values abroad. I do not mean to argue with the Senator, but with my present information I can not agree with him in that thesis. It might or it might not result; but it is inevitable that under the plan which I suggest the man out in Montana would get more for his wheat—maybe not any more for his silver, but more for his wheat—and the cotton farmer in the South would get more for his cotton than he would under the present conditions.

Mr. WHEELER. Let me say to the Senator that I agree with his statement with reference to what the devaluation of gold would do as far as commodities in this country are concerned. A man who produced silver would get more money to pay off his fixed indebtedness. There is no question at all about that. That can be done also by inflating his paper currency. The thing that I want to point out to the Senator, if he will pardon me, is this: By reason of the fact that over 60 per cent of the peoples of the world use silver as their yardstick, as we quintuple the value of their money we thereby raise the cost of production in countries that compete with the United States.

India competes with us in wheat. She competes with us in cotton. The leading experts of Great Britain and all over the world say—I challenge the Senator to call attention to a single expert who has ever studied the question but who will say to him, as they have written and said in everything that has been said upon the question—that an increase in the value of silver increases the cost of production in the silver-using countries. As silver goes up the cost of production of wheat and cotton must automatically go up in those countries.

The only difference between the Senator and myself is that I feel that raising the price of silver would raise the commodity level of the things we have to sell in the world market. If we can not get that, let me say to the Senator from Texas, I am perfectly willing to go along with anything that is going to save the debtor class; but, for heaven's sake, let us do something; and the only thing that we have before us now is the remonetization of silver. I am willing to take the remonetization of silver. If we can not get that, I am willing to take something else; but, first of all, I want to save the people of this country from the catastrophe which is facing them.

Mr. CONNALLY. Let me say to the Senator from Montana that, I understand, silver is now selling for about 30 cents an ounce; is it not?

Mr. WHEELER. Yes; less than that.

Mr. CONNALLY. From 25 to 30 cents an ounce. When the Senator makes that silver interchangeable with our own gold at $1.29 an ounce, there is no question but that we will get plenty of imports of silver. India and China will,

of course, dump their silver on the United States, because it will be higher here than it is anywhere else on earth; and water has a disposition to run downhill, unless Congress passes a law to make it run uphill.

Mr. WHEELER. If the Senator will pardon me again, I am sure he did not hear my speech. I said that the remonetization of silver would automatically raise the price of silver all over the world as fast as the telegraph and the radio could get the news there. If we create an unlimited demand for silver, we automatically raise the price of silver the world over. China and India, which use silver and know silver as their only yardstick, can not possibly dump in this country the silver that they use as money and continue to carry on their domestic and foreign business.

Mr. CONNALLY. Let me ask the Senator a question. His object is to raise the price of silver all over the world, so that India and China will buy our goods?

Mr. WHEELER. Exactly.

Mr. CONNALLY. And they would pay us in silver; would they not?

Mr. WHEELER. Not necessarily. They would take goods in exchange and give us goods. At the present time they can dump their goods upon us and they can not buy from us. The only way that people get gold from us, let me say to the Senator, is by taking gold to fix the balance of exchange. If we remonetize silver, we then give those countries a purchasing power from us; and the balance of trade would be in our favor much more than it is now, and the only way they could get the gold would be to have the balance of trade come in their favor.

Mr. CONNALLY. Let me say to the Senator that I indicated a little earlier that I did not really care to get into a silver discussion.

Mr. WHEELER. I understand, and I am sorry if I diverted the Senator.

Mr. CONNALLY. I am perfectly willing for the Senator to have a chance for his amendment, and I am not undertaking to discuss that. I was only prompted to make such comments as I have made by the Senator's question.

Mr. WHEELER. I understand.

Mr. CONNALLY. But, if the Senator will recall, there is a certain law in economics known as Gresham's law. That law is that whenever the ratio between gold and silver in any country is more favorable than in some other country the migration of gold sets in, and silver goes in the opposite direction. The result is that wherever silver is more to be preferred, that country accumulates all the silver, and, conversely, the other country accumulates all of the gold. Now, how China and India are going to buy our goods, in view of the remonetization of silver, unless they pay for them in silver, I do not understand.

Mr. LONG. Mr. President——

The VICE PRESIDENT. The time of the Senator from Texas has expired.

Mr. LONG. The Senator has another hour on the bill.

Mr. CONNALLY. I do not want to take it all. Mr. President, may I make a parliamentary inquiry? If I use only a portion of the time, do I then have the other time remaining?

The VICE PRESIDENT. The Senator has the balance of his hour.

Mr. CONNALLY. I will consume just a few minutes, then.

Mr. LONG. Mr. President——

Mr. CONNALLY. I yield to the Senator from Louisiana.

Mr. LONG. I was going to ask the Senator about Gresham's law—if that law was not repealed in Texas?

Mr. CONNALLY. Well, I am sure if it were not repealed in Texas we could send it across the border and it would be. [Laughter.]

Mr. WALSH of Massachusetts. Mr. President, may I ask the Senator whether he has prepared an amendment dealing with the subject matter he is now discussing?

Mr. CONNALLY. I will say to the Senator from Massachusetts that I am studying the matter with a view to the preparation of a bill if my investigation justifies that course.

Mr. WALSH of Massachusetts. Would the Senator be willing to state concisely just what his proposition is?

Mr. CONNALLY. I will say to the Senator that I have two alternative branches of the subject. The first is a proposal simply to revalue gold at the present time and leave it stationary in the future. Then there is an alternative plan by which we would devalue it at the present time and then set up a plan whereby we would not coin gold, but would keep the bullion in the Treasury and would issue gold certificates against it, varying from time to time in the amount of grains, depending upon the fluctuations of commodity prices.

I will say to the Senator that I have not yet reached a definite conclusion, but the idea is based upon the condition arising through the appreciation of gold by the action of governments. If gold, based purely on its value as a commodity, had enhanced, that would be one situation; but gold has enhanced and appreciated within recent years, not because of its intrinsic value but because of the increased demand for gold caused by India going off the silver standard and on the gold standard and by the action of other governments throughout the world. That has resulted in an undue and an inordinate demand for gold; and, as the Senator understands, the value of any article depends upon its demand, whether it is for use as money, or for use as ornaments, or for use in the arts or the sciences.

In no other way can the fact be explained that silver, when its volume in the world for 400 years has been about 15 or 16 to 1 of gold, is now probably one-thirtieth or one-fortieth the value of gold. No other explanation can be made, except the fact that silver being demonetized there is not the demand for it; there is not the use for it; there is no desire for it; and, consequently, its value has gone down and down because of the appreciation of gold.

Mr. WALSH of Massachusetts. Mr. President——

Mr. CONNALLY. I yield to the Senator from Massachusetts.

Mr. WALSH of Massachusetts. I have heard it suggested that if the Senator's proposal to devalue the gold dollar were seriously under consideration and likely to be successful——

Mr. CONNALLY. The Senator evidently did not observe the heat and interest which I displayed in my speech when he suggested that it might not be seriously considered.

Mr. WALSH of Massachusetts. I apologize; but it has been suggested that if the people of the country thought favorable action would be taken upon the Senator's proposition, there would be a tremendous movement toward storing the present gold in the expectation that it would be more valuable after devaluation took place, and that would cause a financial catastrophe. I assume the Senator has heard that argument made heretofore.

Mr. CONNALLY. I have.

Mr. WALSH of Massachusetts. And if he has opportunity, in the limited time at his disposal, to discuss the matter, I should be very glad to have him do it.

Mr. CONNALLY. I will advert to that very briefly. Of course, that situation had suggested itself to the Senator from Texas, and that situation would suggest itself in the case of any other readjustment of currency, whether it be by silver or whether it be by paper.

Mr. WALSH of Massachusetts. True.

Mr. CONNALLY. It is simply one of those situations that can not be ignored.

Mr. WALSH of Massachusetts. It would be true of the proposal of the Senator from Montana.

Mr. CONNALLY. It would be true equally of the proposal of the Senator from Montana, and equally with reference to paper money.

Mr. WALSH of Massachusetts. In other words, there would be a temporary period when there would have to be a moratorium or some other drastic step taken to permit the people to readjust to the new standard.

Mr. CONNALLY. I suggest to the Senator that my own thought is that if such a program were determined upon, the first step in the program would be to suspend gold pay-

ments by the Treasury, keep in the Treasury the gold that is now there, and, if possible, to suspend gold payments by the banks and the Federal reserve system for the purpose of then undertaking this readjustment. But let me say to the Senator from Massachusetts that there are $5,000,000,000 of gold in the United States. Is not that true?

Mr. WALSH of Massachusetts. Certainly.

Mr. CONNALLY. How much property is there in the United States? There is supposed to be $200,000,000,000 of property in the United States, even under the reduced values we are living under to-day. At one time it was estimated, I believe, that there was $360,000,000,000 of property in the United States. That property has been reduced now to $200,000,000,000, with only $5,000,000,000 of gold. Suppose the holder of every dollar of that actual gold got his money and, on a revaluation, was able to get $1.40 for every dollar of gold. Would not that be a cheap price to pay in order to save the other $200,000,000,000 of property which that $5,000,000,000 of gold has already appreciably reduced in value?

Is it fair, is it just, that to a little pile of $5,000,000,000 of gold there should be anchored not only the currency of the country but the value of every home, of every farm, of every skyscraper, and every piece of tangible property in the United States?

Would a nominal increase in the value of gold to its owners be an insuperable objection to a measure which, I believe, would restore measurably the prosperity of the people of the United States and enable debtors to discharge their obligations and enable creditors to get payment for their bonds? Neither, under present conditions, will receive either the obligation in the form of payment of the bonds or the satisfaction which would come from the discharge of the debts on the part of the debtors. We would freeze, for the time being, all gold deposits, and hold them subject to readjustment on the new basis of value as decreed by the Congress.

If Senators will observe, any kind of drastic action in any field by the Congress causes a reaction. I have already adverted to the change in the conditions due to the World War. Think about how fundamental and how profound were the effects not only upon the United States, but upon the whole world, of the entry of the United States into the World War. Think about the millions of lives and the billions of dollars that were wasted. Think about the economic suffering that has ensued since that time, traceable in some measure to the World War. Did Senators then hold up their hands in horror and say, "We can not enter the war because of that"?

(At this point a message was received from the House of Representatives, which appears at another place in the RECORD.)

Mr. CONNALLY. Mr. President, we have just heard read a message from the House of Representatives advising the Senate that the House had agreed to the conference report on the crop production loan measure. Why was that measure necessary? Was it because our fields have become sterile? Was it because the farmers of the United States are no longer industrious? Was it because they were no longer tilling those fields, putting their labor and their intelligence into the marvelous laboratory of nature to bring forth food to sustain the people of the earth, and clothing to protect them from the elements? No, Mr. President; we are called upon now to make crop-production loans to the people of the United States because their commodities, their farm products, when produced, measured by the present value of gold and by the present onerous burden of indebtedness, do not yield them a sufficient return to enable them to make the expenditures necessary for their own sustenance, and in any degree discharge their obligations and their debts.

I am glad I was interrupted by that announcement. It brings vividly before the Senate the absolute necessity for Congress and the Senate to refrain from pursuing the old French policy of laissez faire. The policy of laissez faire—let things alone, let them be—would result inevitably in wholesale bankruptcy and further paralysis of the business and the commerce and the agriculture of the United States. Senators need no admonition along that line.

I lay down the challenge here and now for Senators to point out either the lack of legal authority of the Congress or absence of the economic necessity, for the plan which I now suggest, of revaluing the gold dollar on a ratio comparable to the prices of other commodities and other values in the United States.

The Senator from Montana proposes to make gold and silver money in a ratio of 16 to 1. What does he do? He multiplies the price of silver by four. If it is fair and just to multiply the value of silver by four, is it not fair and just to depreciate the value of gold by 33⅓ per cent?

Mr. LONG. Mr. President, in 1919, when the price of silver went to $1.30 an ounce, it did not have such an effect as the Senator seems to think it had. It did not result in a great deal of silver coming into the country. It did result in a large amount of trade.

Mr. CONNALLY. Mr. President, I am not trying to argue the silver question. I am prepared to accept any sound plan for revaluing our money that may be proposed, and the one that is most available; but let me suggest to the Senator from Louisiana that when the world price of silver was $1.29, there was no more reason for silver coming to the United States than for it going to any other country, because it was worth everywhere the same. But, if by law we should make silver worth four times as much in the United States as it is worth in China, I do not think even a Chinaman would hesitate to send his silver to the United States and get four dollars for one.

Mr. LONG. Mr. President, if the Senator will pardon me further, there are only two countries to-day that are on the gold basis, the United States and France, and France is in default.

Mr. CONNALLY. That is true. While Great Britain is off the gold standard, she is not on the silver standard. She is on the pound standard, of course. Let me suggest to the Senate what England did when she went off the gold standard. She revalued her pound; that is all she did. She did it deliberately, according to my view. I believe that the Bank of England and the English Government could have maintained the gold standard if they had desired to do so, but English statesmen, not laboring under some of the hesitation and fear under which some Senators seem to be laboring, thought that in the then economic status of the world it was to England's advantage to revalue the pound, and she went off the gold standard by suspending gold payments and revaluing her pound at something above $3.

Mr. GLASS. Mr. President, will the Senator yield to me?

Mr. CONNALLY. I yield.

Mr. GLASS. Does the Senator exactly understand that England revalued her pound, or that the pound itself depreciated when England went off the gold standard?

Mr. CONNALLY. I will say to the Senator that I did not mean to suggest that England, by any governmental action, actually revalued the pound, but I did mean to suggest that her action resulted in the pound revaluing itself.

Mr. GLASS. Does the Senator suggest that thereupon commodities rose in price in England to anything like the percentage of devaluation of the pound?

Mr. CONNALLY. No; I do not.

Mr. GLASS. Trade went on as usual, on the usual basis.

Mr. CONNALLY. Very well; but the Senator indicates that England did not revalue her pound in gold, and that commodity prices were not appreciably changed by her going off the gold standard. Would the Senator contend that that would be true if she had revalued her pound in gold and remained on the gold standard?

Mr. GLASS. I will say to the Senator that I have no faith whatsoever, I have never been convinced, that the theory of an abundance of promises to pay is a correct theory. In other words, I totally dissent from the quantitative theory of money.

Mr. CONNALLY. I was not advocating that particular angle. I will ask the Senator, though, if he believes that

22½ grains of gold would buy the same amount of commodities that two-thirds of that amount would buy?

Mr. GLASS. I think it depends upon many related circumstances. I do not think the depreciation of the dollar would permanently raise commodity prices. On the contrary, I think it would so deprave our currency that it would bring ruin particularly to the wage earners of the country and to those who are on fixed salaries.

Mr. CONNALLY. I can not quite understand the Senator from Virginia. In one breath he says that in England the reduction of the value of the pound to about $3 did not change the price level and consequently, of course, did not change the wage level, and yet in the next breath he suggests that if we cut down the value of the gold dollar it would reduce the wage level and would not improve the commodity level.

Mr. GLASS. If the Senator will permit me, the Senator from Virginia thinks that it is impossible to stabilize the dollar as the standard of the country without stabilizing everything the dollar will buy.

Mr. CONNALLY. Let me ask the Senator whether he thinks it is fair for the dollar to dominate all other commodities on earth, or does he think it is fairer for the dollar to bear some relationship to the values of all other commodities in the world? That is what the Senator from Texas is interested in, and the Senator from Texas is not preaching fiat money, he is not preaching free silver, but he is undertaking to lay down the doctrine that events, the actions of governments, inexorable facts, have increased the value of gold out of all proportion to what it was at the time the debts of the American people were contracted, and that simple justice and fairness require that the dollar be revalued so that it will bear some fair relationship to the dollar which the debtor borrowed when he borrowed it.

Mr. GLASS. Yet the United States has billions of dollars more of gold to-day than it had when the debts were contracted. I will say to the Senator that there is one inexorable law which no amount or character of legislation can affect, and that is the law of supply and demand.

Mr. CONNALLY. Certainly; I agree with the Senator in the enunciation of these platitudes; I agree with him that the law of supply and demand is the law, and that is exactly what I am talking about. A while ago the Senator said reducing the amount of gold in the dollar would not help matters, and then I asked him if he thought 22½ grains of gold would not buy more products than 16 grains of gold would, and he did not seem to make a distinct reply.

Mr. GLASS rose.

Mr. CONNALLY. Wait just a minute. We have the law of supply and demand on gold, which is a commodity, the Senator says. Its value depends upon the amount of it, the demand for it, and the use of it; and gold being a commodity, regardless of the stamp of the Government, regardless of anything else, I lay down another generality, another glittering platitude, that 22½ ounces of gold are worth more than 16 ounces of gold, and will buy more goods anywhere in the world.

Mr. SHIPSTEAD. Mr. President, will the Senator yield to me?

Mr. CONNALLY. I yield to the Senator from Minnesota.

Mr. SHIPSTEAD. If every country in the world should by legislation provide that all debts should be paid in wheat, what effect would that have on the price of wheat?

Mr. CONNALLY. It would make the price of wheat go skyrocketing because every man that owed a debt would want to get some wheat so he could pay that debt. It would lift the price of wheat to-morrow. The only reason why a man wants wheat now is to eat it. It would double or quadruple the price of wheat. Does the Senator agree with that statement?

Mr. SHIPSTEAD. Yes. May I ask the Senator another question?

Mr. CONNALLY. How much time have I remaining, Mr. President?

The VICE PRESIDENT. The Senator has eight minutes remaining.

Mr. CONNALLY. I yield to the Senator from Minnesota.

Mr. SHIPSTEAD. Wheat would still be a commodity, would it not?

Mr. CONNALLY. Wheat would still be a commodity, to be sure, but even so, if we adopted that standard, 2 bushels of wheat would pay twice as many debts as 1 bushel of wheat. If the unit value was one bushel instead of two bushels, the debts would be discharged half as easily.

Mr. LONG. Mr. President——

The VICE PRESIDENT. Does the Senator from Texas yield to the Senator from Louisiana?

Mr. CONNALLY. I yield.

Mr. LONG. The Senator from Virginia suggested that the law of supply and demand must be taken into consideration. Is not that what the Senator from Texas is arguing?

Mr. CONNALLY. I tried to make it clear to the Senator from Virginia that with the world supply of gold its price would depend upon the amount of gold in the world and the demand for that gold for use either as money or in the arts or as ornaments and jewelry. Such being the law of supply and demand, 2 ounces of gold would buy more of any other commodity than 1 ounce of gold, and therefore if the dollar were reduced from 23 or 24 to two-thirds of that amount, the new dollar would be only two-thirds as much as the old dollar; but as a result commodity prices would be enhanced, and debts would be scaled in somewhat the same proportion.

The Senator from Virginia talks about the paper British pound. He is not talking about the gold pound. Of course, we would go to a drug store and we would buy a proprietary tooth paste or some other article that always sells for 25 cents. The chances are that the article would go on selling for 25 cents regardless of any particular slight change in the value of money.

In England the pound has been the standard of value for hundreds of years. It is standardized in the British mind. When Great Britain went off the gold standard, among themselves in their own little British family it was still a pound. The Briton did not get any gold for it, but it was still a pound. The man whose salary was measured in pounds probably went on receiving the same number of pounds for his day's work or for his month's work. The man who was purchasing an article that had always been selling for a pound went on purchasing it for a pound. The value of the pound in a large degree was only affected in the world market when England got off the paper pound and went on the gold pound.

If we were on a paper currency basis here, unsupported by gold, if we had only paper money, I grant that what the Senator from Virginia has suggested might be true. Commodity prices probably would not go up very much. Wages might not be very much affected, because if we had paper money, and if we did not see any gold, and if we got $100 a month last year, then we would get $100 a month this year in paper money. But the pound is not a gold standard of value of a pound. The dollar is a gold standard of a dollar. I submit with due respect to the eminent Senator from Virginia who is in charge of the bill, the honored chairman of the Subcommittee on Banking and Currency, a man for whose views I have the highest respect and for whom I entertain the warmest personal regard, that any high-school boy is bound to acknowledge that, according to the law of supply and demand, 23 grains of gold is worth more than 16 grains of gold.

Mr. President, I have consumed more of the time of the Senate, than I expected when I took the floor. On some future occasion I expect to address the Senate upon some of the legal aspects of the proposal which I have had the temerity and hardihood to advance in this body amidst the clash of views, on the one side, of the Senator from Virginia [Mr. GLASS] and, on the other side, of the eminent Senator from Montana [Mr. WHEELER] and other Senators who are advancing various views as to inflation.

I suggested at the outset that I am investigating the authorities as to the constitutional power of the Congress to do what is proposed and as to the power of the Congress in

the future to prohibit gold contracts calling for payment in dollars of any specific weight or standard of fineness. I would not prohibit that on the part of the Government, because the Government credit must be preserved at all hazards; but I propose a provision of that kind, making contracts that call for dollars dischargeable in whatever may be the lawful money of the country at the time of payment.

In addition to that, Mr. President, I desire to suggest to the Senate that Congress possesses ample power, through the power of taxation if no other way, to prohibit creditors requiring the execution of these extraordinary contracts payable in gold of a specific weight and standard of fineness. To do that is to permit individuals by contract to fix and regulate the value of money in defiance of the grant of the Constitution. I would use the taxing power of the Government, if necessary, to tax such contracts at such a rate of annual income as to make the contractors very happy to accept the legal money of the country at the time of payment.

Mr. FESS. Mr. President, will the Senator yield?

The VICE PRESIDENT. Does the Senator from Texas yield to the Senator from Ohio?

Mr. CONNALLY. I yield.

Mr. FESS. I have been greatly impressed with the argument of the Senator from Texas.

Mr. CONNALLY. I thank the Senator from Ohio.

Mr. FESS. I am not an inflationist. On the other hand, I am very much opposed to that policy. But the Senator from Texas is arguing on the basis that if gold is of a value intrinsically established by the law of supply and demand, and if we have $5,000,000,000 of gold to-day, that represents the coinage value of that amount at the rate of 24 and a fraction, and if we should reduce that one-third, or if we should reduce it 6 grains, we would have a coinage value of about $6,600,000,000 instead of $5,000,000,000. We have not increased the quantity of gold at all, but we have changed the value of it. But if gold is coined on the basis of the value that it commands in the market, I do not see how, by increasing the coinage to $6,600,000,000 without increasing the value of it, we have done what the Senator is trying to do. It would appear to me that if there is a fault in our coinage on the ground that we do not produce enough gold, then the change in value which the Senator would make would be a logical process. That impresses me. But how does the Senator increase the purchasing value from $5,000,000,000 to $6,600,000,000 merely by changing the coinage value, wholly ignoring the current value in the markets of the world?

Mr. CONNALLY. I do not wholly ignore the current value. I recognize it, and I recognize that current value measured in dollars—I am not talking about world value now—is so out of proportion to the value of those dollars when the debts were incurred that it calls for a readjustment. Let me suggest to the Senator, furthermore, if the Senator's contention is true, why not increase the gold content of the dollar twice over? Does the Senator mean to say that if we had 46 grains of gold in the dollar we would get them just as easily and that that would not have any effect on the price level?

Mr. FESS. The effort here is this. As gold is mined and brought to the mint it is coined. The price that is paid for gold of course is the price that it commands in the market. If we undertake to change that by coinage stamp alone, we run up against the obstacles which the Senator from Virginia has suggested, and we can not by legislative decree change the law of supply and demand.

Mr. CONNALLY. I have really no further views on the law of supply and demand. I submit to that law. But let me suggest to the Senator another thought. If the Senator will go back over the mining history of the country he will find that gold has not increased in volume in the world anything like in the proportion that other wealth has increased. Will the Senator admit that?

Mr. FESS. Other wealth? That may be true. However, the increase in the production of gold has kept pace with the increase of population. I am not sure but what it has been nearly equal in proportion to the increase of the business of the country.

Mr. CONNALLY. The Senator talks about gold being mined and brought to the mint. When it is mined and brought to the mint it becomes a dollar. Anybody can bring gold there and, having sufficient grains of it, can have it coined into a dollar. So far as the dollar is concerned, that is the fixation of the value. It is made a dollar because it is 23 grains of gold.

Mr. FESS. The Senator is wrong, because the gold is worth just as much in the bar as it is when it is coined.

Mr. CONNALLY. Why, of course it is, because the man with the bar of gold in his pocket, if he wants to do so, can go over to the mint and trade it for just as many gold dollars as the bar will make. It is just like a check for $100. If we can go to the bank and cash the check for $100, it is worth $100. Of course the gold bar has value aside from its use as money.

It has value in the chain which the Senator wears that adorns his otherwise attractive person. It has a value in gold-rimmed spectacles. It has value in the valuable gold watch the Senator has in his pocket. So far as money is concerned it has the same money value that it has by reason of its exchangeability at the mint for a dollar.

Mr. FESS. I am not taking serious issue with the Senator except upon the point of increasing the purchasing power.

Mr. CONNALLY. If the Senator had done me the honor to give my former remarks the same analysis and particular attention that he is giving my remarks at the present moment he would have observed that my chief argument was that the value of this reduction would enable debtors, who borrowed money when money was cheap, to discharge their obligations now that the dollar is skyrocketing out of all proportion to other values. I agree with the Senator to the extent that 16 grains of gold in France or in England probably would not buy another dollar's worth of foreign goods more than it would now.

My proposal is to help the people of the United States. The Senator from Ohio is rather distinguished for his lack of sympathy for any of our money's going to England and France for the purchase of commodities for the purpose of having them imported here, and I am rather surprised at his concern as to the value of our money in foreign countries. I am trying to lower the gold content of the dollar because doing so will enable the debtors to pay their debts; it will enable people to get more for their commodities in America. Suppose an article sells for 100 francs in Paris; what difference does that make to the farmer in Ohio? He is not dealing in francs; he is concerned with the big, old dollar. That is what he pays his debts with. He does not spend his money on the boulevards; he does not visit the night clubs along the lighted highways of Montparnasse, and spend his money in that way. He wants some dollars that will pay his grocery bill; he wants some dollars that will pay the mortgage on his cow; he wants some dollars that will discharge his note at the bank; and if by revaluing the gold dollar he can get more United States dollars with which to discharge his obligations and buy himself commodities, he does not worry about what the dollar is worth in francs. [Laughter.]

Mr. FESS. The Senator from Ohio thinks that the Senator from Texas is not properly appraising what the people of Ohio want. What the people of Ohio want is to prevent the articles manufactured in France by labor that is already cheap, and which is paid in a cheap franc, coming in competition with what they produce in Ohio. The people of Ohio are more concerned about that than anything else. They are not willing to cheapen the dollar in order to meet the demand in France.

I wish to say to the Senator that I have been impressed by the argument he has made. It is very different from the

argument which is sometimes made on the silver question in advocacy of setting up two metals and requiring the Government to keep them at a parity. I can not see how that can be done. If both should be made legal tender, I am wondering how long we would have both gold and silver circulating, and how soon we would go off the gold basis by that action alone. I have no sympathy with that sort of thing; but I think the Senator has made a very strong presentation of the case he has in hand.

Mr. CONNALLY. I thank the Senator, and I want to take this occasion, in thanking him, to assure him that the people of Ohio ought not to have any doubt as to the sincerity and loyalty of the Senator from Ohio in doing just what he indicated was to the interest of the people of Ohio with reference to manufactured goods abroad. He has, on a number of occasions, distinguished himself in both Houses of Congress by his course with reference to the tariff.

Mr. KING and Mr. SHIPSTEAD addressed the Chair.

The VICE PRESIDENT. Does the Senator from Texas yield; and if so, to whom?

Mr. CONNALLY. I yield first to the Senator from Utah, but, Mr. President, I wish to save a few minutes, and I should like to inquire how much time I have left.

The VICE PRESIDENT. The Chair is informed the Senator has about 20 minutes left.

Mr. LONG. Mr. President, may I make a unanimous-consent request?

The VICE PRESIDENT. The Chair desires to make a statement. The Senator can only yield for a question except by unanimous consent.

Mr. CONNALLY. I can only yield for a question by unanimous consent?

The VICE PRESIDENT. Except by unanimous consent.

Mr. CONNALLY. I yield merely for a question.

Mr. KING. Mr. President, I was interested in the statement the Senator made—perhaps I misunderstood him—which implied that Congress could by law change a contract which called for the payment of an obligation in gold of the present weight and fineness. The Constitution——

Mr. CONNALLY. If the Senator will pardon me right there, let me say that he evidently did not hear that portion of my speech. I said that I am examining the authorities but that I was not as yet prepared to make that statement; that I was not accepting it without question at this time. I am not prepared to argue that with the Senator. I may suggest to him, however, that in the Legal Tender cases the Supreme Court of the United States held that a contract which called for coin face could be discharged by paper dollars irredeemable in any kind of coin. The Senator is aware of that decision.

Mr. KING. I am familiar with that. It occurs to me though—if the Senator will pardon me, and then I will conclude—that if a contract, for instance, calls for the payment of an obligation in so many bushels of wheat, Congress could not interfere and require that the creditor should take so many bushels of rye or should take a less number of pounds of wheat than the contract itself called for. So a contract calling for so many ounces or grains of gold or silver in the payment of a debt can not be, it seems to me, modified by Congress, for that would be interfering with the obligations of a private contract.

Mr. CONNALLY. Let me say again that evidently the Senator was at luncheon when I was delivering the major portion of my address.

Mr. NORRIS. Mr. President——

The VICE PRESIDENT. Does the Senator from Texas yield to the Senator from Nebraska?

Mr. CONNALLY. I will yield in a moment. Other Senators here will bear witness to the statement, if the Senator from Utah questions it——

Mr. KING. I accept the Senator's statement.

Mr. CONNALLY. That I expressly stated that a contract which called for a commodity—so many ounces of bullion, so many bushels of wheat—was a contract which the courts would require to be fulfilled. Further, I said, however, that I was not clear as yet as to a contract which calls for so many dollars, even though qualified by a clause of the present weight and fineness. That is an element in the situation, and it may be determined that a clause as to present weight and fineness will govern. However, a contract calling for dollars of present weight and fineness is distinguishable from a commodity contract. The dollar is a creature of law; it is not the gold in a dollar that is a dollar; it is not the silver in a dollar that is a dollar; the dollar is simply a symbol, a symbol established by law, and when the creditor calls for so many dollars I am not prepared at this time to deny that that contract can not be met by the tender of a dollar which the Congress, under its power to coin money and regulate the value thereof, may determine to be a dollar at the time the debt is to be discharged.

As tending to support that view, I submit the decision of the Supreme Court in the Legal Tender cases, wherein it was held that a contract which called for dollars at a time when only gold or silver coins were money could be lawfully discharged by a paper dollar which had no redeemability at all, but was simply a promise of the Treasury at some time in the future to pay a dollar, without saying what kind of a dollar. I submit that is rather persuasive.

Mr. SHIPSTEAD and Mr. NORRIS addressed the Chair.

The VICE PRESIDENT. Does the Senator from Texas yield; and if so, to whom?

Mr. CONNALLY. The Senator from Minnesota was on his feet a few minutes ago and I did not yield to him. I now yield to him.

Mr. SHIPSTEAD. I should like to ask the Senator if a contract proved to be impossible of performance—if it were impossible to deliver as contracted—would that affect the contract?

Mr. CONNALLY. Under the law, one may not be required to do impossible things; it would be necessary to measure it in some other way. For instance, an act of God or something of that character might interfere with the contract; but that question I have not now the time to discuss.

Mr. SHIPSTEAD. May I ask the Senator another question?

Mr. CONNALLY. Certainly.

Mr. SHIPSTEAD. In the colloquy with the Senator from Ohio I understood the Senator from Ohio to say that the Senator from Texas had said that, in his opinion, it was the intrinsic value of the gold that determined the value of the dollar. Am I correct in that?

Mr. CONNALLY. If I said that, I was not quite accurate. What I meant to say was that it is the value of the gold measured by the demand for it that makes the value.

Mr. SHIPSTEAD. May I ask the Senator a further question?

Mr. CONNALLY. Certainly.

Mr. SHIPSTEAD. If gold were demonetized and not used for money——

Mr. CONNALLY. It would not be worth so much; of course not. I tried to make that clear in answering the Senator a little while ago about wheat.

Mr. NORRIS. Mr. President——

Mr. CONNALLY. I yield to the Senator from Nebraska.

Mr. NORRIS. The Senator from Utah in the question he propounded to the Senator from Texas said, as I understood him, that a contract payable in wheat could not be complied with by the delivery of rye. I merely want to call attention to the fact that, in my judgment, that does not apply to the question the Senator from Texas has raised, because Congress has no constitutional authority to fix the value of wheat or rye, either one, but it distinctly has authority under the Constitution to fix the value of money.

Mr. CONNALLY. That is correct.

Mr. KING. Mr. President, will the Senator yield?

Mr. CONNALLY. Yes.

Mr. KING. Is the Senator quite accurate? Congress has the power to "regulate the value." Is there not some difference between regulating and fixing?

Mr. NORRIS. Of money?

Mr. CONNALLY. Regulating means changing it whenever you get ready, of course. Let me say to the Senator

from Nebraska and also to the Senator from Utah as to the decisions of the courts upon which Senators rely for maintaining the doctrine that these gold-of-the-present-weight-and-fineness contracts can not be affected, that in not one of those cases had the Congress undertaken to do this thing; that is, in none of those cases upon which they rely, was the question presented from the angle which we are now presenting it. In other words, in none of those cases had the Congress undertaken to change the value of the gold dollar or to change the value of the dollar at all. When Congress, in the exercise of its undoubted power to coin money and regulate the value thereof does that thing, a new question is presented. All the cases hold that when Congress acts under a specific grant of power there is a wholly different question presented than an incidental one which arises by the exercise of some other power. Does the Senator from Ohio follow me?

Mr. ROBINSON of Arkansas. Mr. President——

The VICE PRESIDENT. Does the Senator from Texas yield to the Senator from Arkansas?

Mr. CONNALLY. I yield.

Mr. ROBINSON of Arkansas. I can not make the interruption of the Senator from Texas by a mere question.

Mr. CONNALLY. I ask unanimous consent that the Senator from Arkansas may be permitted to interrupt for more than a question.

The VICE PRESIDENT. Is there objection? The Chair hears none, and permission is granted.

Mr. ROBINSON of Arkansas. My statement will be very brief. Under the legal issue the Senator from Texas has raised, in my conception two possible questions arise; first, whether the Government of the United States itself when entering into contracts for the payment of sums in gold dollars of the present weight and fineness may estop itself from the exercise of the power granted in the Constitution to the Congress:

> To coin money, regulate the value thereof, and of foreign coin, and fix the standard of weights and measures.

Certainly private contracts can not estop the Congress from the exercise of the power which has just been described. In my judgment, the mere agreement between individuals or individuals and corporations for the payment of sums in gold dollars of the present standard of weight and fineness would not operate to prevent the exercise of the power of Congress to increase or decrease the amount of gold in the standard dollar. That power has been exercised and it has been sustained.

Mr. CONNALLY. Will the Senator let me interject a remark just there?

Mr. ROBINSON of Arkansas. Yes.

Mr. CONNALLY. The Senator from Texas has already undertaken to make clear to the Senate that in the case of Government obligations he is not prepared to propose that the Government ought even to try to do it, because if the Government has made that sort of a promise in order to maintain the public faith and in order to preserve the public credit I am not prepared to say that I favor the Government itself undertaking to revalue its own obligations.

Mr. ROBINSON of Arkansas. What would be the economic effect of the exercise of the power, if it exists, to reduce the quantity of gold in the standard dollar is a question which at this time I shall not attempt to discuss; but I am speaking now briefly of the legal question involved. Certainly private individuals can not estop the Government from the exercise of its constitutional power. They can not prevent the Congress from the enactment of laws changing the weight and fineness of gold in a dollar. The provision of the Constitution which inhibits or prevents the impairment of the obligations of contracts is not directed against the Congress or against the Federal authority, as the Senator from Texas and other Senators will understand, but it is directed against the power of the States. There does arise a question, as I have indicated, as to what would be the moral and the economic effect of the exercise of the power, granting that it does exist.

If the Government should say that, notwithstanding these contracts are payable in gold dollars of the present standard of weight and fineness, they may be paid in gold dollars of a less weight and fineness, it is difficult to determine whether it would affect in an indirect way the credit and standing of the Government of the United States to exercise the power which I think it possesses. I think there is very little doubt about the existence of the power.

I thank the Senator for yielding to me, and I do not feel justified in taking any more of his time.

Mr. CONNALLY. I thank the Senator from Arkansas for his illuminating interruption. Let me suggest to the Senator from Arkansas this thought: Even though the Congress does not have the power, if it should be so held, to alter or change the effect of the gold contracts in the past as to present weight and standard of fineness, I submit that an act of Congress prohibiting contracts of that kind in the future would be a sound public measure which would be for the welfare of the whole people of the United States, because contracts of that sort really are in derogation of the paramount power of the Congress to fix the value of money.

What is the use of Congress having the power to regulate the value of money if private individuals, in defiance of the Constitution, may themselves regulate the value of money and fix the measure of values? Why was that clause inserted in the Constitution? Was it meant to slumber there unused? Was it meant to become a portion of a paralyzed power? The power to regulate the value of money was put in the Constitution by the fathers of the Republic to be used, to be employed, to be exercised whenever Congress felt that it was necessary to use that power and regulate the value of the gold dollar or any other kind of a dollar.

Senators talk about impairing the obligations of contracts and scaling down debts. Take our present posture with reference to World War debts: Our debtors say they can not pay us. They say they are bankrupt; yet Senators who stand on this floor and tremble at the prospect of reducing the value of the gold dollar in order that the American people may pay their own debts are perfectly willing to revalue the World War debts, and scale them down, and probably cancel them. If it is immoral to scale down the debts of our own people, how does it become moral to scale down the debts of foreign governments?

I am not prepared to argue that question. I am only using that by way of illustration.

Mr. LONG. Mr. President——

The VICE PRESIDENT. Does the Senator from Texas yield to the Senator from Louisiana?

Mr. CONNALLY. I do.

Mr. LONG. About 30 minutes of the Senator's time has been consumed——

Mr. CONNALLY. I do not want any more.

Mr. LONG. I wanted to suggest that while it is true that the Government may have prescribed that its obligations should be paid in gold coin of the present standard of weight and fineness, nevertheless Congress has the power to regulate the value of money; and the Supreme Court of the United States has held time and time again that regardless of whatever contracts might be fixed by a municipality or by a State or by the Government, the power to regulate was above that and that whatever was fixed by contract yielded to the future regulation vested in Congress.

Mr. ROBINSON of Arkansas. Mr. President, will the Senator permit me to interrupt him for just a minute?

The VICE PRESIDENT. Does the Senator from Texas yield to the Senator from Arkansas?

Mr. CONNALLY. I do.

Mr. ROBINSON of Arkansas. Concededly, that is correct with respect to private contracts. I am not prepared to admit that it is correct with respect to contracts which the Government itself makes.

Mr. LONG. As to the law, it is correct. As to the morals, it might not be.

Mr. CONNALLY. Mr. President, I have adverted to that matter several times and I shall not take up any more time to cover it.

As to contracts which the Government itself has made payable in gold coin of a certain standard of weight and fineness, I am not prepared to say that the Government should not pay them according to their terms in order to preserve its faith with the people and preserve its credit; but I am not worried about the governmental debts that the United States owes. We are going to pay them, and pay them in whatever way they ought to be paid; but I am concerned with private obligations.

Senators say we can not afford to scale down debts. What does Congress do when it passes a bankruptcy law? What does it do to the contract of the creditor? It wipes it out and destroys it. What does Congress do to the obligation of contracts when it passes other legislation? Why, we have bills pending here now to amend the bankruptcy law, to invoke the aid of the Federal courts in order to prevent creditors from collecting their debts from debtors, and to force debtors and creditors to readjust their debts; and Senators will vote for those measures.

Mr. President, the power to regulate the value of money is one of the paramount powers of the Congress. It is superior to the right of any individual. It is superior to the right of all of the individuals in the United States, if they could be gathered together. It is a constitutional grant to the Congress; and the Constitution trusts the Congress to use its patriotism, its sense of justice, its wisdom, not so to revalue the dollar as to be unjust to the creditor or unjust to any other class. It is a power that the Constitution grants to Congress in the expectation that Congress, with due deference to the general welfare, with a solemn respect for the oath which its Members took, and in the presence of all of the high powers under the Constitution will perform its duty in revaluing money, and revaluing it justly and fairly. There is no question of morals involved, unless Senators in their own hearts vote for such a revaluation as is not just and fair under all of the circumstances and in consideration of all other factors and values of commodities.

Mr. President, at some future date I shall ask leave of the Senate to deliver some other remarks with regard to different aspects of this question, particularly with respect to the constitutional and legal features. At the present time I yield the floor.

The VICE PRESIDENT. The time of the Senator from Texas has expired.

Mr. GORE. Mr. President, I do not pretend to have any extensive knowledge on the subject of money—on the science of money. Indeed, I have not very much confidence in anyone who professes to have; but there is one point arising out of the discussion to which we have just listened that perplexes me. I wish to illustrate my perplexity.

Suppose that in 1929—it is rather a wild assumption—the Senator from Texas [Mr. CONNALLY] and I were each possessed of $1,000 in gold coin of the United States of the present standard of weight and fineness. The Senator from Ohio [Mr. FESS] applied to me for a loan of $1,000 in gold. I made answer that I did not like the outlook. I refused the loan, stating that I preferred to keep my gold in my sock, or locked up in a strong box.

The Senator from Ohio then applied to the Senator from Texas for a loan of a thousand dollars in gold. The Senator from Texas, more public-spirited than myself, with more confidence in the outlook, made the loan of a thousand dollars in gold, payable four years after date.

When the date of payment arrived, prices had declined 50 per cent. Gold had appreciated 100 per cent. The Senator from Ohio took $500 in gold of standard weight and fineness to the Senator from Texas and made tender. The Senator from Texas suggested that he had lent to the Senator from Ohio a thousand dollars of standard weight and fineness, and that he desired, and all that he desired was, the return of as much gold as he had parted with. He wanted that—nothing more, nothing less.

The Senator from Ohio stated that while the loan bore the form of gold, after all, he had borrowed purchasing power, that he was tendering to the Senator from Texas as much purchasing power as he had obtained, that $500 in gold would buy as much now as a thousand dollars in gold would have bought when the loan was negotiated. The Senator from Texas, when payday comes, still insists on a thousand gold dollars of standard weight and fineness.

The Senator from Ohio comes to Congress, exerts his influence with this legislative body, and prevails upon Congress to cut down the number of grains in a standard gold dollar to one-half of what it was when the contract was entered into. He returns to the Senator from Texas and makes tender of one-half as much gold as he borrowed; and the Senator from Texas, under the compulsion of Congress, receives one-half as much gold as he parted with.

I am watching the transaction. I have kept my gold in my sock, and I have twice as much gold as the Senator from Texas. I have twice as much purchasing power as the Senator from Texas, because my gold slumbered instead of working.

A little later the Senator from Ohio returns to the Senator from Texas and suggests that he would like to borrow another $1,000 in gold. The Senator from Texas says, "Very well; I will make the loan; but I should like to insert in the contract a stipulation that you will return to me as much gold as I let you have, neither more nor less." He writes the gold clause in the contract, feeling safe. Time passes. Prices decline. Gold appreciates. The Senator from Ohio makes tender of half as much gold, half as many of these cheap dollars as he had borrowed. The Senator from Texas says, "I have the gold clause in my contract, and you must pay me back what you got from me." The Senator from Ohio comes to Congress and prevails upon Congress to annul these contracts, to impair the obligations of private contracts, striking out and annulling the gold clause. The Senator from Ohio makes tender of half as much gold as he borrowed in the last instance and one-fourth as much gold as he borrowed in the first instance; and under the law introduced by the Senator from Texas, abrogating the gold clause, the Senator from Ohio makes payment in full. The Senator from Texas is obliged to accept.

Senators here undertake to make the point that the Government should reserve and retain its right to insert the gold clause and to exact "the pound nearest the heart" but that it ought not to insist upon the observance of good faith as between private individuals. The individual is helpless. He is not a sovereign. He relies upon the protection of his Government for the sanctity of his contract. The Government abrogates that contract.

The private citizen toils and pays taxes in times of peace. He fights and dies, if need be, in time of war. All that he asks, all that he expects is protection—protection of life and property, the protection of his rights. The supreme duty of government, indeed the supreme purpose and object of government, is protection—to protect its citizens against injury and injustice.

I do not doubt that in so far as contracts are concerned that are not stipulated to be paid in gold this Government can require the creditor to take one-half as much gold as he parted with. Henry VIII debased the coin of the realm several times during his reign, until the coin contained less than half as much gold as it contained at the beginning of his reign. I believe Sir James Mackintosh said that Henry VIII approached as near to total depravity as the infirmities of human nature would permit. That act of debasement has always stood out amongst the blackest marks against the record of that tyrant and that despot.

Mr. CONNALLY. Mr. President, will the Senator yield?

Mr. GORE. No, Mr. President; I do not wish to yield at this moment. John II, of France, debased the coin nine times during his reign. In France, from first to last, the standard coin was depreciated and debased until it contained one seventy-third as much metal as when the standard was originally proclaimed.

These acts of debasement on the part of tyrants have heretofore been regarded as among the blackest pages in the annals of human despotism.

Mr. President, I am not yet convinced that Congress can change a contract stipulating that payment shall be made in

standard gold coin of standard weight and fineness at the date the contract is made. The Supreme Court of the United States, in the case of Bronson *v.* Rhodes (7 Wall.), held that such a contract was nothing more nor less than a contract to deliver bullion, and held the contract in that case a valid contract and payable in gold, and that principle has never been reversed or overruled, in legal decisions or elsewhere, so far as I have been able to ascertain.

Mr. President, the power of regulating the value of money set forth in the Constitution relates to our own coins and to foreign coins. What does the power mean? It is the power to fix the weight and fineness and denominations of our coins. Neither the fathers assumed, nor has any economist, so far as I know, assumed, that Congress can regulate the value of money in exchange.

Congress authorized the issuance of paper money during the Civil War, and the dollar fell to as low as 35 cents, and it passed current with the people, was legal tender in payment of debts, and creditors were compelled to take it, whether they would or not. Does anybody assume that Congress could have raised the price of those greenback dollars from 35 cents to a hundred cents merely by an act of legislation? If it could have done so, how gross the moral turpitude of Congress in not exercising such power and raising that money to 100 cents on the dollar, and in compelling honest creditors to accept 35 cents in discharge of a debt of a dollar.

Suppose I should agree to deliver, I will say to the Senator from Arkansas, who, we will say, is a cotton spinner, a thousand bales of cotton. He makes his contracts based on the expectation that he will get a thousand bales of cotton, and commits himself to his customers. Time passes, the price of cotton doubles; I tender the Senator 500 bales of cotton, and he says, "No; I want 1,000 bales of cotton. I have made my contracts based on that expectation, and I will be financially ruined unless I can get that amount of cotton at the price upon which we agreed." But I say, "Well, 500 bales of cotton will buy as much now as 1,000 would when we made the contract. I am delivering purchasing power." The Senator made his commitments and assumed his obligations, and he refuses to take the 500 bales of cotton.

I come to Congress and prevail upon Congress to pass a law providing that 250 pounds of cotton shall constitute a bale of cotton. The Constitution says Congress shall have power to "regulate the value" of money. It says, "fix the standard of weights and measures." So Congress passes the law, I deliver 250 pounds of cotton instead of 500 pounds as a bale to the Senator; he is compelled to take it; he can not fulfill his contract; he is forced into bankruptcy.

Some question was raised a while ago about wheat as a medium of exchange and standard of payment. The thought flashed into my mind that perhaps what we ought to do would be to pass a law providing that 30 pounds of wheat instead of 60 pounds of wheat shall constitute a bushel. Then we would double the number of bushels of wheat in the country and we would have twice as much wheat as we have now, and we could extinguish the grizzled specter of famine by legislation such as that.

Mr. President, to-day we wonder why people who have capital and money will not lend their money, why they hoard it, why the banks hoard money—and they are hoarding; why individuals hoard money—and they are hoarding it. We wonder why we hear on every hand, both at home and abroad, proposals which suggest the reduction or the repudiation of debts. We hear discussion of dividing the gold dollar, and yet wonder why people will not make loans. We wonder on the one hand why credit is refused, when on the other hand we are discussing the passage of laws which will make it impossible for creditors who have extended credit to collect their debts.

Mr. President, it is not strange in these circumstances that those having money are loath to lend it. The operation of economic laws can not be eluded. When they are violated, they exact a harsh penalty. We may make it impossible to collect a debt. We have the power to do so, but we can not compel people who have money to lend it. That is why from every quarter of this country to-day groups are trooping to this Capital asking us to pass laws to extend them credit.

Why do these people come here? Because they can not borrow money from people who have money. Why can they not borrow money? Because those having money to lend are afraid to lend it for fear we will pass an insolvency law, or for fear we will make them settle for half of what they parted with. We can do that where it is not otherwise stipulated in the contract.

In regard to contracts that contain the gold clause, I do not believe Congress has the power, the constitutional power, to change a contract which provides for payment in gold dollars of standard weight and fineness, or silver dollars of standard weight and fineness, or any other specific commodity.

Congress has the undoubted right to enact insolvency legislation. Congress has the express constitutional power to enact bankruptcy legislation. It has exercised that power as many as four times in the past. It may be necessary now to liberalize those laws in behalf of distressed debtors. That is a question of policy, not of principle. We have that power.

Debts undoubtedly constitute the center of gravity of our existing troubles. These debts may represent the abuse rather than the use of credit. Under existing circumstances these debts must be paid twice or thrice over—"there is the rub." That is the pity of it; that is the tragedy of it. My concern is that in our well-meant efforts to relieve distress we should not deepen distress. We should not apply a remedy that would aggravate the disease. I am willing to join in the support of any measure, any constitutional measure which I believe will accomplish more of good than of evil. That is my only test.

But I believe that we must develop some other plan than changing the number of grains in a gold dollar in order to extricate ourselves from this economic morass. Personally I think we will have to trade our way out. What our people need is more and better markets, not more and heavier debts.

Mr. SHIPSTEAD. Mr. President, the address of the Senator from Oklahoma [Mr. GORE] reminded me of a very practical statement made by Lord Aldenham in 1894 in discussing this subject, speaking of Great Britain as the creditor state. What he said of Great Britain as a creditor state applies to the individual or the corporation who is a creditor in dealing with his debtor. He put the practical question in so few words, and so clearly, that I can do no better than repeat what he said. This is his statement:

> We are the creditor state, and a great part of the balance of trade which comes to us is the interest on loans to foreign states. They pay us in cheap goods or dear gold. It is all one to us, but not to them. The prices of their commodities fall away, as we have seen. The cheaper the goods the more they must send. When they can send no more, they must send us gold for which they may have to pay. At last they can send no more, whether goods or gold, and they cease to pay at all. You have taken your debtor by the throat, but instead of getting his money you have stopped his breath! A poor result of appreciating gold (so far as that has been the cause) for the supposed benefit of those who were to receive dividends. Payment even in depreciated metal is better than no payment at all.

Mr. President, it is necessary to call the attention of the Senate and of the Congress and of the American people to the fact of the lack of means of payment, or lack of means with which to settle international balances of trade. It is not necessary here to repeat what has been repeated so often, the practical situation with which this country is confronted in an inability of debtors to pay in the appreciated price of gold.

We hear talk about the immorality of depreciating the dollar. We depreciated the dollar and debased the dollar in purchasing power every year from 1924 to 1929 by the inflation of credit.

Some one raised the question here this afternoon or made the statement that the production of gold had not kept pace with the growth of population. John Sherman said in 1873 that if the United States was to be able to continue to do business on a gold basis there would have to be an annual

increase in the production of gold amounting to $50,000,000 a year. At that time the United States had a population of 70,000,000. Last year we produced $51,000,000 of gold, and no one will deny that not only has our population increased, but our volume of business has increased and, what is more important in this connection, there is an overwhelming overproduction of evidences of debt payable in gold.

In 1925, when Great Britain and certain European countries returned to the gold standard, we started the world decline in the price level. We did not feel the full effect of it here until 1929, but the world's price level started to go down in 1925 when the various European countries decided to go back to the gold standard.

The reason for that was the overwhelming demand for gold, that these debts being decreed by governments to be paid in gold created a great demand developed for gold.

Jevons, the economist, in his Investigations in Currency and Finance, said:

> It stands to reason, of course, that if several great nations suddenly decide that they will at all cost have gold currencies to be coined in the next few years, the annual production can not meet the demand, which must be mainly supplied, if at all, out of stock. The result would be a tendency to a fall in prices.

As the demand for gold is increased, the domestic price level has continued to decrease. England went off the gold standard in order to balance her budget, and in order to balance her budget she had to stop the price level from descending further, and, as a matter of fact, the domestic price level of Great Britain was stabilized, and Great Britain refused to follow the gold-standard countries in the continued descent of the price level.

Our price level has been going down ever since. Last-week reports showed a continual decrease in the price level, destroying values of commodities, destroying values of capital issues of bonds and stocks and mortgages. This decline in the price level has been going on in ratio and in inverse proportion to the appreciation of gold. As the conception of the people awakens to the fact that gold must be had in order to pay debts and as the overwhelming amount of debts forces itself upon the public conscience, the demand for gold increases. As the demand for gold increases and gold appreciates, commodity values decrease.

Some economists say we must let it take its natural course until it stops of its own momentum. But there is no natural course in finance. It is all artificial. The natural course of the snowslide, unless it is stopped, is the bottom of the valley, carrying everything before it. The descending price level has attacked all values here and all over the world and is continuing like an avalanche, wiping out values, paralyzing our credit system, stopping commerce. There are very grave reasons why our commerce has failed—because of the lack of a means of settlement. We will not take goods. Countries have not gold. They can not pay because they can not sell. There is no available medium of exchange. They may have goods we want. We may have goods they want. But there is no basis upon which to settle.

A government official in Germany in 1931, when I called his attention to the fact that Germany used to import $800,000,000 worth of agricultural products every year and had that year placed a tariff on agricultural products, and when I asked how they could afford to do that and raise the price of food to their people, said, "We have no means of paying for that food. You will not take our goods. We can not get foreign exchange. We have no gold. We have no means of obtaining any means of settlement."

It has been said, and I think with some reason, that if silver were remonetized we would restore the purchasing power of the Orient and also our own. More than half the human race lives in the Orient. If that is true, and I believe it is true, it would raise the purchasing power of the Orient and it would revive trade. As trade is revived, more and more exchange or foreign exchange would be created. It would revive trade with Europe because the Orient would be able to buy. Europe therefore could sell to the Orient, creating a form of exchange. The greater the amount of international trade, the greater the amount of foreign exchange flowing in channels of world trade, and therefore they could settle their balances here with oriental foreign exchange. That is one reason why I believe that if the United States would remonetize silver it would help to restore commerce, at least between the Orient and Europe and between the Orient and the United States.

Mr. KING. Mr. President——

The PRESIDING OFFICER (Mr. JOHNSON in the chair). Does the Senator from Minnesota yield to the Senator from Utah?

Mr. SHIPSTEAD. I yield.

Mr. KING. I suggest to the Senator, in the form of a question, if he is not becoming heterodox. We are being flagellated daily by demands to impose an embargo upon all imports to the United States. A hundred reasons are assigned for cutting off our trade with foreign nations. The Senator is advocating a policy by which he suggests we would be enriched if we should find export markets and receive in part payment for exports the commodities of some other countries. I am afraid he is running counter to this demand that we shall buy nothing excepting that which is produced in the United States.

Mr. SHIPSTEAD. I have seen the dire results of orthodox policies pursued here. We have pursued policies here for the last 15 years which have been guaranteed to be orthodox, and we see the results, the dire results, of those orthodox policies. Within the last two years we have been called upon to vote for orthodox policies to stop the depression. I have voted against every one of them, I think, because I did not consider that they would have any effect on the depression at all except to increase its intensity and postpone the final day of reckoning. So I have no apology to make. One is almost forced to the conclusion that to be considered economically sound a man has to be an idiot. When I view the wreckage of the works of those who claim to be orthodox I make no apology for my lack of orthodoxy. I have lost most of my respect for the apostles of what is called "economic soundness." They are wrecking the country.

Mr. WAGNER. Mr. President, will the Senator yield?

The PRESIDING OFFICER. Does the Senator from Minnesota yield to the Senator from New York?

Mr. SHIPSTEAD. I yield.

Mr. WAGNER. I am asking for information, because that puzzles me somewhat. I understood the Senator to say that increasing the price of silver would increase the purchasing power of people like those of China who deal primarily in silver as a currency. As I understand it China imports her silver, so that if the price of silver is increased it means that she will have to pay a higher price for that particular commodity which she imports, and thus she will have to give more of her goods in return for that silver. If that is true, I am wondering how that could possibly benefit China?

Mr. SHIPSTEAD. China would send goods over here to buy silver. She buys silver here or wherever she can get it. It would increase the value of her money in proportion to the increase in the price of silver and therefore the value of her products.

Mr. WAGNER. But the point I am trying to make is that they would have to pay for that silver with their commodities, and as the price of silver increased they would have to give more of their commodities for the silver; so I can not see under those circumstances, if my premise is correct, how it would benefit that particular country.

Mr. SHIPSTEAD. If the price of silver in the Orient were raised, it would raise the cost of production. It would raise the price of goods in proportion to the price of silver. China would not have to send more goods. Her goods would have a greater value because based on the value of her money. I do not see how it would make her goods any cheaper. Her goods having had a greater value as the result of the increased value of her money and the rise in the cost of production of her goods, she would not have to give any more goods because the goods would have a greater value. She would have a sufficient medium of exchange in silver to do business. With a lack of exchange as in the price of gold, of course, commodities would come down for

lack of trade due to lack of a medium of exchange to facilitate trade.

Mr. WAGNER. It is difficult for me to understand how a country would be benefited by having to pay a higher price for a commodity which it imports.

Mr. SHIPSTEAD. I think she would have a higher price for everything and we would pay more for the goods she sends to us because our price level would be up. It would raise the price level in both countries.

Mr. WHEELER. Mr. President, will the Senator yield?

The PRESIDING OFFICER. Does the Senator from Minnesota yield to the Senator from Montana?

Mr. SHIPSTEAD. I yield.

Mr. WHEELER. May I say just a word in answer to the Senator from New York? In the first place, the Senator from New York is worrying about the Chinese. I am worrying about the people of the United States.

Mr. WAGNER. I simply inquired because the senior Senator from Minnesota asserted that the purchasing power of China would be increased thereby. It was to that suggestion that I addressed my inquiry.

Mr. WHEELER. The money the Chinese hold at the present time would be quintupled in its purchasing power in the world market. Consequently the Chinese, to the extent that they have silver, would have their purchasing power quintupled. Their labor cost would be increased because of the increased value or the increased price of production. At the present time, by reason of a depreciated currency in the gold countries, they can sell to us, but can not buy from us. That is true of every country on a similar basis.

Mr. WAGNER. Is it not true that as the price of currency increases, there is a drop in commodity prices?

Mr. WHEELER. No; because their currency increases in value.

Mr. WAGNER. When the gold dollar increases in value, it means commodity prices have dropped.

Mr. WHEELER. It means that the commodity prices in their own country go down, that is true, but the gold dollar to-day has a greater purchasing power in the world than any other dollar at all, and that is why we are on a basis where we can not sell to the rest of the world, but we can buy from them. If we raise the value of their money we quintuple the purchasing power of silver which they have. Consequently they will be able to buy more in the world market with the silver they have.

Mr. WAGNER. I do not think the Senator meant we are buying more than we are selling to other countries?

Mr. WHEELER. I am speaking about China and Japan.

Mr. WAGNER. Statistics show at the present time that the balance is in favor of the United States.

Mr. WHEELER. There is no doubt about that. I tried to point that out this morning when the Senator was absent. I said that is one reason why our gold is not leaving. I wanted to point out that China and Japan are to-day shipping in a quantity of goods over our tariff walls, as has been pointed out by Mr. Blythe in the Saturday Evening Post, by President Hoover, and by many others. What I propose to do is to bring up the price of production of our competitors by raising the price of their money. By doing that we bring up the world commodity prices and the prices of commodities in this country. That has been the history of silver throughout the years.

Mr. WAGNER. I do not want to be misunderstood as maintaining that increasing the price of silver would not have a beneficial effect, but the Senator from Minnesota cited the particular instance of China, and in that particular case I did not think the general rule applied because of the fact that China is required to import her silver and does not produce it.

Mr. SHIPSTEAD. Mr. President, the Senator will bear in mind that it was stated that China would dump her silver here and would get rid of it. I do not think she would.

Mr. President, I want to say a few words on the bill, in view of the fact that it has been said on the floor that unless this measure should pass with the branch banking privilege incorporated in it several hundred banks in the United States would close. That statement has left the implication that those of us who voted against the branch banking privilege naturally would be responsible for the closing of those banks in case the bill should fail to become law.

It has been said that if the bill with the branch banking feature should be enacted into law, it would prevent the closing of banks, for if the "strong" banks could have branches they would take over the weaker banks and the small banks, leaving the implication that the small banks are the banks that have been badly managed and are the ones that are in trouble.

When those holding that view are asked whether the strong banks will take over all the weaker and smaller banks they become very indefinite. When they are asked whether or not it is intended to take over a few and to let the remainder go they are also very indefinite. I have not been able to get anyone to assure me if the bill should pass containing the branch banking privilege that the so-called "strong" banks would take over the so-called weaker banks that we are called upon to save. It leaves the implication that it is only the small banks that have been in trouble; but the record of the loans made by the Reconstruction Finance Corporation which was inserted in the RECORD a short time ago by the Senator from Nebraska [Mr. NORRIS] shows that there has been more money loaned by the Reconstruction Finance Corporation to the strong or large banks than has been loaned to small banks, indicating that the large banks have been having greater difficulty than have the small banks.

The record also shows that there has been more money lost to depositors in the United States by branch-bank systems closing than there has been lost to depositors by unit banks closing. Therefore, so far as we have been presented with the record, there is nothing here to show that if this bill containing the branch banking privilege should become a law, or had previously become a law, we would have had any guaranty that the so-called strong banks or the larger banks would take over all the other banks which are said to be in trouble. We have too great respect for big things. We seem to think because a bank is big it is therefore strong and safe. There is no justification for this.

It has been said on the floor by the author of the bill that the reason banks are in trouble is because their securities have depreciated in value; that the general descending price level of the country has affected the securities in the portfolios of the banks. From the best information we can get, I believe that to be true.

We find also that the securities that have depreciated in value are usually bonds of one kind or another, or, in other words, long-term paper.

Mr. LONG. Mr. President, will the Senator from Minnesota yield to me?

The PRESIDING OFFICER. Does the Senator from Minnesota yield to the Senator from Louisiana?

Mr. LONG. I want to suggest the absence of a quorum.

Mr. SHIPSTEAD. I do not want to impose upon the Senate.

Mr. LONG. I should like to ask for a quorum, if the Senator will permit.

Mr. SHIPSTEAD. I yield for that purpose.

Mr. LONG. I suggest the absence of a quorum.

Mr. GLASS. Mr. President, has any business been transacted since we had the last quorum call?

Mr. LONG. Plenty.

Mr. GLASS. I am asking the question of the Presiding Officer.

Mr. LONG. We have received a message from the President of the United States.

Mr. GLASS. I am addressing my remarks to the Presiding Officer. I am asking the question of the Presiding Officer.

The PRESIDING OFFICER. The Chair will request the clerk to advise him. [A pause.] The clerk responds that there has been business transacted. The absence of a quorum has been suggested, and the clerk will call the roll.

The legislative clerk called the roll, and the following Senators answered to their names:

Ashurst	Dale	King	Sheppard
Austin	Davis	La Follette	Shipstead
Bailey	Dickinson	Lewis	Shortridge
Bankhead	Dill	Logan	Smith
Barbour	Fess	Long	Smoot
Barkley	Fletcher	McGill	Steiwer
Bingham	Frazier	McKellar	Stephens
Black	George	McNary	Swanson
Blaine	Glass	Metcalf	Thomas, Idaho
Borah	Goldsborough	Moses	Thomas, Okla.
Bratton	Gore	Neely	Townsend
Brookhart	Grammer	Norbeck	Trammell
Bulkley	Hale	Norris	Tydings
Bulow	Harrison	Nye	Vandenberg
Byrnes	Hastings	Oddie	Wagner
Capper	Hatfield	Patterson	Walcott
Caraway	Hayden	Pittman	Walsh, Mass.
Carey	Hebert	Reed	Walsh, Mont.
Connally	Howell	Reynolds	Watson
Coolidge	Hull	Robinson, Ark.	Wheeler
Copeland	Johnson	Robinson, Ind.	White
Costigan	Kean	Russell	
Couzens	Kendrick	Schall	
Cutting	Keyes	Schuyler	

The VICE PRESIDENT. Ninety-three Senators have answered to their names. A quorum is present.

Mr. SHIPSTEAD. Mr. President, at the time I was interrupted I was calling the attention of the Senate to the fact that the portfolios of the banks are decreasing in value because they contain bonds that are responding to the general descent of the price level. That is what has been closing the banks.

It has been said in the debate that if we had branch banking we would have had no closure of banks. Does anyone mean to say that if we give the privilege to the national banks of operating branches that will raise the value of the bonds in their bond pouches? When we look into the pouches of the banks of the United States we find securities which we do not find in the portfolios of the banks of Canada.

In the CONGRESSIONAL RECORD of January 12, on pages 1654 and 1655, there is printed a consolidated statement of the banks of Canada. From that statement it can be seen why the banks of Canada have had no failures during the depression. When one peruses the statement he does not need any argument to convince him as to why there have been no bank failures in Canada during the depression. It has been said there have been no failures in Canada because the branch-bank system is in operation there; but Senators forget that Canada has had branch banks for a great many years and that many years ago there were tremendous bank failures in Canada. They made their mistake; they learned a terrible lesson; and they paid the price. If the portfolios of the banks of the United States contained such securities as are shown to be contained in the portfolios of the banks of Canada, we would not be here talking about a bank reform bill.

We find that the only investments the banks of Canada hold are securities of the Canadian National Government, the securities of the provincial governments of Canada, and of the municipalities of Canada. Those are securities behind which is the taxing power of the Canadian National Government and of the Provinces and municipalities of Canada.

Canada, again, did not employ her credit system as we did through our banks from 1924 to 1929. The loans were made on a more conservative basis. In this statement you will find no record of holding-company bonds, of public-utility bonds, or of railroad bonds, with one exception. Less than 2 per cent of the total assets are invested in railway and other bonds, debentures, and stocks. I think we have a right to assume that the railroad debentures and bonds are the bonds of the National Canadian Railways, again guaranteed by the Government; and the total amount of that pouch containing those railroad bonds and debentures represents less than 2 per cent of the assets of the banks of Canada, and obligations of Canadian National Railways are guaranteed by the Government. More than one-half of their deposits are in loans and discounts; and, viewing their conservative investments, we have a right to assume that the loans and discounts are as conservatively covered by collateral as are their investments.

There is another pouch in which they have call loans and not exceeding 30-days loan in Canada on stocks, debentures, bonds, and other securities of a sufficient marketable value to cover in case of sale in the market, loaning money on collateral, making the borrower carry the risk, and not taking short-term funds as our banks are, and tying them up in long-term loans, except on government securities.

Evidently the bankers of Canada know the difference between short-term loans and long-term loans; and a man who does not know the difference between the two, and who does not know enough to know that they should not be mixed together, has no business to be in a bank.

There is a principle involved here that is a fundamental of banking, and that is that bank funds are short-term funds, and it is dangerous to invest short-term funds in long-term loans. The long-term loans come within an entirely different sphere of finance. When a bank loans money on collateral, making the borrower put up collateral with plenty of margin for safety, the bank runs no risk. The borrower carries the risk.

If, for instance, I loan my neighbor $50 for 30 days and he loans that money on an automobile for three years, how can he pay me back my $50 at the time it is due?

To illustrate: New York bankers shipped $800,000,000 of short-term loans to Europe, to England, and to the Continent. England shipped short-term loans to the Continent, some of their own and some that they had gotten from the United States. The Continent converted them into long-term paper, and when they could not remit when due the crash came. They could not pay back at the time when they were due. They could not liquidate long-term paper in order to pay the call money or the short-term paper. Then we had the moratorium, costing the American taxpayers $250,000,000, because short-term funds had been converted into long-term credits.

That is the secret of Canada's lack of bank failures. They know the difference between short and long term loans.

England has the same policy. Several British bankers told me that British banks did not buy securities. They said, "We are in the banking business. We loan money on collateral." They said, "We let the borrower take the risk. We do not buy investments on which we loan money, because we think it unethical for a banker to loan money on a security in which he is personally financially interested." That explains the lack of bank failures in Canada—not because they have branch banks, but because they have bankers who know they handle other people's money for safety not speculation.

Germany had a branch banking system, and has it now; and out of the 10 systems of branch banking in Germany, every one of them except one has been taken over by the Government through the Reichsbank of Germany, operating the branch banks of Germany, because in Germany the bankers did not know the difference, or acted as though they did not, between short and long term loans, and they mixed the two.

France has had no depression; but out of her four systems of branch banking, one is now carried by the other three; and when you see the difference in the banking practices of Germany and of England, both having had the depression, you know why England has not had any bank failures, and you know why Germany did, and why the United States did.

If the Banking and Currency Committee had put in a provision here that national banks should not be permitted to tie up short-term funds in long-term credits, I think they would have rendered a service to the national banks.

I very well remember when this provision, branch-bank provision, came in as a rider upon the so-called McFadden banking bill. At that time we had bankers coming here lobbying to liberalize the banking laws. They said, "We must be given permission to liberalize our business so that

we can compete with State banks," and I had the temerity to say to them, "You are competing too severely with State banks now." They wanted the law to permit them to loan their short-term funds on long-time real-estate mortgages, and they got that permission. I have seen some of them now. They wish they had not been permitted by Congress to make loans on long-term real-estate paper with short-term funds of their depositors. You can not make bankers by law.

The branch banking bill or feature came in here then, as it does now, with the same argument, that it would prevent bank failures. We were told, "They have no bank failures in Canada because they have branch banks. They have no bank failures in England because they have branch banks." The lack of failure of banks in Canada and Great Britain is not due to branch banking. It is due to good banking.

Mr. LONG. Mr. President, will the Senator yield for a question?

The VICE PRESIDENT. Does the Senator from Minnesota yield to the Senator from Louisiana?

Mr. SHIPSTEAD. I yield.

Mr. LONG. I do not know just what the Senator means by good banking; but the statistics show that since they have started the Canadian system some 26 chain-bank systems have closed down, and that there are only around 11 chain-bank systems there now.

They further show that there has been a 30 per cent loss in bank deposits in Canada as against an 11 per cent loss in bank deposits in the United States.

They further show that there is no such thing as a bank in Canada to lend money for the ordinary agricultural, industrial, or commercial business, as they do in the United States.

They further show that Canada, with resources equal to those of America, has been kept and remains practically an undeveloped country; and I do not think that shows very good banking for Canada.

The VICE PRESIDENT. The time of the Senator from Minnesota on the amendment has expired.

Mr. LONG. Mr. President, a parliamentary inquiry.

The VICE PRESIDENT. The Senator will state it.

Mr. LONG. Has not the Senator another hour on the bill?

Mr. SHIPSTEAD. I am talking on the bill.

The VICE PRESIDENT. The Senator has an hour on the bill. He has used 30 minutes.

Mr. SHIPSTEAD. I have an hour on the bill. I am talking on the bill now.

Mr. LONG. A parliamentary inquiry: Has not the Senator another hour now on the bill, if he wishes it, in addition to what he has used?

The VICE PRESIDENT. The Senator took 30 minutes on the amendment. He has an hour on the bill.

(At this point Mr. SHIPSTEAD yielded for the consideration of a conference report which appears at the conclusion of his speech.)

Mr. SHIPSTEAD. Mr. President, just as I was interrupted, the Senator from Louisiana asked a question about the banks of Canada. He said that they had not loaned money to the farmers and business men as had been done by the banks of the United States. I am of the opinion that the business men and farmers of the United States would be far better off if they had not been able to borrow quite so much money during our period of inflation of credit. That is creating debts in a cheap dollar to be paid in a dear dollar. I do not consider that that was good banking at all. It was not even good citizenship, and has a great deal to do with the terrible condition in which we now find ourselves.

When I said I thought Canada had good bankers, I meant that they were able to take other people's money and invest it safely in loans so that they could get the money back and pay the people when the people from whom they borrowed it in a form of deposits had it coming to them and demanded it.

Answering the Senator's question as to what I call a good banker, I would say that, in my opinion, a good banker is a man who first remembers he is handling other people's money, conserves and protects, first of all, the money of the depositors by prudent investments, or prudent loans on collateral. He will, as a result, do business on very little profit and with practically no loss. That is what I call a good banker.

I do not call it good banking to do what was practiced here for a period of six or seven years—buying printing presses, running them night and day printing evidences of debt in the form of notes and mortgages and bonds and stocks, and peddling them out to the little banks, which were so gullible that they thought the big banks could do no wrong because they were big, loading up the gullible investors with these pieces of paper, with green fringe and gold stars on them, which can be made for less than a cent apiece, getting $100 for them if they were called stock, and if they added another cipher and called them bonds got a thousand dollars for them. I do not call that banking in the legitimate sense of banking, certainly not commercial banking. That is a form of piracy, but considered orthodox.

The idea was fostered here that we could not only finance commerce and business but run all the printing presses of the United States, and that was not the only idea that prevailed. Our bankers had the idea that the Federal reserve system and the banks of the United States could be used to finance the entire world, and our banking system was made the foundation for carrying the credit and the debts of the world for banking purposes, and we have to pay the price for that, too.

Mr. President, I wanted to make these remarks, in view of the fact that the principal difference between bank legislation and bankers had not, in my opinion, been properly brought out in the discussion, that this bill was to be used as a vehicle, undoubtedly upon the advice and counsel of people who knew just exactly what they wanted, and to carry through things which could not be based upon any sound principle of banking. Nor is there any sign or any evidence that it would stop bank failures; and I wanted to explain why there is a lack of failure of banks in Canada and England and not here in order to brush away a lot of misrepresentation of facts previously presented here.

Mr. President, I think there are two things in this bill which are meritorious. I am sorry to see those things mixed up with some of the other things in the bill. I believe that liquidation of closed banks is a commendable thing. I believe that divorcing investment affiliates from commercial banks is a commendable thing to do. They ought to be divorced. They should never have been allowed to unite. However, that part of the bill can not be said to be an emergency measure. They have unloaded upon the banks all the bonds and stocks they are going to be able to unload upon them for several years to come. The damage is done. That part of the banking bill can be passed at any time. We can always lock the door after the horse is stolen. It does not make much difference whether we do it to-day or to-morrow. The main thing is to get the horse back, and we are not going to get it back in that way.

Mr. President, I am sure the Committee on Banking and Currency brought this bill in with all of its contents in good faith, and whatever I have said about certain provisions of the bill I do not intend as any personal reflection upon the committee or upon any member of the committee. I hope, nevertheless, we may look forward to the time when we shall be through with these fetish remedies that serve merely to intensify our evil policies and their dire consequences.

During the delivery of Mr. SHIPSTEAD's speech—

MESSAGE FROM THE HOUSE

A message from the House of Representatives by Mr. Haltigan, one of its clerks, announced that the House had agreed to the report of the committee of conference on the disagreeing votes of the two Houses on the amendment of the House to the bill (S. 5160) to provide for loans to farm-

ers for crop production and harvesting during the year 1933, and for other purposes.

The message also announced that the House had agreed to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 8750) relative to restrictions applicable to Indians of the Five Civilized Tribes of Oklahoma.

ENROLLED BILL SIGNED

The message further announced that the Speaker had affixed his signature to the enrolled bill (S. 3675) relating to the deferment and adjustment of construction charges for the years 1931 and 1932 on Indian irrigation projects, and it was signed by the Vice President.

CROP PRODUCTION AND HARVESTING LOANS—CONFERENCE REPORT

Mr. SMITH. Mr. President——

The VICE PRESIDENT. Does the Senator from Minnesota yield to the Senator from South Carolina.

Mr. SHIPSTEAD. I yield if I do not lose the floor. I do not want to lose the floor. If the measure which the Senator from South Carolina desires to present will lead to discussion, I should prefer not to yield.

Mr. SMITH. As I understand, the consideration of a privileged matter, such as a conference report, does not cause a Senator to lose the floor.

The VICE PRESIDENT. The Senator would not lose the floor if he yielded to permit the Senate to take up a conference report.

Mr. SHIPSTEAD. I will yield for that purpose if it does not lead to too extended debate.

The VICE PRESIDENT. The Chair lays before the Senate a conference report, which will be read.

The legislative clerk read the report, as follows:

The committee of conference on the disagreeing votes of the two Houses on the amendment of the House to the bill (S. 5160) to provide for loans to farmers for crop production and harvesting during the year 1933, and for other purposes, having met, after full and free conference have agreed to recommend and do recommend to their respective Houses as follows:

That the Senate recede from its disagreement to the amendment of the House, and agree to the same with the following amendments: On page 2 of the House engrossed amendment, line 3, strike out "cultivation and harvesting" and insert "and cultivation, and in drought and storm stricken areas not to exceed $1,000,000 for feed for farm livestock"; on page 2, line 5, of said engrossed amendment strike out "$75,000,000" and insert "$90,000,000"; on page 3, line 2, of said engrossed amendment strike out the words "and harvesting"; on page 3, line 3, after the word "crops" and the comma, insert "and feed for farm livestock"; and the House agree to the same.

CHAS. L. MCNARY,
LYNN J. FRAZIER,
E. D. SMITH,
Managers on the part of the Senate.

MARVIN JONES,
H. P. FULMER,
W. W. LARSEN,
GILBERT N. HAUGEN,
FRED S. PURNELL,
Managers on the part of the House.

Mr. SMITH. I ask for the adoption of the conference report.

Mr. KING. Mr. President, I should like to ask the Senator from South Carolina to make a little explanation; and I do it in view of the fact that I have been told that with respect to one of the bills that we passed some time ago, providing for seed loans, some 1,600 or 1,700 employees were put into positions by the Agricultural Department, and that an enormous number of persons were employed in the various States for the administration of the act. I am told that with respect to a bill which was passed—and I presume this is the one—it is contemplated that a large number of lawyers will be employed in every county, and perhaps 3,000 to 5,000 employees, for the purpose of administering it.

I should like to ask the Senator if he has made any investigation as to the machinery to be used in the execution of the law, and whether it would not be possible to utilize some of the organizations which now exist under the Reconstruction Finance Corporation act for the purpose of carrying out the provisions of the measure that is now before the Senate.

Mr. SMITH. Mr. President, under the terms of the House bill, substituting some features for the Senate bill which has been reported, there is no doubt but that during the last administration—we have had, up to this time, five loans of this character—during the last administration there were no doubt more employees than would have been justified, in my opinion, on account of certain political conditions.

This fund has been wonderfully economically administered up until this last year. I do not know of any lawyers who have been employed for the purpose of aiding the administration of this law. I do know that this measure would afford the only real aid which the tenant farmer, the one-horse farmer, has gotten since I have been a Member of the Senate. In every other effort on the part of Congress to aid the man in the field, we have had too many cream separators between the appropriation and the man who was ultimately to receive the benefit. This would give direct aid. The percentage of these bankrupt and distressed individuals who have made repayment to the Government is marvelous.

Mr. President, in answer to the query propounded by the Senator from Utah, I will say that I do hope that in the administration of the fund to be provided the greatest economy possible will be exercised, in order that the suffering individuals may get the maximum assistance this bill would render. From every State in the Union has come the request for this, the most efficient and direct aid the real dirt farmer, the one in the field, could receive. I hope the report will be agreed to.

Mr. KING. Mr. President, the Senator did not quite answer my question, or at least the last question I propounded, as to whether this fund might not be administered by some of the organizations which are now set up under the Reconstruction Finance Corporation; for instance, the regional credit organizations.

Mr. SMITH. Mr. President, in answer to that, I will say to the Senator that they themselves have not set up yet, and under the terms of the law need not set up, any administrative agencies in the field, for the reason that the requirements as to collateral under the terms of the law have made it impossible for them to function. I understand that practically no contracts have been let, because there are required, as a precedent to a loan, securities outside of the products of the farm and in possession of the farmer to such an extent that no one can qualify. The same administrative forces will be used in the administration of this measure that were used, not last year but in the preceding years, and I do not think there will be any duplication whatever between the so-called regional credit banks and the agencies administering this fund, for the reason that the regional credit banks can only deal with those who have sufficient collateral outside of the farms to qualify.

Mr. KING. One other question: Will the same individuals who are now representing the Department of Agriculture in handling the seed loans be employed to administer the funds under this measure?

Mr. SMITH. I do not think the Senator, knowing as well as I do the imminent change of administration, expects an answer to that question. I do not think it is necessary.

Mr. KING. I was wondering whether or not, during the intervening time before the termination of the present administration and the coming in of the next administration, there would not be remarkable zeal manifested by the Secretary of Agriculture to maintain and to endow with the power those in authority now in this organization?

Mr. SMITH. I think not, Mr. President. The time is too short; and, really, I think the present administration, after

the smoke of battle has cleared away, will be inclined to be as patriotic, perhaps, in the administration of the law as they would be under normal conditions, because last year, as the Senator knows, was a rather abnormal year, and men will use any kind of machinery they possibly can to help themselves in the midst of a very distressing condition.

Mr. KING. I would like to say, Mr. President, in conclusion that, as far as I am concerned, I would be entirely willing that the present administration should proceed to set up the necessary machinery, if there were any assurance that it would set up machinery that would be effective and fair and just, but we all know that during the past years political organizations have been set up for the purpose of administering the funds provided.

The VICE PRESIDENT. The question is on agreeing to the conference report.

The report was agreed to.

After the conclusion of Mr. SHIPSTEAD'S speech—

MESSAGES FROM THE PRESIDENT

Messages in writing from the President of the United States were communicated to the Senate by Mr. Latta, one of his secretaries.

BANKING ACT

The Senate resumed the consideration of the bill (S. 4412) to provide for the safer and more effective use of the assets of Federal reserve banks and of national banking associations, to regulate interbank control, to prevent the undue diversion of funds into speculative operations, and for other purposes.

Mr. GLASS. Mr. President, I have no disposition to discuss the pending amendment. I would like to develop, however, whether there are others who want to discuss it, because we have wasted five hours to-day in discussing problems which have not the remotest relationship to the pending banking bill, directly or indirectly.

I want to say, while I am on my feet, however, that if views presented here to-day are to prevail, this country is nearing the brink of absolute wreckage, without any question of doubt. If it be admitted for a moment that private contracts, of which there are millions upon millions now in existence, may be abrogated by a law of Congress, or if, indirectly, the creditors involved in these contracts may have their property confiscated by means of taxation, that would simply abrogate contractual relations in this country and there would be no more of them.

Mr. WHEELER. Mr. President, will the Senator yield?

Mr. GLASS. No; I am going to occupy a very few minutes. I am not going to discuss the merits of the proposed amendments.

Mr. WHEELER. I just wanted to direct attention to the fact that the Senator made a statement with reference to the fact that there was nothing in the remonetization of silver that had any connection with the pending bill.

Mr. GLASS. No; I said the views expressed on the floor here to-day. I had not heard the Senator from Montana express any such views. An astonishing differentiation was sought to be made between the moral obligation of the Government of the United States and the moral obligations of the citizens. It was held that perhaps the Government would have to pay its obligations, already contracted, in the dollar of existing gold content, but even that was regarded as doubtful, or at least the view was expressed that it was within the province of Congress to determine that that should not be done.

If such views are to obtain, if there is any approach to that view by the Congress of the United States, may God have mercy upon the Secretary of the Treasury of the United States when he shall be compelled, in a few months from now, to refund $11,000,000,000 of Government obligations. I should like to be told where he might expect to find his clients. What bank or individual investor of average intelligence would agree to buy a bond of the United States in such circumstances?

Moreover, Mr. President, it seems to have been forgotten that this Government now has outstanding in excess of $20,000,000,000 of its obligations made in reliance upon the sanctity of contract. There are millions upon millions of citizens owning these obligations. While too many of them are in the banks' portfolios, in my view, billions of dollars of them are held by individual citizens and by estates representing the earnings and the livelihood, the very subsistence, of widows and orphans and other people of moderate means. If it may be held that the Congress of the United States has it within its jurisdiction and power to repudiate, practically, such obligations, then we are indeed in desperate straits.

Arbitrarily reduce the contents of the gold dollar? Very well. What is the moral difference between a 30 per cent and a 50 per cent repudiation in an obligation that has been incurred? Why shall we make it 16 grains of gold? Why not make it 6? Why not go the whole length and authorize the repudiation of these obligations by the debtor class of the country? Why not follow the example of Germany and start the printing presses without cease and then repudiate our own currency and let it be used for wall paper and for less desirable but necessary purposes? [Laughter.]

It has been to me a most astonishing and alarming discussion. But, Mr. President, I do not intend to be a party to prolongation of the debate upon measures that have no reference whatsoever to anything in the bank bill.

I ask the attention of the Senator from Montana [Mr. WHEELER] and the Senator from Louisiana [Mr. LONG]. Unless there may be now within a reasonable time a termination of the debate upon problems that have no reference to the bill, I shall feel compelled to move to lay the pending proposition upon the table so as to terminate debate. We have now expended five hours and eight minutes in the discussion.

Mr. LONG. Mr. President——

The VICE PRESIDENT. Does the Senator from Virginia yield to the Senator from Louisiana?

Mr. GLASS. I yield.

Mr. LONG. I have desisted from even discussing my own amendment.

Mr. GLASS. Yes; I think the Senator has.

Mr. LONG. I hope the Senator will not deprive me of a few restricted remarks.

Mr. GLASS. Oh, no; I would not think of depriving the Senator of a few observations. [Laughter.]

Mr. JOHNSON. Mr. President, I understood the Senator from Virginia to say he was going to make a motion to lay on the table?

Mr. GLASS. Not now.

Mr. JOHNSON. I wanted him to yield to me five minutes for an extraneous matter.

Mr. GLASS. I will yield to the Senator much more than five minutes in the moment that I shall further consume.

Mr. President, I ask unanimous consent to insert in the RECORD as a part of my remarks, not meaning thereby that I agree with all the views expressed, an article by the Secretary of the Treasury, Mr. Ogden Mills, on this very problem.

The VICE PRESIDENT. Is there objection?

Mr. FESS. Mr. President, may I say to the Senator from Virginia that the article was inserted in the RECORD this morning.

Mr. GLASS. I am told the article was inserted in the RECORD to-day, and therefore I withdraw my request.

Mr. LONG. Mr. President, will the Senator yield for a question?

Mr. GLASS. Certainly.

Mr. LONG. I understood the Senator wanted to offer the remarks of Ogden Mills for the RECORD?

Mr. GLASS. I wanted to have them printed in the RECORD, but I am told they have been printed in the RECORD to-day, and therefore I withdrew my request.

Mr. WHEELER. Mr. President, does the Senator coincide with the remarks of Ogden Mills about inflation?

Mr. GLASS. I stated distinctly that I would not care to have it thought that I coincide in all the conclusions of Mr.

Mills, but I think it an exceptionally thoughtful and temperate presentation of the various aspects of the problem of inflation.

Mr. WHEELER. Let me say to the Senator that we have just had an election, and the election returns show that the people want no more of Mr. Ogden Mills in the United States Treasury.

Mr. GLASS. Yes; and we just had declarations by two party platforms that we do not want free silver except by international agreement, and yet the matter has been precipitated here upon a bill to which it has no relation whatsoever.

Mr. WHEELER. Yes; and the Senator himself was in one national convention, where he signed a report in favor of independent bimetallism for this country—in 1896, if I recall correctly.

Mr. GLASS. Oh, my heavens! [Laughter.] I would not like to detain the Senate by telling it how often I have changed my mind for the last 40 years, and always in the right direction! [Laughter.]

TRIBUTE TO TRIUMPH OF SENATOR GEORGE W. NORRIS

Mr. JOHNSON. Mr. President, with apology to the Senate and apology to the Senator from Virginia [Mr. GLASS], I rise for an instant to felicitate the Senator from Nebraska [Mr. NORRIS] upon two accomplishments such as during our legislative careers we have seldom witnessed.

Mr. President, in December, 1924, engaged in the controversy over Muscle Shoals with the distinguished Senator from Alabama, Mr. Underwood, who was then the Democratic leader, I gave utterance to certain words concerning the dreams of the Senator from Nebraska. Those dreams have during my lifetime and his now come true. Those dreams, sir, of the Senator from Nebraska, at this late day in his life and in that of some of the rest of us, having been consummated and realized, I recur, with the permission of the Senate, to the words I used in December, 1924, and I read them upon the occasion now of congratulating him and felicitating him upon the wonderful accomplishments that have been his legislatively and otherwise in this body and in this Nation.

Then, sir, in replying to the Senator from Alabama, Mr. Underwood, I said:

I heard the Senator from Alabama say the other day that the Senator from Nebraska was dreaming dreams. Maybe he is right. Perhaps the Senator from Nebraska, in what he asks, is dreaming dreams; but since man emancipated himself, Mr. President, men have been dreaming dreams for man and mankind, and it is the dreaming of these dreams that has marked the mileposts in human progress during all the centuries past.

I can recall historically that Galileo dreamed dreams. He dreamed his dreams, and, though compelled to recant under the threat of torture, his frightened lips yet told the immutable and the unchangeable truth.

Newton dreamed a dream as he lay upon the ground and saw an apple fall. He dreamed a dream that now we all understand.

Columbus dreamed a dream of another world far beyond the oceans that then were known—a dream at which every court scoffed and every courtier laughed. We are here to-day because Columbus dreamed that dream.

The men who landed at Plymouth Rock and those who came to Jamestown dreamed a dream of a new empire and a great, new nation. That dream we of this generation realize in part.

Garrison and Wendell Phillips dreamed a dream—a dream that resulted in one of them being mobbed in New York and another chased by a populace in Boston. Just think of it! But Lincoln brought the realization of that dream.

Roosevelt dreamed a dream of the Panama Canal. To-day it is the greatest engineering feat in all the world.

The Senator from Michigan [Mr. COUZENS] dreamed a dream in the city of Detroit—of Detroit public ownership there. To-day that public ownership exists profitably for the city of Detroit.

Down in the city of Los Angeles a self-educated engineer named Mulholland dreamed a dream that water might be brought for domestic purposes 250 miles, over gorges and canyons and impassable mountains. First he was laughed at. That dream to-day is a realization, and Los Angeles draws its great water supply from the Owens Valley, 250 miles distant.

Some men in the city of San Francisco years ago dreamed a dream when the city was in the grip of a street railroad that wrought its own will as it pleased. They dreamed a dream that San Francisco might operate a municipal road. To-day San Francisco operates that road, operates it on a 5-cent fare, and the municipal road there, in opposition to that privately owned, is operated successfully, prosperously, advantageously.

So it has been, Mr. President, with dreams of real men during all the years. Dream on, you Senator from Nebraska, for your dreams mean but one thing. Your dreams, sir, mean that humanity may benefit, people may prosper, and human beings may be a bit happier.

So the dream of the Senator from Nebraska I can appreciate. I trust he will continue iterating and reiterating. I regret the note of discouragement that I observed the other day in his remarks. Oh, be not discouraged, sir! Never mind the temporary defeat or the temporary disaster. Never mind what ephemeral catastrophe there may seem to be, for dreams such as are yours ultimately will prevail, for the truth prevails. Sometimes it is as dangerous to preach the truth as to enter a powder magazine with a lighted torch, but, nevertheless, truth yet exists; and all history has taught us, all people's governments have taught us, that whatever may be the check, whatever may be the defeat, whatever the haltings, the heartburnings, and the disappointments, they are but ephemeral, and ultimately, finally, the truth will prevail. (CONGRESSIONAL RECORD, Senate proceedings, December 19, 1924, 68th Cong., 2d sess., vol. 66, pt. 1, p. 816.)

To the Senator from Nebraska in this day of the consummation of his dream of his constitutional amendment, for which year after year and day after day, against insuperable obstacles, he fought, which now by all the requisite States of the Union has been ratified, I extend not only my felicitations and congratulations but I believe as well the felicitations and congratulations of this whole body and, better than all, those of the American people.

Then, Muscle Shoals—it was concerning that I talked December, 1924—there is the dawn of a new day. There is the dawn of a new era in dealing with the Government's money, and the people's money, wrung from them by taxation, at Muscle Shoals; there is the dawn of a new day for the long effort and brave struggle put forth in respect to that particular project by the Senator from Nebraska.

Two of his marvelous dreams thus have come true. Dream on, my friend! Your dreams are ours, and your dreams mean the benefit of the American people and by them countless thousands are rendered happier.

BANKING ACT

The Senate resumed consideration of the bill (S. 4412) to provide for the safer and more effective use of the assets of Federal reserve banks and of national banking associations, to regulate interbank control, to prevent the undue diversion of funds into speculative operations, and for other purposes.

Mr. REED. Mr. President, I hesitate to add any word of mine to the discussion of the pending bank bill because I do not want to seem to be one who has prolonged its discussion or postponed its disposition, but I can not refrain from putting into the RECORD my feelings about the pending amendment and my feelings about the discussion that took place here this morning respecting a change in the value of our currency.

First, as to the pending amendment for the remonetization of silver at the ratio, as I recall, of 16 to 1. As I regard it, that is nothing more nor less than an attempt by the United States Government to peg the price of silver as against the entire world. Silver to-day is worth something less than 25 cents an ounce. If it shall be made available for free coinage, at the rate of 16 to 1, it will acquire an artificial pegged value of five times its present market value or something slightly more than $1.25 an ounce.

Obviously the surplus silver of the entire world will be sold to us as quickly as it can be brought to America, unless we, by putting a duty of about 400 per cent on its present-day value, establish thereby an embargo to prevent its being brought in, with the paradoxical result that we make a metal the basis of our coinage with one hand and forbid its free movement in international commerce with the other. Obviously if silver is a sound standard for currency in connection with the gold standard, it ought to be just as free of movement from one country to another as should be gold.

I am told, Mr. President, that there are about 250,000,000 ounces of surplus silver in the world to-day. Immediately we would be called upon to buy all that silver. I am not stating that figure of my own knowledge, because I have no personal knowledge of the amount; but I do know, I have

been so told by people whose information is better than my own, that in India alone there is such a store of surplus silver that we would be compelled to pay to them hundreds of millions of dollars, at this dollar and a quarter rate, for that silver which they would immediately send to us.

How in the world the depression in America can be remedied, how in the world the distress in America can be relieved, how the unemployed in America can be aided by our buying from Asiatic countries millions of ounces of silver that we do not need, I am utterly incapable of understanding. To try to peg the price of silver at $1.25, which is what this amendment would do, would be just as ineffective in helping any other industry than that of silver mining as was the attempt to peg the price of wheat, which failed so miserably, or to peg the price of cotton, which failed so miserably. We would give a great bonus to the miners of silver, and naturally their industry would prosper out of all proportion to the rest of American business; we would be giving a great cash bonus to India, and perhaps to China, and we would be relieving Great Britain from an embarrassing contract under which she is working, requiring her to buy some 80,000,000 ounces of silver from India each year. They would be relieved, but how the rest of the United States would be advantaged by it is beyond my comprehension. Enough, then, for my reason for voting against this amendment. I never supposed, after 1896, that the Senate of the United States would again have to vote on the free coinage of silver again, but I hope we will do it; and I trust that we will show such a preponderance of opposition to the amendment that the proposition will not be worth while reviving.

Mr. KING. Mr. President, will the Senator yield?

Mr. REED. Yes.

Mr. KING. Does the Senator mean by any observations he has made to repudiate the views which were expressed so often by President McKinley and other distinguished Republicans, including Mr. Blaine, and which found expression in Republican platforms, in favor of remonetizing silver internationally at the ratio then existing and the maintenance of a parity between silver and gold?

Mr. REED. That is something totally different.

Mr. KING. I was wondering whether the Senator's animadversion was directed against the use of silver for primary money or rather was directed against the suggestion that the United States go it alone?

Mr. REED. My opposition is based on the idea that the United States should go it alone. Whether some sort of bimetallism can be arranged by international agreement is a totally different matter.

Mr. KING. The Senator does not contend, if I may be pardoned for interrupting him further——

Mr. REED. Certainly.

Mr. KING. That the gold standard has proven satisfactory, and that, with the limited quantity of gold, there being to-day about 11,000,000,000 ounces for monetary purposes in all the world, there is an adequate base upon which to rest the credits and currencies of the world?

Mr. REED. I do not want to get into that subject at all; that would carry me too far afield and use up too much time; and I am still mindful of the fact that we ought to get a vote on this amendment and get it quickly. But I must say one word——

Mr. WHEELER. Mr. President, will the Senator yield for a question?

Mr. REED. Yes.

Mr. WHEELER. I understood the Senator to say to the Senator from Utah that he thought an international agreement fixing the price of silver or remonetizing silver at $1.25, or some such figure, would raise commodity prices. Did I understand the Senator correctly?

Mr. REED. Is the Senator addressing the question to the Senator from Utah?

Mr. WHEELER. No; I am addressing my question to the Senator from Pennsylvania.

Mr. REED. I do not want to get into the question of an international agreement. No such thing is proposed here. We are not voting on a proposal to bring about an international agreement; we are voting on a proposal that the United States, all by itself, shall be made the dumping ground of the world's surplus silver and shall try to peg the price for the benefit of that industry at a figure five times its market value to-day. I say it is preposterous, and I expect to vote against it for that reason.

Mr. WHEELER. If the Senator will pardon a further interruption, let me say to him that, with all due deference to his statement with regard to it, it is perfectly apparent that the Senator has not given the subject very serious consideration, or he would never permit himself to make a statement of that kind on the floor of the Senate.

Mr. REED. Perhaps not. I can only use the brains that the Lord gave me, and if they are of a poor quality it is not my fault.

Now, Mr. President, I wish to say a word about these proposals for inflation. It is a subject on which one could talk for a long time. Obviously there are two kinds of inflation. First, there is the printing-press method, Congress authorizing an indefinite issue of that kind of money which in this country we call greenbacks. We do not need to consider that very seriously, because we all know that by the operation of economic law that kind of money would immediately drive out of circulation all the better kinds of money that now exist. That is elementary economics, not subject to debate. We would then be on a printing-press basis entirely. It is a process that, like the use of drugs, leads one steadily downward into further excess. We have seen it resorted to in many countries since the war; in fact, we have seen whole masses of populations, particularly the great middle class of those populations, bereft of their entire substance by what everyone must see was profound national dishonesty. I do not believe that there is the slightest likelihood that this country or either House of the Congress will ever approve the unlimited issue of greenbacks. It is too bad that the matter should be discussed seriously, because of the apprehensions that the very fact of discussion will create.

The other kind of inflation which has been talked about to-day consists in two steps: First, a legislative enactment by us that the gold content of the dollar shall no longer be 23 and a fraction grains of gold, but shall be something less than that—say 16 grains or 10 grains, or whatever figure might be suggested. Obviously that, standing by itself, would give spotty and irregular relief to the debtor class, because most of our farm mortgages, all of our corporate bonds, all of our governmental bonds—Federal, State, county, and city—are made payable in gold dollars of the present standard of weight and fineness; and so long as those contracts remained obligatory, the fact that we had debased the gold dollar would give relief to the maker of a promissory note, perhaps, but no relief to these other debtors who need relief perhaps even more.

Mr. LONG. Mr. President——

The PRESIDING OFFICER (Mr. COUZENS in the chair). Does the Senator from Pennsylvania yield to the Senator from Louisiana?

Mr. REED. No; I do not want to yield for a minute.

That proposal necessarily would have to be accompanied—and the speakers this morning were frank enough to say so—by an attempt on the part of Congress to impair the obligation of the gold-standard clauses in all of these bonds and mortgages.

Whether Congress has the power to take the property of the creditor—whether such a taking would not be a violation of the due-process clause—is somewhat of a hair-splitting legal proposal that might take time to discuss. I should doubt very much whether Congress had that power. If it had the power, this Nation ought not even to dream of its use. I doubt if the power exists; I want to make that clear; but I do not believe that the United States of America or the people of the United States have gone dishonest overnight merely because we are having a spell of hard times.

As was well said by the Senator from Virginia [Mr. GLASS], there is no stopping place. If we could make the content of

the gold dollar 16 grains of gold, we could make it 6, or we could make it 3, or we could make it 1, or we could make it a disappearing fraction.

I do not believe that the United States is going in for that. I believe that the very discussion of it here has a profoundly bad effect; and I believe that if such a measure were seriously pressed in Congress, and if the country thought that Congress was seriously intending to enact such a measure, all the supposed benefits of its enactment would be many times outweighed by the panic and crisis that would be precipitated during the days while such a bill was pending. We would see a flight of capital from America that would take our breath away. We would see a collapse of business and credit, a hoarding of gold, a rush to get rid of these securities that we were planning to debase; we would see such a catastrophic overturn in American business that all of the supposed benefits of its enactment would not begin to compensate for the damage that we had done.

So I hope, Mr. President, that at every opportunity that we have we will put our feet down hard on this talk of throwing away the national honor in any such scheme. After all, we are merely stealing from one class to help another by any such process, and we would be inflicting upon American national credit an injury from which it would not recover in a century. I mean that, and I believe that it is proven by the experience of France since she repudiated the assignats that were issued in the time of Louis XVI. I believe that to-day France is paying a higher interest rate because of that default a century and a half ago. I believe that America a hundred years from to-day would have to pay a higher rate of interest, because she would be considered a poorer credit risk.

America borrows money to-day at a fraction of 1 per cent. Why? Because her credit is not subject to doubt. It is the best credit in the world. Let us not jeopardize it even by such reckless talk as we might have recourse to in our wild desire to help the suffering that we see about us.

In what I say I am not speaking without a full realization of the distress that exists, of the difficulty of the debtor class in meeting its obligations with commodity prices at the shockingly low level at which they now are. All of us who are not deaf, dumb, and blind know what distress exists in the United States; but we also know that the best contribution we can make toward recovery is the use of some self-control here in Congress. There are many signs of reviving business. If we will do our part and show some self-restraint, and not rush after any panacea that is suggested from God knows where, American business will come back, commodity prices will come up, and the distress that is about us now will cease.

Mr. BARKLEY. Mr. President, I have no desire to delay the Senate in the consideration of this bill, on which every one of us has been anxious to vote for a number of weeks; nor could I hope to enlighten the Senate with reference to the amendment offered by the Senator from Montana [Mr. WHEELER]. Inasmuch as I shall vote against his amendment, however, I wish to say just a few words with reference to the situation, not in explanation of my vote, not in any effort to apologize for it, but in the hope that I may offer a constructive suggestion that may ultimately result in some benefit in the solution of this great question of money.

There is no problem that confronts the American people to-day that touches them more vitally from every standpoint than the question of money. I doubt whether any man in the world has the last word on the subject of money. I doubt whether any man in the world, if commissioned by all the governments of the world, could sit down and solve the question of money, of its standard, type, or character. But there is no subject that arouses a keener interest among people, whether they be financiers, farmers, clerks, or professional men, than the subject of the circulating medium which operates as a means of exchange in the transfer of what they have for what they want.

I remember as a schoolboy in 1896, during the Bryan campaign, how difficult it was for me or others to pick our way down the streets in a small county-seat town in Kentucky because of the fact that any man who stopped on the corner and began to discuss silver or gold or the monetary standard immediately gathered around him everybody who had nothing else to do—and that included nearly all the people at that time—in order to listen eagerly and intently to a discussion, even an amateur discussion, of the question of money.

That campaign came and went. Those who advocated the free and unlimited coinage of silver on the theory that there was not enough money in circulation, and that gold as a single standard for money did not afford enough of that precious metal to operate as a basis for enough circulating money to transact the business of the world, found a remedy soon afterward in the discovery of gold in Alaska.

There are very many able economists and financiers who now take the position that there is not enough gold in the world to form a true and sound basis for the issue of currency in sufficient quantity and flexibility to afford the means of transfer and exchange necessary in a complex business world.

Frankly, I do not know. Sometimes I feel that our business, not only nationally, but internationally, has become so complex, and the basis for credit and money and the exchange of products has become so complicated, as to outgrow the present volume of gold in the world operating solely as a basis upon which our monetary system exists.

As a remedy for that situation, if it is a situation that is susceptible of remedy, the remonetization of silver has been suggested, not only by the Senator from Montana [Mr. WHEELER] but by many others who have given consideration to the subject.

The revaluation of the gold dollar has been suggested by reducing the gold content of the dollar something like 25 per cent. There has also been put forward a suggestion that the requirement of a gold reserve as a basis for the issuing of currency ought to be lowered something like 25 per cent, in order that there might remain still a semblance of the gold standard, and that we might at the same time broaden the basis for the issue of currency based upon gold.

I do not know whether any of these suggestions, or all of them together, afford any remedy for our situation. It was the hope and belief of those who were the sponsors and advocates of the Federal reserve system that a more flexible currency system ought to be adopted, so that by some process that might be regarded as automatic the amount of money in circulation would expand as business expanded and needed it, and that by the same automatic process it would be contracted and retired as business should no longer require it. I am inclined to the belief that even with a World War that, it seems to me, brought the supreme test of the Federal reserve system, and with this depression in our country and in the world, if the Federal reserve system had been allowed to operate normally along the lines conceived by those who inaugurated it, there would still be enough money in circulation in this country to justify the belief that no change in our monetary standard would be necessary.

Mr. LONG. Mr. President, will the Senator yield?

Mr. BARKLEY. I yield.

Mr. LONG. Just what does the Senator mean when he says "if the Federal reserve system had operated along the lines of those who originated the Federal reserve act"? To whom does the Senator refer in that connection?

Mr. BARKLEY. I could not name all of those to whom I refer. I refer, of course, to those of us who were in Congress at the time and voted for the measure, and especially those who conceived it, including the President of the United States; the Secretary of the Treasury; the Senator from Oklahoma, Mr. Owen; the Senator from Virginia, Mr. GLASS, then a Member of the House and chairman of the Banking and Currency Committee; and all of those who voted for it and believed in it. It was the thought then that by the

creation of a new kind of currency under the operation of the Federal reserve system and under the guidance of the Federal Reserve Board, through the Federal reserve banks using rediscountable commercial paper as a basis for circulating medium, the needs of business would automatically be responded to by this currency, so that when a larger volume was needed because of larger business and the desire to expand it would be available, and when it was no longer needed it would be automatically retired. That is what I had reference to.

Mr. LONG. If the Senator intended to include in that, outside of himself, our friend the Senator from Virginia, I wanted to know just what policy Mellon and Mills had followed which the Senator from Virginia has not indorsed in his advocacy of the pending bill.

Mr. BARKLEY. I am not going to use my remarks here as a vehicle for getting into a controversy with the Senator from Louisiana over the Senator from Virginia.

Mr. GLASS. Mr. President, the Senator from Virginia is perfectly capable of taking care of himself.

Mr. BARKLEY. And that is why I do not think it is necessary for me to assume that responsibility.

Mr. GLASS. The Senator from Virginia does not need any assistance from his very distinguished and affectionate friend from Kentucky.

Mr. BARKLEY. I realize that full well, and the Senator could do it so much better than I in the first person that I do not desire to undertake it in the third.

I was undertaking to mention only topically some of the suggested remedies for our present situation and, as I was already saying, I do not know that any of them singly, or all of them combined, offer any remedy for our present situation.

I do not know, and I do not know that anybody else knows, whether we need actually more money in circulation, more gold dollars, more silver dollars, more gold certificates, more silver certificates, more Federal reserve bank notes, or more national-bank notes, or whether there should be a sound readjustment of the credit system, not only in this country but in the world, so as to facilitate a larger degree of confidence, and therefore expansion of business, under which the Federal reserve system itself would automatically operate to increase, by whatever amount might be necessary, the circulating money of the United States.

Mr. GLASS. Mr. President, will the Senator yield?

Mr. BARKLEY. I yield.

Mr. GLASS. If at that point I may interrupt the distinguished Senator from Kentucky, let me again call his attention to the fact that the Federal-reserve system now has a gold reserve sufficient to expand the credits of its member banks in rediscounts to the extent of more than $4,000,000,000. Not only is that so, but, under the terms of the statute, the Federal Reserve Board is authorized to reduce the reserves. It is even authorized to suspend the reserves entirely for a period. So that when people talk about needing more currency, what would they have done with it? To whom would they have it given? To whom would it be issued? The banks are chock-full of currency.

The banks are so fluid and have such an immense amount of currency on hand that the Federal Government is enabled to make its loans at one-half of 1 per cent, which is utterly absurd. But the banks contend they can not make loans to people because people are not doing business. So I would like to have the Senator tell us, or to have some of the other Senators who are advocating wholesale issuance of currency tell us, what they would have us do with it; to whom they would have it issued. Would they give it away? Would they require public officials to stand on the street corners and hand it out to the passers-by? Currency for business purposes is abundant. Credit for business purposes is sufficient to expand Federal-reserve discounts $4,000,000,000 right to-day, with the gold reserve back of it.

Mr. BARKLEY. Mr. President, of course, as the Senator knows, and as we all know, the reason why that $4,000,000,000, or any portion of it, has not been extended or expanded under the Federal-reserve system is the fact that not only is there no demand on the part of business for money they can not use, not only is there a lack of confidence on the part of financial institutions to lend money to business institutions, because they see them declining and their business declining, but because of this very situation there is not a demand for the automatic expansion of currency provided for in the Federal reserve act itself, not only operating on the gold reserve as a basis but upon rediscountable commercial paper as a basis, for the issuance of currency.

Mr. GEORGE. Mr. President, let me ask the Senator from Kentucky if the question is so much a monetary question as it relates to the United States but, rather, is it not a question of the stabilization of the currencies of the principal commercial trading countries of the world?

Mr. BARKLEY. I am inclined to think the Senator has really put his finger on the real trouble.

Mr. GEORGE. If that be true, how can we correct it except by international action, and is not the whole question simply one of whether we are willing to take international action?

Mr. BARKLEY. It could not be corrected except by international action, unless by some fortunate chain of circumstances all the nations should operate separately so as to bring about a harmonious situation among all the nations, which is a conception impossible of realization.

Mr. GEORGE. That is not likely in the present state of the world.

Mr. BARKLEY. Not at all. I did not really intend, Mr. President, to embark on any effort to add to or illuminate the argument on this complicated question. What I started out to say, and what I hoped my remarks would lead to, was the suggestion that not necessarily in this Congress, but in the next one, at the very beginning of the next administration, we ought to form a joint committee or commission of some kind to make a profound study of the entire money question, either to report to Congress or to the Executive, in an effort to find out what remedies are spurious and what remedies are sound, if there are any remedies available.

My mail is filled, as I am sure the mail of every Senator is filled, with suggestions about the cheapening of the dollar, about increasing the amount of money in circulation. Some of them go to the extent of the remedy suggested by the Senator from Montana in his amendment about the remonetization of silver. I certainly would not, even though I were sympathetic with the amendment, feel called upon to vote to authorize the remonetization of silver in the present state of ignorance, national and international, on the subject of the silver question. There has not been a remedy offered by anybody, in or out of Congress, upon which I would feel at liberty to vote in my own present state of lack of information and definite conclusions with reference to the matter.

These letters come from sections by relays. I am this week receiving dozens upon dozens of letters, all written from the same town, not in my own State, I will say, which are probably the result of some suggestion, dropped overnight, it may be in some speech before a Rotary Club, or a Kiwanis Club, or some business organization, suggesting a remedy and offering the suggestion that all those present write to somebody in Washington to do something.

Mr. WALSH of Massachusetts. Mr. President, will the Senator yield?

Mr. BARKLEY. I yield.

Mr. WALSH of Massachusetts. Does the Senator favor holding an international conference on the subject?

Mr. BARKLEY. Yes; I am inclined to think that we will not get anywhere toward the stabilization of international money without some sort of discussion, at least.

Mr. WALSH of Massachusetts. In suggesting that no action be taken now, has the Senator in mind the statement of President-elect Roosevelt when he said, in referring to an international conference on this subject, "This I promise to do without delay or evasion when I go to Washington next March"?

Mr. BARKLEY. I recall that the President elect made that statement in the course of his campaign for the Presidency, and I approved of it then, and I think that that is the logical and sensible way to approach the subject. I think that any effort on our part now as a separate nation, trying to do something by which we may lift ourselves up by our own bootstraps, without regard to the relationship of our country commercially and from a standpoint of money with the rest of the world, would be calculated to do infinitely more harm than good, if it could accomplish any good whatever, and it is therefore my thought that it might be well in the very beginning of the new administration coming in on the 4th of March, either through the Executive or through resolution, joint or otherwise, of the two branches of Congress, to set in motion a sincere, exhaustive, detailed, and, if possible, a profound investigation of this whole matter so that in the very near future we may be able to deal with it either in international conferences, by international agreement, or, if we attempt to deal with it as a nation, that we may deal with it wisely and conservatively and in the light of information we may gather as the result of these conferences.

It is with that in mind that I would not feel myself able to vote to support the amendment of the Senator from Montana, or any other amendment at this time undertaking to deal with our currency system, except as it may naturally flow from whatever legislation we may enact to strengthen the banking system of the United States.

Mr. LONG. Mr. President, will the Senator yield to me?

Mr. BARKLEY. I yield.

Mr. LONG. Inasmuch as the Senator from Massachusetts very wisely calls to our attention the statement of the President elect of the United States on this question, I was wondering whether the Senator would have the same attitude on the statement made by our President elect as to decentralizing wealth, and stopping it from being concentrated in the hands of the few.

Mr. BARKLEY. I do not recall just what statement he made on that subject. I would have to refresh my recollection with reference to it before I would like to discuss it. I have not it before me.

Mr. President, I have said all I wanted to say, not as suggesting any apology or explanation of the vote which I am going to cast, but simply to throw this suggestion out as offering at least some hope that we may give our undivided attention to the matter in the future.

Mr. LEWIS obtained the floor.

Mr. LONG. Mr. President, will the Senator yield to me to suggest the absence of a quorum?

Mr. LEWIS. I thank the Senator from Louisiana, but I am not particularly concerned about a large audience. I have such an intellectual one around me that I am content with its numbers.

Mr. LONG. Mr. President, if the Senator will yield just a moment, I think there ought to be others here to listen to the Senator, whether he would want it or not, and I would like to have him yield to me to suggest the absence of a quorum.

Mr. LEWIS. Mr. President, the little I desire to say will occupy so short a time that it would not consume the length of time necessary to call a quorum. I appreciate the courtesy of the Senator.

Mr. President, let me say to my distinguished colleagues on both sides of this Chamber that unless we make very clear what we are doing, in every country of the world the vote on the pending amendment will be misconstrued, and the result of it will be imputed to a reason and a sentiment really not expressed in the vote itself. The vote will be mostly yea or nay, if the amendment should or should not be appended to the bill now before the House entitled as a bank system measure.

We recall that in the sacred law there is the injunction that "there is a time and place for all things." The present bill before the Senate is a bill to constitute a system of banking. It is in its provisions complete in itself, however much there may be those who differ as to the application of some of its provisions and as to whether it more completely represents the thoughts which they possess or whether it should be somewhat changed in order wholly to conform to what may be said by different Senators to be the needs of banking.

There is to that bill, which is only a measure to constitute a system of banking, tendered an amendment that has for its object the establishment of a complete new ratio of coinage as the basis of money for the United States of America. There will come a time, as intimated by the Senator from Kentucky [Mr. BARKLEY], responding to the allusion of the Senator from Massachusetts [Mr. WALSH], when that question will be both pertinent and appropriate, and when a discussion under any clause tendered to the public can be fully completed and addressed wholly to that subject.

Senators to-day opposing the measure, being an amendment to a bank bill, conscious that it could not cover the whole subject, nor as an amendment be treated in the fullness which such a measure should receive, may be favoring the abstract doctrine it represents and still could not see the propriety of putting it as an amendment on the bank bill, but would see the impropriety of assuming to enter upon the discussion in all its gravity and various forms of responsibility when tendered as an amendment to a measure that is not framed to carry on either the question or, Mr. President, its natural concomitant, the consideration of the relative relation of coinage in the money of other countries than our own.

The question has not failed to disturb the world at certain periods, nor has it failed to engage the most serious attention of those who have reflected upon it, Senators; it is recalled that the question of silver as fundamental money has ever had some doubts surrounding it. When the place of burial of Abraham's relatives was chosen and the sacred ground which surrounded the place of repose of the bodies of his children was questioned in ownership, the patriarch, in order to prove his title, announced that the ground had been purchased by a certain number of pieces of silver according to the law of merchant, showing that even then there was a serious question as to what was the true rule establishing the value of silver as money of the land.

It is familiar to the Senate that in England, when the question of the weight and value of coinage was seriously brought for the fiftieth time before their legislative body and disputed as to weight and fineness, Robert Peel tendered an act which was the composite wisdom of the most thoughtful men in finance that then surrounded the realm, and to-day is known as the Robert Peel Act, which prescribed a certain number of grains of gold which made the current gold as a basis of that upon which the English pound to-day is issued. But we have seen lately and we have heard eminent Senators to-day allude to how England only in the last few months has made some change even as to that, leaving things somewhat, as we may call it, hazy and doubtful as to what is the standard of England.

Mr. President, what I wish to press is this: The great question that has now been precipitated by the amendment does not belong here. At a proper time it should be presented and there discussed with the wisdom that I know this honorable body on both sides could contribute towards it. But as an amendment to a purely bank bill, with the limitation that is essentially attached to the amendment, it ought not to be presented as an amendment to the bill. The votes against the amendment of many Senators upon the theory that it does not belong to this measure which is now pending and can not receive a proper consideration at this time, will be justified as votes only from their point of procedure, yet, sir, as to the world it will go out as a vote of our policy upon the question of silver or gold or the coinage upon some percentage of either in respect of one metal to the other.

Rather than be misrepresented and have us misunderstood, and the amendment itself receive the rebuff which apparently will be charged against it when the vote is merely a matter of procedure to avoid complicating the measure that is intended to relate only to a system of

banking, I would suggest to the honorable Senators who offer it that they withdraw it as an amendment to the pending bill and withhold it and tender it as an independent measure for the consideration, at a fitting time, of this honorable body, unmarred, unaffected, and unconfused by the situation that now refers as an amendment to the banking bill, to which it is wholly foreign, and which, if precipitated further to the full extent to which it can go, can involve the present measure in such ceaseless debate as to confuse the principal measure on the one hand, mislead the country in the result, and leave us where before America a form of uncertainty will seize the general business and financial mind of America. All this will go to the extent of seriously affecting the credit of the present-day merchantman and more or less greatly impair the revival which we all seek to have, that is just now, as we see it, appearing with the light of a new day and advancing hopefully upon us.

For this reason, therefore, I could not support the amendment because it is foreign to the issue before the Senate and does violence to the consideration of the bill that is now only to be considered as a bank regulation bill. So, sirs, to prevent the vote from being misunderstood and the conclusions from being misconstrued, I rise to suggest, in the observations which Senators have been kind enough to tolerate from me, that the amendment be withdrawn at this time while the bank bill is pending; the silver-coinage amendment to be presented at a proper time, when it can properly have all the issues that are essential to it presented in a fair and just manner, and at such time, as the Senator from Kentucky [Mr. BARKLEY] well alludes and the Senator from Massachusetts [Mr. WALSH] referred, when the question in its largeness can be considered in its full scope, doing complete dignity to the authors of the amendment and complete justice to the great subject it represents.

Mr. WALSH of Massachusetts. Mr. President, we have all been greatly enlightened by the discussion on the subject. I am going to request, in connection therewith, that there be printed in the RECORD an article by Willard De Lue, published in the Boston Sunday Globe of January 22, 1933. The article seeks to deal with the silver problem in a very fair and impartial manner. I think it is a valuable contribution to the able discussion we have had this afternoon.

The VICE PRESIDENT. Is there objection? The Chair hears none, and it is so ordered.

The article is as follows:

[From the Boston Sunday Globe of January 22, 1933]

FALL IN PRICE OF SILVER IS TRAGEDY TO TRADE OF EAST—WITH THE EXCHANGE VALUE OF THEIR MONEY CUT IN HALF, MERCHANTS OF ASIA CAN NOT BUY—HENCE LOW PRICES—WORLD CONFERENCE WILL BE CALLED TO SEE WHAT CAN BE DONE

By Willard De Lue

This silver problem. * * * Oh, is there a silver problem? Indeed there is, and a mighty serious problem it is, too. The newspapers have been printing stories about it for a couple of years, but probably you've passed them over with no more than a glance. Almost everyone has—that is, almost everyone in this corner of the country, where the silver problem seems to be something extremely remote, something neither important nor dramatic.

But, the fact is that the silver problem—the present all-time record low price of the metal in world bullion markets—has the world at its wits' end. Economists are pretty well agreed that it has been a major influence in the business depression. Something must be done to get silver back onto its feet again.

Both the Democratic and Republican parties made silver a subject for platform discussion in the last campaign. President-elect Roosevelt promised to call an international conference on the matter. "This I promise to do without delay or evasion when I go to Washington next March," he told an audience at Butte, Mont. President Hoover, speaking of the coming world economic conference, said: "I made it a condition of our acceptance that the whole silver question should be put in the agenda and that it should be fully dealt with."

HALF OF WORLD AFFECTED

Congress now has several silver proposals before it for consideration. The legislatures of a dozen States have demanded action. Organizations by the score, including the American Federation of Labor, have joined in the plea that "something be done about silver."

Obviously, then, something is the matter.

Suppose, for instance, that you had $100 in silver money that you had earned by hard work. Suppose that some fine morning you awoke to discover that your silver, instead of being worth $100, was worth only $40. Naturally you'd feel a bit peeved, to put it mildly—and you'd be a little more than peeved if you discovered that this drop in the value of your wealth was caused, not by the operation of any obscure laws of economics, but by the direct legislative action of various nations of the world.

Something of that sort has hit half the people of the world. The millions in China, India, and other Asiatic countries, where silver has been a common standard of wealth for thousands of years, discovered a couple of years ago that their wealth—their purchasing power—had been cut more than in halves.

Silver metal, which for many years has been worth somewhere between 60 and 70 cents an ounce in terms of American currency, began to drop in value in 1926. It kept on dropping, though very gradually, until 1929, when it began a high dive that became climactic in 1930; in December of that year silver fell to 32 cents. Since then it has fallen even lower, with spasmodic variations in price. It is now worth only twenty-five and a fraction cents an ounce. A few months ago it was down to its all-time-record low of close to 24 cents.

ONCE REPRESENTED SOLID WEALTH

The effect of this tumble was world-wide. Its significance can't be grasped unless you keep always in mind the fact that the wealth of the Asiatic peoples has, from time immemorial, always been in the form of silver.

Instead of putting their savings into stock certificates or into banks, the masses in India and China and their neighbors always have put it into silver—good, hard silver—which they regarded as being something that time or business fortune could not materially rob of its intrinsic worth. This silver was, some of it, in the form of coins. Much of it, millions and millions of ounces of it, was in the form of bangles and necklaces, trinkets, statuary, and other religious articles, either carried on the person or hidden in or near the homes.

It represented, to them, solid wealth. If times were good with them, they could produce it for the purchase of little luxuries; if times were hard, they could produce it for purchase of the necessities of life.

But now, by the fall in the silver price, these little family fortunes have been robbed of half their value. The economy of half the world has been knocked into a cocked hat.

"In all calmness and deliberation," said Senator BORAH a few weeks ago, "I consider that the action of the international bankers in demonetizing silver and virtually destroying the purchasing power of over 800,000,000 people was one of the most brutal acts ever committed in modern history."

LOOKING CLOSER AT HAND

Mr. BORAH, when he said this, was speaking of the peoples of the East. But in his mind's eye he was looking closer at hand; looking upon his fellow citizens in the States in the silver-mining region. For the low market value of silver has hit the mining industry. While it is true that, in this country, much of the silver is a by-product of lead and other mining operations, it still has counted as a material source of mine revenue.

Its fall in price (coupled with a decline in demand for other metals, due in a measure to the world chaos which the silver slump helped to cause) has intensified mine shutdowns, with attendant unemployment and hardships. And the high-content silver mines in other parts of the world, which have been even harder hit by the slump, represent the investment of large amounts of American capital which now is not earning its salt.

World production of silver dropped from 244,000,000 ounces in 1930 to 195,000,000 ounces in 1931, with a further decline last year. The production in the United States fell from 50,000,000 ounces in 1930 to 31,000,000 in 1931.

Mr. BORAH, when he spoke, was thinking also of the Pacific States, where trade with the Orient is a big business item. Here the crippled buying power of the oriental peoples has resulted in heavy trade losses and a consequent deepening of the depression. The drop in our exports to China was from $166,000,000 in 1928 to only $114,000,000 in 1931—a loss of $52,000,000. And our imports from China fell in the same period from $156,000,000 to $73.000,000—a loss of $83,000,000.

While it has been suggested that the falling off in China's purchases from us is rather a result of internal disorders than of low silver, Julian Arnold, our commercial attaché at Shanghai, has declared that this is a false premise. War ordinarily makes no big difference in China's trade machinery. "The low value of silver," he says, "is more of an important factor."

LESS USED FOR MONEY

Why was it that silver took such a terrible drop in value?

Chiefly, as has been said, through legislative action.

Normally the world production of silver keeps pretty close pace with the world demand. There is no glutting of the market. Consequently the silver price (barring the abnormal war and post-war years) has ridden along on a fairly even keel, without violent fluctuation.

But in 1920, following a lead by Great Britain, most of the European and South American countries (and also Mexico) began a process of either debasing or demonetizing silver currency. Debasing meant that they reduced the amount of silver in their silver coins. Demonetizing meant that they stopped, in part or in whole, making silver coins, and issued paper money instead.

In either case, less silver was used by the governments. And on top of that, the obsolete coins were melted down and, along with reserve stocks of silver in the treasuries, were dumped on the public market. Thus the demand for silver was reduced and the supply was increased.

This brought the price of silver down from extraordinarily high war levels, but it had no serious effect on world affairs.

CHINA THE HARDEST HIT

But in 1926 India revamped her financial system and went on a gold standard. Without going into puzzling detail, this great silver-buying country found it necessary to dispose of her treasury supply of silver in order to buy great quantities of gold in order to maintain the gold value of her currency. She began to dump this silver into the market in increasingly large quantities year after year—selling most of it to China, which previously had been a great market for the newly mined metal.

To cap the climax, in 1930 French Indo-China went on a gold standard. She, like India, dumped another mighty store of silver into the bullion market.

Between the public sales due to demonetization or debasing of silver, and sales by India and Indo-China, about 400,000,000 excess ounces of silver—second hand silver, if you please—were thrown into the market from 1920 to 1930. This was pretty nearly as much as the mines normally produced in two years.

Naturally, the market could not absorb it. So the price fell. The East was plunged into an economic abyss, and the silver-mining industry was prostrated.

China was hardest hit of all, for with her silver was an absolute standard of value. The values of her coins and paper money were all based upon the actual market value of silver. When silver became unstable all values became unstable. Trade was demoralized, because nobody could say what silver was going to be worth from day to day.

SIMPLY WENT WITHOUT

The buying power of silver, when making purchases from countries on a gold standard, was shot to pieces. Prices skyrocketed. Naturally, nobody was anxious to buy imported goods when it was necessary to pay 2 ounces of silver for what 1 ounce bought before the slump.

Ordinarily this might have led to a development of competitive home industries—something which would not have been so bad, for then China would have been in the market for machinery and other equipment. But here again the low price of silver operated against purchases. Chinese capitalists hesitated to pay the higher price for machine equipment. They would be in competition with those who had bought before them at the lower price. And they would also be handicapped as against any who might buy later on when silver came back into its own again.

So China turned not to competitive home manufactures but to Chinese substitutes for the imported articles. If, for instance, a Chinese farmer discovers that American kerosene comes too high, he can revert to burning his own homemade wood oil, especially since the American market for wood oil (used in paints) has fallen off.

In many cases China simply did without. "When a prospective customer for a tin of California fruit is confronted to-day with a price of $1.40, local currency, as contrasted with 70 cents for the same thing less than a year ago, he naturally will stop to consider his pocketbook before making the purchase." This from our commercial attaché a year or so ago. To-day the can of fruit would cost the Chinese close to $2.

MANY REMEDIES PROPOSED

The exact method, the precise sequence of operations by which the fall in silver influenced the world-wide depression, is something on which economists may differ. But they do point out that the slump in silver was followed by the world-wide drop in commodity prices.

And, as everybody who reads the newspapers must know, the whole world agrees that this commodity-price drop is one of the great economic evils of the day.

"Get the price of silver back where it belongs, restore its buying power and the buying power of 800,000,000 people, and you have made at least a start in jacking up commodity prices," some eminent economists declare.

That, after all, is the immediate silver problem—how to get it back to a more nearly normal, steady price level.

The methods proposed for accomplishing this result are many. They include: (1) Having all the nations start making silver coins again, instead of issuing so much paper; (2) having the nations that debased their coinage restore it to its original silver content; (3) having India and other countries with a silver surplus still on hand agree not to sell silver unless the price is above a certain level to be fixed upon; one figure mentioned is 50 cents an ounce; (4) encouraging the extended use of silver for commercial purposes.

In short, the demand for silver must be maintained and the supply kept at normalcy.

Mr. NORRIS. Mr. President, I believe that Senators, especially those who want to bring about an international agreement in regard to silver, ought to consider very seriously the suggestion made by the Senator from Illinois [Mr. LEWIS]. For various reasons, some of which were given by the Senator from Illinois, the vote on this particular amendment will probably not fully record the favorable light in which it would be voted upon if it were considered independently of the pending bill.

Let me say to those who want to bring about an agreement on silver by the nations of the world that this vote will be taken practically as conclusive by those who are opposed to an international agreement, either in this country or in any other country. There will be built up a hurdle in front of those who are trying so earnestly to bring about that kind of an agreement, an agreement which I would myself very much like to see made.

Mr. President, I have never been and was not one of the advocates of free silver at the time it was agitated quite a number of years ago. However, I think we are confronted with a condition to-day such as has never confronted us before, not even during the World War. I listened with the greatest attention and interest to the very eloquent argument made by the Senator from Pennsylvania [Mr. REED] against the pending amendment. I want to say before I discuss his argument that I concede to him full sincerity and honesty in the belief which he advocated. He may be entirely right. But when he closed he left me, as I told him privately, without any hope.

The Senator from Pennsylvania called attention to the three methods proposed to bring about relief from the depression by financial legislation, one by the issuance of a larger amount of paper money upon the gold reserve, another one by free silver such as the pending amendment proposes, and the third method to change by law the gold content of the gold dollar. He condemned every one of them with a severity that left not a leg for any one of them to stand on. Each one of them, according to his argument, would bring disaster if enacted into law. All were condemned. It may be that the advocates of each one exaggerates the benefits that might come from them. It may be that they would all be failures.

But it seems apparent to me, as I believe it is to a majority of the American people, that unless we have some remedy, disaster is bound to come. Our people are unemployed by the millions. They are starving by the millions. We have been getting in a worse condition daily, from day to day. I believe it can be safely said, so far as finances are concerned, that the much beloved gold standard has been a failure. Unless some remedy shall be provided, I can see nothing but ruin ahead of us. I say that measuring my words. I very much dislike to say it, and yet everybody knows it, and privately all are discussing it.

So it seems to me, I should like to say to my friend from Pennsylvania, in whose judgment I always have the greatest confidence and whose wisdom nobody doubts, that when the different remedies are proposed one by one he knocks them down, and, from his point of view at least, demonstrates that a given remedy which is proposed would bring ruin to our country and our civilization. So he removes each one of them, and we are left helpless.

Are we going to confess our helplessness? Is the American Congress in such a condition that it is going to admit there is no solution for the existing difficulty? It may be that there is not, but if all remedies which are proposed are refused, then, unless we are willing to admit that there is no remedy and that destruction awaits us in the near future, we ought to propose some other remedy. If the remedy now suggested will not work, let us have one that will work, or let us put our arms around each other and go down to death, ruin, and destruction together, and admit our inability to meet the conditions.

I do not like the remedy proposed by this amendment, Mr. President. Under ordinary circumstances, I would not support it. I had rather take either one of the other two remedies that have been suggested. At least one of them, it seems to me, would be practical, and I feel that we are perhaps somewhat in the position of a drowning man grasping at a straw. I do not see how this particular proposal would work; but it is conceded, I think, that it would cheapen the dollar, and I want to do that. I believe we must make it easier for those in debt to pay what they

owe. Many of them, indeed, millions of them, are in a condition for which they are not responsible, and millions of others are in a condition for which they are only partially responsible. The difficulty has come, as I see it, to a great extent, from our much beloved gold standard, our measuring yardstick, which is like a rubber string which changes its length. The farmer who has a mortgage on his farm, now due, which he is struggling to pay, is confronted with the condition that he can not pay it in the same kind of a dollar that he got when he gave the mortgage. If he gave a mortgage for a thousand dollars on his farm when wheat was worth a dollar a bushel he is now compelled to pay it with wheat which is worth less than 25 cents a bushel.

The very statement—and it is not exaggerated, but is conservative—shows that, so far as that farmer is concerned, he is confronted with an absolute impossibility. His mortgage can not be paid; he can not pay the debt. He will not pay it because he can not pay it.

What happens? He loses his home. It is not sufficient for us to say that the farmer ought not to have given the mortgage; perhaps he ought not to have done so; it may be he was unwise when he did it; many such farmers were, I know; but that farmer when he gave the mortgage did not know that the gold standard—the beautiful gold standard—was going to change. He did not know that the yardstick that measured the money when he got it was going to be of a different length when he paid it back. But that is the condition.

It is said while this proposed remedy might help the debtor—and the same criticism could be made of any of these remedies—it would be an injury to the creditor. In the first place, let us look at that from two angles. Suppose it would hurt the creditor; the creditor had better get something than to push this thing on over the precipice and get nothing and go to destruction with the rest of the unfortunates, because the creditor, too, will go along if destruction shall come; but it would not be as great a hardship for the creditor as we often imagine. Using the same illustration of the farmer who gave a $1,000 mortgage when wheat was worth a dollar a bushel, he was in reality getting credit that bought wheat. One can not eat money; one can not wear gold; one can not burn it for fuel; it is no good except as a medium of exchange.

If the farmer who borrowed a thousand dollars with which he bought a thousand bushels of wheat tenders back the same amount of wheat that the gold represented when he got it, the creditor has not been hurt very much; he has got, so far as goods are concerned, just what he loaned the farmer when the mortgage was made, and in the meantime, during the period of the loan, he has been paid interest regularly. So he is not so greatly injured after all. It is the same with every other method that makes the dollar cheaper. The dollar was cheaper once. It has been made more valuable, not because the men who borrowed money wanted it to be more valuable, but, in spite of their efforts, it has been made so by other people and by methods over a majority of which, perhaps, nobody had any control; but it brought the evil that confronts us, and, so far as I am concerned, I would rather preserve our civilization and our country and adopt a remedy which under normal conditions I would not accept than to turn it aside and adopt none.

Mr. LONG. Mr. President——

The VICE PRESIDENT. Does the Senator from Nebraska yield to the Senator from Louisiana?

Mr. NORRIS. I yield.

Mr. LONG. I wish to ask the Senator a question. I realize my own ignorance of the money question, and I am pretty well convinced that I am not more ignorant of that question than are some other Members of this body; but does not the Senator think that fundamentally we are going to have to provide that a greater share of the wealth of this country shall be distributed in the hands of the people, regardless of what we do about the regulation of the currency?

Mr. NORRIS. Yes, sir; I do most emphatically, but that question is not involved here. The Senator knows, and I presume all Senators know, that, right or wrong, I am an advocate of an inheritance tax that would go farther than any that we have ever adopted. I believe while we are confronted with an emergency, and we are particularly interested in emergency legislation such as that now pending, that, nevertheless, we will never have permanent happiness and prosperity until we shall impose an inheritance tax that will make it impossible for the huge combinations of wealth and fortunes to exist and be passed on from one generation to another. I am not going to argue that question now, Mr. President, but I think it can be demonstrated, even if I do not have the ability to do it, that such a law would not be unjust or unfair and would bring with it no suffering and no unhappiness. It does seem to me, however, that the vote on the pending question is going to be misunderstood. I understand that Senators on the other side are pledged—I hope they are, and I want to help them to get it, so far as I can in my weak way—to an international agreement. I think that would go a long way toward solving the silver difficulty; and it seems to me, in order to prepare for that and to make as good a showing as possible, we ought not to go before the world with the small vote that this amendment is going to get.

Mr. WHEELER. Mr. President——

The VICE PRESIDENT. Does the Senator from Nebraska yield to the Senator from Montana?

Mr. NORRIS. I yield.

Mr. WHEELER. For two or three years we have been talking about relief legislation. Over a year ago I introduced into the Senate the bill which I am now offering as an amendment, but we have never been able to secure a vote on it up to the present time, and this is the only opportunity that we are going to have to secure a vote on it.

I was not particularly anxious to offer it as an amendment to this bill, but I am anxious to have it before the people of this country and to have a vote on it. If I could have assurance from the leaders on both sides that I could get this bill up, and that it would be put on the calender and set down for discussion, I would be perfectly willing to have that done, but I do not see any other way of getting any monetary legislation before this session of Congress unless we offer it as an amendment to some bill of this kind. The idea that some one is afraid to vote for it because of the fact that it is offered as an amendment, it seems to me, will never appeal to the American people who are suffering and who have been suffering for a period of three years, and yet nothing has been done to relieve the situation.

Mr. NORRIS. Mr. President, I have a great deal of sympathy with the ideas expressed by the Senator from Montana. I know that we can not always get bills out as we ought to do, and probably this is one of them. I have a lot of sympathy for the view the Senator takes of it, that he wants to crowd it to a vote, and under any ordinary circumstances I would be glad to have him do that; but I call his attention to the fact that it is not only the American people, as I look at it, that we have to take care of; it is the people of all the civilized nations of the world who are going to look upon this vote as a black eye for silver, and I fear they will turn a deaf ear to our pleadings when we try to have an international agreement which I myself believe is going to be very difficult to obtain, though if we should obtain such an agreement it would probably settle this question for a generation to come.

Mr. KING and Mr. WHEELER addressed the Chair.

The VICE PRESIDENT. Does the Senator from Nebraska yield; and if so, to whom?

Mr. NORRIS. I yield first to the Senator from Utah, who, I think, rose first.

Mr. KING. The Senator will pardon me, I hope, for expressing in the form of an interrogation, if I may do so, a little dissent from his view with respect to the probability or impossibility of obtaining an international conference.

I think the Senator exaggerates the difficulties that will be encountered in obtaining an international conference.

Mr. NORRIS. I hope I do.

Mr. KING. May I say that Great Britain has called an international economic conference and the preliminary committee have recently met in Geneva and, as a part of the agenda, have provided for a consideration of the silver question. I am afraid, however, that they do not go far enough; and perhaps that conference, which is more concerned with what might be denominated pure economic questions, will not give the attention to silver which they should.

This, however, is what I started to say. There are many evidences of a tremendous awakening in Europe, as well as in Asia, in behalf of the remonetization of silver.

I have upon my desk a manifesto, signed by 20 or 30 of the leading statesmen, bankers, and publicists of Great Britain, in favor of an economic conference and in favor of an agreement for making silver a part of the monetary system of the world. I believe that if the economic conference called by Great Britain does not result in an agreement for the restoration of silver to a proper monetary status, the conference which Mr. Roosevelt will call—and he is pledged to do so under the Democratic platform—for the rehabilitation of silver, a conference to be called to meet in the United States, will eventuate in the rehabilitation of silver. That conference will be attended by representatives of the leading commercial nations of the world, and out of that conference will come an agreement that will give to silver the high standing which it had anterior to its demonetization by some of the nations of the world.

Mr. NORRIS. I hope that is true, Mr. President; but I want to say to the Senator, as I look at this money question, that I do not care whether it is gold, or silver, or what not. I am not married to any standard. The ideal standard would be one that never varies in its commodity value. We have not such a commodity, so far as I know. I should not hesitate to give up the gold standard if I thought I could get a better one. I am one who believes that it is a difficult thing to have a double standard, because it is always difficult to keep parity; but I would not have any objection to a silver standard if it did the work.

Mr. WHEELER. Mr. President——

Mr. NORRIS. I yield to the Senator.

Mr. WHEELER. This talk about an international agreement has been going on for a long time. For almost 30 years those who have been opposed to the remonetization of silver have talked about an international agreement. The only difference between the Democratic Party and the Republican Party in 1896 was that one of them was for independent bimetallism, and the other was for an international agreement. All during this period of time we have had nothing but talk about an international agreement.

I am in accord with the views of Will Rogers when he says that the United States Government never lost a war and never won an international conference, and I am perfectly sure that any international conference we have with reference to the remonetization of silver will be lost in exactly the same way that we have lost all others.

Mr. NORRIS. If that is true, there will not be any hope for silver, Mr. President.

I realize the truth of what the Senator said about an international agreement having been agitated for so many years and never having accomplished anything. That is true; but a whole party that is the dominant party is going into power in a few weeks, and the incoming President is pledged to call an international conference. I have not any more doubt about his calling that conference than I have that I am here in the Senate now. I have not any doubt about his calling it in good faith, and that he is in earnest about it; and that is more than can be said about a lot of these conferences that have been called in the past.

Mr. WHEELER. Mr. President, if the Senator will pardon me——

The VICE PRESIDENT. Does the Senator from Nebraska further yield to the Senator from Montana?

Mr. NORRIS. Yes.

Mr. WHEELER. I have not any doubt about the good faith of Governor Roosevelt with reference to calling an international conference. I have implicit confidence in that; but I have not any confidence whatsoever that those across the water who are profiting by keeping us on the gold standard, and by being off the gold standard themselves, will ever agree in an international conference to let us out of the hole that they have us in at the present time.

Mr. NORRIS. That may be true. I can not dispute that.

Mr. WHEELER. For instance, if we pick up the New York Times we see that there has been talk about getting back on the gold standard, and there have come from England statements to the effect that they will not enter into any agreement to go back on the gold standard because it is to their economic interest to remain in the position where they are. They can undersell us in the world markets, and yet at the same time as a manufacturing nation they can get their raw materials cheaper than they can when they are on the gold standard.

Mr. NORRIS. Mr. President, just a few words in closing.

What the Senator from Montana says is true; but I do not want to be an instrumentality here—and I know nobody else does, either, but I am afraid action is going to be taken that will put us in that light—I do not want to be an instrumentality of in any way hindering or making more difficult the calling and holding of an international conference by any action that we take here. I do not want to hamper the new President in any way; he is going to have a difficult task. It may prove to be a failure, but I do not want to add here, by a ridiculously low vote on the silver question in the Senate, to what I believe would be used with great effect as an argument against the consummation of any international conference on silver that gave any hope of success.

Mr. WHEELER. Mr. President, if the Senator will pardon me again——

The VICE PRESIDENT. Does the Senator from Nebraska further yield to the Senator from Montana?

Mr. NORRIS. Yes.

Mr. WHEELER. Of course, if everybody takes the position that he does not want to vote for the remonetization of silver because of the fact that he is afraid an adverse result would hurt an international conference, then there is no hope of its being done.

Mr. NORRIS. Let me say to the Senator that I am going to vote for it; and I am moved in part by my theory of the argument I have made. I want to make as good a showing as possible, and I might vote for the proposal on a final test if it had full sway. I am willing, on this question of trying to cheapen the dollar, which I believe is a necessity in getting out of this depression, to vote for things that I would not support under other conditions, that I would not have supported at a time when I thought they were not necessary to save the very life of our civilization. I believe something must be done; and I would rather even experiment than to do nothing, and go down saying that we are helpless and that we are confronted here with a condition that we can not do anything to help.

Let me say to the Senator that this amendment is going to be defeated anyway. As nearly as I can find out, it is going to get a relatively small vote. If it could be passed, if it could go over the veto that would await it when it got to the White House, we would be confronted, perhaps, with a somewhat different proposition.

I think this discussion has been valuable. I am not one of those who believe that the time this discussion has taken has been lost. I think if some of these other propositions were discussed more, it would be of some benefit. It might help us to get together on some remedy to pull us out of the morass that we are in. We can not pass it, however, and the bill would not be signed if it were passed; so that the only benefits coming out of it will be the debate and the

discussion that takes place here. That has always been beneficial; but the injury that I am afraid is going to come, and that will be there when the conference is called, will be the vote.

Mr. LEWIS. Mr. President, I desire to ask a question of my friend, the Senator from Montana [Mr. WHEELER]. Upon hearing him state that for nearly a year he has been pressing this measure, anxious to get both audience and action, and, as I have addressed the Senate on the theory that it ought not to be pressed as an amendment to the banking bill lest it should not receive proper consideration, and many votes might be cast against it merely because Senators feel that it should not be appended to this bank bill, and thus be misconstrued as an expression against his bill, I ask the Sentor from Montana whether, during this year of which he speaks, the Senator has been pressing this bill before some appropriate committee?

Mr. WHEELER. Before the Finance Committee.

Mr. LEWIS. Has it been acted upon in any way?

Mr. WHEELER. It has not been acted upon. They have taken no action.

Mr. LEWIS. It has received no report from any committee, nor any action from any committee?

Mr. WHEELER. No.

Mr. LEWIS. I thank the Senator.

Mr. WHEELER. I desire to say, if I may, in further answer to the question, that I did not think it ought to be necessary for Democratic Senators to have long hearings on the subject. The Democrats of the Nation have been committed to independent bimetallism by convention. It was the money of our forefathers. While there has not been any discussion about it, I assumed that when the Democrats went on record for independent bimetallism in 1896, they meant what they said; and the world conditions at the present time, and conditions in this country indicate that it is so much more important at the present time than it was in 1896, and it could do so much more good at the present time, that it is inconceivable to me that Democrats who supported it in 1896 would not readily support it at the present time.

Mr. BLAINE. Mr. President, it had not been my intention to engage in this debate in connection with the amendment offered by the Senator from Montana [Mr. WHEELER]; but a great deal has been said here this afternoon in connection with the question of inflation, and what effect it may have upon the country, and what influence it may have upon the trend of economic affairs here and abroad.

Mr. President, I have observed that there have been many suggestions as to various types of inflationary measures. For instance, last year we passed the Glass-Steagall bill. That was alleged to be a mild inflationary measure. Then, following the passage of that bill, we passed the Glass-Borah amendment to the home loan act authorizing the issuance of national-bank notes against United States bonds, making additional bonds eligible for that purpose—as I recall, bonds drawing a rate of interest not exceeding 3⅜ per cent per annum. It was contended at that time that that measure was a mild inflationary proposal.

When it was proposed the other day to extend the time for the operation of the Glass-Steagall Act, I made an inquiry of the Senator from Virginia [Mr. GLASS] as to the amount of Federal reserve notes that had been issued under authority of that act, and also the amount of national-bank notes that had been issued under the authority of the amendment to the home loan act. The Senator from Virginia was not informed at that time, but suggested generally that the amount of national-bank notes that had been issued under the authority of the act to which I have called attention was about $150,000,000, and that the Federal reserve banks had purchased about a billion dollars of Government securities.

Then, following that colloquy, the Senator from Oklahoma [Mr. THOMAS] read what purported to be, and I understand to be, a report from the Treasury Department which showed that the total outstanding currency on January 1, as I recall, was $57,000,000 less than the year before, or at least before the passage of the Glass-Steagall Act and the act authorizing the issue of national-bank notes. Therefore, we have had a complete demonstration of the fact that neither one of those acts was in any degree inflationary, or at least they did not produce a greater flow of currency.

Mr. GLASS. Mr. President, will the Senator yield to me?

Mr. BLAINE. I yield.

Mr. GLASS. I tried to indicate to the Senator on that occasion that in the purchase from the banks of nearly a billion dollars of Federal securities, it was not necessary for the Federal reserve banks to issue currency, that it was largely a bookkeeping operation. They simply released the member banks in large degree from their indebtedness to the Federal reserve banks, enabling them thereby, if they desired to do so, and business demands suggested to them to do so, to discount commercial paper to that extent.

Mr. BLAINE. Mr. President, I am aware of the accuracy of the statement of the Senator from Virginia. The only point I desired to emphasize was the fact that neither one of the two measures to which I called attention actually produced any inflation; and if we are to take as a standard of inflation or deflation the amount of currency in circulation, there was, in fact, a deflation in that currency.

Then there was the proposal known as the Goldsborough bill. That was intended to promulgate a system of controlled inflation under the authority of the Federal Reserve Board. That bill passed the House but did not pass the Senate. However, the Goldsborough bill as it was passed by the House and designed by the author and those supporting the Goldsborough bill did not become a law.

Now comes the possibility of another inflationary measure involving bimetallism, the use of silver as a medium of exchange on the basis of 16 to 1. I shall not discuss that measure in any respect, except to suggest that it would introduce into our monetary system another commodity which would be subject to fluctuation and, in my humble opinion, might cause us more difficulty than a single standard of monetary measurement, at least more difficulty unless we could have an international agreement for the adjustment of exchange.

Mr. President, there has been another suggestion for inflation, that is, the devaluation of the gold dollar, reducing the gold content of the gold dollar. I am not informed as to the amount proposed to be deducted in grains. Anyway, it is for the reduction of the amount of gold in the gold dollar. That is promoted on the theory that it will mean inflation of the currency or provide a larger medium of exchange.

I can not see wherein that proposal would be of beneficial effect, unless it were accompanied by other measures which would guard us against dangers which would be bound to come upon the country if that sort of inflationary measure were adopted. It would seem to me that if we are to embark upon that character of inflation, it would be necessary for the Government of the United States, through the President of the United States and the Secretary of the Treasury and the Federal Reserve Board, exercising the powers they may now have, to impound all of the domestic gold there is, impound it in behalf of the Government of the United States, or that gold will find its way to the pockets principally of the banks which have the opportunity to gather the gold.

Mr. President, it has also been suggested, in connection with that proposal, that to avoid the difficulties into which it would surely bring us respecting debentures, bonds, and securities which are payable in gold coin of the weight and fineness provided by law, there should be imposed a tax equal to the amount of the difference between the gold in the devalued dollar and the gold in the present dollar, payable upon collection of the gold due on bonds, notes, and securities, whether issued by private individuals, corporations, or the Government of the United States.

Mr. President, I am not going to discuss that proposal further. I am simply throwing out the suggestions for the purpose of discussing briefly what, in my opinion, will be the result of any inflationary measure which involves the ques-

tion of gold. I am not speaking now of inflationary measures respecting a system of controlled currency, but inflationary measures which involve the question of gold in the gold dollar.

Mr. HARRISON. Mr. President, will the Senator yield?

Mr. BLAINE. I yield.

Mr. HARRISON. I merely wanted to ask the Senator having this matter in charge whether he intended to have the Senate run on to-night, or what the program was. There are several Senators here inquiring about it.

Mr. BLAINE. Mr. President, will not the Senator withhold that inquiry? I am not going to occupy the floor very long.

Mr. HARRISON. I wanted to see if we could get together on some agreement.

Mr. BLAINE. If the Senator will withhold his inquiry, I will much appreciate it.

The VICE PRESIDENT. The Senator declines to yield at this time.

Mr. BLAINE. I will endeavor to be very brief. I desire to confess at the outset that I have not gone into the legal question involved with the thoroughness to which I would like to subject the proposition, but I want to set forth what I think are well-known and familiar rules of constitutional construction and the powers of the Congress and the inhibitions upon Congress respecting this question.

I am convinced, so far as I am personally concerned, that Congress has not the power to violate a contract, whether a contract entered into on behalf of the Government and a private party, or a contract entered into between private parties. I am convinced also that, while the Congress has been granted the power to coin money, regulate the value thereof, and of foreign coin, and to fix the standard of weights and measures, that power does not justify the Congress in violating a contract when it exercises the power to determine the kind of money we shall have, whether it is coin or currency, that is, specie or paper money, nor has it that power in the regulation of the value of that money, nor has it that power in fixing the standard of weights and measures to impair the obligation of any contract which provides for payment of specifically defined coin dollars.

Of course, the legislative power of the Congress of the United States goes no further than that granted to the Congress by the Constitution, and the Congress is bound by other provisions of the Constitution to respect certain guaranties. I call attention to article of amendment No. 5:

> No person shall * * * be deprived of life, liberty, or property, without due process of law; nor shall private property be taken for public use without just compensation.

That is an inhibition on the legislative branch of Government. It is analogous to the inhibition on the several State legislatures, in my opinion, and I want to review, just briefly, some of the authorities on this proposition generally.

While the Congress has the right to coin money, determine the kind of money, and fix the value thereof, yet it has no right, under that power, to violate a contract. There is reserved to the States of the Union the police power, under which the States, not the Congress, will determine the law of contracts. But if a contract provides for payment in coin, that contract can not be violated by State legislation. Obviously the Congress of the United States has no grant of power respecting that character of contract.

Then there is another character of contract, a contract for the sale of something, it may be a commodity or it may be service, providing that payment therefor shall be made in some particular commodity, for instance, wheat, tobacco, copper, silver, nickel, aluminum, or any other commodity. State legislation can not violate that contract, and it is obvious that the Congress of the United States has no power in the premises.

Another character of contract, by way of illustration, is a contract for services or commodities providing for the payment thereof in gold or silver coin. The States can not violate that contract. Neither can the Congress of the United States violate that contract. It is an enforceable contract, and the payment must be made as agreed.

Mr. WAGNER. Mr. President——

The VICE PRESIDENT. Does the Senator from Wisconsin yield to the Senator from New York?

Mr. BLAINE. Certainly.

Mr. WAGNER. May I suggest to the Senator if there is not something to the proposition that when one makes a contract he has constructive if not actual notice of the fact that the Congress has the right to exercise that power?

Mr. BLAINE. The answer is that Congress never attempted to exercise any such power in connection with the matter I am discussing or in connection with the matter upon which we are legislating. I doubt if Congress has that power. That power is reserved to the States. That is a police power. The Congress can not determine the law of contract. I think the Senator's question will be answered in the course of my remarks.

There is another character of contract to which I was about to refer, and that is a contract for a commodity or service, the payment for which is to be made in gold of the weight and fineness then provided by the law of the Congress. The States have no power, of course—that goes without argument—to violate that contract. Neither has the Congress of the United States any power to violate that contract under its grant of power to coin money and to fix the value thereof. In other words, the law of contract is a police power especially reserved to the States of the Union and over which the Congress has no power whatever. That is definitely determined in the Legal Tender cases.

Congress may define what is money, what shall be the standard of value for the payment of all public and private debts. The Congress has that power, but that power does not go to the extent of violating an express contract between private parties or between the Government and a private party. In the absence of an express contract, the party to discharge the obligation, to make the payment, may make a tender in any lawful money of the United States, any money by the Congress declared to be lawful money. But when a contract has a specific, definite form of payment to be made, that kind of a contract is to be interpreted by the laws of the respective States, the State in which the contract was executed and can not be controlled, limited, or expanded by any act of Congress acting under the power to coin money or to fix the value thereof. That doctrine applies with equal force to contracts made by the Government of the United States with private parties. The Government can not violate such contracts.

I have not familiarized myself with the specific provisions of law respecting all the forms of money authorized by the Congress. We have greenbacks, we have silver coins, we have United States Treasury notes, we have Federal reserve notes, and national-bank notes, and Federal reserve bank notes. They are all money. They are all lawful money for the payment of private and public debts. I think most of them are by the law made legal tender for the payment of excise taxes and customs duties.

The Congress has the power in that respect; but when it comes to the question of a contract, the Congress has no power by its declaration to provide that a contract shall be payable only in a particular specified coin or currency; at least there is no such provision in the present law, and Congress has never attempted to assume such power.

In justification of these general observations I want to point out that in the case of Union Pacific Railroad Co. against the United States and in the case of Central Pacific Railroad Co. against Gallatin, known as the Sinking Fund cases and reported in Ninety-ninth United States Reports, page 718, Mr. Justice White delivered the opinion of the court, in part as follows:

> The United States can not, any more than a State, interfere with private rights except for legitimate governmental purposes. They are not included within the constitutional prohibition which prevents States from passing laws impairing the obligation of contracts, but equally with the States they are prohibited from depriving persons or corporations of property without due process of law.

That is the due process of law guaranteed under the fifth article of amendment to the Constitution.

I need not quote further from the decision, but the dissenting opinions rendered in the same case more emphatically declare the same doctrine, in brief, that the Congress of the United States has no authority to violate a contract in which the Government is one of the parties. Therefore, if by operation of the law the Government bonds that are outstanding to-day are payable in gold of the weight and fineness provided by law at the time of the issuance of those bonds, there is no act of Congress which, by devaluation of the gold dollar or any other act of Congress, can violate that obligation.

The VICE PRESIDENT. The Senator's 30 minutes on the amendment have expired.

Mr. BLAINE. I will take the balance of the time on the bill. I have not taken any time on the bill.

The VICE PRESIDENT. The Senator has one hour on the bill.

Mr. BLAINE. I desire to review another class of cases, namely, the Legal Tender cases.

Mr. WHEELER. Mr. President, will the Senator yield to me to make a brief statement?

Mr. BLAINE. I would prefer to finish. I am not going to consume a great deal of time.

The VICE PRESIDENT. The Senator declines to yield.

Mr. ASHURST. Mr. President, if we do not have an understanding now, it will be too late in 5 or 6 or 10 minutes. If the Senator wishes really to accommodate the Senate, he can probably make it manifest that we are not going to vote or that we are, so that we may know where we stand.

Mr. BLAINE. I want to assure the Senator from Arizona that I am engaged in no obstructive tactics.

Mr. ASHURST. I did not so infer.

Mr. BLAINE. I am undertaking a debate which I believe is legitimate. I have always accommodated the Senate. I appreciate that when a time is fixed, as may be proposed in this matter, that concludes my debate upon the proposition and I do not choose to conclude it under those circumstances.

Mr. ASHURST. I would be delighted to stay and hear the Senator, but it would be a great accommodation to many of us to know whether we are going to have to remain until 10 o'clock. That is what I wanted to know.

Mr. MOSES. Mr. President, I thought that was determined yesterday.

Mr. GLASS. Mr. President, I can reassure the Senator of that. We are going to stay here until 10 o'clock.

Mr. BLAINE. I am in perfect agreement with the Senator from Virginia and with the Senator from New Hampshire. I think we ought to stay here until 10 o'clock, or even later if necessary, to transact the business of the Senate.

Mr. President, before the interruption I was discussing the Legal Tender cases. After all, the Legal Tender cases largely consist of the case of Knox against Lee, reported in Twelfth Wallace, page 457. The opinion written by Mr. Justice Strong is very voluminous, but as a matter of fact the whole case is stated in the syllabus. The first section of the syllabus is immaterial to a discussion of the question.

The second section of this opinion overruled the opinion in the case of Hepburn *v.* Griswold (8 Wall., 603) on the point only that—

> The acts of Congress, known as the legal tender, are constitutional when applied to contracts made before their passage.
> 3. They are also valid as applicable to contracts made since.

In that case, involving what might be termed a damage suit for trespass, in an action to recover the value of certain sheep, an effort was made to prove the difference between the then value or the purchasing power of what was known as the greenback and gold and silver coins. That raised the question that was decided, the single question, and the court held that the legal tender acts were constitutional. I need read but a very few brief excerpts from the opinion. The court held that the legal tender acts were valid as to contracts entered into prior to the passage of those acts, as well as the contracts entered into thereafter, so far as making a tender of the amount due under those contracts was concerned, but particularly limiting the discussion and conclusion to contracts to pay money generally, not to contracts, to pay some specifically defined species of money. I quote——

Mr. CONNALLY. Mr. President——

The VICE PRESIDENT. Does the Senator from Wisconsin yield to the Senator from Texas?

Mr. BLAINE. I yield.

Mr. CONNALLY. That was all that was before the court.

Mr. BLAINE. Exactly.

Mr. CONNALLY. And the court could not decide something that was not in issue.

Mr. BLAINE. But the other matters had been before the court prior to that time.

Mr. CONNALLY. Yes; I know.

Mr. BLAINE. And I will discuss those.

Mr. CONNALLY. But will not the Senator concede that the only thing in issue in the Legal Tender cases was the tender of irredeemable paper money in discharging contracts calling for coin?

Mr. BLAINE. I not only concede it, but I asserted it while the Senator was absent from the Chamber.

Mr. CONNALLY. As soon as I heard the Senator was speaking, I returned to the Chamber; but let me suggest to the Senator that being true, the Legal Tender cases are not authority for anything except the one question that was there involved.

Mr. BLAINE. As to the Legal Tender cases, so characterized, he perhaps is correct, but the Legal Tender cases have antecedents, and the Senator will find that those cases have gone far beyond the question discussed in the case I am now considering.

Mr. CONNALLY. Will the Senator permit one other interruption, and then I shall not disturb him further? This is right on the point, if the Senator will indulge me.

The VICE PRESIDENT. Does the Senator from Wisconsin yield further to the Senator from Texas?

Mr. BLAINE. I yield.

Mr. CONNALLY. Does not the Senator though distinguish between the Legal Tender cases and any other case discussing generally the action of Congress where Congress is acting specifically under a specific grant of power? For instance, in none of those cases was the question presented to the court of a case in which Congress had already undertaken to regulate the value of money. Is not that much stronger than the incidental question raised in those cases?

Mr. BLAINE. I think the Supreme Court has definitely charted the course for the Congress. I merely want to quote a brief excerpt on page 458:

> The argument assumes two things—first, that the acts do, in effect, impair the obligation of contracts, and second, that Congress is prohibited from taking any action which may indirectly have that effect. Neither of these assumptions can be accepted.

Exactly; the assumption was incorrect; the facts do not justify the contention that there was any attempt made by the Congress to impair the obligations of contracts in the first instance. In the second instance, the assumption that Congress is prohibited from taking any action which may indirectly have that effect relates entirely to different contracts and different subjects and not to the question of the constitutionality of the legal tender acts.

So much for that case. I am not going into these matters with a great deal of thoroughness; I merely want to have preserved in the RECORD some information which I believe may be of assistance to those who are considering this character of legislation. I do not refer particularly to Members of Congress; but because there is a general feeling abroad that Congress has the power to declare anything as money and then compel those who have entered into contracts to accept that character of money in payment of the contract, regardless of the terms of the contract, I think the minds of the people ought to be disabused of that thought.

Mr. GLASS. Mr. President——

The PRESIDENT pro tempore. Does the Senator from Wisconsin yield to the Senator from Virginia?

Mr. BLAINE. I yield.

Mr. GLASS. I want to ask the Senator a question merely for information. I was a boy at that time, taking only a boy's interest in current public affairs. Is it or is it not a fact that it was known that the Supreme Court was evenly divided on that proposition and that another member was added in order to get a decision in favor of the legal-tender quality of greenbacks, and that it was universally charged that the court was packed for that purpose?

Mr. BLAINE. That has been intimated. I have directed the attention of the Senate to the fact that that case did not involve primarily the question that confronts us. That case involved only whether or not the party upon whom the alleged trespass was committed could recover a certain species of money. That was the only question at issue in that case, and around and about that question arose the decision that the legal tender acts were constitutional, that is, that greenbacks were made lawful money for the payment of public and private debts. That statement practically covers the scope of the Legal Tender case, but the antecedents to that case were far more important and far more persuasive in connection with the subject to which I have directed my attention.

I will state briefly the facts from the record in the case of Bronson *v.* Rodes, reported in 7 Wallace, page 229:

In December, 1851, one Christian Metz, having borrowed of Frederick Bronson, executor of Arthur Bronson, $1,400, executed his bond for the repayment to Bronson of the principal sum borrowed on the 18th day of January, 1857, in gold and silver coin, lawful money of the United States, with interest, also in coin, until such repayment, at the yearly rate of 7 per cent.

Those were the facts involved in that case, and the court, in considering the subject at some length, discusses the act of 1849 authorizing the coinage of gold double eagles and gold dollars conformable in all respects to the established standards.

I need not review that portion of the decision. I point out that the court said, Chief Justice Chase delivering the opinion, that:

Payment of money is delivery by the debtor to the creditor of the amount due. A contract to pay a certain number of dollars in gold or silver coins is therefore, in legal import, nothing else than an agreement to deliver a certain weight of standard gold, to be ascertained by a count of coins, each of which is certified to contain a definite proportion of that weight. It is not distinguishable, as we think, in principle from a contract to deliver an equal weight of bullion of equal fineness. It is distinguishable in circumstance only by the fact that the sufficiency of the amount to be tendered in payment must be ascertained, in the case of bullion, by assay and the scales, while in the case of coins it may be ascertained by count. * * *

But we need not pursue the subject further.

Says the court:

It seems to us clear beyond controversy that the act must receive the reasonable construction not only warranted but required by the comparison of its provisions with the provisions of other acts and with each other, and that upon such reasonable construction it must be held to sustain the proposition that express contracts to pay coined dollars can only be satisfied by the payment of coined dollars.

So a contract that is payable in gold of a certain weight and fineness, whatever the express terms of the contract may be, can only be paid in gold of that particular weight and fineness; and as I have pointed out, the Congress of the United States has no power over that contract. The law of contract rests with the State sovereignty under the police power of the respective States.

In the same volume of reports, in the case of Butler against Horwitz, page 258, the Chief Justice, delivering the opinion of the court, reviews these propositions. I shall quote but brief excerpts from that opinion:

It was not necessary—

Said the court—

in the case of Bronson *v.* Rodes—

Decided at the same term of court and, I assume, argued at the same term of court—

nor is it necessary now to decide the question whether the acts making United States notes legal tender are warranted by the Constitution. We express no opinion on that point, but assume, for the present, the constitutionality of those acts. Proceeding upon this assumption, we find two descriptions of lawful money in use under acts of Congress, in either of which damages for nonperformance of contracts, whether made before or since the passage of the currency acts, may be properly assessed in the absence of any different understanding or agreement between the parties.

That is, in the absence of an express agreement for payment in a particular species of coin or money, then any money that is declared legal tender by the Congress of the United States may be tendered in satisfaction of that contract and must be accepted; but quite different when the contract provides for the specific payment of a species of coin or particular character of money.

Again:

But the obvious intent, in contracts for payment or delivery of coin or bullion, to provide against fluctuations in the medium of payment, warrants the inference that it was the understanding of the parties that such contracts should be satisfied, whether before or after judgment, only by tender of coin, while the absence of any express stipulation, as to description, in contracts for payment in money generally, warrants the opposite inference of an understanding between parties that such contracts may be satisfied, before or after judgment, by the tender of any lawful money. * * * We are of the opinion, therefore, that under the existing laws, of which, in respect to legal tender, the constitutionality is, we repeat, in this case assumed, damages may be properly assessed and judgments rendered so as to give full effect to the intention of parties as to the medium of payment.

That appears to be perfectly clear.

When, therefore, it appears to be the clear intent of a contract that payment or satisfaction shall be made in gold and silver, damages should be assessed and judgment rendered accordingly.

Mr. President, going back to the case of Knox *v.* Lee—the Legal Tender cases—in Twelfth Wallace, page 549, it is said:

Contracts for the delivery of specific articles belong exclusively to the domain of State legislation, while contracts for the payment of money are subject to the authority of Congress, at least so far as relates to the means of payment. They are engagements to pay with lawful money of the United States, and Congress is empowered to regulate that money.

Mr. THOMAS of Oklahoma. Mr. President, I suggest the absence of a quorum.

The PRESIDENT pro tempore. The clerk will call the roll.

The legislative clerk called the roll, and the following Senators answered to their names:

Ashurst	Costigan	Kendrick	Robinson, Ind.
Austin	Couzens	Keyes	Russell
Bailey	Dale	King	Schuyler
Bankhead	Davis	Lewis	Sheppard
Barbour	Dickinson	Long	Smith
Barkley	Fess	McGill	Smoot
Bingham	Frazier	McKellar	Steiwer
Black	George	McNary	Swanson
Blaine	Glass	Metcalf	Thomas, Idaho
Bratton	Goldsborough	Moses	Thomas, Okla.
Broussard	Gore	Norbeck	Townsend
Bulkley	Grammer	Norris	Trammell
Bulow	Hale	Nye	Vandenberg
Byrnes	Hastings	Oddie	Wagner

Carey	Hebert	Pittman	Walsh, Mont.
Connally	Howell	Reed	Watson
Coolidge	Hull	Reynolds	Wheeler
Copeland	Kean	Robinson, Ark.	White

The PRESIDENT pro tempore. Seventy-six Senators having answered to their names, a quorum is present. The question is on agreeing to the amendment, in the nature of a substitute, proposed by the Senator from Montana [Mr. WHEELER] to the amendment proposed by the Senator from Louisiana [Mr. LONG].

Mr. GLASS. Mr. President, does the Senator from Wisconsin desire to discuss the question further?

Mr. BLAINE. I have concluded.

Mr. GLASS and Mr. LONG addressed the Chair.

The PRESIDENT pro tempore. The Senator from Virginia.

Mr. GLASS. Mr. President, I rise to move to lay the proposed amendment of the Senator from Louisiana on the table.

Mr. LONG. Mr. President——

The PRESIDENT pro tempore. That motion carries with it the amendment proposed by the Senator from Montana [Mr. WHEELER] to the amendment and the question is upon agreeing to the motion proposed by the Senator from Virginia.

Mr. LONG. Mr. President, would I have a right to discuss my own amendment?

Mr. ROBINSON of Arkansas. Mr. President, a motion to table is not debatable.

The PRESIDENT pro tempore. The point of order is sustained. The question is on agreeing to the motion proposed by the Senator from Virginia.

Mr. GLASS. I ask for the yeas and nays.

The yeas and nays were ordered, and the legislative clerk proceeded to call the roll.

Mr. HEBERT (when his name was called). I have a general pair with the junior Senator from West Virginia [Mr. NEELY]. I transfer that pair to the senior Senator from California [Mr. JOHNSON], and vote "yea."

Mr. KING (when his name was called). I have a pair with the junior Senator from California [Mr. SHORTRIDGE]. Not knowing how he would vote, I withhold my vote.

Mr. SWANSON (when his name was called). I have a pair with the senior Senator from Illinois [Mr. GLENN], which I transfer to the junior Senator from Mississippi [Mr. STEPHENS], and vote "yea."

The roll call was concluded.

Mr. SHEPPARD. I desire to announce that the senior Senator from Maryland [Mr. TYDINGS], the senior Senator from Mississippi [Mr. HARRISON], and the junior Senator from Mississippi [Mr. STEPHENS], if present and not paired, would vote "yea."

Mr. FESS. I desire to announce the following general pairs:

The Senator from Minnesota [Mr. SHIPSTEAD] with the Senator from Maryland [Mr. TYDINGS];

The Senator from Minnesota [Mr. SCHALL] with the Senator from Arkansas [Mrs. CARAWAY];

The Senator from Iowa [Mr. BROOKHART] with the Senator from Missouri [Mr. HAWES]; and

The Senator from New Mexico [Mr. CUTTING] with the Senator from Mississippi [Mr. HARRISON].

I am advised that the Senator from Iowa [Mr. BROOKHART] and the Senator from Minnesota [Mr. SHIPSTEAD] would vote "nay" if present.

Mr. SHEPPARD. The senior Senator from Washington [Mr. DILL] is necessarily absent. If present, he would vote "yea."

Mr. McNARY. I desire to announce the unavoidable absence of the senior Senator from Idaho [Mr. BORAH]. If he were present, he would vote "yea."

I desire also to announce the unavoidable absence of the senior Senator from California [Mr. JOHNSON]. If he were present, he would vote "yea."

Mr. HOWELL. I have a pair with the senior Senator from Florida [Mr. FLETCHER]. Not knowing how he would vote, I withhold my vote. If permitted to vote, I would vote "nay."

Mr. COSTIGAN (after having voted in the negative). I had a pair with the junior Senator from Connecticut [Mr. WALCOTT], but it was my understanding that that Senator was in the Chamber; hence I voted. In his absence, it will be necessary for me to withdraw my vote. If permitted to vote, I should vote "nay."

Mr. DAVIS. I transfer my pair with the junior Senator from Kentucky [Mr. LOGAN] to the senior Senator from Idaho [Mr. BORAH], and vote "yea."

The result was announced—yeas 56, nays 18, as follows:

YEAS—56

Austin	Coolidge	Hatfield	Reed
Bailey	Copeland	Hayden	Robinson, Ark.
Bankhead	Couzens	Hebert	Robinson, Ind.
Barbour	Dale	Hull	Smoot
Barkley	Davis	Kean	Steiwer
Bingham	Dickinson	Kendrick	Swanson
Black	Fess	Keyes	Thomas, Idaho
Bratton	George	McKellar	Townsend
Broussard	Glass	McNary	Trammell
Bulkley	Goldsborough	Metcalf	Vandenberg
Byrnes	Gore	Moses	Wagner
Capper	Grammer	Oddie	Walsh, Mass.
Carey	Hale	Patterson	Watson
Connally	Hastings	Pittman	White

NAYS—18

Ashurst	Long	Reynolds	Thomas, Okla.
Blaine	McGill	Russell	Walsh, Mont.
Bulow	Norbeck	Schuyler	Wheeler
Frazier	Norris	Sheppard	
Lewis	Nye	Smith	

NOT VOTING—22

Borah	Fletcher	King	Shortridge
Brookhart	Glenn	La Follette	Stephens
Caraway	Harrison	Logan	Tydings
Costigan	Hawes	Neely	Walcott
Cutting	Howell	Schall	
Dill	Johnson	Shipstead	

So Mr. LONG's amendment was laid on the table.

Mr. GLASS and Mr. LONG addressed the Chair.

The VICE PRESIDENT. The Senator from Virginia.

Mr. GLASS. Mr. President, I want to proceed now with the consideration of the pending bill. We have wasted eight hours to-day; and when that was begun, we were considering the provision of the bill relating to the liquidating corporation. I yield to the Senator from New Jersey to offer his proposed amendment.

Mr. KEAN. Mr. President——

The VICE PRESIDENT. The Senator may not do that, but the Chair recognizes the Senator from New Jersey.

Mr. KEAN. Mr. President, I offer the following amendment.

The VICE PRESIDENT. The amendment will be stated.

The LEGISLATIVE CLERK. The Senator from New Jersey proposes on pages 16, 17, and 18, to omit subdivisions (e), (f), and (g) of section 12 B.

Mr. KEAN. Mr. President, I offer this amendment because I have proven, I think, that the Federal reserve banks are easily able to pay the amount of money necessary to carry on this corporation, and I can not see why the member banks should be assessed against their will to create a corporation to take up badly managed banks over which they have no control, while the Federal reserve bank has the control. It has the examiners, it has all the machinery to inspect the banks, and therefore it ought to be responsible. If a bank fails, they are the people who ought to take it up and pay the depositors a proportion of the money according to the assets.

In addition to this, I believe this is the way the Federal Reserve Board said they wished to have the matter carried through.

Mr. LONG. Mr. President, I undertook to get the floor to discuss my own amendment, but the Senator from Virginia had entered into a voluntary unanimous-consent agreement that no Senator on this floor should discuss any amendment longer than 30 minutes. I had offered an amendment to the bill which had been discussed all day long, particularly by the Senator from Virginia, and as I rose to discuss my own amendment, I was done the distinct discourtesy by the distinguished Senator of having a motion made to table the amendment without my having the right of discussion.

I presume that is within the realm of recognized and confirmed courtesy. My having failed to receive my education upon that line, the experience which I have had renders my education more complete.

I had not understood that the distinguished Senator from Virginia was undertaking to railroad my own amendment in such a way as that. I had, on the contrary, felt that, proceeding with deference to others who wished to discuss the amendment, I was according them a courtesy.

Mr. GLASS rose.

Mr. LONG. I yield to the Senator from Virginia if he wishes to propound a question.

Mr. GLASS. I do not wish to propound a question.

Mr. LONG. That is the only purpose for which I will yield.

Mr. GLASS. I want to correct a statement made by the Senator from Louisiana.

Mr. LONG. Very well. If I am in error I would like to be corrected.

Mr. GLASS. The Senator from Louisiana had indicated to me that he would like to withdraw his own amendment;

that he did not desire to discuss it. That was more than an hour ago. I submit to the Senator from Louisiana that after we had wasted eight hours in discussion upon a proposition that has no relevancy whatever to the pending bank bill, it was about time to terminate matters. I had no idea the Senator from Louisiana wanted to discuss his amendment. As a matter of fact, I think if the Senator from Louisiana would examine his own inward thought he would find that I have relieved him from a very awkward situation.

Mr. LONG. No; I do not agree to that. I realize that I did state, amongst the efforts of others, including the Senator from Nebraska [Mr. NORRIS], that it would probably be better to let the amendment which has just been disposed of be considered as an independent matter. Having failed to reach that satisfactory adjustment of the matter, when the Senator undertook to present a motion to lay the amendment on the table, I rose, as the RECORD will show, I think, to undertake to discuss it, but the Senator persisted in his motion without debate.

However, I am sure the Senator at some future time will accord me more than he probably would have in view of what has happened in this particular matter. There is a matter, however, Mr. President, which I wish to present. I was not particularly averse to the early disposition of the amendment, but I am now compelled to use some of my time that I wanted to use in discussing the amendment to explain the situation presented by the former amendment.

Mr. WHEELER. Mr. President——

The VICE PRESIDENT. Does the Senator from Louisiana yield to the Senator from Montana?

Mr. LONG. I yield.

Mr. WHEELER. I think it should be called to the attention of the Senate and of the people that both the Senator's amendment and my substitute were not beaten by legitimate votes opposed to the remonetization of silver, but they were to a large extent or a considerable extent defeated by those who have always pretended, at least, that they were for the remonetization of silver when they were talking to the people of their own States.

Mr. LONG. Mr. President, I have in my hand a resolution adopted by the Legislature of South Carolina in which they state, in effect, that through the action of the war and the part played in it by the United States, we have become the greatest creditor Nation of the world, and that notwithstanding that fact the people of the United States are in the midst of an economic crisis unparalleled in its history, and it is asked in this resolution of the Legislature of South Carolina that we remonetize silver.

A great deal has been stated as to what status we would occupy in remonetizing silver. There is quite a little misunderstanding as to the law. This matter has been rather hastily discussed. Congress has the power under the Constitution to regulate money. I do not quote the exact words, but it has the right to regulate the value of money. That is the right of Congress. A 10-year-old schoolboy who has been reading the late decisions of the Supreme Court of the United States knows that since 1920 there has been a long line of decisions holding that regardless of contracts which were entered into by the Government or by private bodies or by public bodies, it did not make any difference what those contracts were; that wherever the power to regulate was held in the public body it outweighed and overrode any contract that was made, public or private. Let me illustrate that to the point where I think anybody who has studied it, even as a layman, will have no doubt whatever as to the power of Congress to inflate currency, to change the value of the dollar, or to remonetize silver.

In the case of the San Antonio Railway Co., the city of San Antonio, acting under a contractural authority, had fixed the rate of fare over street railroads at 5 cents per person. That had stood for years and years. Eventually, however, the street-railway concern came to the United States Supreme Court claiming that the city of San Antonio had the power to regulate rates and to fix rates and charges, to fix the value of the service; and inasmuch as the city of San Antonio had the right to fix rates and regulate rates, that any contract entered into by and between the city of San Antonio and the San Antonio Street Railway Co. was subject to the greater power of the city to regulate rates, and, therefore, the city having the right to regulate rates, the regulation must be reasonable.

That gave them the right to plead in the courts that their property was being confiscated without due process of law because the rate was not a reasonable rate giving them a fair rate of return. They had agreed and contracted as to the value of that service at 5 cents per passenger, but the Supreme Court of the United States held that, notwithstanding that situation, the power to regulate at all times warned whatever public or private contractor there was that the city at any time would have a right to impose a lower rate if the conditions justified it or that the concern would have the right to claim a higher rate if the circumstances required it in order that it might have a reasonable rate of return. That is No. 1.

Mr. President, in the case of the Southwestern Gas & Electric Co. *v.* The City of Shreveport and the Louisiana Public Service Commission, a concern owned by the Insull interests, as a member of the Public Service Commission of the State of Louisiana I found a number of contracts existing in which there had been a contract entered into guaranteeing that certain privately owned and operated factories could have gas supplied to them as low as 7 cents per thousand cubic feet; in other instances there were factories who had contracts signed, sealed, and delivered that fixed the rate of electricity as low as 1 cent per kilowatt. As a member of the Public Service Commission of the State of Louisiana, acting with two other members, as chairman of the board, I annulled those contracts giving 7 cents a thousand for gas and as low as 1 cent a kilowatt for electricity on the ground that the rate was unreasonably low.

On the contrary, there were contracts made with the city for street lighting fixing the rate much higher, and I annulled those contracts on the ground that they were unreasonably high. That case was carried to the Supreme Court of the State of Louisiana, and there I was upheld. I think it probably reached the Supreme Court of the United States on application for a writ, but in that case the Supreme Court of Louisiana, backed up by the Supreme Court of the United States under prior jurisdiction, held that wherever a body or State had retained the right to regulate a service, private contracts made by private parties to the contrary notwithstanding, the power to regulate was above and overrode and overcame the provisions of the contract.

I have first demonstrated the jurisdiction of the city and next the jurisdiction of the State. Now, coming to the United States, prior to the creation of the Interstate Commerce Commission there were all kinds of rates established throughout the country, a dollar per thousand pounds or 10 cents per hundred pounds or 7 cents per hundred pounds from one station to another. As a matter of fact, the Standard Oil Co. of New Jersey had an agreement under which it not only had a certain rate for itself but it had a contract with the railroads by which the railroads paid the Standard Oil Co. a certain portion of the freight which it charged the competitors of the Standard Oil Co. to haul oil produced by the independent interests. In other words, the contract was such that concerns like the big oil company not only received very low rates themselves but they were actually paid a part of the freight collected for hauling the oil of their competitors.

The Interstate Commerce Commission was created. Some of those cases, possibly not the oil cases, but cases involving the same principle, went to the Supreme Court of the United States, and what did they hold? While the Congress of the United States up until that time had never asserted the right to regulate rates or to regulate the charges of commerce between the States, the Supreme Court held that notwithstanding the fact that Congress had laid dormant about the matter, just as it has about remonetizing silver, just as it has about inflating the currency, just as it has about cheapening the dollar, the Supreme Court said the facts were that

there was in the Constitution of the United States the power of Congress, whenever it saw fit, to regulate interstate commerce; and therefore, regardless of any kind of contract or stipulation that had been made before the Interstate Commerce Commission was created, that when the Congress of the United States saw fit to create the Interstate Commerce Commission, that commission, vested with powers and functions to control interstate commerce, could wipe out whatever private contracts had been made and fix rates and charges of freight on the railroads from that time forward.

That was the United States acting under its power to regulate as I have also illustrated the power of the States to do under their power to regulate, and the powers of the municipalities operating by authority of the States, and boards and commissions acting by authority of the States, to regulate and to cancel private contracts which might be made. Why? Because we have reached the very condition that we might have anticipated. When the years rolled on and on it developed that the commerce of the country could not survive under the rate structures and charges and schedules that were being assessed at that time. That was the situation. I think there were public agreements; at any rate, there was an agreement made by the people of San Antonio, Tex., with the San Antonio Street Railway Co., and there were hundreds of thousands of that kind of private contracts made on the part of the public, and yet no one heard from these distinguished defenders of the right of contracts when they were trying to protect the people. If they had been doing it there would not have been anything but 5-cent fares over the street railroads in those cities to-day.

There were further agreements and regulations and contracts made for rights of way and made as a condition precedent for the railroads to go into the States. Some of them were grants of land, some of them were grants of other franchises, by which the railroads were bound not to charge more than 3 cents per mile per passenger, and yet when the time came that the Interstate Commerce Commission wanted to grant the request of those railroads to raise that fare from 2 or 3 cents up to 3.6 cents per mile per passenger, they did not pay any more attention to those private stipulations and contracts than if they had not been written.

On the contrary they went into the Supreme Court of the United States and that court said it did not make any difference what kind of a contract had been made, what kind of specie had been prescribed or how much had been prescribed; that when the time came that regulation in the public interest suggested that something else should be done, those private agreements had to be canceled. That is the law, so why spend days of the time of the United States Senate discussing a question that is as axiomatic as that the sun will rise when the morning comes? That is the law.

Why should my friend the distinguished Senator from Pennsylvania [Mr. REED] or the distinguished Senator from Wisconsin [Mr. BLAINE] labor so hard and talk about the great sacred rights of contract to be paid in this or that species of a certain standard of weight and fineness, when we had contracted that we should pay certain species and certain prices, but when the time came that the general public of the United States required it, Congress could exercise its power to regulate the situation with regard to commerce because it had the right to regulate the situation with regard to commerce?

So it is, Mr. President. If Congress does not feel to-day that privately made contracts are a benefit to the country, and if we have arrived at a time when we have become enmeshed and covered up with a debt structure that is threatening to break the backbone of the people, then the great Government of the United States, under its power to regulate, in order to relieve a condition growing out of private contracts that is destroying property, has the right to invoke its power to regulate money, and that power to regulate can not be taken away or obstructed by any kind of an agreement or anything else that Congress has done in the meantime.

The power to regulate, Mr. President, can not be bartered away. It does not make a bit of difference if the United States Government has entered into 40,000 contracts or written $10,000,000 worth of bonds or $10,000,000,000 worth of bonds, the power to regulate money can not be bartered away by any officer of the United States Government or by anybody else.

Whenever a man buys a bond he buys it with his eyes open, and there is a right of the United States Government, at whatever time the welfare of the people may require it, to change the money according to such standards of weights and fineness as the circumstances may require at the time.

Mr. WHEELER. Mr. President, will the Senator yield?

The VICE PRESIDENT. Does the Senator from Louisiana yield to the Senator from Montana?

Mr. LONG. I yield.

Mr. WHEELER. There was no complaint at all on the part of the bondholders and the rest of the creditor class when we demonetized silver.

Mr. LONG. Oh, no.

Mr. WHEELER. But now when we are talking about remonetizing silver and giving the people back their money, then the creditor class begin to say, "You are destroying the value of my contract that you entered into."

Mr. LONG. Exactly. Let me elaborate on that. There has not been any change in the Constitution of the United States on the money question since 1873; and up to 1873, under the Constitution of the United States, silver was monetized and was good money. However, without any change in the Constitution of the United States, they demonetized silver; and they tell us that since this kind of a fraud had been pulled off—and I say it was a fraud; President Grant himself said he did not know he was demonetizing silver when he signed the bill; and if he had, he would not have signed it—since they pulled off on the people of the United States this skin game of demonetizing silver without amending the Constitution of the United States in any respect or particular they now come back and tell us that we can not invoke the Constitution, which says that gold and silver shall be coined by the United States.

This is not a harsh principle of Government, and it has been resorted to by the wealthy class in the past years over and over again. It would not have made any difference if the United States Government had contracted with the House of Morgan that it would pay it off an obligation in gold of a certain weight and certain fineness; it would not have made any difference just what the United States Government might have agreed. The United States Supreme Court has stated that the congressional power can not be bartered away for any length of time or by anybody. The power to regulate that is given to the Congress or given to any State. It can not be bartered away or traded away. At any time, whenever the authority acts reasonably and within its functions under the law to enforce its power to regulate, its action can not be disputed, except where it is specifically allowed by law.

That being the case, Mr. President, this matter is not difficult at all. I believe the Senator from Arkansas was convinced this morning that his original view of the matter was wrong when he spoke of the Government's having issued its bonds and specified that they would be paid in dollars, and therefore, having specified payment in dollars, there might be something questionable about the moral side of it. Now let us discuss it from the moral side. From the legal side I think I have proved to the mind of everybody, beyond reasonable doubt, that there is no question about the right of the Government to regulate money whenever it wants to, but now let us discuss the moral side of the question.

When the United States Government sold a bond to me or to anybody else, when it sold me a hundred-dollar bond in 1918 or 1919 or 1920, what the United States Government sold me for my hundred dollars was a hundred dollars' worth of goods, commodities. I come back to-day and I say to the United States Government, "It has now so happened that the hundred dollars that I invested with you in 1920, which in 1920 would have bought four-fifths of 1 bale of cotton, will now buy 4 bales of cotton." Are we going to stand here and say to the people, 120,000,000 of them, that they do not have just as much right to depend upon the Congress

of the United States to protect them as did the man who bought the bonds? Are we going to say that there is anything immoral because we insist upon giving that man everything he invested at the time? Has not the man who has plowed from sunup until sundown got just as much right to claim the protection of the Government to maintain the value of the dollar as the man who bought the bonds? Is there not just as much right in 120,000,000 American people to demand a currency or a medium of exchange that is reasonable to them as there is right on the part of the man who has bought the bonds who toils not, who spins not, yet Solomon arrayed in all his beauty was not nearly so good to look at as one of them?

Mr. THOMAS of Oklahoma. Mr. President, will the Senator yield?

The VICE PRESIDENT. Does the Senator from Louisiana yield to the Senator from Oklahoma?

Mr. LONG. I yield.

Mr. THOMAS of Oklahoma. It has been stated on the floor this afternoon that we have outstanding $20,000,000,000 of bonds.

Mr. LONG. That is right, payable in gold of a certain standard weight and fineness.

Mr. THOMAS of Oklahoma. Those bonds were issued in connection with the World War in 1917 and 1918, when the dollar was worth 50 cents. If the dollar goes to 100 cents then the people owe in value twice the amount to pay for the bonds that they received for the bonds. So when the dollar went to 100 cents we had in existence, in value, $40,000,000,000 of bonds outstanding. Is that correct?

Mr. LONG. That is right.

Mr. THOMAS of Oklahoma. The record shows that the dollar now is worth more than a dollar and a half. So we would have to add $20,000,000,000 more.

Mr. LONG. Yes; that would be $60,000,000,000.

Mr. THOMAS of Oklahoma. So the $20,000,000,000 of bonds are now worth $60,000,000,000.

Mr. LONG. That is right, as against a total property value in the United States, under present commodity prices of less than $200,000,000,000. Under this theory the bondholders of the United States Government to-day own $60,000,000,000 of the $200,000,000,000 worth of property we have in this country.

Mr. THOMAS of Oklahoma. Mr. President, will the Senator yield further?

The VICE PRESIDENT. Does the Senator from Louisiana yield further to the Senator from Oklahoma?

Mr. LONG. I yield for a question.

Mr. THOMAS of Oklahoma. If it be true that the holders of these bonds have a value worth $60,000,000,000, it must be true that they have a value of $40,000,000,000 which they did not buy and did not earn?

Mr. LONG. That is right.

Mr. THOMAS of Oklahoma. And they are now objecting to surrendering that $40,000,000,000 that they did not buy and did not earn, and that is the real power behind this bill objecting to the remonetization of silver and inflation?

Mr. LONG. That is the power behind the throne; that is the power that objects; that is the power, like the big banking houses that protest loudly and lustily whenever an effort is made to protect the American people by the exercise of the right of the Government to regulate and standardize the dollar on a livable basis. Some banking houses took their lawyers, went into the courts of the United States Government, and had private contract after private contract annulled on the ground that the United States Government had the right to regulate rates and charges and services in such an amount as would protect them. Now they come back here and lift up their arms in holy horror and say the United States Government has not any right to regulate the coinage and the value of money because it will help 120,000,000 people.

Mr. THOMAS of Oklahoma. Mr. President, will the Senator yield?

The VICE PRESIDENT. Does the Senator from Louisiana yield to the Senator from Oklahoma?

Mr. LONG. I yield.

Mr. THOMAS of Oklahoma. If the bonds, then, have increased in value, is it not true that the interest rate has likewise increased in value, so that if the people at one time had to pay 3½ per cent interest that rate has increased three times, until now the people have to pay interest at the rate of three times 3½ per cent or 10½ per cent on $60,000,000,000 of Government bonds?

Mr. LONG. That naturally follows.

Mr. THOMAS of Oklahoma. May I ask the Senator another question?

The VICE PRESIDENT. Does the Senator from Louisiana yield further to the Senator from Oklahoma?

Mr. LONG. Yes.

Mr. THOMAS of Oklahoma. Does the Senator think that the people of the United States can ever pay $60,000,000,000 of bonds with an annual interest rate of 10½ per cent?

Mr. LONG. They can not.

Mr. THOMAS of Oklahoma. If that be true, what are these bonds worth to-day?

Mr. LONG. They are eventually going to be worth nothing; they are going to be swallowed up in smoke in this country some day.

Mr. THOMAS of Oklahoma. The distinguished Senator from Virginia this afternoon made the suggestion that some sort of paper money might be good for papering the walls or some other necessary or unnecessary purpose. Does not the Senator think that these bonds are worth just about as much as the money of which the Senator spoke?

Mr. LONG. They will be worth less than that, because they are not going to have any wall to paper if they keep on with this kind of business in this country. That will be the only difference. Mr. President, they are pulling the temple down on themselves just as fast as they can. There never was a man who was given a rope with which to hang himself who is hanging himself any faster than the financial powers of the United States of America are doing to-day. Many times, in my short and uneventful career, I have stood at the bar of criminal justice and plead for the life of a man who was about to be sentenced, perhaps to be hung. I have never more sincerely plead for the life of a man in my life than I have plead for the liberty and lives of the financial powers of this country since I came to the Senate almost one year ago to-day. They do not realize they are pulling the house down on themselves.

Mr. THOMAS of Oklahoma. Mr. President, will the Senator yield?

The VICE PRESIDENT. Does the Senator from Louisiana yield further to the Senator from Oklahoma?

Mr. LONG. I yield.

Mr. THOMAS of Oklahoma. I suggest the absence of a quorum.

The VICE PRESIDENT. Does the Senator from Louisiana yield for that purpose?

Mr. LONG. I yield for that purpose.

Mr. GLASS. Has there been any business transacted since the last quorum call?

The VICE PRESIDENT. There has been a motion to lay on the table, which was carried, since the last roll call.

Mr. GLASS. Very well.

The VICE PRESIDENT. The Secretary will call the roll.

The legislative clerk called the roll, and the following Senators answered to their names:

Austin	Carey	Goldsborough	Lewis
Bailey	Connally	Gore	Long
Bankhead	Coolidge	Grammer	McGill
Barbour	Copeland	Hale	McKellar
Barkley	Costigan	Hastings	McNary
Bingham	Couzens	Hatfield	Moses
Black	Dale	Hayden	Nye
Blaine	Davis	Hebert	Oddie
Bratton	Dickinson	Howell	Patterson
Broussard	Dill	Hull	Pittman
Bulkley	Fess	Kean	Reed
Bulow	Frazier	Kendrick	Reynolds
Byrnes	George	Keyes	Robinson, Ark.
Capper	Glass	King	Robinson, Ind.

Russell	Swanson	Vandenberg	Watson
Schuyler	Thomas, Idaho	Wagner	White
Sheppard	Thomas, Okla.	Walcott	
Smith	Townsend	Walsh, Mass.	
Smoot	Trammell	Walsh, Mont.	

The VICE PRESIDENT. Seventy-three Senators have answered to their names. A quorum is present. The Senator from Louisiana has the floor.

Mr. LONG. How much time have I, Mr. President?

The VICE PRESIDENT. The Senator has seven minutes.

Mr. LONG. Mr. President, the Senator from Virginia [Mr. GLASS] has informed me that he will not object to my time being extended 15 minutes on this question. I ask unanimous consent that I may have 15 more minutes.

The VICE PRESIDENT. Is there objection to the time of the Senator from Louisiana being extended 15 minutes? The Chair hears none, and the Senator has 22 minutes left.

Mr. LONG. Mr. President, the discussion which I made for a few minutes on the power of Congress to fix the value of money was made at a time when some of the distinguished lawyers of the Senate were not here. Therefore, I shall very briefly allude to just what I said.

Up until 1920 there had not been any judgment by the Supreme Court of the United States on the questions of the power of Congress, or of the States, or of other authority, to regulate, overcome, and override a contract that might have been made.

Mr. THOMAS of Oklahoma. Mr. President, a parliamentary inquiry.

The VICE PRESIDENT. The Senator will state it.

Mr. THOMAS of Oklahoma. Has business been transacted since the last point of no quorum was made?

The VICE PRESIDENT. The Chair thinks not.

Mr. LONG. The only thing that was done was an extension of my time.

Mr. THOMAS of Oklahoma. A unanimous-consent agreement was had for an extension of time for the Senator from Louisiana.

The VICE PRESIDENT. The Chair does not consider that business within the rules. Unanimous consent was granted immediately after the roll was called. The Chair would hold that another request for a roll call at this time would not be in order.

Mr. LONG. I do not suppose——

The VICE PRESIDENT. The Senator from Oklahoma was asking a parliamentary question and has the floor.

Mr. LONG. I am talking now in my own right, Mr. President. I am not talking through the Senator from Oklahoma, but in my own right.

What I had said, Mr. President, was—this may sound a little bit shocking to the ears of some of our constitutional lawyers, but they will find it to be the law—that it does not make any difference what kind of a contract is entered into by a city, nor by a State, nor by the United States on rates, charges, or anything else. If the municipality has a right to regulate, it overcomes any right to make a contract, and the contractual regulations have to give way to the general power of regulation. If the State has the power to contract and to regulate, the contractual regulations have to give way to the regulations in the public interest; and the same thing is true with the Government.

The United States Government can not barter or give away in any respect or particular the right to regulate. The fact that for these many years the United States Government may not have exercised the right to regulate is of no importance whatever. The fact is that the United States has the right, at whatever time it sees fit, to regulate the currency and the value of the dollar of America.

For instance, when we created the Interstate Commerce Commission there were many, many outstanding contracts. There were contracts with agencies of a State; there were contracts with agencies of municipalities; there were contracts with agencies of the United States, providing for various and sundry rates and charges and service to be performed by common carriers of the United States.

There were contracts outstanding with private individuals providing for certain rates and certain services to be performed and rates to be charged for that service; yet the Congress of the United States created the Interstate Commerce Commission, and the Interstate Commerce Commission wiped out and set aside millions and millions of dollars' worth of contracts and regulations that were valued at 100 cents on the dollar until the power of Congress to regulate commerce spoke.

The same thing prevails on the money situation. The Senator from Wisconsin [Mr. BLAINE] has read an old decision back in 8 Wallace, before they ever heard of regulating. The power never had been invoked by Congress up until that time. Up until the San Antonio Street Railway case I might say that it was almost a dormant power of government, of which no authority had ever availed itself; and it probably never would have been availed of except that public necessity required that contracts be set aside in the greater public interest.

What was decided in the San Antonio Railway case?

In the San Antonio Railway case the city of San Antonio contracted with the San Antonio Street Railway Co. for a 5-cent fare. The time came when the San Antonio Street Railway Co. could not operate on a 5-cent fare, so the San Antonio Street Railway Co. went into the United States court and said, "We demand an increase in our rates because under the conditions now prevailing we are unable to operate and discharge our duty as a common carrier and have a fair return at a 5-cent fare."

What did the Supreme Court of the United States say? They did not say, "This contract, made between the city and the street-railway company, is binding." They said that the power to regulate can never be bartered away nor traded away; that wherever a contract is made, and the interest of the public requires that a regulation be imposed, the contract is not worth the paper it is written on.

What about the Goulds when they got all of these land grants all through the United States, and what about the other railroads when they were getting all these grants? Why, Mr. President, in contract after contract, many, many things were agreed upon by these railroads. In many instances they contracted with States. In other instances they contracted with private individuals. In some instances they contracted that their passengers would be hauled for not to exceed 2 or 3 cents a mile. They contracted for freight rates. They contracted for service free of charge to municipalities. Lo and behold! when the time came that the United States was called upon to exercise its arm of regulation, those contracts were swept aside because of the fact that the power to regulate had to be a reasonably exercised power, and therefore contracts made were of no value whatever, and they were swept aside.

To-day, Mr. President, the railroads all over the United States are charging 3.6 cents per mile passenger fare, notwithstanding the fact that innumerable contracts had been entered into that forbade them from charging more than 2 or 3 cents a mile, just as in the case of freight charges there were any number of private contracts prevailing at the time Congress created the Interstate Commerce Commission providing that they would charge a certain amount to haul a certain amount of goods a certain number of miles. Any number of contracts were in existence providing that electricity would be furnished at such and such a rate; and yet when the time came that these corporations wanted to say that they had contracted for those charges and for that service when the dollar was worth considerably more than at the time of going into court, and that they could no longer render such service because the dollar had been cheapened, the United States Supreme Court invoked its arm and said that inasmuch as the dollar had been cheapened, therefore the Government of the United States, acting through its various commissions, supervised by its courts, would increase the rate that was being charged and the price of the service that was being rendered to make up for the cheapening of the dollar.

Now we are told that since the price of the dollar has gone up we can not invoke the arm of the Federal Government to cheapen the price of the dollar, whereas the same arm of

the Government was invoked to make up for the price of the dollar when it had become cheapened. It is a ridiculous proposition to argue the contrary. They have gone into the courts of this country all over the land and have invoked the arm of the law, and they have been forward enough in providing legislation for whatever was necessary regardless of contracts that were outstanding. I have stated the law. There is no question about its being the law.

Now, just a word on the amendment of the Senator from New Jersey. I voted against an amendment like this yesterday, but I do not know whether I am going to vote against this amendment to-day or not. I am seriously considering changing my mind. I do not know but what I am going to follow the line of thought that has prevailed with the Senator from Virginia here to-day.

I want to say this, Mr. President, that I have gone all over this country criticizing Mr. Andrew W. Mellon's policy as Secretary of the Treasury of the United States. I have gone all over this country criticizing Mr. Ogden Mills and his policy as Secretary of the Treasury of the United States. But I want to say, with the limited lights that I have before me and behind me, that if there is any difference between the policy of the Senator from Virginia and that of Mr. Andrew W. Mellon and Mr. Ogden Mills, I have not lights enough to discern the difference.

I want to say further that I want to be honest and I want to be fair and I want to be right about this matter; and the day that the President elect of the United States, in the exercise of a greater wisdom than I have, sees fit to put the portfolio of the Treasury in the hands of my good friend the distinguished Senator from Virginia I will write a letter of public apology to Mr. Andrew W. Mellon and Mr. Ogden L. Mills and say to them:

"At last I have been unanimously proven wrong, because your twin-bed mate and disciple in policy for the operation of the Treasury of the United States has been appointed your successor."

Mr. GLASS. Mr. President, it may be that the Senator from Louisiana had better begin cogitating on the letter.

Mr. LONG. I will not have to dictate very long. I have already made the apology public. I will make it more public, Mr. President.

I want to say that I did not approve of Mr. Mellon's policy. However, probably I misunderstood a great deal, and I will yield to greater lights than my own. I will not censure the appointment of the Senator from Virginia. It would not do me any good; it might help beat the Democratic Party four years from now. But I will not censure it; I will not say a word about it. I will simply yield and recognize that I have been at fault in all that I have said about Mellon and about Mills.

I believe in being honest and being fair about these matters. I never made a political statement in my life in which I was shown to be at fault by subsequent events that I did not show absolute frankness and a willingness to apologize and correct my mistake, and when a greater authority has shown me my error in having disapproved of the conduct and course of action of Ogden L. Mills and Andrew W. Mellon, I will be frank enough and willing enough to say that a super and higher authority than I has proved to the world that I am wrong about it, and I will make proper amends to Mr. Mellon and to Mr. Mills.

In that connection we may go a little farther, as I said here the other day, in arguing out the question of bimetallism. It is said that silver is not a controlled product and, therefore, that there is danger of the world being flooded with it. I suggested, when there was a reference to bimetallism, that we make the second metal aluminum, instead of silver, and we might come through. I am not sure but what that might enter the minds of our administration, and I am sure that if it does it will have the careful thought and the wonderfully digested opinion the Senator from Virginia could give it, if it ever came under his surveillance.

Mr. President, how much time have I left?

The VICE PRESIDENT. The Senator has seven minutes more.

Mr. LONG. I have such a short time to discuss these important matters that I am hurrying over them. If in my hurry I fail to reason them out, the Chair and the Members of the Senate will understand the impossibility of my covering them as thoroughly as I would like to cover them.

Mr. President, I know very little about the money question. I have realized since this matter has been in the course of discussion that I know less than nothing about the finances of the United States. But I realize that probably I am no more ignorant on the money question than many other Members of the Senate who have studied it for many, many years. I realize that it is an involved, complicated question, that the banking and other questions that are similar and are collateral to it are not possible of easy understanding to one with the limited means of education which I have had. But while I am discussing that matter, while we are discussing all the bank matters—and the Senator from Virginia, in speaking of these little banks, calls them pawnshops—I want to say that the one thing I have been unable to direct the attention of the Senate to an understanding of has been this, that the civilization of this country has been built up through these unit institutions, that the entire progress this country has enjoyed was due to the unit institution, and that it is the unit of value, the unit of operation, the independence of action, that means the safeguard of our liberties, economically, industrially, and in every other respect.

The Senator from Nebraska touched upon the point to-day that is the fundamental, underlying issue, and that is this. I realize that our currency will be to some extent a corrective, but I realize further that the great overwhelming disaster with which this country has been met is the failure to keep our wealth distributed in the hands of our people. That is the one trouble to-day. We have not been able to get a revenue bill from the other side of the Chamber brought here at this session, but if one had been presented, I had proposed to tack on to that bill, if I had been supported by Members of the Senate, sufficient stipulations to provide that at the death of every man there should be such an inheritance tax levied upon his estate that no one child could inherit more than a few million dollars.

What would that mean? The World's Work estimated the fortune of Andrew W. Mellon at $8,000,000,000. It might have been less than that, it might have been more than that, but I just take that figure for the purpose of comparison. At the death of Mr. Andrew W. Mellon, if he died with a fortune of $8,000,000,000, according to my ideas, if he had as many as five children—I do not know how many children he has—each one of those children would inherit $5,000,000 apiece. Twenty-five million dollars would be inherited by his children. But $7,975,000,000 would go into the United States Treasury. That would never hurt anybody, because each one of those children would be able to start out life with $5,000,000, and it would give the Government of the United States $7,975,000,000.

I would not allow any child to inherit more than $5,000,000 when he had rendered no service whatever to anybody to warrant his receiving more than that. Unless we decide that we are not going to allow these huge fortunes to be pyramided and pyramided, the $8,000,000,000 fortune in the next generation will be a $16,000,000,000 fortune, and will continue growing until it has been destroyed by revolution. The only means by which we can avert such a calamity as the centralizing our wealth in the hands of a few people is by an inheritance tax, that will not allow the swollen fortune to grow through the next generation and accumulate.

Since 1916, when 2 per cent of the people owned 60 per cent of the wealth, we have allowed that condition to prevail, until to-day 1 per cent of the people own 60 per cent of the wealth and 60 per cent of the people in the United States do not own 3 per cent of the wealth. Three-fifths of our people, 60 per cent of our people, to-day do not own as much as they owe. We have allowed practically the entire wealth of this country to be concentrated into a few hands.

The VICE PRESIDENT. The question is on agreeing to the amendment offered by the senior Senator from New Jersey [Mr. KEAN].

Mr. KEAN. I suggest the absence of a quorum.

Mr. GLASS. Mr. President——

Mr. McNARY. Mr. President, a parliamentary inquiry.

Mr. GLASS. I have no objection to having a quorum. I want to state the purport of the amendment.

Mr. McNARY. A parliamentary inquiry.

The VICE PRESIDENT. The Senator will state the inquiry.

Mr. McNARY. The Senator from New Jersey has suggested the absence of a quorum.

The VICE PRESIDENT. The Senator from New Jersey was not recognized for that purpose.

Mr. McNARY. If I am recognized, I suggest the absence of a quorum.

The VICE PRESIDENT. The Senator can not rise for one purpose and suggest something else; but the Chair will recognize the Senator if he desires to raise the point of no quorum.

Mr. McNARY. I raise the point of no quorum.

The VICE PRESIDENT. The clerk will call the roll.

The legislative clerk called the roll, and the following Senators answered to their names:

Austin	Dale	Kendrick	Schuyler
Bailey	Davis	Keyes	Sheppard
Bankhead	Dickinson	King	Smith
Barbour	Dill	Lewis	Smoot
Barkley	Fess	Long	Steiwer
Bingham	Frazier	McGill	Swanson
Blaine	George	McKellar	Thomas, Idaho
Bratton	Glass	McNary	Thomas, Okla.
Broussard	Goldsborough	Metcalf	Townsend
Bulkley	Gore	Moses	Trammell
Bulow	Grammer	Nye	Vandenberg
Byrnes	Hale	Oddie	Wagner
Capper	Hastings	Patterson	Walcott
Carey	Hatfield	Pittman	Walsh, Mont.
Connally	Hayden	Reed	Watson
Coolidge	Hebert	Reynolds	White
Copeland	Howell	Robinson, Ark.	
Costigan	Hull	Robinson, Ind.	
Couzens	Kean	Russell	

The VICE PRESIDENT. Seventy-three Senators having answered to their names, a quorum is present.

Mr. GLASS. Mr. President, I would like to state briefly the objection to the amendment proposed by the Senator from New Jersey [Mr. KEAN]. He wants to exempt all the member banks of the Federal reserve system from this inconsequential assessment for the capital stock of the liquidating corporation which is being set up for the advantage of the depositors in these banks. He suggests the extraordinary theory that all of this capital should be supplied by the Federal reserve banks for the reason that the Federal reserve banks will have supervision of the liquidating corporation and that the member banks have no control.

But, Mr. President, the member banks have almost complete control of the Federal reserve banks themselves. Nine men constitute the boards of directors of the Federal reserve banks, and two-thirds of those men are selected by the member banks themselves; in other words, six of the nine members on each Federal reserve bank board are selected by the member banks themselves, and but three members are selected by the Federal Reserve Board as representatives of governmental and other interests. Therefore the member banks have complete control of the Federal reserve banks themselves and can manage them according to their best fiscal judgment.

Moreover, for years and years the Congress has been importuned by member banks of the Federal reserve system to increase the dividend allowance of the statute to member banks. They have insisted over and over again, and to-day are insisting that they should receive a larger dividend than a cumulative 6 per cent. It was the idea of your subcommittee and of the general Committee on Banking and Currency that this provision for a liquidating corporation would be to the member banks perhaps the most attractive provision of the whole bill, because it would assure their depositors that in the event of a failure they would be promptly taken care of and not be required to go over a prolonged period of deprivation in the settlement of the affairs of the bank by a receiver. It was conceived that the earning capacity of the liquidating corporation would be such as to enable it to make a material contribution in dividends to the member banks, and thus in that way and in that measure satisfy the repeated demands of the member banks for a larger dividend out of the earnings of the Federal reserve banks.

Therefore, your committee, both the subcommittee and the general Banking and Currency Committee, thought it was a very inviting provision of the bill. The assessment against the member banks is inappreciable, one-quarter of 1 per cent upon their deposits, one half of which is to be callable in 90 days and the other half perhaps never to be called; so that in the last analysis it amounts to an inconsequential assessment of one-eighth of 1 per cent upon the deposits of member banks contributing to a liquidating corporation that gives assurance to their depositors.

Therefore I hope very earnestly that the Senate will vote down the amendment of the Senator from New Jersey.

Mr. KEAN. Mr. President, the Federal Reserve Board is organized and located, of course, here in the city of Washington. Next they have members who are dictated by the Government, and next they have the banks divided according to their capital. Those banks elect different members from different trades as members of the board. The member banks have very little to say. While it is true that they vote their stock, yet word is usually sent around that so-and-so has been nominated and they have very little to say about who shall be the governors of the Federal reserve banks.

In addition to that the Federal reserve banks have made large sums of money year by year. They have under them examiners. They have all the information as to how the different banks are doing, while the member banks have no such information. Therefore the member banks are charged and taxed without their will. It does not make any difference how much the amount may be, if they are taxed against their will to put this money into the liquidating corporation, I say that the Federal reserve banks ought to be the ones having all the information, being in a position to watch the banks, being in a position to know exactly what their assets are. They ought to be the ones to pay in the money rather than the member banks.

Mr. GLASS. Mr. President, the Senator from New Jersey talks about the Federal reserve banks making money—to do what with it?

Mr. KEAN. To build marble castles in almost every town where they are located.

Mr. GLASS. That has nothing to do with it. They have good bank buildings, yes; but the earnings of the Federal reserve banks, we all should understand, are appropriated to the uses of the member banks. Every dollar of the surplus of any Federal reserve bank is devoted to the accommodation of the member banks when they want to rediscount.

The VICE PRESIDENT. The question is on the amendment of the Senator from New Jersey.

Mr. KEAN. I call for the yeas and nays.

Mr. METCALF. Mr. President, I wish merely to read a memorandum from the American Bankers' Association with reference to liquidating corporations:

First, with regard to the liquidating corporation (sec. 12 B, par. e) we believe that it is practically the unanimous judgment of bankers that the purposes of this bill would be better accomplished by omitting any contribution to the capital stock on the part of member banks. We feel that it is an unsound principle to call upon banks to contribute to the liquidating corporation directly. If the Congress were to require banks to contribute even a small amount for such a purpose, it would open the door, both in the national and State legislatures, to much larger contributions of the same sort and would be a direct step in the direction of guaranteeing bank deposits, which has proved unsound in practice wherever it has been tried.

Even if this fundamental and vital principle were not generally accepted, we call attention to the special circumstances existing at this time where many banks throughout the country are in a frozen condition, so that they could not make contributions to the liquidating corporation out of their capital stock and certainly could not be expected to make the contribution out of their depositors' money. Every effort is being made by the Government,

in cooperation with the strong banks in the various communities throughout the Nation, to strengthen the present situation and to obviate a recurrence of the unsettlement which existed to such a tragic extent a few months ago. To pass a law calling upon several thousand banks to make a contribution which they can not make would involve a very grave danger by stirring up a situation which is now under reasonable control. The amount involved is small. But the danger is great. By unanimous vote the Federal Reserve Board has recommended that it be eliminated from the section referred to, and we believe that the committee would be very wise to give most careful attention to this recommendation.

Mr. President, I hope that this advice from the American Bankers' Association will be carefully considered by Senators when they vote.

Mr. GLASS. Mr. President, of course, all banks want to be relieved of assessments, just as all taxpayers would like to be relieved of all taxes for the support of their Government. But this proposed liquidating corporation is an institution——

Mr. KEAN. Mr. President, will the Senator yield?

Mr. GLASS. I yield.

Mr. KEAN. When the board of governors of the Federal reserve banks are willing to assume this expense it does not seem to me that all the banks wish to be relieved from it.

Mr. GLASS. Yes; all banks that pay their proportion, because the liquidating corporation is to take care of their depositors in the event of failure, and they ought to contribute to the capital stock.

The VICE PRESIDENT. Is there a second to the demand for the yeas and nays?

The yeas and nays were ordered, and the legislative clerk proceeded to call the roll.

Mr. DAVIS (when his name was called). I have a general pair with the junior Senator from Kentucky [Mr. LOGAN]. Not knowing how he would vote, I transfer that pair to the junior Senator from Maryland [Mr. GOLDSBOROUGH] and will vote. I vote "yea."

Mr. HEBERT (when his name was called). I have a general pair with the Senator from West Virginia [Mr. NEELY]. Not knowing how he would vote, I withhold my vote.

Mr. KING (when his name was called). I have a general pair with the junior Senator from California [Mr. SHORTRIDGE]. Not knowing how he would vote, I withhold my vote. If permitted to vote, I should vote "nay."

Mr. ROBINSON of Indiana (when his name was called). I have a general pair with the junior Senator from Mississippi [Mr. STEPHENS]. In his absence, not knowing how he would vote, I withhold my vote.

Mr. SWANSON (when his name was called). I have a general pair with the senior Senator from Illinois [Mr. GLENN]. I transfer that pair to the Senator from Arizona [Mr. ASHURST], and will vote. I vote "nay."

Mr. FESS. I wish to announce the following general pairs:

The Senator from Minnesota [Mr. SHIPSTEAD] with the Senator from Maryland [Mr. TYDINGS];

The Senator from Minnesota [Mr. SCHALL] with the Senator from Arkansas [Mrs. CARAWAY];

The Senator from Iowa [Mr. BROOKHART] with the Senator from Missouri [Mr. HAWES]; and

The Senator from Nebraska [Mr. NORRIS] with the Senator from Mississippi [Mr. HARRISON].

Mr. SHEPPARD. I desire to announce that the Senator from Mississippi [Mr. HARRISON] is necessarily absent. If present, he would vote "nay."

The result was announced—yeas 25, nays, 43, as follows:

YEAS—25

Austin	Dickinson	McNary	Steiwer
Barbour	Frazier	Metcalf	Thomas, Idaho
Bingham	Hale	Moses	Watson
Capper	Hastings	Oddie	White
Carey	Hatfield	Patterson	
Dale	Kean	Reed	
Davis	Keyes	Schuyler	

NAYS—43

Bailey	Bulkley	Costigan	Glass
Barkley	Bulow	Couzens	Gore
Black	Byrnes	Dill	Grammer
Bratton	Connally	Fess	Hayden
Broussard	Copeland	George	Howell
Hull	Norbeck	Sheppard	Trammell
Kendrick	Nye	Smith	Vandenberg
Lewis	Pittman	Smoot	Wagner
Long	Reynolds	Swanson	Walcott
McGill	Robinson, Ark.	Thomas, Okla.	Walsh, Mont.
McKellar	Russell	Townsend	

NOT VOTING—28

Ashurst	Cutting	Johnson	Schall
Bankhead	Fletcher	King	Shipstead
Blaine	Glenn	La Follette	Shortridge
Borah	Goldsborough	Logan	Stephens
Brookhart	Harrison	Neely	Tydings
Caraway	Hawes	Norris	Walsh, Mass.
Coolidge	Hebert	Robinson, Ind.	Wheeler

So Mr. KEAN's amendment was rejected.

Mr. WALSH of Montana. I sent to the desk a few days ago an amendment to come in at page 36. I ask that it may be stated.

The VICE PRESIDENT. Let the amendment be stated.

The LEGISLATIVE CLERK. On page 36, in line 6, it is proposed to strike out the word "general."

Mr. WALSH of Montana. Mr. President, I understand the Senator from Virginia is not quite through with the feature of the bill to which prior amendments have been directed. I therefore withdraw my amendment for the time being.

The VICE PRESIDENT. The Senator from Montana withdraws his amendment.

Mr. GLASS. Mr. President, I do not know of any other amendment to the provision relating to the liquidating corporation. There may be one——

Mr. LONG. I have one, Mr. President, which is at the desk.

Mr. GLASS. Very well, I hope we may consider it right away.

Mr. LONG. I would rather consider the amendment of the Senator from Montana, but I am willing to offer my amendment if that is more satisfactory to the Senator from Virginia.

Mr. GLASS. The amendment of the Senator from Montana is unobjectionable.

Mr. LONG. Then I will offer mine.

The VICE PRESIDENT. The Senator from Louisiana offers an amendment, which will be stated.

Mr. METCALF. Mr. President, will the Senator from Louisiana yield to me?

Mr. LONG. I yield to the Senator from Rhode Island if I can do him any favor thereby.

Mr. METCALF. I merely wish to offer another amendment on the same subject we have been considering.

Mr. LONG. Then I withdraw my amendment temporarily to allow the Senator from Rhode Island to offer his amendment.

Mr. METCALF. I do not think it will take any time.

The VICE PRESIDENT. The Senator from Louisiana withdraws his amendment, and the Senator from Rhode Island is recognized.

Mr. METCALF. I offer the amendment which I send to the desk.

The VICE PRESIDENT. The amendment will be stated.

The CHIEF CLERK. On page 17, in line 7, it is proposed to strike out "one-fourth" and to insert in lieu thereof "one-eighth," and also on page 17, line 15, to strike out "one-fourth" and to insert in lieu thereof "one-eighth."

The VICE PRESIDENT. The question is on agreeing to the amendment offered by the Senator from Rhode Island.

Mr. METCALF. Mr. President, I merely wish to make it as easy as possible for the small banks. The amendment, if agreed to, will accomplish that purpose, and I hope the Senator from Virginia will agree to it. I think with a one-eighth subscription there will be enough money in the corporation to do all that the Senator from Virginia hopes it will do.

Mr. GLASS. I will say to the Senator that the assessment is inappreciable, and we have no idea that the second call will ever be required, so that really, in fact, the call will be one-eighth; but I think as a precaution it ought to be one-fourth of 1 per cent as now required by the bill, and I hope the Senator will not press the amendment.

Mr. METCALF. I will withdraw the amendment with that understanding, and I thank the Senator.

The VICE PRESIDENT. The Senator from Rhode Island withdraws his amendment.

Mr. WALSH of Montana. Mr. President, the amendment tendered by me simply applies to the word "general" in line 6, page 36. I understand the Senator from Virginia to say that there is no objection to it, but I desire to call his attention in this connection, and that of the Senator from Michigan, who exhibited some interest in this matter, to this feature of the bill.

It was the purpose of the drafters of this bill, as I take it, to prohibit the national banks from dealing in securities that could not be very readily convertible and that would be likely to be frozen in their hands. The bill provides that—

The limitations herein contained as to investment securities shall not apply to * * * general obligations of any State or of any political subdivision thereof.

The Senator from Michigan [Mr. COUZENS] conceived the idea that if the word "general" were eliminated, then obligations of improvement districts would be available for purchase by the national banks. I call attention to the fact that whether the word "general" is in the bill or is not in the bill securities of that kind would be eligible for purchase. As I understand the matter, it is not the intention of the Senator from Virginia or any of those interested in the passage of the bill that such securities should be eligible for purchase. But observe, Mr. President, it provides that the eligible securities shall include—

obligations of any State or of any political subdivision thereof.

An improvement district is a political subdivision of a State, and ordinarily it has only one class of securities outstanding, which, of course, would be general obligations, so that they would become eligible under this provision. If they were to be excluded, as I think they ought to be excluded, some additional language ought to be incorporated, and at the request of the Senator from Michigan I have suggested that there be included the following:

After the word "thereof," as it appears in line 7, on page 36, the following might be inserted to reach that end:

"Not including, however, obligations of improvement districts and other districts of like character payable out of taxes imposed upon the property within such district presumably to be benefited by the work for the prosecution of which such obligations were issued."

Some such language as that will be necessary to exclude obligations of that character, in my judgment.

The Supreme Court of the United States has held that an improvement district is a political subdivision of the State, and, accordingly, if the language is left as it is, the securities of such district would be eligible for purchase.

Mr. GLASS. Mr. President, is the Senator under the impression that what we are trying to do here is to exclude obligations of the United States, general obligations of States, or political subdivisions thereof?

Mr. WALSH of Montana. No; my understanding is that you desire to make those eligible.

Mr. GLASS. Yes.

Mr. WALSH of Montana. But the point I am making is that under this language you make the obligations of general improvement districts, sewer districts, and parking districts eligible.

Mr. GLASS. No; we had not intended to do that.

Mr. WALSH of Montana. That was my understanding; but I say to the Senator that I am perfectly satisfied that with the language you have here, such obligations are eligible.

Mr. GLASS. I shall be very glad, so far as I am concerned, to accept the amendment.

Mr. COPELAND. Mr. President——

The VICE PRESIDENT. Does the Senator from Montana yield to the Senator from New York?

Mr. WALSH of Montana. I yield to the Senator from New York.

Mr. COPELAND. Do I understand that the Senator from Montana is proposing two amendments—first to strike out the word "general" on line 6, and then to add certain language?

Mr. WALSH of Montana. I have done that at the suggestion of the Senator from Michigan [Mr. COUZENS].

Mr. COPELAND. I am very much in favor of the first amendment. We discussed it the other day. I think that word certainly ought to come out. I am not so sure about the language proposed in the second amendment. That would have no relation, I should assume, to any activity within a city.

Mr. WALSH of Montana. Of course, many cities—indeed, practically all cities—create improvement districts of one kind or another; and it was the contention, in the discussion of the subject the other day, that those ought not to be made eligible for purchase.

Mr. COPELAND. I should like to inquire from the Senator—I am sorry one of the Senators from Illinois is not here—what would happen to the Drainage District in Chicago?

Mr. WALSH of Montana. The obligations of the drainage district would not be eligible.

Mr. GLASS. Those obligations are eligible for purchase by the Federal reserve banks in open-market transactions, but they ought not to crowd up the portfolios of member banks.

Mr. COPELAND. Mr. President, I think we might well accept the first amendment offered by the Senator from Montana.

Mr. GLASS. I feel at liberty to accept that, and have accepted it.

Mr. WALSH of Montana. Let me ask, then, that that amendment be passed on.

Mr. COUZENS. Mr. President, I should object to the elimination of the word "general" unless the amendment proposed by the Senator from Montana were accepted or agreed to. In other words, eliminating the word "general" would require or permit the members of the Federal Reserve System to take these local and special assessment district bonds which would be payable only out of the revenues of that specific district.

Many millions of bonds issued under these special districts are now in default, because the revenue is derived solely from the taxes on the specific property. That property may be made up entirely of vacant subdivisions, from which no revenue could be obtained unless the property were sold. It is quite probable that these districts, not being able to sell the real estate, would not be able to pay the special-assessment bonds; and I think the Federal reserve banks should not be loaded up with those securities.

Mr. WALSH of Montana. I think, perhaps, the Senator was not in the chamber when I addressed myself to this subject originally. I am calling attention to the fact that whether the word "general" is in there or is not in there does not in any wise, whatever, affect the matter of the eligibility of the securities the Senator has in mind.

Mr. COUZENS. May I ask the Senator at this point whether those special-assessment district bonds would not be eligible if the word "general" were taken out?

Mr. WALSH of Montana. No. They will be eligible, under the language of the bill, whether the word "general" is in there or is not in there.

Let us suppose that it is taken out. You have, then, "the obligations of any State or of any political subdivision thereof," which would include the improvement district. Leave it in, and you have "the general obligations of any State or of any political subdivision thereof"; and as an improvement district is a political subdivision, you then make eligible the general obligations of the improvement district, and ordinarily they have only one class of obligations.

So that the word "general" does not in any wise affect that question. That question is controlled by the language "or of any political subdivision thereof." So that the two are unrelated. The word "general" put in there applies to the obligations of the State, so that special obligations of the

State would not be eligible; but when you come to the matter of the political subdivisions, the general obligations of every political subdivision become eligible; and an improvement district, under the decisions of the Supreme Court of the United States, is a political subdivision.

Mr. LONG. Mr. President, will the Senator yield?

The VICE PRESIDENT. Does the Senator from Michigan yield to the Senator from Louisiana?

Mr. COUZENS. I do.

Mr. LONG. What was the suggested amendment?

Mr. WALSH of Montana. I suggested, in order to meet the views expressed by the Senator from Michigan, the incorporation after the word "thereof" of the following:

not including, however, the obligations of improvement districts and other districts of like character payable out of taxes imposed upon the property within such districts presumably to be benefited by the work for the prosecution of which such obligations were issued.

Mr. LONG. That is just what I am hoping the Senator will not offer. That is exactly what we are trying to keep out of the bill. If the word "general" is stricken out, I think that clears up the objection; but certainly the officers of these banks are to be presumed to have some reasonable intellect; and certainly if this is a public bond, whether it is of an improvement district or a drainage district or a sewerage district or what it is, ninety-nine times out of one hundred they are paid. There are a few of them that are in default to-day, but that is not a bad thing.

Mr. BARKLEY. Mr. President, will the Senator yield?

Mr. LEWIS. Mr. President——

The VICE PRESIDENT. The Senator from Louisiana has the floor. Does he yield, and to whom?

Mr. LONG. I yield to the Senator from Kentucky. Then I will yield to the Senator from Illinois.

Mr. BARKLEY. Are these the same drainage-district bonds that are covered in a bill which is now pending in both Houses of Congress, providing that the Government shall take them over?

Mr. LONG. I do not know whether they are or not.

Mr. BARKLEY. There is a bill pending in the Senate and in the House, and I think it passed the Senate once, providing that out of the Treasury of the United States these drainage-district bonds shall be taken up. I do not know whether they are the kind of bonds that it is proposed to make eligible for rediscount or not. Certainly, they have not been paid; the interest on them has not been paid; and that is one reason why the holders want the United States Treasury to step in and relieve them.

Mr. COPELAND. Mr. President, a parliamentary inquiry.

Mr. LONG. There are some of those bonds——

The VICE PRESIDENT. The Senator from Louisiana will suspend a moment. The Senator from New York rises to a parliamentary inquiry.

Mr. COPELAND. I wish to know the situation. Was the first amendment of the Senator from Montana accepted by the Senate?

The VICE PRESIDENT. It was not. It was proposed, and is now being debated.

Mr. COPELAND. As I understand, the Senator from Montana desired to couple the two amendments—to strike out the word "general," and then to add the language stated by him. Do I correctly understand it?

Mr. WALSH of Montana. No; I have submitted the two separately.

The VICE PRESIDENT. They are separate amendments.

Mr. WALSH of Montana. I should like to ask for a vote on the first amendment.

Mr. GLASS. Mr. President——

The VICE PRESIDENT. The Senator from Louisiana has the floor.

Mr. LONG. I promised to yield to the Senator from Illinois [Mr. LEWIS]. Then I will yield to the Senator from Virginia.

Mr. LEWIS. Mr. President, at this point I desire to interrogate the Senator from Montana. May I ask the Senator from Montana whether the provisions to which he has been making allusion affect the possibility of what is known as the Sanitary District of Chicago floating its bonds and presenting its bonds as an institution; also the Board of Education of the city of Chicago as a municipal corporation? Does the Senator's provision prevent those two institutions from having their bonds taken up by the bank as security?

Mr. WALSH of Montana. Neither of them, in my judgment, would affect the Sanitary District bonds. As to the Board of Education bonds, if the word "general" were left in, I dare say it would affect the eligibility of those bonds. I am asking that that word be stricken out. The other provision, which I have suggested simply upon the initiative of the Senator from Michigan [Mr. COUZENS], in my judgment would make ineligible the Sanitary District bonds.

Mr. LEWIS. Since the Senator from Louisiana has kindly yielded, may I ask the Senator from Montana whether I gather, then, that under this language the Sanitary District bonds, however well secured they may be in property, could not be floated in one of these banks?

Mr. WALSH of Montana. They would be ineligible for purchase by the banks.

Mr. LONG. That, Mr. President, is the very thing we were undertaking to avoid.

Mr. GLASS. Mr. President——

The VICE PRESIDENT. Does the Senator from Louisiana yield to the Senator from Virginia?

Mr. LONG. I yield to the Senator from Virginia.

Mr. GLASS. If I may intervene there with just one remark; your committee did not discuss this legal refinement which seems to have been brought to the attention of the Senate by the use of the words "general obligations of any State," for the simple reason that that has been the law for years. We have made no alteration in the existing statute. This is a proposed amendment to section 5136 of the Revised Statutes, putting some limitations upon what national banks could do; but we have not changed in any particular that language. It is in the text of existing law—"general obligations of any State or of any political subdivision thereof." So, being a layman and not a lawyer, I can not comprehend just how it may be contended that what has been the law all these years, part of the national bank act, now affects the limitations that we propose on this bill.

Mr. WALSH of Montana. Mr. President——

Mr. LONG. I yield to the Senator from Montana.

Mr. WALSH of Montana. I shall be very glad, by a specific instance I have in mind, to indicate the importance of this word "general" in the law, whether it is new or whether it is old.

The State of Montana issues certain general obligations. That is to say, it incurs indebtedness for the general running expenses of the State government. Those are regular bonds of the State, payable out of all of the revenues of the State. Those are its general obligations. However, by its authority the State highway commission issues debentures, secured by the gasoline tax of 5 cents a gallon. That easily takes care of the interest upon these bonds, and provision is made for the retirement of them. The bonds are secured by that tax, and the law fixing the tax is irrevocable during the existence of the bonds.

Those are not general obligations of the State. They are special obligations; but they are obligations of just as high character, so far as their value and responsibility are concerned, as any of the obligations of the State. They are issued under the provisions of the following section of the law:

The issue and sale of said debentures shall constitute an irrevocable contract between the State of Montana and the owner of any of said debentures that the excise or license tax on gasoline or motor fuels or dealers or distributors therein, as provided in this act, or in any of the other laws of the State of Montana, shall not be reduced so long as any of said debentures remain outstanding and unpaid, and that the State of Montana will cause such taxes to be promptly collected, and after the payment of drawbacks or refunds, that the State treasurer shall set aside from the said proceeds of said license taxes, into a fund to be known as the State highway treasury debenture redemption fund, a sufficient amount of money each month to provide for the payment of the interest accruing each respective month, and during the 12 months

next preceding the maturity of said debentures he shall set aside in such fund from said proceeds sufficient money to provide for the payment of the principal maturing at the end of that year. The said license or excise taxes upon gasoline or motor fuels and dealers and distributors therein as herein provided, shall be irrepealable until all of said debentures and the interest to accrue thereon shall have been fully paid, and all of said debentures and the interest thereon shall be paid from the proceeds of said excise taxes: *Provided*, That nothing in this act shall prevent the reduction of such excise taxes when sufficient moneys to pay the principal and accrued interest on all of said debentures have been set aside in said States highway treasury debenture redemption fund.

So that the securities are perfectly sound. The interest upon the obligations will be promptly met, and the obligations themselves discharged from this tax.

The State is not generally obligated; that is to say, it does not undertake to pay these bonds out of its general revenues at all, but only out of the revenues coming into this particular fund. So, Mr. President, it being desirable, as a matter of course, to sell those bonds to banks which are quite willing to take them, I should dislike very much indeed to have this measure pass with that language in it.

Mr. LEWIS. Mr. President——

The PRESIDING OFFICER. Does the Senator from Louisiana yield?

Mr. LONG. I yield to the Senator from Illinois.

Mr. LEWIS. Mr. President, may I ask the Senator from Montana to contemplate the following situation? The general bonds of the sanitary district, it is well known here, were issued within its power and upon its properties. The Supreme Court of the United States having made a decision in a case in which I participated without success—the court decided that the city of Chicago should build an electric plant, which should meet the conditions and avoid draining such an amount of water from the lake as to interfere with the navigation of the States complaining, to wit, Wisconsin, Ohio, and others.

Assume the drainage district of Chicago issued specific bonds for the purpose of raising the money to comply with the decision of the Supreme Court. In this construction which I have described, could those bonds be floated in this bank under this provision?

Mr. WALSH of Montana. Under the bill as it reads, in my judgment, they could be.

Mr. LEWIS. Then I have no further comment with which to disturb the Senator.

Mr. LONG. That is not affected by striking out the word "general"?

Mr. WALSH of Montana. No. I have tried to explain that whether the word "general" is in or is out, that situation is not affected.

Mr. LONG. I did not thoroughly understand that.

Mr. President, the Senator from Virginia has said that this is already covered in the Federal reserve act.

Mr. GLASS. No; in the national banking act.

Mr. LONG. In the national banking act. The fact is that in the pending bill the Senator is striking out affiliates. Heretofore these bonds have been marketed through the banks largely, or to a considerable extent, through their affiliates. I know in our section of the country all these banks usually have their affiliates, and they bid on all bonds. They bid on the drainage bonds, they bid on the school district bonds, they bid on the highway bonds; and if, as the Senator from Montana suggests, we pass this bill to-day and include in it the provision of the Senator from Virginia, which would strike out the affiliates, there would be no place where the public could market its bonds.

I am not unmindful of the fact that there may be once in a while some kind of a special municipal security which may not be so very good. There are some in default. But that is going to happen with anything. There is not a very big chance that that is going to happen very frequently. There may now and then be some drainage bond that is not so good. However, these bankers are supposed to look into that fact also. There is not a chance for spoliation or for speculation in buying municipal bonds. The bankers are placed on their guard to find out what revenue there will be with which the bonds will be discharged at maturity and the interest paid. They understand all that when they buy them. But if language is placed in the bill providing that these special improvements have to be bid on only by private investment houses, that will practically close the door to the possibility of the banks of the country bidding on municipal securities.

Mr. BULKLEY. Mr. President——

The PRESIDING OFFICER (Mr. BINGHAM in the chair). Does the Senator from Louisiana yield to the Senator from Ohio?

Mr. LONG. I yield.

Mr. BULKLEY. I think the Senator from Louisiana is right in stating that whereas the exceptions from the limitation are the same as in the existing law, the limitation proposed is itself more severe, and consequently there is some reason for omitting the word "general" in stating the exceptions.

Mr. GLASS. I have already said that I am perfectly willing to do that.

Mr. LONG. We are agreed on that; but how about the second amendment proposed by the Senator from Montana? Let us adopt the amendment striking out the word "general" and then settle the other one. There have to be two amendments, anyway, as I understand.

The PRESIDING OFFICER. The question is on agreeing to the first amendment offered by the Senator from Montana.

The amendment was agreed to.

The PRESIDING OFFICER. The Chair understands the Senator from Montana to offer a second amendment.

Mr. WALSH of Montana. Mr. President, I do not offer this. I drew this amendment as an accommodation to the Senator from Michigan [Mr. COUZENS].

Mr. LONG. Mr. President, I hope I can prevail upon the Senator not to offer that.

Mr. COUZENS. Mr. President, I think that under the circumstances, with my knowledge of the situation, I shall have to offer it, whether the Senate agrees to it or not.

I offer this amendment, which was drafted by the Senator from Montana at my suggestion.

Mr. LEWIS. Let it be reported.

The PRESIDING OFFICER. The clerk will read the amendment.

The LEGISLATIVE CLERK. On page 36, line 7, after the word "thereof," the Senator from Michigan proposes to insert the following: "not including, however, the obligations of improvement districts and other districts of like character payable out of taxes imposed upon the property within such districts presumably to be benefited by the work for the prosecution of which such obligations were issued."

Mr. WALSH of Montana. Mr. President, will the Senator yield to me.

Mr. COUZENS. I yield.

Mr. WALSH of Montana. That amendment ought to be included in brackets, to show that it is a qualification of what goes before.

Mr. COUZENS. Mr. President, when the Senator from Montana offered his amendment to strike out the word "general," we had considerable discussion among ourselves as to the effect of the elimination of the word "general." I pointed out to him that in many cities territory outside of the city limits is brought into the city, and immediately there is a demand upon the board of aldermen, or upon the council, to put in streets, pavements, sidewalks, and sewers. The council will say, "If you want to pay for these things, all right, but we are not going to make them a general obligation of the city. We will set aside a special district that will benefit by these improvements. We expect that particular district to pay for the issuance of these securities. We will not make the property of the city liable for that special-assessment district."

Mr. President, in many cases there is no possibility of collecting revenue, because it depends upon whether the property is salable. If the property of the subdivision happens to be salable, they probably might collect the assessments. If the real-estate development is not sold, there is no revenue to pay these taxes. I think it is unwise that the

Federal reserve banks should be encouraged in buying that sort of security.

The amendment proposed, which was drafted by the Senator from Montana, specifically provides that the only bonds to be exempted are the ones which are issued in a district where the benefits are presumably for that specific district, and therefore they are in no sense general obligations of the political subdivision which authorizes the issuance of the securities. For protection against floating that sort of securities—and there are millions and millions in default to-day for the very reasons I have pointed out—I think this provision ought to be put into the bill.

Mr. COPELAND. Mr. President, the Senator would not see any objection to the sanitary-district bonds; that would be entirely different from a subdivision such as the Senator speaks of?

Mr. COUZENS. Entirely. While on that point, I desire to ask the Senator from Illinois from what source does the sanitary district get its revenues to pay the sanitary-district bonds?

Mr. LEWIS. Mr. President, it has a very large lighting plant, from which there is much rent, and also they have much material to sell as a result of excavating. So they are always able to get an income that equals their interest. Lately they have had difficulty because financial conditions and things which have transpired at Chicago have made it impossible to sell their bonds.

Mr. COUZENS. Is there any assessment in the sanitary district on the real estate to pay the securities?

Mr. LEWIS. There is no assessment that is levied upon the real estate. They rent. They have large real estate; but if these rentals are withdrawn, I am unaware of any assessments that are levied on the real estate to meet any indebtedness.

Mr. COUZENS. What does the sanitary district cover; what area?

Mr. LEWIS. All of Chicago and much of the county of Cook besides.

Mr. COUZENS. It seems to me, in view of that explanation of the Senator from Illinois, this amendment would not include the kind of case he has reference to at all. The sanitary-district bonds are not issued, presumably, as we have written into this amendment, for the specific benefit of the particular sanitary district. That is the reason why we have that placed in there.

Mr. SMOOT. Mr. President, I want to call the Senator's attention to Order of Business No. 202, Senate bill 1856, introduced by the senior Senator from Illinois [Mr. GLENN].

Mr. COUZENS. I have it in my hand.

Mr. SMOOT. If that bill became a law, would it cover the situation at the present time to which the Senator has reference?

Mr. LEWIS. That bill was introduced by my colleague?

Mr. SMOOT. It was. It is on the calendar, a bill to provide for the relief of farmers in any State by the making of loans to drainage districts, levee districts, levee and drainage districts, irrigation, and/or similar districts other than Federal reclamation projects, or to counties, boards of supervisors, and/or other political subdivisions and legal entities, and for other purposes.

That was introduced by the Senator's colleague and was referred to the Committee on Irrigation and Reclamation. It was reported with an amendment on February 8, 1932.

Mr. COUZENS. That was a year ago, and the bill has never been permitted to pass this body.

This is not the kind of case to which I had particular reference. But in the cases of these districts referred to in the bill mentioned by the Senator from Utah, where the improvement was presumably for that specific district, they should not be eligible for loans at the Federal reserve banks. In other words they are highly speculative, and hundreds and millions are in default.

Mr. SMOOT. I agree with the Senator thoroughly, and I was wondering whether the Senator thought this bill should pass the Senate. Personally, I am opposed to the bill.

Mr. ROBINSON of Arkansas. Mr. President, will the Senator from Michigan yield to me?

Mr. COUZENS. I yield.

Mr. ROBINSON of Arkansas. The bill to which the Senator from Utah refers did pass the Senate. I myself called it up and secured its passage during a former session.

Mr. LONG. Mr. President, to what was the Senator from Arkansas referring?

Mr. ROBINSON of Arkansas. It is what is known as the Glenn-Smith bill.

Mr. LONG. Taking up the drainage bonds?

Mr. ROBINSON of Arkansas. Yes.

Mr. LONG. Then that eliminates the danger particularly as to drainage bonds about which the Senator from Michigan talks. I have just succeeded in getting a copy of the proposed amendment in the form in which it was offered. I want to read this, and I hope Senators will listen a little more carefully to the language than we ordinarily listen. It reads in this way:

> Not including, however, the obligations of improvement districts and other districts of like character payable out of taxes imposed upon the property within such districts presumably to be benefited by the work for the prosecution of which such obligations were issued.

That language simply means that any special district created to be improved, whether subway, airport, drainage district, or anything of the kind, can not have its bonds floated through the Federal reserve banks. There are any number of them financed that way to-day. It may be it is through the affiliates, but I know there are any number of them, particularly drainage bonds, to which the Senator from Michigan refers. I do not care what State we may take. Some of us may not call to mind any one of them, but I do not know of any State that is not to-day financing some of these projects through the banks. I am not familiar with the State of New York, but I would have no hesitancy in saying that we could find 100 or more of them to-day that would be excluded under this provision.

If we are going to strike out the affiliates, here is what we will do: We will say to the governmental districts of the States and of the cities that they can not be financed through the banks but they will have to be financed entirely through private investment houses.

Mr. WAGNER. Mr. President——

The PRESIDING OFFICER. Does the Senator from Louisiana yield to the Senator from New York?

Mr. LONG. I yield.

Mr. WAGNER. It would be a matter of great difficulty to anyone called upon to interpret the proposed amendment if we have the words "improvement districts and other districts of like character." Who will determine whether a particular district involved is "of like character"? A subway district would not be a district "of like character" as an improvement. The very indefiniteness of the amendment makes it seriously objectionable.

Mr. COPELAND. Mr. President——

The PRESIDING OFFICER. Does the Senator from Louisiana yield to the senior Senator from New York?

Mr. LONG. I yield.

Mr. COPELAND. I should like to call the attention of the Senator from Michigan to a situation in his own State. As he knows, I happened to be mayor of a little city in that State years ago. The question would arise there now, as it did at that time, regarding a paving district. When we proposed to pave a street there was set up a paving district. Those were not bonds of the city. I do not know how far they might have gone in making collections. They may have covered the whole city itself, but the property within the area of that paving district was holden for those bonds. I am sure the Senator from Michigan would not wish to exclude those bonds from such protection as we are proposing to afford here.

Mr. COUZENS. Mr. President——

The PRESIDING OFFICER. Does the Senator from Louisiana yield to the Senator from Michigan?

Mr. LONG. I yield.

Mr. COUZENS. Those are the very bonds I do want to exclude, because they are the kind of bonds of which there are millions in default, because, for instance, we have platted subdivisions and put in pavements as to which the rest of the city would not accept the obligation. If the city will not get back of the obligation for paving a street, but requires it to be paved by the abutting property owners, then it is evidence that it is a hazardous undertaking.

Mr. COPELAND. As I understand the Senator, he intends by the amendment to make such securities ineligible.

Mr. LONG. That is what he said and that is what I understand the Senator to mean.

Mr. COUZENS. That is exactly true.

Mr. LONG. I want to emphasize just what the junior Senator from New York [Mr. WAGNER] said. The expression, "the obligations of improvement districts and other districts of like character," is indefinite. What is "of like character"? Is a subway "of like character"? Who will say? Is it to be the comptroller? Does that mean that in his interpretation he can wipe out an immense lot of securities that to-day we are floating through the banks and that we have not any other way to float except through private investment houses?

The language is very indefinite. I do not know what the meaning of it finally may be. I suggest that above all things if we are going to strike out affiliates we ought not to strike out municipal securities. We are going far enough with the bill as it is.

Mr. WALSH of Montana. Mr. President——

The PRESIDING OFFICER. Does the Senator from Louisiana yield to the Senator from Montana?

Mr. LONG. I yield.

Mr. WALSH of Montana. As the draftsman of the amendment, before I take note of the criticism made by the junior Senator from New York [Mr. WAGNER]—he read only a part of it. That part is, of course, indefinite. Even the term "improvement district" is indefinite. Of course, the term "districts of like character" is indefinite. It is intended to make that language more definite by what follows, namely, "districts in which improvements are made, those improvements to be paid for out of taxes levied upon the property within the district which it is presumed was benefited by the improvement."

Mr. LONG. I think that adds to the confusion, rather than tending to clarify it.

Mr. WALSH of Montana. That may be.

Mr. LONG. Because you have to go there and find out, in addition to what "district of like character" it is, whether it is presumably to be benefited by the work. Apparently, if you can find it is not benefited by the work, the obligation is all right; but if it is benefited by the work, it is not a good bond. I think the Senator can see that. Suppose we say it does not benefit the property, then the obligation is all right.

Mr. WALSH of Montana. I had intended in drafting it to avoid just that thing. The improvement is ordered and the district is created because it is presumed that the property is going to be benefited. It may not be benefited. The Senator from Michigan is just afraid that it will be a case where the property is not benefited, and accordingly the bonds will not be paid; but "presumably to be benefited" relates to the time the district was created. In other words, at the time the district was created it was presumably to be benefited by the work.

Mr. LONG. Mr. President, I would like to suggest that the Senator from Michigan withhold the amendment to-night. Let us not vote on the amendment to-night. I think it is highly objectionable. I do not know that I had anything to do with it, but I indulged myself the privilege of speaking to the Senator from Montana about the original provision before he presented the amendment. I thought I saw that it was shutting out a great quantity of State obligations that were more or less special, such as highway obligations, already mentioned. I think the Senator is proposing to undo a large part of the good that has been done with the amendment when he offers this amendment. Certainly he is so far as it applies to municipalities.

For example, we are building in the city of New Orleans one of the largest airports in the world. Probably it will be one of the finest airports in the world for airplanes that may alight on land or on water. We have created a fund there out of the improvement that has been made and out of taxes that have been levied on that particular property. We are not having any trouble in financing that proposition to-day. It is a sound proposition. One million five hundred thousand dollars of the bonds have been approved tentatively already by the Reconstruction Finance Corporation. They have not yet given us the money, but we expect it any day—at least, we hope we shall get it.

We have several million dollars more of those bonds to float. We will float them without any difficulty whatever through the banks of the city and they will never lose a dollar. If this language is incorporated in the bill, we will not be able to float the bonds of that airport. Where will we get a method of financing them? We shall have to look for some private investment house to take the bonds.

Mr. LEWIS. Mr. President——

The PRESIDING OFFICER. Does the Senator from Louisiana yield to the Senator from Illinois?

Mr. LONG. I yield.

Mr. LEWIS. May I ask the Senator from Louisiana more particularly to indicate in what way he will lose the benefit? What language in the particular amendment works that particular result?

Mr. LONG. It is an improvement presumably to be benefited by the expenditure of the money for which we are floating the bonds.

Mr. LEWIS. Does the amendment prevent the financing of that which is improved?

Mr. LONG. If we can prove it is not improved, it does not. If it is presumed to be improved, it does.

Mr. LEWIS. May I ask the Senator, knowing him to be an eminent lawyer——

Mr. LONG. No; I am not.

Mr. LEWIS. I insist on that recommendation in order to get a reply from the Senator. What is the particular language that the Senator thinks really bars the floating of the bonds?

Mr. LONG. The Senator from Illinois is eminent enough to translate the language better than I can. I hope the Senator will not require me to exhibit my "hillbilly" understanding of phrases. I made a living as a lawyer, but not as an eminent lawyer. There is a difference between them. I never wrote but one book. [Laughter.]

Here is the language—

> not including, however, the obligations of improvement districts and other districts of like character.

I do not know just what that means. I am going to read it again, not that it needs any further reading to percolate the recesses of the mentality of the Senator from Illinois, but my own. I read it again—

> not including, however, the obligations of improvement districts and other districts of like character payable out of taxes imposed upon the property within such districts presumably to be benefited by the work for the prosecution of which such obligations were issued.

It takes a pretty good mind to keep up with that language as I go along. Perhaps I had better hand it to the Senator from Illinois. [Laughter.]

Mr. LEWIS. I can only say that I gathered from the reading of it and the manner in which it has been broadened out that the proposition seems as broad as it is "LONG." [Laughter.]

Mr. LONG. But I had nothing to do with it.

Mr. LEWIS. Let me be perfectly frank. I am interested in the phraseology as it would apply to the Sanitary District of Chicago and to the board of education, and other securities in which I have from time to time manifested an interest before this honorable body. I am unable to see where that in which I am interested is at all obstructed and I am

not able to see where the securities are impeded. Therefore, from the point of view that I observe this amendment, I am unable to participate in the fear of danger the eminent Senator from Louisiana seems to apprehend from the amendment.

Mr. LONG. We do not have to apprehend the danger. The Senator from Michigan [Mr. COUZENS] very frankly outlines some of the classes of securities that he is undertaking to eliminate. They are securities that are being handled to-day, and plenty of them, drainage districts and so on. We have an alluvial country in the State of Louisiana. Some of our drainage bonds may be in default, not many, but there may be some. We are constantly improving that country, and we are paying for it out of the taxes being levied upon the improved area. I recall an airline highway; I recall a project for a bridge; and they are paid for out of the revenue derived from the taxes and from other revenues that might be received there. Under the amendment those bonds are to be excluded.

Take a waterworks as an example. Suppose we erect a waterworks and levy in that particular district a tax to pay for the waterworks. That is presumably one of the improvements to the property that must be paid for through taxes that are levied to discharge the bonds which are issued. I think it would include a subway. It is very broad language. I do not see why it would not.

Mr. COUZENS. Mr. President——

The PRESIDING OFFICER. Does the Senator from Louisiana yield to the Senator from Michigan?

Mr. LONG. I yield.

Mr. COUZENS. I assume that a waterworks and a subway would have their own revenues and would not be dependent upon taxes for payment of their bonds. I did not intend to include, and I do not think that the language includes, any project that would have its own revenue.

Mr. LONG. If it has revenue, the Senator would be willing to accept it?

Mr. COUZENS. Oh, yes.

Mr. LONG. Then I move, if that is the intent of the Senator from Michigan——

Mr. BARKLEY. Mr. President, before the Senator does that, may I ask him a question?

Mr. LONG. Certainly.

Mr. BARKLEY. I understood the Senator from Louisiana to say that these drainage-district bonds and similar improvement bonds, regardless of their character, are now being rediscounted by the Federal reserve banks as a method of financing the districts. Does the Senator really mean to say that that is being done now?

Mr. LONG. I mean they are taking some self-liquidating bonds.

Mr. BARKLEY. The Senator may be confusing the Federal reserve banks with the Reconstruction Finance Corporation. I do not understand the Federal reserve banks are now rediscounting or that they were ever rediscounting long-term bonds issued by drainage or improvement districts in order to raise money to make the improvements.

Mr. LONG. Oh, we have sold bonds to the Federal reserve banks to make improvements—plenty of them.

Mr. GLASS. O Mr. President——

Mr. LONG. I mean not the banks but the affiliates of the banks. It does not make any difference what they may be called.

Mr. GLASS. The Senator means the member banks, the national banks; he does not mean the Federal reserve banks?

Mr. LONG. I mean, of course, the national banks.

Mr. BARKLEY. I understand that a national bank might, as a matter of investment, buy a drainage-district bond or an improvement bond, just like it goes on the market and buys any other sort of a bond, but that is quite a different transaction from the Federal Reserve Board itself rediscounting bonds of that sort or using them at all as collateral for money borrowed.

Mr. LONG. The Senator's leader disagrees with him.

Mr. GLASS. I do not disagree; I agree thoroughly with the Senator from Kentucky.

Mr. LONG. Then I did not understand what the Senator meant by shaking his head.

Mr. GLASS. Perhaps I was shaking it in the wrong direction.

Mr. BARKLEY. The Senator from Virginia was shaking it at the Senator from Louisiana. I think the Senator misunderstood him.

Mr. LONG. I was not talking, so he did not have to shake it at me.

If the Senator from Michigan is willing that the amendment should not include improvement districts, if they have other revenue, then I move, if he will permit me, at the end of the exception, to insert the following words:

> This exception, however, shall not include obligations of improvement districts and other districts of like character where there is other revenue provided for the retirement of the bonds and interest thereon.

Mr. LEWIS. May I be so bold as to suggest the words "other revenue derived."

Mr. LONG. Very well, "other revenue derived."

Mr. COUZENS. I should like to ask the Senator, other than what?

Mr. LONG. Other than taxes.

Mr. COUZENS. There is no reference to taxes there.

Mr. LONG. Yes; there is. The Senator does not know what he has offered, I am afraid.

Mr. GEORGE. Mr. President, if the Senator will yield to me, the language, by way of further definition, is also—

> payable out of taxes imposed upon the property within such districts.

May I suggest to the Senator from Louisiana that if he will include the word "exclusively," so as to read "payable exclusively out of taxes," then he will accomplish what he is undertaking to do.

Mr. LONG. I think that would be a great improvement.

Mr. GEORGE. Or the word "solely" might be used, so as to read "solely out of taxes."

Mr. LONG. I move to amend the amendment by inserting after the word "payable" the word "exclusively."

Mr. COUZENS. I am very glad to accept that, because I do not want to exclude any revenue-producing activities.

Mr. LONG. Very well.

The PRESIDING OFFICER. The Chair understands the Senator from Michigan to accept the amendment.

Mr. GLASS. Mr. President, I am in entire sympathy with the purpose of the Senator from Michigan in offering this amendment and I shall not oppose it or the modification just suggested. We thought we had tightened up the situation considerably. Because our exhaustive investigation disclosed the fact that so many national banks had failed because they had filled their portfolios with unwise and practically useless investment securities; for that reason we tightened the matter up, but I do not object to tightening it up a little more.

Mr. TRAMMELL. Mr. President, in my opinion, the amendment proposed by the Senator from Michigan or by the Senator from Montana—I have heard references made to each of them—places a restriction and a limitation upon a class of securities which should not be precluded from rediscount. The bill authorizes the Comptroller of the Currency by regulation to prescribe any class of commercial securities that may be discounted by the banks, but then there is written into the bill a provision that excepts securities of municipalities or of districts, and an attempt is made to put an inhibition against them so that they may not be available for rediscount purposes through the banks.

In my own State all the schoolhouses are built by bonds issued by the school districts, and, of course, those bonds are retired by taxes. I have never known of that character of security being the cause of the wrecking of banks any more than commercial securities. As a matter of fact, I think more frequently commercial securities have caused the undermining of the banks rather than this class of public securities.

Mr. BARKLEY. Mr. President, will the Senator yield?

The PRESIDING OFFICER. Does the Senator from Florida yield to the Senator from Kentucky?

Mr. TRAMMELL. I yield.

Mr. BARKLEY. I was wondering whether the Senator from Florida has not confused the rediscounting paper by the Federal reserve banks and the investment in paper by the member banks?

Mr. TRAMMELL. No; I have not confused that. If there is put in an inhibition against the Federal reserve bank taking a certain class of securities for rediscount, then, of course, the member banks necessarily, while they are not absolutely prohibited from taking that class of securities, will hesitate before they will take them.

Mr. GLASS. It has nothing in the world to do with Federal reserve banks; it relates to member banks altogether.

Mr. TRAMMELL. This provides that certain classes of paper may not be rediscounted——

Mr. BULKLEY. Mr. President——

Mr. TRAMMELL. I will ask the Senator to wait until I finish the sentence. The Comptroller of the Currency is authorized to prescribe the class of securities to be subject to rediscount so far as commercial paper is concerned, but when it comes to paper issued by municipalities, counties or subdivisions, there is an inhibition put upon that class of securities. If we can vest in the Comptroller of the Currency the authority to say what character of commercial paper may be used, why should we write into the proposed legislation an inhibition against a certain character of public securities? That is what this bill does.

Mr. BULKLEY. Mr. President——

The PRESIDING OFFICER. Does the Senator from Florida yield to the Senator from Ohio?

Mr. TRAMMELL. I yield.

Mr. BULKLEY. I want to suggest to the Senator that this does not relate to rediscounts at all; it relates only to investments.

Mr. LONG. That is what we are talking about.

Mr. BULKLEY. But the Senator from Florida is talking about rediscounts; I think that is a mere slip of the tongue.

Mr. TRAMMELL. If it is a matter of investment——

Mr. BULKLEY. That is what it is; it is a matter of investment.

Mr. TRAMMELL. If it is a matter of investment, why is the Comptroller of the Currency permitted to prescribe with unlimited authority the character of commercial securities the banks may purchase and then there is written into the law an inhibition against the purchase of public securities?

Mr. BULKLEY. I think the Senator misunderstands me if he thinks that I am taking a position opposite to that taken by him in his argument. I was merely correcting the misstatement that it relates to rediscounts, which it does not. It relates to investments.

Mr. TRAMMELL. It impairs the value of all public securities throughout the country. It will weaken and reduce the price at which bonds may be sold in the future by different governmental subdivisions. Why should we discriminate against public securities?

Mr. GLASS. Mr. President, if the Senator will only read the bill he will see that it does just the reverse of what he says it does.

Mr. TRAMMELL. I have read the bill.

Mr. GLASS. It distinctly exempts such securities.

Mr. TRAMMELL. It exempts only a certain class of securities. It contains an inhibition against other securities, for instance those of a district. The Senator says if I had read the bill I would not make the statement. I will ask him—of course, I know he is very familiar with the bill—I will ask him if a school district in the State of Florida desiring to float $100,000 of bonds for the purpose of building a schoolhouse, the district alone being responsible for those bonds, would have the right to sell the bonds unless the bill were amended?

Mr. GLASS. Under the proposed amendment of the Senator from Michigan it might not have, but under the terms of the bill as reported by the committee it would have.

Mr. TRAMMELL. I want to ask the Senator to cite me the paragraph which contains that authorization.

Mr. BARKLEY. Mr. President, the Senator from Michigan has offered an amendment the effect of which is to take this very class of bonds out of the permissive section of the bill as it is written.

Mr. GLASS. Let me read to the Senator from Florida——

The PRESIDING OFFICER. Does the Senator from Florida yield to the Senator from Virginia?

Mr. TRAMMELL. I yield.

Mr. GLASS. Let me read the provision to the Senator. It is as follows:

> The limitations herein contained as to investment securities shall not apply to obligations of the United States or general obligations of any State or of any political subdivision thereof.

Mr. TRAMMELL. That refers to general obligations. I should like to ask the Senator to give me a definition of the words "general obligations."

Mr. BULKLEY. The word "general" has just been stricken out of the bill.

The PRESIDING OFFICER. Senators must address the Chair and not interrupt until they obtain recognition. The Senator from Florida has the floor.

Mr. TRAMMELL. Then if the Couzens amendment should be defeated, the bill would be all right with the word "general" stricken out? That was what was confusing to me.

Mr. LONG. Mr. President, the Senator from Florida has brought up a point that I had not thought of. Just as he said, and as the Senator from Virginia admits, school districts can not be financed under this bill; the investments can not be made.

Mr. BULKLEY. The Senator means under the amendment.

Mr. LONG. Under the amendment the Senator from Michigan has offered?

Mr. BULKLEY. They can be, in my opinion, under the terms of the bill.

Mr. LONG. I admit that if we vote down the Couzens amendment it will be all right. So if we are agreed to vote that down, let us vote it down.

Mr. COPELAND. Mr. President, I take the view that we should vote down this amendment unless it can be so worded as to distinguish between those real-estate wildcat speculations outside of Detroit and bona fide municipal improvements, such as a school or the paving of a street or the building of a sewer within a certain district. If this amendment, as written, presented by the Senator from Michigan shall be adopted, all such improvements will be excluded and the bonds for such improvements may not be purchased by the member banks. I certainly agree that we should vote the amendment down unless language can be found to make a distinction between wildcat schemes and legitimate municipal improvements.

SEVERAL SENATORS. Vote!

The PRESIDING OFFICER. The question is on the amendment submitted by the Senator from Michigan, as modified.

The amendment as modified was rejected.

Mr. METCALF. Mr. President, I send an amendment to the desk and ask that it may be read.

The PRESIDING OFFICER. The amendment will be stated.

The LEGISLATIVE CLERK. On page 37, line 17, it is proposed to strike out the word "three" and insert in lieu thereof the word "five"; on page 43, line 18, to strike out the word "three" and insert the word "five"; and on page 8, line 11, to strike out the word "three" and insert in lieu thereof the word "five."

Mr. METCALF. Mr. President, I feel that three years as provided in the bill does not afford time to enable affiliates to wind up their business. Some of them have had such a very large business I think they should be given an adequate opportunity, particularly during hard times, to close up their affairs. So I thought possibly the amendment would provide a way out, and make it easier for them to get out of business.

Mr. GLASS. Mr. President, I will say to the Senator that all members of the subcommittee, as I recall, agreed that the time might be extended from three to five years. The committee thought that three years was ample, but, in order to abate the troublesome hostility of the affiliates, we agreed that we would be willing to extend the period from three to five years.

Mr. SMOOT. Question!

The PRESIDING OFFICER. The question is on the amendment offered by the Senator from Rhode Island.

The amendment was agreed to.

Mr. VANDENBERG. Mr. President, may I have the attention of the Senator from Virginia [Mr. GLASS], and ask him to follow me on page 46, line 10, where the phrase "banks of issue" occurs? May I suggest to the Senator that there are no State banks of issue at the present time, and that the use of this particular phrase in the definition is very confusing in those instances where national banks are seeking the same privilege allowed to State banks in the matter of interest rates, and so forth. May I inquire whether he would resist striking out the words "of issue"?

Mr. GLASS. There are no State banks of issue, except they want to endure the 10 per cent tax imposed by the Federal Government on all issues of banks.

Mr. VANDENBERG. The point is made to me that inasmuch as the privilege of a comparative rate of interest, for instance, on industrial loans is permitted to State banks only in respect as it is permitted to State banks of issue, it virtually forecloses freedom to national banks in this competitive field; whereas, if the words "of issue" were stricken out, we would then confront a situation in which the national banks would be permitted the same latitude as a general State bank, but no more.

Mr. GLASS. I think the words should be stricken out.

Mr. VANDENBERG. I move that they be stricken out.

The PRESIDING OFFICER. The question is on the amendment of the Senator from Michigan [Mr. VANDENBERG].

Mr. LONG. Mr. President, reserving the right to object for just a moment, as I understand, this provision would allow national banks to charge a certain rate of interest, and not to exceed it, except that where banks of issue of the State are allowed a greater rate they can avail themselves of the right to charge a greater rate. What are the words "banks of issue" put in here for?

Mr. VANDENBERG. I may say that they seem to be taken out of the old law, when there were State banks of issue. There are no State banks of issue at the present time, in practice.

Mr. LONG. All right.

The PRESIDING OFFICER. The question is on the amendment of the Senator from Michigan [Mr. VANDENBERG].

The amendment was agreed to.

Mr. GEORGE. Mr. President, I propose an amendment. On page 8, at line 8, after the word "stock," insert the following:

Undertaken and consummated after the date of the enactment of the banking act of 1932.

That is, of this act.

Mr. LONG. What is it proposed to insert?

Mr. GEORGE. To insert, after the word "stock," the words "undertaken and consummated after the date of the enactment of the banking act of 1932."

I think the Senator from Virginia [Mr. GLASS] has given some study to that amendment; and I should like to put in the RECORD just this brief statement, which covers the whole case:

The paragraph beginning on line 5 of page 8 subjects member banks to the same limitations and conditions with respect to the purchasing, selling, underwriting, and holding of investment securities and stock as are applicable in the case of national banks under paragraph seventh of section 5136 of the Revised Statutes, as amended. In dealing with investment securities on page 35, the words "hereafter purchased and held" are used; but investment securities are limited to "marketable obligations evidencing indebtedness * * * in the form of bonds, notes, and/or debentures." Corporate stock is not included. On the contrary, the purchase or holding of any shares of stock of any corporation or trust company is prohibited.

Some member banks and some trust companies have, of course, acquired stock prior to the enactment of this particular banking act, which they would be required to sell on the present market or upon an adverse market, perhaps at a very severe loss.

I think the Senator from Virginia has had occasion to look over this amendment.

Mr. BULKLEY. Mr. President——

The VICE PRESIDENT. Does the Senator from Georgia yield to the Senator from Ohio?

Mr. GEORGE. I yield to the Senator from Ohio.

Mr. BULKLEY. May I suggest to the Senator from Georgia that this provision on page 8 makes applicable to State member banks what is made applicable to national banks by the matter which appears in section 14 on pages 34 and 35?

Mr. GEORGE. Exactly.

Mr. BULKLEY. I have pending an amendment, which I intend to call up, which amends page 35 at line 7, and again at line 14, so that it shall read, "purchased after this section as amended takes effect," and then omits the words "and held."

Obviously, the limitation ought to be the same on national banks and on State member banks. My inquiry is whether, if this amendment is adopted on page 35, that will not make it unnecessary to adopt the amendment which the Senator has now suggested on page 8.

Mr. GEORGE. Does the Senator propose to amend this language on page 35, "hereafter purchased and held"?

Mr. GLASS. Just mark out "and held."

Mr. GEORGE. The amendment proposes to eliminate "and held"?

Mr. BULKLEY. And the word "hereafter." We propose to substitute "after this section as amended takes effect" for the reason that this is an amendment of the Revised Statutes, and the word "hereafter" might be confusing if it were made an amendment to the Revised Statutes.

Mr. GLASS. Exactly.

Mr. GEORGE. Yes; but let me call the Senator's attention to the further fact that in this bill you have defined "investment securities" as—

Marketable obligations evidencing indebtedness * * * in the form of bonds, notes, and/or debentures.

Corporate stock is not included, and therefore, in view of the restrictive definition which you have given to "marketable obligations," it seems to me still that this amendment should be accepted if it is sound and consistent with the general purpose of the bill, and I do not see why it is not.

Mr. BULKLEY. My question was whether it would be necessary, if we make these amendments that are discussed on page 35. The Senator does not contend that a more liberal rule ought to be applied to the State member banks than to the national banks.

Mr. GEORGE. Oh, no; not at all.

Mr. BULKLEY. It was only my thought that the language on page 8 makes applicable to State banks whatever is said in section 14. If we amend section 14 applying to national banks, that will by the same token relieve the State banks to the same extent.

Mr. GEORGE. The amendment, which the Senator says he intends to propose, might possibly obviate the necessity of this amendment, but I would not be willing to say that that is true at this time, because I think it would take a very careful study of section 14 to determine that fact.

Mr. GLASS. May I say to the Senator that it was because of the fact that he had proposed this amendment, and that he and I had discussed it, that the Senator from Ohio and I went over the matter very carefully to meet the view of the Senator from Georgia; and I feel certain that the amendment proposed by the Senator from Ohio completely meets the view entertained by the Senator from Georgia.

Mr. BULKLEY. I would suggest that the Senator now withdraw this amendment without prejudice and consider that.

Mr. GEORGE. I am disposed to think that the amendment which the Senator from Ohio proposes to offer will cover what I have in mind; and I trust that the Senator will offer his amendment, whether now or at some later time.

Mr. GLASS. Oh, yes; he will do that.

The VICE PRESIDENT. As the Chair understands, the Senator from Georgia withdraws his amendment.

Mr. GEORGE. I withdraw my amendment in view of the statements of the Senator from Ohio and the Senator from Virginia.

The VICE PRESIDENT. The bill is open to amendment. The Senator from Virginia.

Mr. GLASS. I have no amendment to offer.

The VICE PRESIDENT. The Senator from Ohio.

Mr. BULKLEY. Mr. President, I shall be glad to call up that amendment on page 35 now. It is at the desk.

The VICE PRESIDENT. Let it be stated.

The LEGISLATIVE CLERK. On Page 35, line 14, strike out the word "hereafter," and after the word "purchased" insert "after this section as amended takes effect."

The VICE PRESIDENT. The question is on agreeing to the amendment offered by the Senator from Ohio.

The amendment was agreed to.

The VICE PRESIDENT. The bill is open to amendment.

Mr. BULKLEY. There is another amendment to the same effect in another line on page 35.

The VICE PRESIDENT. Let it be stated. Will the Senator send up the amendment?

Mr. BULKLEY. It is to make, in line 14, the same amendment as in line 7.

The VICE PRESIDENT. Without objection——

Mr. GEORGE. Mr. President, let me ask the Senator from Ohio if he proposes to modify the following language, to be found on page 36:

> Except as hereinafter provided or otherwise permitted by law, nothing herein contained shall authorize the purchase or holding by the association of any shares of stock of any corporation.

Mr. GLASS. We mean to strike out the words, "or holding."

Mr. GEORGE. That, I think, would meet exactly what we have in mind.

Mr. BULKLEY. Mr. President, I offer an amendment on page 36, line 3 to strike out the words "or holding."

The VICE PRESIDENT. The question is on the amendment offered by the Senator from Ohio.

The amendment was agreed to.

The VICE PRESIDENT. Did the Senator from Ohio propose the second amendment, or did he withdraw that amendment?

Mr. BULKLEY. As I understood, the second amendment was adopted by consent, because it was exactly the same amendment as in line 7.

The VICE PRESIDENT. Without objection, that amendment will be agreed to.

The bill is open to amendment.

Mr. LONG. Mr. President, it is now 9.40 or 9.45. I have some amendments that I want to send up. I believe we are to take a recess at 10 o'clock, and I was going to suggest that we recess now instead of going into the other amendments. We have only 15 or 20 minutes left.

Mr. BULKLEY. Mr. President, what is the objection to starting the consideration of the amendments to-night?

Mr. LONG. I can not get through with them. It will require a little time to discuss them. The first one is the amendment relative to the liquidating corporation. I do not see why we should go on with it for 15 minutes.

The VICE PRESIDENT. The Senator from Louisiana has the floor.

Mr. KEAN. Mr. President——

The VICE PRESIDENT. Does the Senator from Louisiana yield to the Senator from New Jersey?

Mr. LONG. I yield to the Senator from New Jersey.

Mr. KEAN. I send to the desk an amendment which I ask to have stated.

The VICE PRESIDENT. The amendment will be stated.

The LEGISLATIVE CLERK. On page 2, line 23, the Senator from New Jersey proposes to strike out the words "a majority of the members of its executive committee or."

Mr. KEAN. Mr. President, does the Senator consent to that amendment?

Mr. BULKLEY. May I ask if that amendment has been corrected?

Mr. KEAN. I ask to correct that amendment so that it will strike out "either a majority of the members of its executive committee or."

The VICE PRESIDENT. The clerk will state the amendment as modified.

The LEGISLATIVE CLERK. On page 2, line 23, strike out the words "a majority of the members of its executive committee or."

Mr. BULKLEY. I think the word "either" should also be stricken out, so that the striking out will commence with the word "either."

The VICE PRESIDENT. Let the amendment again be stated, so that there will be no mistake about it.

The LEGISLATIVE CLERK. On page 2, line 23, strike out the words "either a majority of the members of its executive committee or."

Mr. LONG. Mr. President, how does the amendment, as corrected, read? What is the Senator attempting to strike out?

Mr. KEAN. I am proposing to strike out on line 23, after the words "Of which," the words "either a majority of the members of its executive committee or." It leaves in "a majority of its directors, trustees."

Mr. LONG. The Senator means he is striking out of the bill all except a majority of the directors and trustees?

Mr. KEAN. Yes.

Mr. LONG. What is the Senator eliminating from the bill?

Mr. KEAN. I am eliminating the executive committee.

Mr. LONG. The Senator is eliminating the executive committee?

Mr. KEAN. Yes.

Mr. LONG. I had expected that this amendment the Senator from New Jersey had offered would not forbid the directors of a department store, all of whom are members of the board of directors of a bank, to hold their positions as directors of the bank. Does the Senator's amendment cover that?

Mr. KEAN. This makes it so that the members of the executive committee of an industrial concern—a railroad, insurance company, and so on—can be directors of a bank, but a majority of them can not be members of its executive committee. It cuts out the executive committee, so that if the executive committee of an insurance company or any other company are directors of a bank it does not make the insurance company an affiliate of the bank.

Mr. LONG. I am sure I am dense, but I do not understand exactly what the Senator is talking about.

Mr. KEAN. I will repeat it, if the Senator desires.

Mr. LONG. Let us take a department store with five directors, just to give an illustration. Under the Senator's amendment would it be permissible for the five directors to be directors of a bank?

Mr. KEAN. No; but if the department store has an executive committee of three or five directors, and those directors happen to be members of the directory of a national bank or trust company or a member bank, the provision as written would eliminate them. In other words, if a majority of the board of directors or trustees are directors of a bank, that means that the bank absolutely has control of that company. If, on the other hand, members of the executive committee are members of a board of directors of a bank, that does not mean at all that that company is owned by the bank.

Mr. LONG. A parliamentary inquiry.

The VICE PRESIDENT. The Senator will state it.

Mr. LONG. If the amendment of the Senator should prevail, then this language could not be subsequently corrected; it would have to remain as corrected by his amendment, would it not? The point is that I do not want to be prevented from correcting this language further. I thought I was in favor of the amendment as it was read, but I do not want to be precluded. What I have in mind is that the directors of department stores in my home city happen in some instances to be directors in a bank, and, according to this amendment, they would be prohibited from being directors in the bank and being directors in a department store.

Mr. KEAN. If a majority of them are directors of a bank, then that department store is an affiliate of the bank.

Mr. LONG. That is just what I want to prevent, and I hope the Senator will not amend his amendment.

Mr. KEAN. If this amendment carries, I have a second amendment which I think will eliminate that.

Mr. LONG. With that assurance, Mr. President, may I propound a parliamentary inquiry? Would that second amendment be in order? I am just afraid that by correcting this language, it will not be.

The VICE PRESIDENT. The amendment has not yet been sent up, but if it is to the other part of the section it would be in order.

Mr. LONG. Mr. President, I want to ask the Senator not to try to press this amendment to-night. The Senator from Georgia and myself think we can make it a little bit better. I do not want to take any chances of its being corrected and, by reason of the language's having been perfected, have it held as not being subject to further amendment.

I will say this, for the information of the Senate, that if a department store or a drug store or any other business composed of two partners is incorporated, and accidentally two or three members of the board should be directors of a bank, their company would be an affiliate of the bank. As an example, in my home town there is a bank that has about three directors who are directors of one of the largest department stores in the South. Each of those directors, who are engaged in other business, happens to be a director of the bank. The three or four directors are all directors of the bank, and under this amendment that department store would be an affiliate of the bank of which those men are directors, and I am undertaking to keep from having that foreclosed. I will ask the Senator to let the amendment go over until to-morrow morning. It is 10 minutes of 10, within a short time of the hour when we are to adjourn.

The VICE PRESIDENT. The Chair suggests that the Senator from New Jersey offer his second amendment, so that the two amendments may be considered together.

Mr. KEAN. I send the second amendment to the desk.

The VICE PRESIDENT. The amendments will be printed and lie on the table, and be printed in the RECORD for the information of the Senate.

The clerk will state the second amendment.

The LEGISLATIVE CLERK. On page 3, line 2, to strike out the words "of a member bank" and insert in lieu thereof the words "of any one member bank."

Mr. KEAN. Mr. President, if the Senator from Louisiana will look at that amendment, he will see that it so provides that there must be a majority of the board of directors, trustees of one bank. Instead of any member bank it must be one bank.

Mr. LONG. Mr. President, I ask the Senator if it would not be all right to let this amendment go over. I do not think his second amendment covers the matter, and as I realize how complicated it is to amend this provision, I have had the assistance of a very good lawyer in attempting to perfect an amendment which would take care of what I want to cover and at the same time not leave this ambiguity, which the Senator's amendment would apparently leave. I think this language goes entirely too far, and if it is not objectionable to the Senator from Virginia to do so, with the consent of the Senator from New Jersey I would ask that we let this amendment go over until to-morrow morning. It is now about 6 minutes to 10 o'clock.

Mr. GLASS. Mr. President, I may say to the Senator that I have no objection to the amendment going over. It has been discussed with the Senator from New Jersey by members of the subcommittee, and the members of the subcommittee find no objection to the two amendments proposed by the Senate. Both of them relate to the functions of an affiliate and seek to guard against undue control of a bank by the directors of an affiliate. I think it is clear; but if Senators think it is not, and think they can make it clearer, I have no objection to the amendment going over, because we have only five minutes left of the session to-night.

Mr. GEORGE. Mr. President, I inquire of the Senator from Ohio whether he will offer his amendment to the language on page 8, in line 20. The Senator has an amendment pending.

Mr. BULKLEY. Yes; I expect to call that up.

Mr. GEORGE. I am making inquiry because I have an amendment pending, and I desire to offer it to the section after it is perfected.

Mr. BULKLEY. I understand.

Mr. GEORGE. Now, I ask the Senator from Virginia whether he has considered the amendment which I have offered, in line 24, page 38, after the word "directors," to insert the words "and in deciding all questions at meetings of shareholders."

Mr. GLASS. We can act on that right now.

Mr. GEORGE. There is no objection to it?

Mr. GLASS. No.

The VICE PRESIDENT. The amendment will be stated.

The amendment was, on page 38, line 24, after the word "directors," to insert the words "and in deciding all questions at meetings of shareholders," so as to read:

Any such holding company affiliate may make application to the Federal Reserve Board for a voting permit entitling it to cast one vote at all elections of directors and in deciding all questions at meetings of shareholders of such bank on each share of stock controlled by it. The Federal Reserve Board may, in its discretion, grant or withhold such permit as the public interest may require. In acting upon such application, the board shall consider the financial condition of the applicant, the general character of its management, and the probable effect of the granting of such permit upon the affairs of such bank, but no such permit shall be granted except upon the following conditions:

The VICE PRESIDENT. By unanimous consent, the amendment will be considered as having been agreed to, and this action will not interfere with the pending amendment offered by the Senator from New Jersey [Mr. KEAN].

Mr. GLASS. Mr. President, in order that there may be no mistake about matters, and no broken engagements to-morrow night, we propose to pursue consideration of the pending bill, and take it into the night to 10 o'clock unless it shall have been passed before that hour.

Mr. LONG. Does the Senator want the Senate to stay in session to-morrow night until 10 o'clock?

Mr. GLASS. Unless the bill shall have been passed by that hour, yes.

Mr. McNARY. Is the Senator from Virginia willing to suspend at this time?

Mr. GLASS. Yes.

Mr. LONG submitted an amendment intended to be proposed by him to Senate bill 4412, the banking bill, which was ordered to lie on the table and to be printed, as follows:

On page 15, to strike out lines 6 to 13, both inclusive; on page 23, line 12, beginning with the word "and," to strike out through the word "section," in line 13.

ADDITIONAL PETITIONS AND MEMORIALS

Mr. COUZENS presented a memorial, numerously signed of sundry citizens of the State of Michigan, remonstrating against the ratification of the Great Lakes-St. Lawrence deep-waterway treaty, which was referred to the Committee on Foreign Relations.

Mr. COPELAND presented a resolution adopted by the Erie County (N. Y.) Bankers Association, opposing the passage of legislation proposing to revalue the currency, and

also the publication of borrowings of financial institutions from the Reconstruction Finance Corporation, which was referred to the Committee on Banking and Currency.

He also presented a resolution adopted by the Jamaica Bay (N. Y.) Republican Club, favoring repeal of the provisions of the economy act, which was referred to the Committee on Appropriations.

He also presented the petition of Marion May and sundry other citizens of New York City, N. Y., praying for the adoption of an amendment to the Constitution guaranteeing equal rights to men and women, which was referred to the Committee on the Judiciary.

He also presented a resolution adopted by Gen. Henry W. Lawton Camp, No. 21, United Spanish War Veterans, Department of New York, of Brooklyn, N. Y., soliciting the favorable consideration of the Congress for Spanish War veterans in connection with proposed legislation to curtail pensions, disability allowances, and compensation, which was referred to the Committee on Pensions.

He also presented a resolution adopted by Blazing Star Post, No. 1574, Veterans of Foreign Wars of the United States, Staten Island, N. Y., protesting against the attitude and efforts of the National Economy League in endeavoring to promote curtailment of allowances and benefits to veterans of the Spanish and World Wars, which was referred to the Committee on Finance.

He also presented the petition of Joseph M. Mingen, of Buffalo, N. Y., praying for the passage of legislation to revalue the gold ounce and opposing the passage of the so-called Glass banking bill, which was ordered to lie on the table.

He also presented the petition of Marion May and sundry other citizens of New York City, N. Y., praying for the inclusion of an equality clause or reservation in the World Court protocols establishing the principle of equality for men and women, which was ordered to lie on the table.

He also presented a memorial of sundry citizens (being members of the United States customs guards, and other guards), of the port of New York, N. Y., remonstrating against further furloughs or reduction in their compensation, which was ordered to lie on the table.

He also presented memorials, and papers in the nature of memorials, of sundry citizens and religious and other organizations of the State of New York, remonstrating against the repeal of the eighteenth amendment to the Constitution, or the repeal or modification of the national prohibition law, which were ordered to lie on the table.

REPORT OF COMMITTEE ON TERRITORIES AND INSULAR AFFAIRS

Mr. BINGHAM, from the Committee on Territories and Insular Affairs, to which was referred the bill (H. R. 13959) to authorize the incorporated town of Fairbanks, Alaska, to issue bonds in any sum not exceeding $100,000 for the purpose of constructing and equipping a public-school building in the town of Fairbanks, Alaska, and for other purposes, reported it without amendment and submitted a report (No. 1108) thereon.

ADDITIONAL BILLS INTRODUCED

Additional bills were introduced, read the first time, and, by unanimous consent, the second time, and referred as follows:

By Mr. REED:

A bill (S. 5504) authorizing the Bushkill Bridge Co., its successors and assigns, to construct, maintain, and operate a bridge across the Delaware River at, or near, Bushkill, Pa.; to the Committee on Commerce.

By Mr. SHEPPARD:

A bill (S. 5505) to amend section 71, title 28, Code of Laws of the United States of America; to the Committee on the Judiciary.

ARRANGEMENTS FOR THE INAUGURAL CEREMONIES

Mr. ROBINSON of Arkansas. Mr. President, I ask leave to introduce two joint resolutions on behalf of the Committee on Inaugural Ceremonies, and request that they may be printed and lie on the table. I also ask that certain communications relating to the same matter may be printed in the RECORD.

The VICE PRESIDENT. Without objection, that order will be made.

The joint resolution (S. J. Res. 239) authorizing the granting of permits to the Committee on Inaugural Ceremonies on the occasion of the inauguration of the President elect in March, 1933, and for other purposes; and

The joint resolution (S. J. Res. 240) to provide for the quartering, in certain public buildings in the District of Columbia, of troops participating in the inaugural ceremonies, were read twice by their titles, and ordered to lie on the table.

The communications above referred to are as follows:

INAUGURAL COMMITTEE,
January 24, 1933.

Hon. JOSEPH T. ROBINSON,
Chairman Inaugural Committee,
Senate, Washington, D. C.

DEAR SENATOR ROBINSON: I herewith inclose two joint resolutions, the longer resolution authorizing the granting of permits to the Committee on Inaugural Ceremonies on the occasion of the inauguration of the President elect in March, 1933, and the shorter resolution providing for quartering in public buildings troops participating in the inaugural ceremonies.

The longer resolution is similar to Senate Joint Resolution 180, No. 77, Seventieth Congress, which was approved January 26, 1929, for the last inaugural. The shorter resolution is identical with House Joint Resolution 418, which passed the Senate February 15, calendar day February 18, 1929, and passed the House of Representatives February 16, 1929.

I also inclose the original communications from the Secretary of War, the Secretary of the Navy, the Commissioners of the District of Columbia, and the Director of Public Buildings and Public Parks of the National Capital, approving the longer resolution, and the approval of the Director of Public Buildings and Public Parks of the National Capital of the other resolution, providing for quartering in public buildings troops participating in the inaugural ceremonies.

The inaugural committee will greatly appreciate your efforts to have these joint resolutions passed as promptly as is practical.

With sentiments of high regard, I am,

Yours very truly,

LESLIE C. GARNETT,
Chairman Legislative Committee, Inaugural Committee.

WAR DEPARTMENT,
Washington, D. C., January 20, 1933.

Mr. LESLIE C. GARNETT,
Chairman Legislative Committee,
Inaugural Committee, Washington, D. C.

DEAR SIR: Careful consideration has been given to the proposed draft of a joint resolution to facilitate the work of your inaugural committee, draft of which was forwarded with your letter of the 16th instant. The draft which you submit appears to be practically identical with legislation heretofore enacted by Congress for similar purposes. It should, therefore, accomplish the purpose you have in mind, and the War Department will be glad to cooperate with your committee in any way desired should the joint resolution be enacted into law.

Sincerely yours,

PATRICK J. HURLEY,
Secretary of War.

THE SECRETARY OF THE NAVY,
Washington, January 21, 1933.

Mr. LESLIE C. GARNETT,
Chairman Legislative Committee,
Inaugural Committee, Munsey Building, Washington.

MY DEAR MR. GARNETT: You are authorized to say to the committee of the Seventy-second Congress, which is considering the joint resolution authorizing various things in connection with the inaugural ceremonies, that the Navy approves section 3 of that resolution, authorizing the loan by the Navy to your committee of certain tents, flags, etc., as stated in that section.

Very truly yours,

C. F. ADAMS.

COMMISSIONERS OF THE DISTRICT OF COLUMBIA,
Washington, January 17, 1933.

Mr. LESLIE C. GARNETT,
Chairman Legislative Committee,
Inaugural Committee, Washington, D. C.

DEAR MR. GARNETT: The commissioners are in receipt of your letter of January 16, submitting a proposed joint resolution authorizing the granting of permits to the Committee on Inaugural Ceremonies on the occasion of the inauguration of the President elect in March, 1933. The proposed resolution meets the approval of the commissioners. It is understood that you intend to present the resolution to Senator ARTHUR CAPPER, chairman of the Senate Committee on the District of Columbia, with request for its in-

troduction and enactment. The commissioners authorize you to state to Senator CAPPER that the proposed legislation has their approval, and they recommend its introduction and enactment.

Very truly yours,

L. H. REICHELDERFER,
President Board of Commissioners of the District of Columbia.

PUBLIC BUILDINGS AND PUBLIC PARKS OF THE NATIONAL CAPITAL,
Washington, D. C., January 23, 1933.

Mr. LESLIE C. GARNETT,
Chairman Legislative Committee,
Inaugural Committee, Munsey Building, Washington, D. C.

Subject: Special legislation for inauguration, March 4, 1933.

MY DEAR MR. GARNETT: I am glad to confirm my verbal statement to Mr. Claggett that I have no objection whatever to the two joint resolutions, drafts for which accompanied your note of January 16, 1933.

However, there are a few changes in the wording of the longer one which seems to me desirable for the sake of clarity and correctness, and I, therefore, venture to recommend them to your consideration:

(1) Section 1 refers to "The Director of Public Buildings and Public Parks of the National Capital and such other officers of the District of Columbia and the United States as control any public lands——," therefore "his" should be changed to "their."

(2) Near the end of section 1, "the War Department" occurring in the third line from the bottom evidently does not apply and should be changed to "the United States or the District of Columbia as the case may be," or else simply to "the appropriate agency of the Government."

(3) Section 2, second proviso after "Commissioners of the District of Columbia" add "or such other official as may have jurisdiction on the premises."

(4) Section 4, first line after "the Commissioners of the District of Columbia" add "and the Director of Public Buildings and Public Parks of the National Capital" so that wires can properly be allowed to cross park reservations, too, when necessary.

Very truly yours,

U. S. GRANT, 3d, *Director.*

FORMER PRESIDENT COOLIDGE AS STATESMAN RELAXED AMONG THE ANTIQUARIANS

Mr. BINGHAM. Mr. President, I ask leave to have published in the RECORD an article by Clarence S. Brigham, director of the American Antiquarian Society, appearing in the Boston Sunday Globe of January 8, 1933, entitled "Where He Was Still President Coolidge After He Left the White House—A Picture of the Statesman Relaxed Among the Antiquarians," and so forth.

There being no objection, the article was ordered to be printed in the RECORD, and it is as follows:

[From the Boston Sunday Globe, January 8, 1933]

WHERE HE WAS STILL PRESIDENT COOLIDGE AFTER HE LEFT THE WHITE HOUSE

A PICTURE OF THE STATESMAN RELAXED AMONG THE ANTIQUARIANS—HE TOLD THEM OF READING THE WHOLE OF DANTE IN ORIGINAL ITALIAN—TOLD THEM, TOO, THAT HE DIDN'T THINK MUCH OF HIS SPEECH IN LAST CAMPAIGN

The death of Calvin Coolidge is a great loss to the American Antiquarian Society, for he not only brought prestige to the organization, but showed an active and continued interest in its welfare. Mr. Coolidge was elected president of the society in October, 1929, largely upon the suggestion of Chief Justice Rugg, who was first vice president. Once I asked him the reason why he had taken on this position, when he had declined so many others. He replied that it was partly due to the fact that any request made to him by Chief Justice Rugg was worthy of the most careful consideration, but chiefly because he wanted to continue personal contacts with his fellowmen.

It must have been a great change to Mr. Coolidge, after so many active years in politics, suddenly to be retired to private life and to live in a small New England city, where there were few outside contacts except those of his own choosing. He saw some partial relief from this condition in the knowledge that through the Antiquarian Society he would meet several times each year men from various sections of the country, even though they worked in a field with which he was unfamiliar. I think that this desire for an occasional excursion into public life must also have influenced him in his accepting membership on the board of the New York Life Insurance Co., which took him to New York, where he was brought into contact with men of prominence in the world of business affairs.

He was a man of far greater culture than was generally realized. One night he asked if I did not have some fine early binding, so I showed him an edition of Dante which was translated into English in a volume of over 600 pages. I remarked, "Who could ever wade through this bulky volume?"

And to my surprise he answered, "I once read the whole of Dante in the original Italian."

"What!" I replied. "That would seem to me almost an impossibility. Did you do it in your colleage days?"

"No," he said, "it was years after I graduated from college, and I did not finish it until after I was married." Then he continued: "I always liked Italian and French and read many books in the original, but German was considerable of a stumblingblock."

He told me about the building up of his library at the White House. When he first went there he said that there was little more than a long set of Blackwood's Magazine, which he relegated to the attic. Then the books began to pile up until when he left Washington for Northampton there were 40 cases of books, with over 4,000 volumes in all. When the farmhouse at Plymouth was remodeled, place was made for this library, and the planning and filling of this room was a source of great pleasure to him. He said that in practically every volume he had placed his bookplate, the work having been done in Washington by some workers who came over from the Library of Congress. I said: "But what did you leave at the White House?" And he replied: "The set of Blackwood's Magazine."

Political speechmaking was a tremendous bore to Mr. Coolidge, and he thought it much overdone. He had made his notable campaign speech in behalf of Hoover only a week or so before he visited me on October 17. I told him that I thought his speech a remarkably fine document and that it sounded very well over the radio. He said: "I didn't think much of it. I expected that I would have 10 days to prepare it, and finally prepared it in 3. Writing it in Plymouth didn't give me much time to verify my facts." I said: "Are you going to make another speech during the campaign?" "No," he replied, "one speech is better than six." During the tercentenary year in Massachusetts he had over 200 requests to make speeches at various towns in the State, and he made but one.

One of the most notable characteristics shown by Mr. Coolidge in conversation, as well as in public utterance, was his fairness and impartiality. He could always look at both sides of an argument and seldom did he make up his mind until he had heard all sides. I referred to high wages as a primary cause of inflation. He said, "Don't forget that many employers are responsible for higher wages, for it gives them the opportunity for increased profits." He could see the side of the workingman just as readily as that of the operator.

At a council dinner a member was discoursing interestingly on the curious collections that people made—paper match covers, golf tees, or cigar bands. "Why, I even knew a man once who collected razors." Mr. Coolidge murmured to me in a low tone: "That must have been a colored man."

His conversation was frequently punctuated with epigrams or observations containing subtle wit. This even came to the surface during his conduct of a meeting when a council member was telling of the great value of the Gutenberg Bible and of the magnificent copy which Congress had recently bought from a European collector for a fabulous sum. "Well," Mr. Coolidge remarked, "I should think that an ordinary copy of the King James version would have been good enough for those Congressmen."

Once when lunching at Northampton he gave me what he called a real Vermont meal, with soup and cheese and apple pie with maple sirup. A short while later when he was in Worcester, I gave him a Rhode Island meal, with steak and johnnycakes, ending up with apple pie for dessert. He almost always referred to this meal when he came again to Worcester, and said that it was several days before he recovered from it, that he would have to be careful how he accepted invitations from me for luncheon which turned out to be dinner. As a matter of fact, he ate rather sparingly, seldom taking fruit for breakfast and having at least one light meal for the remainder of the day.

I think that Mr. Coolidge's most outstanding trait was his kindness and his sympathy. He never forgot a friend and had a surprising habit of remembering trivial happenings if they concerned those whom he liked. He had the faculty of inspiring a really fond affection from those with whom he was closely brought into contact. Perhaps there are some sides of his character which were put on sometimes to save embarrassment and sometimes to save trouble. His character was so strongly made up of honesty, fairness, adherence to ideals, and courage that all other qualities sink into insignificance.

The American Antiquarian Society had numbered eight Presidents of the United States in its membership and had had ex-President Taft upon its council, but no President had ever been one of its chief officers. After retiring from the Presidency, Mr. Coolidge had many positions offered to him, educational as well as commercial, but all of these he had steadfastly refused. Therefore we were rather surprised when he signified his willingness to accept the presidency of the organization, although he was somewhat familiar with its work and, because of near-by residence, knew many of its officers.

The first meeting at which Mr. Coolidge presided was in Boston in April, 1930. There he made a graceful speech of acceptance, in which he referred to the value of the study of history and his belief in the work which the society was doing. With a rather personal touch, he said that he could still be addressed as "Mr. President" and feel that the phrase was not a misnomer. This particular meeting in Boston was rather significant in that the two important subjects discussed were connected with the lives of Presidents Washington and Jefferson, that one of the papers was read by the son of President Tyler, and that the meeting was presided over by Mr. Coolidge himself.

Generally speaking, Mr. Coolidge said very little in conducting the meetings of the society, but attended strictly to the business of the meeting, just as he had done in presiding over political bodies. He rapidly fell into the routine of the society's work, taking over

whatever duties came to him. He wrote and read the report of the council in October, 1930 and 1931. But in October, 1932, he asked to be excused, saying that duties placed upon him in connection with the political campaign then in progress and his connection with the railroad investigation gave him little spare time.

Mr. Coolidge always showed much interest in the society's collection and frequently sent to the library books and documents which he thought would be useful. One late summer day in 1931 I spent most of the afternoon looking over some of the old family books which were in the storeroom back of the old farmhouse at Plymouth. Mr. Coolidge stood by, making remarks about the value of old schoolbooks and about the little opportunity for reading which the early New Englanders enjoyed, and acceding to practically every request on my part for certain books which would be of use in the Antiquarian Society's library.

On January 4, the very night before he died, he mailed to the society an envelope with several early documents, written by members of the Coolidge family, although not those of his own particular line. Only this coming week I had planned to visit him at Northampton to talk over certain matters regarding the increase of the society's library.

Mr. Coolidge did not miss a single meeting of the council during the three years that he was president. There were 4 meetings a year and this meant 12 meetings in all. Generally he visited my house in Worcester, arriving just before luncheon, which left half an hour to talk and smoke before the council meeting. He was an inveterate smoker, preferring mild domestic cigars. At the time of the annual meeting in October—that is, in October, 1930 and 1932—he stayed overnight at my house, which meant a longer period for conversation and reminiscence.

THE BROOKLYN EDISON CO.—ARTICLE BY JEROME COUNT

Mr. DILL. Mr. President, I ask unanimous consent to have printed in the RECORD an article published in the Nation of January 18, 1933, entitled "The Brooklyn Edison Co. Against the Public," by Jerome Count.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

BROOKLYN EDISON AGAINST THE PUBLIC

By Jerome Count

Hard times seem to mean little or nothing to the stockholders and managers of the electric-power industry. Although some of the holding companies have collapsed, to the detriment of thousands of stockholders, most of the large operating companies have, despite the depression, continued to pile up huge profits and pay good dividends. Only the consumers and workers have failed to share in this remarkable prosperity. Indeed, these two groups, but particularly the latter, have had to undergo sacrifices in order that the inflated dividend record of some of the utilities might be maintained. This is especially true in the case of the Brooklyn Edison Co., which through good times and bad for 29 years has not once failed to declare its regular annual dividend of 8 per cent. This record remained unbroken in 1932. Thus, by virtue of a state-protected monopoly on Brooklyn's electric business, the original stock of the Brooklyn Edison Co. has now been redeemed two and a half times over.

An 8 per cent dividend might not appear excessive at first glance, but when examined in its relation to other factors its excessive nature stands clearly revealed. For example, the profits available for payment of dividends by Brooklyn Edison have amounted during the depression to approximately 30 per cent of the gross income of the company. In 1931 the sum of $13,400,000 was available for dividends, as compared with gross sales in that year of $48,000,000. In 1930, $13,700,000 was available for this purpose out of $46,000,000 gross income. The dividends actually paid in 1931 amounted to $8,800,000, and $10,000,000 was paid out in 1932.

Brooklyn Edison's continued payment of dividends presents a marked contrast both to its labor policy and to the needs of the community to which it supplies electricity. Its issued capital stock increased from $19,000,000 in 1921 to $125,000,000 ten years later. This means that the 8 per cent dividend rate is now paid on 600 per cent more stock than a decade ago. Electric consumption, however, has increased only 10 to 15 per cent each year. Dividend tribute levied upon the people of Brooklyn has increased five times more rapidly than their demand for electric service. Meanwhile, Brooklyn Edison has not neglected its future. It added $4,200,000 in 1931 to its surplus of $26,500,000. Its reserves were increased to $20,000,000. Its surplus has been increased by 250 per cent in the past five years alone.

With these facts a matter of record, it was astonishing to learn recently that 3,000 more men had been discharged by the company, increasing the lay-off to 5,000 for 1931 and 1932. Determined protests by the Brotherhood of Edison Employees have brought no relief, and it is fitting to inquire into Brooklyn Edison's labor policy as contrasted with its huge accelerated profits. The most recent reports disclose that Brooklyn Edison business for these two years will show a net increase of 38,000,000 kilowatt-hours in electric sales over the year 1930. Dividends for 1932 totaled $10,000,000—$1,200,000 more than was paid in 1931 and $2,800,000 more than in 1928, 1929, or 1930. Since 1921 the annual dividends paid have increased at the rate of 60 per cent. The pay roll, however, has increased only at the rate of 15 per cent each year—an increase in labor force and not in average wage.

It is significant that while the increase in the share of labor coincides with the increased demand for electricity—15 per cent annually—the stockholders' share in the benefits of a decade's expansion in this industry has exceeded both by 400 per cent. The year 1931 intensified this injustice by decreasing the pay roll by $1,126,017, while dividends increased by $1,600,000. The year 1932 crowned all previous Brooklyn Edison achievements with a $4,000,000 decrease in wage payments as compared with 1930, and a $2,800,000 increase in dividends compared with the same year.

The prospects for Edison employees are more dismal for 1933. Construction work will reach the vanishing point and wage cuts are threatened, but dividends will continue their unbroken record of 29 years. There is even danger that Brooklyn Edison will issue $15,000,000 more stock, now held in reserve, and again increase dividends by $1,200,000. The significance of these figures is even more striking when they are reduced to terms of the average worker and the average stockholder. In a typical year, 1926—before the Consolidated Gas Co. assumed control of Brooklyn Edison—8,666 employees, devoting their entire year's labor to the production and distribution of electricity to more than 2,000,000 people, received an average annual wage per man of $1,500. The sum of $500, or one-third of this wage, was paid to 11,343 average stockholders enjoying the privileges of absentee ownership. The dividends distributed were equal to 48 per cent of the total amount paid to wage earners. The elimination of dividends would have raised a miserable wage level—less than $30 a week in the boom year 1926—to $2,000 a year. It is well known that many skilled Edison employees, supporting families, earned little more than $25 weekly in boom times, while union men were paid two and three times as much. Mr. J. C. Parker, president of the Brooklyn Edison, has suggested that the relative permanence of jobs in his company justified the meager wages paid. Fourteen thousand Brooklyn Edison workers believed that thesis at the beginning of 1931. Since then 5,000 of them have become completely disillusioned; 2,000 workers have been out of the company's employ for two years and 3,000 more were dropped in 1932. These 5,000 men could have been retained at a cost of $5,000,000. During the same period Brooklyn Edison had $25,000,000 available for dividends (of which $18,800,000 was actually paid) and reserves of $22,000,000 were accumulated.

The desperate plight of Edison men, as a result of this inequitable labor policy, was brought out at a hearing held by the public committee on power utilities and labor. A young worker 27 years old, with a wife and two children to support, was asked to describe his circumstances since his discharge from the company. He testified: "My present circumstances are that I haven't worked for four months. The only job I received was a couple of days ago and I made $2. The relief committee paid my month's rent for me and supplied me with $2.50 a week to eat on." Mr. Parker, president of the Brooklyn Edison, with singular irony, was chairman of what his former employee calls the "relief committee" in the recent drive for unemployment relief funds. Mr. Parker pleaded with Brooklyn to donate $1,250,000. He apparently sees no moral problem involved in thus committing arson with one hand and playing the hose with the other.

It has been declared by Mr. Parker that construction projects on which these men were employed have been completed and, in his own words, "when a house is built, it can't be built again." Let us examine this claim. In 1928 Brooklyn Edison laid out a 10-year construction program, including replacement of overhead wires and improvement of distribution facilities generally. After the second year of this 10-year program, Brooklyn Edison discharged 40 per cent of its force and left 36,000,000 feet of overhead electric wire still to be placed underground. The State legislature declared this change to be a public necessity 40 years ago, but at the rate at which it has progressed during the past five years, 40 years more will be required for its completion. Yet Mr. Parker insists that Brooklyn Edison has no work for these 5,000 men to do.

Similarly, there are 15,000 customers whose service is to be transferred from direct to alternating current. Mention this to Mr. Parker and he answers, "We are way ahead of schedule." Excessive rates and underpaid and insecure employees are the keystone of Edison prosperity. The public service commission has proved incapable of obtaining reasonable rates, and until recently has avoided all responsibility for labor conditions in public utilities. Although it is believed that the present law grants adequate authority to act, public bodies have sought an express legislative mandate for 15 years to direct the commission to deal with its problem. The constant threat of discharge hangs over the heads of Edison employees affiliating themselves with union activities. The American Federation of Labor has failed to take effective action against an illicit agreement between the electricians' union and the Edison system whereby the union maintains a "hands-off" policy. Labor and the consumers have met defeat at every turn.

When Brooklyn Edison was combined with the Consolidated Gas system, Morris L. Ernst, representing the public committee on power, endeavored to oppose the public service commission's unconditional approval of this deal and was all but ousted from the so-called public hearings. It is not without interest to analyze the results of this consolidation. According to Matthew S. Sloan, then president of the Brooklyn Edison Co., the unification meant an annual saving of $17,700,000 to the companies. Within the space of a few months the Consolidated system raised its dividend rate by $8,000,000 per annum, and in the following year the dividends were again increased, so that the former holders

of Brooklyn Edison and Consolidated stock received $18,000,000 in additional dividends just after the combination took place.

The last official report of the public service commission reflects the stockholders' rewards from this deal. In the year following the combination dividend payments in the gas and electric industry of New York City, dominated primarily by the Consolidated system, amounted to $43,600,000, representing an increase of 33 per cent over the previous year. During the same year, however, employment (as measured by wages in the industry) increased only 3 per cent. Again, in the following year, dividends were increased by an additional 25 per cent—almost $11,000,000. The pay roll increased only 5 per cent. Thus, during the two years immediately following the merger of Brooklyn Edison with Consolidated Gas, labor received the benefits of increased industry to the extent of 8 per cent, while stockholders reaped 58 per cent more dividends. At the same time the demand for power and gas increased only 10 per cent, while the public paid the same excessive rates. The files of the Public Service Commission reek with Edison scandal: $70,000,000 in accumulated "unification savings" was to be passed on to the public in the form of reduced rates, according to a promise made by Mr. Sloan five years ago, but this has not been done; $150,000,000 in fictitious capitalization is still awaiting investigation; a $50,000,000 permanent annual dividend load paid by consumers is still to be justified; other and hardly less important matters need looking into.

Fifteen years of struggle against this situation, during which the public service commission has been besieged with protests, petitions, and complaints, have been virtually barren of results. In fact, the only concrete action taken resulted in a substantial increase in the rates paid by small consumers of electricity. It was announced that the company must have the right to charge a minimum rate as a necessary condition to a well-advertised plan of a "voluntary reduction" of $5,500,000 offered by the Consolidated system in 1930. The reduced rates became effective, however, only when the consumer used more than a specified amount of electricity. Experience has proved that the "reduction" resulted in an increase for 50 per cent of the consumers who were forced to pay the new minimum rate; while the only buyers of electricity who profited by the reduction were the large users, industrial and otherwise.

Lest the consumer despair, it may be said that a recent report had it that the commission is opposed to further increases in rates except under "special conditions." Those who have their ears to the ground, however, are unable to report that rate reductions have even been rumored.

RECESS

Mr. McNARY. I move that the Senate take a recess until 11 o'clock to-morrow.

The motion was agreed to; and the Senate (at 10 o'clock p. m.) took a recess until to-morrow, Wednesday, January 25, 1933, at 11 o'clock a. m.

NOMINATIONS

Executive nominations received by the Senate January 24 (legislative day of January 10), 1933

REGISTER OF THE LAND OFFICE

Walter Spencer, of Colorado, to be register of the land office at Denver, Colo. (Reappointment, effective February 23, 1933.)

COAST GUARD

The following-named temporary commissioned officers to be ensigns in the Coast Guard of the United States, to rank as such from date of commission:

Ensign (Temporary) Alvin H. Giffin.
Ensign (Temporary) Joe G. Lawrence.
Ensign (Temporary) James A. Alger, jr.
Ensign (Temporary) Robert S. Lecky.

POSTMASTERS

ALABAMA

James W. Snipes to be postmaster at Florala, Ala., in place of J. W. Snipes. Incumbent's commission expires February 2, 1933.

Madison D. Majors to be postmaster at Georgiana, Ala., in place of M. D. Majors. Incumbent's commission expires February 11, 1933.

John H. Lynn to be postmaster at Summerdale, Ala., in place of J. H. Lynn. Incumbent's commission expires February 14, 1933.

John F. Morton to be postmaster at Tuscaloosa, Ala., in place of J. F. Morton. Incumbent's commission expires February 2, 1933.

Evelyn E. Morgan to be postmaster at Uniontown, Ala., in place of E. E. Morgan. Incumbent's commission expires February 2, 1933.

WITHDRAWALS

Executive nomination withdrawn from the Senate January 24 (legislative day of January 10), 1933

MARINE CORPS

First Lieut. Adolph Stahlberger (deceased) to be a captain in the Marine Corps from the 25th day of December, 1932.

HOUSE OF REPRESENTATIVES

TUESDAY, JANUARY 24, 1933

The House met at 12 o'clock noon.

The Chaplain, Rev. James Shera Montgomery, D. D., offered the following prayer:

Heavenly Father, the Master of Galilee hath said, "Learn of me." We thank Thee for Him who is the one outstanding Teacher of the art of right living. He passed through such manifold and contrasted circumstances, exercising such wondrous courage and strength, that He compels our most humble and reverent admiration. Yes, Blessed Lord, let us learn of Him in joy and in sorrow, in labor and in leisure, in success and in failure. In all these experiences may He steady our souls and guide us in the way. O may His examples glow in our conduct until they become the very music and poetry of our daily lives. Quicken our consciences toward all things upright and warm our hearts toward all things good. Bless us all with that love that lies beyond earth's fairest things. Amen.

The Journal of the proceedings of yesterday was read and approved.

MESSAGE FROM THE SENATE

A message from the Senate by Mr. Craven, its principal clerk, announced that the Senate had agreed to the amendments of the House to bills of the Senate of the following titles:

S. 5131. An act to extend the times for commencing and completing the construction of a bridge across the Ohio River at or near Cannelton, Ind.; and

S. 5232. An act to extend the time for completing the construction of a bridge across the Missouri River at or near St. Charles, Mo.

CALENDAR WEDNESDAY

Mr. RAINEY. Mr. Speaker, I ask unanimous consent that on to-morrow business in order on Calendar Wednesday may be dispensed with.

The SPEAKER. Is there objection to the request of the gentleman from Illinois?

Mr. LAGUARDIA. Reserving the right to object, and I shall not object, I wonder if the distinguished floor leader can inform us if the Committee on Patents, which committee has the next call on the calendar, will come forward at any time this session with the copyright bill?

Mr. RAINEY. I am sorry I can not answer the gentleman's question.

The SPEAKER. Is there objection?

There was no objection.

INDIANS OF THE FIVE CIVILIZED TRIBES

Mr. HOWARD. Mr. Speaker, I call up the conference report on the bill (H. R. 8750) relative to restrictions applicable to Indians of the Five Civilized Tribes in Oklahoma, and I ask unanimous consent that the statement may be read in lieu of the report.

The SPEAKER. Is there objection to the request of the gentleman from Nebraska [Mr. HOWARD]?

There was no objection.

The Clerk read the statement.

The conference report and statement are as follows:

CONFERENCE REPORT

The committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 8750) relative to restrictions applicable to Indians of the Five Civilized Tribes in Oklahoma, having met, after full and free conference, have agreed to recommend and do recommend to their respective Houses as follows:

That the House recede from its disagreement to the amendments of the Senate numbered 1, 2, and 4; and agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 3, and agree to the same with an amendment as follows: In lieu of the matter proposed to be inserted by the Senate amendment insert:

"SEC. 2. The Secretary of the Interior be, and he is hereby, authorized to permit, in his discretion and subject to his approval, any Indian of the Five Civilized Tribes over the age of 21 years having restricted funds or other property subject to the supervision of the Secretary of the Interior, to create and establish, out of the restricted funds or other property, trusts for the benefits of such Indian, his heirs, or other beneficiaries designated by him, such trusts to be created by contracts or agreements by and between the Indian and incorporated trust companies or such banks as may be authorized by law to act as fiduciaries or trustees: *Provided,* That no trust company or bank shall be trustee in any trust created under this act which has paid or promised to pay to any person other than an officer or employee on the regular pay roll thereof any charge, fee, commission, or remuneration for any service or influence in securing or attempting to secure for it the trusteeship in any trust: *Provided further,* That all trust agreements or contracts made or entered into prior to the date of approval of this act, and all contracts or agreements made or entered into prior to said date providing for or looking to the creation of such trust or trusts shall be null and void unless such contracts or agreements shall have heretofore been approved by the Secretary of the Interior.

"SEC. 3. The Secretary of the Interior be, and he is hereby, authorized, upon the execution and approval of any trust agreement or contract as herein provided, to transfer, or cause to be transferred, to the trustee, from the individual restricted or trust funds or other restricted property of the respective Indian, the funds or property required by the terms of the approved agreement, and the funds or property so transferred shall in each case be held by the trustee subject to the terms and conditions of the trust agreement or contract creating the trust, separate and apart from all assets, investments, or trust estates in the hands of said trustee.

"SEC. 4. None of the restrictions upon the funds or property transferred under the terms of any such trust agreement or contract shall be in any manner released during the continuance of the restriction period now or hereafter provided by law, except as provided by the terms of such agreement or contract, and neither the corpus of said trust nor the income derived therefrom shall, during the restriction period provided by law, be subject to alienation, or encumbrance, nor to the satisfaction of any debt or other liability of any beneficiary of such trust during the said restriction period. The trustee shall render an annual accounting to the Secretary of the Interior and to the beneficiary or beneficiaries to whom the income for the preceding year, or any part thereof, was due and payable.

"SEC. 5. Trust agreements or contracts executed and approved as herein provided shall be irrevocable except with the consent and approval of the Secretary of the Interior: *Provided,* That if any trust, trust agreement, or contract be annulled, canceled, or set aside by order of any court, or otherwise, the principal or corpus of the trust estate, with all accrued and unpaid interest, shall be returned to the Secretary of the Interior as restricted individual Indian property.

"SEC. 6. If, after the creation and approval of any trust, it is found that said trust was procured in violation of any

of the provisions of this act, or that the trustee designated therein has failed or refused to properly perform the duties imposed thereby, in accordance with the terms, provisions, and requirements of said trust agreement, it shall be the duty of the Attorney General to institute appropriate proceedings in the Federal courts for the cancellation and annulment of said trust by court decree, and upon decree of annulment and cancellation, which shall be at the cost of the trustee, and after accounting, but without the allowance of any fee, charge, or commission for any services rendered by the trustee, all funds held by the trustee shall be paid to the Secretary of the Interior as restricted funds, and the Federal courts are hereby given exclusive jurisdiction of all actions involving an accounting under any trust created under the provisions of this act, and all actions to cancel, annul, or set aside any trust entered into pursuant to this act.

"SEC. 7. The Secretary of the Interior is hereby authorized to prescribe such rules and regulations as he may deem necessary for the proper administration of this act. He shall fix and determine the value of each trust, reviewing such valuation from time to time as he may deem necessary, and, for the faithful performance of each trust agreement or contract, shall require corporate surety company bond equal to the value of the respective trust so fixed and determined, or the deposit of securities of the United States Government equal to such amount: *Provided, however,* That trusts created under the provisions of this act shall not extend beyond a period 21 years after the death of the last survivor of the named beneficiaries in the respective trust agreement."

And on page 2, line 18, of the House bill, strike out "2" and insert "8."

And the Senate agree to the same.

EDGAR HOWARD,
SCOTT LEAVITT,
Managers on the part of the House.
LYNN J. FRAZIER,
THOS. D. SCHALL,
ELMER THOMAS,
Managers on the part of the Senate.

STATEMENT

On amendment No. 1: Strikes out the word "members" in line 5, page 1, and inserts in lieu thereof "and so long as belonging to Indians," so as to make it certain that the supervision of the Secretary of the Interior extends to funds and securities only so long as they belong to Indians of one-half or more of Indian blood.

On amendment No. 2: Strikes out the words "of Indians" and inserts the words "In Oklahoma," so as to confine the terms of the act to the Five Civilized Tribes in Oklahoma.

On amendment No. 4: Inserts, in line 14, page 3, after the word "Oklahoma," in June, 1914," so as to define more definitely the date when the rules of procedure were adopted.

On amendment No. 3: Was added in the Senate and authorized trust agreements to be entered into by restricted Indians, with the approval of the Secretary of the Interior. The House disagreed to the form of this amendment, and the conferees have agreed upon language intended to give the greatest possible protection to the Indians, and authorized Indians desiring to enter into trust agreements to make the same with the approval of the Secretary of the Interior under certain protective limitations and safeguards.

EDGAR HOWARD,
SCOTT LEAVITT,
Managers on the part of the House.

Mr. STAFFORD. Will the gentleman yield?

Mr. HOWARD. I yield.

Mr. STAFFORD. Mr. Speaker, there is included in this very important measure a new feature, Senate amendment No. 3, authorizing the Indians, with the approval of the Secretary of the Interior, to have trust estates created, and have the funds in the possession and under the control of trust companies. It is a departure from the established practice, in having the funds in the Treasury, and I think the gentleman from Nebraska [Mr. HOWARD] should make some passing comment upon that subject, because the House has never acted on that phase of the question.

Mr. HOWARD. The amendment to which the gentleman from Wisconsin [Mr. STAFFORD] refers was engrafted upon the restriction bill in the Senate. For 10 long years, Mr. Speaker, I have fought this trust bill in the House and in the Committee on Indian Affairs, seeking always to so amend it that no Indian's property should be committed to any manner of trust without its being accompanied by a bond to be approved by the Secretary of the Interior. That has now been incorporated in the bill as it appears before the House at this moment. I am very much gratified at the success of my long effort in that direction. I am very much gratified to know that every divergent interest in connection with both pieces of this legislation has been unanimously approved by the contending interests.

Mr. SNELL. Will the gentleman yield for a question?

Mr. HOWARD. I yield.

Mr. SNELL. Last evening when the gentleman first presented this report I requested that it go over until this morning for two reasons. I thought it too late last night, and I wanted to get a little information. The Secretary of the Interior evidently thought I was opposed to the conference report, and in communication with him this morning he says it is entirely in accord with the department and they really feel it is for the best interest of the Indians and the Government also, and there should be no special objection to the report.

The conference report was agreed to.

LOANS TO FARMERS FOR CROP PRODUCTION AND HARVESTING

Mr. JONES. Mr. Speaker, I call up the conference report on the bill (S. 5160) to provide for loans to farmers for crop production and harvesting during the year 1933, and for other purposes, and I ask unanimous consent that the statement may be read in lieu of the report.

The SPEAKER. Is there objection to the request of the gentleman from Texas [Mr. JONES]?

There was no objection.

The Clerk read the statement.

The conference report and statement are as follows:

CONFERENCE REPORT

The committee of conference on the disagreeing votes of the two Houses on the amendment of the House to the bill (S. 5160) to provide for loans to farmers for crop production and harvesting during the year 1933, and for other purposes, having met, after full and free conference have agreed to recommend and do recommend to their respective Houses as follows:

That the Senate recede from its disagreement to the amendment of the House, and agreed to the same with the following amendments: On page 2 of the House engrossed amendment, line 3, strike out "cultivation and harvesting" and insert "and cultivation, and in drought and storm stricken areas not to exceed $1,000,000 for feed for farm livestock"; on page 2, line 5, of said engrossed amendment, strike out "$75,000,000" and insert "$90,000,000"; on page 3, line 2, of said engrossed amendment, strike out the words "and harvesting"; on page 3, line 3, after the word "crops" and the comma, insert "and feed for farm livestock"; and the House agree to the same.

MARVIN JONES,
H. P. FULMER,
W. W. LARSEN,
GILBERT N. HAUGEN,
FRED S. PURNELL,
Managers on the part of the House.
CHAS. L. MCNARY,
LYNN J. FRAZIER,
E. D. SMITH,
Managers on the part of the Senate.

STATEMENT

The managers on the part of the House at the conference on the disagreeing votes of the two Houses on the bill (S.

5160) to provide for loans to farmers for crop production and harvesting during the year 1933, and for other purposes, submit the following statement in explanation of the effect of the action agreed upon by the conferees and recommended in the accompanying conference report:

The bill as agreed to in conference is the same as the House amendment except that—

(1) In the House amendment loans were to be made for crop production, planting, fallowing, cultivation, and harvesting. As agreed to in conference, loans are to be made for crop production, planting, fallowing, and cultivation, and in drought and storm stricken areas not more than $1,000,000 may be loaned for feed for farm livestock.

(2) The House amendment contained a limitation of $75,000,000 on the total sums to be used for the purposes of the act. As agreed to in conference this amount is changed to $90,000,000.

MARVIN JONES,
H. P. FULMER,
W. W. LARSEN,
GILBERT N. HAUGEN,
FRED S. PURNELL,
Managers on the part of the House.

Mr. STAFFORD. Will the gentleman make a brief explanation, because the first amendment was not considered in the House at all, as far as the limitation of amount that might be expended is concerned.

Mr. JONES. The House bill has been agreed upon with the changes noted. The Senate bill being somewhat indefinite in its figures—the estimate being that the original Senate bill would carry about $41,000,000—was stricken out, and the House bill was accepted with two qualifications. One of those qualifications is that the Senate amendment, which permitted the use of a portion of these funds for the purchase of feed for farm work stock in the drought and storm stricken areas, was included, but with a limitation on that inclusion that it should not exceed $1,000,000 for that purpose. The other amendment which was in the House bill, a limitation of $75,000,000 as the total to be used, was increased to $90,000,000. Those are the only two changes in the bill as it passed the House, except the word harvesting was stricken out, since representatives of the department felt that the administration could be handled better without the specific term. The conference report is exactly the terms of the House bill with those two exceptions.

Mr. SNELL. Will the gentleman yield?

Mr. JONES. I yield.

Mr. SNELL. I wish to say that my personal feeling about this report is just the same as when the bill originally passed this House. I am against it in principle, and I think it is entirely wrong; but I appreciate the fact that that is water over the dam, and there is no use opposing it now.

Mr. STAFFORD. Will the gentleman yield?

Mr. JONES. I yield.

Mr. STAFFORD. My attention was called last fall to the conditions in the drought-stricken area of northern Wisconsin, and to the need of providing feed for the livestock. Does the gentleman believe that $1,000,000 is adequate, when we are appropriating $90,000,000 for seed purposes for farmers, many of whom do not need it, and who are in financial position to procure their own seed or secure loans with which to purchase it?

Mr. JONES. Most of the representatives agreed that $500,000 would be sufficient, and that $1,000,000 would cover the necessities without question. It is simply for the drought and storm stricken areas.

The conference report was agreed to.

PERMISSION TO ADDRESS THE HOUSE

Mr. BECK. Mr. Speaker, I ask unanimous consent to address the House for three minutes.

The SPEAKER. Is there objection to the request of the gentleman from Pennsylvania?

There was no objection.

Mr. BECK. Mr. Speaker, on December 7 I had the great privilege of addressing the House on the question of the power of Congress to supervise and control conventions held in the several States to ratify an amendment to the Constitution. Subsequent to that, my good friend and a very distinguished lawyer, Mr. Mitchell Palmer, filed a supplemental brief in the nature of a reply to the address that I had made. Subsequent to that the New York Times asked me to write for that newspaper a further expression of my views. I did so, and last Sunday the Times contained the article in which, in a far more precise and deliberate manner than was possible in the extemporaneous address which the House heard with so much indulgence, I reaffirmed my view that there was no constitutional power in Congress to supervise and control the electoral machinery of the States in the matter of ratifying conventions.

I may say that in this article in the New York Times I took occasion to say I did not question for a moment the power of Congress to appropriate to the States in reimbursement of their expenses whatever sums might be necessary to hold their ratifying conventions.

Mr. Speaker, I ask unanimous consent to revise and extend my remarks by adding the article by me in the New York Times published last Sunday, January 22.

The SPEAKER. Is there objection to the request of the gentleman from Pennsylvania?

There was no objection.

The matter referred to follows:

DRY REPEAL BY CONVENTIONS—BECK DIFFERS WITH PALMER—HE CRITICIZES THE FORMER ATTORNEY GENERAL'S THEORY AND HOLDS THAT CONGRESS CAN NOT FIX THE PROCEDURE OF THE CONVENTIONS

(Debate in Congress on the form of the repeal amendment has raised the question of how the amendment is to be acted upon by the States, since platforms of both political parties call for consideration by conventions rather than by legislatures. Ratification of amendments by conventions has never been tried, and students of the Constitution have been free to speculate on the procedure. In articles published in the Times, A. Mitchell Palmer and Prof. Howard Lee McBain took the position that the Federal Government would have broad powers over State conventions. In this article a different judgment is given by Representative JAMES M. BECK, former Solicitor General, and a well-known writer on the Constitution.)

By James M. Beck

It is given to few to suggest new ideas in constitutional jurisprudence. The Constitution has now been in operation for 145 years, and during that period each of its provisions has been subjected to meticulous examination by the microscope of the judiciary. To vary the metaphor, it is now necessary, in order to determine what the Constitution is, as now interpreted, to dig down through the successive strata of judicial decisions for more than a century. As a result, when the text of the Constitution is thus excavated in the manner of Pompeii, some of it is found to have been crushed under the lava of judicial construction, which has unceasingly poured from that great volcano, the Supreme Court of the United States.

STATE CONTROL IN CONGRESS

It is therefore interesting to note that A. Mitchell Palmer, former Attorney General of the United States and a lawyer of distinction, has suggested an idea, which, so far as my reading goes, had never previously occurred to anyone, and that is, that Congress has plenary authority to control the States in the matter of constituting and conducting conventions to consider amendments to the Federal Constitution.

With a certitude of judgment, which is to me a matter of envy, Mr. Palmer says:

"It can not be doubted that the Congress has the power, if it desires to exercise it, of providing all the details by which this Federal function of amending the Constitution by conventions in the States shall be exercised."

He amplifies this general contention by claiming that in so doing Congress can arrange voting districts (incidentally, possibly gerrymandering them), prescribe the qualifications of the electors, the form and character of the ballot, the time when the convention shall be held and its rules of procedure—in other words, that the Congress can take from each State its electoral machinery and mold it nearer to the heart's desire of the Congress, and all this in the most vital of all governmental functions, the power to amend the fundamental law.

ADVANTAGES AND DISADVANTAGES

In his recent contribution to the New York Times Mr. Palmer has undoubtedly shown that there would be many practical advantages in thus construing the Constitution, and especially in the matter of the repeal of the eighteenth amendment. As one who favors such repeal I should be glad, if only the eighteenth amendment was concerned, to have his construction followed, for it undoubtedly would be a short cut across the lot; but I dislike

such short cuts when I look into the future, and, in an age of coming change, view the possibilities of such a procedure in the matter of possible amendments which would not have the merit of the repeal of the eighteenth amendment.

In a subsequent communication to the Times by Prof. Howard Lee McBain of Columbia University, Mr. Palmer's constitutional theory is supported by another eminent student of the Constitution, who, however, is not so clear about it as is Mr. Palmer. Professor McBain recognizes that "there is room here for some difference of opinion," but he is "inclined to believe, however, that so far as power is concerned, Congress could enact such a law."

I regret my inability to concur in either opinion. In my judgment, the power of Congress is limited by the text of the instrument to the method of ratification—whether by legislatures or conventions—and the time within which such ratification must be made, and I contend further that there is no textual or even historical justification for the Palmer theory.

THE RIGHTS OF STATES

Its novelty may be measured by the fact that it was a distinct shock to many men when first propounded. I have reason to believe that the Garner resolution to repeal the eighteenth amendment, which failed by only 6 votes to pass the House of Representatives, would have been passed by that body had not at least six Members taken fright at the suggestion that Congress could destroy the last vestige of self-respect of the States by sending Federal officials into the States to conduct elections in behalf of the people of those States.

I entertain no doubt that Congress can appropriate money to the various States to cover the costs of the ratifying conventions. This is not only due to the fact that there is no judicial power to censor appropriations, which rest in the political discretion of Congress, but for the more pertinent reason that the Federal Government has a legitimate interest in the process of amendment, and if Congress cares to relieve the States of the burden of expense which would inevitably be caused by ratifying conventions, such Federal appropriations are within the legislative discretion of Congress.

In considering the broader question whether Congress can relieve the States of the function of calling State conventions and prescribing the manner of selecting delegates thereto, it should be remembered at the outset that if Mr. Palmer's proposal was a distinct shock to many of his party associates in Congress, who incontinently fled from such an extreme assertion of Federal power, it would have been an even greater shock to the members of the Constitutional Convention of 1787. If such a theory of the Constitution had been propounded in that body, it is probable that the convention would have forthwith adjourned sine die. It is morally certain that if a Constitution containing an express assertion of such power had ever been submitted to the thirteen States they would have refused to ratify that Constitution.

CONGRESS AND LEGISLATURE

It may well be that the reason why the convention method has never been resorted to since the Constitution was adopted is due to the fact that successive Congresses which have from time to time submitted amendments to the States were fearful that the Congress might assert some power in respect thereto which, in the nature of things, it could not assert in respect to existing State legislatures.

In this connection it must also be remembered that if a State convention is a Federal agency so as to justify the supervisory power of the Congress, then a State legislature is equally such an agency when it considers the ratification of an amendment, and it must logically follow that if Congress can enter the States and take from them the electoral machinery for electing delegates to such conventions, it could enter the legislatures of the States and supervise the process of ratification, and I imagine that Mr. Palmer would shrink from that contention.

THE ORIGINAL PURPOSE

We do know what the Constitutional Convention of 1787 had in mind when it submitted the Constitution to the States for their adoption. The convention reported back the draft of the Constitution to the then existing Congress of the old Confederation. The Articles of Confederation had provided that there should be no alteration "unless such alteration be agreed to in a Congress of the United States and be afterwards affirmed by the legislatures of every State." It never occurred to that Congress of the old Confederation, when charged with the duty of submitting the new Constitution to the States, that it had any power to go into the States and take charge of the process of ratification. Had it done so, as previously stated, it would have caused such ill feeling that ratification would have been an impossibility.

On the contrary, the Congress submitted the Constitution, to quote its resolution, "to conventions of the delegates chosen in each State by the people thereof, under the recommendation of its legislature," and this was the process followed. It is our only historical precedent in the matter.

However, we have in the Constitution itself certain cognate clauses which indubitably show that when the Constitutional Convention thought it necessary to supervise the functions of the States it particularly prescribed such restricted power. For example, Article I, section 4, in respect to the election of Members to Congress, says:

"The times, places, and manner of holding elections for Senators and Representatives shall be prescribed in each State by the legislature thereof; but the Congress may at any time, by law, make or alter such regulations, except as to the place of choosing Senators."

Thus the Congress reserved the right, in the interest of uniformity, to alter electoral regulations, which were, however, primarily committed to the States.

Another clause of equal importance is Article II, section 1, which provides that each State shall appoint in such manner as the legislature thereof may direct a number of electors, etc.

Thus the Electoral College, so called, was to be selected, and this was left unchanged by the twelfth amendment. An Electoral College is only a State convention called for the specific purpose of voting for a President and a Vice President, and it is significant that the Constitution expressly provides that the method of electing electors shall be "as the legislature may direct."

CONGRESSIONAL POWER LIMITED

If we now turn to Article V of the Constitution, which provides for amendments, it will be noted that while Congress can propose amendments to the Constitution, the only additional power given to Congress by the language of the instrument is to determine whether ratification shall be by State legislatures or by special conventions, "as the one or the other mode of ratification may be proposed by Congress."

If it had been intended that Congress, having selected the mode of ratification, could thereupon supervise the ratification by the States, whether by legislatures or conventions, presumably the Constitution would have said so, but, as previously stated—and the fact can not be too constantly emphasized—any additional power would have been rejected by a convention composed of States, which were not unconscious of their dignity as sovereign States and which were very jealous of their own electoral machinery.

INTERPRETING THE CONSTITUTION

Mr. Palmer seems to argue that the failure of the Constitution to confer such supervisory power is an argument in favor of the power, which seems to be a novel method of construing the Constitution. Even if the failure of the Constitution to grant such power can be regarded as justifying its existence by implication, yet it must be remembered that virtually as a part of the Constitution the States adopted Article X, which expressly provided that all powers "not delegated to the United States * * * are reserved to the States respectively, or to the people." Therefore the theory of a power based upon a casus omissus is answered by the tenth amendment.

Upon what possible ground, then, can this assertion of a power, so subversive of the dignity and power of the States in the vital matter of amendment, be based? Mr. Palmer's argument is pyramided upon one expression of the Supreme Court in the case of Leser *v.* Garnett (258 U. S. 130). In that case Justice Brandeis said:

"But the function of a State legislature in ratifying a proposed amendment to the Federal Constitution, like the function of Congress in proposing the amendment, is a Federal function derived from the Federal Constitution, and it transcends any limitations sought to be imposed by the people of a State."

In respect to the question then before the court, the expression "Federal function" is easily explainable. Of course, any amendment proposed under Article V is a "Federal function" in the sense that it is a power derived from the Constitution. In the absence of Article V, the Constitution could only be amended by the concurrence of all the States.

The purpose of Article V was to provide a more liberal method of amendment by enabling three-fourths of the States to ratify an amendment; and when, therefore, the procedure of Article V is followed, it follows that it is a constitutional function, participated in by the Federal Government, and to that extent a "Federal function." Nevertheless the ratification is by the States. Only on that theory can Nevada, with less than 100,000 people, have the same voice as New York, with 12,000,000.

FEDERAL ASPECT OF LEGISLATURES

As previously stated, if a convention is a Federal agency because it performs in part a "Federal function," then assuredly it is true that the legislature, when similarly engaged, is a Federal agency, and we are then logically confronted by the conclusion that in the most important and vital, and, I venture to say, the most sacred, of all functions of the States, as to whether they will or will not accept a modification of the fundamental compact, their legislatures, representing the will of their people, have become mere agencies of the Federal Government.

If this be so, the action of the State legislatures in proposing an amendment, or even uniting in a call for a national convention, would equally be a Federal agency, and as such within the plenary power of Congress; and this would seem to be a reductio ad absurdum.

The one argument which Mr. Palmer has made which has some force is that if a sufficient number of States should unite in calling for a national convention, the constituting of that convention would require a certain degree of uniformity. Nevertheless, Congress would, in my judgment, have no power to supervise the election of the delegates to the national convention, but the national convention, when called, would transcend the political power of the several States and would require as to its methods of procedure some Federal regulation ex necessitate rei.

In my argument on this question in the House of Representatives, which was purely extemporaneous, I was betrayed into a discussion of an irrelevant, abstract question as to whether, in the very nature of our Government, there was not a power of

amendment, if all the States agreed, independent of Article V. This gave Mr. Palmer an opening in my armor, of which he took effective advantage in a supplemental argument.

MR. PALMER'S ARGUMENT

He has quoted effectively some striking statements of Chief Justice Marshall that our Constitution emanates from the people and not from the States in their sovereign capacity, and he certainly showed that any such conjectural power of the States in their residual capacity to agree unanimously upon an amendment without resorting to Article V is very doubtful.

This matter, however, does not bear upon the subject matter now in hand, and if I refer to it it is only to acknowledge the force of Mr. Palmer's reply in this respect and also to suggest the idea that if Chief Justice Marshall had had the advantage of reading Madison's Debates before he wrote the decision in McCulloch *v.* Maryland, it is doubtful whether his assertion that the Constitution was drafted and ratified by the people and not by the States would have been so strongly stated.

The Debates did not become public property for years after and seem to indicate that the expression in the preamble of the Constitution, "We, the people—" was intended to be qualified by naming the States, and that the States were only omitted because the convention could not tell how many States would ratify. This is, however, only a matter of academic interest.

So far as the subject matter of this controversy is concerned, it is enough to say that neither the text of the Constitution nor its historic background, nor any precedent or act of the United States from the beginning of the Republic, gives any countenance to the theory so ably and forcefully presented by the distinguished ex-Attorney General of the United States.

I have been at some pains to combat Mr. Palmer's theory, which has attracted widespread attention, because, with all respect to him, it seems to me a dangerous constitutional heresy. I am old enough to remember the agitation, when I was a student in college, over the Force bill, under which it was proposed to supervise elections in the States, where Members of Congress or presidential electors were elected, by Federal bayonets. This movement was defeated and has never since been heard of. It might conceivably have led to a renewal of the Civil War.

IMPLICATIONS OF THE THEORY

I appreciate that Mr. Palmer and those who think with him do not contemplate any such assertion of Federal power, but I am concerned with the logical implications of this novel theory. We are probably entering upon a period of great constitutional changes. The changed political philosophy of the American people is rapidly converting this Nation from one that was based upon an individualistic conception of government to a highly collectivistic theory.

It may well be that the time will come when a Congress will propose amendments to the Constitution to vest even greater power in the Federal Government and to promote an even greater centralization of authority in Washington. It might then seem to some Congress of the future that to secure the adoption of such an amendment it would be necessary for all elections to State conventions to be controlled by the Federal Government, and even conceivably by the use of Federal bayonets.

I am too old-fashioned a constitutionalist to contemplate such a possibility with any equanimity. I believe in the "indissoluble Union of indestructible States," and it seems to me that these indestructible States would soon become easily destructible if the Federal Government can take away from the peoples of the States, respectively, their sovereign and residual rights to determine the methods whereby conventions called to ratify a new amendment to the Constitution shall be held.

I emphasize this for, warmly as I favor a speedy and effectual repeal of the eighteenth amendment, I can not lend myself to a theory of the Constitution which might be so destructive of the rights of the States.

RATIFICATION OF TWENTIETH AMENDMENT

Mr. NELSON of Missouri. Mr. Speaker, I ask unanimous consent to address the House for one-half minute.

The SPEAKER. Is there objection to the request of the gentleman from Missouri?

There was no objection.

Mr. NELSON of Missouri. Mr. Speaker, it is with pride and pleasure I call attention to the face that on yesterday Missouri became the thirty-sixth State to ratify the "lame-duck" amendment to the Constitution. [Applause.]

WAR DEPARTMENT APPROPRIATION BILL

Mr. COLLINS. Mr. Speaker, I move that the House resolve itself into the Committee of the Whole House on the state of the Union for the further consideration of the bill (H. R. 14199) making appropriations for the military and nonmilitary activities of the War Department for the fiscal year ending June 30, 1934, and for other purposes.

The motion was agreed to.

Accordingly the House resolved itself into the Committee of the Whole House on the state of the Union for the further consideration of the bill H. R. 14199, with Mr. DRIVER in the chair.

The Clerk read the title of the bill.

Mr. GOSS. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. Goss: On page 58, after line 14, insert "Under the authorization contained in this act no issue of reserve supplies or equipment shall be made where such issues impair the reserves held by the War Department for two field armies, or 1,000,000 men."

Mr. LAGUARDIA. Mr. Chairman, I reserve a point of order.

Mr. BLANTON. I make the point of order.

The CHAIRMAN. The gentleman from Texas will state the point of order.

Mr. BLANTON. Mr. Chairman, I make the point of order that it is legislation unauthorized on an appropriation bill; that it is in conflict with existing law; that it interferes with the discretion of the Secretary of War.

Mr. LAGUARDIA. And it is no limitation on the appropriation but will cause an increase of the appropriation.

Mr. GOSS. Mr. Chairman, will the gentleman yield?

Mr. BLANTON. I have not the floor. I yield, if I have the floor.

The CHAIRMAN. Does the gentleman desire to be heard further on the point of order?

Mr. BLANTON. I submit the point of order to the Chair for determination.

Mr. GOSS. I concede the gentleman's point of order; but may I just call attention to the fact that similar language has been carried in this appropriation bill for many years?

Mr. BLANTON. The gentleman himself has complained that former Committees on Appropriations have put legislation in bills.

Mr. GOSS. Correct; but may I state to the gentleman that similar language has been in the bill for many, many years without objection?

Mr. BLANTON. It has been sought to put a great deal of legislation on appropriation bills.

Mr. LAGUARDIA. Mr. Chairman, will the gentleman yield?

Mr. BLANTON. I yield.

Mr. LAGUARDIA. It is quite true similar language has been carried in the bill for many, many years; but the gentleman, I am sure, heard his distinguished leader, the gentleman from New York, complain about the enormous cost annually of buying supplies to be kept in this reserve; and I am sure the gentleman wants to follow his leadership.

Mr. GOSS. That is perfectly right; but may I just call the gentleman's attention to the fact that it has been the policy of the War Department to carry their reserves on the basis of two field armies, or 1,000,000 men, and without that direction we may be required to buy more material, I may say to the gentleman, in the near future. I concede the point of order if the gentleman is going to insist on it.

Mr. BLANTON. Mr. Chairman, I insist on the point of order.

The CHAIRMAN. The Chair sustains the point of order.

The Clerk read as follows:

Not to exceed 10 per cent of the total amount that may be expended from appropriations made in this act for and incident to the manufacture and/or production of wearing apparel for enlisted men of the Regular Army shall be expended for the manufacture and/or production of such apparel in Government factories or establishments, except that such limitation may be exceeded to the extent that it may be ascertained, after competitive bidding in accordance with law, that work of such character may be performed at lesser cost in such Government factories or establishments.

Mr. RANSLEY. Mr. Chairman, I make a point of order against the amendment that it is in violation of rule 21, in that it is legislation on an appropriation bill.

I also call attention to section 5 (a) of the national defense act, of which it is a violation.

There can not be any question brought forward that there is a reduction of expenditure. Nowhere within the four

corners of the entire paragraph can anyone find a retrenchment or saving. Ten per cent is mentioned as the amount that will remain in the quartermaster depot, but 90 per cent will be manufactured on the outside. So there will be 100 per cent, anyway, of the clothing made.

The latter part of the clause I have made a point of order against refers to bidding. Surely no one can tell what the result of bids will be until they are received and scheduled.

With the permission of the Chair, I call attention to decisions that propositions to establish affirmative direction for executive officers (4 Hinds, 3854–3859) even in cases where they may have discretion under the law so to do or to take away an authority or discretion conferred by law (4 Hinds, 3862 and 3863) the decisions say are subject to a point of order.

Again, in construing a proposed limitation, if the Chair finds the purpose to be legislative in the intent to restrict executive discretion to a degree that may be fairly termed a change in policy rather than a matter of administration detail, he shall sustain the point of order. This decision was made by Chairman LUCE January 8, 1925.

Again, the term "retrenchment" means the reduction of the amount of money to be taken out of the Federal Treasury by the bill and therefore a reduction of the amount of money to be contributed toward the expense of the District of Columbia was in order, but nowhere in the four corners of the paragraph can be found any reduction of amount either in money or in the quantity of clothing.

Again, the following provision in the Army appropriation bill, namely:

> That hereafter no money appropriated for Army transportation shall be used in payment for transportation of troops and supplies to the Army over certain lines of railroad—

was held subject to a point of order under the rule, on the ground that on its face it did not reduce expenditures in any of the methods enumerated in the first portion of the rule. The Chair will find this in 4 Hinds, 3927.

> To a clause appropriating for transportation of foreign mails an amendment providing that no further contract shall be entered into by the Postmaster General under the act known as the "subsidy act" was held not in order, because not directly retrenching expenditure in the manner prescribed in the rule.

Again, Mr. Chairman, the reduction of expenditure must appear as a necessary result. In order to bring an amendment or provision within the exception to the rule, it is not sufficient that such reduction would probably or would in the opinion of the Chair result. (4 Hinds, 3887.)

Again, an amendment must not only show on its face an attempt to retrench but must also be germane to some provision in the bill, even though offered by direction of the committee having jurisdiction of the subject matter of the amendment.

The committee having jurisdiction in this case is the Committee on Military Affairs, and no change has been made in reference to section 5 (a) of the national defense act.

Mr. COLLINS. Mr. Chairman, the history of this amendment is as follows:

By reference to page 10504 of the RECORD of May 13, 1932, it will be seen that Mr. LAGUARDIA offered an amendment in the terms of the language carried in this bill. His amendment was ruled out of order by the chairman of the committee.

Afterwards, Mr. COCHRAN of Missouri offered an amendment phrased as follows:

> No appropriation contained in this item shall be available for expenditures for or incidental to the manufacture and/or production of wearing apparel for enlisted men of the Regular Army in Government factories or establishments.

This amendment was held in order by the Chair.

I have recited last year's proceedings with respect to this matter for the purpose of enlightening the House upon what actually transpired. There was an article in a Washington newspaper this morning in favor of the elimination of this language, which stated that this provision was inserted in the bill at my instance. Of course, those of us who were on the floor of the House when the matter was considered last year know that the statement contained in this Washington newspaper is untrue. I have recited the history of this matter so that those of us who were not present during the proceedings may know exactly what happened.

The committee carried the amendment this year in the language as written by the gentleman from New York because it was modified to that extent in conference on last year's bill with the conferees of the Senate. I might add that the continuation of the provision carried last year was proposed in the Budget.

While I am on my feet, Mr. Chairman, I should like to refer further to the article I have already mentioned appearing this morning in a local newspaper.

In the headlines of the article, which deals largely with the action of the House yesterday with respect to this bill, among other things, it is stated "Chamber drubs Collins twice." I merely wish to say that the person who wrote those headlines failed to get the purport of what the House did on yesterday.

The House did not drub COLLINS. My position with respect to this bill is that I am the representative of the Committee on Appropriations to present this matter for the consideration of the House.

The Committee on Appropriations is the duly constituted agent of the House for considering budgetary recommendations and for bringing measures into the House for disposition in consequence of such recommendations. The House represents the American people; all of the American people, not any particular group or class of them.

Therefore, when the House drubs COLLINS or the Committee on Appropriations as a matter of truth it drubs your constituents and mine, and yesterday it drubbed 125,000,000 of them to provide for summer vacations for about 40,000 young men. And I will tell you what else it drubbed. It drubbed the declaration in the Democratic platform that the Democratic Party would bring about reductions of 25 per cent in Federal expenditures. Now, that is not any more my concern than yours. If you can get any comfort out of it, all well and good. Our Republican friends had no small part in doing the drubbing. They are probably laughing at us up their sleeves. The responsibility is not theirs.

Mr. LAGUARDIA. Mr. Chairman, even a Member of Congress can learn in the long period of one year. My amendment of last year to which the gentleman from Mississippi refers was clearly out of order. I was wrong then. I am trying to be right now. I was wrong on the facts and wrong on the law. A broader admission is difficult to make. I had been deliberately misinformed at the time.

I desire to call the attention of the Chair to the fact that the ingenuity of the draftsmanship of this amendment can not overcome the mathematics of its provisions. It is clearly out of order. It is not within the Holman rule. It can not be a limitation because it contains affirmative direction.

If the Chair will refer to the last clause which provides that after competitive bidding such character of work may be performed in such government factories or establishments, if at a lesser cost, the Chair will note that this is what seeks to give the amendment the color of a limitation based on retrenchment, but, as a matter of fact, it starts right off to provide that 90 per cent of this work is to be awarded to private contractors.

Not exceeding 10 per cent may be manufactured by the Government factory in accordance with the provisions of the amendment, and the bids for 90 per cent may be advertised and contracts awarded. Where is the retrenchment?

So that clearly there is nothing on the face or in the text of the provision that justifies the Chair in holding that it is a case meeting the requirements of the retrenchment rule. Bids may be awarded to private factories to the extent of 90 per cent if they equal the cost in the Government factory, and the provision seeking to show a saving is simply a sham. The real purpose of the amendment is to prohibit this Government work from being done in an established Government shop. It is clearly contrary to existing law and therefore legislation. It is not a bona fide amendment looking to retrenchment or saving in appropriation.

Mr. COCHRAN of Missouri. Mr. Chairman, I take issue with the statement of the gentleman from New York that this will not produce a saving to the Government. I think the proper procedure for the House is to take the responsibility of accepting the provision or defeating it. I do not think the provision comes within the point of order, nor that it should be defeated in this way.

This amendment provides that not to exceed 10 per cent of the total amount that may be expended from appropriations incident to the manufacture or production of wearing apparel, and so forth, for enlisted men shall be expended in Government factories, except that such limitation may be exceeded to the extent that it may be ascertained after competitive bidding in accordance with the law that work of such character may be performed at a lesser cost in such Government factories or establishments.

If that is not retrenchment, I do not know what retrenchment is. The Government is protected and the rights of private manufacturers are protected, but he must come within the amount for which the Government can perform similar work. I think the provision should be voted upon.

In reference to my amendment last year, which has been cited, the War Department has not been carrying out that provision because the quartermaster has not been working on the 1933 appropriation. He has used money that was appropriated prior to the time my amendment was adopted.

I am perfectly willing if the House, in its wisdom, sees fit not to give private contractors authority to bid on this work to abide by that decision, although not approving such action, but I say the House should be allowed to vote on the question.

Mr. LAGUARDIA. Will the gentleman yield?

Mr. COCHRAN of Missouri. I yield.

Mr. LAGUARDIA. The language is "not exceeding 10 per cent." Suppose the private factory bid is equal to the Government's, can the Government award it to the factory?

Mr. COCHRAN of Missouri. No; it could not. It would not be able to do so unless the Government could manufacture at a lesser cost. That is in the last line of the paragraph.

Mr. Chairman, I insist those who are in favor of continuing the work now going on at Philadelphia are making a mistake by pressing their point of order. They are still going to be faced with the situation, but in more drastic form, if the Chair sustains the point of order, for my colleague from Missouri [Mr. SHANNON] has in his hand the identical amendment that was offered by me and carried in the present law, which is not subject to a point of order.

The talk centers around the clothing factory. Do you know that over 80 different articles can be manufactured at this Government plant and have been manufactured there since the war? The Quartermaster General submitted for the information of the subcommittee a list of the articles and under leave to extend my remarks I include this list in my statement. The list follows:

STATEMENT SHOWING ARTICLES THAT THE PHILADELPHIA DEPOT IS CAPABLE OF MANUFACTURING

Aprons, bakers', butchers', and cooks'.
Brassards, all kinds (not woven).
Breeches, service, cotton.
Breeches, service, woolen.
Caps, bakers', butchers', and cooks'.
Caps, overseas.
Caps, winter.
Coats, service, cotton.
Coats, service, woolen.
Coats, dress.
Coats, mackinaw.
Coats, white duck.
Handkerchiefs.
Insignia, shoulder, sleeve, all kinds.
Insignia, sleeve, chevrons, all kinds.
Jumpers, working, denim.
Leggins, spiral, puttee.
Overcoats.
Shirts, cotton, olive drab.
Shirts, flannel, olive drab.
Stripes, service, all kinds.
Stripes, trousers, all kinds.
Trousers, cotton.
Trousers, woolen.
Trousers, dress.
Trousers, firemen's bunking.
Trousers, white duck.
Trousers, working, denim.
Capes for Army nurses.
Caps for Army nurses.
Overcoats for Army nurses.
Suits, Norfolk, for Army nurses.
Uniforms, white, for Army nurses.
Waists, for Army nurses.
Special-measurement clothing of all kinds for enlisted men.
Uniforms, all kinds, special measurement, custom made for officers and warrant officers.
Uniforms, all kinds, for Army band and flying cadets.
Cloth and findings for unmade coats and trousers for enlisted men.
Bags, barrack.
Bandoleers.
Bars, mosquito and sand fly.
Cases, flag, all kinds.
Cases, pillow.
Colors, silken, embroidered, all kinds.
Colors, national, service and silk.
Covers, cot.
Covers, mattress.
Flags, advertising, large and small.
Flags, ambulance and marker.
Flags, automobile, all kinds.
Flags, boat, all kinds.
Flags, distinguishing, all kinds.
Flags, garrison.
Flags, post.
Flags, storm.
Flags, general hospital.
Flags, field hospital.
Flags, recruiting, large and small.
Flags, miscellaneous.
Flies, tent, all kinds.
Guidons, service, all kinds.
Halyards, flags, all kinds.
Head nets, mosquito.
Paulins, all kinds.
Pennants, all kinds.
Sacks, bed.
Sacks, pillow.
Screens, latrine.
Shades, window.
Sheets, bed.
Standards, national, service and silk.
Standards, silk, embroidered, regimental and battalion.
Streamers, silk, embroidered, all kinds.
Tabards for bugles and trumpets.
Tents, assembly.
Tents, hospital ward.
Tents, storage.
Tents, pyramidal.
Tents, wall, large.
Tents, wall, small.
Tents, shelter, halves.
Tent lines, all kinds.
Awnings, boat covers, bunk bottoms, curtains, etc., for the United States Army transports.
With the exception of the following, all of the above have been manufactured at this depot since the war.
Flies, tent, all kinds.
Screens, latrine.
Tents, ward hospital.
Tents, storage.
Tents, shelter, halves.

Go over that list and you will find that there is not a man in the House who does not have in his district some kind of a manufacturing plant that makes at least one of the articles. If I thought for one instant that factories known as sweatshops would get the contracts, I would vote against the amendment myself. An investigation does not support such a statement and it is denied by the War Department itself. Another Member will call your attention to the department's statement that will settle that argument.

We have appropriated $13,500 for the committee to investigate the Government in business. What for? With a view to taking the Government out of business. Unless you take the Government out of business by placing limitations on the appropriation bills there is not a Member here to-day who will live to see the time when the Government retires from competing with private business. Who makes the War Department possible? Why, the taxpayers; and it is in the interest of some of the taxpayers that I placed this limitation on last year's bill.

There is another principle involved. That is the executive departments carrying out the will and intent of Congress. Congress showed by adopting my amendment that it intended to restrict the use of public money in competition with private business. As I stated before, the Quartermaster

General has not drawn on that appropriation, which is limited. Whether he will be forced to do so during the next fiscal year I do not know, but it will be interesting to see how he gets around that law. So far he has succeeded in evading it. I do not say that he has up to this time used any of the money contrary to the provisions of my amendment, but I will wait with interest future developments.

If we are going to spend money to make investigations which had as their purpose the retirement of the Government in the manufacturing of supplies that can be bought cheaper in the open market, then here is a place to start.

Mr. CHINDBLOM. Mr. Chairman, I will say that my only interest in this matter now is to assist the Chair in arriving at a correct interpretation of the rule applicable to the language involved. I am, of course, not directing my remarks to the merits of the question.

Now, in the first place, does this paragraph come within the Holman rule? Clearly it does not. It does not retrench expenditures in any of the ways specifically provided by that rule, which is section 2 of rule 21, while it plainly changes existing law.

Is the paragraph a limitation? It does not prohibit or limit the expenditure of the funds appropriated in this bill for any particular purpose or in any particular way. It simply provides directly, affirmatively, how a certain appropriation in this bill shall be expended. It provides:

> Not to exceed 10 per cent of the total amount that may be expended from appropriations made in this act * * * shall be expended for the manufacture and/or production of such apparel in Government factories or establishments.

That is a direct instruction to the War Department as to how this money shall be expended.

Then follows the exception, which robs the provision of any value at all, if it did have any value, as a limitation or retrenchment, when it provides:

> except that such limitation may be exceeded to the extent that it may be ascertained, after competitive bidding in accordance with law, that work of such character may be performed at lesser cost in such Government factories or establishments.

I submit in all earnestness that this is not a limitation, it is not a retrenchment, it is clearly a direction to the executive department as to how it shall expend the money appropriated in the bill. It is therefore in violation of the rules of the House, since it changes existing law on an appropriation bill. The existing law may be found in the national defense act, section 5–A.

The CHAIRMAN. The Chair is prepared to rule. During the consideration of the bill making appropriations for the military activities, under consideration in the House on May 14, 1932, the then chairman [Mr. LANHAM] was called upon to rule in a case similar to this. The Chair has examined the language of this paragraph, together with that contained in the amendment offered at that time. The Chair finds that in principle the provisions are similar. It is true some difference has been made in the language in this bill, but that language is not sufficient in any manner to transcend or overcome the very plain principle under the rules pertaining to legislative matters in an appropriation bill. The Chair is inclined to adhere to the ruling made by Chairman LANHAM at that time, and to hold that the language here does contravene the rules of the House. Therefore the point of order is sustained.

Mr. TABER. Mr. Chairman, I have an amendment which I have sent to the Clerk's desk.

Mr. COLLINS. Mr. Chairman, will the gentleman from New York yield to the gentleman from Missouri [Mr. SHANNON], who has an amendment to offer at this point on this same matter? We may as well dispose of this proposal while we are on it.

Mr. TABER. Very well. I yield to the gentleman from Missouri.

Mr. SHANNON. Mr. Chairman, I offer an amendment which I send to the desk.

The Clerk read as follows:

> Amendment offered by Mr. SHANNON: Page 58, after line 14, insert a new paragraph, as follows:
>
> "No appropriation contained in this act shall be available for expenditures for or incidental to the manufacture and/or production of wearing apparel for enlisted men of the Regular Army in Government factories or establishments."

Mr. LAGUARDIA. Mr. Chairman, I reserve the point of order.

Mr. SHANNON. Mr. Chairman, my reason for offering this amendment at this time is that I have watched the progress of this bill and I have noticed that there is a determination on the part of the House to keep the Government in business. There is no doubt but that the provision that was put in at the last session contributed toward taking the Government out of business in this particular industry, and giving some of that work to private enterprise. The Chair has ruled that that limitation can not be applied to this bill. Then, if it can not be applied to this bill, let us take the Government out of business absolutely. This amendment will do that. It is entirely germane.

Mr. LAGUARDIA. Mr. Chairman, I withdraw the point of order.

Mr. RANSLEY. Mr. Chairman, I renew the point of order against the amendment, that this is again legislation on an appropriation bill. It violates Rule XXI, and it also violates section 5 (a) of the national defense act. Referring to the Assistant Secretary of War, section 5 (a) of the national defense act provides that the Assistant Secretary of War, who attends to all matters of procurement, shall cause to be manufactured or produced at the Government arsenals or Government-owned factories of the United States all such supplies or articles needed by the War Department as said arsenals or Government-owned factories are capable of manufacturing or producing upon an economical basis.

Mr. SHANNON. I still contend that if bidding is to be resorted to, under no condition can one tell who the lowest bidder will be until the bids are scheduled.

The CHAIRMAN (Mr. DRIVER). The Chair is ready to rule. The Chair has examined the amendment offered by the gentleman from Missouri [Mr. SHANNON] and is clearly of the opinion that it is a limitation rather than legislation. Therefore the point of order is overruled.

Mr. CONNERY. Mr. Chairman, I rise in opposition to the amendment offered by the gentleman from Missouri [Mr. SHANNON].

Mr. Chairman, like the gentleman from New York [Mr. LAGUARDIA], last year I voted for this limitation to take the Government out of business. In general, I agree with the gentleman from Missouri [Mr. SHANNON] that the Government should not be in business, but I do not believe in taking the Government out of business on a proposition like this Philadelphia depot, when we are going to turn over that business to sweatshop operators, who operate these manufacturing establishments at starvation wages to their employees.

I have here a letter from John Frey, secretary-treasurer of the metal trades department of the American Federation of Labor, and in part he says, referring to striking out this provision:

> Unless this is done, it means that the garment workers at the quartermaster depot, Philadelphia, will be thrown out of employment, and the making of the uniforms turned over to the sweatshop type of garment manufacturer, for there is not a single manufacturer of garments and uniforms operating under fair conditions to their employees who could come anywhere near the figures which are submitted by the three or four notoriously non-union garment manufacturing companies who are successful in securing the contracts for militia uniforms. * * *
>
> My understanding is some of the Congressmen I have interviewed will take the floor on the bill and indicate that in voting in favor of this particular clause of the Army appropriation bill last year, they did so under misapprehension, for they would have been unwilling to vote for a provision in the bill which would have turned the work over to the poorest-paid garment workers in the country.
>
> I sincerely hope when this section of the bill comes up in the House that you will see your way clear to prevent Army uniforms from being manufactured under sweatshop conditions.

I repeat, while I am in sympathy with the general ideas of the gentleman from Missouri [Mr. SHANNON] in taking the Government out of competition with business in the coun-

try, I do not believe that in this situation we are going to do any good when we turn over the making of Army uniforms to sweatshop manufacturers who pay starvation wages and do not know how to treat their workers.

Mr. DYER. Will the gentleman yield?

Mr. CONNERY. I yield.

Mr. DYER. The gentleman is in favor of the broad principle involved in this amendment, is he not?

Mr. CONNERY. Yes. I believe in taking the Government out of business if when we take it out of business we are going to turn the business over to reputable manufacturers and not the kind of manufacturers who exploit labor.

Mr. FITZPATRICK. Will the gentleman yield?

Mr. CONNERY. I yield.

Mr. FITZPATRICK. In this case if we take the Government out of business we will turn it over to nonunion shops that pay small salaries to their employees?

Mr. CONNERY. Yes; and exploit labor to the utmost, because anyone who is conversant with labor conditions in the United States knows there has been more trouble with the sweatshop garment manufacturers than almost any other employers of labor.

Mr. DYER. Mr. Chairman, I rise in support of the amendment.

Mr. Chairman, every time the House has had an opportunity to pass upon wholesome legislation of this character we have met opposition, of course, from some Members of the House. They are in favor of this, I am sure, from a general standpoint, but no doubt the interest of concerns in their own districts and the question of whether or not these goods are going to be made by nonunion labor is influencing them in their action.

I am in favor of all goods needed for the Army being manufactured by union labor. I am also in favor of this Government getting out of business.

We have had investigations by this House during this Congress, by some of the ablest and best Members, and they have had before them innumerable witnesses telling of the abuses that have been rampant for many years. Any of you Members who lived near an Army post and who know the situation which confronts the country in the Government destroying competitive business of private individuals ought to be glad of an opportunity to vote for this amendment. I congratulate the Chairman of the Committee of the Whole House because of his able decision upon the point of order. But, Mr. Chairman, wherever there is an Army post, wherever there is an opportunity, there has been the worst kind of competitive business with private industry.

Mr. DE PRIEST. Will the gentleman yield?

Mr. DYER. In just a minute.

The Government establishes laundry and other competitive industries which are in opposition to many workers in private laundries, and so forth. They not only do the laundry work for those situated at the Army post but officers and members of their families, and oftentimes their relatives have their laundry work done at these Army posts free of charge, although many of those officers and their families do not live at the post.

I now yield to the gentleman from Illinois.

Mr. DE PRIEST. Does this Government uniform-manufacturing concern compete with outsiders on anything except Government uniforms?

Mr. DYER. Oh, they compete with them on everything.

Mr. DE PRIEST. I am talking about this specific case.

Mr. DYER. I am talking about the general principle involved. If we adopt this amendment, we will adopt others of a similar nature on other supply bills. It is time to put an end to unjust, inequitable competition of the Government against private business.

Mr. BLANTON. Will the gentleman yield?

Mr. DYER. I yield.

Mr. BLANTON. Is it not a fact that the United States shipping interests right now can not compete with other shipping interests, because we pay two, three, and four times as much, in some cases, for the service that is rendered this Government as is paid for the same service rendered to other governments. Is that not a fact?

Mr. DYER. I do not think it is.

Mr. BLANTON. Have not our shipping interests lost money ever since we have been in the business?

Mr. DYER. I do not want to go outside of what I attempted to speak about, but what the gentleman complains of is due to the fact that the United States Lines pays its employees more, and it operates ships that do not carry liquor.

Mr. BLANTON. Oh, that liquor business. [Laughter and applause.] If the gentleman could just get his mind on something else.

Mr. DYER. Mr. Chairman, I do not yield further.

So, Mr. Chairman, I urge upon the members of the committee to support this legislation. It is the first real opportunity we have had to express ourselves upon the splendid work that has been done by a committee of this House headed by my colleague, the gentleman from Missouri [Mr. SHANNON].

Mr. COLLINS. Mr. Chairman, I ask unanimous consent that all debate on this amendment close in 10 minutes.

Mr. GOSS. Mr. Chairman, reserving the right to object, let me say to the gentleman that, if possible, I wish to give the House the benefit of some information bearing upon the question at issue which I think will aid them in coming to a conclusion on the amendment. I want five minutes, Mr. Chairman.

Mr. COLLINS. Mr. Chairman, I ask unanimous consent that all debate on this amendment close in 20 minutes.

The SPEAKER. Is there objection to the request of the gentleman from Mississippi?

There was no objection.

Mr. SABATH. Mr. Chairman, no one will charge me with being unfriendly to union labor. During the many years I have served in this House I have always tried to the best of my ability to be of service to organized labor and have voted for every proposition that would maintain or promote the cause of labor. Therefore, I greatly regret that to-day a certain labor organization seeks to attack this proposition, which I believe saves the Government large sums of money annually.

The country demands economy. The newspapers and the people of the Nation demand in stentorian tones that we balance the Budget. Day in and day out we hear nothing but this hue and cry, and see nothing but the headlines asserting that we are falling down in our pledges and promises to balance the Budget. Every time the chairman of this committee, the gentleman from Mississippi [Mr. COLLINS], or any other gentleman tries to eliminate unnecessary expenditures, gentlemen on the left, on the Republican side, come forward with amendments seeking to increase the expenditures, not only by small amounts but by thousands and thousands of dollars. Yesterday alone we voted an additional appropriation of more than $1,000,000.

How can you justify the claim that you are endeavoring to better conditions that now exist and that you are honestly trying to balance the Budget when it is not the fact?

It is regretted that the military lobby should be able to sway otherwise well-intentioned organizations and use them for the purpose of defeating, or attempting to do so, every effort to reduce extravagance in the War Department and oppose every effort to reduce the unnecessary and wasteful expenditures.

I feel that this amendment should be adopted. The gentlemen from Missouri [Mr. COCHRAN and Mr. SHANNON] have given this question a great deal of broad and penetrating study. They are of the opinion that it will effect economy, that it will save large sums of money. Furthermore, the evidence disclosed last year on this floor that these private institutions or factories which from time to time have the privilege of bidding on this work and receiving contracts for it are paying fair compensation to their workers; that they are not sweatshops; that the pay is above the average for other labor in the United States. In view of this fact I think it is manifestly unfair on the part of some people to

attack this activity, when the facts do not justify the attack.

Mr. DYER. Mr. Chairman, will the gentleman yield?

Mr. SABATH. I yield.

Mr. DYER. The gentleman made the charge in his speech that the Republicans were fighting this. The only man so far who has opposed it is one of the gentleman's colleagues on his own side.

Mr. SABATH. May I not remind my friend that the gentleman from Pennsylvania has been trying to eliminate this provision and that he succeeded in knocking out the amendment embodied in this bill as it passed last year.

Mr. COX. Mr. Chairman, will the gentleman yield right at this point?

Mr. SABATH. I gladly yield to my good friend.

Mr. COX. I may remind the gentleman from Illinois that another gentleman from the State of Pennsylvania, a member of the Shannon special committee, has done as much work to take the Government out of business as anybody in Congress. I refer to the gentleman from Pennsylvania, Mr. SWICK. [Applause.]

Mr. SABATH. There are some exceptions. There are some mighty fine and honest gentlemen on the Republican side, I concede that, but not so many as we should have, but what I am endeavoring to do is to get them all to follow the Democratic Party in an honest, conscientious endeavor to bring about economy and balance the Budget.

Although I realize that the hue and cry to balance the Budget comes from persons responsible for existing conditions, which make that balancing practically impossible due to decreased and decreasing revenues, nevertheless we should strive with all our might to reduce the deficit as much as possible.

[Here the gavel fell.]

Mr. RANSLEY. Mr. Chairman, if this amendment becomes law it will destroy the quartermaster depot in Philadelphia, so far as manufacturing uniforms is concerned. Perhaps a short history of this activity of the Government would not be amiss.

The quartermaster depot at Philadelphia was established by act of Congress April 2, 1794, and was one of the main depots of supplies for troops during the wars of 1812, 1846, 1861, 1898, and 1917.

It maintains a designing and inspecting service which must be maintained even if the manufacturing of uniforms at this depot is prohibited.

It has 862 civilian employees, 195 males and 667 females. Most of the men are ex-service men, the balance of the workers are members of a family who had some one in their family in the military service in time of war. All are citizens of the United States and are under civil service, which means that all the female employees are 18 years of age or over and the male employees are 20 years of age or over, when first employed. The work done at this depot is in accordance with the 8-hour day, as provided by an act of Congress which provides for a 5-day week or 40 hours. A civilian contractor works under the State law of the State where his factory is located; in many States the law is 54 hours a week for women, unlimited for men. The national law applies to the quartermaster depot, but is not applicable to the civilian contractor.

The average net wage paid to the operators at the depot is $30.05 per week for male employees and $16.85 per week for female employees. Commercial manufacturers pay below the Government rates.

The depot can not successfully bid against firms who do not maintain a standard wage consistent with decent living conditions. One contractor pays female employees $6 to $9 per week and male employees $12 to $20 per week.

Mr. GOLDER. Mr. Chairman, will the gentleman yield?

Mr. RANSLEY. I yield.

Mr. GOLDER. Under the language of this amendment the Government would not be permitted to manufacture under any conditions. In other words, if this amendment were adopted the Government would not be permitted to manufacture uniforms, even though it could do so at a lesser rate than an outside manufacturer.

Mr. RANSLEY. That is true.

Mr. COX. But does it ever happen?

Mr. RANSLEY. It will.

If you prohibit the manufacturing of clothing at this plant, it will be impossible for the Government to alter the sizes of uniforms in stock which is now frequently done at small cost, which means a great saving; a contract would be required, you will then add advertising cost and the freight from the depot to the contractor's city, as well as the cost of inspection. There is also the question of time to be considered and also the maintenance of inspectors at the contractor's plant.

If you prohibit the manufacturing of uniforms at this depot, you will throw out of employment over 800 civilian employees, and you will destroy the yardstick that the Government has used in time of war to measure the cost of uniforms for our defenders.

On May 26, 1932, bids were sent out to 85 manufacturers; only 6 sent in bids; the bids were for 12,000 uniforms for the National Guard. On November 28, 1932, bids were sent out to 653 manufacturers, and only 14 sent in bids; these bids were for 34,030 uniforms with extra trousers for the Reserve Officers' Training Corps.

I ask you to make mental note of the fact that only uniforms for the Regular Army are made at the depot; the civilian or outside manufacturers make all the uniforms for the Reserve Officers' Training Corps and National Guard. Recently an order was issued preventing officers' uniforms from being made at the quartermaster depot.

Following is a copy of the resolution passed at the national executive committee meeting of the American Legion, held at Indianapolis, Ind., November 14–15, 1932:

Be it resolved by the American Legion, in national executive committee assembled, That we hereby go on record as being opposed to any legislation designed to eliminate the Philadelphia quartermaster depot of the United States Army.

Mr. BOLAND. Mr. Chairman, I more to strike out the last two words.

Mr. Chairman, ladies and gentlemen of the committee, this Government factory in Pennsylvania employs 862 people, 195 of them males. Some 60 of them—ex-service men—are about to lose their jobs if this amendment is adopted and this bill goes through.

There is no question in my mind that this factory which has been in operation for so many years, particularly in times of emergency when the Government needs a factory of this kind, would save the time and trouble of advertising for bids and the terrible delay which will happen with private enterprise undertaking this work. It is quite necessary that our Government have a factory of this kind to be able to produce the clothing, the uniforms, that it does produce in the event that we become involved in war, which will make it imperiative that we be in a position to produce uniforms immediately.

Mr. GARBER. Mr. Chairman, will the gentleman yield?

Mr. BOLAND. I yield.

Mr. GARBER. Does the Government own the factory in Pennsylvania?

Mr. BOLAND. It is a Government-owned factory.

Mr. GARBER. Approximately what is the amount of the Government's investment in this factory?

Mr. BOLAND. I am not familiar with the investment of the Government in this plant.

Mr. RANSLEY. With the gentleman's permission I will answer the question of the gentleman from Oklahoma.

Mr. BOLAND. I yield to my colleague for that purpose.

Mr. RANSLEY. The Government owns the land and the factory. The overhead of the factory is $120,000 a year even if they do not manufacture, and this sum must be added to the cost of the manufactured articles procured from the outside.

Mr. SUTPHIN. Mr. Chairman, will the gentleman yield?

Mr. BOLAND. I yield.

Mr. SUTPHIN. Is it not a fact this factory made only 2 per cent of the uniforms that were made during the war?

Mr. BOLAND. That is true.

Mr. LAGUARDIA. It was physically impossible for them to make any more.

Mr. BOLAND. It was impossible for them to make any more.

Mr. LAGUARDIA. During the last war private manufacturers charged the Government 400 per cent over the cost of production.

Mr. BOLAND. That is very true. I am very glad to have the gentleman from New York make that statement.

Mr. CONNOLLY. I may say to the gentleman that this plant which is owned by the Government cost $400,000.

Mr. BOLAND. Yes; and during this economy hysteria that we are all experiencing just now, we should realize that if this amendment prevails this large investment of the Government in this plant is absolutely useless. It would be wasteful.

Mr. SHANNON. Will the gentleman yield?

Mr. BOLAND. I yield.

Mr. SHANNON. Does the gentleman know that on June 24 last the Quartermaster General, in reply to a question as to whether they made overalls at this plant, said, "Yes," and when asked if there were not a great many factories in the country that made them, replied, "Yes; but we do that so as to keep our factory going all the time."

Mr. BOLAND. I will say to the gentleman that I am not so keenly interested in any statement made by anybody in the Quartermaster Department pertaining to this measure, but I am interested, and vitally interested, in Pennsylvanians, particularly the sixty or more soldier boys who went across and gave the best that was in them, and I do not want to see them thrown out of a job now because of this terrible economy hysteria that is hitting the country, and particularly the Congress. The investment we have here in this plant should be seriously considered.

Mr. BALDRIGE. Will the gentleman yield?

Mr. BOLAND. Yes.

Mr. BALDRIGE. Is not the gentleman in favor of this economy hysteria we are having?

Mr. BOLAND. I am not in favor of this economy hysteria. I voted against all this economy hysteria in the last session and I shall vote against any unfair reduction in salaries of any kind, because I think it is inopportune. This is not the proper time to reduce the American standard of living. [Applause.] However, I am interested and in favor of certain economies, such as abolishing useless bureaus.

But, as I have stated, I am vitally interested in the 60 boys who went across the sea and gave the best that was in them, and because of this great economy hysteria we are having now this bill is going to throw these boys out upon the highways, with no place to work, and for this reason I certainly hope the Congress will not let this amendment prevail. [Applause.]

Mr. COX. Mr. Chairman, those sponsoring the pending amendment disclaim any intention of displacing anybody in any job that they now fill. You will, of course, appreciate the fact that the manufacture of uniforms and other wearing apparel for the soldier is not going to cease as a result of the adoption of this amendment, if it be adopted. If it, however, should turn out that those engaged now in the depot at Philadelphia should lose their places, somebody else will do the work.

I particularly desire to answer the argument of my friend from Massachusetts who opened this discussion against the amendment, in so far as he insisted that the adoption of the amendment would return the business to a class that employs sweatshop labor.

A letter was addressed to the Secretary of War on the 13th of the instant month, in which the Secretary of War was invited to make investigation as to the charges that there is a combination or an understanding between clothing manufacturers to put through an amendment of this kind for the purpose of taking over the business of manufacturing uniforms and the increasing of their own profits by the use of sweatshop labor. In reply to this letter, Mr. Payne, the Assistant Secretary of War, disclaimed any intention on the part of the War Department to charge, or even insinuate, that any such practices would be employed by clothing manufacturers as a result of the depot at Philadelphia being closed. This letter I hold in my hand, and it is a complete answer and an absolute refutation of the argument made by the gentleman from Massachusetts.

Now, will my colleague permit me to make this observation? If there be a desire and a purpose on the part of the Congress to save money to the Government, this affords an opportunity. There is not a single article made in any of the Government factories of this country, and particularly as relates to the Philadelphia plant, without losses, and tremendous losses, being sustained in every operation.

They speak of the necessity of maintaining this plant, first, because it is a unit upon which the Government can build in time of war. They take the position that if you eliminate this activity, in cases of emergency you would be confronted with delay due to the necessity of advertising for bids.

You will recall that after our entrance into the World War, within 12 days from the declaration of war, contracts were let and private manufacturers were at work making immediate deliveries of clothing, and the Government plants at Philadelphia and at other places throughout the country, produced a very small percentage of the needs of the Government. It is then contended that the operation of the Philadelphia plant is necessary as a yardstick, that if it were not for it that commercial firms would combine, enhance prices, and might dominate the field. This condition could not come about under present competitive conditions.

The manufacture of clothing is not an essential war activity, and since heavy losses are being sustained on these operations they ought to cease—certainly in main part. The activity can not be defended or justified upon any basis. The necessity of the country is economy, and this amendment is a move in that direction.

The CHAIRMAN. The question is on the amendment of the gentleman from Missouri.

At the request of Mr. HARLAN, the Clerk again reported the amendment.

The question was taken; and on a division (demanded by Mr. COLLINS) there were 50 ayes and 75 noes.

Mr. SHANNON. Mr. Chairman, I ask for tellers.

Tellers were ordered; and the Chair appointed as tellers Mr. COLLINS and Mr. SHANNON.

The committee again divided; and the tellers reported that there were 76 ayes and 115 noes.

So the amendment was rejected.

Mr. TABER. Mr. Chairman, I offer the following amendment.

The Clerk read as follows:

Amendment by Mr. TABER: Page 58, after line 24, insert a new paragraph, as follows:

"Hereafter no service shall be counted for purposes of pay of commissioned officers of the Army, active or retired, except active commissioned service under a Federal appointment and commissioned service in any of the military or naval forces of the United States, including the National Guard or the Organized Militia, while in the service of the Government of the United States."

Mr. LAGUARDIA. Mr. Chairman, I reserve a point of order on the amendment.

Mr. GOSS. I make the point of order that it is legislation on an appropriation bill unauthorized by law.

Mr. TABER. Mr. Chairman, I concede that it is legislation.

The CHAIRMAN. The Chair sustains the point of order.

Mr. TABER. Now, Mr. Chairman, I offer the following amendment, which is a limitation.

The Clerk read as follows:

Page 58, after line 14, insert: "None of the funds appropriated in this act shall be used for the purpose of paying any commissioned officer, active or retired, for his salary in which any service has been counted other than active commissioned services under bona-fide appointment and commissioned services in any of the military or naval forces of the United States including the National Guard or the Organized Militia while in the service of the Government of the United States."

Mr. LAGUARDIA. To that I reserve a point of order.

Mr. TABER. Mr. Chairman, I ask unanimous consent to proceed for 10 minutes.

Mr. BANKHEAD. Reserving the right to object, we have lost considerable time in the consideration of this War Department appropriation bill, and if a point of order is made I think it should be decided now.

Mr. BLANTON. Mr. Chairman, I call for the regular order, and that will require a disposition of the point of order.

The CHAIRMAN. Does the gentleman from Texas desire to be heard on the point of order?

Mr. BLANTON. I will withdraw the demand for the regular order.

Mr. TABER. Then, Mr. Chairman I will take five minutes.

The CHAIRMAN. The gentleman from New York is recognized for five minutes.

Mr. TABER. Mr. Chairman, this is an attempt to save some money for the Treasury of the United States. So far in the consideration of this bill we have not saved any money for the Treasury of the United States, but have added on over $3,000,000.

Mr. BLANTON. By Republican votes.

Mr. TABER. Not by my vote.

Mr. BLANTON. No; the gentleman has been most faithful in voting for the best interests of the people. But the two amendments carrying over $3,000,000 additional were put in the bill by the Republican leader and his cohorts.

Mr. STAFFORD. Oh, there is a large section also of them on the Democratic side.

Mr. TABER. This is an attempt to cut down the Army appropriation bill in a way that it ought to have been cut down first, namely, by wiping out of abuses. For 10 years, since the pay bill of 1922, we have been paying men on the basis, not of the service they have rendered but on constructive service, and this is an attempt to do away with that racket.

Mr. LAGUARDIA. Mr. Chairman, will the gentleman explain the constructive service?

Mr. TABER. Yes. Under the provisions of the pay bill, section 4, title 37, of the code, after 1922 those who went into the Army were paid on the basis of active commissioned service under Federal appointment and commissioned service in the National Guard when called out by order of the President. Officers appointed prior to that time are entitled to count service as enlisted men, and a percentage of the service rendered in various civil components. There is a discrimination in the latter group. An enlisted man elevated to the commission grade has his base pay and longevity pay computed upon the basis of his enlisted and commission service, whereas a West Point graduate, commissioned at the same time, has his longevity pay computed from the day that he graduates. The result of it is that oftentimes a lieutenant performing very minor services and taking small responsibility is receiving more pay than a lieutenant colonel. On the fleet in the Pacific a little while ago a junior lieutenant was receiving more pay than his admiral in charge of the fleet.

Mr. LAGUARDIA. Oh, that would not be possible in the Army, would it?

Mr. TABER. It would be possible for a lieutenant in the Army to receive more pay than a lieutenant colonel.

Mr. LAGUARDIA. That is impossible I think. I think the gentleman must be in error. In the Navy his illustration is correct, but not in the Army.

Mr. TABER. They get paid away out of line to what they ought to be paid. I want to stop it. This amendment, if it is adopted, will save $3,500,000 a year in the Army bill, and God knows we need to save $3,500,000 out of this Army bill. There is not any excuse under heaven why this should not be done.

Mr. BLANTON. Can the gentleman get his minority leader from New York [Mr. SNELL] to back him up in this saving proposition? If he can, it is saved already. Because he and his Republican followers put the extra $3,000,000 in this bill by their votes.

Mr. TABER. I hope the gentleman from New York [Mr. SNELL] will support this amendment. I am wondering if the gentleman from Mississippi [Mr. COLLINS] will support this amendment. He is the chairman of the subcommittee.

Mr. COLLINS. I shall support it. I have always been in favor of it.

Mr. TABER. I am glad to hear that. I know that when this matter was before the House, when the Army pay bill was under consideration in 1922, the gentleman from Alabama [Mr. OLIVER], than whom no man in this House has more knowledge of Army pay and Navy pay, presented a minority report which would have done away with some of these abuses.

The CHAIRMAN. The time of the gentleman from New York has expired.

Mr. TABER. Mr. Chairman, I ask unanimous consent to proceed for two minutes more.

The CHAIRMAN. Is there objection?

Mr. LAGUARDIA. Mr. Chairman, I reserve the right to object in order to get some understanding here. I have always sought to play the game fairly. A few moments ago time was limited. I understood that I was included among the Members to be allotted time. If you are going to be nice, I can be nice; but if you are going to be nasty, I can be just as mean as anybody else on the floor. Let us be fair about it.

The CHAIRMAN. Is there objection?

There was no objection.

Mr. TABER. Mr. Chairman, the Budget estimates on this bill are just about met now, when you consider the reappropriation and the transfer of funds. If we are going to have this bill below the Budget, we have to do something which will save some money, and save it fairly. There is no sense in our going ahead with this artificial pay scale, which has been in effect for 10 years.

Mr. BULWINKLE. Mr. Chairman, will the gentleman yield?

Mr. TABER. Yes.

Mr. BULWINKLE. The gentleman stated just now, as I understood him, that he knew of the case of a second lieutenant who drew as much pay as a colonel.

Mr. TABER. Oh, no; I did not say that. I said I knew of a case in the Navy where a junior lieutenant drew more pay than an admiral. I did say that I believe a lieutenant would get as much pay as a colonel, or more, under certain circumstances. They now get paid away out of line for what they do.

Mr. LAGUARDIA. Will the gentleman please explain how.

Mr. TABER. Because all these officers are paid according to the length of service, and instead of counting their service from the time they are commissioned, like a West Point graduate is required to count his time, they count their service perhaps as an enlisted man, perhaps as having served in the National Guard as a private, perhaps as having served as a reserve officer, or something of that kind, so that they do not have actual commissioned service to count like the man who comes from West Point. My amendment is to do away with this constructive service and get rid of this abuse and cut out three and a half million dollars a year.

In the report of the joint committee on Army and Navy pay made in January, 1931, the committee said:

> Under the present system it is possible not only for officers within one grade of a single service to be drawing more pay and allowances than their seniors in that grade, but also more than many of their seniors in 1, 2, 3, and even 4 grades above.
>
> No officer should receive more pay than any other senior to him.

The CHAIRMAN. The time of the gentleman from New York has again expired.

Mr. LAGUARDIA. Mr. Chairman, I ask for recognition in opposition to the amendment.

Mr. BANKHEAD. Mr. Chairman, is the point of order in this case going to be pressed?

Mr. LAGUARDIA. I withdraw the point of order. It is a limitation.

Mr. Chairman, I think it is a pretty well-established rule of law that if a witness is inaccurate in any part of his testimony the jury may disregard all of his testimony.

Mr. COLLINS. Will the gentleman yield to me?

Mr. LAGUARDIA. Not just now. It is too bad the gentleman from New York [Mr. TABER] went off half-cocked on this proposition, because there may be some merit in what the gentleman seeks to do; but surely if the gentleman intended to change existing law he should have come before this House better prepared on his facts. There may be need of correction of abuses to which the gentleman from New York alludes, but the way to do that is by proper legislation, with all of the facts before us, and not by an amendment so far-reaching in its effect as this would be.

No one can accuse me of trying to load up this bill, because I never have, but I want to be fair. Certainly we can not wipe out an obligation to which we are honor bound, if you please, in addition to legally bound, namely, the payment based upon service and longevity. I submit that if there are any abuses through defect of the law, the matter should be given consideration by the proper committee. To come here blindly and endeavor to change the policy and law by an amendment, under the guise of a limitation, I submit, is not fair.

The gentleman from New York [Mr. TABER] is clearly in error when he talks about a second lieutenant drawing the same pay as a colonel. I do not care whether he is a second lieutenant or a factory worker in the garment shop in Philadelphia, I believe in a living wage, and a second lieutenant in the Army to-day is not getting a living wage. Now, let us be fair about it. After all, he must live. He has his obligations and many fixed charges he can not avoid. I know something about that. I am willing to go along on this bill and economize, but I am going to do it intelligently, and I am going to do it upon facts about which there can be no dispute. The gentleman from New York [Mr. TABER] will have an opportunity within a very few minutes to economize. Wait until the river and harbor and flood-control boys are mobilized. They are mobilizing now. That is the time for the real economists to marshal their forces to meet this attack.

Mr. TABER. And I will be there. But why does not the gentleman get back of this attempt to really save money?

Mr. LAGUARDIA. I will tell the gentleman. The gentleman has not got his facts correctly. He did not present his case properly. Let us be fair. I admire the gentleman from New York. He is one of the hardest-working men on the committee, but this time the gentleman did not present a case, and it would cause too many injustices in order to correct individual cases. It would affect too many to take snap judgment on an amendment like this, under the circumstances.

Mr. MARTIN of Oregon. Will the gentleman yield?

Mr. LAGUARDIA. I yield.

Mr. MARTIN of Oregon. Is this not an underhanded attack on the National Guard officers who came into the Army after the World War?

Mr. LAGUARDIA. I may say to the gentleman it comes so suddenly upon us and it is so far-reaching that we can not get all the facts.

Mr. MARTIN of Oregon. It is an attack on the constructive service of the National Guard officers.

Mr. LAGUARDIA. When the gentleman says that a second lieutenant can draw as much pay as a colonel, then I know he has not looked into the matter properly. The gentleman is confusing it with the pay of the Navy.

Mr. COLLINS. Will the gentleman yield?

Mr. LAGUARDIA. I yield.

Mr. COLLINS. The report of the committee shows that a second lieutenant can draw as much, under the terms of the pay bill, as a lieutenant colonel.

Mr. LAGUARDIA. Under the terms of what bill?

Mr. COLLINS. The present pay bill.

Mr. LAGUARDIA. Then he must be 60 years old and he must have been a lieutenant for 40 years.

Mr. COLLINS. Well, that statement was made to the committee.

Mr. LAGUARDIA. Then the second lieutenant must be 60 years of age and he must have been a second lieutenant for 40 years, and that is improbable.

The CHAIRMAN. The time of the gentleman from New York [Mr. LAGUARDIA] has expired.

Mr. PARKER of Georgia. Mr. Chairman, I ask unanimous consent that the gentleman from New York be allowed to continue for one additional minute, in order that I may ask him a question.

The CHAIRMAN. Is there objection to the request of the gentleman from Georgia?

There was no objection.

Mr. PARKER of Georgia. Is it not a fact that the longevity pay of commissioned officers is 5 per cent for each three years of service for a period of 30 years?

Mr. LAGUARDIA. Well, whatever the percentage is.

Mr. PARKER of Georgia. That is what it is. It is 5 per cent for each three years. I wanted to get that into the RECORD. The gentleman's statement is entirely correct. A second lieutenant would have to be 40 or 50 years in the service before he could possibly draw as much money as a colonel, and by that time he would probably be a colonel himself. His base pay on entering the service is $125 per month.

Mr. CHIPERFIELD. Up to 30 years?

Mr. PARKER of Georgia. Up to 30 years the increases in pay are allowed.

Mr. COLLINS. Mr. Chairman, I ask unanimous consent that all debate on this paragraph and all amendments thereto close in five minutes.

Mr. GOSS. Mr. Chairman, I would like to have five minutes. If not, I object.

Mr. COLLINS. I have made the request, Mr. Chairman.

Mr. GOSS. Mr. Chairman, I object.

Mr. COLLINS. Mr. Chairman, I move that all debate on this paragraph and all amendments thereto close in five minutes.

The question was taken; and on a division (demanded by Mr. Goss) there were ayes 76 and noes 37.

So the motion was agreed to.

The CHAIRMAN. The question is on the amendment offered by the gentleman from New York.

The question was taken; and on a division (demanded by Mr. Goss) there were—ayes 60, noes 44.

Mr. GOSS. Mr. Chairman, I ask for tellers.

Tellers were refused.

So the amendment was agreed to.

The Clerk read as follows:

For repairs and preservation of monuments, tablets, roads, fences, and so forth, made and constructed by the United States in Cuba and China to mark the places where American soldiers fell, $770.

Mr. BROWNING. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. BROWNING: Page 61, line 16, insert a new paragraph, as follows:

"For removal of the bodies of World War veterans buried in cemeteries in Europe, transporting them to the United States and reinterring them in national cemeteries, $10,000,000."

Mr. COLLINS. Mr. Chairman, I make a point of order against the amendment.

The CHAIRMAN (Mr. BANKHEAD). The gentleman will state it.

Mr. BROWNING. Mr. Chairman, will the gentleman withhold the point of order.

Mr. COLLINS. I will withhold it to enable the gentleman to make a statement to the House.

Mr. BROWNING. Mr. Chairman, I think the amendment I have offered should receive the serious consideration of this House, whether the subject matter is proper at this place or whether it should be in a separate authorization.

I for one am not willing that we as a Nation should leave there those to whose memory we have the sentimental attachment that we do to our buried soldiers in Europe under present conditions. I do not believe, out of proper deference to their memory, we should let them remain there.

I know most of those men felt doubtless as many of the rest of us did, that should we have fallen in France we would have been willing to remain on the land where we fell, but conditions have changed since that date, and in a surprisingly short length of time from the moment when we had such feeling we find the nation in which most of these men are buried has deliberately and willfully disregarded its written word and its definite pledges to the United States. These matters will require, no doubt, long diplomatic controversy to straighten out. There has been quite a bit of feeling, we might as well admit, engendered in both nations over the matters involved in the controversy. I repeat, I am unwilling to leave our buried dead in that soil under such conditions, and I want this House to consider seriously whether this amendment should not be adopted, and, if the point of order is insisted on, then whether we should not at an early date make provision for bringing these loved ones of ours home and placing them in the soil of their native land where there can no question arise in the nature of an international controversy that might involve our sentimental attachment to them.

I hope the gentleman from Mississippi will not make the point of order and that the House will approve bringing back home our soldier dead. [Applause.]

[Here the gavel fell.]

Mr. COLLINS. Mr. Chairman, I make the point of order that the amendment provides for an appropriation not authorized by law.

The CHAIRMAN. The Chair sustains the point of order.

The Clerk read as follows:

PETERSBURG NATIONAL MILITARY PARK

For continuing the establishment of a national military park at the battlefields of the siege of Petersburg, Va., in accordance with the provisions of the act approved July 3, 1926 (U. S. C., Supp. V, title 16, secs. 423–423i), including surveys, maps, and marking the boundaries of the park; pay and expenses of civilian commissioners, and pay for clerical and other services; supplies, equipment, and materials; maintenance, repair, and operation of one motor-propelled passenger-carrying vehicle, and all other expenses necessary in establishing that park, including not to exceed $187 for or on account of travel, $14,817.

Mr. STAFFORD. Mr. Chairman, I offer an amendment. In line 17, page 64, strike out "$14,817" and insert "$4,817."

The Clerk read as follows:

Amendment offered by Mr. STAFFORD: Page 64, line 17, strike out "$14,817" and insert "$4,817."

Mr. STAFFORD. Mr. Chairman, I think it must be an inadvertence or the fault of the printer when he increased the appropriation in this item $10,000 over the Budget estimate, being the only instance where the subcommittee has increased a Budget estimate for the care and maintenance of these national parks. I shall await a statement from the chairman of the subcommittee as to whether this is an inadvertence due to a typographical error or whether it is the deliberate purpose of the chairman of the subcommittee to increase the amount in this instance above the Budget estimate.

Mr. COLLINS. I will say to the gentleman from Wisconsin that this does not increase the total of the Budget recommendations touching nonmilitary activities. There was $10,000 carried in the estimates for the preservation of some old walls in Puerto Rico, which we omitted and added to the estimate for the park at Petersburg.

Mr. STAFFORD. The gentleman is justifying a transfer of some appropriation down to Petersburg above the Budget estimate——

Mr. COLLINS. I thought the gentleman wanted me to answer his question.

Mr. STAFFORD. I yield for that purpose.

Mr. COLLINS. There was $10,000 provided in the Budget under the nonmilitary section for an activity at Puerto Rico. There has been a large amount of land donated to the Government at Petersburg, much of it has been grubbed and parked, and that work will have gone for naught unless some money is made available for maintenance. In my opinion, this park ranks among the most worthy of all these projects. Practically all of the other parks have charged the Government for the land acquired, while in this instance the land was given to the Government. The subcommittee unanimously decided to transfer the money asked for Puerto Rico to Petersburg. It was a unanimous decision by the committee, I will say to the gentleman.

Mr. STAFFORD. Mr. Chairman, I think it is a far fling from Puerto Rico to Petersburg, Va., to utilize an appropriation that had lapsed, perhaps, for some character of park purpose in Puerto Rico to provide for the purchase of land at Petersburg. I took occasion to look into this subject, because this is the only instance where the Committee on Appropriations has departed from the Budget estimates with respect to these parks.

I read the hearings, and there is not a word in the hearings to justify the appropriation of money on the part of the National Government for the purchase of land. It was intended that the land for this park—and there are six or seven pieces involved—should be donated to the Government. There is no appeal on the part of the local authorities that this enactment should be changed, and yet it is here incorporated. We heard the Members on the other side criticize this side when we attempted to secure an appropriation for a most meritorious proposal at Howard University in going against the Budget.

It has been my unerring rule in this Congress to stand back of the Budget estimates. True, this principle has been wafted to the winds in this session in the consideration of this bill; but I do not think this committee, and certainly the great Committee on Appropriations, should be violating this fundamental principle even to the extent of a measly $10,000, even though it could be found hidden away over in Puerto Rico, and have it transferred to this one item and in this way play favorites.

I am opposed to this policy, and even though the amount is only $10,000, which may be only a few pennies in the eyes of some, I hope the committee will stand back of the policy of the Budget officer in recommending only what is necessary for the upkeep of these national parks.

Mr. DREWRY. Mr. Chairman, I rise in opposition to the amendment.

Mr. Chairman, I think the committee, if it understood this proposal, would not be in favor of the amendment of the gentleman from Wisconsin.

The situation is that this park is located on land that had previously grown up, with underbrush all over the breastworks or fortifications.

The appropriation that was originally made was just sufficient to take care of the clerical work of the office. It is a matter of economy to make the extra appropriation here asked for, because if you do not, you will lose the benefit of all the work that has been done up to this time in clearing off the undergrowth around the breastworks. Therefore, if you do not grant the appropriation asked at this time, it means that in the years to come you will have to add more money to the appropriation in order to again clear up the work which had already been done.

Mr. BYRNS. Mr. Chairman, in view of what was stated by the gentleman from Wisconsin, I feel that in justice to myself I ought to make this statement.

I think Members of this House will give me credit for trying to be consistent with reference to appropriations. I have never considered sections; I have never considered districts or localities when it comes to appropriations in an appropriation bill.

I have a military park in my own district that is unfinished. They need something like $20,000 in order to finish the park. They came to me last fall and asked me to get it. If I had requested the subcommittee to put it in the bill, in view of their action with reference to this matter, I feel they would have done it for me. I did not ask the Director of the Budget, but I told my constituents that we were facing a deficit of millions of dollars, and that we had had deficits since 1931, and I felt when it came to establishing military parks, when there were 11,000,000 men suffering in this country, when we are being called upon to make appropriations to help out those who are suffering and who

need help, we ought not to be appropriating money for military national parks.

Adjoining my own district is another—Stone River—where they passed resolutions requesting an appropriation, and yet neither Judge DAVIS, who represents that district, nor I, viewing the situation that our Government is in—think we ought to ask the Appropriations Committee to violate the rule that where an appropriation is not estimated for, it ought not to be considered.

I opposed the appropriation for a central heating plant at Howard University and for additional men up here on the border, and I based my opposition on the ground that the President of the United States and the Director of the Budget failed to estimate for it.

How can I justify myself if I favor an appropriation not estimated for, even if it only involves the sum of $10,000? If I had been in the committee, I would have opposed this provision. Gentlemen will remember that for one week I was confined to my room on account of illness and was not present when the bill was reported. I knew nothing about it until after it was reported.

I feel, in justice to myself, that I ought to make this statement, and in justice to my own constituents for whom I ask no such favor. Gentlemen, we are facing a serious situation. We have already added to this bill, and we have added to it items more justifiable than this. But in the name of heaven, are you going now, when the President and the Budget Director did not ask for it, even though it may only involve $10,000—are you going to make an appropriation for an addition to military national parks which can wait until times are better?

I am appealing to you in the interest of the taxpayer, and also in justification of my own situation, because above all things I want to be consistent in the position I take on appropriations, regardless of whether it affects one section of the country or another.

[Here the gavel fell.]

Mr. BLANTON. Mr. Chairman, I ask that the gentleman may have one minute more in order that I may ask him a question. When Republicans across the aisle have added $3,000,000 to this bill, and the people find out about such increases without knowing who did it, every Member of the House will be held responsible for it. There are only certain Democrats who are responsible for helping Republicans to put these extra millions in the bill. Does not the gentleman believe that in fairness to the country and in fairness to the membership of the House we ought to have a separate yea-and-nay vote in the House on every amendment that has added increased millions to the appropriations in this bill over the Budget estimate, so the country may blame only such Members who voted such increases?

Mr. BYRNS. That may be true, I will say to my good friend, who always stands for economy; I am opposed to these additions to the bill beyond and above the Budget estimate.

Mr. COLLINS. Mr. Chairman, I ask unanimous consent that all debate on this paragraph, and all amendments thereto, close in five minutes.

The CHAIRMAN. Is there objection?

There was no objection.

Mr. BARBOUR. Mr. Chairman, I should like to state that in the case of this appropriation there was no intention on the part of the subcommittee to favor one park over another. The committee has felt for some time that Petersburg National Park is one of the most worthy projects of this kind. It is different from many other national parks, because they are completed projects, and the money appropriated is merely for maintenance and operation. Petersburg National Park is in the course of construction. It has been authorized only within recent years. The land that will comprise the park is being donated by the people who live in and about Petersburg, without cost to the Government. Heretofore, in recent years, the Budget has recommended certain money to improve this land that is being acquired for Petersburg National Park; and if my recollection serves me correctly, in recent years the Budget estimates for this project, if they have not been reduced, have not been increased, with the result that the work of developing the park has practically stopped.

Mr. DREWRY. Mr. Chairman, will the gentleman yield?

Mr. BARBOUR. Yes.

Mr. DREWRY. Last year the War Department recommended $100,000, and the Budget reduced the estimate to $5,000. The same thing happened this year. The estimate given by the War Department was $100,000, and again it was reduced to $5,000, so that virtually all work has been suspended, and the result has been that the underbrush has grown up, and unless this money is used we will have to do the work all over again.

Mr. BARBOUR. The subcommittee felt that this work has been delayed, and that the subcommittee would be justified in recommending this small sum of $10,000 in addition to the Budget estimate of $4,817 in order to speed up a little bit this work in connection with the Petersburg National Park. It was represented to our committee that practically all of the money would be expended in grubbing out this land and giving employment to people in this community. It is a small amount; it is nothing to get excited about; and the committee felt justified in bringing this item before the House and recommending it and letting the House accept or reject its recommendation. I, for one, believe that the appropriation carried in the bill is fully justified.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Wisconsin.

The question was taken; and on a division (demanded by Mr. DREWRY) there were—ayes 74, noes 31.

So the amendment was agreed to.

The Clerk read as follows:

For the preservation and maintenance of existing river and harbor works, and for the prosecution of such projects heretofore authorized as may be most desirable in the interests of commerce and navigation; for survey of northern and northwestern lakes, and other boundary and connecting waters as heretofore authorized, including the preparation, correction, printing, and issuing of charts and bulletins and the investigation of lake levels; for prevention of obstructive and injurious deposits within the harbor and adjacent waters of New York City; for expenses of the California Débris Commission in carrying on the work authorized by the act approved March 1, 1893 (U. S. C., title 33, sec. 661); for examinations, surveys, and contingencies of rivers and harbors; and for printing, as may be authorized by the Committee on Printing of the House of Representatives, of surveys under House Document No. 308, Sixty-ninth Congress, first session, and section 10 of the flood control act, approved May 15, 1928 (U. S. C., Supp. V, title 22. sec. 702j): *Provided*, That no funds shall be expended for any preliminary examination, survey, project, or estimate not authorized by law, $39,388,129: *Provided further*, That hereafter the provisions of section 5 of the act of July 16, 1914 (U. S. C., title 5, sec. 78), shall be construed as applying to the Corps of Engineers as to motor boats and motor-propelled passenger-carrying vehicles: *Provided further*, That no appropriation under the Corps of Engineers for the fiscal year 1934 shall be available for any expense incident to operating any power-driven boat or vessel on other than Government business.

Mr. COLLINS. Mr. Chairman, I offer the following amendment, which I send to the desk.

Mr. GOSS. Mr. Chairman, I reserve the point of order on the proviso lines 16 to 20 for the purpose of an explanation, because it makes it permanent law with the word "hereafter."

Mr. COLLINS. Mr. Chairman, the purpose of the amendment which is on the Clerk's desk is to enable the Engineer Corps to maintain and operate all their boats and motor vehicles during the fiscal year 1934, which they probably would not be able to do under the language as written in the bill. The purpose, therefore, of the proviso as amended is to cause the Engineer Corps to present estimates to Congress of their motor-boat and passenger-carrying automobile needs so that we may determine whether or not their purchase should be permitted. That course is required of every other department of the Government, and we felt that on account of certain abuses that had come to our attention this language ought to be made applicable to them.

Mr. GOSS. And that is all the proviso does?

Mr. COLLINS. That is all it does.

Mr. GOSS. I withdraw the point of order.

The CHAIRMAN. The Clerk will report the amendment offered by the gentleman from Mississippi.

The Clerk read as follows:

Amendment offered by Mr. COLLINS: Page 68, line 19, before the word "motor," insert the words "the purchase of."

The CHAIRMAN. The question is on agreeing to the amendment.

The amendment was agreed to.

Mr. WILLIAM E. HULL. Mr. Chairman, I offer the following amendment, which I send to the desk.

The Clerk read as follows:

Amendment by Mr. WILLIAM E. HULL: Page 68, line 16, after the word "law" strike out "$39,388,129" and insert "$60,000,000."

Mr. WILLIAM E. HULL. Mr. Chairman, I ask unanimous consent to proceed for 10 minutes.

The CHAIRMAN. Is there objection?

Mr. BARBOUR. I object.

The CHAIRMAN. Objection is heard and the gentleman is recognized for five minutes.

Mr. WILLIAM E. HULL. Mr. Chairman, the reason I asked for the additional time was because I think this is a question that the Members of the House should understand.

I call the attention of Congress to the fact that river and harbor projects have been prosecuted during the last five years with a view to the ultimate completion of a large number of works that are important to the interest of transportation in the different sections of the country. In that period the expenditures on this work have averaged $61,815,000 annually. The large expenditures have been due to the high cost of the work necessary to complete them. The appropriations for the past two years have been $82,500,000 and $90,000,000, respectively. At the present time the estimates are based on costs that prevailed when the reports were submitted in 1930 and prior years. However, under present conditions these costs are reduced about 50 per cent. So it seems it would not be a hardship upon the Treasury of the United States, considering the tremendous good that this work will do. Under an appropriation of $39,388,129, as carried in the bill, only about $12,000,000 would be expended for improvement work as compared with $51,492,483 expended during the fiscal year 1932. In other words, this proposed increase will facilitate the completion of these waterway projects, and will keep men at work who under the smaller appropriation would have to be discharged.

I do not believe this is the proper time to make exorbitant expenditures, but these expenditures are not exorbitant. I call your attention to the fact that the War Department's original estimate was reduced to a figure that they believed would not be out of line with the financial situation, namely, $75,000,000. They have furnished this estimate of $60,000,000, and it seems to me a good compromise. It takes practically $27,632,950 to maintain our present existing river and harbor works, so that if only $39,000,000 is appropriated, only $11,655,179 would be provided for new work, and every Member of this House knows it would not be profitable or businesslike to adopt such a dribbling policy. If that policy were continued, it would take 25 years to complete existing projects, including the upper Mississippi, Missouri, and Tennessee River projects. But by adding the additional $20,000,000, making the total amount $60,000,000, we will then have $32,367,050 for new work, which is not out of line, as the engineers are all prepared to go ahead with these works, and the works heretofore adopted can be completed within a reasonable time.

RELIEF TO UNEMPLOYMENT

It is estimated that the emergency rivers and harbors relief employed during the depression directly and indirectly an average of 100,000 men on a basis of 48 hours per week; but as the rule is now to put them on a basis of 30 hours per week, this would mean 1.6 man per week for each man on the present 48-hour basis. In addition to the direct labor, it increases the labor in the plants that furnish the material used.

I quote from the Military Engineer as follows:

It is believed that on a conservative basis about one man-year of direct employment can be provided for $4,000 of river and harbor expenditure and for $3,500 of flood-control expenditure, assuming the usual cross-section of such work, including lock and dam construction, dredging, jetties and breakwaters, dikes, revetments, and levee construction. It is also conservatively estimated that at least one man is employed indirectly for every man directly employed.

Based on these assumptions, I figure if we are only to have $11,655,179 for new work, more than 75,000 men will be obliged to look for employment in other directions. These men will take some one else's job or be out on a dole. Even so, the Government will have to pay, and I think it is far better to keep the men at work. In addition to that, the cost to-day of rivers and harbors work is about 50 per cent of the original cost, and I call your attention to two of many projects to show you how this runs:

	Estimated cost	Low bid
Dredging Miami River, Fla	$1,058	$517
Dredging Livingstone Channel, Detroit River	6,097	3,426

The CHAIRMAN. The time of the gentleman from Illinois has expired.

Mr. McGUGIN. I ask unanimous consent that his time be extended five minutes.

The CHAIRMAN. Is there objection?

There was no objection.

Mr. WILLIAM E. HULL. All the projects run along in just about this proportion. These Federal improvements will show even greater dividends than were anticipated when they were originally authorized as economic improvements; and if we should allow the discontinuance of the work now and wait until such time as business is good in the country, the cost will be more than double the amount that it would be at the present time, would not be as effective to take care of labor, and the people would not have the use of the waterways nearly as long as they will have them if the work is now completed.

I want to call your attention to just where this money will be spent:

	Improvement	Maintenance
Atlantic coast	$4,766,050	$7,379,000
Gulf coast	1,386,200	3,090,500
Pacific coast	1,240,000	3,656,200
Intracoastal waterway	6,115,800	1,736,700
Inland waterways	13,832,000	7,624,500
Great Lakes	5,027,000	2,499,421
Examinations, surveys, contingencies, and miscellaneous items		1,646,629
Total	32,367,050	27,632,950
Grand total		60,000,000

With the foregoing explanation that I have given, I can not see how anyone who would use good business judgment would not be willing to vote for this additional appropriation.

Take that out of the $39,000,000 and what do we have left? Eleven million six hundred and fifty-five thousand one hundred and seventy-nine dollars. Take that off the $52,000,000 that we spent this year, when we had 100,000 employees, and what does this do? It is bound to take off three-quarters of the men, or 75,000 men will have to be taken off this work; 25,000 men will work on maintenance, leaving a total loss of work for 50,000 men. In addition to that, I wish to say that you will have to put those men on dole. Is it better to put them on dole or is it better to make this appropriation and let those men work for their living? This is not a river and harbor proposition. It is an economic proposition. I think I am enough of a business man to stand before this House and show you that if you take such a course as the Budget has taken, you are biting off your nose to spite your face. You are only putting the money in one pocket to take it out of the other to pay these men a dole.

It is the most absurd thing I ever heard of. I want you Members not to think I am trying to increase the appropriation. I am trying to save jobs for these men. It is up to you to vote it up or vote it down. I thank you.

Mr. COCHRAN of Missouri. Will the gentleman from Illinois yield?

Mr. WILLIAM E. HULL. I yield.

Mr. COCHRAN of Missouri. The gentleman has the confidence of the President of the United States. Can the gentleman tell us how the President feels about it?

Mr. WILLIAM E. HULL. I did not ask the President about it. I went to the engineers, where it belongs, and got it from them.

Mr. RAGON. Will the gentleman yield?

Mr. WILLIAM E. HULL. I yield.

Mr. RAGON. Were there any hearings before the subcommittee? Did the gentleman present this amendment to the subcommittee?

Mr. WILLIAM E. HULL. I did not present it to the subcommittee. The subcommittee held its hearings. The gentleman from Mississippi [Mr. COLLINS] admitted in his speech that the appropriation was inadequate.

Mr. RAGON. Did any of the gentlemen interested in this matter go before the subcommittee and ask for a hearing and present this matter to them?

Mr. WILLIAM E. HULL. To tell the truth about it, none of us knew anything about it until it was passed.

Mr. RAGON. The gentleman knew it when the Budget came here, did he not?

Mr. WILLIAM E. HULL. I am just telling the gentleman what the engineers told me. They are the best authority I know of.

Mr. RAGON. But when the Budget was brought here the gentleman and his friends who are back of this matter knew there was a reduction of $21,000,000.

Mr. WILLIAM E. HULL. We certainly did.

Mr. RAGON. And the gentleman did not ask for any hearing before the subcommittee?

Mr. WILLIAM E. HULL. No; because we were not informed of the hearings.

Mr. RAGON. And the gentleman now comes on the floor and in five minutes' debate wants us to add $21,000,000 to the bill.

Mr. WILLIAM E. HULL. Oh, no. That is not so at all.

The CHAIRMAN. The time of the gentleman from Illinois has again expired.

Mr. BLANTON. Mr. Chairman, I rise in opposition to the amendment.

Mr. COLLINS. Will the gentleman yield to me?

Mr. BLANTON. If it is not taken out of my time, yes.

Mr. COLLINS. Mr. Chairman, I ask unanimous consent that all debate on this paragraph and all amendments thereto close in 30 minutes.

Mr. LAGUARDIA. Reserving the right to object, I want five minutes.

Mr. McGUGIN. I want five minutes.

Mr. COLLINS. I will amend my request to make it 35 minutes, Mr. Chairman.

The CHAIRMAN. Is there objection to the request of the gentleman from Mississippi as modified?

Mr. LAGUARDIA. Reserving the right to object, does the chairman include me in that 35 minutes.

Mr. COLLINS. I will be delighted to go directly to the Chair and ask the Chair to recognize the gentleman from New York.

Mr. LAGUARDIA. I am particularly interested in the Harlem River.

The CHAIRMAN. Is there objection?

There was no objection.

Mr. BLANTON. Mr. Chairman, on the minority side of the Committee on Appropriations there are some of the ablest, strongest Republican Members of this House. The Army appropriation bill, that is now under consideration, came to this House with a unanimous committee report. Not a single member of that committee saw fit to file a minority report against any of its provisions or for any increases. It is the consensus of opinion of 35 men whom this House has put in charge of appropriations, as indicated by such unanimous report, that no additional sums for the Army shall be taken out of the people's Treasury.

What is happening to the bill? Republicans have added millions to it. The other day, when I was eulogizing my good friend from California [Mr. BARBOUR], who had not filed any minority report on this bill, I was taking it for granted that he was going to uphold the bill that was brought by his committee before this House. I did not know that with the help of the minority leader, the distinguished gentleman from New York [Mr. SNELL], who has Plattsburg in his district, was going to put $550,000 more on one item in the bill. I did not know he was going to rise later and put another $2,500,000 in this bill, which he did yesterday.

I am surprised that the gentleman from the State of Illinois [Mr. WILLIAM E. HULL], where the business men right now are making the greatest clamor to Congress for a reduction in governmental expenses, should come here and ask this House to increase the appropriation on this one item $20,611,871. Where is the money coming from? With a Treasury that is depleted now, that has a deficit of a thousand million dollars this year, with a Treasury that had a deficit last year of a thousand million dollars, with a Treasury that the year before had a billion-dollar deficit, where is the money coming from, I ask you in all fairness?

Now there is the same responsibility upon every Member of this House. It is the responsibility to keep the expenses of this Government within the income of the Government. What is the use of men working here and grinding day and night, working Sundays and working holidays, trying to get this Budget balanced, if as soon as they accomplish something in the way of reduction of expenses, Members here and there who have had something taken from their districts rise and ask that it be put back? Why, we can not stop that kind of raid on the Treasury—there are too many men here interested—unless you stand up and are willing to make some sacrifice in your district in the interest of balancing the Budget for your Government of the United States.

The press is holding all of us responsible. They are attacking all of us every day. They are attacking even the ones who are working trying to balance the Budget. We are all getting criticism, and we all deserve it unless we fix the responsibility where it belongs. When this bill gets back in the House I am one of those who are going to vote to force a roll-call yea-and-nay vote on every amendment and thus put every Member of this House on record and let his constituents and the country find out who is responsible for adding all the increases to this bill. It is a responsibility for which all of us ought to be held until we show we are in the clear on it. And to-morrow the RECORD of this day's proceedings will be printed and will contain the individual vote of the Members who cause these millions to be added to this bill, and I want the press and the people not to hold any of the rest of us responsible, but only those who vote for these additional sums.

Mr. BANKHEAD. Mr. Chairman, there have been frequent items in the consideration of this bill that I have felt like saying something upon in order to undertake to maintain a consistent attitude in standing by the Budget and the Committee on Appropriations in an earnest effort to hold our appropriations to the lowest possible point. We have now reached a place where I think it singularly appropriate for me to voice some objection to the amendment that has been offered, because my section of the country is very largely interested in the improvement of our river and harbor system. It may not be generally known that the State I have the honor in part to represent upon this floor has more miles of navigable streams than any other State in the American Union. We have a great inland waterway system in Alabama, and we have a great Gulf port that we are all exceedingly anxious to foster and develop whenever the

opportunity arises to appropriate funds for that purpose consistent with the state of our public Treasury.

Mr. Chairman, what is the actual condition with which the Treasury is confronted to-day? It is familiar to all of us, not only familiar to you gentlemen but it is familiar to every taxpayer and every business organization in the United States of America.

Why is it that in every State of this Union you see daily and weekly the organization of taxpayers' associations to undertake to reduce the almost impossible burden of taxation that is now pressing down upon the energies of all of our people? It is because, Mr. Chairman, they realize that their substance, their savings, their energies under the adverse conditions with which we are now confronted, are being absolutely dissipated and destroyed by the accumulating burdens of Federal, State, county, and municipal taxation. That is the reason why protests are coming to this Congress. We are the keepers of the purse strings of the public Treasury, and we individually have a burden here upon the floor of this House. Individually and collectively we are the only appeal that our people back home have; and they are sending messages to this Congress every day by personal appeal and by public resolution imploring us to be mindful of these great burdens of taxation under which they are struggling; yet now Members come in here as did the gentleman from Illinois, who, with one stroke of his pen, would raise the appropriation on this item on rivers and harbors more than $20,000,000. I have read the hearings with reference to this appropriation. They indicate that the Army engineers will have available to them for expenditure during the next fiscal year the sum of $44,000,000.

The gentleman predicates his appeal to you not upon the legitimacy of this increase as a matter of fiscal policy, as a matter of legitimate increase for rivers and harbors purposes, but upon the principle of unemployment. That is the basis upon which he predicates his appeal. We ought to have appropriate legislation looking to the relief of unemployment in this country, but we should not burden the Treasury by putting it upon the rivers and harbors item in this bill.

Mr. WILLIAM E. HULL. Mr. Chairman, will the gentleman yield?

Mr. BANKHEAD. I can not yield. I wish every Member had an opportunity to speak on this subject, but, as the gentleman knows, the time has been limited.

I submit to the Members of this House, to all of you, that that is not the real consideration here. The question here is whether the Corps of Engineers actually need, for the purpose before them to-day, this additional sum of $21,000,000.

They say in their testimony before the committee that they can get along with the committee appropriation on all the essential features of the program that has been laid down by the Congress.

Let us accept as our course of procedure not what we would like to have but the least we can get along with to run the public business. [Applause.]

Mr. TABER. Mr. Chairman, I hate to be talking so much on this bill, but as a Republican Member of this House I can not let this opportunity go by to urge my Republican colleagues and my Democratic colleagues to meet the responsibilities with which they are faced here to-day.

Are we going to run wild, are we going to spend our money just for the sake of spending it, thinking we are good fellows? The gentleman from Illinois predicated his appeal, partly, upon the relief of unemployment. Let me say to you, Mr. Chairman, when these questions were involved last spring, I took the matter up with the Board of Army Engineers and I found out that they expected to keep 8,000 men on the average at work, with $37,000,000, or $4,700 to keep one man at work for one year. The rest of it goes for contractors and for material and all that sort of thing.

The gentleman from Illinois told us that $20,000,000 would put 75,000 men to work. How much would that be per man?

Mr. WILLIAM E. HULL. I did not say that.

Mr. TABER. That is what I understood.

Mr. WILLIAM E. HULL. Will the gentleman yield?

Mr. TABER. How much did the gentleman say?

Mr. WILLIAM E. HULL. I said that with $20,000,000 you could keep 50,000 men at work, and I will tell you why.

Mr. TABER. I will show the gentleman why in just a second and then he will understand it.

Mr. WILLIAM E. HULL. No; the gentleman is wrong.

Mr. TABER. If you could put 50,000 men to work with $20,000,000 that would be $400 per man, and does anybody suppose that the men are working for that amount? This is the way the arithmetic of the gentleman's statement works out.

I want to show you what the President of the United States said in his Budget message:

> Because of a reduction in the cost of labor and material for work of this character, the value of the work of river and harbor improvement, which can be accomplished during the fiscal years 1933 and 1934 with the funds available, would represent an increase of 15 to 40 per cent or between $171,862,000 and $209,223,000, at 1929 costs or practically the figure of $85,000,000 a year on the average for these two years.

Now, do you not think the President of the United States has provided money enough for us to spend? Are we ever going to get anywhere if we do not stop spending now?

I appeal to my Republican colleagues to get in line behind the Budget of the President. I appeal to my Democratic colleagues to stop spending money and get in line behind the report of the committee, their committee, and sustain their committee.

Mr. MEAD. Will the gentleman yield?

Mr. TABER. I yield.

Mr. MEAD. I notice a statement in the RECORD here commenting on the subject by the chairman of the committee in his opening address, in which he states that in his judgment the committee did not care to raise these two items, but, as a matter of fact, all of the committee would, no doubt, vote to increase the items if the matter were brought up on the floor of the House. I am not for this amendment, but I am wondering why this statement was made.

Mr. TABER. Of course, I am not on this subcommittee and I can not speak for the members of the subcommittee, but I would say that I would hope that all of the five members of the subcommittee would vote to sustain their own report.

Mr. BLANTON. Will the gentleman yield?

Mr. TABER. Yes.

Mr. BLANTON. The gentleman is a member of the main committee.

Mr. TABER. Yes.

Mr. BLANTON. Did the main committee authorize any such statement as that?

Mr. TABER. It did not, and the committee wants to keep this thing down.

[Here the gavel fell.]

Mr. McDUFFIE. Mr. Chairman, I doubt if there is any man on this floor who has been more enthusiastic in the matter of the development of our rivers and harbors than I have been. In the heyday of our prosperity I was not only willing but worked at all times to hasten the development of this all-important governmental activity; but things are different in America to-day.

I do not need to tell you that this country is in the greatest crisis in all of its history. The overburdened taxpayer far and near is hoping and praying that the day will come when we will realize that one of the ways to get this Nation on an even keel is the old, homespun, wholesome, and sound way of stopping the spending of more than we are making. [Applause.]

I appeal to you gentlemen from every section of the Nation who are interested in this activity in behalf of the overburdened taxpayer. Let us stop spending more out of the Treasury than is coming into the Treasury, and we are doing this now at the rate of five or six thousand dollars a minute. The time has come to call a halt.

Mr. WILLIAM E. HULL. Will the gentleman yield?

Mr. McDUFFIE. In a moment I shall yield to my friend from Illinois.

I recall that during the war work of this type was practically stopped all over the Nation. Public buildings were not constructed. We were in a crisis then, but not as bad a crisis, economically, as we are in now.

I can assure you gentlemen who have river and harbor interests in your districts—and I have a great deal in mine—that if you will call up the Chief of Engineers he will tell you that no essential river and harbor project in this Nation will be neglected under the appropriation carried in this bill.

If that be true—and I believe it is true—are we not going far afield in assuming, as my friend from Illinois does—purely a matter of imagination, with all due respect to him, growing out of his enthusiasm on this particular subject—is it not going far afield to assume that 75,000 or 50,000 additional men will be put to work if we adopt this amendment?

Mr. WILLIAM E. HULL. Will the gentleman yield?

Mr. McDUFFIE. I yield.

Mr. WILLIAM E. HULL. I did not say that.

Mr. McDUFFIE. Then I beg the gentleman's pardon; I misunderstood him. Will the gentleman tell us how many men he does claim will be put to work?

Mr. WILLIAM E. HULL. I said that you would put that many men now at work out of a job, and you will; and you will have to go to a dole to feed them. I think it is better for the people of the country to keep these men at work than it is to turn them off and then have to feed them. You will turn off at least 50,000 men.

Mr. McDUFFIE. If the gentleman's figures are correct.

Mr. WILLIAM E. HULL. They are correct.

Mr. McDUFFIE. I prefer to take the figures of the Chief Engineer and the judgment of the Chief Engineer rather than that of my friend. The Chief Engineer is at variance with the gentleman from Illinois on the very thing that the gentleman from Illinois bottoms his plea to this House upon to violate, if you please, certainly the spirit which should prevail in the hearts and minds of the membership of this House at a time like this, not to spend money for anything that is not absolutely essential. The Chief of Engineers says that no important and essential project will suffer, even though there may be no new contracts, if we appropriate the amount carried in the bill.

[Here the gavel fell.]

Mr. LaGUARDIA. Mr. Chairman, I rise in opposition to the amendment. Mr. Chairman, I first came to Congress 16 years ago. I have heard the river and harbor appeal every year since that time. When I first heard the appeal for rivers and harbors it was based on "preparedness." Then, when I came back after the war, the river and harbor appeal came to us as "memorials." I well remember a session of the House in the Sixty-sixth Congress which lasted well into the morning, with many new projects in the bill, and they were based on the fact that they were to be "memorials"—this new "harbor" and that deepening of a river all "war memorials." Later on, when we got into the period of prosperity the appeal was based on commerce and "prosperity," and now the appeal is made on the poor overused "unemployed."

Well, I submit that the gentleman from Illinois [Mr. William E. Hull] knows a great deal more about rivers and harbors than I do, but I submit I know more about the unemployed than he does. [Laughter.] The time will come when you will have an opportunity to vote funds for the unemployed, and not very long from now, either. I would like to hear an argument for this increase of appropriations on the merits of the project. Do not blame it all, please, on the unemployed. At least have that much consideration for him.

Years ago the river and harbor bill provided for the dredging of navigable streams for which there was no merit. Why, river and harbor appropriations were a scandal. The traffic on many of the streams is yearly decreasing, while appropriations for them are increasing. Just look through the list of appropriations for rivers and harbors work.

There is not a man in this Congress who could locate 10 per cent of them without going to an atlas. That is how important these things are—lily-pond streams and mud streams in many instances. Oh, it is a great deal better than it was 15 years ago. The system has been much improved but it is still pork and it is still a logrolling proposition. The House should not add $20,000,000 on this item and several millions of dollars on the next item for flood relief. I appeal to you not only on this paragraph but on the paragraph that follows. I assume the responsibility for saying that unemployed labor does not get a sufficient percentage of amount of this appropriation to warrant this increase. I assume full responsibility for that statement.

Mr. WILLIAM E. HULL. Mr. Chairman, will the gentleman yield for a question?

Mr. LaGUARDIA. You can not solve the unemployed situation very much by putting a steam shovel to work. You do not solve the situation by giving fat contracts to favored corporations. I yield for a question.

Mr. WILLIAM E. HULL. Every man who works on the water puts another man to work. The gentleman agrees to that, does he not?

Mr. LaGUARDIA. Oh, of course.

Mr. WILLIAM E. HULL. There is an average of $1,500 per man.

Mr. LaGUARDIA. Not at all. Why, the gentleman started off with the proposition that it would employ 75,000 men. That is not correct.

Mr. WILLIAM E. HULL. I said 50,000.

Mr. LaGUARDIA. Well, that would be only an average earning a year of $400 per man, about a dollar a day. It is not worth appropriating millions to keep men to work on such starvation wages.

The CHAIRMAN. The Chair will be pleased to recognize any Member of the House who desires to speak in support of the amendment and asks recognition. If none such desires, the Chair recognizes the gentleman from Arkansas [Mr. Fuller] for five minutes.

Mr. FULLER. Mr. Chairman, as a representative from a State that would receive as much as or more benefit than any other State in the Union from an amendment of this kind, I am opposed to the increase proposed. Arkansas has more navigable miles of river than any other State in the Union.

Several Members. What about Alabama?

Mr. FULLER. I may be wrong, but I am right in substance, and know I am correct by counting the Mississippi River. I have no fear of this amendment's being adopted, but I call attention to the other side of the page, where they will take the same tactics as they have taken on this, unless they are overwhelmingly defeated on this proposition. I refer to the question of flood control. There is only one State in the Nation that will receive more benefit from flood control than the State of Arkansas, and that is the State of Louisiana. But a time comes when we ought to stop. In addition to the $19,000,000 set forth here, which is the exact amount of the Budget, there is going to be an overlapping, and there is going to be $28,000,000 available for flood control next year. We are getting flood-control work done for 46 cents on the dollar based on the estimate of Engineer Jadwin. So we are getting some real benefit this year. We who have been receiving great benefit in the South by reason of flood control ought to be appreciative of what the Congress has done in the matter of reconstruction loans. All over this Nation we have been receiving doles. Last year we set aside $300,000,000 in the way of doles to be loaned to cities and States to take care of the unemployed, and every man in the hearing of my voice knows that every dollar of it is a dole, and there will not be a cent of it paid back, unless it is paid back by the Government taking the money out of the right pocket and putting it back into the left pocket. It behooves all of us to realize that there is going to be a pay day some time, when we will have to settle these accounts.

Mr. WILLIAM E. HULL. Mr. Chairman, will the gentleman yield?

Mr. FULLER. For a question.

Mr. WILLIAM E. HULL. You have a lot of men working on flood control?

Mr. FULLER. Yes.

Mr. WILLIAM E. HULL. If you put those men out of work you must admit that you will have to take care of them.

Mr. FULLER. Yes.

Mr. WILLIAM E. HULL. Is it not better to keep them at work than to put them on a dole?

Mr. FULLER. We will take the money that comes from the Reconstruction Finance Corporation and we can better take care of them. The great portion of this money spent on flood control is for machines and drag lines. Very little of it goes to take care of actual labor. If it does, then it is a waste of money, because they can do it by machinery so much more cheaply, and that is also true of river and harbor work. So, after all, we are living in the land of doles, and we are giving 10 times more than England or any other nation ever thought of in taking care of its poor. Here we are seeking to balance the Budget, so that we might set an example to the people of the country. We have received a mandate to live within our income—to balance the Budget—it is good business policy. Such a cause will set an example for every State and for every city, town, and hamlet in all the States of the Union, all of which are practically bankrupt. If we do not balance our Budget, if we do not stop, what will they think? There must be a dead line somewhere. Economy must be practiced. I have voted and will continue to vote against every increase in these appropriation bills.

The CHAIRMAN. The time of the gentleman from Arkansas has expired.

Mr. McGUGIN. Mr. Chairman, I am sorry to be obliged to disagree with my friend from Illinois [Mr. WILLIAM E. HULL]. I think his position in this matter is impossible.

I can not subscribe to the proposition that it is right for the Government to come forth and spend money dredging rivers and what not to build up competition for the railroads of this country at a time when the Government is loaning the railroads enough money to pay their interest and their taxes.

Mr. WILLIAM E. HULL. Will the gentleman yield for a question?

Mr. McGUGIN. I yield.

Mr. WILLIAM E. HULL. Does the gentleman know that three-fourths of this money spent in the harbors helps the railroads?

Mr. McGUGIN. I do not know of any harbors up and down the Mississippi River that help the railroads.

Mr. WILLIAM E. HULL. Three-quarters of the money goes to the harbors of this Nation, and if we do not keep them up we can not keep up the railroads.

Mr. LAGUARDIA. How much has been spent on real harbors of the country?

Mr. WILLIAM E. HULL. Two-thirds of it.

Mr. LAGUARDIA. Oh, the gentleman is in error.

Mr. WILLIAM E. HULL. That shows how little the gentleman is acquainted with the facts about the matter.

Mr. McGUGIN. Mr. Chairman, this does not come out of my time, I hope.

Now, we have been carrying on this policy voting money out of a bankrupt Treasury to subsidize air lines, subsidize commercial busses and trucks, by letting them have virtually free the use of the public highways. Railroad transportation is guilty of many sins in keeping their freight rates too high, and so on, but that does not justify the Government following the asinine policy of subsidizing competition and at the same time loaning the railroads money with which to pay taxes and with which to pay interest. [Applause.]

I want to ask my Republican colleagues, how can we look the country in the face after we come here and increase this appropriation $21,000,000 over the estimate of our own Budget Director and over the recommendation of our own President? I want to ask my Democratic friends how they can look the country in the face, the country which just placed them in power, on a platform which pledged a 25 per cent reduction in public expenses, if to-day they add $21,000,000 to this appropriation in excess of their own Appropriations Committee recommendation? This matter is untenable from the standpoint of government, from the standpoint of partisan politics, from the standpoint of sound business in view of the fact that the Government is to-day following the policy of loaning public credit to the railroads of this country to pay taxes and interest. The proposition of increasing the river and harbor appropriation $21,000,000 will not stand up.

The CHAIRMAN. The time of the gentleman from Kansas [Mr. McGUGIN] has expired. All time has expired.

The question is on the amendment offered by the gentleman from Illinois [Mr. WILLIAM E. HULL].

The question was taken; and on a division (demanded by Mr. STAFFORD) there were ayes 16 and noes 104.

So the amendment was rejected.

The Clerk read as follows:

Flood control, Mississippi River and tributaries: For prosecuting work of flood control in accordance with the provisions of the flood control act, approved May 15, 1928 (U. S. C., Supp. V, title 33, sec. 702a), $19,653,424.

Mr. WILSON. Mr. Chairman, I move to strike out the last word. I realize what the situation is in this House to-day, but I ask for this time to make a statement in relation to the flood-control work and the appropriation therefor.

The hearings before the committee after the disastrous flood of 1927 show that this great project was undertaken as an emergency proposition, not in competition with anybody, but for the protection of life and property. It could not be successfully carried on without ample appropriations. That would be more than is recommended in this bill. The chairman of the committee admits that.

In 1928, when there was authorization for $325,000,000 to carry on emergency work for the protection of life and property, it was estimated that would be sufficient to carry out the plans for the completion of the main features of the project. Of course, we can not secure an increase in this appropriation, however meritorious the proposition may be, with this House in the mood it is to-day, regardless of the fact that if the work is not carried on as it should be for the next year a flood may come and there may be losses of hundreds of millions of dollars.

The work is being executed now at 46 per cent of the estimated cost when the act was passed. Two years ago 23½ cents per cubic yard of earth in levee construction was being paid. To-day bids are coming in at 7 cents and 10 cents per cubic yard. The work will be halted in 1934 unless there is an increase in this appropriation. Twelve thousand three hundred people are employed to-day in the construction work for flood control and protection. Less than 7 per cent of the money goes to overhead. All the remainder goes to the purchase of materials and to wages, which gives employment to American citizens. Therefore ample appropriations providing speedy prosecution to completion of this project will be in the interest of economy, maintain employment, and guarantee the protection of life and property.

Reference has been made to the appropriations for flood control for the present fiscal year:

In the War Department appropriation bill	$32,000,000
In the relief bill	15,500,000
Total	47,500,000

At the present time the unallotted balance from that sum is only $5,739,441.78, which, together with the present appropriation, will make available for the next fiscal year $25,392,665.78.

The amount required according to the estimate of the Chief of Engineers, under whose supervision the project is being prosecuted, is $35,000,000.

Of the original authorization, there still remains $160,600,000. Since the work is going forward with unusual

speed and efficiency and with great saving to the Government, it is unbusinesslike to halt progress on such an emergency project by withholding funds provided by law for that purpose. [Applause.]

Mr. MONTET. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment by Mr. MONTET: On page 69, in line 12, strike out "$19,653,424" and insert in lieu thereof "$25,000,000."

Mr. COLLINS. Mr. Chairman, I ask unanimous consent that all debate on this paragraph and all amendments thereto close in 10 minutes.

The CHAIRMAN. Is there objection to the request of the gentleman from Mississippi [Mr. COLLINS]?

There was no objection.

Mr. MONTET. Mr. Chairman, as disclosed by the hearings on this particular item, the Army engineers recommended an appropriation of $35,000,000. The Secretary of War cut this recommendation to $25,000,000, and the Budget trimmed it down to the figures contained in the bill.

I wish to call the attention of the committee not only to the truth of the statements just made by the gentleman from Louisiana, who preceded me, but also to the testimony of General Pillsbury in connection with this item where he testified that an appropriation of some $19,000,000 would not be sufficient to properly carry on the execution of this work.

The flood control act of 1928 carried an authorization of $325,000,000. Thus far we have appropriated $164,500,000. We are spending at an annual rate of something like $32,500,000.

General Pillsbury testified that if we trimmed this appropriation down to the figures carried in this bill there will be a loss of money, because, quoting his testimony:

At the present time we have very full competition by contractors well equipped with plants. If there is an interruption in the work, a certain number of those contractors will have to go under and we will not have the same competition when we resume the work.

The gentleman from Arkansas [Mr. FULLER] said that there would be available the sum of $28,000,000 for work in 1934. That is conditional, as was testified by General Pillsbury. You will find this testimony on page 96 of Part II of the hearings. General Pillsbury said that would depend upon certain claims now pending in the New Madrid and Bonnet Carre spillways, and having reference to flowage rights in those flood ways. These claims amount to some $5,000,000 in round numbers. If these claims are paid in 1934, there will be but $23,000,000 left for flood control. This would be quite a cut in the appropriation and would materially slow down the execution of the flood-control program.

The increase sought should not appeal to Members simply because it would provide some employment. This is not an improvement. This is a protection of a large area of this country the responsibility for which was assumed by the Nation under the flood control act of 1928.

It would not be economy, Mr. Chairman, to cut this appropriation at this time; it would be parsimony. There would not be enough funds left in this appropriation to take care of an emergency. General Pillsbury so testified. We never know when the spring rises will bring great wreckage not only into Louisiana and Arkansas, but in Mississippi and Missouri as well.

I do not believe that this is such a project that trimming the appropriation some $13,000,000 can be called economy. You are doing it at great risk. You are really doing it in violation of an obligation this country assumed in 1928.

This increase of only $5,500,000 may save this country hundreds and hundreds of millions of dollars in the event we have a flood next spring; and no one knows the number of lives that might be saved.

I do not believe we can afford to take the chances involved in trimming this item any more than we can afford to take a chance on trimming down our national defense. This is as much a matter of national defense as are the Army and the Navy. It protects a great portion of this country, property rights, and lives, and I certainly hope this committee will see fit to restore in this bill the recommendations of the Secretary of War.

Mr. WHITTINGTON. Mr. Chairman, I rise in support of the amendment.

Mr. Chairman, I believe it will be both economical and wise to adopt the amendment.

What is the situation respecting this amendment? We are not advocating any additional authorization from the Federal Treasury. The flood control act of 1928 provides for the expenditure of $325,000,000 in the improvement of the lower Mississippi River. It was contemplated that there would be expended approximately $32,500,000 annually. The item carried in this bill provides for the expenditure of $19,653,424.

Have you forgotten what transpired six years ago? Have you forgotten that the people of the United States because of the inadequacy of flood-control works along the lower Mississippi River contributed through the American Red Cross $18,000,000 to alleviate human suffering in the great Mississippi flood of 1927?

Do you recall that 245 people lost their lives and that property aggregating $236,334,414.06, according to the report of the Chief of Engineers, was destroyed because of the inadequacy of the measures by Congress to protect the lower Mississippi River?

Now, what is the situation? Congress has provided for the expenditure of about $32,000,000 annually. Shall we now as a matter of false economy reduce this annual authorization from $32,000,000 to $19,653,424?

There is always the possibility of a very much greater damage. The levees along the lower river can never be stronger than their weakest links. The millions of dollars previously appropriated and expended in the construction of levees may be in many places washed away if the project has not been completed at the time of another flood.

I am only asking that when most needed, and for economy, the usual appropriations be made.

Mr. TABER. Mr. Chairman, will the gentleman yield?

Mr. WHITTINGTON. I yield for a brief question; yes.

Mr. TABER. We provided for expenditure during the current year, $47,500,000, which is $15,500,000 more than the regular amount of the authorization.

Mr. WHITTINGTON. I agree that in the aid of unemployment I followed the President of the United States when he asked in the relief act of 1932 that there be allocated an additional $15,500,000 to provide employment; but in giving that employment I did not consider that restrictions were placed upon the annual appropriation of $32,000,000. As I have stated, it was an emergency program, and an expenditure of $15,500,000 for the relief of unemployment.

Mr. TABER. The President did not recommend that. The committee made that appropriation.

Mr. WHITTINGTON. No; the matter was not handled by the War Department Committee handling the pending bill. It was part of his recommendation, as well as the action of Congress for the relief of unemployment during the past session; and that is not all. For the fiscal year 1933 there was appropriated $32,000,000; and we made an emergency appropriation of about $3,000,000 for flood control, in December, 1929, upon the recommendation of President Hoover.

Now, what will be the result? Will Congress assume responsibility for damages in the event of another flood?

The Government undertook to solve the problem of flood control along the Mississippi River as a national responsibility. After having expended $164,500,000, when the Government engineers say that with the usual appropriations contemplated by law this project may be completed in the fiscal year 1934 or 1935, will we now endanger the $164,500,000 that we have already expended and cause probably the loss of additional lives by our failure to comply with a statute which we have already enacted?

My colleagues will recall that the authorization in the act of 1928 was made, not as a result of the previous wisdom of Congress but as a result of the great flood of 1927.

I recall that Benjamin Franklin, in his autobiography, made a statement that has ever been true. He said: "The best public measures are seldom adopted from previous wisdom, but are forced by the occasion."

De Soto discovered and crossed the Mississippi River in 1543, and after traveling through what is now Arkansas, Oklahoma, and Louisiana, he returned to the Father of Waters to find it in a great flood. Ever since Mississippi overflows have come with tragic regularity. As in the days of Noah, the flood came in De Soto's time, as the floods come now, after rains for 40 days.

In 1928 Congress recognized that flood control of the Mississippi River was a national question and the Government assumed responsibility. The flood control act of May 15, 1928, authorized the appropriation of $325,000,000. To date $164,500,000 have been actually appropriated. The project was to be completed in 10 years. Annual appropriations of $32,000,000 were provided. The Chief of Engineers estimates that if the previous appropriations are continued, the levees along the main river will be completed by the close of the fiscal year 1935.

The Chief of Engineers recommended an appropriation of $35,000,000 for 1934, which was reduced by the War Department to $25,000,000. The Budget recommended $19,653,424, which amount is carried in the bill, as the committee has followed the Budget. I favor the amendment to increase the amount to $25,000,000. I believe that in the circumstances, in an effort to promote real economy, the appropriation should be increased to at least $25,000,000.

The Assistant Chief of Engineers, as shown by page 98 of Part II of the hearings, testified that unless the appropriation was increased, there would be a loss of money. He stated that at present there were contractors with ample equipment. A reduced appropriation would mean interruption in the work. The contractors would likely go out of business and when normal conditions are resumed, competition would not be as keen.

I favor economy. I insist that all appropriations should be reduced to the very lowest point compatible with efficiency. Flood control provides for navigation, commerce, and protects life and property. The works are chiefly enlarged and strengthened levees along the lower Mississippi River. Until completed, there is the ever-present danger of a greater destruction. In the event of a flood, the loss will be largely in excess of the appropriation. There will be damages to the incomplete work.

Both labor and material are much cheaper now than in 1928. The public interest will be promoted by continuing the normal appropriation.

I am aware that the emergency and relief act of 1932, as I have stated, carried $15,500,000 for flood control. The Budget and the committee took this into consideration and the amount carried in the bill is the annual appropriation of approximately $35,000,000 less the said sum of $15,500,000.

The President recommended an emergency appropriation for flood control in December, 1929, in aid of unemployment. The President and the Congress approved an emergency appropriation of $15,500,000 primarily in aid of unemployment in 1932. Unemployment is more general in 1933.

I favor the amendment. Economy will be practiced, unemployment will be aided, and protection to the people and property of the lower Mississippi Valley will result.

[Here the gavel fell.]

The CHAIRMAN. The question is on the amendment offered by the gentleman from Louisiana [Mr. MONTET].

The question was taken; and on a division (demanded by Mr. MONTET) there were—ayes 18, noes 87.

So the amendment was rejected.

The Clerk read as follows:

For maintenance and operation of the Panama Canal: Salary of the governor, $10,000; purchase, inspection, delivery, handling, and storing of materials, supplies, and equipment for issue to all departments of the Panama Canal, the Panama Railroad, other branches of the United States Government, and for authorized sales; payment in lump sums of not exceeding the amounts authorized by the injury compensation act, approved September 7, 1916 (U. S. C., title 5, sec. 793), to alien cripples who are now a charge upon the Panama Canal by reason of injuries sustained while employed in the construction of the Panama Canal; for continuing the construction of the Madden Dam across the Chagres River at Alhajuela for the storage of water for use in the maintenance and operation of the Panama Canal, together with a hydroelectric plant, roadways, and such other work as in the judgment of the Governor of the Panama Canal may be necessary, to cost in the aggregate not to exceed $15,500,000; in all, $9,172,700, together with all moneys arising from the conduct of business operations authorized by the Panama Canal act, and such sums, aggregating not to exceed $2,000,000, as may be deposited in the Treasury of the United States as dividends by the Panama Railroad Co. in excess of 10 per cent of the capital stock of such company: *Provided*, That the board of directors of the Panama Railroad Co. shall not permit the investment of any of the receipts of such company in any manner, and after June 30, 1933, shall require the deposit of all receipts in the Treasury of the United States in a special deposit account subject to the order of the proper officers of the corporation.

Mr. KNUTSON. Mr. Chairman, I make a point of order against the last proviso as being legislation on an appropriation bill and contrary to the Holman rule.

Mr. COLLINS. I should like for the gentleman to reserve his point of order.

Mr. KNUTSON. I will reserve the point of order for a moment.

Mr. COLLINS. The gentleman is making his point of order to the last proviso, reading:

Provided, That the board of directors of the Panama Railroad Co. shall not permit the investment of any of the receipts of such company in any manner, and after June 30, 1933, shall require the deposit of all receipts in the Treasury of the United States in a special deposit account subject to the order of the proper officers of the corporation.

Is that the language to which the point of order is directed?

Mr. KNUTSON. Yes.

Mr. COLLINS. The purpose of this language, I may say to the gentleman, is this: The committee found that since the 1933 bill was reported to the House the Panama Railroad Co. has invested considerable sums of money in stocks and bonds. A list of these bonds appears on pages 118 and 119 of part 2 of the hearings. Most of these bonds are the bonds of utility companies.

In going over the bonds held by this railroad company, which aggregate many millions of dollars, the committee has found that many of them have depreciated to such an extent that they are worth only about 70 cents on the dollar, with the result that the committee felt that in the future the Panama Railroad should be precluded from making purchases of this nature and that the funds of the railroad should be deposited in the Treasury of the United States in a special fund. Certainly, if this be done we will not lose anything, as has been our experience in the past. I therefore sincerely hope the gentleman will not make his point of order.

Mr. KNUTSON. Mr. Chairman, the Panama Steamship Line operates between New York and Colon. It is absolutely essential to the successful operation of the line that it have easy access to its deposits. The provision written in this bill by the committee would compel the company to deposit all its receipts in the Treasury of the United States.

Mr. COLLINS. The object of the proviso——

Mr. KNUTSON. I am in thorough sympathy with the object the gentleman has stated.

Mr. COLLINS. The funds are just as much available to the steamship company and the railroad company, under the terms of the bill, as they are at the present time. They are now deposited in New York and in Panama in special deposit accounts. This proviso does not preclude them from spending any of it. It merely makes the Government the custodian of the cash resources of the company.

Mr. KNUTSON. I am in thorough sympathy with the object the gentleman seeks to achieve, but the gentleman is going at it in the wrong way. I am sorry, but I shall have to insist on the point of order and I trust that the Senate or the conferees will amend the bill so as to prohibit the company in the future——

Mr. COLLINS. If the gentleman will permit one further statement, I do not believe this amendment would cause the

money to be removed from the banks in which it is now deposited.

Mr. KNUTSON. I would like to ask the gentleman from Mississippi what this language means: "Shall require the deposit of all receipts in the Treasury of the United States." If that means anything but the Treasury of the United States, I will withdraw my point of order.

Mr. BLANTON. That makes it safe.

Mr. COLLINS. The Treasury of the United States maintains any number of United States depositories all over the country, including Panama, I am told. Under the language of this proviso the money would be deposited in a United States depository in both New York and Panama, and would be subject to the call of the Panama Railroad Co. to the same extent that it is now.

Mr. KNUTSON. But it will not be so available. I shall have to insist on the point of order.

The CHAIRMAN. The point of order is sustained.

Mr. SHANNON. Mr. Chairman, I move to strike out the last word. I do this for the purpose of asking the chairman of the committee, the gentleman from Mississippi, if in fixing the compensation of the Governor of the Canal Zone, the committee took into consideration that he had free living quarters?

Mr. COLLINS. No; and I might say to the gentleman that the committee had nothing to do with fixing the governor's compensation.

Mr. SHANNON. Did the committee take into consideration the perquisites that he receives?

Mr. COLLINS. There are none.

Mr. SHANNON. Oh, yes; there are. They pay no taxes on their cigarettes, for one thing.

Mr. COLLINS. The only perquisite I know anything about is a personal allowance paid to him out of the revenues of the Panama Railroad Co.

Mr. SHANNON. The Governor of the Canal Zone, before our committee, in answer to an inquiry, admitted that there were violations of the tariff laws in that section. For one thing, he said that no one pays taxes on cigarettes.

In answer to a further inquiry as to tariff law violations, he said that he had purchased a golf bag for himself and another for a friend in England because he could get them cheaper than he could from an American manufacturer. I asked him how much of his salary England paid, and he said none. Then I said, "You at least ought to have patriotism enough to buy American goods." Hence, I rose to ask the gentleman if the committee gave any thought to these extra things that the governor gets.

Mr. COLLINS. I will say that I am afraid that the committee can not reach the subject matter about which the gentleman complains. I realize that there are many things in Panama that can be purchased cheaper than in the United States. It has been suggested that a certain English make of golf balls can be purchased for 55 cents that cost in the United States a dollar. I am afraid, however, that the committee is without jurisdiction in the matter.

Mr. SHANNON. But it seems that the committee might consider these things in fixing the salary of the governor.

Mr. COLLINS. This committee does not fix his salary.

Mr. CHINDBLOM. Mr. Chairman, will the gentleman yield?

Mr. SHANNON. Yes.

Mr. CHINDBLOM. Unfortunately there are plenty of people in the United States who right now are buying foreign-made goods in preference to American goods because they get them cheaper.

Mr. SHANNON. Are they public officials?

Mr. CHINDBLOM. They are both private individuals and public officials.

Mr. SHANNON. I am after the Army, where honor is supposed to be supreme.

Mr. HORR. Do I understand that the gentleman is making a tariff speech and that there should be a tariff placed on these items?

Mr. SHANNON. I do not want American public officials taking advantage of our high tariff and buying goods with American money in that manner.

Mr. HORR. The gentleman does recognize that with the tariff off it does produce a little distress.

Mr. SHANNON. Oh, it does.

The CHAIRMAN. The time of the gentleman from Missouri has expired.

Mr. SCHAFER. Mr. Chairman, I rise in opposition to the pro forma amendment.

Mr. COLLINS. Mr. Chairman, will the gentleman yield?

Mr. SCHAFER. Yes.

Mr. COLLINS. I ask unanimous consent that all debate upon this paragraph and all amendments thereto close in five minutes.

The CHAIRMAN. Is there objection?

There was no objection.

Mr. SCHAFER. Mr. Chairman, I merely rise to express my appreciation that another Democratic leader has risen in his place on the floor of the House and advocated the Republican doctrine of "Buy American First," which is in fact a Republican tariff principle.

We know that in the last campaign the Democratic demagogues gathered hundreds of thousands of votes by denouncing the Smoot-Hawley tariff act and the Republican Party which sponsored it for causing many of the ills of America and many of the ills of the world. What do we find to-day? We find that by reason of depreciated currency in foreign countries, the products of foreign industry and labor and farms are flooding the American markets. The tariff walls of the Hawley-Smoot Act are being leveled this very moment like the walls of Jericho; and in the name of the American people, in the name of the millions of unemployed, in the name of the farmers who have surplus products on hand, I ask you Democrats to follow some of the statements that you have been making here in the press and movietones to buy American first, and bring to the floor of the House legislation to raise the rates of the Hawley-Smoot Act and protect American industry, American farmers, and American workers from unfair competition of cheaply produced foreign importations.

Mr. CHINDBLOM. Mr. Chairman, will the gentleman yield?

Mr. SCHAFER. Yes.

Mr. CHINDBLOM. As a matter of fact, a committee of the Ways and Means Committee, appointed by the present control of the House in the Ways and Means Committee, will begin hearings on Thursday at 10 o'clock on that very subject.

Mr. SCHAFER. That is so. However, let us look at the record. The Democrats have had control of the House for two years and have had control of the Committee on Ways and Means. They held hearings on the identical legislation last May and agreed to keep it in committee. A few days after a number of Republicans requested that action be taken and the Republican conferences called, hearings were again scheduled. We can not depend on the Democratic leaders who control the House. We do not know whether they are going to be here to-day or there to-morrow. They adopt a policy as they did upon the billion-dollar sales-tax allotment bill to save the Nation, and then they heard the clarion call from their leader, the President elect, and they ran to cover in disorderly retreat. An editorial in certain of the Hearst papers indicated that this lame-duck Congress should follow the Democratic Speaker of the House and balance the Budget, and indicated that he had since the session commenced advocated the necessity for balancing the Budget. I yield now to find out from the Democratic leaders when the Speaker of the House is going to follow that principle of balancing the Budget so that we can follow him.

Mr. McCORMACK. Mr. Chairman, will the gentleman yield?

Mr. SCHAFER. Yes.

Mr. McCORMACK. Does the gentleman know that at the last session when the Committee on Ways and Means gave a hearing on the depreciated currency bill the present administration opposed it through Mr. Mills and Mr. O'Brien, the chairman of the Tariff Commission, appearing

before that committee and protesting against the passage of the bill?

Mr. SCHAFER. The hearings do not indicate that Mr. Mills opposed it. The chairman of the Tariff Commission did. Under the Constitution, the jurisdiction with reference to tariff legislation is vested in the House of Representatives, and in the House of Representatives alone; and we should exercise our judgment. One bureaucrat's opposition should not swerve us. We should do our duty and stop taking care of these foreign countries and the nationals of foreign countries first. Of course, you Democrats denounced the Hawley-Smoot Tariff Act in the last campaign and you advocated a revision of the tariff rates downward. I now yield for any Democratic member of the Committee on Ways and Means or any Democratic Member of the House to rise and answer as to one specific rate that you would revise downward. I hear no one willing to testify.

The CHAIRMAN. The time of the gentleman from Wisconsin has expired.

The Clerk read as follows:

SEC. 2. No part of any money appropriated by this act shall be used for maintaining, driving, or operating any Government-owned motor-propelled passenger-carrying vehicle assigned for the exclusive use of persons other than the Secretary of War and medical officers on out-patient medical service.

Mr. BLANTON. Mr. Chairman, I offer the following amendment, which I send to the desk.

The Clerk read as follows:

Amendment offered by Mr. BLANTON: Page 75, line 1, after the word "persons," strike out the balance of the paragraph.

Mr. BLANTON. Mr. Chairman, if the language of this bill is left as it is written, without adopting my amendment, then we will be allowing a limousine to the Secretary of War, and also one to each of the medical officers when on out-patient duty. If we are going to allow a limousine to the Secretary of War, who gets $15,000 a year, why do we not allow it to all other high officials who do the business down there? If you are going to allow a limousine to medical officers, why do you not allow it to the balance of them?

There is not a Member of Congress on this floor who would dare get up here and vote for a measure that would give us a limousine, and yet we have more running around to do than the Secretary of War. We have much more business to attend to scattered all over this city than any of the medical officers down there have, who treat their patients at a certain office in the War Department. I am forced to keep a large car here in Washington for the use and benefit of my constituents, which I bought myself and which I maintain myself at my own expense. I have to keep here another Ford car for a work car, which I bought myself and which I maintain at my own expense. In addition to that, there is hardly a day but what I use a taxicab several times during the day, in going to the different departments. It is easier than to jump in my own car, while most of us use our own cars on business every day, none of us would vote for a car for our own use. Why? Because we know the people would not stand for it. If the people will not stand for our voting ourselves a car, why will they stand for our voting a limousine to a $15,000 a year Cabinet officer? That is unanswerable.

Mr. BLACK. He wears a high hat.

Mr. BLANTON. Oh, my friend the gentleman from New York [Mr. BLACK], who, like myself and some others, did not have any better sense than to vote against tabling the McFadden resolution, and for which vote the New York papers say he is irresponsible, is now in charge of the so-called District of Columbia beer bill, upon which he is now holding hearings, and these same papers are daily applauding him for his efforts to report and pass that bill. He is a splendid chairman for that kind of a bill, but the undependable newspapers think he is a numbskull when he votes on an impeachment resolution. The gentleman from New York mentions the high-hat limousine, specially built to hold the society silk hat of Republican Postmaster General Brown. Is there a man in this Congress who has not heard from his constituents on that? They write to me and say, "Is it true that you as a Member of Congress have been permitting the Postmaster General, who gets $15,000 a year, to have a Government limousine? Have you been voting for that?" I have been compelled to tell them that I could not help it. [Laughter.] I had to tell them that this body is composed of 435 Members. There must be a majority of them vote to stop these matters.

Why should you vote for this limousine for the Secretary of War, who receives a salary of $15,000 per year? Why should you vote for Government limousines for the medical officers who treat all of their patients at one office? The patients come to their offices. What do they need a Government limousine for? When you give them a Government limousine you have to give them a chauffeur, and gas, oil, and annual upkeep at Government expense.

You who are in favor of balancing the Budget are going to be called upon directly, as soon as we get into the House after we read the next paragraph, to register by yea and nay vote whether you stand for voting for all this money to provide these polo horses for Army officers, $87,000 additional to the amount carried in the bill, for which you will have to go on record in this time of depression. You will have to vote whether or not you will expend that additional $550,000 that the gentleman from California [Mr. BARBOUR], with votes of Republican leaders, placed in this bill. You will have to vote on the proposition whether or not you will expend that extra $2,500,000 that the gentleman, with votes of Republican leaders, added to this bill. How are you going to vote on these amendments? Your constituents will find out whether or not they can depend on you to save their money. This amendment to give the Secretary of War a limousine is indefensible, when he gets a salary of $15,000 per year and millions of people are starving to death.

The CHAIRMAN. The time of the gentleman from Texas has expired.

Mr. COLLINS. Mr. Chairman, I ask unanimous consent that all debate on this paragraph and all amendments thereto close in five minutes.

The CHAIRMAN. Is there objection?

There was no objection.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Texas.

The question was taken; and on a division (demanded by Mr. BLANTON) there were—ayes 51, noes 27.

So the amendment was agreed to.

The Clerk read as follows:

SEC. 3. No part of any apropriation made by this act shall be used in any way to pay any expense in connection with the conduct, operation, or management of any post exchange, branch exchange, or subexchange within any State, Territory, or the District of Columbia, save and except for real assistance and convenience to military personnel and civilians employed or serving at military posts in supplying them with articles of ordinary use, wear, and consumption not furnished by the Government.

Mr. RICH and Mr. TABER rose.

The CHAIRMAN. For what purpose does the gentleman from New York rise?

Mr. TABER. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. TABER: On page 75, after line 12, insert a new section, as follows:

"SEC. 4. Any sum appropriated by this act or on account of the Military Establishment or any portion of such sum that may not be needed for the purposes for which appropriated as the result of an economic survey ordered by the President shall be impounded and returned to the Treasury."

Mr. STAFFORD. Mr. Chairman, a point of order. I believe the gentleman from Pennsylvania wishes to offer an amendment to section 3. If he does, will the gentleman from New York kindly withhold his amendment?

Mr. GOSS. Mr. Chairman, I reserve a point of order.

Mr. STAFFORD. I am merely calling attention to the fact that the gentleman from Pennsylvania wishes to offer a perfecting amendment.

The CHAIRMAN. The Chair has examined the amendment offered by the gentleman from New York [Mr. TABER] and the amendment offered by the gentleman from Pennsyl-

vania [Mr. RICH]. The Chair is of the opinion that the amendment offered by the gentleman from Pennsylvania is in the nature of a perfecting amendment and is entitled to precedence over the amendment offered by the gentleman from New York. Therefore, the Clerk will report the amendment offered by the gentleman from Pennsylvania.

The Clerk read as follows:

Amendment offered by Mr. RICH: Page 75, line 9, strike out the words "military personnel," and in line 10 of the same page strike out the words "and civilians employed or serving at military posts" and insert in lieu thereof "enlisted men and their families and troops."

Mr. RICH. The wording of this amendment is the same as the wording carried in the Army appropriation bill passed by the last session of Congress.

With the thought expressed as it is in the amendment it is to the effect that we want the enlisted men, their families, and troops serving at Army posts to receive the benefits of the post-exchange stores.

We are opposed to the wording expressed in this bill because of the fact that it takes in civilian employees. We all remember the abuses that have taken place in the past year or two at these post-exchange stores wherein various Government officials extended the privilege of these institutions to those who are not entitled to them. Now you are trying to open up the door again and give the civilian employees and their friends an opportunity to come and accept the privileges of these post-exchange stores to the detriment of the people in business in this country. I think it is high time that the Army in submitting bills of this kind did not try to open up the doors. We have closed them to a certain extent by an order from the Secretary of War, yet you here as Congressmen recommend that they go into general merchandising again. We are not against the Army in its offering merchandising facilities to officers and enlisted men of the Army, but you are trying to give everybody an opportunity to buy at post exchanges, which is contrary to good business.

Mr. BARBOUR. Mr. Chairman, will the gentleman yield?

Mr. RICH. I yield.

Mr. BARBOUR. This would preclude an officer, as well as a civilian employee, from having the right to patronize a post exchange. Is not this true?

Mr. RICH. Then let me substitute the words "officers, their families, and troops."

Mr. SHANNON. It is the law just as it is now. That is what he is asking for; that is what they are operating under now. The Army never surrenders. It always gets back what is taken away from it. That is the law at this moment.

Mr. RICH. Mr. Chairman, I ask unanimous consent to modify my amendment by inserting the word "officers" previous to the word "enlisted."

The CHAIRMAN. Without objection, it is so ordered.

There was no objection.

The CHAIRMAN. The Clerk will report the amendment, as amended, at the suggestion of the gentleman from Pennsylvania.

The Clerk read as follows:

Amendment offered by Mr. RICH, as modified: Page 75, line 9, strike out the words "military personnel," and in line 10 of the same page, strike out the words "and civilians employed or serving at military posts," and insert in lieu thereof "officers, enlisted men and their families, and troops."

Mr. BARBOUR. What possible objection could there be to allowing a civilian employee at some Army post miles from a town or city to purchase the necessaries of life, as a matter of convenience, from the Army post exchange? What could be the objection to that?

Mr. RICH. I think it is an opening of the door; we are opening the door to the Government engaging in business, and I think it is the wrong thing to do.

Mr. BARBOUR. Then, as I said to the gentleman the other day, if the Shannon committee will bring in its report, so that we will know what we are doing, we can legislate intelligently on this matter. There is no reason on earth why that committee should not make its report. It was appointed during the last session of the Congress.

Mr. RICH. Every time we come in here and make a suggestion there is always objection to it.

Mr. BARBOUR. Why does not your committee make its report?

Mr. RICH. This is something that can be handled right now, and I think it is time we take it up, and I shall ask for a vote on it.

Mr. BARBOUR. I am opposed to doing this on an appropriation bill. It is not the proper way to legislate in regard to a matter of this kind.

[Here the gavel fell.]

Mr. COLLINS. Mr. Chairman, I ask unanimous consent that all debate on this amendment close in 10 minutes.

The CHAIRMAN. Is there objection to the request of the gentleman from Mississippi?

There was no objection.

Mr. McGUGIN. Mr. Chairman, I offer a substitute amendment to the amendment offered by the gentleman from Pennsylvania.

The Clerk read as follows:

Substitute amendment offered by Mr. McGUGIN to the amendment offered by Mr. RICH: Page 75, line 10, strike out the words "and civilians employed or."

Mr. McGUGIN. Mr. Chairman, I am trying to reach the same object that the gentleman from Pennsylvania has in mind, and without materially changing the phraseology of the bill all we need to do is to strike out these four words "and civilians employed or." This leaves it so that all military personnel can purchase at these post exchanges, but the civilians can not. Let us see what is fair and right about this thing. Civilian employees working at an Army post, in many instances drawing the regular scale or the regular standard of pay in carpenter work or what not—what right have they to expect to buy things from the Government, in some instances tax free, and cheaper than their fellow workmen can buy them on the outside? The next thing to be considered is that it is not right for the Government to set up an institution to sell to people who are civilian employees and at the same time tax private business of this country to help maintain the Army and the Government institutions.

Mr. PATTERSON. Will the gentleman yield?

Mr. McGUGIN. I yield.

Mr. PATTERSON. Does the gentleman realize that some of these civilians are working at Army posts where it may be 10 miles to a place where they can buy anything?

Mr. McGUGIN. I apprehend there are farmers in communities in the gentleman's district that are 10 miles away from a trading place.

Mr. HOUSTON of Hawaii. Will the gentleman yield?

Mr. McGUGIN. Yes.

Mr. HOUSTON of Hawaii. Are not some of these civilian employees actually living at these Army posts?

Mr. McGUGIN. Even so, it is not right that the taxpayers of this country should help maintain an institution to sell them merchandise, tax free and without profit, at the very time we are taxing merchants and all other private business in this country to help maintain the Government.

So far as I am personally concerned, I have no interest in this matter in so far as my district is concerned. There is no Army post in my district, there is no constituent of mine who is going to be able to buy anything any cheaper at one of these Army posts, and there is no merchant in my district who is going to suffer by this unfair competition. It is just a question of what is fair and right. There are some Army posts in the State from which I come, and a part of this practice ends up in nothing less than bootlegging of the merchandise of these stores out among the civilian population, which is unfair competition with legitimate busness.

With this amendment we have gone farther than we have heretofore gone. Heretofore we have not extended these privileges to the officer personnel of the Army, but only to the enlisted personnel. My amendment leaves it applicable to officers and enlisted personnel but not to civilian em-

ployees whose salary is not the salary of an ordinary enlisted man in the Army, but is at the usual and regular wage standard. This proposal is not right as between the men working there as civilians and other civilian labor throughout the country. It is not right from the standpoint of fair competition with honest, legitimate, independent retail business of this country, and I appeal to the House to strike out the words "and civilians employed or," and this will leave the matter so that it only applies to the military personnel, officers and enlisted men alike.

[Here the gavel fell.]

Mr. SHANNON. Mr. Chairman, I move to strike out the last word.

The purpose of either amendment would be to leave the law just as it is.

It is very hard for a citizen back home who is struggling to make a living to be heard by this body. In the short hearings before the committees and the five minutes given here it is difficult to present his case. A fighting man from Lawton, Okla., came here and tried to get a hearing in this House and did not get it; but he went over to the other body, and Senator THOMAS wrote into existing law the words that have brought about this discussion.

I wish you could read the testimony given at our hearings and see the number of merchants that were driven out of business because they could not compete with the post exchanges. If you pass this act as it comes from the committee, you will reinstate the abuse that was eradicated last year.

Mr. LANKFORD of Virginia. Will the gentleman yield?

Mr. SHANNON. I will.

Mr. LANKFORD of Virginia. This act provides that no appropriation shall be used to pay any expense in connection with the conduct of any post exchange or branch exchange——

Mr. SHANNON. Let me say that at Fort Leavenworth there were 43 clerks employed at the post exchange, and 440 civilians residing in the city of Leavenworth were permitted to trade at the post exchange. Practically the same conditions existed also at Fort Riley and at Fort Sill. What the private merchants want is that these civilian employees of the Government shall be made to buy their goods in trade as do other citizens.

Mr. LANKFORD of Virginia. I am in sympathy with the gentleman's position. I would like to ask the gentleman what becomes of the money?

Mr. SHANNON. Nobody knows what becomes of the money. Money is elusive. At Fort Sill the post exchange was said to do nearly a million-dollar business annually, at Fort Riley a similar amount, and at Fort Leavenworth approximately $800,000.

You are asked to do something that is unfair and unjust to the citizens scattered around over the United States. There are in the neighborhood of 191 post exchanges, including branch and subexchanges, operating on Army reservations in the United States.

The CHAIRMAN. All time has expired. The question is on the amendment offered by the gentleman from Kansas as a substitute for the amendment of the gentleman from Pennsylvania.

The question was taken, and the substitute was rejected.

The CHAIRMAN. The question now is on the amendment of the gentleman from Pennsylvania [Mr. RICH].

The question was taken; and on a division (demanded by Mr. SHANNON) there were 48 ayes and 89 noes.

So the amendment was rejected.

Mr. TABER. Mr. Chairman, I offer the following amendment.

The Clerk read as follows:

Page 75, after line 12, insert a new section, as follows:

"SEC. 4. Any sums appropriated in this act for or on account of the Military Establishment or any portion of such sum that may not be needed for the purpose for which appropriated as a result of an economic survey ordered by the President shall be impounded and returned to the Treasury."

Mr. McCORMACK. Mr. Chairman, I reserve a point of order to that amendment.

Mr. BLANTON. Mr. Chairman, I demand the regular order.

Mr. McCORMACK. Mr. Chairman, the point of order is to the language which refers to an economic survey. It is legislation on an appropriation bill.

Mr. COLLINS. Mr. Chairman, I move that the committee do now rise.

The motion was agreed to.

Accordingly the committee rose; and the Speaker having resumed the chair, Mr. DRIVER, Chairman of the Committee of the Whole House on the state of the Union, reported that that committee had had under consideration the bill H. R. 14199, the War Department appropriation bill, fiscal year 1934, and had come to no resolution thereon.

MESSAGE FROM THE PRESIDENT

A message in writing from the President of the United States was communicated to the House by Mr. Latta, one of his secretaries.

WAR DEPARTMENT APPROPRIATION BILL

Mr. COLLINS. Mr. Speaker, I move that the House resolve itself into the Committee of the Whole House on the state of the Union for the further consideration of the bill H. R. 14199, the War Department appropriation bill, fiscal year 1934.

The motion was agreed to.

Accordingly the House resolved itself into the Committee of the Whole House on the state of the Union for the further consideration of the bill H. R. 14199, with Mr. DRIVER in the chair.

Mr. COLLINS. Mr. Chairman, will the gentleman from Massachusetts withhold his point of order for a moment?

Mr. McCORMACK. Mr. Chairman, I reserve the point of order.

Mr. COLLINS. Mr. Chairman, I have looked over this amendment of the gentleman from New York [Mr. TABER]. It is the same amendment that has been carried for years in the bill, and, as I understand, it merely gives to the incoming President the same powers to effectuate economies that have been granted to the present President.

Mr. TABER. That is the situation exactly.

Mr. COLLINS. Personally, I think the President ought to be permitted to effectuate economies if they can be effectuated.

Mr. TABER. Mr. Chairman, it seems to me that the Democratic President coming in on the 4th of March ought to have an opportunity to show whether he can make some economies and save some money.

Mr. GOSS. There would be no objection to that, but you impound the money into the Treasury so that the War Department can not transfer it from one item to another if they find one short. That is the basis upon which I shall make the point of order if the gentleman from Massachusetts does not insist upon the point of order.

Mr. McCORMACK. Mr. Chairman, I have had an opportunity to examine the amendment. My point of order was based upon the Clerk's reading, and on the theory that this related to a past economic survey. In view of my examination of the proposed amendment I withdraw the point of order.

Mr. GOSS. Mr. Chairman, I make the point of order that it is not germane to the bill and is also legislation on an appropriation bill. I will say to the Chair that on page 7 the House adopted a proviso that no appropriation contained in this act shall be increased by transfer from another appropriation in consequence of section 317 of Part II of the legislative appropriation act, fiscal year, 1933, and so forth, for the purpose of making a larger amount available for or on account of personal services or for increasing the limitation on any appropriation. The House has already passed on that. I do not think the amendment is germane to the bill. Next, I think it is legislation on an appropriation bill unauthorized by law.

Mr. TABER. Mr. Chairman, this is a provision which upon its face permits a saving of money, and is in order under the Holman rule. It provides that any sums appro-

priated can be saved provided the President shall order a survey and find that the moneys are not needed. It is clearly in order under the Holman rule, which permits a saving of money where it can be saved.

Mr. GOSS. Mr. Chairman, on the matter of the Holman rule I quote Cannon, on page 44:

In construing the Holman rule, the Chair may not speculate or surmise as to whether a particular provision might or might not operate to retrench expenditures.

That is in volume 7, section 8606. There are many other citations, such as volume 7, section 8591. This does not retrench because it does not show specifically any definite amount that may be saved.

Mr. LA GUARDIA. Surely a provision providing for the impounding of money which otherwise might be expended is a saving.

Mr. GOSS. I cite other authorities, volume 4, section 3885, and section 3888, where it is held that it must affirmatively appear upon the face of the bill that the proposition if enacted will retrench expenditures.

The CHAIRMAN. This amendment in no way pertains to the Holman rule. It is only the question of the return of an unexpended balance to the Treasury. As such, the Chair thinks it is clearly within the rules, and overrules the point of order.

The question is on the amendment offered by the gentleman from New York.

The amendment was agreed to.

Mr. COLLINS. Mr. Chairman, I move that the committee do now rise and report the bill to the House with the amendments, with the recommendation that the amendments be agreed to and that the bill as amended do pass.

The motion was agreed to.

Accordingly the committee rose; and the Speaker having resumed the chair, Mr. DRIVER, Chairman of the Committee of the Whole House on the state of the Union, reported that that committee had had under consideration the bill H. R. 14199, the War Department appropriation bill, fiscal year 1934, and had directed him to report the same back to the House with sundry amendments, with the recommendation that the amendments be agreed to and that the bill as amended do pass.

Mr. COLLINS. Mr. Speaker, I move the previous question on the bill and all amendments to final passage.

The previous question was ordered.

The SPEAKER. Is a separate vote demanded on any amendment?

Mr. COLLINS. Mr. Speaker, I demand a separate vote on the amendment offered by the gentleman from Kentucky [Mr. CHAPMAN], on page 23, lines 19 to 24, both inclusive, relative to horses, draft and pack animals, adding $82,500 to the bill.

Also a separate vote on the amendment offered by the gentleman from California [Mr. BARBOUR], on page 50, line 19, increasing the appropriation for the Organized Reserves by $532,189, from $5,822,159.

Also a separate vote on the amendment offered by the gentleman from California [Mr. BARBOUR], on page 56, after line 13, inserting an appropriation of $2,500,000 for the citizens' military training camps.

The SPEAKER. Is a separate vote demanded on any other amendment?

Mr. BARBOUR. Mr. Speaker, I ask for a separate vote on the amendment offered by the gentleman from New York [Mr. TABER], which provided for the elimination of constructive service in figuring officers' pay.

The SPEAKER. Is a separate vote demanded on any other amendment?

Mr. SCHAFER. Mr. Speaker, I demand a separate vote on the Blanton limousine amendment.

The SPEAKER. Is a separate vote demanded on any other amendment? If not, the Chair will put them en gros.

The other amendments were agreed to.

The SPEAKER. The Clerk will report the first amendment on which a separate vote is demanded.

The Clerk read as follows:

Amendment offered by Mr. CHAPMAN: Page 23, line 20, after the word "animals," in line 19, strike out lines 20 to 24, inclusive, and insert in lieu thereof the following: "For the purchase of draft and pack animals and horses within limits as to age, sex, and size to be prescribed by the Secretary of War, for remounts, for officers entitled to public mounts, for the United States Military Academy, and for such other organizations and parts of the military service as may be required to be mounted, and for all expenses incident to such purchases, including $118,827 for encouragement of the breeding of riding horses suitable for the Army, in cooperation with the Bureau of Animal Industry, Department of Agriculture, including the purchase of animals for breeding purposes, and their maintenance, $201,327."

The SPEAKER. The question is on agreeing to the amendment.

The amendment was rejected.

The SPEAKER. The Clerk will report the next amendment on which a separate vote is demanded.

The Clerk read as follows:

Amendment offered by Mr. BARBOUR: On page 50, line 19, strike out $5,822,159" and insert in lieu thereof "$6,354,348."

The SPEAKER. The question is on agreeing to the amendment.

The question was taken; and on a division (demanded by Mr. BARBOUR) there were ayes 127 and noes 134.

Mr. BARBOUR. Mr. Speaker, I demand the yeas and nays.

The yeas and nays were ordered.

The question was taken; and there were—yeas 207, nays 156, not voting 63, as follows:

[Roll No. 149]

So the amendment was agreed to.

The Clerk announced the following pairs:

On this vote:

Mr. Coyle (for) with Mr. Douglas of Arizona (against).
Mr. Buckbee (for) with Mr. Johnson of Illinois (against).

Until further notice:

Mr. Allgood with Mr. Perkins.
Mr. Cary with Mr. Reid of Illinois.
Mr. Pou with Mr. Doutrich.
Mr. Almon with Mr. Goodwin.
Mr. Green with Mr. Burdick.
Mr. Underwood with Mr. Johnson of Washington.
Mr. Bland with Mr. Manlove.
Mr. Vinson of Kentucky with Mr. Carter of California.
Mr. Weaver with Mr. Selvig.
Mr. Brand of Georgia with Mr. Hopkins.
Mr. Abernethy with Mr. James.
Mr. Romjue with Mr. Wood of Indiana.
Mr. Hancock of North Carolina with Mr. Sullivan of Pennsylvania.
Mr. Clark of North Carolina with Mr. Loofbourow.
Mr. Sweeney with Mr. Cavicchia.
Mr. Crump with Mr. Clarke of New York.
Mr. Hill of Alabama with Mr. Dieterich.

Mr. DARROW. Mr. Speaker, my colleague, Mr. BECK, is unavoidably absent. If present, he would vote "aye."

Mr. MARTIN of Massachusetts. Mr. Speaker, my colleague, Mr. HOLMES, is unavoidably absent. If present, he would vote "aye."

Mr. McDUFFIE. Mr. Speaker, I send to the desk a list of Members on both sides who have announced that if present they would vote "aye."

The Clerk read as follows:

The following Members, if present, would vote "aye": Mr. CORNING, Mr. RUDD, Mr. SULLIVAN of New York, Mr. CARTER of Wyoming, Mr. MOUSER, Mr. BECK, Mr. CULKIN, Mr. BOYLAN, Mr. STEWART, Mr. COOKE, Mr. HOLMES, Mr. SIROVICH, Mr. BEAM, Mr. IGOE, Mr. AUF DER HEIDE, Mr. CARTER of California, Mr. GOLDER, and Mr. FREEMAN.

The result of the vote was announced as above recorded.

The Clerk read as follows:

Page 56, after line 13, insert a new paragraph, as follows:

"CITIZENS' MILITARY TRAINING CAMPS

"For furnishing, at the expense of the United States, to warrant officers, enlisted men, and civilians attending training camps maintained under the provisions of section 47d of the national defense act of June 3, 1916, as amended (U. S. C., title 10, sec. 442), uniforms, including altering, fitting, washing, and cleaning when necessary, subsistence, or subsistence allowances, and transportation, or transportation allowances, as prescribed in said section 47d, as amended; for such expenditures as are authorized by said section 47d as may be necessary for the establishment and maintenance of said camps, including recruiting and advertising therefor, and the cost of maintenance, repair, and operation of passenger-carrying vehicles; for expenses incident to the use, including upkeep and depreciation costs, of supplies, equipment, and matériel furnished in accordance with law from stocks under the control of the War Department; for gymnasium and athletic supplies (not exceeding $20,000); for mileage, reimbursement of traveling expenses, or allowance in lieu thereof as authorized by law, for officers of the Regular Army and Organized Reserves traveling on duty in connection with citizens' military training camps; for purchase of training manuals, including Government publications and blank forms; for medical and hospital treatment, subsistence, and transportation, in case of injury in line of duty, of members of the citizens' military training camps and for transportation and burial of remains of any such members who die while undergoing training or hospital treatment, as provided in the act of April 26, 1928 (U. S. C., Supp. V, title 10, secs. 454, 455); in all, $2,500,000: *Provided*, That the funds herein appropriated shall not be used for the training of any person in the first year or lowest course who shall have reached his twenty-fourth birthday before the date of enrollment: *Provided further*, That none of the funds appropriated elsewhere in this act except for printing and binding and for pay and allowances of officers and enlisted men of the Regular Army shall be used for expenses in connection with citizens' military training camps: *Provided further*, That uniforms and other equipment or matériel furnished in accordance with law for use at citizens' military training camps shall be furnished from surplus or reserve stocks of the War Department without payment from this appropriation, except for actual expense incurred in the manufacture or issue: *Provided further*, That in no case shall the amount paid from this appropriation for uniforms, equipment, or matériel furnished in accordance with law for use at citizens' military training camps from stocks under control of the War Department be in excess of the price current at the time the issue is made."

The SPEAKER. The question is on the amendment.

The question was taken; and on a division (demanded by Mr. BARBOUR) there were—ayes 189, noes 149.

Mr. COLLINS. Mr. Speaker, I demand the yeas and nays.

The yeas and nays were ordered.

The question was taken; and there were—yeas 202, nays 158, not voting 66, as follows:

[Roll No. 150]

Clark, N. C.	Hall, Miss.	Perkins	
Clarke, N. Y.	Hancock, N. C.	Pou	

So the amendment was agreed to.

The Clerk announced the following additional pairs:

On this vote:

Mr. Coyle (for) with Mr. Douglas of Arizona (against).
Mr. Buckbee (for) with Mr. Johnson of Illinois (against).

Until further notice:

Mr. Vinson of Kentucky with Mr. Baldrige.
Mr. Collier with Mr. Chase.
Mr. Hancock of North Carolina with Mr. Houston of Delaware.
Mr. Hill of Alabama with Mr. Strong of Pennsylvania.
Mr. Disney with Mr. Reid of Illinois.

Mr. McDUFFIE. Mr. Speaker, the following gentlemen, if present, would vote "yea": Messrs. CORNING, RUDD, SULLIVAN of New York, MCMILLAN, BEAM, SIROVICH, BOYLAN, AUF DER HEIDE, IGOE, and STEWART.

Mr. BACHMANN. Mr. Speaker, the following Members, if present, would have voted "yea": Messrs. CARTER of Wyoming, MOUSER, CULKIN, COOKE, FREEMAN, GOLDER, BECK, and HOLMES.

The result of the vote was announced as above recorded.

The SPEAKER. The Clerk will report the next amendment.

The Clerk read as follows:

On page 58, after line 14, insert "None of the funds appropriated in this act shall be used for the purpose of paying any commissioned officer, active or retired, for his salary in computing which any service has been counted other than active commissioned service under a Federal appointment and commissioned service in any of the military or naval forces of the United States, including the National Guard or the organized militia, while in the service of the Government of the United States."

The SPEAKER. The question is on agreeing to the amendment.

The question was taken; and on a division (demanded by Mr. TABER) there were—ayes 161, noes 81.

So the amendment was agreed to.

The SPEAKER. The Clerk will report the next amendment in disagreement.

The Clerk read as follows:

On page 75, line 1, after the word "persons," strike out the balance of the paragraph.

The SPEAKER. The question is on agreeing to the amendment.

The question was taken; and on a division (demanded by Mr. BLANTON) there were—ayes 10, noes 109.

Mr. BLANTON. Mr. Speaker, I ask for the yeas and nays to determine whether a limousine shall be furnished to the Secretary of War or not.

The yeas and nays were refused.

So the amendment was rejected.

The bill was ordered to be engrossed, read a third time, and was read the third time.

Mr. McCLINTIC of Oklahoma. Mr. Speaker, I offer a motion to recommit.

The SPEAKER. Is the gentleman opposed to the bill?

Mr. McCLINTIC of Oklahoma. I am.

The SPEAKER. Is any member of the committee opposed to the bill? If not, the gentleman from Oklahoma is recognized. The Clerk will report the motion to recommit.

The Clerk read as follows:

Mr. McCLINTIC of Oklahoma moves to recommit the bill to the Appropriations Committee with instructions to report back forthwith with the following amendment:

On page 11, at the end of line 11: "*Provided further*, That after June 30, 1933, the pay of officers and warrant officers in the Regular Army on the active list shall be at such rates as are now or hereafter may be authorized by law less such an amount as will equal the percentage rate withheld or deducted from the pay of civil employees of the Government in consequence of the provisions of the civil service retirement act approved July 3, 1926, as amended."

The SPEAKER. The question is on the motion to recommit the bill.

The motion to recommit was rejected.

The SPEAKER. The question is on the passage of the bill.

The question was taken, and the bill was passed.

On motion of Mr. COLLINS, a motion to reconsider the vote by which the bill was passed was laid on the table.

FURTHER MESSAGE FROM THE SENATE

A further message from the Senate by Mr. Craven, its principal clerk, announced that the Senate had agreed to the report of the committee of conference on the disagreeing votes of the two Houses on the amendment of the House to the bill S. 5160, entitled "An act to provide for loans to farmers for crop production and harvesting during the year 1933, and for other purposes."

VETO MESSAGE FROM THE PRESIDENT OF THE UNITED STATES—THE FIRST DEFICIENCY BILL (H. DOC. NO. 529)

The SPEAKER laid before the House the following veto message from the President of the United States:

To the House of Representatives:

I return herewith without signature H. R. 13975, an act making appropriations to supply urgent deficiencies in certain appropriations for the fiscal year ending June 30, 1933, and prior fiscal years, to provide supplemental appropriations for the fiscal year ending June 30, 1933, and for other purposes.

I disapprove of the bill with great regret, as the appropriations provided for relief and other purposes are urgently needed, and with the hope that the Congress may early amend the act.

Attached hereto is the opinion of the Attorney General, who has most carefully reviewed the subject.

The difficulty lies not alone in the unconstitutionality of the provisions for legislative determination of individual tax refunds, but the further fact that in the opinion of the Attorney General those provisions invalidate these appropriations themselves.

I recognize that refunds of taxes overpaid present a subject of constant discussion and that there is a natural desire

for assurance that such refunds are correctly made. Such an assurance would, I am sure, be a relief to administrative officers having to deal with this difficult subject. I would suggest, however, that if the Congress deems the system provided by existing laws should be reinforced, it should be accomplished through the creation of additional auditing machinery, and not by Congress undertaking executive and administrative functions.

HERBERT HOOVER.

THE WHITE HOUSE, *January 24, 1933.*

DEPARTMENT OF JUSTICE,
Washington, D. C., January 24, 1933.

SIR: I have your letter of January 23, relating to the urgent deficiency bill, H. R. 13975, recently passed by both Houses of Congress and submitted for your approval.

You call particular attention to the paragraph appropriating a lump sum for refunding taxes illegally or erroneously collected, and ask for my comment upon it. It is as follows:

"BUREAU OF INTERNAL REVENUE

"Refunding taxes illegally or erroneously collected: For refunding taxes illegally or erroneously collected, as provided by law, including the payment of claims for the fiscal year 1933 and prior years, $28,000,000: *Provided*, That a report shall be made to Congress by internal-revenue districts and alphabetically arranged of all disbursements hereunder in excess of $500 as required by section 3 of the act of May 29, 1928 (U. S. C., Supp. V, title 26, sec. 149), including the names of all persons and corporations to whom such payments are made, together with the amount paid to each: *Provided*, That no refund or credit of any income or profits, estate, or gift tax in excess of $20,000 shall be made after the enactment of this act until a report thereof giving the name of the individual, trust, estate, partnership, company, or corporation to whom the refund or credit is to be made, the amount of such refund or credit, and the facts in connection therewith are submitted by the Commissioner of Internal Revenue to the Joint Committee on Internal Revenue Taxation and action thereon taken by said committee. The said committee or its duly authorized staff shall have full access to all the papers and shall examine into and pass upon the case, and no refund or credit in excess of $20,000 shall be made until the Joint Committee on Internal Revenue Taxation shall have so passed on such refund or credit, fixed the amount thereof, and made its report to the Commissioner of Internal Revenue; and no refund or credit in excess of $20,000 shall be made without the approval of said committee. This proviso shall not apply to refunds or credits made pursuant to a judgment of a court having jurisdiction over the subject matter, or a decision of the United States Board of Tax Appeals, which has become final."

Question arises at once whether the proviso authorizing the joint committee of Congress to make the final decision as to whether refunds over $20,000 shall be made, and to fix the amount thereof, presents constitutional objections.

By other existing legislation the Congress has set up in the Treasury Department an administrative system of examining into claims for refund of taxes alleged to have been erroneously or illegally collected, and authorizing the administrative allowance of such claims; and the system in force involves the appropriation from time to time of lump sums, not for any particular claim, but available generally for administrative repayment of taxes determined in the Treasury to have been illegally or erroneously collected. This legislation establishes administrative or executive functions, and the process of applying and executing the law involves administrative and executive action.

Under the proviso in the urgent deficiency bill the action of the executive officers in the Treasury Department charged with the duty of executing the law respecting refunds would be subject to review by a joint committee of the Congress, and the members of that committee would exercise final authority and make the decisions as to whether refund should be made and in what amounts. The Constitution of the United States divides the functions of the Government into three great departments—the legislative, the executive, and the judicial—and establishes the principle that they shall be kept separate, and that neither the legislative, executive, nor judicial branch may exercise functions belonging to the others. The proviso in the urgent deficiency bill violates this constitutional principle. It attempts to entrust to members of the legislative branch, acting ex officio, executive functions in the execution of the law, and it attempts to give to a committee of the legislative branch power to approve or disapprove executive acts. If the functions to be performed by the joint committee are administrative or executive in character, the bill is subject to the further objection that the selection of the personnel by the Congress is an infringement of the constitutional function of the Executive to make appointments and is an attempt by the legislative branch to make appointments of officials performing administrative or executive functions.

If the process of examination and allowance of a claim for refund of taxes may be viewed as a legislative function, the proviso in this bill is equally obnoxious to the Constitution because a joint committee has not power to legislate, and legislative power can not be delegated to it. These principles are settled by many decisions of the Supreme Court of the United States, to only a few of which need reference be made. In United States *v.* Ferreira (13 Howard, 39, 46–51) the court considered a statute purporting to authorize a district judge to pass upon claims arising under the Spanish treaty, but which provided that the claims should only be paid by the Secretary of the Treasury, if deemed by him to be just and equitable. The court held that the functions of the judge under this statute were not judicial and could not be conferred upon him as a judge, but that he might be considered as acting as a commissioner, and said:

"The duties to be performed are entirely alien to the legitimate functions of a judge or court of justice, and have no analogy to the general or special powers ordinarily and legally conferred on judges or courts to secure the due administration of the laws. And, if they are to be regarded as officers, holding offices under the Government, the power of appointment is in the President, by and with the advice and consent of the Senate; and Congress could not by law, designate the persons to fill these offices. And if this be the construction of the Constitution, then as the judge designated could not act in a judicial character as a court, nor as a commissioner, because he was not appointed by the President, everything that has been done under the acts of 1823, and 1834, and 1849, would be void * * *."

In Kilbourn *v.* Thompson (103 U. S. 168) the court held that duties which the House of Representatives attempted to confer upon a committee were judicial in character and not susceptible of exercise by the legislative department. (See also Grenshaw *v.* United States, 134 U. S. 99; Myers *v.* United States, 272 U. S. 52. A very recent case is that of Springer *v.* Philippine Islands, 277 U. S. 189.) The organic act, under which the Philippine government operates, provides for separation of legislative, executive, and judicial functions, as does the Constitution of the United States, and vests in the executive the power of appointment of executive officers. The Philippine Legislature passed an act attempting to create a board of control, consisting of the Governor General, the president of the senate, and the speaker of the house of representatives, to vote the stock in and have a voice in the management of the Philippine National Bank and other governmental corporations. The court said:

"Legislative power, as distinguished from executive power, is the authority to make laws, but not to enforce them or appoint the agents charged with the duty of such enforcement. The latter are executive functions. * * *

"Not having the power of appointment unless expressly granted or incidental to its powers, the legislature can not engraft executive duties upon a legislative office, since that would be to usurp the power of appointment by indirection; though the case might be different if the additional duties were devolved upon an appointee of the executive."

It held the act of the legislature violative of the organic act.

There are various ways in which refunds of illegally collected taxes may be provided for. Congress, if it chooses, acting under the power to make appropriations from the Public Treasury, and the power to maintain the immunity of the Federal Government from suit in the courts, may withhold the power to make refunds from the executive branch and from the courts, and itself deal with the subject by the method of making specific appropriations from time to time to pay specific claims which it deems just. Dealt with in that manner, the authorization of the refund constitutes a legislative act. If Congress confers jurisdiction on the courts to examine such claims and award judgment against the Government, the function of allowance becomes a judicial act, although there still remains the necessity for legislative action in the form of appropriations to pay the judgments. Where, as under existing law, machinery has been set up in the Treasury Department for administrative examination and allowance of these claims by executive officers, the function of executing this law becomes an executive one and must be left with executive officers appointed, not by the legislative branch, but by the executive.

It will be seen, therefore, that the matter of making refunds may involve either legislative, executive, or judicial functions, depending on the system adopted, but in the present case it is unnecessary to make any close analysis of the nature of the function of refunding illegally collected taxes. If it be an executive or judicial function, clearly a joint committee of the Congress may not execute it, and if it is a legislative function it is equally clear that a joint committee may not perform it. Action by a committee is not legislation and a committee of the Congress can not legislate.

If the process attempted by this bill were reversed and a joint committee were required merely to examine these claims and make recommendations to the Congress as to their allowance, to be followed by appropriate legislative action in the form of a statute for their payment, passed in the usual way and approved by the President or passed over his veto, a different situation would exist.

This proviso can not be sustained on the theory that it is a proper condition attached to an appropriation. Congress holds the purse strings and it may grant or withhold appropriations as it chooses, and when making an appropriation may direct the purposes to which the appropriation shall be devoted and impose conditions in respect to its use, provided always that the conditions do not require operation of the Government in a way forbidden by the Constitution. Congress may not, by conditions attached to appropriations, provide for a discharge of the functions of Government in a manner not authorized by the Constitution. If such a practice were permissible, Congress could subvert the Constitution. It might make appropriations on condition that the executive department abrogate its functions. It might, for example, appropriate money for the War Department on condition that the direction of military operations should be conducted by

some person designated by the Congress, thus requiring the President to abdicate his functions as Commander in Chief. During the administration of President Buchanan, a bill provided for an appropriation for the completion of the Washington Aqueduct and prescribed that its expenditure should be under the superintendence of Captain Meigs. In a special message to the House (June 25, 1860) the President said:

"I deemed it impossible that Congress could have intended to interfere with the clear right of the President to command the Army and to order its officers to any duty he might deem most expedient for the public interest. If they could withdraw an officer from the command of the President and select him for the performance of an executive duty, they might upon the same principle annex to an appropriation to carry on a war a condition requiring it not to be used for the defense of the country unless a particular person of its own selection should command the Army."

Attempting to have committees of Congress approve executive acts, or execute administrative functions, or participate in the execution of laws is not a new idea. Carried to its logical conclusion it would enable Congress, through committees or persons selected by it, gradually to take over all executive functions or at least exercise a veto power upon executive action, not by legislation withdrawing authority, but by the action of committees, or of either House acting separately from the other. On May 13, 1920, President Wilson vetoed an appropriation act on the ground that it contained a proviso that certain documents should not be printed by any executive branch or officer except with the approval of the Joint Committee on Printing. Among other things, he said:

"The Congress and the Executive should function within their respective spheres. Otherwise efficient and responsible management will be impossible and progress impeded by wasteful forces of disorganization and obstruction. The Congress has the power and the right to grant or deny an appropriation or to enact or refuse to enact a law; but once an appropriation is made or a law is passed, the appropriation should be administered or the law executed by the executive branch of the Government. In no other way can the Government be efficiently managed and responsibility definitely fixed. The Congress has the right to confer upon its committees full authority for purposes of investigation and the accumulation of information for its guidance, but I do not concede the right, and certainly not the wisdom, of the Congress endowing a committee of either House or a joint committee of both Houses with power to prescribe 'regulations' under which executive departments may operate. * * *

"I regard the provision in question as an invasion of the province of the Executive and calculated to result in unwarranted interferences in the processes of good government, producing confusion, irritation, and distrust. The proposal assumes significance as an outstanding illustration of a growing tendency which I am sure is not fully realized by the Congress itself and certainly not by the people of the country."

President Wilson then went on to call attention to other violations of the same principle and referred to the law creating the Public Buildings Commission, the membership of which included two Senators and two Representatives, acting ex officio—the Senators appointed by the President of the Senate and the Representatives appointed by the Speaker of the House—and to the fact that, so constituted, the commission was exercising administrative functions and that its members were performing executive acts; that Members of Congress, as such, were engaged in executive functions as members of the commission, and that the Congress under this statute was making appointments to executive offices.

In the act of June 30, 1932, making an appropriation for the legislative branch of the Government for the fiscal year ending June 30, 1933, and for other purposes, and with a view to economy in the operation of the Government, the Congress gave authority to the President, by Executive order, to consolidate, redistribute, and transfer various Government agencies and functions; and established a general formula for his guidance. By section 407 it was provided that the Executive order should be transmitted to the Congress in session and should not become effective until after the expiration of 60 days from such transmission and that "if either branch of Congress within such 60 calendar days shall pass a resolution disapproving of such Executive order or any part thereof, such Executive order shall become null and void to the extent of such disapproval." It must be assumed that the functions of the President under this act were executive in their nature or they could not have been constitutionally conferred upon him, and so there was set up a method by which one House of Congress might disapprove Executive action. No one would question the power of Congress to provide for delay in the execution of such an administrative order, or its power to withdraw the authority to make the order, provided the withdrawal takes the form of legislation. The attempt to give to either House of Congress, by action which is not legislation, power to disapprove administrative acts, raises a grave question as to the validity of the entire provision in the act of June 30, 1932, for Executive reorganization of governmental functions.

Since the organization of the Government, Presidents have felt bound to insist upon the maintenance of the Executive functions unimpaired by legislative encroachment, just as the legislative branch has felt bound to resist interferences with its power by the Executive. To acquiesce in legislation having a tendency to encroach upon the Executive authority results in establishing dangerous precedents.

The first presidential defense of the integrity of the powers of the Executive under the Constitution was made by Washington himself when the House of Representatives insisted on being recognized as part of the treaty-making power, and in his message then to Congress he said:

"It is essential to the due administration of the Government that the boundaries fixed by the Constitution between the different departments should be preserved."

From that day to this the Presidents, with very few exceptions, have felt the necessity of refusing to overlook encroachments upon the executive power. John Adams, Jefferson, Madison, John Quincy Adams, in succession, had occasion to resist interference with the executive power. On at least six occasions President Jackson found it necessary to resist encroachment. On one occasion he said:

"I deem it an imperative duty to maintain the supremacy of that sacred instrument (the Constitution) and the immunities of the department intrusted to my care."

In 1877 President Grant vetoed an act of Congress which attempted to make the Clerk of the House of Representative an officer to perform executive duties on the ground that it was an encroachment upon the constitutional right of the executive branch to appoint officers of the United States. President Hayes vetoed appropriation bills containing riders attempting to interfere with the President's power as Commander in Chief of the Army. On June 4, 1920, President Wilson vetoed the Budget bill which created the office of Comptroller General because it provided that the incumbent could only be removed by a joint resolution of Congress. In his message he said:

"I am convinced that the Congress is without constitutional power to limit the appointing power and its incident, the power of removal derived from the Constitution. * * * I can find in the Constitution no warrant for the exercise of this power by the Congress. * * * Regarding as I do the power of removal from office as an essential incident to the appointing power, I can not escape the conclusion that the vesting of this power of removal in the Congress is unconstitutional * * *."

A similar bill was enacted and approved in the next administration, but the soundness of President Wilson's views on the constitutional question was subsequently established by the decision of the Supreme Court of the United States in Myers *v.* United States (272 U. S. 52).

Many other instances might be referred to. An excellent historical account of these will be found in an address delivered by the Hon. Charles Warren on Presidential Declarations of Independence. (Boston University Law Review, Vol. X, January, 1930, No. 1.) Each President has felt it his duty to pass the executive authority on to his successor unimpaired by the adoption of dangerous precedents. You have not hesitated to act when occasion has arisen. (United States *v.* George Otis Smith, 286 U. S. 6, 28 note 3.) The proviso in this deficiency bill may not be important in itself, but the principle at stake is vital. Encroachments on the Executive authority are not likely to be deliberate, but that very fact makes them all the more insidious. In the present instance there is no basis for suggesting that the Congress intentionally transgressed constitutional limitations. One House did not consider the point and in the other it is not clear that any definite conclusion was reached respecting it.

During the Senate's consideration of this urgent deficiency bill the constitutional objections to the proviso relating to tax refunds do not seem to have been mentioned. When the proviso was considered in the House, constitutional objections to it were presented in an able address by Congressman Wood, whose views were supported by other Members of the House learned in constitutional law, and no serious attempt in debate appears to have been made to controvert the arguments thus advanced.

There is one other factor in the case bearing on the disposition you may make of this measure. If this bill is spread upon the statute books, through receiving your approval or being passed over a veto, not only would the proviso respecting the power of the joint committee to authorize refunds be void, but the deficiency appropriation for payment of refunds would fall with it. Whenever a provision in a statute is found invalid, question arises as to whether the whole act falls or only the objectionable section. This depends on whether the unconstitutional provision is separable from the rest of the act and in deciding that question the courts endeavor to ascertain from the terms of the act and its subject matter whether Congress would have intended the balance of the act to stand without the obnoxious provision. (Dorchy *v.* Kansas, 265 U. S. 286, 289.) Under these principles the provision in this bill appropriating money for refund of taxes, together with the proviso respecting powers of the joint committee, are clearly separable from the rest of the act but not from each other. In my opinion, the appropriation for tax refunds and the proviso attached to it must stand or fall together. Who can say that Congress would have made this appropriation without the proviso? I have no basis for such an assumption. If the Congress makes an appropriation attaching to it an invalid condition, we would hardly be justified in rejecting the condition as void and treating the appropriation as available. The safe course is to treat the two as inseparable.

The result is that if this bill should take the form of a statute the Secretary of the Treasury would be confronted with the fact that the appropriation for tax refunds, as well as the proviso attached to it, is void, and would not be available for payment of refunds, with the result that if no prior appropriations are available, payment of all refunds of any amount, would stop until further appropriations for that purpose were made by the Congress. This would be unfortunate, in that it would result in delay, and

injustice to taxpayers, and the accumulation of interest charges against the Government.

It affords an additional reason why this measure may well be returned to the Congress without your approval to give that body the opportunity to eliminate the proviso, or if it be dissatisfied with the existing machinery it has established by law for the making of tax refunds, to substitute some other method not open to constitutional objections.

Respectfully,

WILLIAM D. MITCHELL,
Attorney General.

THE PRESIDENT,
The White House.

The SPEAKER. The objections of the President will be entered at large on the Journal, and the message and the accompanying papers, together with the bill, will be printed as a House document.

The question is, Will the House, on reconsideration, agree to pass the bill, the objections of the President to the contrary notwithstanding?

Mr. BYRNS. Mr. Speaker, I am going to take only a moment of your time. I am quite sure every Member of the House knows the grounds upon which the President has seen fit to veto this deficiency bill.

We were told several weeks ago it was exceedingly important that this bill should become law in the interest of the unemployed and the suffering here in the District of Columbia, since it carries an appropriation of $625,000 for that purpose. The Committee on Appropriations, acting first through its subcommittee, hurried the hearings upon the deficiency bill as much as possible, presented the bill here in the House, and it was passed and sent to the Senate. Promptly upon its passage by the Senate the two Houses went into conference upon the few amendments which had been made by the Senate, came to an agreement, the bill was passed and sent to the President. Of course, any delay that may happen with reference to supplying those who are said to be badly in need of funds will not rest at the door of Congress, and certainly not at the door of the House.

I have not had opportunity to read the opinion of the Attorney General, which is quite lengthy. It covers quite a number of pages—some 12 or 14—and the very fact that it does cover so many pages leads me to believe, possibly, the Attorney General found some difficulty in arguing himself into the idea that this bill is unconstitutional.

The message of the President is short and to the point. The money represented by these proposed tax refunds has been paid into the Treasury under tax bills passed by Congress and collected through the machinery set up by Congress for that purpose. After the money has been paid into the Treasury of the United States, there is no way, so far as I know, whereby it can be gotten out except through an affirmative act of Congress making an appropriation, and it would seem to me, without having opportunity to fully examine into the subject, that in providing for this money to be paid out to individuals, Congress should have, and does have, the right to prescribe the methods that shall be followed and the circumstances under which the refund may be made. Because if it is not refunded in accordance with the judgment of Congress, and in accordance with its requirements, then, undoubtedly, there is no way, so far as I know, whereby Congress can be forced to appropriate the money.

So in voting to override this veto I shall do so with the best conscience for the reasons I have stated. As Members of Congress called upon to vote money out of the Treasury to reimburse some one asking for a refund, we have the right by our vote to say how that money shall be paid out and what procedure shall be followed before it is paid.

I can not understand, therefore, how it can be said that when Congress undertakes to prescribe such a method it can be said to be unconstitutional.

Mr. CHINDBLOM. Will the gentleman yield? Would not the gentleman be willing to have the message printed in the RECORD so that we can read it to-morrow and let the vote go over until we have read the message and the opinion of the Attorney General? The question of constitutionality is one for legal construction, and we have not heard the opinion of the Attorney General. It is late, and let the vote go over until to-morrow.

Mr. BYRNS. That is for the House to decide. The President has urged immediate action, and I see no reason why we should not vote and dispose of it now.

Let me say this, and then I will close. What is this proposition? All this amendment, which was adopted in the Senate and finally agreed to by the House and Senate conferees and confirmed by the House, does is to say that when the Internal Revenue Commissioner, not a court but an executive officer of the Government, has determined that a refund should be made, if it amounts to more than $20,000, he shall send the case up here to a joint committee composed of Senators and Representatives from the Committee on Finance in the Senate and Ways and Means in the House, and that that committee shall consider the facts sent to it by the Internal Revenue Commissioner, make such investigation as the committee chooses, and if it approves of the action of the Internal Revenue Commissioner it shall fix the amount of the refund that shall be made. Why should anyone object to that?

Mr. RAGON. Will the gentleman yield?

Mr. BYRNS. I yield.

Mr. RAGON. I understand the President objects to the provision that gives Congress the right to investigate and refund amounts that are above $20,000. We have the right, or have been assuming the right, to examine all amounts above $75,000. Has anyone ever objected to the constitutionality of the act that gave us that authority?

Mr. BYRNS. None that I am aware of. I thank the gentleman for his suggestion.

Mr. RAGON. Can the gentleman conjure up in his mind any reason, if we have the right to review refunds above $75,000, why we should not have the right to investigate refunds above $20,000?

Mr. BYRNS. Absolutely not. This seems to be an afterthought to protect those big refunds concerning which there has been so much suspicion in the past decade. No one should object to publicity. Mr. Speaker, I move the previous question.

The question was taken.

Mr. MAPES. Mr. Speaker, I ask for a division on ordering the previous question.

The House divided; and there were—ayes 191, noes 169.

Mr. MAPES. Mr. Speaker, on that I demand the yeas and nays.

The SPEAKER. As many as favor ordering taking the vote by the yeas and nays will rise and stand until counted. [After counting.] Forty-two Members have risen, not a sufficient number.

So the previous question was ordered.

Mr. MAPES. Mr. Speaker, I do not see how the House can act intelligently——

Mr. BANKHEAD. Mr. Speaker, I demand the regular order.

Mr. MAPES. Mr. Speaker, I desire to submit a unanimous-consent request.

The SPEAKER. The gentleman will state it.

Mr. MAPES. I ask unanimous consent that the opinion of the Attorney General upon which the veto message of the President is based may be read for the information of the House.

Mr. BANKHEAD. Mr. Speaker, I object.

The SPEAKER. The question is, Will the House, on reconsideration, agree to pass the bill, the objections of the President to the contrary notwithstanding?

Mr. MAPES. Mr. Speaker, I desire to submit another unanimous-consent request, and that is that the vote on the veto message may be postponed until to-morrow morning.

Mr. KENNEDY. Mr. Speaker, I object.

The SPEAKER. The Constitution requires that the roll be called on this vote. The Clerk will call the roll.

The question was taken; and there were—yeas 193, nays 158, not voting 75, as follows:

[Roll No. 151]

Lovette	Rudd	Swing	Wright
McMillan	Sanders, N. Y.	Taylor, Colo.	Yates
Manlove	Selvig	Taylor, Tenn.	

So (two-thirds not having voted in favor thereof) the veto of the President was sustained, and the bill was rejected.

The Clerk announced the following pairs:

On this vote:

Mr. Abernethy and Mr. Crump (for) with Mr. Cavicchia (against).

Mr. Evans of Montana and Mr. Hill of Alabama (for) with Mr. Golder (against).

Mr. Sweeney and Mr. Weaver (for) with Mr. Clarke of New York (against).

Mr. Wright and Mr. Igoe (for) with Mr. Hopkins (against).

Mr. Williams of Texas and Mr. Larsen (for) with Mr. Coyle (against).

Mr. Bland and Mr. Fulbright (for) with Mr. Perkins (against).

Mr. Taylor of Colorado and Mr. Auf der Heide (for) with Mr. Johnson of Washington (against).

Mr. Stewart and Mr. Hall of Mississippi (for) with Mr. Wood of Indiana (against).

Mr. Rudd and Mr. Disney (for) with Mr. Beck (against).

Mr. Sullivan of New York and Mr. Pou (for) with Mr. Carter of Wyoming (against).

Mr. Clark of North Carolina and Mr. Green (for) with Mr. Manlove (against).

Mr. Sirovich and Mr. McMillan (for) with Mr. Doutrich (against).

Mr. Boylan and Mr. Almon (for) with Mr. Culkin (against).

Mr. Brand of Georgia and Mr. Allgood (for) with Mr. Buckbee (against).

Mr. Romjue and Mr. Vinson of Kentucky (for) with Mr. Cooke (against).

Mr. Underwood and Mr. Hornor (for) with Mr. Baldrige (against).

Mr. Beam and Mr. Dieterich (for) with Mr. Mouser (against).

Additional general pairs:

Mr. Martin of Oregon with Mr. Reid of Illinois.

Mr. Corning with Mr. James.

Mr. MARTIN of Massachusetts. Mr. Speaker, I desire to announce that my colleagues, Messrs. HOLMES and UNDERHILL, are absent, and if they were here they would vote "no."

The result of the vote was announced as above recorded.

The SPEAKER. The message of the President and the bill, together with the accompanying papers, are referred to the Committee on Appropriations and ordered printed, and the Clerk will notify the Senate of the action of the House.

FIXING THE COMMENCEMENT OF THE TERMS OF PRESIDENT, VICE PRESIDENT, ETC.

The SPEAKER laid before the House a communication from Benjamin M. Moeur, Governor of the State of Arizona, announcing that the eleventh legislature of that State had ratified the proposed amendment to the Constitution of the United States fixing the commencement of the terms of President and Vice President and Members of Congress, and fixing the time of the assembling of Congress.

LEAVE OF ABSENCE

By unanimous consent, leave of absence was granted as follows:

To Mr. JENKINS, for five days, on account of death in family.

To Mr. STEWART, on account of sickness.

To Mr. ROMJUE, for one day, on account of illness.

To Mr. BLAND, indefinitely, on account of illness.

WAR DEPARTMENT APPROPRIATION BILL

Mr. THATCHER. Mr. Speaker, I ask unanimous consent to extend my remarks on the Army appropriation bill passed to-day and to include therein certain extracts from the report, the bill, and the hearings.

The SPEAKER. Is there objection?

There was no objection.

Mr. THATCHER. Mr. Speaker, I always feel a deep interest in the War Department appropriation bills. This arises not only because of the great importance of national defense, for which appropriations are carried in these measures, but also because of the many nonmilitary items, such as river and harbor improvement, flood control, the maintenance and operation of the Panama Canal, the national military parks and cemeteries, and the like.

It is not possible for me to discuss all of the features of the bill under consideration—that making appropriations for the War Department for 1934; that is to say, for the fiscal year beginning July 1, 1933. However, I do wish to comment upon certain items and features.

THE PANAMA CANAL

It was my pleasure to visit once again, in December-January last, the Isthmus of Panama and to see there the progress in the construction of the Madden Dam. I visited the site of the project in August, 1929, before the actual construction had started. The work, in the hands of private contractors, and under the general supervision of the Panama Canal authorities, is advancing at a very satisfactory rate. Seeing the activities thus involved brought vividly to mind the work on the canal enterprise at the peak of the construction period, 1910 to 1913, inclusive, when it was my privilege to serve as a member of the Isthmian Canal Commission and head of the Department of Civil Administration of the Canal Zone.

MADDEN LAKE

The new lake, up the Chagres River, which will thus be formed will serve the double purpose of creating a substantial water supply reserve for lockage purposes and an active supply for hydroelectric needs. The major hydroelectric plant is being built at the new dam, and the water used here to develop electrical energy for the canal operations will not be wasted into the sea, as is the case at Gatun at present; but will pass into Gatun Lake, there to become available for lockage purposes.

The creation of the new lake will not only save all question of an adequate water supply to operate the canal to capacity with the present lock system but will also provide, as is fully believed, an adequate water supply for the operation of the canal when, as is contemplated, another series of locks paralleling those now constructed may be built. It may be 50 years before there is any actual need for further canal facilities, and with another series of locks provided, the canal, it is thought, will take care of all Isthmian traffic for more than 100 years to come. Hence, the construction of another interoceanic canal across the Isthmus, or elsewhere, would seem to be a problem for the indefinite future. The general economic stress has affected the canal as shipping has substantially fallen off in recent years.

CONSTRUCTION APPROPRIATIONS

I regret the fact that the appropriations for work on the Madden Dam for 1934 again will come out of funds of the Panama Railroad Co. My judgment has been that the general funds of this old and highly important organization should be preserved for its own needs; with the exception, perhaps, of an occasional payment of a dividend character, reasonable in amount, into the United States Treasury. It seems to me that we are cutting too deep into the reserves of the company in the making of annual appropriations for this construction work of the canal.

ISTHMIAN CANAL COMMISSION

Of the six members of the Isthmian Canal Commission with whom I had the honor to serve—the commission having been composed of seven members—all have passed away except Gen. William L. Sibert. His great work in the construction of the locks, dam, and related works at Gatun constitutes a splendid memorial to his Isthmian labors; but since the completion of the canal he has continued to "carry on," and in the construction of the new docks at Mobile and in his service in connection with studies and recommendations in regard to the great Boulder Dam project, he has given ample proof that his unsurpassed engineering talents yet endure.

GORGAS MEMORIAL LABORATORY

During my recent visit it was my pleasure to note the splendid work of the Gorgas Memorial Laboratory, located in the city of Panama. This institution, devoted to research touching the causes and prevention of tropical diseases, is fully justifying the enactment by Congress of the measure it was my privilege to introduce and sponsor. Under the act the United States Government is contributing $50,000 a year for the work of the institution; and all the Latin American countries, under the terms of the act, are invited and permitted to contribute also. The Republic of Panama, as was also contemplated and permitted, has donated the splendid structure and the grounds for the laboratory. The institution, as provided by the act, is named in honor of the great modern sanitarian and humanitarian, Gen. William C. Gorgas, who long served as a member of the Isthmian Canal Commission, and whose redemptive sanitary, and health work on the Isthmus made possible the construction of the Panama Canal, the greatest industrial enterprise of all times.

Dr. Herbert C. Clark, for years occupying an important position in the health and sanitary work on the Isthmus under General Gorgas, has been the director of the laboratory since its creation several years ago. He is performing a service of the highest character, and the institution is fast becoming one of the most important of its kind anywhere to be found. Its work will not only benefit the world at large, but it will benefit, in a special degree, our own country. Because of our multiplied contacts with tropical lands, by air and by sea, and, as ultimately will be the case, by roadway, we must protect ourselves and our flocks and herds from invasion by the many dangerous diseases of these countries, or else suffer the inevitable penalties involved. The Gorgas Memorial Laboratory is meeting, in most splendid fashion, this situation.

SLIDES

The slides, in varying degree, are continuing in the Gaillard (formerly Culebra) Cut. The much talked of "angle of repose" has not yet been attained, and may not be for many years; but the efficient canal organization now under Governor Schley, and recently under Governor Burgess, has kept the channels clear for traffic. It is not believed the slides may ever again constitute a major problem. These modern disturbances, though most troublesome and annoying, because of the necessity of keeping the canal open for shipping, seem small when compared with the great slides of construction days when Col. David du Bose Gaillard, the highly capable and tireless engineer officer and member of the commission, was in charge of the work of the old central division. The exactions of his important tasks cost him his life. He died shortly before the canal was completed.

FERRY AND HIGHWAY

The new permanent ferry across the canal at its Pacific entrance has been in operation since last September; and since then also the new road from the western terminus of the ferry across Canal Zone territory to Arraijan has been open to traffic. Two adequate Diesel-engine ferryboats have been constructed and put into this service. One of these bears the name *President Amador*, in honor of the first President of the Republic of Panama; and the other the name *President Roosevelt*, for Theodore Roosevelt, during whose Presidency of our own country and under whose vigorous leadership the Panama Canal enterprise was undertaken.

At Arraijan, in the western portion of the Republic, this new road makes connection with several hundred miles of hard-surfaced roadway extending northwestwardly toward the Costa Rican boundary. This ferry and connecting zone road form a necessary and most vital link of the inter-American highway, leading from the United States through Mexico and Central America to Panama City. This great thoroughfare is in large measure constructed, and much of the remainder is under construction; and the plan of its sponsors is to extend it ultimately from Panama City down the west coast of South America to Chile. If and when this is done, it will be the longest, and, as I believe, the most interesting highway in the world. The hard-surfaced road system in the western portion of the Republic of Panama, already mentioned, also constitutes an indispensable link in the inter-American highway.

The cost of the new ferry and Canal Zone road project, including the ferry approaches and vessels, was $1,000,000, which sum was authorized by the measure, of which I was

very happy to have been the author, enacted by the Congress in 1930. The ferry and new highway, if with propriety I may mention the fact, under official designation, bear my name. To Panaman citizens and officials for suggesting this wholly unexpected honor, and to the American officials for accepting and adopting the suggestion, I am profoundly grateful.

The ferry and road serve to reunite the two portions of the Republic of Panama cut in two by the Canal Zone and the canal. Hence the ferry-road project is absolutely vital to the well-being of the Republic, especially so as practically all of the cultivated regions of Panama and the country's cattle-raising areas are in its western portion, whereas the capital of the country itself as well as the towns of the Canal Zone are on the eastern side of the canal. The construction, maintenance, and operation of this ferry-road project simply carry into effect the very strong obligation which became that of our own country to the Panaman Republic when it acquired the zone strip and constructed the canal. Not only this, but the ferry-road project, as was pointed out by Governor Burgess at the hearings on the measure in question, will prove of great military and other value to the United States.

HAVE SOUGHT TO SERVE

Mr. Speaker, since I have been a Member of Congress I have sought to be ever mindful of the best interests of the Canal Zone, the Panama Canal, and the Republic of Panama; and to the utmost of my ability and opportunity I have sought to serve those interests. I believe that my connection with the great Isthmian project during the course of its construction has enabled me fairly well to understand, as a Member of this great legislative body, the continuing problems of the canal, and our relationships with the Panaman and other Latin American countries, our sisters to the southward; and one of the greatest causes of satisfaction now mine, upon retiring from Congress, has been the fact that in a small, but wholly devoted way, I have been able to be of service in these connections.

OPINION OF THE ATTORNEY GENERAL

Mr. SNELL. Mr. Speaker, I ask unanimous consent that the opinion of the Attorney General may be printed in the RECORD, immediately following the veto message, on account of its importance.

The SPEAKER. Is there objection?

There was no objection.

SENATE ENROLLED BILLS SIGNED

The SPEAKER announced his signature to enrolled bills of the Senate of the following titles:

S. 5131. An act to extend the times for commencing and completing the construction of a bridge across the Ohio River at or near Cannelton, Ind.; and

S. 5232. An act to extend the time for completing the construction of a bridge across the Missouri River at or near St. Charles, Mo.

ADJOURNMENT

Mr. COLLINS. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 6 o'clock and 24 minutes p. m.) the House adjourned until to-morrow, Wednesday, January 25, 1933, at 12 o'clock noon.

COMMITTEE HEARINGS

Tentative list of committee hearings scheduled for Wednesday, January 25, 1933, as reported to the floor leader:

IMMIGRATION AND NATURALIZATION

(10.30 a. m.)

Hearings on H. J. Res. 549, Philippine immigration matters.

PUBLIC BUILDINGS AND GROUNDS

(10 a. m.)

Continue hearings on District of Columbia airport bill.

LABOR

(10 a. m.)

Continue hearings on 5-day week and 6-hour day proposals.

BANKING AND CURRENCY

(10.30 a. m.)

Hearings on farm mortgage bill and silver bill.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of Rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

879. A letter from the Secretary of War, transmitting a draft of proposed legislation to credit to officers of the Army certain services as cadets in the United States Military Academy; to the Committee on Military Affairs.

880. A letter from the Secretary of the Treasury, transmitting a draft of proposed legislation to place the Washington, D. C., post office under the custody and control of the Secretary of the Treasury to the same extent as courthouses, customhouses, post offices, appraisers' stores, and other public buildings outside the District of Columbia; to the Committee on Public Buildings and Grounds.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of Rule XIII,

Mr. GLOVER: Committee on Agriculture. Senate Joint Resolution 108. A joint resolution to authorize and direct the Secretary of Agriculture to investigate the cost of maintaining the present system of future trading in agricultural products and to ascertain what classes of citizens bear such cost; with amendment (Rept. No. 1899). Referred to the Committee on the Whole House on the state of the Union.

Mr. RAYBURN: Committee on Interstate and Foreign Commerce. H. R. 7432. A bill to authorize the Interstate Commerce Commission to delegate certain of its powers; with amendment (Rept. No. 1900). Referred to the House Calendar.

Mr. CARTWRIGHT: Committee on Indian Affairs. S. 4339. An act repealing certain provisions of the act of June 21, 1906, as amended, relating to the sale and encumbrance of lands of Kickapoo and affiliated Indians of Oklahoma; with amendment (Rept. No. 1901). Referred to the House Calendar.

Mr. LEA: Committee on Interstate and Foreign Commerce. H. R. 13974. A bill granting the consent of Congress to Bonner County, State of Idaho, to construct, maintain, and operate a free highway bridge across Pend Oreille Lake at the city of Sandpoint, in the State of Idaho; without amendment (Rept. No. 1903). Referred to the House Calendar.

Mr. BECK: Committee on Interstate and Foreign Commerce. H. R. 14030. A bill authorizing the Bushkill Bridge Co., its successors and assigns, to construct, maintain, and operate a bridge across the Delaware River at or near Bushkill, Pa.; without amendment (Rept. No. 1904). Referred to the House Calendar.

Mr. LEA: Committee on Interstate and Foreign Commerce. H. R. 14060. A bill to extend the times for commencing and completing the construction of a bridge across the Columbia River at or near The Dalles, Oreg.; with amendment (Rept. No. 1905). Referred to the House Calendar.

Mr. LEA: Committee on Interstate and Foreign Commerce. H. R. 14109. A bill authorizing The Dalles Bridge Co., its successors and assigns, to construct, maintain, and operate a bridge across the Columbia River at a point approximately 5 miles upstream from the city of The Dalles, in the State of Oregon, to a point on the opposite shore in the State of Washington; with amendment (Rept. No. 1906). Referred to the House Calendar.

Mr. CHAPMAN: Committee on Interstate and Foreign Commerce. H. R. 14134. A bill to extend the times for commencing and completing the construction of a bridge

across the Ohio River at or near Shawneetown, Gallatin County, Ill., and a point opposite thereto in Union County, Ky.; without amendment (Rept. No. 1907). Referred to the House Calendar.

REPORTS OF COMMITTEES ON PRIVATE BILLS AND RESOLUTIONS

Under clause 2 of Rule XIII,

Mr. ARENTZ: Committee on the Public Lands. H. R. 13950. A bill for the relief of Robert Rayl; without amendment (Rept. No. 1902). Referred to the Committee of the Whole House.

PUBLIC BILLS AND RESOLUTIONS

Under clause 3 of Rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. McFADDEN: A bill (H. R. 14386) to provide for the coinage of a ½-cent piece, a 1¼-cent piece, a 1½-cent piece, a 2-cent piece, and a 3-cent piece; to the Committee on Coinage, Weights, and Measures.

By Mr. TABER: A bill (H. R. 14387) to provide for the apportionment of World War veterans' disability allowances in certain cases; to the Committee on World War Veterans' Legislation.

By Mr. LEHLBACH: A bill (H. R. 14388) providing for the sale of port of Newark Army base to the city of Newark; to the Committee on Military Affairs.

By Mr. MEAD: A bill (H. R. 14389) to amend section 4 of the United States grain standards act of 1916 as relating to the use of the official grain standards of the United States on grain moved in interstate commerce from shipping points to destination points without official grade determination; to the Committee on Agriculture.

By Mr. ANDREWS of New York: A bill (H. R. 14390) to amend section 4 of the United States grain standards act of 1916 as relating to the use of the official grain standards of the United States on grain moved in interstate commerce from shipping points to destination points without official grade determination; to the Committee on Agriculture.

By Mr. DRANE: A bill (H. R. 14391) authorizing a preliminary examination and survey of St. Petersburg Harbor, Fla.; to the Committee on Rivers and Harbors.

By Mrs. NORTON: A bill (H. R. 14392) to authorize the payment of taxes and assessments on family dwelling houses in the District of Columbia in quarterly installments, and for other purposes; to the Committee on the District of Columbia.

By Mr. CULKIN: A bill (H. R. 14393) to provide for the commemoration of the Battle of Sacketts Harbor, in the State of New York; to the Committee on Military Affairs.

By Mr. LOZIER: A bill (H. R. 14394) to provide for the sale of revenue stamps by the postmaster in each county seat in the United States; to the Committee on Ways and Means.

By Mr. CELLER: A bill (H. R. 14395) relating to the prescribing of medicinal liquor; to the Committee on the Judiciary.

By Mr. MEAD: A bill (H. R. 14396) to provide for expansion of Government-owned motor-vehicle service in the Postal Service; to the Committee on the Post Office and Post Roads.

By Mr. McFADDEN: Joint Resolution (H. J. Res. 569) to repeal the Federal reserve act, and for other purposes; to the Committee on Banking and Currency.

By Mr. POU: Joint Resolution (H. J. Res. 570) to provide for the quartering in certain public buildings in the District of Columbia of troops participating in the inaugural ceremonies; to the Committee on Public Buildings and Grounds.

Also, joint resolution (H. J. Res. 571) authorizing the granting of permits to the Committee on Inaugural Ceremonies on the occasion of the inauguration of the President elect in March, 1933, and for other purposes; to the Committee on Public Buildings and Grounds.

By Mr. RAYBURN: Joint Resolution (H. J. Res. 572) to provide for further investigation of certain public-utility corporations engaged in interstate commerce; to the Committee on Rules.

By Mr. DOXEY: Joint resolution (H. J. Res. 573) to extend the time during which the emergency appropriation for Federal-aid highways shall be available for expenditure; to the Committee on Roads.

By Mr. FITZPATRICK: Joint resolution (H. J. Res. 574) relating to leave with pay for employees of the Government Printing Office; to the Committee on Appropriations.

By Mr. BUCHANAN: Joint resolution (H. J. Res. 575) authorizing the fixing of grazing fees on lands within national forests; to the Committee on Agriculture.

MEMORIAL

Under clause 3 of Rule XXII, a memorial was presented and referred as follows:

Memorial of the Legislature of the State of Idaho, memorializing Congress not to pass H. R. 13558, and that no other similar legislation be enacted during this period of economic depression; to the Committee on the Public Lands.

PRIVATE BILLS AND RESOLUTIONS

Under clause 1 of Rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. ARNOLD: A bill (H. R. 14397) granting a pension to Wilmena Shonert; to the Committee on Invalid Pensions.

By Mr. AYRES: A bill (H. R. 14398) granting a pension to Rachel L. Lewis; to the Committee on Invalid Pensions.

By Mr. BACON: A bill (H. R. 14399) granting a pension to Frank Kroegel, alias Francis Kroegel; to the Committee on Pensions.

By Mr. CULKIN: A bill (H. R. 14400) granting an increase of pension to Estella Sheley; to the Committee on Invalid Pensions.

Also, a bill (H. R. 14401) granting an increase of pension to Sarah Jane Dempster; to the Committee on Invalid Pensions.

By Mr. ENGLEBRIGHT: A bill (H. R. 14402) for the relief of R. S. Brown; to the Committee on Claims.

By Mr. HART: A bill (H. R. 14403) granting an increase of pension to Rosa McGowan; to the Committee on Invalid Pensions.

By Mr. KLEBERG: A bill (H. R. 14404) granting a pension to Margaret Phillips; to the Committee on Invalid Pensions.

By Mr. LUDLOW: A bill (H. R. 14405) granting an increase of pension to Laura A. Stahlnacker; to the Committee on Invalid Pensions.

By Mr. MAPES: A bill (H. R. 14406) granting a pension to Joseph Furmankiewicz; to the Committee on Pensions.

By Mr. MURPHY: A bill (H. R. 14407) for the relief of Charles C. Floyd; to the Committee on Military Affairs.

By Mr. PARSONS: A bill (H. R. 14408) granting a pension to Ernest Henry Benz; to the Committee on Pensions.

By Mr. PATTERSON: A bill (H. R. 14409) for the relief of Mike L. Linch; to the Committee on Pensions.

PETITIONS, ETC.

Under clause 1 of Rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

9826. By Mr. BOEHNE: Petition of the Georgetown Christion Church of Georgetown, Ind., praying for the retention of the eighteenth amendment; to the Committee on the Judiciary.

9827. By Mr. CLARKE of New York: Petition of Mrs. M. H. Smith and eight other residents of Walton, N. Y., opposing any legislative act that would legalize alcoholic liquors stronger than one-half of 1 per cent; to the Committee on the Judiciary.

9828. Also, petition of Earl W. Culver and 37 citizens of Binghamton, protesting against passage of House bill 13742, or any other measure that would override the eighteenth amendment; to the Committee on the Judiciary.

9829. By Mr. COCHRAN of Pennsylvania: Petition of Ada Missionary Society, of Jamestown, Pa., signed by Mrs. J. W. Clark, president, and Mrs. C. E. Thompson, secretary, urging the establishment of a Federal motion-picture commission, with a view to supervising and regulating the motion-picture industry, and urging the passage of Senate bill 1079 and Senate Resolution 170; to the Committee on Interstate and Foreign Commerce.

9830. By Mr. CRAIL: Petition of the council of the city of Monterey, Calif., urging favorable action on House bill 13999, entitled "A bill to prevent loss of revenue, to provide employment for American labor, and to maintain the industries and agriculture of the United States against the effects of depression in foreign currencies"; to the Committee on Ways and Means.

9831. Also, petition of Barrett Camp, No. 29, United Spanish War Veterans, Department of California, opposing any changes relative to Navy pay; to the Committee on Appropriations.

9832. By Mr. GARBER: Petition of D. E. Allen, of Wakita, Okla., urging support of House bill 13790, an act to help American labor; to the Committee on Ways and Means.

9833. By Mr. CRAIL: Petition of city council of Lynwood, Los Angeles County, Calif., opposing the proposed Federal tax of 3 per cent on all State agencies and/or publicly owned utilities; to the Committee on Ways and Means.

9834. Also, petition of National Federation of Post Office Clerks, Local No. 64, Los Angeles, Calif., opposing the activities of the National Economy League; to the Committee on Ways and Means.

9835. Also, petition of many citizens of Monrovia, Calif., favoring the stop-alien-representation amendment to the Constitution, and count only American citizens, when making future apportionments for congressional districts; to the Committee on the Judiciary.

9836. By Mr. CULKIN: Petition of Earl Ames and sundry other citizens of Richland, Oswego County, N. Y., urging the adoption of the stop-alien-representation amendment to the Constitution; to the Committee on the Judiciary.

9837. Also, petition of sundry citizens of Madison County, N. Y., urging the adoption of the so-called stop-alien-representation amendment; to the Committee on the Judiciary.

9838. By Mr. DAVENPORT (by request): Petition of Nellie K. Johnson and others, of West Winfield and West Oneonta, N. Y., opposing every act that would legalize alcoholic liquors stronger than one-half of 1 per cent; to the Committee on the Judiciary.

9839. Also (by request), petition of Emma A. Hitchings and others, of West Winfield and Winfield, N. Y., favoring the so-called stop-alien-representation amendment to the Constitution; to the Committee on the Judiciary.

9840. Also, petition of the Woman's Christian Temperance Union of Remsen, N. Y., favoring the so-called stop-alien-representation amendment to the Constitution; to the Committee on the Judiciary.

9841. Also (by request), petition of E. R. Flanders and 43 other citizens of Dolgeville, N. Y., favoring the passage of the stop-alien-representation amendment to the Constitution; to the Committee on the Judiciary.

9842. Also, petition of Woman's Christian Temperance Union of Oriskany Falls, N. Y., opposing all legislation intended to nullify, weaken, or repeal the eighteenth amendment and the Volstead Act; to the Committee on the Judiciary.

9843. Also, petition of the Somerset Woman's Christian Temperance Union, opposing all legislation intended to nullify, weaken, or repeal the eighteenth amendment and the Volstead Act; to the Committee on the Judiciary.

9844. By Mr. DELANEY: Petition of the Associated Board of Trade of New York, urging the reduction of first-class postage to 2 cents; to the Committee on Ways and Means.

9845. Also, petition of the superintendent of banks of the State of New York, protesting against the publication of the names of those borrowing from the Reconstruction Finance Corporation; to the Committee on Banking and Currency.

9846. By Mr. DRANE: Petition of citizens of Zephyrhills, Fla., protesting against the repeal of the eighteenth amendment; to the Committee on the Judiciary.

9847. Also, petition of citizens of Tampa, St. Petersburg, and Bradenton, Fla., protesting against legislation for the repeal of the eighteenth amendment; to the Committee on the Judiciary.

9848. By Mr. EVANS of California: Petition of Lulu F. Kent and 12 others, urging the passage of the stop-alien-representation amendment; to the Committee on Labor.

9849. Also, petition signed by G. W. Lawrence and approximately 60 others, favoring the 30-hour working week; to the Committee on Labor.

9850. By Mr. GARBER: Petition of John Flanegan, secretary-treasurer Motor Supply Co., Enid; the State Taxpayers' League of Oklahoma; and Frank D. Northup, editor of the Enid Events, Enid, Okla., urging restoration of the 2-cent postage rate on first-class mail matter; to the Committee on Ways and Means.

9851. Also, petition of James C. White, local manager of Long-Bell Lumber Sales Corporation, Renfrow, Okla., urging support of House bill 13790; to the Committee on Ways and Means.

9852. Also, letter and a petition from Gertrude Carpenter, president Woman's Christian Temperance Union of Cherokee, Alfalfa County, Okla., urging opposition to all efforts at modification or repeal, and requesting support of adequate appropriations for law enforcement and a campaign of education in law observance; to the Committee on the Judiciary.

9853. Also, petition of the board of directors of the Clearwater-Hynes Chamber of Commerce, Hynes, Calif., urging enactment of House bill 11642; to the Committee on Interstate and Foreign Commerce.

9854. Also, petition of the Aline (Okla.) Methodist Episcopal Sunday School, urging opposition to all efforts to modify or repeal the prohibition laws, and requesting support of adequate appropriations for law enforcement and a campaign of education in law observance; to the Committee on the Judiciary.

9855. Also, petition urging support of the railway pension bills, S. 4646 and H. R. 9891; to the Committee on Interstate and Foreign Commerce.

9856. By Mr. HART: Petition of residents of Henderson, Shiawassee County, Mich., on the alien-representation amendment to the Constitution; to the Committee on the Judiciary.

9857. By Mr. HOOPER: Petition of residents of Battle Creek, Mich., opposing House bill 13742, or any other measure in opposition to the eighteenth amendment; to the Committee on the Judiciary.

9858. By Mr. KNIFFIN: Petition of Cue A. Abts and others, of Wauseon, Ohio, opposing legislation intended to nullify, weaken, or repeal the eighteenth amendment and the Volstead Act; to the Committee on the Judiciary.

9859. By Mr. KVALE: Petition of the Woman's Christian Temperance Union of Lynd, Minn., protesting against any change in the eighteenth amendment; to the Committee on the Judiciary.

9860. Also, petition of the Woman's Christian Temperance Union of Alexandria, Minn., urging enforcement of the eighteenth amendment; to the Committee on the Judiciary.

9861. Also, petition of 83 residents of the State of Minnesota, urging enactment of the Frazier bill; to the Committee on Banking and Currency.

9862. Also, petition of the Woman's Christian Temperance Union of Ada, Minn., protesting against any change in the eighteenth amendment; to the Committee on the Judiciary.

9863. By Mr. LEAVITT: Petition of the City Council of Great Falls, Mont., protesting against Federal taxation which places a burden on the States; to the Committee on Ways and Means.

9864. Also, petition of various citizens of Hogeland, Mont., favoring a more lenient settlement of the 1932 Federal seed loans; to the Committee on Agriculture.

9865. By Mr. LINDSAY: Petition of the Associated Board of Trade, New York City, favoring reduction of first-class postage from 3 cents to 2 cents; to the Committee on Ways and Means.

9866. Also, petition of J. A. Broderick, superintendent of banks, New York State, opposing publicity of loans by Reconstruction Finance Corporation; to the Committee on Banking and Currency.

9867. By Mr. LUDLOW: Petition of citizens of Indianapolis, Ind., protesting against the legalization of beer and the repeal of the eighteenth amendment; to the Committee on the Judiciary.

9868. By Mr. MOORE of Kentucky: Petition of citizens of Austin, Barren County, Ky., protesting against repeal, modification, or nullification of the eighteenth amendment; to the Committee on the Judiciary.

9869. By Mr. RAINEY: Petition of Gerald Davis, of Brasher Falls, N. Y., and 49 other residents of the State of New York; to the Committee on the Judiciary.

9870. By Mr. REID of Illinois: Resolutions adopted by the Council of Women's Work of the Brethren Church of Elgin, Ill., urging that a law be adopted regulating the motion-picture industry; to the Committee on Interstate and Foreign Commerce.

9871. By Mr. ROBINSON: Statement of the Earl Ferris Nursery Co., of Hampton, Iowa, favoring the reduction of first-class postage to 2 cents and showing how the present higher rate not only lessens its business but also decreases the revenue received by the Post Office Department; to the Committee on Ways and Means.

9872. Also, House Concurrent Resolution No. 4, as adopted by the Forty-fifth General Assembly of the State of Iowa, asking a moratorium on farm mortgages for at least one year, and that Congress do all in its power to furnish financial relief to farmers who have other than Federal loans coming due this year; to the Committee on Banking and Currency.

9873. By Mr. SHALLENBERGER: Petition of farmers and others of Superior, Nebr., interested in the welfare of agriculture, urging the passage of the Frazier bill or a similar bill which will allow the farmer to borrow money at a more favorable rate of interest; to the Committee on Banking and Currency.

9874. By Mr. STULL: Petition of Moxham Women's Christian Temperance Union, Johnstown, Pa., opposing legislation seeking to nullify, weaken, or repeal the eighteenth amendment and the Volstead Act, and urging adequate appropriations for law enforcement; to the Committee on the Judiciary.

9875. By Mr. SWICK: Petition of Mrs. J. E. Stoops, president, Mrs. R. P. Adams, secretary, Mrs. J. F. Allison, legislative chairman, and members of the Woman's Christian Temperance Union of Slippery Rock, Butler County, Pa., urging Member of Congress to oppose repeal, nullification, or modification of the eighteenth amendment to the Constitution; to the Committee on the Judiciary.

9876. Also, petition of J. Linwood Eisenberg, chairman, and A. T. Clutton, secretary, of the official board, and members of the Methodist Episcopal Church, Slippery Rock, Butler County, Pa., urging the retention of the eighteenth amendment and observance of the Sabbath; to the Committee on the Judiciary.

9877. By Mr. THOMASON: Petition of property owners of Edwards County, Tex., recommending enactment of legislation providing for refinancing of first-mortgage amortization loans; to the Committee on Banking and Currency.

9878. By Mr. RUDD: Petition of Hon. J. A. Broderick, superintendent of banks, State of New York, opposing the Howard resolution, publishing the list of banks who took loans or arranged for them through the Reconstruction Finance Corporation; to the Committee on Banking and Currency.

9879. By Mr. WATSON: Petition with 77 signatures from members of the Woman's Christian Temperance Union of Yardley, Pa., favoring the stop-alien amendment to the Constitution; to the Committee on the Judiciary.

SENATE

WEDNESDAY, JANUARY 25, 1933

(Legislative day of Tuesday, January 10, 1933)

The Senate met at 11 o'clock a. m., on the expiration of the recess.

Mr. FESS. Mr. President, I suggest the absence of a quorum.

The VICE PRESIDENT. The clerk will call the roll.

The legislative clerk called the roll, and the following Senators answered to their names:

Ashurst	Davis	King	Sheppard
Austin	Dickinson	La Follette	Shipstead
Bailey	Dill	Lewis	Shortridge
Bankhead	Fess	Logan	Smith
Barbour	Fletcher	Long	Smoot
Barkley	Frazier	McGill	Steiwer
Bingham	George	McKellar	Stephens
Black	Glass	McNary	Swanson
Blaine	Glenn	Metcalf	Thomas, Idaho
Borah	Goldsborough	Moses	Thomas, Okla.
Bratton	Gore	Neely	Townsend
Brookhart	Grammer	Norbeck	Trammell
Bulkley	Hale	Norris	Tydings
Bulow	Harrison	Nye	Vandenberg
Byrnes	Hastings	Oddie	Wagner
Capper	Hatfield	Patterson	Walcott
Caraway	Hayden	Pittman	Walsh, Mass.
Carey	Hebert	Reed	Walsh, Mont.
Connally	Howell	Reynolds	Watson
Coolidge	Hull	Robinson, Ark.	Wheeler
Copeland	Johnson	Robinson, Ind.	White
Costigan	Kean	Russell	
Couzens	Kendrick	Schall	
Cutting	Keyes	Schuyler	

The VICE PRESIDENT. Ninety-three Senators have answered to their names. A quorum is present.

BIRTHDAY OF THE VICE PRESIDENT, CHARLES CURTIS

Mr. WATSON. Mr. President, the Vice President of the United States has arrived at the age of 73. He may not want to have it told, but the hands can not be turned back on the dial of time and the truth must be known. For 40 years—for he was elected to the House in 1892—he has served the people of the country faithfully and well, with great fidelity, with unflagging zeal in the interest of the people as he understood and saw that interest.

I feel quite sure that we do not want this event to pass without expressing to him, as we well may, the feeling of the country universally toward him as an individual and as an official, and that we will all join in wishing for him health, happiness, and prosperity whatever he may do and wherever he may go.

Mr. SHEPPARD. Mr. President, I am sure every Member on this side of the Chamber joins most heartily in the tribute paid to the Vice President by the eloquent Senator from Indiana [Mr. WATSON]. I am entirely justified in saying that no man ever came to the Congress of the United States who has made a finer impression on the Congress and the country than our present Vice President.

Mr. WALSH of Massachusetts. Mr. President, the deserved tribute paid by the Senator from Indiana [Mr. WATSON] to the Vice President reminds me of an historical event which it seems to me is apropos.

During the time of the French Revolution the mob crowded into the galleries of the Chamber of Deputies and refused to permit the deputies to proceed with the orderly transaction of the public business. The presiding officer again and again sought to restore order and quiet in the chamber. Finally, having exhausted all possible efforts, he noticed seated among the deputies an old gray-haired French hero, a man who had served France as a soldier and a statesman for 50 years. Reaching out his arms the presiding officer said to the wild and excited gallery mob, "Stop! Listen! Fifty years of an honorable and patriotic life speak to you!" The mob was hushed and silenced. I think, in view of the unrest in the world to-day, this illustration is timely. To-day, on the birthday of our honored Vice President, we can salute him and cry out, "Forty years of an honorable, useful, and patriotic life speak to us." Let it inspire and hearten us to follow his devotion to the public service.

The VICE PRESIDENT. The Chair greatly appreciates the kind expressions of Senators.

THE JOURNAL

Mr. FESS. I ask unanimous consent that the Journal for the calendar days of Monday, January 23, and Tuesday, January 24, 1933, may be approved.

The VICE PRESIDENT. Is there objection? The Chair hears none, and the Journal for the days mentioned is approved.

BOARD OF VISITORS TO NAVAL ACADEMY

Mr. SCHUYLER. Mr. President, I ask leave to present a routine matter concerning the business of the Senate. I was honored by appointment as a member of the Board of Visitors to the United States Naval Academy. I have received a communication from the Secretary of the Navy advising me that that visit is to be made on April 24 and that the Senators making it will receive not exceeding $5 a day for their services. I should like very much indeed to serve as a member of the board; I should like very much to endeavor to earn the maximum of remuneration which is thus offered; but I must call attention to the fact that my service will terminate at noon on March 4, and, in view of that situation, I suggest my withdrawal and the naming of some Senator who will then be a Member of the Senate.

The VICE PRESIDENT. Without objection, the Senator from Colorado will be relieved from further service on the board, and the Chair appoints the Senator from New Hampshire [Mr. KEYES] to fill the vacancy.

PETITIONS AND MEMORIALS

Mr. HALE presented memorials, numerously signed, of sundry citizens of the State of Maine, remonstrating against the passage of the bill (H. R. 13742) to provide revenue by the taxation of certain nonintoxicating liquors, and for other purposes, or any other measure "that would override the eighteenth amendment of the Federal Constitution," which were ordered to lie on the table.

Mr. REED presented a memorial of sundry citizens of Philadelphia and vicinity, in the State of Pennsylvania, remonstrating against the passage of the bill (H. R. 13742) to provide revenue by the taxation of certain nonintoxicating liquors, and for other purposes, or any other measure "that would override the eighteenth amendment of the Federal Constitution," which was ordered to lie on the table.

Mr. TYDINGS presented a resolution adopted by the Frederick County (Md.) Medical Society, opposing the giving of medical and surgical treatment by the Government to veterans, or their dependents, for disabilities not directly due to military service, which was referred to the Committee on Finance.

Mr. WALSH of Massachusetts presented petitions of several citizens of Springfield and West Springfield, Mass., praying for the passage of the so-called Hatfield-Keller bill, providing for retirement pensions to railway employees, which were referred to the Committee on Interstate Commerce.

He also presented memorials and papers in the nature of memorials of the Scandinavian Woman's Christian Temperance Union, of Worcester; the Massachusetts Congregational Conference and Missionary Society, of Boston, and sundry citizens, all in the State of Massachusetts, remonstrating against the repeal of the eighteenth amendment to the Constitution or the modification of the national prohibition law, which were ordered to lie on the table.

He also presented the petition of the Men's Association of the Central Methodist Episcopal Church, of Brockton, Mass., praying for the passage of legislation to regulate and supervise the motion-picture industry, which was ordered to lie on the table.

Mr. CAPPER presented a memorial of sundry citizens of Wellington, Kans., remonstrating against the passage of the bill (H. R. 13742) to provide revenue by the taxation of certain nonintoxicating liquors, and for other purposes, or any other measure "that would override the eighteenth amendment of the Federal Constitution," which was ordered to lie on the table.

He also presented resolutions adopted by the Woman's Christian Temperance Union of Kansas City; the pastor and members of the Methodist Church Sunday School of Arnold; a mass meeting of the Woman's Christian Temperance Union, held in the Christian church of Erie; and a joint meeting of the Christian, Methodist Episcopal, and Lutheran churches of Ogallah, all in the State of Kansas, protesting against the repeal of the eighteenth amendment to the Constitution or the repeal or modification of the national prohibition law, which were ordered to lie on the table.

He also presented resolutions adopted by local chapters of the Woman's Christian Temperance Union of Ashland, Atchison, Erie, Larned, Liberal, Wamego, and Winfield, and the Methodist Missionary Society of Liberal, all in the State of Kansas, favoring the passage of legislation to regulate and supervise the motion-picture industry, which were ordered to lie on the table.

RELIEF OF AGRICULTURE

Mr. CAPPER. Mr. President, I ask unanimous consent to have printed in the RECORD the resolutions adopted recently by the Kansas State board of agriculture at its annual meeting in Topeka, Kans. These resolutions express the combined public opinion of Kansas farmers. Every section of the State, almost every agricultural county in the State, every agricultural interest and industry in the State of Kansas is represented on the State board. Its annual meeting practically is a convention of delegates from the 160,000 Kansas farms.

I earnestly urge Senators to study the nine points suggested in the resolutions—retention of the agricultural marketing act; Federal financing of farm mortgages at lower interest rates and for longer terms of payment; restoration of the pre-war purchasing power of agriculture; revision of the monetary system so that the farmer can be assured of an honest dollar; consolidation of governmental rural credit functions; protest against undue economies at the expense of agriculture; regulation of market agencies and processors; utilization along sound lines of agricultural resources, and protest against opening up new lands under present conditions; economy in government.

The program outlined is most comprehensive. I am aware we can not do all these things in this session of Congress. But I do say we should study this kind of a program as a guide in working out plans for assisting agriculture in the public interest.

Mr. President, before sending these resolutions to the desk, I want to say one thing more. The time for the Senate to consider these things is now. There are some 11,000,000 unemployed in this country. The purchasing power of farm products, according to the agricultural index figures from the Department of Agriculture, is 49 per cent of what it was in the pre-war years when agriculture and industry were on a fairly equitable basis of exchange.

Farm-mortgage foreclosures are increasing at an alarming rate. I have reached the point where I am convinced it is the duty of Congress to take action to increase farm prices, to relieve debtors, and do it not altogether for agriculture or for debtors but in the public interest.

This morning I received a telegram from M. J. Healy, general manager for John Deere at Kansas City. It hits the nail on the head. Mr. Healy says:

> Wish you would make it clear to some of those Members who are opposing legislation that is intended to give immediate relief to farmers that there is only one power in the United States that can make prosperity turn the corner, namely, the purchasing power of the American farmers, and that there will be no general improvement in business until this power is restored.

May I again express the hope, Mr. President, that we will get early action on the domestic allotment bill, and also on legislation to relieve the farm-mortgage situation, preparatory to general legislation later. I send the resolutions to the desk and ask that they be appropriately referred.

There being no objection, the resolutions were referred to the Committee on Agriculture and Forestry and ordered to be printed in the RECORD, as follows:

RESOLUTIONS RELATING TO NATIONAL LEGISLATION AND FEDERAL GOVERNMENT AFFAIRS, AS ADOPTED AT THE SIXTY-SECOND ANNUAL MEETING OF THE KANSAS STATE BOARD OF AGRICULTURE, AT TOPEKA, JANUARY 11–13, 1933

Resolution No. 1: We favor retention of the agricultural marketing act.

Resolution No. 2: We favor the Federal financing of farm mortgages at lower interest rates and for longer terms.

Resolution No. 3: We favor legislation that will make effective the pre-war purchasing power of agricultural commodities.

Resolution No. 4: We favor revision of the monetary system and the banking industry so as to adequately meet national and industrial requirements under the changed economic and financial conditions.

Resolution No. 5: We favor consolidation of Government rural credit functions and activities.

Resolution No. 6: We deplore the apparent tendency on the part of some Members of Congress to lay an undue share of the burden of economy, which all realize is necessary, upon agriculture. The movement now on foot to destroy the good work that has been done and is being done by the experiment stations under the Morrill Act, the vocational schools under the Smith-Hughes Act, and the extension departments under the Smith-Lever Act by eliminating the permanent Federal appropriations is to be deplored. We urge our congressional delegation to strenuously oppose such a movement.

Resolution No. 7: We demand prompt enforcement of the findings, recommendations, and rates, when such are established, by governmental agencies in respect to practices and charges made by processors and market-service agencies.

Resolution No. 8: We earnestly recommend that no new lands be opened up for agricultural purposes, either by taking water off or putting it on or in any other way.

Resolution No. 9: We demand the utmost economy in National, State, and local governments and insist that constructive legislation be enacted to accomplish that end.

REMONETIZATION OF SILVER

Mr. WHEELER presented a telegram addressed to him, which was referred to the Committee on Finance and ordered to be printed in the RECORD, as follows:

MUNCIE, IND., *January 24, 1933.*

Senator WHEELER: We are heartily in favor of the remonetization of silver, believing it to be one of the wedges necessary for splitting this depression wide open.

ACCEPTANCE SPEECH OF FORMER VICE PRESIDENT HOBART

Mr. BARBOUR. Mr. President, I hold in my hand the acceptance speech of the former Vice President of the United States, the late Mr. Garret A. Hobart, of Paterson, New Jersey, and request unanimous consent that this very excellent address be spread in full in the RECORD and appropriately referred.

I am anxious to bring it to the attention of all the Members of Congress and also make it available as a public document, for this address is as apropos to-day as it was when it was delivered in July, 1896. Its philosophy is as sound now as then and quite as timely.

There being no objection, the address was referred to the Committee on Banking and Currency and ordered to be printed in the RECORD, as follows:

MR. HOBART'S SPEECH ACCEPTING THE NOMINATION FOR THE VICE PRESIDENCY, DELIVERED AT PATERSON, JULY 7, 1896

At the conclusion of the remarks of Mr. Fairbanks, chairman of the committee appointed by the St. Louis National Republican Convention to officially notify Mr. Hobart of his selection as the candidate for Vice President on the Republican ticket, Mr. Hobart said:

"Mr. Chairman and gentlemen of the committee, I beg to extend to you my grateful acknowledgments for the kind and flattering terms in which you convey the formal announcement of my nomination for Vice President of the United States by the Republican National Convention at St. Louis. I am profoundly sensible of the honor which has been done me, and through me to the State in which all my life has been spent, in my selection as a candidate for this high office.

"I appreciate it the more because it associates me in a contest which involves the very gravest issues with one who represents in his private character and public career the highest intelligence and best spirit of the party, and with whom my personal relations are such as to afford a guarantee of perfect accord in the work of this campign which lies before me.

"Concurring without reserve in all the declarations of principle and policy embodied in the St. Louis platform, I accept the nomination tendered me with full appreciation of its responsibilities, and with an honest purpose, in the the event that the people shall ratify the choice made by the national convention, to discharge any duties which may devolve upon me with sole reference to the public good.

"Let me add that it will be my earnest effort in the coming campaign to contribute in every way possible to the success of the party which we represent, and which as to the important issues of the time stands for the best interests of the people."

THE MONEY QUESTION

"Uncertainty or instability as to the money question involves most serious consequences to every interest and to every citizen of the country; the gravity of this question can not be overestimated. There can be no financial security, no business stability, no real prosperity, where the policy of the Government as to that question is at all a matter of doubt.

"Gold is the one standard of value among all enlightened commercial nations. All financial transactions of whatever character, all business enterprises, all individual or corporate investments are adjusted to it.

"An honest dollar, worth 100 cents everywhere, can not be counted out of 53 cents worth of silver plus a legislative fiat.

EFFECT OF DEBASEMENT

"Such a debasement of our currency would inevitably produce incalculable loss, appalling disaster, and national dishonor. It is a fundamental principle in coinage, recognized and followed by all the statesmen of America in the past, and never yet safely departed from, that there can be only one basis upon which gold and silver may be concurrently coined as money and that basis is equality, not in weight but in the commercial value contained in the respective coins.

"This commercial value is fixed by the markets of the world, with which the greatest interests of our country are necessarily connected by innumerable business ties which can not be severed or ignored.

"Great and self-reliant as our country is, it is great not alone within its border and upon its own resources but because it also reaches out to the ends of the earth in all manifold departments of business exchange and commerce, and must maintain with honor its standing and credit among the nations of the earth.

NO COMPROMISE

"The question admits of no compromise. It is a vital principle at stake, but it is in no sense partisan or sectional. It concerns all the people.

"Ours, as one of the foremost nations, must have a monetary standard equal to the best. It is of vital consequence that this question should be settled now in such a way as to restore public confidence here and everywhere in the integrity of our purpose. A doubt of that integrity among other great commercial countries of the world will not only cost us millions of money but that which, as patriots, we should treasure still more highly—our industrial and commercial supremacy.

"My estimate of the value of a protective policy has been formed by the study of the object lessons of great industrial states extending over a period of 30 years. It is that protection not only builds up important industries from small beginnings but that those and all other industries flourish or languish in proportion as protection is maintained or withdrawn. I have seen it indisputably proved that the prosperity of the farmer, merchant, and all other classes of citizens goes hand in hand with that of the manufacturer and mechanic. I am firmly persuaded that what we need most of all to remove the business paralysis that afflicts this country is the restoration of a policy which, while affording ample revenue to meet the expenses of the Government, will reopen American workshops on full time and full handed, with their operatives paid good wages in honest dollars; and this can only come under a tariff which will hold the interest of our people paramount to our political and commercial systems.

"The opposite policy, which discourages American enterprises, reduces American labor to idleness, diminishes the earning of American workingmen, opens our market to commodities from abroad which we should produce at home, while closing foreign markets against our products, and which at the same time steadily augments the public debt, increasing the public burdens, while diminishing the ability of the people to meet them, is a policy which must find its chief popularity elsewhere than among American citizens.

"I shall take an early opportunity, gentlemen of the committee, through you to communicate to my fellow citizens with somewhat more of detail my views concerning the dominant questions of the hour and the crisis which confronts us as a nation.

"With this brief expression of my appreciation of the distinguished honor that has been bestowed upon me, and this significance of my acceptance of the trust to which I have been summoned, I place myself at the services of the Republican Party and of the country."

CLAIMS FOR REFUNDS OF TAXES—TESTIMONY OF HENRY HERRICK BOND

Mr. SMOOT. Mr. President, I have received a letter from Hon. Henry Herrick Bond, dated January 17, 1933, referring to the remarks of the senior Senator from Ten-

nessee [Mr. McKELLAR] about the tax refund to the steel company. I ask unanimous consent that the letter may be printed in the RECORD.

The VICE PRESIDENT. Is there objection? The Chair hears none, and it is so ordered.

The letter is as follows:

WASHINGTON, D. C., *January 17, 1933.*

Hon. REED SMOOT,
Senate Office Building, Washington, D. C.

MY DEAR SENATOR SMOOT: In the debate on the first deficiency bill Senator McKELLAR, on January 10 and 11, made certain statements which purported to be quotations from a hearing in the course of which he examined me in 1929.

Inasmuch as these reported quotations constitute such a serious reflection upon me and upon my performance of my duties as then Assistant Secretary of the Treasury, I feel that the record ought not to stand without contradiction since the statements are entirely unjustified and the purported quotations have no justification when compared with the record of the hearing.

The only occasion when I was questioned by Senator McKELLAR was on January 9, 1929, in a hearing conducted by the subcommittee of the Committee on Appropriations of the Senate on the first deficiency appropriation bill for 1929. My testimony appears on pages 3, 4, 5, 7, 8–13, and 18–36. Anyone reading the printed record of this hearing will at once see that I made none of the replies or statements which Senator McKELLAR claimed that I made, or any statements remotely approximating what he claims.

I can only assume that the Senator's recollection is at fault, and that before making his speech on January 10 and 11, last, he did not take pains to read over the printed record.

Very truly yours,

HENRY HERRICK BOND.

Mr. McKELLAR subsequently said: Mr. President, I ask unanimous consent to have printed in the RECORD immediately after the insertion of the letter from Hon. Henry Herrick Bond, put in the RECORD a while ago by the senior Senator from Utah [Mr. SMOOT], a report submitted by the Senator from Wisconsin [Mr. BLAINE] from the Committee on the Judiciary January 14, 1929, on claims for refunds of taxes. The Senator from Utah knows that I make the request.

The PRESIDING OFFICER (Mr. HATFIELD in the chair). Is there objection? The Chair hears none, and it is so ordered.

The report is as follows:

[Senate Report No. 1432, Seventieth Congress, second session]

CLAIMS FOR REFUNDS OF TAXES

Mr. BLAINE, from the Committee on the Judiciary, submitted the following report (to accompany S. 5319):

The Committee on the Judiciary, to which was referred the bill S. 5319, after consideration reports the same favorably to the Senate and recommends that the bill do pass with the following amendments:

Strike out all after the enacting clause and insert in lieu thereof the following:

"That section 3220 of the Revised Statutes (title 26, sec. 149, p. 737, U. S. C.), as amended by act of Congress on May 29, 1928, be, and the same is hereby, amended to read as follows:

"'SEC. 3220. In case of any claim filed with the Commissioner of Internal Revenue before the approval of this amendatory act for refund, credit, or abatement of income, war-profits, excess-profits, estate, or gift taxes, or other internal-revenue taxes (whether such claim arises from illegality of assessment, of collection of penalties, or of unjust or excessive taxation), the commissioner, under rules prescribed by the United States Board of Tax Appeals, shall, upon final action by him upon the claim, certify the claim to the board where the commissioner recommends a refund, credit, or abatement, and where the amount claimed or recommended for allowance is more than $10,000. The commissioner, under rules prescribed by the board, shall also certify with such claim all papers and proof in reference to such claim, with his recommendation and reasons therefor, in such form and manner as the board may by rule require. Where the amount claimed is more than $10,000 should the commissioner not recommend the refund, credit, or abatement in the amount claimed, the taxpayer shall have the right to institute by petition to the board, within such time as the board shall by rule prescribe, a proceeding for the determination of the claim; and in such cases the commissioner shall, upon order of the board, certify to the board the papers, proof, and recommendation and reasons therefor as above specified. The board shall have jurisdiction to hear and determine on the merits any claim certified to the board by the commissioner or instituted before the board by the taxpayer under this paragraph, in the same manner as is provided for in cases of deficiencies, with the right of either the commissioner or the taxpayer to submit additional proof.

"'Any such claim made after the approval of this amendatory act shall, where the amount claimed is more than $10,000, be instituted, within the period of limitation provided by law, only by petition for refund and/or credit filed by the taxpayer with the board. The board shall have jurisdiction to hear and determine the claim on the merits in the same manner as is provided for in cases of deficiencies; and in such cases the commissioner shall, upon order of the board, certify to the board all papers and proof in reference to the claim in such form and manner as the board may by rule require.

"'The jurisdiction of the board under this section shall be concurrent with the Federal courts, and any judgment of the board determining any claim under this section shall be final unless within six months the taxpayer or the commissioner has filed a petition for a review of such judgment of the board in such manner as is provided for in cases of deficiencies.

"'All judgments or decrees of a court or of the board for the refund of internal-revenue taxes, and all judgments of any court against any collector or deputy collector for any internal-revenue tax collected by him and the costs and expense of the suit, and all judgments for damages and costs recovered against any assessor, assistant assessor, collector, deputy collector, agent, or inspector in any suit against him by reason of anything done in the due performance of his official duty, shall be certified to the Congress for payment.

"'All claims, whether filed before or after the approval of this amendatory act, for credit and/or refund, of income, war-profits, excess-profits, estate, or gift taxes, or other internal-revenue taxes, or penalties in connection therewith, illegally assessed or collected, or for refund of such taxes unjustly assessed, or excessive, or wrongfully collected, shall, where the amount claimed is not more than $10,000, be determined by the commissioner, and any refund, credit, or abatement therein shall be made by him, under regulations prescribed by the board.

"'At the beginning of each regular session of Congress the commissioner shall make a report to the Congress, by internal-revenue districts and alphabetically arranged, of all refunds and credits authorized by him in excess of $500, and the board shall make a like report, with its findings and orders, of all refunds and credits authorized by it.'"

The reasons actuating your committee in reporting this bill favorably are as follows:

From the hearings on the first deficiency bill in the House and the Senate it appears, first, that the Secretary of the Treasury has submitted a request approved by the Director of the Budget and the President for $75,000,000 to be appropriated as a deficiency to pay tax refunds that will probably be made before June 30. It will be remembered that the Congress has already appropriated $130,000,000 for this year.

The Assistant Secretary, Mr. Bond, states as follows:

"Mr. BOND. $130,000,000 has been appropriated and we are asking for $75,000,000 more" (p. 10).

And, again, Mr. Bond testified:

"Senator McKELLAR. How much have you left?

"Mr. BOND. My recollection is that before the steel payment we had about $52,000,000; $26,000,000 was paid to the steel company, and there is still something like $21,000,000 or $22,000,000 available now. Of course, there are payments being made every day in the week" (p. 11).

And again:

"Senator McKELLAR. In other words, you get the money appropriated by Congress before you pass on the cases?

"Mr. BOND. We have to make our estimates based on what has happened in the last year or the last six months, and then we ask for an appropriation; otherwise you would allow a refund and then the Government would have to pay interest at 6 per cent on many millions of dollars until the appropriation could be made, which would be a very considerable item" (p. 3).

Let us examine these two contentions. In the first place, the claim that the money should be appropriated in advance in order to save interest is not material, because the bureau is now allowing interest from the date of payment and the question of interest would amount to an exceedingly small sum. Again, the allowance of interest is only provided for in the revenue act of 1928 and it is exceedingly doubtful as a legal proposition whether the allowance of refunds on these old claims is permissible under that law. Manifestly, as it seems to us, the allowance of interest provided for in the act of 1928 should not be retroactive.

That so large an amount is not necessary is apparent from the following:

"Senator McKELLAR. How many claims have you passed on during the last eight years?

"Mr. BOND. There were 168,501 refunds allowed in 1928, the fiscal year of 1928.

"Senator McKELLAR. If you allowed 168,000 claims in 1928 and have only 12,740 now, if $130,000,000 is already appropriated for next year, and you have $18,000,000 now on hand, how can you conclude that your refunds are going to be so large in another year, with 168,000 allowed this year, and when you only have 12,740 cases on hand?

"Mr. BOND. Senator, during the quarter ending in September we adjusted 11,705 claims, and during the previous quarter we adjusted 11,818 claims, and during the September quarter we received 11,690 claims. You see, claims are coming in at the same time that we are disposing of claims.

"Senator McKELLAR. I understand; but in order to get the facts correct, I notice that on page 97 you say the number of claims now pending on account of earlier years is 12,740. How many claims of earlier years have you already settled?

"Mr. BOND. Previous to that date?

"Senator McKELLAR. Well, you here make a distinction of 12,740 in earlier years. I do not know exactly what you mean by that.

I do not know where your division is, unless they were war claims or growing out of the war.

"Mr. BOND. The question that was asked me which led to that answer was: 'Would you say that the greater portion of it is for claims for 1923 and back of that time?'

"I answered that I did not know but would put in the best statement I could, and then this statement was inserted in the record. I presume it applies to 1923 and prior" (p. 20).

So that it seems that the number of claims is less and there ought not to be as much money paid out in the future as there has been in the past, and the $130,000,000 already appropriated should be sufficient for all claims yet to be made this year. But, in any event, there will be $130,000,000 available July 1, and they now have at least $22,000,000.

SECOND

A second reason for the passage of this bill, in the opinion of your committee, is based on the facts concerning the United States Steel Corporation case recently decided by the bureau, in which a $26,000,000 refund to the United States Steel Corporation was made for the year 1917. Apparently the facts in that case were that in 1919, 1920, 1921 four reassessments of the United States Steel Corporation were made aggregating about $17,000,000. The first of these was made on December 29, 1919, for $7,190,165.71; the second on December 3, 1920, for $6,369,497.75; the third on February 14, 1921, for $167,073.30; and the fourth on August 29, 1921, for $4,000,000. These aggregate something over $17,000,000. (Testimony of Mr. Bond, p. 28.)

It further appears that cases like the Steel Corporation case are passed on by a committee in the office of the Solicitor of the Treasury, now called the general counsel's office. (Testimony of Commissioner Blair, p. 2.)

This particular case was tried by three men of the general counsel's office or the solicitor's office—Mr. Service, Mr. Cardwell, and Mr. King.

"Mr. BOND. Mr. Service has been in the bureau since November 6, 1919; Mr. Cardwell since June 8, 1920; and Mr. King since October 11, 1920" (p. 29).

It will thus be seen that Mr. Service was in the solicitor's office when all the reassessments for 1917, amounting to $17,000,000, were made; that Mr. King and Mr. Cardwell were in the office when all these reassessments were made except the first one (p. 29).

Thus it is seen that while it does not actually appear that these three gentlemen took part in assessing the United States Steel Corporation in 1917, they were present in the office, and, no doubt, were familiar with it, or should have been familiar with it, if they did not actually take part in it.

There were also in the department at that time Mr. Wayne Johnson and a Mr. Alverson (p. 26).

On March 1, 1920, before three of these assessments were imposed, Wayne Johnson became the solicitor of the department, and he served as such solicitor until September 15, 1920 (p. 26).

He was admitted to practice in the Treasury Department on February 25, 1921.

I quote from the testimony of Mr. Bond:

"Mr. BOND. Mr. Wayne Johnson was employed as a special attorney in the office of the Solicitor for the Bureau of Internal Revenue (now general counsel's office) from April 10, 1919, to March 1, 1920. On this latter date he became solicitor for the bureau and served as such until September 15, 1920. He was admitted to practice before the Treasury Department on February 25, 1921. As far as can be ascertained from the bureau's records, Mr. Johnson had no contact with the tax case of the United States Steel Corporation during the entire period of his employment with the bureau.

"Senator PHIPPS. May I interpose a question, Mr. Secretary?

"Mr. BOND. Surely.

"Senator PHIPPS. At the time of the additional assessment of $17,000,000, was that payment made under protest?

"Mr. BOND. Of course, it is immaterial under the law now.

"Senator PHIPPS. That is true.

"Senator MCKELLAR. But it was material then.

"Mr. BOND. I have no personal knowledge as to that (p. 26).

"Mr. Alverson resigned September 30, 1920. He was an attorney in the general counsel's office" (p. 28).

So that year we have this United States Steel Corporation case settled in the solicitor's office. We find that after the reassessments, or some of them, had been made, then the solicitor and one of his assistants resigned and were admitted to the practice of law before the bureau; and that soon after they filed a proceeding before the bureau to obtain a refund of taxes, which had been assessed in part while they were connected with the bureau. We find that they tried the case before three employees of the bureau, who were employees of the bureau when these three assessments were made, one of them when all of the assessments were made and the other two when all of them but one were made. We find that this case was tried in secret, passed upon in secret, and virtually paid in secret. We find that while the solicitor's office reassessed the Steel Corporation in 1917 in the sum of $17,000,000, yet some 10 years afterwards a committee from the same office where it was assessed and who were members of the office while it was assessed were paying back $15,000,000 of the sum then assessed against the steel company. In addition to that, there were $11,000,000.

CREDITS OF $31,000,000

But even that is not all. They allowed a much bigger judgment than the $17,000,000. Mr. Bond was good enough to give the entire picture.

"Senator MCKELLAR. I do want it; but what I want to know first is this: Is not the net result of the litigation that the Government made a reassessment or reassessments against this company in 1917 and collected $17,000,000, and since that time they paid back the principal sum of $15,000,000, together with $11,000,000 interest? Is that right?

"Mr. BOND. That is right as far as you have gone.

"Senator MCKELLAR. All right. Now, go ahead and give me the information you spoke of.

"Mr. BOND. Here is the information that I think you want——

"Senator MCKELLAR. I shall be delighted to have it.

"Mr. BOND. In addition, there was a credit of about $28,000,000, with interest, making about $31,000,000 all together, which, having been certified as overpaid on the 1917 tax, was credited against some pending deficiencies for later years.

"I was afraid you did not know that, and I wanted to be frank and give you the full picture.

"Senator MCKELLAR. That is fine. I am much obliged (p. 27)."

So, that instead of only the trifling sum of $26,000,000 repaid to the United States Steel Corporation, there was this sum with the additional sum of $31,000,000, making a total of $57,000,000 that was paid back to the Steel Corporation for this one year 1917, 10 years after the assessments were made. In other words, they not only got back substantially all of the special assessments, but they got back refunds on the original assessments necessarily.

Your committee is of the opinion that this indicates such a loose method of procedure, not to speak of it more harshly, that their method of refunding taxes erroneously or improperly made should be changed to a system less objectionable.

THIRD

In other words, the Steel Corporation for 1917 made its own returns and then was later on assessed with $17,000,000 additional. It then afterwards in the manner heretofore pointed out secured not only a repayment of $17,000,000 but some $40,000,000, counting the interest back from its original report of taxes which it had voluntarily made. But that is not all. This appears to be the only case that the Joint Committee on Internal Revenue Taxation has taken up. There was a hearing before that committee on the matter of this refund on December 17 last.

Mr. Parker, the administrative agent of the committee, testified as follows:

"Senator MCKELLAR. Mr. Parker, from your examination of it, what was this dilemma about the computation that you spoke of, and how much money did it involve?

"Mr. PARKER. The amount of money in taxes is a little hard to say. The computation that was required was for invested capital. The invested capital is an amount that is very large. In the Steel case it ran up, in the year 1917, to over $1,000,000,000.

"Now, then, the amount that was in dispute was between a determination on the regulations of the bureau and a determination made on the Court of Claims decision, and the difference between those figures was about $69,000,000.

"Senator MCKELLAR. $69,000,000 difference?

"Mr. PARKER. But that does not mean that much in taxes. That probably means about one-tenth of that, you see, in taxes.

"Senator MCKELLAR. In other words, it would be about $6,900,000?

"Mr. PARKER. About 11 per cent; it would be a little bit more than that.

"Senator MCKELLAR. About $7,000,000?

"Mr. PARKER. Yes.

"Senator MCKELLAR. What conclusion did they reach, according to their own regulations, about this $7,000,000——

"Mr. PARKER. No; they made an adjustment in this amount.

"Senator MCKELLAR. And that was in violation——

"The CHAIRMAN. Give the witness a chance to answer.

"Senator MCKELLAR. Yes; I will. Was that in violation of their regulations?

"Mr. PARKER. Well, it was against their regulations.

"Senator MCKELLAR. Against their regulations" (p. 39)?

So that we find the remarkable situation that in determining what amount should be refunded, this bureau, as constituted as above set out, returned $7,000,000, and, of course, this carried interest, which amounted to some $5,000,000 more—in all, perhaps $12,000,000—in direct violation of the regulations by which this refund was supposed to have been made.

Again it was said:

"Senator MCKELLAR. We are not passing on that question now. But I simply want to ask you to state certain facts, whether in this decision in this case the bureau disregarded its own regulations to the extent that you mentioned on this $69,000,000 difference; is that correct?

"Mr. PARKER. They disregarded their regulations on certain points, because the Court of Claims had already decided on that particular point that they were wrong" (p. 40).

FOURTH—THE X TOBACCO CASE

The facts in the X Tobacco case were somewhat different. The X Tobacco case was thus stated by Mr. Parker as follows:

"Senator MCKELLAR. Suppose that they had followed your suggestions made there, would it have made any difference in the amount paid to the tobacco company?

"Mr. PARKER. Well, this case is one where the refund was almost entirely due to the allowance of what is known as special assessment. That is the relief provision under the revenue act.

"Senator MCKELLAR. Yes.

"Mr. PARKER. The courts have since held that is a discretionary provision within the power of the commissioner, and the commissioner evidently in this case thought that this was a right determination.

"Senator MCKELLAR. In other words, the Tobacco case was settled primarily upon a matter of discretion?

"Mr. PARKER. I do not think the taxpayer would have had any rights in this case in courts.

"Senator MCKELLAR. Would not?

"Mr. PARKER. He would not have now; at that time this other decision had not been rendered. He probably could have not enforced the collection in the courts.

"Senator MCKELLAR. And, about $6,000,000 was paid out by the Secretary of the Treasury, or by the Internal Revenue Bureau to the American Tobacco Co.—or was it the American Tobacco Co.?

"Mr. PARKER. Let us call it the X Tobacco Co.

"Senator MCKELLAR. To the tobacco company, in order to conform with your idea of secrecy, about $6,000,000 was paid out for which that company had no legal right to recover, according to your judgment?

"Mr. PARKER. They had a legal right. The commissioner had legal authority.

"Senator MCKELLAR. I am talking about this: They could not have recovered under order of the courts, if the commissioner had asked them to go into the courts, they could not have recovered?

"Mr. PARKER. That is my opinion now" (p. 49).

Your committee feels that this method of repaying funds is such a slipshod method that it ought to be corrected, and cases of this importance should be settled in the open by an impartial tribunal.

FIFTH

Your committee feels that the secrecy surrounding these refunds of taxes should be removed. This question of secrecy must not be confused with publicity of tax refunds generally. The secrecy here referred to is that secrecy which surrounds the hearing and granting of refunds in the Revenue Department. All these gentlemen were questioned about this.

"Senator MCKELLAR. You, yourself, do not actually review these cases?

"Commissioner BLAIR. No; I can not possibly do it" (p. 2).

Again:

"Senator MCKELLAR. At any rate, Mr. Commissioner, these cases are tried in an absolutely secret way in so far as the outside public is concerned?

"Commissioner BLAIR. We are required to do that by law" (p. 5).

Again:

"Senator MCKELLAR. Will you state, Mr. Commissioner, a single case that any part of this $75,000,000 is urgently necessary to settle?

"Commissioner BLAIR. Well, I do not know. This $75,000,000, as I understand it, is appropriated to take care of such refunds as will be made during the remainder of this fiscal year (p. 8).

"Mr. BOND. I can not give you the names, Senator.

"Senator MCKELLAR. Why?

"Mr. BOND. For the same reason that I have explained before.

"Senator MCKELLAR. In other words, the law governing the Bureau of Internal Revenue provides for absolutely hermetically sealed information, does it, and you are not permitted to go beyond that?

"Mr. BOND. The statute, Senator, that you enacted——

"Senator MCKELLAR. Do not say 'I,' because I voted against it. You might say the statute that my associates enacted.

"The CHAIRMAN. But you are responsible for it.

"Senator MCKELLAR. I want to get rid of it if I can.

"Senator PHIPPS. Senator, let me ask you a question: Would you not resent any man at this table going to the department and demanding to see your personal income-tax return?

"Senator MCKELLAR. Not at all. I should be perfectly delighted to have anybody see it (p. 33). As a matter of fact, you can not disclose the names because of the law that provides for throwing secrecy about tax returns. Is not that so?

"Mr. BOND. That is correct, Senator.

"Senator MCKELLAR. You are not doing it because of any desire on your part not to be open and frank about it?

"Mr. BOND. Not a bit.

"Senator MCKELLAR. But simply because of your construction of the law which provides for secrecy in all these matters. Is not that right?

"Mr. BOND. That is correct" (p. 34).

Again:

"Senator MCKELLAR. What cases are there now amounting to over $75,000—refunds of over $75,000—that are before the committee or that have been transmitted to your committee by the bureau?

"Mr. PARKER. I am under the same limitations about naming those cases.

"Senator MCKELLAR. Well, can you give me how many there are? Can you give me the number of them? If the name is so sacred, let us have the number.

"Mr. PARKER. After all, they are coming up while I am sitting here. I can give you the number as of a certain date, or how many we have received up to a certain date (pp. 50 and 51).

"Senator MCKELLAR. Now, how in the name of heaven has the United States Steel Corporation's name been given—how did it leak out; how did the people get hold of its name with regard to this matter, when the other names are so carefully preserved, except as to the tobacco company? How in the world did you gentlemen ever let those two names of those two concerns get out?

"Mr. BOND. Because Mr. GARNER got up on the floor and described the whole case. I do not say that in criticism, but because you ask the question.

"Senator MCKELLAR. Well, that is awful on Mr. GARNER's part, I should imagine. I think that he ought to be dealt with. I am speaking ironically, of course. I want the record to show that. So it was due to Mr. GARNER that those two names got out. It was over your protest, I suppose?

"Mr. PARKER. No, sir; but Mr. GARNER is a member of this committee. Mr. GARNER has a right to see our records. He has a different standing from all others, except members of your committee, so far as our records are concerned.

"Senator MCKELLAR. He had a right to see any of these records?

"Mr. PARKER. Yes.

"Senator MCKELLAR. Then it was not such a heinous offense to Mr. GARNER to disclose the names of these two concerns? (pp. 42 and 43).

Are hearings on these tremendous sums held and are they open to the public?

"Commissioner BLAIR. No, sir; they are not open to the public.

"Senator MCKELLAR. Are they open to anyone except those who are interested?

"Commissioner BLAIR. They are open to all the members of the bureau, all the people in the bureau, and the taxpayer.

"Senator MCKELLAR. As a matter of fact, no one else in the bureau would be interested in them except the officers handling a particular case and the taxpayers and their representatives; is not that true?

"Commissioner BLAIR. Yes; that is true (p. 4).

"Senator MCKELLAR. I would like to know whether these gentlemen are going to refuse to disclose this information?

"Commissioner BLAIR. If I find I am prevented by law, I am going to refuse; but if I find I am not, I will cheerfully give it to you.

"Senator MCKELLAR. I think we are entitled to it before this committee when a request is made here for this enormous sum of money. Now, there is no immediate necessity for this appropriation, is there? There is no urgent claim that is now about to be settled?

"Commissioner BLAIR. There are claims and overassessments being allowed every day.

"Senator MCKELLAR. Will you be good enough to have filed the claims which you are going to pay out of this $75,000,000?

"Commissioner BLAIR. It is to be applied to the payment of claims as they are determined.

"Senator MCKELLAR. I understand that, but I would like to know something about the cases and something about the claims which you are going to pay out of this $75,000,000.

"Commissioner BLAIR. There is no way by which I can tell until a case is passed upon finally" (pp. 9 and 10).

Thus we see that in so far as the allowance of these claims is concerned, if in the one of the United States Steel Co., where $57,000,000 was refunded, no information is given out by the bureau, it is already hermetically sealed. Your committee is of opinion that this is not to the best interest of the Government; it is not to the best interest of the honest administration of the bureau; that under such a system the grossest kind of injustice might happen, and the committee thinks it ought to be done away with.

Your committee further reports that there is no question of publicity of tax returns. This bill does not provide for publicity of tax returns in any way, but, it does provide that where a taxpayer disputes the validity of his own voluntary tax returns or disputes the validity of any reassessments that have been made upon him, then the case shall be tried openly before the Bureau of Tax Appeals, which has been created for that purpose.

METHODS—EXCUSES

We desire to call particular attention to the evidence of Assistant Secretary Bond in reference to the method used. In speaking of the payment of the taxes by the steel company for 1917 and the additional assessments made against that company for that year and in 1919, 1920, and 1921, Mr. Bond said that it was understood that the payments of these taxes were only provisional.

In this connection is to be found the evidence:

"Senator MCKELLAR. Well, now, you say that both sides understood that that was not to be a final determination. Were you a member of the department at that time and was there any agreement to that effect?

"Mr. BOND. I happened to be in the department, Senator, for the first six months of 1918, but I do not recall that I had anything to do with the Steel Co. case.

"Senator MCKELLAR. Then how do you make the statement now, 10 years afterwards, that there was an agreement on the part of the Government and the steel company that this was to be a provisional assessment and an additional collection? Who made the agreement for the Government that this taxation of the steel corporation in 1917 was to be merely provisional?

"Mr. BOND. It was not any agreement, Senator, but it was always customary—and I am reasonably certain you will find that the letters so indicate it in this case—that that was merely an office examination of the returns, and that that was to be followed later by an audit in the field, and the final determination reached at a later date.

"Senator McKELLAR. Did you treat all other taxpayers that way?

"Mr. BOND. Yes.

"Senator McKELLAR. Did everybody understand that their assessments and collections during the war were merely provisional and that after the war was over they could come back and adjust their cases and either receive refunds or pay the Government more money?

"Mr. BOND. *Every large corporation knew that before its tax matters were finally closed its books would be audited with the greatest care and the work reviewed and their tax finally determined on the basis of those facts*" (pp. 23 and 24). (The italics are ours.)

Your committee, while having the highest respect for Mr. Bond, is of the opinion that, making these assessments during the war was provisional, he is wholly mistaken. They are of the opinion that any official who made an agreement that a tax paid voluntarily by a taxpayer and that an assessment paid by a taxpayer afterwards with the understanding that the Government should later make an audit and refund was without authority and void, if any such agreement was made.

Your committee further believes that if such was the practice of the department, it was a wrong practice; if such was the method of the department, it was a wrong method; and, that if only the large corporations took advantage of it, that it was a discrimination in favor of the large corporations that should not have been made.

Again:

"Senator McKELLAR. And upon that audit you felt that this company had not paid enough money and required it to pay $17,000,000 additional?

"Mr. BOND. That was knowing there would be a readjustment later on.

"Senator McKELLAR. Was the 1918 case included in this refund?

"Mr. BOND. No.

"Senator McKELLAR. Is that still pending?

"Mr. BOND. That is being studied in the bureau.

"Senator McKELLAR. I would like to know, in that connection, what is the amount of the claim of the Steel Co. in that case.

"Mr. BOND. It is for $50,000,000 and interest.

"Senator McKELLAR. They have that claim now, and that involves the year 1918.

"Mr. BOND. Yes, sir" (pp. 24 and 25).

Now, your committee is of the opinion that these methods of settling were wholly unfair and unjust not only to the Government but to the smaller taxpayers who were not put on the same basis.

THE JOINT COMMITTEE ON INTERNAL REVENUE TAXATION

It has been suggested that instead of conferring jurisdiction upon the Board of Tax Appeals to review these cases it would be better to confer that jurisdiction on the Joint Committee on Internal Revenue Taxation.

In the opinion of your committee there are several reasons why this is not advisable:

First. Because under the practice of that committee its proceedings are all in secret, and this your committee believes is incorrect.

Second. The joint committee has never functioned on but one tax case, and that was the Steel Co. case on December 17, 1928. (Record, p. 44.)

"Senator McKELLAR. On internal-revenue taxation, whatever was done in so far as tax refunds were concerned, was this sole and only meeting you held on December 17, 1928, when the only result of that meeting was the letter that was written by Mr. HAWLEY to the department?

"Mr. PARKER. That is the only formal meeting we have had on an individual case. As I say, I have reported to members of the committee, and they have advised as to what should be done in those cases" (p. 44).

Third. The joint committee is composed of very busy Congressmen and Senators, and necessarily this matter must be left to their administrative agent, Mr. Parker. He does not have the machinery for examining these cases. If this machinery were turned over to him, he could no doubt do it, but we would have the anomalous situation of some tax cases being passed on by the Board of Tax Appeals and others by this joint committee, which, in the opinion of your committee, would not be advisable.

PURPOSE

The purpose of this bill is to confer concurrent jurisdiction upon the Board of Tax Appeals to reexamine the papers and the files of the Internal Revenue Commissioner in all cases where the claim involves more than $10,000. The taxpayer is not deprived of any right to go into court in reference to a claim for taxes, but if he elects to take it up before the Board of Tax Appeals he may do so. These cases are publicly heard and its reasons are public documents. It only has jurisdiction over claims appealed by taxpayers and it should be given this additional jurisdiction over all claims involving more than $10,000.

REPORTS OF COMMITTEES

Mr. SMOOT, from the Committee on Appropriations, to which was referred the bill (H. R. 13710) making appropriations for the Department of the Interior for the fiscal year ending June 30, 1934, and for other purposes, reported it with amendments and submitted a report (No. 1109) thereon.

Mr. VANDENBERG, from the Committee on Commerce, to which was referred the bill (S. 5445) to extend the time for the construction of a bridge across the Rio Grande at or near Riogrande, Tex., reported it with amendments and submitted a report (No. 1110) thereon.

ENROLLED BILLS PRESENTED

Mr. VANDENBERG, from the Committee on Enrolled Bills, reported that that committee presented to the President of the United States the following enrolled bills:

On January 24, 1933:

S. 3675. An act relating to the deferment and adjustment of construction charges for the years 1931 and 1932 on Indian irrigation projects.

On January 25, 1933:

S. 5131. An act to extend the times for commencing and completing the construction of a bridge across the Ohio River at or near Cannelton, Ind.; and

S. 5232. An act to extend the time for completing the construction of a bridge across the Missouri River at or near St. Charles, Mo.

BILLS AND JOINT RESOLUTION INTRODUCED

Bills and a joint resolution were introduced, read the first time, and, by unanimous consent, the second time, and referred, as follows:

By Mr. BANKHEAD:

A bill (S. 5506) to provide for readjustment of the bonded indebtedness of Federal land banks and joint-stock land banks and for reducing and readjusting farm-mortgage indebtedness to said banks, and for other purposes; to the Committee on Banking and Currency.

By Mr. THOMAS of Oklahoma:

A bill (S. 5507) providing for per capita payments to the Seminole Indians in Oklahoma from funds standing to their credit in the Treasury; to the Committee on Indian Affairs.

By Mr. COPELAND:

A bill (S. 5508) to establish a national military park to commemorate the campaign and battles of Saratoga in the State of New York; to the Committee on Military Affairs.

By Mr. REED:

A bill (S. 5509) to amend the act of May 22, 1928, entitled "An act to authorize the collection, in monthly installments, of indebtedness due the United States from enlisted men, and for other purposes"; to the Committee on Military Affairs.

By Mr. BARBOUR:

A bill (S. 5510) granting a pension to Albert Anderson; to the Committee on Pensions.

By Mr. JOHNSON:

A bill (S. 5511) granting a pension to Lottie A. Torrance (with accompanying papers); to the Committee on Pensions.

By Mr. ROBINSON of Indiana:

A bill (S. 5512) granting an increase of pension to Rosa G. Presnell (with accompanying papers); to the Committee on Pensions.

A bill (S. 5513) to correct the naval record of Robert Trook; to the Committee on Naval Affairs.

A bill (S. 5514) relating to payments of premium on contracts of United States Government insurance; to the Committee on Finance.

By Mr. ROBINSON of Arkansas:

A bill (S. 5515) to provide emergency relief with respect to agricultural indebtedness, and for other purposes; to the Committee on Banking and Currency.

By Mr. HARRISON:

A bill (S. 5516) granting a pension to Harvey E. Barron; to the Committee on Pensions.

By Mr. SHEPPARD:

A bill (S. 5517) for the relief of William H. Heideman; to the Committee on Military Affairs.

By Mr. NORBECK:

A bill (S. 5518) providing for payment of $10 to each enrolled Cheyenne River Sioux Indian of South Dakota from any funds standing to their credit in the Treasury of the United States; to the Committee on Indian Affairs.

By Mr. ROBINSON of Arkansas:

A joint resolution (S. J. Res. 241) to enable the United States Roanoke Colony Commission to carry out and give effect to certain plans for the comprehensive observance of the three hundred and fiftieth anniversary of the birth of English-speaking civilization in America; to the Committee on the Library.

AMENDMENT TO INTERIOR DEPARTMENT APPROPRIATION BILL

Mr. ODDIE submitted an amendment intended to be proposed by him to House bill 13710, the Interior Department appropriation bill, which was ordered to lie on the table and to be printed, as follows:

On page —, line —, to insert the following:

"That all materials and supplies purchased by any department of the Federal Government, and all materials and supplies furnished by contractors doing work for the Federal Government, shall be produced within the limits of the United States, except (1) materials or supplies which can not be purchased in the United States; (2) articles produced or supplies purchased for experimental purposes; and (3) materials or supplies of foreign production authorized expressly by law.

"That notwithstanding any provision of law to the contrary, the heads of the several executive departments and independent establishments of the Government shall, within the limits of the United States, purchase or contract for only articles of the growth, production, or manufacture of the United States, unless the interests of the Government will not permit, notwithstanding that such articles of the growth, production, or manufacture of the United States may cost more, if such excess of cost be not unreasonable: *Provided, however,* That there shall be excepted from the provisions of this act articles or supplies grown, produced, or manufactured outside of the United States if there be no articles or supplies of that kind or of a suitable quality grown, produced, or manufactured in the United States in commercial quantities: *Provided further,* That the findings of the contracting officer under such regulations as the head of the department or independent establishment concerned may prescribe shall be conclusive."

OUR FEDERAL SYSTEM—ARTICLE BY WILLIAM F. MONTAVON

Mr. WALSH of Massachusetts. Mr. President, I ask unanimous consent to have printed in the RECORD a brief but able article by Mr. William F. Montavon, entitled "Our Federal System," which points out the evils and dangers of centralization.

There being no objection, the article was ordered printed in the RECORD, as follows:

[From Catholic Action, January, 1933]

OUR FEDERAL SYSTEM

By William F. Montavon, K. S. G.

Fundamental in our constitutional system—what distinguishes ours from every other constitutional system—is the principle of federalism and the delicate balancing of the functions and powers of sovereignty between two distinct sovereign agencies, the States and the Union, together with the deposit of ultimate sovereign authority with neither of these agencies, nor with all the people, but with the States collectively acting under the Constitution by three-fourths of their number through the process of amendment. Peculiar to our constitutional system is the historic fact that other modern Federal systems have been adopted as a remedy for the evils of centralization; ours had its origin in the demand for the preservation of the identity of individual States faced with the necessity for united action and centralization in matters of common interests which transcend the boundaries of State jurisdiction.

The success of our Federal system, and especially its ability to function smoothly over a people possessing vast and highly diversified resources and an expanding territory, has impressed statesmen in other countries and especially in the Latin American republics. With the exception of the ambitious scheme of Simon Bolivar to unite the so-called Bolivarian republics in the federation of Gran Colombia, which was ephemeral and only partially successful, federation in these systems has been applied as a principle of decentralization in the application of which the federal state is the depository of sovereignty and the individual states retain their status of police provinces with varying degrees of autonomy in matters of local concern.

In our Union, States, which as colonies had enjoyed individual status and had entered a confederation for the pursuit of the war for independence under which their sovereign status was respected, entered into a voluntary compact, adopting a constitution establishing a Federal Government, to which they delegated specified powers over matters of common interest, together with the power to preserve the Union and the republican form of government in the several States. Under the tenth amendment it is provided that powers not delegated to the Union, nor prohibited by it to the States, are reserved to the States respectively or to the people.

This amendment leads to the result that a power such as the power to enact an ex post facto law which is prohibited to both the States and the Union can be exercised only by the States acting collectively through the amending process.

The States are sometimes spoken of as "sovereign States." In a strict sense they are not sovereign. The thought that ours is a confederation of sovereign States perished in the war between the States. Every State, as well as the Union, is subject to the final legal authority of the States of the Union acting collectively under the Constitution by three-fourths of their number.

Our territory has expanded until it embraces half a continent; our population has multiplied; resources have been discovered and developed; with a single exception the Union has preserved peace within its borders for a century and a half. To-day our constitutional system, still enjoying the vigor of youth, is among the most ancient constitutional systems in existence.

Social and economic conditions have changed greatly since the enactment of the Federal Constitution. The States have found it expedient to revise, amend, and even renew their constitutions, readjusting their fundamental law to new and changing conditions. Our Federal Government can no longer be restricted to the function of serving as ultimate arbiter between agrarian communities such as most of the States were at the conclusion of the war for independence. Population has increased and filled the wildernesses. States which never were sovereign have been admitted to the Union and now outnumber the original 13. Great systems of transportation and communication, railways, telegraph, telephones, radio, aeronavigation, arterial highways, have woven a web which has all but obliterated State boundaries.

Industrial, financial, and commercial enterprises transcending State jurisdictions have sprung up. The Federal reserve system, the land-bank system, the home-loan bank system, are semi-public institutions depending on the Union in which State jurisdictions are sacrificed to a new principle of regional jurisdiction. The Interstate Commerce Commission, the Federal Trade Commission, the Federal Commission for the Promotion of Vocational Education, and others are institutions through which the authority of the Union is exercised over matters which not long ago seemed to belong exclusively within the jurisdiction of the several States. The expression "these United States," so eloquent in the Declaration of Independence, has lost much of its significance.

Every extension of the authority of the Union has been defended by its advocates as necessary and in the interest of good government. The invocation of Federal power as a remedy for the alleged and sometimes apparent inefficiency of State governments found a champion in President Theodore Roosevelt. With him the word "national" superseded the word "Federal." "The national power," he declared, "should cover every national need." To him the Federal Constitution was "the greatest document ever devised by the wit of man to aid a people in exercising every power necessary for its own betterment, and not a strait-jacket cunningly fashioned to strangle growth."

History leaves no doubt as to what will probably be the ultimate fate of a highly centralized, bureaucratic Government exercised over a territory as vast as that of the United States. Under such a centralized system it becomes impossible for constituents to exercise effectively their constitutional prerogatives. A governing class develops; government loses its representative character and tends to become absolute; constituents lose confidence and become dissatisfied; disintegration is all but inevitable.

The struggle for the defense and preservation of States' rights has never been entirely absent from the history of the United States. The problem of States' rights is the natural corollary of the principle of federalism and is fundamental in our life as a Federal republic. Democracy grows and becomes strong through functioning. That individual States find it expedient from time to time to readjust their constitutional systems to the changing conditions of social and economic conditions affecting the welfare of their citizens is to be expected. That even the Federal system may require readjustment is equally to be expected. In the process of amending the Constitution provision is made for such readjustment. The danger exists that the States be tempted to abandon the control of the amending process which they have under the Constitution.

Two theories of interpretation have developed, both of which endanger the rights of the several States. One group, with much apparent reason, argues that in delegating powers to the Federal Government the States actually granted by implication every power required in the free and efficient exercise of the delegated powers. This doctrine of implied powers underlies much of the expansion of Federal jurisdiction in our generation. Perhaps the most severe strain to which the doctrine of implied powers has been subjected was the assumption by the Federal Government of jurisdiction over migratory birds as implied in its authority over interstate commerce.

Others argue with less reason that the term "promote the general welfare" in the preamble of the Federal Constitution, coupled with the term "general welfare" as it is used in section 8 of Article I of the Constitution constitutes a general grant of power to Congress to adopt whatever legislation it believes to be conducive to the general welfare of the people of the States. That the preamble itself confers no authority on the Federal Government and that the term "general welfare" used in section 8 is a limitation of the power to tax and not a grant of power is the opinion generally held by authorities on the Constitution.

The powers of the Federal Government can be legally increased only by the amending process, and yet there is little doubt but that powers now exercised by certain Federal bureaus have never been delegated to the Federal Government.

During the Seventy-first Congress Representative BECK, former Solicitor General of the United States and a recognized authority

on the Constitution, in the Committee on Ways and Means, of which he was a member, opposed an appropriation for the so-called "care of mothers and infants" by the Children's Bureau of the United States Department of Labor. Later, on the floor of the House of Representatives, he opposed the bill as it was reported by the committee, but admitted that his opposition would have to be reduced to an argument against the expediency of the legislation because he knew of no recourse whereby the constitutionality of the legislation could be brought to a test in the courts.

On May 8, 1914, the defenders of States' rights suffered a defeat from which they have not recovered. On that day the Smith-Lever Act became Federal law. By this act Congress made an appropriation of Federal funds to be used by the United States Department of Agriculture to aid the States in promoting extension work in agriculture and home economics. Federal funds and Federal lands had in the past been appropriated by Congress for the promotion of education and industry. The act of 1914, however, embodied a principle which had not been embodied in any former appropriation act. All the earlier acts, the per centum grants, the deposit fund of 1833, Federal forest reserve county funds of 1908, all had been grants. The funds appropriated under the Smith-Lever Act were not to be grants to the States but subventions.

In Financial Statistics of the States for 1917, the United States Bureau of the Census makes the following distinction between grants and subventions. It designates as "subventions" those contributions for specified purposes made by the Federal Government to the States, which are granted subject to the formal compliance by the recipient with certain prescribed conditions, whereas "grants" is applied to contributions made without the prior establishment of conditions.

Since 1914 grants are no longer the practice of the Federal Government. Instead of grants which respected the authority of the States and preserved their administrative integrity, there has grown up a vast system of subventions under which recipient States forego their authority, and that of their subordinate political agencies to conduct and manage activities of purely local concern, transferring that authority to some Federal bureau or commission in exchange for a gift of money to supplement their own appropriations. Through the use of Federal subventions for the promotion of education, road building, and agriculture, which with much reason have been referred to as bribes, the rights of the States have been undermined until to-day there is grave danger that the autonomy of the States will completely disappear and that thus the Federal principle upon which our Union stands will be but a historic memory.

Recent Congresses, including the present, have had before them legislation providing for a Federal department of education with a secretary at its head, who would be a member of the President's Cabinet. The doctrine of implied powers has been stretched to cover the establishment of Departments of Agriculture, Commerce, and Labor with their multitude of activities and bureaus. Why, argue the advocates of a Federal department of education, should the schools be without a voice in the councils of the Nation? That this demand for a new Cabinet member was little more than a cloak to shield the demand for increased Federal subventions was apparent in earlier bills. Generous appropriations of Federal funds as subventions to the States under the administration of a Federal Commission for Vocational Education greatly encouraged the advocates of a Federal subvention for the promotion of eduction in general to be administered by a new Federal commission or department.

There has been great opposition to the transfer of control over education from the States to a Federal bureau. The subvention has been omitted from bills recently introduced. There is no doubt but that in a desire for subventions the earlier bills had their origin, nor is there any doubt but that the enactment of a bill from which the subvention has been omitted would result in a transfer of educational activities and authority now exercised by other bureaus, with their accompanying subventions, to the new department, or that these would at once become the nucleus around which a vast system of Federal subventions and bureaucracy would rapidly develop.

In the quaint but expressive language used by former Senator James Reed in opposing the first Federal appropriation for the promotion of vocational education, "the camel's nose is now under the tent." The problem which now confronts those who still believe that local self-government and responsibility are a training camp under the Federal Constitution necessary for the preservation and successful operation of our institutions is how to prevent the camel from driving his master completely out of his tent.

It can not be denied that the advocates of Federal subvention have with reason based their claims on the apparent inability or unwillingness of some States to provide for certain elementary needs which must be provided for if the progress and welfare of the Federal Union is to be preserved. There is only one way in which that argument can be refuted. When the champions of states rights, without for a minute or in the least degree abandoning their defense of the principle of federalism, with equal zeal and perseverance devote themselves to the promotion of efficiency in State and local governing bodies, then we may expect to see the trend to the suppression of State autonomy through Federal subventions brought to an end, and even reversed. So long as State and local governments are willing to surrender their jurisdiction as the price to be paid for Federal subventions the trend toward Federal control and bureaucracy will gain strength and momentum and, unless checked in time, will sweep our whole Federal system into the scrapheap of historic memories.

"ROMAN FINANCIAL HISTORY CITED IN 'CASE' FOR SILVER"

Mr. WHEELER. Mr. President, I ask leave to have published in the RECORD an article appearing in the Washington (D. C.) Sunday Herald of the 22d instant entitled "Roman Financial History Cited in 'Case' for Silver."

There being no objection, the article was ordered to be printed in the RECORD, and it is as follows:

ROMAN FINANCIAL HISTORY CITED IN "CASE" FOR SILVER—PANIC IN THE YEAR CHRIST DIED IS RECALLED; BROKER SAYS VALUES DECLINED AS TO-DAY; ADVOCATES TWO METALS AS REMEDY

(There is an almost universal demand for an increase in commodity prices. Their low level is seen by many people as the cause of the severity and prolongation of the economic crisis into the fourth year of which the country is now entering.

Among several methods proposed to restore prices is the "remonetization" of silver, proposed in a bill pending in the United States Senate, sponsored by Senator BURTON K. WHEELER, Montana.

The following article, prepared by G. Bowie Chipman, Washington resident partner of the New York Stock Exchange firm of Harriman & Co., discusses the proposal in the light of ancient and modern history.)

By G. Bowie Chipman

In the year 33 A. D. two events shook the ancient world. One was the crucifixion of Christ. The other was the great Roman panic. A description of the panic reads like one of our times:

"The important firm of Seuthes & Son, of Alexandria, was facing difficulties because of the loss of three richly laden spice ships in a Red Sea storm followed by a fall in the value of ostrich feathers and ivory. About the same time the great house of Malchus & Co., of Tyre, with branches in Antioch and Ephesus, suddenly became bankrupt as a result of a strike among Phœnician workmen and the embezzlements of a freedman manager."

These failures affected the Roman banking house Quintus Maximus and Lucius Vibo. A run commenced on their bank and spread to other banking houses that were said to be involved, particularly the Brothers Pittius.

These two firms looked to other bankers for aid, as is done in modern days, but an outbreak had occurred among the semi-civilized people of north Gaul, where a great deal of Roman capital had been invested, and a moratorium had been declared by the Government on account of the disturbed conditions.

Other bankers, fearing the suspended conditions, refused to aid the first two houses, and this augmented the crisis. The Via Sacra, the Wall Street of Rome, teemed with excited merchants.

AGRICULTURAL DECLINE

Money was tight for another reason: Agriculture had been on a decline for some years and Tiberius had proclaimed that one-third of every senator's fortune must be invested in lands within the Province of Italy in order to recoup their agricultural production.

Publius Spinther, a wealthy nobleman, was at that time obliged to raise money to comply with the order, and had called on his banker, Balbus Ollius, for 30,000,000 sesterces, which he had deposited with them. This bank immediately closed its doors and entered bankruptcy before the prætor.

The panic was fast spreading throughout all the Province of Rome and the civilized world. News came of the failure of the great Corinthian bank, Leucippus' Sons, followed within a few days by a strong banking house in Carthage. By this time all the surviving banks on the Via Sacra had suspended payment to depositors.

Two banks in Lyons next were obliged to suspend; likewise another in Byzantium. From all provincial towns creditors ran to bankers and debtors with cries of keen distress, only to be met with an answer of failure and bankruptcy.

An appeal was made to Tiberius, who temporarily suspended the processes of debt and distributed 100,000,000 sesterces from the imperial treasury to the solvent bankers to be loaned to needy debtors without interest for three years. Following this action the panic quieted.

The foregoing reads like the history of our present depression. The city of Rome and its environs at that time was estimated to have a population of 8,000,000 people, and the wealth of Rome was in excess of $1,600,000,000.

DID NOT STOP DECLINE

As stated above, following the action of Tiberius, the panic subsided, but it did not stop the decline which took place in the greatness of the Roman Empire. Rome shrank gradually to 40,000 people, and the wealth of the empire declined to the equivalent of $200,000,000. Of course, this took a number of years, but the investments made in North Gaul and the projects which the bankers had entered into were not of a nature which should have caused this decline.

The shrinkage in credit or wealth was the cause, and the conditions to-day in the United States, because of the continued decline in commodity prices, and the great shrinkage in the wealth of the country, are not dissimilar.

The question naturally asked is: How can we arrest this decline and bring back normal conditions, not only in this country but throughout the world, the wealth of which has also decreased in an even greater proportion than has the wealth of the United States?

There are many theories of inflation. The issuing of paper money in the United States will not do it, because the effect will only be within this country and of short duration. Assuming the figures to be correct, that the world's debts are $750,000,000,000 and the debts of this country, of every kind, are $200,000,000,000, and the farm mortgages alone in this country are $9,500,000,000, with an interest charge of $600,000,000 per annum, it takes no mental activity to realize that neither the gold in this country nor the gold in the world is sufficient to support this basis of debt.

SECOND METAL NEEDED

It therefore seems to me that we must add to gold another metal of value, in which half of the world trades and uses as a medium of exchange aside from gold, and that metal is silver.

To add silver to our basic money, which would cause the other nations of the world also to add it to their basic money, is not inflation but a stabilization or adjustment of the metal basis for credit, and is as modern as the Federal reserve act was when it was passed. It would seem that the following figures are pertinent to the issue in question:

For 438 years the production of silver to gold has been 14.15, and the production of silver to gold in the period from 1800 to 1850, both inclusive, was at the ratio of 28 ounces of pure silver to 1 ounce of pure gold. Yet during that period the interchangeability between the two metals was on the basis of 15.7 to 1. In other words, 15.7 ounces of fine silver were interchangeable on an average the world over for 1 ounce of fine gold.

From 1850 to 1875, although there were 6.7 as many ounces of fine silver as there were fine ounces of gold produced in the whole world, the interchangeable ratio during that period for these two metals was 15.5 to 1. In other words, 15.5 ounces of silver were interchangeable on an average the world over for 1 ounce of fine gold.

Just before we changed to a gold basis, in 1873, the production ratio for the world was 8.7 silver to 1 of gold, and still we hear many people say the United States went on a gold basis because of the flood of silver.

BILL BY WHEELER

On January 5 of last year, Senator WHEELER, of Montana, introduced a bill in the Senate known as the Wheeler bill, S. 2487, the enactment of which would reestablish the honest or stable dollar of our forefathers as initiated by them in 1792 and enjoyed by the people of this country to 1873. In my opinion, this is the most important piece of legislation that has been suggested either in the United States or any other country in the whole world since 1873, when silver was demonetized by the United States.

Its enactment would be highly beneficial to all classes of our society and all the rest of the world. It would quintuple the purchasing power of the larger percentage of the world's population, as it would contemporaneously bring the price of silver bullion, as measured in gold, from 25⅜ cents per ounce to a minimum of $1.29 29/100 the world over.

Under the Wheeler bill it is not proposed to purchase silver, but to place the stamp of the United States mint on silver bullion on a ratio of 16 to 1.

To-day the silver-using nations can settle their debts with one-fifth the amount of their commodities that the people of the United States need to settle their debts in their domestic business. A continuation of this condition must inevitably lead to a steady reduction of the high standard of living and wage scale of the United States down to that of China, India, and other silver-using nations. Whereas the enactment of the Wheeler bill, S. 2487, would tend to bring their wage scale and standard of living up to ours in the United States, with the inevitable result that the commodity price level would steadily advance instead of declining as at present.

MESSAGE FROM THE HOUSE

A message from the House of Representatives by Mr. Haltigan, one of its clerks, announced that the House having proceeded, in pursuance of the Constitution, to reconsider the bill (H. R. 13975) making appropriations to supply urgent deficiencies in certain appropriations for the fiscal year ending June 30, 1933, and prior fiscal years, to provide supplemental appropriations for the fiscal year ending June 30, 1933, and for other purposes, returned by the President of the United States, with his objections, to the House of Representatives, in which it originated, it was

Resolved, That the said bill do not pass, two-thirds of the House of Representatives not voting in favor thereof.

The message also announced that the House had passed a bill (H. R. 14199) making appropriations for the military and nonmilitary activities of the War Department for the fiscal year ending June 30, 1934, and for other purposes, in which it requested the concurrence of the Senate.

ENROLLED BILLS SIGNED

The message further announced that the Speaker had affixed his signature to the following enrolled bills, and they were signed by the Vice President:

S. 5131. An act to extend the times for commencing and completing the construction of a bridge across the Ohio River at or near Cannelton, Ind.;

S. 5232. An act to extend the time for completing the construction of a bridge across the Missouri River at or near St. Charles, Mo.; and

H. R. 8750. An act relative to restrictions applicable to Indians of the Five Civilized Tribes in Oklahoma.

HOUSE BILL REFERRED

The bill (H. R. 14199) making appropriations for the military and nonmilitary activities of the War Department for the fiscal year ending June 30, 1934, and for other purposes, was read twice by its title and referred to the Committee on Appropriations.

THE BANKING ACT

The Senate resumed the consideration of the bill (S. 4412) to provide for the safer and more effective use of the assets of Federal reserve banks and of national banking associations, to regulate interbank control, to prevent the undue diversion of funds into speculative operations, and for other purposes.

Mr. KEAN. I have offered two amendments, but as the Senator from Virginia has consented to them, I do not know that it is necessary to discuss them.

Mr. LONG. Mr. President, will the Senator yield?

The VICE PRESIDENT. Does the Senator from New Jersey yield to the Senator from Louisiana?

Mr. KEAN. I yield.

Mr. LONG. Mr. President, I have examined the Senator's amendment, and it looks as if the Senator has drawn a couple of amendments that will take care of some case of which he knows. In other words, he has drawn an amendment that allows the members of the executive committee of an affiliate not to be included as members of the board of directors of a bank. Under the bill there must not be a majority of the board of directors of an affiliate serving as members of the board of any one bank. There must be some particular local case the Senator from New Jersey has fished out for which he desires a remedy. Probably some bank of which he has knowledge has an affiliate which would be affected. My objection to this amendment, I will say to the Senator from New Jersey and the Senator from Virginia, is this: The case is a little bit broader than this, and as I read this language—if I am not taking too much time of the Senator from New Jersey; if so, I will wait until he concludes——

Mr. KEAN. I do not want to lose the floor, Mr. President.

The VICE PRESIDENT. The Senator can only yield for a question without unanimous consent.

Mr. LONG. I only intend to propound a question, Mr. President.

The VICE PRESIDENT. Does the Senator from New Jersey yield to the Senator from Louisiana?

Mr. KEAN. I yield.

Mr. LONG. The clause sought to be amended reads:

(3) Of which either a majority of the members of its executive committee or a majority of its directors, trustees, or other persons exercising similar functions are directors of a member bank.

I am not sure but that would include a man operating a shine stand; that he could not be a member of the board if his shine stand was a subsidiary.

Mr. KEAN. Mr. President, I do not care to argue the question, but I have here a letter from Thomas B. Paton, general counsel of the American Bankers' Association, who quotes a letter from the Kalamazoo Clearing House as follows:

In reply to your letter of December 29 regarding companies whose executive committee is composed of three persons, two of which are directors on the board of a member bank, we find in Kalamazoo that there are 15 such examples.

In actual circumstances as outlined in your letter, two of these are possibilities which may be continued after various companies hold their annual meetings the early part of this year.

The companies involved represent such companies as an industrial bank, a finance company, a chemical company, three or four paper-manufacturing companies, and other lines.

I have here a letter from the Worcester Bank & Trust Co. of Worcester, Mass., in which the writer says that one of the cases which would be affected is that of the State Mutual Life Assurance Co., "a majority of the executive committee of which is made up of our directors."

I have another letter here from the Provident Trust Co. of Philadelphia in which the writer says that the Provident Title Co. and the Provident Mutual Life Insurance Co. both would come under this rule.

I have also a letter from the First National Bank & Trust Co. of Elmira, N. Y., from which I read, as follows:

I know of one lumber company which does business with several banks in this country and abroad which does have a majority of the members of its executive committee who are also directors of the First National Bank & Trust Co. of Elmira. In view of its wide ramifications and its connections it doesn't seem reasonable for that company to be considered an affiliate of the First National Bank & Trust Co. of Elmira. The company to which I refer is the Insular Lumber Co., which has offices in Philadelphia and in Manila, P. I. This company, however, has five on its executive committee, three of them being directors of the First National Bank.

I have here a letter from the First National Bank of St. Paul in which it is said there are several companies there in the same position.

I have also a letter from the Philadelphia National Bank which says the Provident Mutual Life Insurance Co. of Philadelphia is in the same position.

I ask unanimous consent that the letters to which I have referred may be printed in full in the RECORD at this point.

The VICE PRESIDENT. Without objection——

Mr. BULKLEY. Mr. President, what is the request?

The VICE PRESIDENT. The request is that the letters the Senator from New Jersey has been quoting may be published in the RECORD as a part of his remarks. Without objection, that order will be made.

The letters referred to are as follows:

NEW YORK, *January 5, 1933.*

Hon. HAMILTON F. KEAN,
United States Senate, Washington, D. C.

DEAR SENATOR KEAN: Referring to yours of December 16 and my response of December 23, I issued a circular to all the clearing houses in the country in cities of a population of 25,000 or over (about 240), asking for the desired information.

Responses have been daily coming in, and all thus far received (with a single exception) find no situation where a corporation has an executive committee of three, two of whom are directors of a bank. The exception is contained in a letter from the secretary of the Kalamazoo Clearing House Association, from which I quote:

"In reply to your letter of December 29 regarding companies whose executive committee is composed of three persons, two of which are directors on the board of a member bank, we find in Kalamazoo that there are 15 such examples.

"In actual circumstances as outlined in your letter, two of these are possibilities which may be continued after various companies hold their annual meetings the early part of this year.

"The companies involved represent such companies as an industrial bank, a finance company, a chemical company, three or four paper-manufacturing companies, and other lines."

I will be glad to advise you of later information when received.

Sincerely yours,

THOMAS B. PATON.

WORCESTER BANK & TRUST CO.,
Worcester, Mass., January 11, 1933.

Mr. THOMAS B. PATON,
General Counsel American Bankers Association,
New York, N. Y.

DEAR SIR: In reply to your letter to Mr. R. Washburn, secretary of the Worcester Clearing House Association, relative to the possibility of interlocking directors' making companies affiliates of banks, we have canvassed the situation and find that there are two possibilities here of such a ruling's being ridiculous. One is in the case of the State Mutual Life Assurance Co., a majority of the executive committee of which is made up of our directors. The other is a large manufacturing company in which the unofficial executive committee is made up entirely of our directors.

We, therefore, enter our protest against any legislation which would be broad enough to include as affiliates companies which have no relation to banking.

Very truly yours,

C. LANE GOSS, *Assistant Treasurer.*

FIRST NATIONAL BANK & TRUST CO. OF ELMIRA,
Elmira, N. Y., January 11, 1933.

Mr. THOMAS B. PATON,
American Bankers Association, New York, N. Y.

DEAR JUDGE PATON: Mr. Delo turned over to me your circular letter of December 29, 1932. There are a number of local corporations here which would almost but not quite come within the definition of "affiliates" to which you refer. Undoubtedly there are many which do come in that division of which I am not aware.

I know of one lumber company which does business with several banks in this country and abroad which does have a majority of the members of its executive committee who are also directors of the First National Bank & Trust Co. of Elmira. In view of its wide ramifications and its connections it doesn't seem reasonable for that company to be considered an affiliate of the First National Bank & Trust Co. of Elmira. The company to which I refer is the Insular Lumber Co., which has offices in Philadelphia and in Manila, P. I. This company, however, has five on its executive committee, three of them being directors of the First National Bank. I am not sure this is exactly what Senator KEAN wants.

Yours very truly,

S. G. H. TURNER, *Chairman.*

PROVIDENT TRUST CO.,
Philadelphia, January 5, 1933.

PHILADELPHIA CLEARING HOUSE ASSOCIATION,
(Attention Mr. C. H. Batten, manager, 313 Chestnut Street, Philadelphia, Pa.)

GENTLEMEN: Your letter of December 30 is received, inclosing copy of letter from Thomas B. Paton, Esq., general counsel of the American Bankers Association.

Our information is that members of our board of directors are also members of executive committees of other corporations, as queried after in Mr. Paton's letter, as follows:

Provident Title Co.: All of the capital stock owned by Provident Trust Co. Two of the three members, other than officers, of the executive committee are members of our board of directors.

Provident Mutual Life Insurance Co.: All three of the members of the executive committee, other than officers, of this company are members of our board of directors.

Very truly yours,

A. G. SCATTERGOOD, *Vice President.*

THE FIRST NATIONAL BANK OF ST. PAUL,
St. Paul, January 12, 1933.

THOMAS B. PATON,
General Counsel American Bankers' Association,
New York, N. Y.

DEAR MR. PATON: In response to your letter of December 29, making inquiry which has to do with subdivision (3) of section 2 (b) of the Glass bill (S. 4412)—

We find upon careful investigation that we have nine corporations of which the majority of their board of directors are directors of this bank, which is, we believe, the information you wished to have.

Very truly yours,

O. M. NELSON, *Vice President.*

THE PHILADELPHIA NATIONAL BANK,
Philadelphia, January 6, 1933.

Senator HAMILTON F. KEAN,
United States Senate Office Building, Washington, D. C.

DEAR SENATOR KEAN: In reply to a recent inquiry made of this bank for information as to insurance companies, railroad companies, etc., whose executive committee is composed of only three people, two of which constituting a majority, are directors of the board of this bank, your inquiry being made in connection with Glass bill S. 4412, on the subject of "affiliates," I have the honor to advise you that the executive committee of the Provident Mutual Life Insurance Co. of Philadelphia is composed of Messrs. Morris R. Bockius and myself, both of whom are directors of the Philadelphia National Bank, and Mr. Parker S. Williams, who is president of the Provident Trust Co.

Under the provisions of the Glass bill the Provident Mutual Life Insurance Co. would be construed as being an affiliate of the Philadelphia National Bank, which is a perfectly preposterous proposition. The Provident Mutual Life Insurance Co. would also be defined as an affiliate of the Provident Trust Co. The three members of the executive committee of the Provident Mutual Life Insurance Co. above referred to are all members of the board of directors of the Provident Trust Co., and the Provident Trust Co. most certainly can not be accused of having as an affiliate the Provident Mutual Life Insurance Co.

This is the only situation I know of that would come under the affiliate designation of the Glass bill and it shows the absurdity of this section of the bill.

Respectfully submitted.

JOSEPH WAYNE, Jr., *President.*

Mr. KEAN. In addition to that I will state that the Delaware, Lackawanna & Western Railroad has an executive committee of five, three of whom are directors of a national bank. I will say further that I believe the same condition holds true of the Consolidated Gas Co. of New York, and I am sure that any Senator who will inquire into the condi-

tions in his State will find in the different cities and towns of his State hundreds and hundreds of such cases. I think that applies to every municipality in every State in the Union. That is the reason, Mr. President, I have offered my amendment.

The VICE PRESIDENT. Let the amendment be stated.

The LEGISLATIVE CLERK. On page 2, line 23, it is proposed to strike out the words "either a majority of the members of its executive committee or."

The VICE PRESIDENT. The question is on agreeing to the amendment offered by the Senator from New Jersey.

Mr. WHEELER. Mr. President, yesterday morning at the opening of the session the Senator from Virginia [Mr. GLASS] said something to the effect that after my amendment relating to bimetallism had been voted upon he would thereafter move to lay all other amendments upon the table. During the debate on that question yesterday I spoke for only 30 minutes; I was only permitted to speak on the amendment under the unanimous-consent agreement; and then when a number of Senators who were in favor of the amendment had left the Chamber temporarily by reason of illness or otherwise a motion was made to lay my amendment on the table, and consequently all debate was stopped. Because of that situation, Mr. President, I propose this morning to discuss that amendment and to answer some of the statements which were made on the floor of the Senate yesterday with reference to bimetallism, and with reference to my amendment, and to discuss it at some length to-day whenever amendments are offered.

I listened with some interest yesterday, Mr. President, to a statement which was made by the distinguished Senator from the State of Pennsylvania [Mr. REED]. He said:

> First, as to the pending amendment for the remonetization of silver at the ratio, as I recall, of 16 to 1. As I regard it, that is nothing more nor less than an attempt by the United States Government to peg the price of silver as against the entire world.

Then he said:

> I am told, Mr. President, that there are about 250,000,000 ounces of surplus silver in the world to-day.

Think of a man standing on the floor of the Senate and saying that there are 250,000,000 ounces of surplus silver in the world, and then objecting, Mr. President, to the passage of a measure because of the fact, as he says, that we would be flooded with silver. I wish there were only 250,000,000 ounces of surplus silver, but the truth about it is, of course, that nobody knows exactly what the surplus of silver in the world is to-day.

I have contended at all times that it made no difference how much surplus of silver there was in the world to-day any more than how much of a gold surplus there was in the world, if we did not absolutely fix and stabilize the price of gold by having an unlimited demand for it; and all I have asked for is that we do exactly the same thing with silver that we did with gold, namely, to fix and make an unlimited demand for silver at a ratio of 16 fine ounces of silver for 1 of gold. So, Mr. President, because of the ignorance of this body upon this subject, I propose to talk at some length to-day.

Mr. President, the further statement was made by the Senator from Pennsylvania:

> To try to peg the price of silver at $1.25, which is what this amendment would do—

Which, of course, is not what it would do and what it was not intended to do—

> would be just as ineffective in helping any other industry than that of silver mining as was the attempt to peg the price of wheat, which failed so miserably, or to peg the price of cotton, which failed so miserably.

Think of a man standing upon the floor of the Senate and saying that the creation of an unlimited demand for silver by remonetizing silver would simply be attempting to peg the price of it as was done with wheat and coffee in the world market. Is it any wonder, with men understanding so little about these financial problems, that some people in the past few years should have been saying that because a man got rich selling whisky he was the greatest financial genius in the world, and that he was "the greatest Secretary of the Treasury since Alexander Hamilton"?

He says:

> To try to peg the price of silver at $1.25, which is what this amendment would do, would be just as ineffective in helping any other industry than that of silver mining as was the attempt to peg the price of wheat—

And so forth.

Why, Mr. President, if the Senator who spoke only knew the facts he would know that the great mining companies of this country are to-day openly opposed to the remonetization of silver because of the fact that most of them are controlled by the big banking interests in the city of New York; and the Guggenheims, particularly, are opposed to this bill. What they are advocating and what they want is not to have silver remonetized so that it would be a benefit to the farmers and the manufacturers and the working people of the world. What they are seeking to do by legislation which is pending in Congress at the present time is to do just exactly what the Senator from Pennsylvania says. They are trying to peg the price of silver so that they can reap some benefit from it.

For instance, take the Pittman Act, which was passed a few years ago, which specifically provided for the purchase of silver produced by American producers at $1 an ounce. That, of course, did no good in the world market. That had absolutely no effect upon world commodity prices. That, of course, did not help the farmers of this country. It did not help any considerable number of the workers of this country. It did not have anything to do with increasing to any degree at all the primary money of the world. It was nothing more nor less than a subsidy to a few mining companies in the United States. As far as I am concerned, let me say that if the Guggenheim interests would take their heavy hand off the bill I have introduced in the Senate, if they would take their heavy hand off this legislation, if they would cease their partnership with the international bankers who are opposed to it, this legislation might have some chance to be passed in this session or the next session of the Congress of the United States.

I want to say that I know whereof I speak. There is other legislation pending before this body for the purpose of buying American-produced silver which would not in the slightest degree raise world commodity prices. It would not in the slightest degree add to the primary money of the world. It would not in the slightest degree raise commodity prices, for which we are all speaking here. But because the advocates of that legislation know that the great mass of the people of this country want more primary money, they think that under that guise some legislation which would be of benefit to the mining interests of this country might be passed, and thereby stop any legislation which would be for the real benefit of the people of this Nation and of the world at large.

The tactics of those who have been opposed to the remonetization of silver have always been similar to what they are to-day. They have always been saying, "Put it off; put it off until such time as we can call a world conference," knowing very well that the great international bankers of the country will not permit any substantial increase in the world's primary money if they are able to prevent the conference from so doing.

The Senator from Pennsylvania goes on to say:

> We would give a great bonus to the miners of silver, and naturally their industry would prosper out of all proportion to the rest of American business; we would be giving a great cash bonus to India and perhaps to China.

Why does not the Senator say that when we monetize gold we are giving a great bonus to South Africa, because they are the largest producers of gold in the whole world? Why does he not say that when we fix the price and peg the price of gold we are giving a great bonus to Great Britain, because they are the producers of gold? The fact of the matter is that no child who has ever studied the economics

of primary money would for one minute have the temerity to stand upon this floor and say that by reason of the fact that we remonetize silver we would be giving any bonus whatsoever to China or to India. Instead of that we would be doing something for the manufacturing classes of this country who are now suffering by reason of the fact that Japanese-manufactured goods and Chinese-manufactured goods and Indian-manufactured goods are coming into this country and flooding the markets. We would do it by reason of the fact that we would quintuple the value of their money, and when we quintupled the value of their money we would thereby quintuple their cost of production; and when we quintupled their cost of production we would make it impossible for the manufacturers in Shanghai, China, for the manufacturers in Bombay, India, for the manufacturers in Hong Kong, for the manufacturers in Tientsin, for the manufacturers in all of the Chinese industrial centers to dump their products here in competition with American-manufactured articles.

I am sure that if the distinguished Senator from Pennsylvania would go back and consult some of the manufacturers of his State, who are now suffering by reason of importations of Chinese and Japanese and Indian and other manufactured goods, who are having to close down their factories and throw millions of people out of work in Pennsylvania and other places; if, instead of following Mr. Mills, instead of following some of these men who claim to know all about money, he would take the time off and consult with some of his manufacturers, he would find out that the remonetization of silver would not help just a few mining people in this country, because silver is only a by-product. It is only a by-product of lead and other metals, and the help that its remonetization would be to the great mining industry of this country is only infinitesimal compared with the tremendous help that it would be to the cotton manufacturers of this country, to the tremendous help that it would be to the manufacturers of automobiles in this country, to the tremendous help that it would be to the manufacturers of clothing in this country, to the tremendous help that it would be to the farmers who produce cotton and who produce wheat in this country.

Is it any wonder that the great American people are suffering as they are to-day, when we find such an appalling lack of information and lack of knowledge as we find on the part of Members of the United States Senate who have the temerity to stand up here and inferentially charge that those who are voting for bimetallism are doing so in the interest of just a few mining companies, when I say to you that every great mining company that I know of in the United States is opposed to this bill because of the fact that they are so tied up with the international bankers that they do not dare, even if they wanted to do it, to come out in favor of the bill which would incidentally help them, but which would tremendously help the farmers, the workers, and the manufacturing classes of this Nation?

Mr. LONG. Mr. President, will the Senator yield to me for a question?

Mr. WHEELER. I yield.

Mr. LONG. A great deal was said here yesterday about the sacredness of contracts. I wish to ask the Senator if he remembers, when the gold dollar became depreciated along about 1919, and silver went up, whether these very same constitutional authorities did not contend then that contracts made by governmental agencies could not stand in the way of the power of the Government to regulate to meet the change of conditions?

Mr. WHEELER. The change was made in 1873, when we demonetized silver. You may search in vain, if you will, through the speeches that were made upon the floor of the Senate by those who were in favor of monometallism; or, in other words, in favor of a single, gold standard; I challenge anybody here to find anyone who stood here then and said that by demonetizing silver we were interfering with the sacred right of contract.

Then I want to call your attention to the statement of another distinguished gentleman on the floor of the Senate, and I am sorry he is not here, because I can not find in the RECORD this morning the statement which is credited to him in the morning newspapers. It says:

GLASS bitterly denounced—

I am quoting from the Washington Herald of Wednesday, January 25, and I was not in the Chamber to hear these remarks—

GLASS bitterly denounced the silver proposals, declaring they would depreciate American currency and make it as "worthless as wall paper."

"Make it as worthless as wall paper"!

Mr. THOMAS of Oklahoma. Mr. President, will the Senator yield for a quorum call? I think the leaders of the Senate and the proponents of this bill should be given a chance to be on the floor.

Mr. WHEELER. Oh, Mr. President, they do not care to be on the floor.

Mr. LONG. Mr. President, I have understood—I have only secondhand information on the subject—that the Senator from Indiana [Mr. ROBINSON] intends to bring into the discussion on the floor of the Senate this morning something about the war-debt status of the President elect. If that is true, I think we should have a quorum called to get our Democratic leaders here.

Mr. ROBINSON of Indiana. Mr. President——

The VICE PRESIDENT. The Senator from Montana has the floor.

Mr. WHEELER. I should prefer not to yield at this time.

The VICE PRESIDENT. The Senator declines to yield.

Mr. ROBINSON of Indiana. Mr. President, may I say to the Senator that I had no intention of trying to interrupt him to say what I have in mind to say. I intended waiting until he had concluded his remarks.

Mr. WHEELER. Now, Mr. President, I want to call attention to this statement appearing in the Washington Herald, where it says:

GLASS bitterly denounced the silver proposals, declaring they would depreciate American currency and make it as "worthless as wall paper." He said the silver question had no place in his bill, designed to make sweeping banking reforms.

"Make it as worthless as wall paper"! Is it possible? I can not conceive and I can not believe that the distinguished Senator from Virginia [Mr. GLASS], with all his vast experience and training, would have ever uttered the statement that was credited to him by the Washington Herald, for the reason that for something like 80 years we had in this country bimetallism. It is not anything new, and our money did not become "as worthless as wall paper." But let me say to the Senators on the other side of this Chamber, let me say to those who are opposed to this conservative method of inflation or deflation, whichever you may call it, that they will come either to bimetallism or to paper in the coming sessions of Congress.

As far as I am concerned, I do not want to see this country accept fiat money. I do not want to see us have to go through the experiences that Germany went through. I do not want to see the creditor class of this Nation wiped out as they were wiped out in Austria and in Russia. I am pleading not to exploit the creditor class, but I am pleading to stop the exploitation of the debtor class by the creditor class at this very moment.

I am pleading for the adoption of some safe, sane, conservative method of bringing up commodity prices, so that the farmer can pay back what he borrowed with money of value equal to that of money at the time he borrowed, in 1926 and 1924. I am pleading to give purchasing power to the untold millions of people in China, in India, and in various other parts of the world, so that our great manufacturing plants may be opened up, so that the mill workers in Lowell and Haverill in my own home State of Massachusetts may have employment, so that the mill workers down in North Carolina, the home of the distinguished junior Senator from North Carolina [Mr. REYNOLDS], who does me the honor to listen to what I am saying, will be able to compete in the world market with the cotton manufacturers of Shanghai. I am pleading so that the cotton

workers in the State of Georgia and the cotton workers throughout the South may not be thrown out of work, so that their living standards may not be driven down, so that children will not have to be worked long hours in order to compete with the coolie labor and the depreciated currency in Tokio and in Shanghai.

Mr. President, I am also pleading for the lumber manufacturers of the Northwest, so that their products will not have to be dumped upon the world market in competition with the lumber coming from silver-using countries.

Mr. President, the struggle now going on in the United States is not only one between debtor and creditor; it is one between the workers and the farmers and the manufacturers on the one side, and on the other, a little handful of selfish banking interests of this country who have in their vaults the money of the whole United States, and who intend to hold it there, and let the whole economic structure fall. Then, with their money, they will be able to go in and buy up and control the business of the country, and the farming industry of the country, and they will be able to more completely get a hold upon the people of the United States than they ever have had in the past.

The debtor wants inflation so that the burden of his debt may be made lighter, while, on the other hand, the creditor class, represented by the banks and mortgage companies, are opposed to inflation and are insisting on their pound of flesh, regardless of the fact that it will force the debtors to pay two and three times the commodity value of that which they borrowed.

Let me say right now, so that my position will not be misunderstood, that I am fully aware that in normal times inflation hurts the creditor class and deflation hurts the debtor class.

In Germany money inflation in 1923 was so great that a letter mailed from Berlin to London bore postage costing 80,000,000,000 marks, which at par would equal $19,000,000,000. I do not want to see anything of that kind take place in this country; but I assert that if this condition continues in the United States among the farming classes that is what we will see.

This depreciation of the German mark had the effect of practically wiping out all debts in Germany, for the reason that as the mark depreciated in value it would still pay mark for mark on debts. Retired college professors were forced to go to the poorhouses, because their retirement allowances, being fixed at a given number of marks, would no longer support them. The same was true of the retired creditor class generally.

The depreciation of the mark led to untold suffering and abject poverty on the part of the retired creditor class of Germany. On the other hand, it removed the burden of debt, without rhyme or reason, from the backs of the debtor class. It completely altered the relationship of debtor and creditor, taking from the debtor obligations which were just and fair and depriving the creditor class of their property and savings.

The German inflation of 1923 and 1924 gave to the debtor class that to which they had no moral right and it took from others their savings, to which they had every right. But the German inflation did not destroy the wealth of the German nation. They as a nation still had their farms, their mines, and their factories. The farmers still raised cattle and grain, and they exchanged these for shoes and clothing. The inflation was simply a shifting of obligations and debt and credit.

In the United States to-day we have a reverse of what happened in Germany following the war. Instead of an inflation like that Germany had, we have a very pronounced deflation. Instead of the debt burden falling from the debtor, as was the case in Germany, we have the debt enlarged and falling on the debtor. Instead of paying off our debts with inflated money, as Germany did, we are called upon to pay our debts with dollars of far greater value than those we borrowed. In Germany the burden was shifted from the debtor class to the creditor class, while in the United States the shift has been from the creditor class to the debtor class. But the end reached, if this policy is followed to its logical conclusion, will be almost identically the same. At times inflation helps the active business man and the manufacturer, if it is not carried too far. Deflation always helps the creditor class, unless it is carried too far. We are at the place to-day in this country where deflation threatens to ruin not only the debtor class but likewise threatens to ruin the creditor class, because if deflation goes much farther securities will be worth nothing, and the result will be that the creditor class will suffer equally with the debtor class.

In Germany the inflation greatly increased property values, as measured by marks, but in reality did not increase values at all; in the United States our deflation has decreased all property in terms of dollars, but in reality there has been no direct decrease in actual value of tangible property. Its depreciation is in relation to appreciated dollars.

The VICE PRESIDENT. The time of the Senator has expired.

Mr. ROBINSON of Indiana obtained the floor.

Mr. LONG. Mr. President, knowing that it has been pretty well understood that the Senator would speak on the war debts, I think our party leader ought to be here, and I ask the Senator from Indiana to permit me to suggest the absence of a quorum.

The VICE PRESIDENT. Does the Senator from Indiana yield for that purpose?

Mr. ROBINSON of Indiana. I yield.

The VICE PRESIDENT. The clerk will call the roll.

The Chief Clerk called the roll, and the following Senators answered to their names:

Ashurst	Davis	King	Sheppard
Austin	Dickinson	La Follette	Shipstead
Bailey	Dill	Lewis	Shortridge
Bankhead	Fess	Logan	Smith
Barbour	Fletcher	Long	Smoot
Barkley	Frazier	McGill	Steiwer
Bingham	George	McKellar	Stephens
Black	Glass	McNary	Swanson
Blaine	Glenn	Metcalf	Thomas, Idaho
Borah	Goldsborough	Moses	Thomas, Okla.
Bratton	Gore	Neely	Townsend
Brookhart	Grammer	Norbeck	Trammell
Bulkley	Hale	Norris	Tydings
Bulow	Harrison	Nye	Vandenberg
Byrnes	Hastings	Oddie	Wagner
Capper	Hatfield	Patterson	Walcott
Caraway	Hayden	Pittman	Walsh, Mass.
Carey	Hebert	Reed	Walsh, Mont.
Connally	Howell	Reynolds	Watson
Coolidge	Hull	Robinson, Ark.	Wheeler
Copeland	Johnson	Robinson, Ind.	White
Costigan	Kean	Russell	
Couzens	Kendrick	Schall	
Cutting	Keyes	Schuyler	

The VICE PRESIDENT. Ninety-three Senators having answered to their names, a quorum is present.

FOREIGN DEBTS

Mr. ROBINSON of Indiana. Mr. President, I do not desire to detain the Senate for any considerable length of time on the subject which I propose to discuss and which is brought forcibly to my attention this morning by the headlines of a story in the Washington Herald. I think it should be brought to the attention of the Senate and the House of Representatives and the country. I think it is a matter of the gravest importance.

I read the headlines first:

Roosevelt opens war debt hearings to all countries that paid on December 15.

Then I read this much of the story:

The State Department announced yesterday on behalf of President-elect Roosevelt that debt negotiations will be held after March 4 with six countries that paid their December installments to the United States.

Secretary of State Stimson, who has already invited Great Britain and Italy to send delegations to Washington, was instructed to extend similar invitations to Czechoslovakia, Lithuania, Latvia, and Finland.

FRANCE LEFT OUT

The defaulters, headed by France, thus were placed in a separate and unenviable category. No provision was made to reconsider their obligations. Officials explained the door would be closed to

them until they pay or make arrangements to square accounts. They must take the initiative.

This procedure was accepted as a direct bid to France and the four other defaulters—Belgium, Poland, Hungary, and Estonia—to step to the cashier's window if they are to expect any favors from the Roosevelt administration.

Debt negotiations will be conducted separately with each country. The British case will be considered first. Others will follow, but the order has not been definitely determined.

So, Mr. President, it is authoritatively stated that we are on the direct road either to cancellation of the foreign debt or at least to reduction. That is amazing, in view of the fact that the entire country, I dare say, 98 per cent of the people of the country, are opposed to any such procedure. I doubt if there is a single Member of this body on either side of the aisle who has not during the past year assured and reassured his constituents time and again that there would be no change in the debt policy, that America would insist on payment of the debts, never any cancellation or even reduction, and that even though these nations defaulted in their payments the American policy would remain the same.

But that is not all, Mr. President. Here is a statement that is positively startling, at any rate to some of us. I think it must have startled everybody in the Senate who thus far has read it, and certainly those on the other side of the aisle and at the other end of the Capitol in the other body of the Congress. I read:

Bullitt, called F. D. aide, sees 80 per cent cut, England reports.

This is a Universal Service news item with a London date line.

Mr. WHEELER. Mr. President, will the Senator yield?

The PRESIDING OFFICER (Mr. FESS in the chair). Does the Senator from Indiana yield to the Senator from Montana?

Mr. ROBINSON of Indiana. I will yield just as soon as I have completed reading this item:

William C. Bullitt, Woodrow Wilson's representative on the special mission to Russia in 1910, has been in London several days on a secret mission in which he is declared to be acting as the "emissary" of President-elect Roosevelt.

Bullitt, it was learned to-day, visited Chequers, Prime Minister MacDonald's official country residence, Saturday, and No. 10 Downing Street, MacDonald's town residence, to-day.

In the same authoritative quarter, which declared Bullitt is the emissary of Roosevelt, it was declared the American told a prominent British statesman that Roosevelt favors a reduction of the British war debt by 80 per cent.

Mr. WHEELER and Mr. SHIPSTEAD addressed the Chair.

The PRESIDING OFFICER. Does the Senator from Indiana yield; and if so, to whom?

Mr. ROBINSON of Indiana. I will yield just as soon as I conclude the reading of this article:

British officials are declared to have been advised from an important quarter that Bullitt's mission must not be made known to the Washington State Department. For this reason they are said to be puzzled as to his exact status.

Located in his London hotel to-night, Bullitt refused to be seen or to comment on these reports.

Then follows additional comment evidently originating here:

Confidential missions are not new to William C. Bullitt.

He performed several secret rôles for President Wilson during and after the World War.

He was a member of the American Peace Commission and later went on a special mission to Russia. He is a writer on international subjects and a stanch advocate of American entry into the League of Nations and other world alliances.

Bullitt is a native of Philadelphia. He favored American recognition of Russia, a policy which caused him to break with the Wilson administration.

The State Department professed to have no knowledge of Bullitt's present secret rôle in London.

I yield now to the Senator from Montana for a question only. I have only 30 minutes and hope the Senator will confine himself to a question only.

Mr. WHEELER. I hope the Senator will not take that statement too seriously, because I can not conceive, having every confidence in President-elect Roosevelt, that he would advocate an 80 per cent reduction or anything of the kind.

Mr. ROBINSON of Indiana. Neither can I, Mr. President, and that is why it was so startling; that is why I wonder that such a statement as that should appear in the press.

Mr. WHEELER. The Senator must not believe everything he sees in the newspapers.

Mr. ROBINSON of Indiana. I yield now to the Senator from Minnesota.

Mr. SHIPSTEAD. A great deal was said during the debate on yesterday about the sanctity of contracts and the right of the Congress to violate the principle of the sanctity of contracts with the debtors. Does the Senator believe that that would apply also to a violation of contracts with the American taxpayers on the question of foreign debts?

Mr. ROBINSON of Indiana. Of course I do. The Senator is quite right. If it will apply in one place, the same rule ought to apply in another place. We must keep faith with the American people.

Mr. President, I do not know whether the President elect has an emissary in London now going back and forth from one European capital to another, undertaking to make agreements with them outside the pale of general knowledge, with reference to transferring this load of indebtedness to the backs of the American people. I hope there is no such emissary doing any such thing.

I wish the President elect would have emissaries going to Chicago, New York, San Francisco, St. Louis, and elsewhere in the United States, using all their talents and all their efforts to bring relief to the American people and to the overburdened taxpayers here. That is the important thing right now. That is where Mr. Roosevelt's agents and representatives can assist most, not only the administration but certainly the American people.

But, Mr. President, there is no doubt in the world that these invitations to the debtor nations to come into conference with American representatives again have only one thing in the world in view, and that is to reduce the debts.

Mr. LONG. Mr. President, will the Senator yield?

Mr. ROBINSON of Indiana. In just a moment. Congress has definitely declared there shall be no reduction. If that is true, I ask what shadow of right has the President elect to set aside a resolution of the Congress of the United States, aye, even before he has been inaugurated into that high office, to set at naught and undertake to undo all that Congress has said shall not be undone. I want to read that resolution and then I shall very gladly yield to the Senator from Louisiana. This was a resolution adopted by both Houses of Congress only last year, and I think unanimously adopted, on this very question.

Paragraph 5 of House Joint Resolution 147 reads as follows:

It is hereby expressly declared to be against the policy of Congress—

To be against the policy of Congress—

that any of the indebtedness of foreign countries to the United States should be in any manner canceled or reduced.

Canceled or reduced—

Nothing in this joint resolution shall be construed as indicating a contrary policy or as implying that favorable consideration will be given at any time to a change in the policy hereby declared.

Mr. President, no language could be plainer than that. Congress has spoken. Congress had the right to speak. There is the resolution the Congress has adopted.

Mr. ROBINSON of Arkansas. Mr. President, will the Senator yield?

Mr. ROBINSON of Indiana. In just a minute. That resolution was adopted, and I say, Mr. President, that being the truth, assuming these debtor nations have taken the initiative in bringing this matter to the attention of the President elect, it was his plain duty to say to these representatives: "Congress has the right to declare the policy of the Nation on this question. Congress has spoken; there is the resolution; my hands are tied until the Congress declares itself otherwise." Congress had in mind at that time the

fact that the American people themselves were bearing burdens the like of which the world has never known; burdens greater than those that Great Britain was bearing or France or any of the other debtor countries. Therefore, the Congress was opposed to transferring this enormous burden from these nations of Europe back on to the shoulders of the American people, forcing thereby the American people to pay the same debt twice, with the enormous interest charges besides.

Mr. ROBINSON of Arkansas. Mr. President——

The PRESIDING OFFICER. Does the Senator from Indiana yield to the Senator from Arkansas?

Mr. ROBINSON of Indiana. I yield.

Mr. ROBINSON of Arkansas. Mr. President, I came in after the Senator from Indiana began his remarks.

Mr. ROBINSON of Indiana. I should like to suggest to the Senator that a quorum call was brought about purposely to enable the Senator to know that I was about to speak on this subject.

Mr. ROBINSON of Arkansas. Well, I was not actually apprised of the fact and have not heard the greater portion of the Senator's remarks. I have been informed, however, that he has——

Mr. LEWIS. May I remind the Senator from Arkansas that there was a meeting of the Committee on Foreign Relations?

Mr. ROBINSON of Arkansas. Yes; the Foreign Relations Committee was in session, and I was attending its meeting at the time the Senator from Indiana took the floor. However, that is, of course, not of the very greatest importance. I have been informed since coming into the Chamber that the Senator has taken some newspaper report as the basis of his very violent declaration.

Mr. ROBINSON of Indiana. Not "violent," Mr. President; I resent that. The other day the Senator suggested something about "cheap politics." Every time anybody says a word in the interest of the American people it is "cheap politics," but if one speaks for Europe or the rest of the world he is "broad-minded." It seems one must go to a naval conference to become "broad-minded"; otherwise he is apt to be narrow-minded. If one speaks for the people of this country or if he defends them or takes their part or seeks to represent them according to his conscience, he seems to be narrow-minded.

Mr. ROBINSON of Arkansas. Mr. President——

Mr. ROBINSON of Indiana. Under these circumstances, I am forced to speak out on this question, and I refuse to listen to any suggestion that my remarks with reference to this subject have been "violent" in any way.

Mr. ROBINSON of Arkansas. Mr. President——

Mr. ROBINSON of Indiana. I yield again for a question.

Mr. ROBINSON of Arkansas. I merely wish to say that I shall take the floor in my own right, and fully appreciating the spirit that the Senator from Indiana has manifested, I shall not interrupt him again.

Mr. ROBINSON of Indiana. Yes. Mr. President, if the Senator will look at the CONGRESSIONAL RECORD of the day when both he and I participated in the discussion of this same subject, he will find my language was much more temperate than his, and I think it will be just as temperate to-day as that of my esteemed friend from Arkansas.

Mr. LONG. Mr. President, the Senator promised to yield to me several moments ago.

The PRESIDING OFFICER. Does the Senator from Indiana yield to the Senator from Louisiana?

Mr. ROBINSON of Indiana. Very well; I yield.

Mr. LONG. I should like to know whether the Senator has taken the time to find out whether Mr. Bullitt's representations had any authority from the President elect or not.

Mr. ROBINSON of Indiana. I was just coming to that. I think Mr. Roosevelt now should take the American people into his confidence on this question. I think Mr. Roosevelt now should tell the American people whether this story is true or false. I do not think he should leave it to the Senator from Arkansas, Mr. President, to make any statement on that question. I think an authoritative statement from the President elect himself, from his own lips, is now due the American people. Is Mr. Bullitt his representative, or does Mr. Bullitt correctly represent him when he tells the London officials and the officials of other capitals of Europe and the rest of the world that he thinks Mr. Roosevelt favors an 80 per cent reduction of the British debt? I should like for Mr. Roosevelt to answer that, and I think now the time has come. In any event, Mr. President, we have declared our policy.

I inquire how much time have I remaining?

The PRESIDING OFFICER. The Senator has 12 minutes.

Mr. LONG. A point of order, Mr. President.

The PRESIDING OFFICER. The Senator will state it.

Mr. LONG. The Senator has another hour on the bill if he wants to talk an hour longer, has he not?

Mr. ROBINSON of Indiana. I think I have used some of my time on the bill on other occasions.

Mr. President, the Baltimore Sun, I think, is a Democratic authority; I do not think anyone questions its Democracy. That newspaper, I think, is frankly for cancellation; certainly for revision and reduction. But that newspaper insists on being forthright, out in the open; for what it stands, it stands plainly and frankly, and it decries all effort to beg the question or deceive the people on the part of anybody else. Yesterday there appeared an editorial in that paper from which I quote the following:

> The effort, which has been assigned to those close to Mr. Roosevelt, to establish a connection between war-debt reduction and some British action toward stabilization of sterling is thoroughly deceptive and should not encourage hope in anybody.

"Should not encourage hope in anybody"!

Mr. President, what kind of a quid pro quo can America get from Great Britain excepting that sort of a suggestion which comes according to the Baltimore Sun from those close to Mr. Roosevelt? Outside of that what else could America hope to get? There is nothing else at all, and the Baltimore Sun very frankly says this is not feasible. It says there is not a chance in the world of trading with Great Britain and inducing her to go back on the gold standard just to have her debts canceled; and if there is no opportunity for that, there is nothing in the way of a quid pro quo for the American people in return for reducing or cancelling the debt. I read again the words of the Sun.

> The effort, which has been assigned to those close to Mr. Roosevelt, to establish a connection between war-debt reduction and some British action toward stabilization of sterling is thoroughly deceptive and should not encourage hope in anybody.

They use the word "deceptive"—just throwing up a smokescreen. "Deceit"—that is the word used by the Baltimore Sun. I quote further from the same editorial:

> Britain went off the gold standard because the balance of payments against her was too heavy. She can resume the gold standard when trade conditions are reestablished in a manner to make possible an equitable balance. She can not, in negotiations on war-debt revision, give a rigid promise to stabilize the pound or go back to the gold standard, for the simple reason that the pound must "find its level" before such action can be taken. If the action were taken before this level is established in actual trading experience, Britain would run a strong risk of being back where she was in the summer of 1931, when she had to borrow from France and America in order to meet her obligations in gold.

So, Mr. President, that explodes all that, and it is exploded by a Democratic newspaper and one that is thoroughly orthodox—the Baltimore Sun—and it is done editorially; it is their editorial opinion. I quote further from the same source:

> Our statesmen, of the outgoing and incoming administrations, have brought themselves to recognize that revision, if not outright cancellation, of the war debts is in our own interest.

We all know what they are standing for.

Mr. President, there is no politics in what I am saying. There was not any politics in my remarks the other day. Congress has spoken on this question. I am trying to defend the Congress of the United States and see that its rights

are not usurped. That is the whole question; but I recognize, Mr. President, that whenever one undertakes a task of this kind in these latter days of internationalists, who are springing up on all sides, the moment one stands up for the American people and their interests he is instantly dubbed a demagogue; but if he stands up for Europe, he is "broad-minded." Sometimes some of our representatives go to Europe on missions; they go over there and see the situation; and after they have been there a while, they seem to come back "broad-minded"; but when they are "broad-minded," that means "European minded" in this instance, international minded, not American minded. I prefer to continue to be of American mind. You may label that, Mr. President, what you choose. In any event, there is no politics in what I have said. I am trying to say a word for the Congress and for the people of the United States of America who have borne and who are still bearing these enormous burdens and many others besides.

Mr. WAGNER. Mr. President, will the Senator yield to me for a question?

The PRESIDING OFFICER. Does the Senator from Indiana yield to the Senator from New York?

Mr. ROBINSON of Indiana. I yield.

Mr. WAGNER. I have been trying to ascertain just what the attitude of the Senator is in regard to this matter. Does the Senator take the position that the President or President elect should not even entertain proposals or conduct negotiations by which foreign governments may be able to present their case to the representatives of the United States? What I have in mind is this: I agree with the Senator as to the legality of these debts; and, if economic conditions permitted, I say they ought to be paid; I do not concur in the sentimental side of this question at all; I think the debts were properly incurred and ought to be paid; but there is, as the Senator appreciates, an economic situation involving the question of international trade and the question of transfer of either gold or goods.

If there are obstacles or difficulties in relation to that, is it not fair that the other governments should be permitted to present their case to us and then, after their evidence is presented, we ought to weigh it as to whether they are justified or not and whether our attitude ought to remain as it is or ought to be changed after an ascertainment of the facts?

Mr. ROBINSON of Indiana. I can answer the Senator, I think. When they in negotiations present their side for the reduction of the debts—and that, or a revision of the debts, is what it amounts to; they look to revision or reduction or cancellation and nothing else, and all of us understand that, any schoolboy can understand that that is what they are looking to—upon that question I suggest to the Senator from New York that the Congress of the United States has spoken definitely and positively and declared its policy and has said that nothing of that kind may be accomplished. It seems to me that the President of the United States who actually is vested with authority, to say nothing of a future President of the United States who thus far has not been invested with authority, should say to the debtor nations, "Until the Congress changes its policy on this question there can be no discussion of revision or of cancellation." And that could all be handled, may I say to the Senator, through the regular channels, the embassies and the legations, without all of the furor about it or without any suggestion being made that the debts will be canceled.

Mr. WAGNER. Mr. President, will the Senator yield further? Then I take it that the Senator merely objects to the form the negotiations are to take?

Mr. ROBINSON of Indiana. No; I made that plain the other day. It is not a question of the form. Otherwise, why should Congress declare a policy? If it is only a scrap of paper, and means nothing, why declare it?

Mr. BARKLEY. Mr. President, will the Senator yield there?

Mr. ROBINSON of Indiana. Yes; I yield.

Mr. BARKLEY. Of course, it does not commit Congress to anything simply to sit down and talk about a debt. Congress declared its policy by adopting the debt settlements which were adopted some years ago as the result of negotiations carried on between a commission created by Congress and the debtor nations. Those debts were brought back with certain reductions and readjustments, and Congress adopted the plan which, of course, is the last declaration of Congress on the subject, except that when the 1-year moratorium was proposed and adopted in 1931, I think a part of the joint resolution carried with it the suggestion, at least, that no further moratoriums should be granted except by permission of Congress.

Mr. ROBINSON of Indiana. No; not a moratorium. Shall I read the joint resolution to the Senate? Not a moratorium:

> It is hereby expressly declared to be against the policy of Congress that any of the indebtedness of foreign countries to the United States should be in any manner canceled or reduced; and nothing in this joint resolution shall be construed as indicating a contrary policy or as implying that favorable consideration will be given at any time to a change in the policy hereby declared.

Congress declared that policy. Only Congress can change it.

The PRESIDING OFFICER (Mr. FESS in the chair). The time of the Senator from Indiana has expired.

Mr. BARKLEY. I agree with the Senator that only Congress can change it; but how is Congress to obtain any information?

Mr. ROBINSON of Indiana. My time has expired. Is the Senator proceeding in his own time?

Mr. BARKLEY. No; I am asking the Senator to yield.

The PRESIDING OFFICER. The time of the Senator from Indiana has expired.

Mr. BARKLEY. May I be recognized?

The PRESIDING OFFICER. The Senator from Kentucky.

Mr. LEWIS. Mr. President, I take the liberty to suggest to the Senator from Kentucky that he give a moment to the Senator from Indiana to reply to what the Senator from Kentucky asked.

Mr. BARKLEY. I do not want to ask any extension of time. If the Senator wants to speak in his own right, I will not insist on recognition.

Mr. LEWIS. Mr. President, I would not have the Senator from Kentucky disturbed or taken from the floor. I rose to occupy the floor in my own time, but the Senator from Kentucky was ahead of me.

Mr. BARKLEY. No; I was not asking for recognition before the Senator from Illinois. I did not know the Senator was up. I will defer to the Senator from Illinois and will ask recognition later.

Mr. LEWIS obtained the floor.

Mr. ROBINSON of Arkansas. Mr. President——

Mr. LEWIS. Mr. President, I recognize that the Senator from Arkansas [Mr. ROBINSON], the leader on this side, had risen to occupy the floor and had a right to assume that he would be recognized at once. I therefore yield to him, and after he has occupied the floor will dare to ask for recognition again.

Mr. ROBINSON of Arkansas. Mr. President, it is not my intention to consume very much time in the discussion of the subject brought forward by the Senator from Indiana [Mr. ROBINSON].

I was somewhat surprised to find the frame of mind that the Senator from Indiana displays. He is complaining about the furore, as he expresses it, over this subject of international debts.

If I were disposed to retaliate for the language that he used concerning myself, I could point out that there has not been a more absurd display of what some might term intellectual fury than that exhibited by the Senator from Indiana this morning. He has read into the RECORD a press report which assumes to state that a gentleman by the name of Bullitt, who during the World War period was reputed to have acted in a confidential capacity for the then President

of the United States, Woodrow Wilson, has presented himself to the Prime Minister of Great Britain and is serving as a confidential agent for President-elect Roosevelt, and that Mr. Bullitt is reputed to have said that President-elect Roosevelt is committed to an 80 per cent reduction of the British debt.

To any other mind than that of the distinguished Senator from Indiana the absurdity of his position would be apparent. He grows excited and denunciatory, he denounces the President elect, upon a mere newspaper rumor, for what he alleges is in the nature of a conspiracy to override the will of the Congress.

Among the incorrect and wholly inaccurate statements made by the Senator from Indiana is the declaration that Congress having declared a policy respecting international debts, it is "almost criminal" for the President or for the President elect to carry on negotiations concerning that subject.

Everyone but the Senator from Indiana knows that one Congress does not and can not bind a future Congress to the extent of preventing the repeal of legislation or the modification of policies declared in resolutions. That is so axiomatic that it ought not to be necessary to state it in this presence.

The Senator from Indiana is entirely wrong when he assumes that it is "almost criminal" to carry on negotiations concerning war debts. It was pointed out the other day, in the record that he himself made, that the British Government had requested an opportunity to discuss this subject; that it was pressing for consideration of the subject because of the short time that would elapse between the 4th of March and the next maturity on its contract.

Mr. President, the Senator from Indiana may rave all he pleases. He may declare that Senators who attend, as the representatives of their Government, international conferences, and who attempt to discharge their duties with all the intelligence and integrity that they possess, are, by reason of their action, placing themselves in opposition to the people of the United States whom they primarily represent; but I do not believe any intelligent person not a Member of the Senate of the United States would take such a position.

Mr. President, it is not argument that the Senator from Indiana makes. It is inflammatory, declamatory, denunciation. His statements are unjustified, and, in my judgment, are not calculated to inspire confidence in the Senate of the United States in so far as he assumes to reflect the views of the Senate.

President-elect Roosevelt is coming into responsibility as Chief Executive of the Nation under very great difficulties. We all realize that his predecessor is retiring under very great difficulties. We realize that in order to restore confidence in the minds of our own people, and strengthen our own economic, industrial, and financial institutions it is necessary for those in authority to speak truthfully and to speak with information; and when a Member of the Senate of the United States undertakes to inflame the passions and prejudices of the people of the country by giving credence to reports that have not been authenticated, by resorting to declarations that are not just, he is not performing a patriotic service; and, so far as I am concerned, he does not represent the true spirit of the American people.

Mr. ROBINSON of Indiana. Mr. President, will the Senator yield?

Mr. ROBINSON of Arkansas. I decline to yield to the Senator from Indiana. The Senator from Indiana declined to yield to me. I should be disposed to extend him every possible courtesy; but in view of his personal references to me during the course of his remarks, and his refusal to yield to me, I think it is a pretty clear indication of the temperament, the disposition, and the character of the Senator from Indiana when he presumes to ask me to yield to him after being deliberately discourteous to me.

Mr. President, I do not wish to be discourteous to any Member of this body. I said the other day that the Senator was playing cheap politics. That language might be construed to be discourteous; but I make the statement now, upon the basis of the action and declarations of the Senator from Indiana this morning, that he is playing the cheapest politics I have ever known to be played in the Senate of the United States. He is seeking to impair the usefulness, to weaken the arm of the next Chief Executive of this Nation by undermining the confidence of the public in the integrity of his purpose.

The Senator disclaims a purpose to play politics. Then what is his purpose? There is no question before the Congress involving the issue of international debts. Neither the present Executive nor the future Executive has taken any action which injects that issue here. It is the Senator from Indiana, the self-constituted representative of all the American people, the sole spokesman for the righteous and the just, who presumes to tell the Senate of the United States and the people of the country that President-elect Roosevelt is betraying their cause and acting wrongfully.

Mr. President, this issue is one of importance. It involves a question of international relations. It may come to the Congress of the United States. If it does come, the Congress will then have the option of reaffirming its former resolution or of modifying its declaration of policy to meet the requirements of what may appear to be justice and necessity.

I would not have anyone assume from what I have said that I have any bitterness of feeling because of the strange and unaccountable conduct of the Senator from Indiana. I extend courtesy to every Member here who is willing to accord me the same privilege and right that I extend to him.

The President of the United States, Mr. Hoover, in his message to the Congress, transmitting certain questions which have arisen during the past few days in connection with the war debts, in his message of December 19, 1932, concluded the message with this declaration:

> The situation is one of such urgency that we require national solidarity and national cooperation if we are to serve the welfare of the American people and, indeed, if we are to conquer the forces which to-day threaten the very foundations of civilization.

Mr. President, that is not the declaration of President-elect Roosevelt; it is the declaration of the President of the United States, Mr. Hoover, and that declaration means that there exists a condition, a state of affairs, which calls for cooperation on the part of those who are sincerely interested in the welfare of the United States.

Throughout the last two years we on this side of the Chamber have given that cooperation. We have gone to the extent of supporting measures presented by the administration which, in our judgment, were sometimes of questionable value and importance. But there is a fundamental principle of right and justice underlying the statement I have quoted, and that is that in times of great national emergency, when international questions of far-reaching significance are involved, patriotic citizens and patriotic public officers let their partisanship cease at the water's edge, and present a solid and a united front in an effort to work out the problems of the Nation; and it is poor politics to undertake to instill into a situation such as that which we all know exists pertaining to the subject of international debts, prejudice based on unauthenticated newspaper reports.

Mr. LEWIS obtained the floor.

Mr. ROBINSON of Indiana. Mr. President——

The PRESIDING OFFICER. Does the Senator from Illinois yield to the Senator from Indiana?

Mr. ROBINSON of Indiana. If the Senator will do me the courtesy to yield to me for about two minutes, I will appreciate it.

Mr. LEWIS. I yield to the Senator from Indiana on his request.

Mr. ROBINSON of Indiana. Mr. President, I want to say only a word, in justice to myself, after this tirade from the Democratic leader on the other side. I have always treated him with the greatest courtesy, but I did not care to have him abuse me in my own time, so when he started to make statements about my "violence" here to-day, after I had courteously yielded to him, I resented it, and in my own time made it known that I resented it.

I decline to be muzzled as a United States Senator. I represent a constituency here, a great State of the Union, and I decline to be muzzled. As long as I am here, I shall speak for the people I represent, whether the Senator from Arkansas speaks for his or not.

Furthermore, Mr. President, I decline to admit the right of the Senator from Arkansas to lecture me as to my duties here as a United States Senator. Nor do I accept at 100 per cent of true worth his statement that those on the other side of this Chamber have so thoroughly and patriotically supported the Republican administration which has been in power during the past four years.

I do not always agree with the President of the United States. I have not hesitated to disagree if I thought a certain policy was not in the best interests of all the people. But in justice to Herbert Hoover let me state a thing that already is known to all, that scarcely was he inaugurated when a press bureau was established in this city by the Democratic National Committee almost across from the White House, a poison bureau, which poisoned the minds of the American people against Herbert Hoover and everything he undertook to do. That is a matter of common knowledge; everybody knows it.

Statements of Senators on the other side of the Chamber were published day after day and day after day, and Senators over there know that they never wrote those statements; that they were written by the press representatives down in this poison bureau.

Does the Senator from Arkansas think, now that there has been a change of administration, and a representative of his party goes into the White House, that Republican Senators shall be muzzled, that we shall say nothing in criticism of Mr. Roosevelt, even though he flaunts the policy adopted by the Congress of the United States, even though he can not wait until he gets into office before he undertakes to arrange for a revision of the war debts? Does the Senator now mean to say that everybody who disagrees with him and his President elect is perforce a traitor to his country? Can not a man be a patriot and still disagree with Mr. Roosevelt, or with the minority leader on the other side?

Things have come to a pretty pass, Mr. President, when, instead of arguing a question, the Democratic leader gets on his feet and abuses another Senator of the opposition. There was no argument—and I challenge reference to the RECORD—in anything the Senator said against my contentions, not a word of argument, just abuse, that is all; and abuse never won victories. It came near winning one in the last election, but that is the nearest I ever knew of abuse even coming near winning.

I am very grateful to the Senator from Illinois for his courtesy in yielding.

Mr. LEWIS. Mr. President, I pause to look about and see what has become of the Senator from Indiana. Since I might be inclined to make some reference to observations he has indulged, I would prefer that his presence be at the Senate. If a page shall inform him in the cloakroom, I would be content to wait a second until he returns to the floor.

The PRESIDING OFFICER. The Senator from Illinois.

Mr. LEWIS. Mr. President, I am very much moved to note that the charges made by the Senator from Indiana [Mr. ROBINSON] might be taken by those in authority in other nations as representing either the Senate or the voice of the American people. I fear we do not note what the Senator from Indiana seemingly has ignored—that the newspaper articles to which he has alluded are the mere expressions of those gentlemen who must write as quickly as they can, wherever they obtain information which they feel is reliable enough to report to their papers, and that they can be the objects of imposition, as often they have been, and equally misled, by some people who, in a bloated exaggeration of their own importance, fill the reporter with a statement that would apparently magnify their greatness, or give an indication of responsibility they assume which in no wise is justified. But the writer upon the paper has not time to investigate in each instance; he is compelled to report with such rapidity as the conditions will justify, and when the article appears in print it is intended only as a statement of information gleaned by the reporter and presented only for what it is worth.

It will be a very sad day for this body, which is supposed to be a deliberate body, of calm thoughtfulness, some conceded capacity, joining a suspicion of statesmanship, that every time an article should appear in the newspaper it has to be at once taken by a Senator as a statement of a fact, and, as such, to be the object of either complete condemnation of an individual in official authority or the derision of a political party.

Mr. President, too often have we given attention and contributed weight to mere rumor, and before we knew it, in the incautiousness of our conduct, brought in array one element against another upon a basis of complete falsity, doing to this body injustice as a Senate, and to individuals at a distance, who have no power to enter here to reply, a distinct slander.

I regret that the effort of the Senator from Indiana has so weakened his body that he is compelled to restore it from the restaurant at such a length of time at this moment, and that for reasons satisfactory to himself I have not the pleasure to have his presence.

I only want to call to him in particular and to the Senate that does me the honor to hear this observation, that there is a chapter in Dickens where Mrs. Sniffens comes in and says, "I have the most important information. It comes directly from the king." "What is it, Mrs. Sniffens?" "A friend of mine says she is a cousin to a soldier who married the daughter of the general who says he has understood and personally knows the lady who is to be the mistress of the king, and from her he has the information that the king, whenever he shall be such, as he is not yet inaugurated, is going to say—that is, he understands he might say—that is, I am telling you in strict confidence he could say "——

"Well, Mrs. Sniffens, you have said enough. We quite understand." [Laughter.]

Mr. President, it so ill becomes a great body of this kind that its time should be consumed, its serious thought engaged by the bringing forth of declarations in such manner as the eminent Senator from Indiana has found agreeable to indulge. Let us for a moment take a serious conception of what, if this is to continue, it will really mean.

I do not have to inform this body or the kindly spirited gentlemen of the press who report our proceedings that time and time again I have occupied this floor pointing out that there was a secret movement looking to the degradation of our position by covertly imposing upon our confidence, in some form of gathering designated in one instance as an international conference and at another time as an economic meeting, but that its real purpose was to initiate some movement looking either to the reduction, the cancellation, or the confusing of the debts due the United States by a set-off.

But, Mr. President, a spirit of justice must pervade this body as it does the hearts of the American people, and it is to this point I wish to address the attention of the Senator from Indiana or those inclined to similar thought as he has indulged. The present President of the United States has informed the Senate that in the discharge of his high duty he found it agreeable to issue an invitation and have such forwarded to those who are our debtors, or those who are spoken of as the foreign nations, and requested that they meet in a conference, and that that conference should be here in the United States of America.

If there had been a statement anywhere that this conference is for the purpose of reducing debts due us, we would have a specific expression on that point. We have been informed that this conference is for the purpose of readjusting, if such can be, the economic situation of the United States respecting the trade of the world and particularly what we speak of as the tariff. It must be assumed that in extending this invitation, however much many of us may differ from the distinguished President of the United States, his motive was a sincere one. Having had

conferences with the President elect, it being now understood that the invitation has gone forth and that it has been accepted and that perchance delegates are already selected who shall attend or are on their way to meet here in our city, the great Capital of the United States of America. How manifestly of bad manners it would be, if there be no other characterization, that as we invite them to come and expound whatever proposition they may have, in the meantime we anticipate what we say they expect to do and, upon the assumption of the inspiration with which some Member feels he has been visited, proceed to condemn the nations which have been invited and characterize the delegates who shall represent them as violating both the spirit of what will be honorable on the one hand or a just compliance with the invitation on the other.

I take the liberty to say that it is the duty of this body, where there be no evidence as to what shall transpire or what is said to have been offered by this conference, that we wait its appearance or wait expression on the part of those who speak for it to see what proposition they have, and when that proposition has been presented then it will be our opportunity, perchance our duty, to deal with it in this body or through the delegates who of ourselves may represent America.

What I wish at once to raise voice against is the beginning on the part of any Senator or any other person in public life to characterize and condemn the President elect of the United States before he has been initiated in office, and before any expression has come from him, and leave the American public under the impression that that honorable Senator has information which justifies his characterization of the President elect and which on its face appears so impossible, yet remains as a distinct slander upon the official upon the one hand and dishonor to this body on the other.

Mr. LONG. Mr. President——

Mr. LEWIS. For the moment I yield to the Senator from Louisiana.

Mr. LONG. I understand the Senator comes from Chicago, the home of the Chicago Tribune. Inasmuch as the Senator from Indiana appears to have been infuriated by reason of newspaper reports, does not the Senator think he would be the proper person in this body to offer a resolution condemning any Senator who pays any attention to anything he saw in a newspaper?

Mr. LEWIS. I do not know whether the Senator from Louisiana asks if I should be such or does he intimate the Senator from Indiana should be the one?

Mr. LONG. I would like to restate the question. Perhaps the Senator from Illinois did not grasp it. Inasmuch as the Senator from Illinois comes from the home of the Chicago Tribune and inasmuch as the Senator from Indiana has appeared to be infuriated by reason of what he read in a newspaper report, does not the Senator from Illinois think he is the proper person to offer a resolution to condemn any Senator who pays any attention to anything he sees in a newspaper? [Laughter.]

Mr. LEWIS. If the Senator from Louisiana means by the word "he" myself, my answer is that I have not seen where the Chicago Tribune has been brought into this discussion anywhere. It is true I live in Chicago. I have the honor to represent it. I delight to feel its superiority in all directions where anyone pays tribute to it, and that its splendid newspapers, by whatever name, invite the praise of all those who do justice to superiority. Yet I must say that as I am unable to ascertain wherein any one of the Chicago newspapers has been involved; but, hearing the Senator from Indiana read from a paper of Washington City, I rather feel in the language of the law, which the Senator from Louisiana so aptly represents as disclosed in his many constitutional arguments, that the question is what is called "beside the issue." [Laughter.]

Nevertheless I return to say to the Senator from Louisiana that there are times in which every Senator can afford to be admonished not to be too hasty in assuming that what he reads is really a recital of a fact, but to recall that the newspaper writer must act with diligence and report as quickly as he can whatever he obtains lest in delay he might lose his paper the advantage of what is called, in the language of the newspaper world, "a scoop" of the news.

But what I wish particularly to invite to the attention of the Senate is this: If before the President elect is seated, if before he is inaugurated, if before he is authorized to give an official expression, if in face of what he has said to the present President of the United States upon two different occasions, that not having authority or intending to enter with him in the collaboration of some matter suggested of an international character—if in view of the fact the statement has been made by the President elect so clearly everywhere that, until he is inaugurated in office and having authority, he does not assume to speak upon these questions as President, it hardly becomes any Senator to presume at once to characterize some conduct which he may read from a newspaper as intimated or threatened as the action of the President elect, and then call on the President elect, if he should have read the newspaper, to immediately denounce the writer and announce the statement as false, and that it is in the pursuit of his official duty to inform the Senate and America that all matter that will be in any of the newspapers that looks as though it was intimation of conduct on the part of the President elect is in itself a falsehood.

I can not see how the President elect should be called upon that everywhere, where anything appears of any person acting as reported the gentleman Mr. Bullitt appears to be, if the report is correct, that the President elect before he becomes an official shall take upon himself the responsibility of disputing the accuracy of these views and making an issue before the country as to the matter which he can have neither the knowledge whether it is correct, whether the individual has ever uttered the things reported, or whether the reporter has been imposed on by an exaggerated ego which so often possesses gentlemen who have often gone abroad. Some such persons have been authorized by the President and afterwards grow to such fullness that they swell to such glory that they have themselves regarded as the author of all ideas which the President of the United States has ever expressed in conduct.

We have seen some exhibitions of that only lately. There are books extant lately printed and circulated that carry with them the quotation from some of these honored gentlemen who have assumed to represent the President of the United States and America, announcing that but for them there would have been no wisdom on the part of the President, that they were the creators themselves of all ideas and ideals, and that as they began wisdom, then, in the language of Job, "With him wisdom will die."

Mr. President, the thing I press at this moment upon this honorable body is the danger that if we shall continue not merely assuming a rumor wherever we shall see it reported, and charging its responsibility to the President elect where he has no opportunity in the world to present before the country his attitude on the question, as yet, we will educate the public to a prejudice against the President to a point of view that prevents them doing justice. We will teach them how to take every rumor and every report as the specific statement of a proven fact. We will deny to him that confidence that should be both exerted and enjoyed by the American people. We will take from the American people that proper respect and regard that they should have for the office of President.

Such a condition, sir, should very early be prevented by the admonition going to those, whether they be Senators or less than such, that they owe common respect to the office and they owe some duty to the public. At this particular time when the conditions of our country are rather delicate, when as between ourselves and foreign lands there seem to be severely strained relations, when we should do all we can to gather friendships again and revive confidences upon an honorable basis, doing justice to ourselves, but no injustice to others, there should not come from this place, in this very high elevated Chamber of deliberation, in declarations and fevered exclamations which, going out to the foreign countries, will accuse them of conduct unbecoming to hon-

orable nations and unjust to the United States, when those who make the charge have neither proof of it, on the one hand, or evidence anywhere to justify the intimation. By such a course we remove the possibility of those early harmonies so necessary to bring ourselves into accord with the nations of the world upon a basis of justice, to revive our trade, to restore our friendships, and reestablish our Nation in the splendid precedence she has enjoyed in the past and which she has a right to hope shall be her inheritance for the future.

The Senator from Indiana fails to recognize the effect of a declaration that charges the President elect with responsibility of what may appear in the newspapers as being the statement of some person whose identity is not made clear. I do not know who the gentleman, Mr. Bullitt, is. I know the name Bullitt of Philadelphia, a very eminent gentleman at the bar, a high-class lawyer. He is known to me, but I am not so sure who the gentleman named in the press dispatch is. However, this much must be understood now: When it shall become appropriate for the President elect to designate some person as the voice of America, it will not be done by a sly, covert, secret method by naming or designating some individual unknown to the legislative body, the Congress of the United States. It will not be some person who has been named by the President without any knowledge on the part of the officials of the Government. It will be some one designated openly, outwardly, with the approval of the Senate and sent with such commission of authority as this honorable body would approve.

Then, and not until then, will we assume that any person who it is said is the spokesman for the President elect has any authority to act and that any expressions that come from him, if there be any coming such as we speak of in the Latin term as ex cathedra, are unofficial and in his own behalf or official. Until there be some evidence somewhere that the President elect has authorized or ratified such it is unbecoming of us that there should be, upon an imaginary condition, a characterization of the President elect by way of condemnation such as the honorable Senator from Indiana seems to engage in. I trust we will have no repetition of such conduct again, visiting, as it does, consequences upon foreign nations and creating a hostility in their hearts against us, while robbing us of the justice due us.

Let me, in conclusion, say to the Senator it is well that he consider the moral set forth by a great philosopher and writer, that "in haste of expression or conduct we may tickle the ears of groundlings, we make the judicious grieve."

Mr. JOHNSON obtained the floor.

Mr. BARKLEY. Mr. President, a parliamentary inquiry.

The VICE PRESIDENT. The Senator will state it.

Mr. BARKLEY. Is it possible to call for the regular order at this time?

The VICE PRESIDENT. The regular order is now before the Senate. It is the amendment of the Senator from New Jersey [Mr. KEAN], and, under the rules of the Senate a Senator may talk on any subject he desires.

Mr. JOHNSON. And, of course, in accordance with the immemorial custom of the Senate, I shall speak to that amendment.

Mr. BARKLEY. Of course, I would not by any stretch of the imagination want to take the Senator from California from the floor.

Mr. JOHNSON. I am not going to detain the Senate long, however. I give my promise as to that; but there are one or two things that I wish to mention in connection with the discussion that has proceeded so far this morning.

Mr. GLASS. Mr. President——

The VICE PRESIDENT. Does the Senator from California yield to the Senator from Virginia?

Mr. JOHNSON. I yield.

Mr. GLASS. I have no desire in the world to preclude, even if I could, the Senator from California discussing anything that he might please to discuss. I have no doubt that what he has in mind to say will be interesting to the Senate and to the country; but I merely wish to give notice that, if we are to engage in discussions all this day, as we did nearly all yesterday, of problems that have no relation whatever to the pending banking bill, the unanimous-consent agreement under which we are now proceeding is, as I have already indicated, utterly worthless, and I shall again ask the Senate to apply cloture in order that we may reach a determination of this measure.

Mr. LONG. Mr. President——

The VICE PRESIDENT. The Senator from California has the floor.

Mr. JOHNSON. Mr. President, if there could be an inappropriate time that such a suggestion should have been made, it is at this time. This bill has been pending before the Senate for many weeks. I have not occupied a single minute during that time, except yesterday, when I paid a 5-minute tribute to the senior Senator from Nebraska [Mr. NORRIS].

Mr. GLASS. The Senator, of course, understood that I was perfectly sincere in saying that I had no disposition in the world to interfere with anything that he might have to say.

Mr. JOHNSON. I welcome that remark of the Senator, but I think that it might have come with much more appropriateness when the discussion began to-day than now when it concludes.

Mr. GLASS. I agree to the Senator's statement.

Mr. JOHNSON. Mr. President, on the 4th day of January last I expressed myself concerning the meetings which might be held and the conferences which might occur upon the debt question. I stated then, and I now repeat, I do not think it is in consonance with the dignity of my Nation that, like a drunken fishwife or a whispering pawnbroker, we should meet with any people to determine whether we take 5 per cent or 6 per cent or 7 per cent or 8 per cent or 12 per cent of an obligation that is justly due to us. That we should, of course, as a Nation that believes in amity and in friendship, that believes in dealing with all other nations in perfect accord, so far as it is possible to do, listen to any representations that might be made upon any subject, goes without saying, and in that regard I have no objection whatever to any debt negotiation which may be held; but I resent what I hear daily outside of this Chamber and what I read constantly, that one country is going to offer 10 per cent to the United States Government, that some other country is going to offer so much more. Of course, it is done without authority, but nevertheless I can not help feeling a resentment that a suggestion of that character should be made to this Nation and that we should be bargaining and huckstering in that sort of fashion on an obligation that is justly due us.

There is not any doubt, sir, about what Great Britain intends to do. Yesterday, officially, a speech was made by the British Chancellor of the Exchequer. He told, and he told without the slightest equivocation, just exactly what Great Britain intends to do and just what Great Britain will do in the matter of any conference upon debts. I will read a part of the statement made by Mr. Neville Chamberlain yesterday so that we may understand the British position, and, understanding that, we may, if we see fit, discuss that position either upon this floor or otherwise. There is no more appropriate place in the world for a discussion of a subject of this sort than the United States Senate, and there is no individual who has a right to say either to one man or another upon the floor of the United States Senate that he should not discuss a subject that is of paramount importance to the people of the United States and of paramount importance to the Senate and the other House of Congress. Mr. Chamberlain said yesterday:

We believe—

Mind you, this speech was made after consultation with all of his colleagues; made as an authoritative, as a definitive, as an accurate characterization and recital of the position Great Britain occupies upon the debt question.

We believe—

Said Mr. Chamberlain—

the total cancellation of the war debts and reparations would be the best thing that could happen to the world as a whole; but, if

that is going further than American opinion is yet prepared to accept, we shall gladly discuss with our American friends, whenever they are ready to receive our representatives, the lines on which an agreement can be reached, bearing in mind two things which seem to us essential—

It is interesting to me, this marvelous trait of the English nation. I think the English are a wonderful people; I believe there is no man who is more delightful than the cultured Englishman; I admire immensely the Englishman's love of his empire and of his country; but it is a remarkable thing that when he deals with other nations he deals always—no matter whether he be suitor or debtor—in terms of superiority and with a superiority complex. Just follow Mr. Chamberlain's language: We believe thus, he says—and, if our American friends are not prepared to discuss it—

Whenever they are ready to receive our representatives we will discuss the lines on which an agreement can be reached, bearing in mind two things which seem to us essential.

Here are the two conditions annexed to anything that the British Government may agree to with the American Government respecting debts.

First, that the settlement to be reached must be a final settlement.

Well, commenting upon that, I might say that is the exact language used not only by British statesmen but by our own. When we made the debt settlements with Great Britain in this country we used just exactly those words—"it must be a final settlement." The Senator from Utah [Mr. SMOOT], who sits here and who was one of the debt commissioners, nods acquiescence in what I say in that regard. So, first, we are to have another final settlement.

Second, that it must be one which will not involve a resumption of the claim on Germany for reparations, which it was the object of the Lausanne settlement last year to end.

Every declaration that has been made from the United States since 1920 that reparations were a European problem and that debts were an American problem seems to have been lost entirely, and the iteration and the reiteration of our statesmen, the iteration and reiteration of our debt representatives, has had absolutely no effect upon our British brethren concerning the separation of the two problems.

Mr. Chamberlain proceeds:

The Lausanne settlement is the one substantial advance during the last few years in the troubled history of Europe. Not only did it put an end to the uncertainty and anxiety which attended all previous efforts to adjust an impossible situation, but it opened up new possibilities of friendlier feeling between European nations on which might be based more fruitful cooperation in other spheres.

Follow:

It opened up new possibilities of friendlier feeling between European nations.

True. Concede its virtues if you will. What was the Lausanne settlement? What was it that the statesmen of the United States preened themselves upon, walked about on their toes, with their heads in the air, saying: "What a marvelous thing is Lausanne! Lausanne is the greatest advance that has ever been made by the world since 1914!" And then came disillusionment in a few days, when we ascertained exactly what the Lausanne settlement was, because the Lausanne settlement was predicated wholly upon the action of the United States of America concerning the debts that were due to the United States from foreign nations.

They took an obligation which was uncollectible from Germany, with which we had not anything to do; they took that obligation due from Germany to them, and they said, with an appearance of altruism and generosity that deceived all the world for a brief period, that they were going to forgive Germany and only collect a very, very small fraction of the amount due from Germany to the Allies. And then suddenly the lid blew off, and we learned of the "gentlemen's agreement" that the forgiving of Germany was dependent upon the United States of America forgiving their debts! That is Lausanne and the Lausanne agreement that was praised in such unmeasured terms by men in this Chamber and by those who constituted, they said, the statesmanship of the United States.

That must be preserved, says Mr. Chamberlain. That can not be interfered with; and that is cancellation by the United States of the debts due from Europe to the extent that they cancel their reparations due from Germany, so that if they receive, as they say, 1 per cent or 10 per cent of the amount that is due from Germany to them, we are to receive 1 per cent or 10 per cent, as the case may be, of the amount due to us.

There is the English position, and it is stated without the slightest equivocation or evasion.

Mr. DILL. Mr. President, will the Senator yield?

Mr. JOHNSON. I yield.

Mr. DILL. In the light of the reference that Mr. Chamberlain made to a "final settlement," and his linking that with the Lausanne settlement, does not the Senator think that no settlement will be final in the estimation of English statesmen that does not provide for the cancellation which he has just mentioned?

Mr. JOHNSON. Why, of course I think so. There is not any more doubt about it—and I thank the Senator from Washington—than there is that we are here; and it is exactly that that these people in this land, these newspapers that form the American foreign legion, are endeavoring to bludgeon us into during this period of discussion in the United States.

There is not any question on earth that when a man stands here or elsewhere and says, "I believe in cancellation if so-and-so and so-and-so might be done," he is fighting the fight for cancellation; that is all; and when Mr. Chamberlain says, "You can have your settlement of debt solely upon the theory that the Lausanne agreement may be continued," Mr. Chamberlain makes perfectly plain that practically the whole of the debts that are due to us we must cancel in order that there shall be any agreement or any settlement at all.

All right. Britain has a right to take her stand. I admire her for it. But why, why should not America take her stand as well? I prejudge none and I criticize none at this period for negotiations or anything that may occur; but why should we not be able to discuss the proposition that the British Chancellor of the Exchequer discusses, after conference with every man in the British ministry, as the dispatches tell us to-day?

So much for that. Lausanne! They speak of the reparations that they will "lose." Do you know how much they have collected in reparations? Do you realize how much France has collected in reparations, and then kept it all save a very small moiety, perhaps, that she has paid to the United States of America—less than she realized from the sale of material that was sold by us to her? And then for any man in this country to justify France as a defaulting nation seems a travesty upon Americanism and a travesty upon American statesmanship.

Mr. WALSH of Massachusetts. Mr. President——

The VICE PRESIDENT. Does the Senator from California yield to the Senator from Massachusetts?

Mr. JOHNSON. I yield.

Mr. WALSH of Massachusetts. From time to time American statesmen and others and the American press have indicated an attitude of agreement or approval of cancellation or reduction of these debts if arrangements could be made with foreign countries looking toward disarmament, or if plans could be entered into tending to increase our business dealings with these several countries. I inquire from the Senator if any foreign country that is our debtor has at any time initiated or made any proposal looking toward making such arrangements as are proposed by American statesmen?

Mr. JOHNSON. Absolutely none—absolutely none; and how they laugh at us! They have a right to laugh at us when we stand up, you know, and, blithering as we do, beat our breasts and say, "Oh, for disarmament! We will buy disarmament from you by giving the debts that you owe us, or we will buy something else from you." Some people put

it—those who have no sense of national feeling or national dignity—some people put it, "We will buy friendship by forgiving the debts," as if any man on earth ever was able to buy friendship by forgiving a debt! And how they must laugh at our peculiar attitude, and the attitude of some of our distinguished statesmen who talk of buying this or buying that, or buying disarmament, or buying peace, or buying friendship, by forgiving the debts!

What nonsense it is. If anybody can not pay me, aye, let me forgive the debt; but if he can pay and he will not pay, what is the use of talking with him about "we will buy your friendship by letting you have the amount you owe us; we will buy disarmament by you by letting you have the amount you owe us, so that you will have more money afterward to do as you see fit with, and we will put the burden upon our own people"?

But there is one other thing that I want to impress upon you this morning before I close, and that is this:

These foreign legion American newspapers never print the truth of what this thing means. "Cancellation" is a misnomer. There is no such thing. The only question is, Who pays the debt? Keep it in mind—keep it in mind, for these foreign legion American papers absolutely delete it every time it is repeated in the United States.

Who pays? No such thing is there as cancellation. No such thing is there as revision so far as our people are concerned. Who pays? The American taxpayer pays; and he pays every single penny of it, every dollar of it. When you remit a dollar of debt America pays. When you cancel obligations America pays the debt; and as you pay it in increased taxation keep that in mind, for this foreign-legion American press of ours will not publish it; or, if they do, they go into a perfect hysteria of anger in denunciation of the suggestion and divert attention to this abuse from the fact.

Yesterday I put in the RECORD a speech that I want to commend to this body. I do hope that there will be Members of this body who will read it. It was a speech of Dr. Jacob H. Hollander, delivered January 19, 1933, in the city of Washington. It happens that Doctor Hollander is a professor of political economy in Johns Hopkins University, and he may therefore have some weight with these "experts" and "economists" and others who have been crying and weeping and wailing and gnashing their teeth in the endeavor to get us to cancel the obligations that are due us.

I read you just two paragraphs of Doctor Hollander's address; and keep these things in mind, please:

> I believe such advocacy—

That is, advocacy of cancellation—

> involves the gravest consequences—economic, social, and international—to the United States and to the whole civilized world. Economic, because whatever measure of accord society in five centuries of slow progress has reached, is in largest degree assignable to the growth of financial faith between nation and nation.

We stand up, you know, with all of our smug hypocrisy, and say, "We will not recognize Russia because Russia does not keep international faith"; and then we smile sweetly out of the other side of our mouths to those countries that do not recognize international faith when they break solemn treaties, treaties to repay that which saved their national existence, and which was given to them in their hour of need.

We are a peculiar people. Catchwords take us, and we indulge in phrases; but the most astounding situation that presents itself to-day is that in mock indignation we belabor one country for not keeping international agreements and obligations and justify another that is guilty of even worse duplicity. But keep in mind, too, that there is an economic side to this.

Doctor Hollander says:

> It is in this manner that commerce has grown, that undeveloped countries have expanded, that backward States have been stabilized, that international division of labor has spread, that the surplus income of older societies has found productive use in the needs of newer areas. The one factor which has made all of this possible has been the inviolability of economic contract. It has been incorporated in law; it has been accepted in mores. It is the one secure enduring link in economic association. Abandon it, corrupt it, even challenge it, and the economic world falls apart in dissociated nationalism—reluctant and distrustful.
>
> The social menace of cancellationist advocacy is developing with disturbing swiftness before our eyes. The unmistakable appearance, indeed the creeping spread of repudiation sentiment in the United States and in South and Central America—by inflation, by postponement, by cancellation—as to public indebtedness, corporate obligations, mortgage liens, business liabilities—is a direct repercussion of the countenance given to war debt cancellation. If we are able to lighten the burdens of foreigners who are able to pay, why should we not preferentially lighten the burdens of our own citizens who are not able to pay—runs the challenge. If not charity, certainly grace begins at home. It is an amazing thing to me that those in high financial place, with the fullest knowledge of what economic contract means in the well-being of a people—will encourage the project of cancellation abroad, and cry unto heaven at any whisper of repudiation at home.

That, to me, is one of the menaces of this present situation.

Mr. LEWIS. Mr. President, will the Senator yield?

Mr. JOHNSON. I yield.

Mr. LEWIS. May I ask the able Senator from California if he does not concur with me that there is at present no evidence anywhere to be recognized in this body that the President elect has any intention either of canceling or reducing or in anywise compromising the rights of America in these debts?

Mr. JOHNSON. I know nothing to that effect at all, of course; and I am perfectly frank in saying to the Senator, although I yield to no man on the other side of the Chamber in my desire to see the President elect successful in his career and in his administration, that, were his views such as the Senator has referred to, I would take the opposite position as strongly as I could and present it on this floor with such force and such virility as I possess.

Mr. DILL. Mr. President, will the Senator yield?

Mr. JOHNSON. I yield.

Mr. DILL. I just want to read two lines from the Democratic platform in response to the suggestion that Mr. Chamberlain makes, that "when our American friends want to discuss it, we are willing to discuss the subject." I think we ought to reply that we are willing to discuss it also, but with the understanding that all discussion is based upon the assumption that there is to be no cancellation, for the reason that our platform says, "We oppose the cancellation of the debts owing the United States by foreign nations."

I, for one, refuse to believe that the officials of this Government, when the new administration comes into power, will enter into negotiations with any foreign country on any other basis than that there is to be no cancellation.

Mr. ROBINSON of Indiana. Mr. President, will the Senator yield?

Mr. JOHNSON. I yield.

Mr. ROBINSON of Indiana. I desire to make just this observation: I think it is perfectly proper that the President elect should make his position plain on that question, and especially with reference to the newspaper report that Mr. Bullitt is representing him now in England with a statement that an 80 per cent reduction is in the mind of the President elect.

Mr. DILL. Mr. President, I should just like to remark that I think the President elect would do well not to undertake to state his position on any of these subjects until he has been inaugurated and can speak with the authority which will then be vested in him.

Mr. JOHNSON. Mr. President, I did not rise to discuss what either President would do or has done or can do; that was not my idea at all. Nor did I rise to speak in the slightest criticism of any action which might have been taken or which may be taken in the future, so far as that is concerned. I rose because before me was the speech of the British Chancellor of the Exchequer, and it made perfectly certain what the British position is in the matter of any conference in relation to the debts, and that position ought to be made very plain to our brethren during any discussion they have.

I read the excerpt from Professor Hollander's remarks because there is a political economist, not a mere demagogue—this is the common epithet now applied by American for-

eign legion—who sees the danger and the menace just exactly as I endeavored to portray it on the 4th day of January last.

We can not expect a suffering and a hungry people in the United States to view without alarm at least any arrangements by which the debts of Europe should be forgiven, and when a hungry populace in the United States sees this Nation forgiving these debts to the amount of $10,000,000,000 and more, debts owed to the United States by Europe, that hungry populace will answer just as they are answering to-day in the Middle West, where every process of law is beaten down by those who are destitute, in order to preserve that which men have had in the past, and upon which to-day, because of their financial troubles, they are unable to preserve.

When we deal with this subject we deal not only with an economic subject, we deal with a social subject as well, and a social subject which has within it a menace and a danger we would do well to heed.

Mr. ROBINSON of Indiana. Mr. President, does not the Senator think it well to repeat again and again that the debts have been canceled completely, and all that we are asking European nations to pay is a very small rate of interest?

Mr. JOHNSON. Quite so.

Mr. HOWELL. Mr. President, the situation confronting the American people in connection with the war debts due them from the European nations, indeed, calls for a note of alarm at this time. On the other side of the Atlantic our debtors are quite united in their attitude for avoidance of further payments on account of their debts. As one scans the publicity emanating from these European debtors, there is little dissent in the views expressed. Complete cancellation is what is wanted. As a matter of fact, our debtors have been scheming for complete cancellation from a time that dates back to the armistice.

What is the situation in this country? If each will stop and think, the attitude taken—and often in high places—is such as to give encouragement to our debtors that we might ultimately consider forgiving their debts. As a consequence our debtors are persistently maneuvering to accomplish such a result, so, to a degree, in this country we are divided on this question, but Europe presents a solid front with one object in view—an escape from paying what is owing the United States; that is, complete cancellation, the American people to pay these debts, as some one must pay them; if not Europe, then our people. They must be paid by one or the other.

As a logical result of the encouragement which our debtors have received in this country, we find that two days ago Italy requested that the Government of the United States grant a conference respecting what remains of Italy's war indebtedness. If there is one nation which should not make such a request, certainly that nation is Italy. At the date of settlement Italy owed our Government $2,150,000,000. The settlement was upon this basis: The debt of $2,150,000,000 was to be canceled. It was agreed that the American people should assume and pay this $2,150,000,000, and all Italy agreed to do was to help us pay interest on an equal amount of our Government bonds outstanding which properly represent this $2,150,000,000.

What interest have we been paying on this $2,150,000,000? We have been paying approximately 4⅛ per cent. To what extent did Italy agree to help us pay this interest? Italy agreed that she would pay 1.13 per cent—yes; only 1.13 per cent on this $2,150,000,000 for 62 years—then she is to be through. The American people are not only to pay this $2,150,000,000 themselves, but also the difference between this 1.13 per cent, which Italy is to pay and the 4⅛ per cent, at least that is what we have been paying on United States bonds outstanding properly representing this Italian debt.

Mr. President, how much has Italy paid the United States Government since the date of the settlement of Italy's debt, June 15, 1925, down to January 1 of this year? All Italy has paid us, taken together, in the nearly seven and one-half years that have elapsed, amounts to but $41,066,000. Yes; in the seven and one-half years, all Italy has paid on her debt of $2,150,000,000 is but $41,066,000. How much interest have we paid or must we pay on Governmental securities outstanding and properly representing this debt from the 1st day of last July down to the 1st day of January of this year? That interest amounts to about $43,000,000. Yes; during the last six months we have paid $43,000,000 in interest on Italy's debt, and yet all Italy has paid us in nearly seven and one-half years on account of that debt is but $41,066,000.

Mr. LONG. Mr. President——

The PRESIDING OFFICER (Mr. HATFIELD in the chair). Does the Senator from Nebraska yield to the Senator from Louisiana?

Mr. HOWELL. I yield.

Mr. LONG. I do not wish to be understood as taking any side in the debt argument at all, but the debts of all the foreign countries amount to about how many billions?

Mr. HOWELL. At the date of settlement the debts amounted to $12,091,000,000 in round numbers.

Mr. LONG. That is a billion dollars more than all the gold supply in the world?

Mr. HOWELL. I presume that is true.

Mr. LONG. Unless we accept some goods from these countries, does the Senator think it possible we may ever be able to collect from them? With the United States holding from two-fifths to one-half of the gold in this country, leaving only about six billion of gold outside of the American borders, how can these countries pay unless we take some of their goods?

Mr. HOWELL. Mr. President, trade is not merely direct, it is triangular also, and because of triangular trade it is not impossible that these debts may be paid. When I say it is triangular, I mean that we might pay gold for coffee in Brazil and Brazil might pay gold for goods purchased in Britain, and that same gold might be used to pay a debt installment to the United States. So is trade triangular throughout the world.

Mr. President, the question asked was that if these debts amount to $12,091,000,000, how can we expect to be paid in gold when that sum is a billion dollars more than all the gold in the world.

Mr. President, Europe is not to pay that $12,091,000,000 representing the principal sums due from our debtors. All that has been canceled. Such were the debt settlements we made with our European debtors. All they are to do for us is to help us pay interest on that $12,091,000,000, and taking our debtors together, all they have promised to help us pay on account of the interest we are paying on that $12,091,000,000 is 2.62 per cent annually for 62 years, and then all those debtors are through. The American people pay the debt of $12,091,000,000, and in addition they pay interest on that debt to the extent of the difference between the interest which our securities bear and will bear and 2.62 per cent.

As to what this all means, consider this fact: Adding together all the interest that has been paid by our Government since the dates of settlement on account of these debts up to July 1, 1932, and subtract from that sum the total of all and every payment made by our debtors since the dates of settlement, and there is a deficit which we have had to bear of $2,365,000,000.

In short, we have had to pay in interest $2,365,000,000 more than all the payments we have received.

To return to Italy's debt—whereas during the last six months we have paid or are obliged to pay in interest, on governmental obligations properly representing this debt, $43,000,000, yet all that Italy has paid the United States during the last six months is $1,245,000.

Mr. President, as I have heretofore stated, all Italy has paid us in nearly seven and one-half years totals $41,066,000, but during that same period we have paid in interest on our governmental bonds outstanding properly representing the Italian debt a total of $667,435,000. As a consequence, after subtracting all Italy has paid us during the last nearly seven

and one-half years, $41,066,000, from the interest we have had to pay on account of her debt, there remains a deficit that has been shouldered by our taxpayers of more than $626,000,000 on account of this debt alone. In short, the Italian debt is growing, so far as the American people are concerned. It is not static. We have already added that deficit of $626,000,000 to the debt of $2,150,000,000 which we must pay, making the total of our loss on account of the loans we made to Italy nearly $2,800,000,000. Notwithstanding this fact, Italy is now asking for a reconsideration of her debt settlement, not, of course, to increase what she must pay but to reduce the relatively little she agreed to pay in 1925.

Mr. President, what we need in this country is solidarity upon this debt question. We should all stand shoulder to shoulder. We should say to our debtors in no unmistakable terms: "You must pay. You need not expect any final action to-morrow or some other time, as suggested by Mr. Chamberlain, of the British Government. Our action was final at the respective dates of settlement. We do not propose to make any further reductions in these debts. If you can not pay, we will treat you as we treat debtors here at home. We will ask you to pay what you can. You can pay something, and you can make provision for taking care of the arrears. If you do not do that, there is but one alternative. We will not forgive these debts. The only alternative is repudiation."

Mr. President, I repeat what I have before stated on the floor of the Senate: That if our Government is not to be paid by our debtors and our people must pay, then and in such case our people should indeed have at least the benefit of the lesson which repudiation by Europe will impress.

THE BANKING ACT

The Senate resumed the consideration of the bill (S. 4412) to provide for the safer and more effective use of the assets of Federal reserve banks and of national banking associations, to regulate interbank control, to prevent the undue diversion of funds into speculative operations, and for other purposes.

Mr. FRAZIER. Mr. President, the war-debt adjustment is a very interesting topic. A great deal of interest is being taken in it by the Members of Congress and by newspapers and others throughout the Nation. If we could get the Members of Congress as much interested in our own indebtedness, as much interested in our own affairs, as they are in making adjustments with foreign countries and of their debts, we could accomplish something in the Congress for our people here at home who need to have some assistance, something for the millions who are going broke and losing their property, farmers, business men, and others, something for the millions who are out of employment and who need work. We could get something done for them if we could arouse the sentiment in the interests of our own people that has been aroused for the war-debts settlements. If any adjustment is to be made of these war debts, it should be made by all means on the basis of disarmament, and there does not seem to be much chance of that.

Mr. President, a little pamphlet came to my office this morning. I think perhaps others received the same pamphlet. I do not know much about the origin of the pamphlet or the authors of it. It says it is a pamphlet issued by the "Modern '76ers." I have read in the newspapers something about the "Modern '76ers." I think they have had something to do with blocking mortgage sales in some of the agricultural States and with the blocking of foreclosures in general on farm property. The heading of the pamphlet is "The War of Mad Men." I want to read just a few short paragraphs from the pamphlet. It strikes me as mighty good regardless of where it comes from, who wrote it, or who is behind it. I read:

> Seventy-two cents of every tax dollar received by the Federal Government of the United States is used to pay the bills of the military budget. The remaining 28 cents of the tax dollar goes but a short way in paying for the cost of running the Government.

In this present fiscal year 72 cents out of each dollar is not the correct proportion. It is practically 80 cents out of every dollar, but on the basis of 72 cents out of each dollar it leaves 28 cents to run the Government and 72 cents for war purposes, past, present, and future. Under present conditions we have a mighty interesting problem involved. We have an Economy Committee, and they are doing their very best to reduce governmental expenses. The various other committees of Congress are trying to reduce governmental expenses. They are trying to reduce the expenses within the 20 or 28 per cent which it takes actually to run the various functions of the Government, saying nothing about the other 72 or 80 per cent that it takes for war purposes. They are not interested so much in reducing that expense.

I want to say for the information of some of the so-called economists that, according to the best information I can get, if we should wipe out the 28 per cent entirely that it takes to operate the functions of Government, our present revenue would not be enough to pay the balance of 72 per cent that it takes for war purposes and the deficit of to-day, and yet we are talking about economy and saying that we are trying to balance the Budget.

Mr. TYDINGS. Mr. President——

The PRESIDING OFFICER. Does the Senator from North Dakota yield to the Senator from Maryland?

Mr. FRAZIER. I yield.

Mr. TYDINGS. The Senator is mindful of the fact that about $1,000,000,000 is paid every year for pensions and allowances to ex-service men, so that a large percentage of the 72 cents of expenditure for the Government goes not to armament but rather to allowances for those who have served in past wars.

But the Senator likewise knows that although one of the best ways we can get relief for the people of the country would be to reduce the Federal tax bill, yet we can not make even a dent in it notwithstanding that in some cases a peculiar situation exists. I have mentioned the case before of one officer on three pay rolls, twice on the Federal Government pay roll and once on a State pay roll, and engaged in private practice as well. I say, with 12,000,000 people unemployed, our refusal to walk up and approach this problem and cut down the people's tax bill and spread whatever we can save over the general population is little short of outrageous.

Mr. FRAZIER. I agree with the Senator. I made the statement that the 72 per cent is for war purposes, past, present, and future. That, of course, takes in the sinking fund and the interest on the national debt. It also includes veterans' administration and appropriations for the Army and Navy. But it is altogether too high in comparison with the amount that it costs to run the Government and as compared with our revenues.

Last year the Saturday Evening Post carried a statement to the effect that $5,000,000,000 is tied up in what they called frozen assets in world armament. It was said that 80 per cent of the taxes of the world go for war purposes. The comment was made that the United States pays one-sixth of that total amount of $5,000,000,000. It is an amazing situation, and yet we are talking about cancelling or adjusting war debts. It has been said here to-day that the war debts have been practically cancelled under the former adjustment and that all the debtors are doing now is to pay a small rate of interest for a period of 62 years and then the principal is wiped out and the slate wiped clean.

I want to read a little further from this pamphlet:

> The Government is borrowing billions every year through the issuing of tax-exempt bonds—a perpetual burden for us living citizens and posterity.
>
> Maniacs in control of the world's governments are now preparing for the most atrocious and fiendish of all wars. Every taxpayer may now be paying for his and his children's mass murder. The United States of America must take the lead for complete universal disarmament and for the establishment of international economic embargo for the guaranteeing of the world's peace.

Mr. TYDINGS. Mr. President, will the Senator yield further?

The PRESIDING OFFICER. Does the Senator from North Dakota yield to the Senator from Maryland?

Mr. FRAZIER. I am glad to yield.

Mr. TYDINGS. Referring again to the subject of taxation, let me point out to the Senator that $400,000,000, or about 12½ per cent of all the money the Government raises in taxes, is levied upon one agricultural commodity, tobacco. Here is the Congress trying to help the farmer and yet imposing one-eighth of all Government taxation on one single agricultural product which happens to be produced in Maryland and which, of course, is produced in other States as well.

Suppose that was a tax on wheat, what would the wheat Senators say? Yet here we sit refusing to reduce taxes and levying one-eighth of all governmental revenues on the one agricultural product. Why pick out tobacco and levy it all on tobacco? Why not spread it over wheat and corn and everything else? What justification can there be for this large tax on the one agricultural product?

Mr. FRAZIER. I think the Senator is a little bit unfair. He means taxes on the products of tobacco and not upon tobacco itself.

Mr. TYDINGS. No; I mean to say that tobacco in one form or another of manufacture, but always tobacco, must bear the burden of one-eighth of all the tax revenues which the Government receives.

Mr. FRAZIER. I think that is one case where the tax is passed on to the consumer.

Mr. TYDINGS. It may be passed on to the consumer, but is the Senator willing to have wheat products taxed in a similar manner? Is he willing to have bread taxed? Is he willing to have Wheatena and other products of wheat taxed? Of course, he is not. Here we are, representing the agricultural States in part, sitting idly by and consenting to have the whole of the Government revenues derived from agriculture placed upon the one product that our own States produce.

Mr. FRAZIER. Of course, that is where they are trying to get it. A comparison of tobacco with bread is hardly fair, because we could get along without tobacco, at least a lot of us do, but we can not get along without bread.

Mr. GLASS. Mr. President, does not the Senator know there are millions of people who can not get any bread because they can not get anything for their tobacco?

Mr. TYDINGS. Mr. President, I should like to have just a minute longer to point out——

The PRESIDING OFFICER. Does the Senator from North Dakota further yield to the Senator from Maryland?

Mr. FRAZIER. I yield.

Mr. TYDINGS. To point out that if we could cut down the Government's expenses, we should then be in a position to lessen this tax on this agricultural product and help the hundreds of thousands of farmers who are dependent upon it for a livelihood; but I say it is absolutely asinine to talk about agricultural relief and then levy such a tremendous burden of taxation upon one agricultural commodity, and let all the rest escape.

Mr. FRAZIER. I agree there is a great deal to what the Senator has said, but I wanted to point out the need of reducing the 72 per cent that was being spent for war purposes instead of trying to cut down the meager wages that many of our Government employees receive at the present time. That brings about some saving, of course; but the great saving must be, if we are going to make a saving and balance the Budget, by cutting down the 72 per cent that goes for war purposes.

Mr. FESS. Mr. President, will the Senator yield?

The PRESIDING OFFICER. Does the Senator from North Dakota yield to the Senator from Ohio?

Mr. FRAZIER. I yield.

Mr. FESS. A large proportion of the expenditures for past wars is represented by the interest on the public debt. That I do not believe we can cut, unless that debt can be refunded at a lower rate of interest. That, I think, would be the only possible way to cut that item.

Mr. FRAZIER. Or repudiate it.

Mr. FESS. The Senator would not want to do that.

Mr. FRAZIER. No; I would not.

Mr. FESS. We might eliminate the item of the sinking fund, but it seems to me that would not be a very safe way to proceed. Then there is the enormous amount, as the Senator knows, expended for veterans' relief, amounting to something like a billion dollars. We can not very well cut that down. I am wholly in sympathy with what the Senator is saying, that we ought to cut the 72 per cent; but I do not see where it can be done unless in the appropriations for the Army and Navy; and, in view of the condition of the world to-day, I wonder whether we dare do that or not. As I said, my sympathies are running along with the Senator, but my judgment is halting.

Mr. FRAZIER. Mr. President, I wish to give some further information contained in this little pamphlet which I think will give a little different idea perhaps of the necessity of a great Army and Navy.

On the second page of this pamphlet is a foreword, which reads:

> The material in this pamphlet was prepared by one of America's well-to-do and patriotic citizens. It was presented to the "Modern '76ers" for approval before being published. The organization of the "'76ers" is more than willing that the information contained in this pamphlet be widely broadcast.
>
> The cost of publishing and mailing this pamphlet has been met by funds furnished by the author of the article herein contained with the understanding that the citizen's name who prepared same shall remain anonymous.

I do not know anything about who prepared this document.

"Modern '76ers"—

> Not a political party but a political revolution in military formation using brains and ballots instead of guns and bullets in wiping out undesirable professional politicians and financial racketeers.

I will say for them that they have set forth a very good policy at least. This is the part that struck me as most significant, and I want the Senator from Ohio to hear it:

> Synthetic plague-disease-germ ammunition is, it is said, now being secretly manufactured in hitherto free America, and is of greater virulence than the natural oriental plague germ. Lester P. Barlow, scientific engineer, is the revealer of these shocking facts. The latest warfare gases rapidly end life; the synthetic plague germs, in comparison with other disease germs, do the same. Plague is contagious through the medium of the air.

I want to say that I know Lester P. Barlow very well. He was the engineer who during the war time perfected and patented the bombs that were used by the United States Government during the World War. He is a noted scientific engineer.

> Mr. Barlow states that the War College, Washington, is—as it well may be—exceedingly anxious over its inability of how to conceive of a counterattack. Even similar disease germs now being manufactured there, when released to the wind, would be equally dangerous to life.
>
> The attack of the enemy will be broadcast over our entire country instead of being aimed at one locality at a time. The situation is so ominous that the war makers fear to take the public into their confidence.
>
> When the disease germs in question are released to the wind in this new method of attack "they will advance like a mighty fire. Half a dozen tubes the size of a finger may contain enough germ culture to destroy the whole population of the United States within a few weeks."
>
> Disease-germ ammunition has now been especially invented for long-distance aircraft transportation, overseas and overland.

I have read some articles in magazines and newspapers during recent months along the same line, to the effect that disease germs are now being propagated in various countries in the event of another war, and, with regard to them, some of the newspaper and magazine articles I have read make practically the same statement that is made in this pamphlet.

Mr. FESS. Mr. President——

The PRESIDING OFFICER. Does the Senator from North Dakota yield to the Senator from Ohio?

Mr. FRAZIER. I yield.

Mr. FESS. Does the Senator doubt that unless we can find some way to avoid war it will not be very long, in view of the methods employed to destroy people, until civilization itself shall be absolutely destroyed?

Mr. FRAZIER. I think that is absolutely a correct statement.

Mr. FESS. I think that is within the limit of what may be accomplished.

Mr. FRAZIER. I want to say right here that in my opinion the building up of a great Army and Navy is no way of doing away with war.

Mr. FESS. The Senator will agree that we can not very well avoid that until we can get the countries of the world to agree to disarmament.

Mr. FRAZIER. I do not agree to that at all.

Mr. FESS. That is where the Senator and I differ.

Mr. FRAZIER. The Senator from Ohio will recall probably that I have introduced a joint resolution proposing to amend the Constitution of the United States which will outlaw war. I believe that is the thing which should be done.

I wish to quote a little further from this pamphlet:

BOMBING AIRCRAFT

New York Times, 1932:

"They will be so numerous that the only defense is in offense. You have got to kill women and children more quickly than the enemy if you want to save yourselves."

There is a story going the rounds that only a few weeks ago our Government officials had a secret demonstration of a new air bombing plane. I never heard much about the particulars of it, but it is about twice as fast as any bombing plane we have ever had and goes about twice as high as other bombing planes, practically out of range of gunfire. I am told that it really revolutionizes bombing.

Here is a quotation from H. G. Wells, of London:

Humanity is now faced with the choice of world peace or annihilation.

I think that is general sentiment of the people throughout the country. Continuing the quotation:

Before long men will pack parcels of explosives or poison gas, or incendiary matter, and send them up in the air to wherever they like to drop the load. Military people will stick to guns, which only carry 20 miles, and to airplanes, which must fight their way through hostile planes and gunfire. When the time arrives, we must then exist with the voice of a stranger in our ears, with the eyes of a stranger in our homes, and with the knife of a stranger at our throat.

Here is a quotation from David Lloyd George:

If they can't stop war, the churches may as well close their doors.

Here is a quotation from Earl Haig, the British commander in chief during the World War:

It is the business of the churches to end war.

I agree that the churches are doing a great deal to create public sentiment for total disarmament and for world peace; they are doing an excellent work, but perhaps they could do more. I am sure, however, they are doing a great work and will continue their efforts along that line. They should have some help by legislation of the Congress of the United States. We openly boast that we favor world peace and disarmament and yet build the greatest Navy we have ever had in peace times and the greatest Army we have ever had in peace times, and we appropriated during the last few years the largest amount of money that any nation has ever appropriated in peace times for army and navy purposes.

Mr. KING. Mr. President, will the Senator yield?

The PRESIDING OFFICER. Does the Senator from North Dakota yield to the Senator from Utah?

Mr. FRAZIER. I yield.

Mr. KING. Is it not worthy of note that, notwithstanding the sins of commission and omission that may be charged against the Soviet Government, at two conferences in which Russia participated during the past few years there was submitted by her representative, Mr. Litvinov, propositions for world disarmament? One of the representatives mentioned states that if Russia's plan were accepted it would demobilize its army and dispose of its limited naval establishment. Unfortunately the propositions were treated with little consideration by the representatives of the participating nations, including the United States. Subsequently, when a similar proposition was submitted, the same treatment was accorded it.

I think that our own Government failed to take advantage of the opportunity to secure an agreement to reduce the armaments of the world. I also believe that our Government was derelict when a proposition was made by France and Italy, and which was accepted by Great Britain, that airplanes and submarines should be abolished, in not promptly accepting the same. It also declined to accede to the suggestion that capital ships should be reduced from 35,000 tons to 25,000 tons, and that their lives should be prolonged to 25 or 30 years, thus materially reducing naval expenses. In my opinion, many nations have failed to appreciate their duty to civilization and their responsibility to humanity in dealing with this vital question of world disarmament.

Mr. FRAZIER. I am very glad to hear the Senator from Utah say that, because I remember on a former occasion he criticized the Soviet Government rather harshly, I thought, and I am glad to see that he concedes that that Government has some good points, at least.

Mr. KING. Mr. President, will the Senator pardon a further interruption?

The PRESIDING OFFICER. Does the Senator from North Dakota yield further to the Senator from Utah?

Mr. FRAZIER. I yield.

Mr. KING. I do criticize the Soviet Government, and object to recognizing it largely for the reason that it is determined, and so declares, to destroy all governments of the so-called capitalistic nations and establish the Bolshevik form of government. I submitted to a number of leaders of the Soviet Government when I was in Russia the proposition that if they would dissociate themselves from the Third International and would agree to observe their conventions as honorable nations do, I would not oppose recognition being accorded to it. I also indicated that I would go farther and forgive payment of the obligations due the United States from Russia.

Mr. FRAZIER. I do not want to get into an argument about the recognition of Russia at this time; but, personally, I am willing to vote for the recognition of the Russian Government at any time.

I want to make one more quotation from this little pamphlet.

Who are they, here as well as in Europe, who are planning the wholesale murder of civilian populations by hitherto undreamed-of horrors unquestioned by law, while an individual murderer is incarcerated in prison for years or electrocuted? (A law for outlawing war has been for two years waiting to be signed by the President.)

That statement, I take it, refers to the resolution I have had here in the last two or three sessions of Congress. Of course, it has never gone to the President; it has never been acted upon by the Congress, but I take it that is what they refer to.

Who are they who are now manufacturing in hitherto free America, among other disease-germs ammunition, synthetic plague-germ ammunition?

Of course, if any of this synthetic plague-germ ammunition is being manufactured, it is being manufactured by representatives of our Government.

Now I want to make a brief statement on the pending bill. I have sat here for days and listened to the arguments without saying anything upon it.

Some one made the statement yesterday—I have not looked it up—that yesterday was the twentieth day of the consideration of the bill. Then this must be the twenty-first day that this bill has been discussed. A great deal has been said about a "filibuster holding up important legislation," and all that kind of thing. Of course I do not agree with much of the propaganda that has been spread about this so-called filibuster; and I do think that the Members of the Senate who have taken part in the so-called filibuster, in showing up this big bankers' bill, have done a real service for the people of the United States, because they have shown up in its true light what this bill means. I think the title of the bill, instead of being "the 1933 banking bill," should be amended to read "the 1933 big bankers' bill," for that is

what it is. It is a bill for the big bankers, to strengthen the power and the control of the Federal Reserve Board and the Federal reserve banking system. That is what it is for.

I remember very well, back in 1927—I was a member of the Banking and Currency Committee at that time—when the McFadden banking bill was introduced and discussed before that committee. I never found out how I happened to be appointed a member of the Banking and Currency Committee of the Senate when I first came here, but I was. Perhaps it was because I had been a director of a little local bank in my home community years ago, when I was on the farm; and it was one of the first banks to be crowded out of business when the hard times struck us a number of years ago. I think perhaps somebody had heard of it, and they appointed me on the Banking and Currency Committee. I did not stay on it very long, however, because it was too hard-boiled a committee for me.

Why, when I was a member of that committee they used to get together, before they came to the committee room at all, and have their bill all decided on, and that was all there was to it. You might as well talk to the wind as to try to get that committee at that time to consider any kind of liberal banking legislation. I think it is a little more liberal at the present time; but, judging from some of the bills they report out, there is some doubt yet.

The McFadden banking bill of 1927 was to strengthen the banking system, too. I remember very well that the Senator from Virginia, who is the author of this bill, opposed the McFadden bill in a way when it first came up, and put up quite a little fight against it, and finally said that he would support the McFadden bill if they would put on an amendment that he wanted. They put on the amendment, and that was automatically to extend the life of the Federal reserve system. When that was done the Senator from Virginia approved the bill and supported it, and it passed the Senate.

I spoke against that bill and fought against it at the time, and said it was a step toward general branch banking. It was; and they are trying in this bill to carry out that old McFadden bill of 1927, so as to give us more branch banks, to provide for general branch banking. That part of it is fairly well taken care of at the present time, but should be stricken out. This bill gives the big bankers more power and gives the Federal reserve banking system more power.

The VICE PRESIDENT. The time of the Senator has expired. He has one hour on the bill.

Mr. FRAZIER. I will talk on the bill.

There have been all kinds of reports, and I think many of them authentic, that in various instances independent banks that have not been willing to go along and follow the dictation of the Federal Reserve Board and their system have had their credit closed down. They have been forced out of business. They have been forced to close their doors. That is not only in one case but in many cases.

This bill would give the Federal reserve system more power to break any bank that they wanted to break by cutting off their credit. It goes farther, and sets up a new machine for the Federal reserve system, a liquidating corporation of which the Federal Reserve Board would have control. This would make their work complete, especially if they can get this branch-banking proposition. Then they could crowd out the little independent banks and then liquidate them. Yes; that would help some—I mean, it would help the big bankers some.

The little, independent bankers are absolutely opposed to this bill. They are fighting for their very existence, with their backs against the wall, at the present time. There has been much change of sentiment. In normal days, when some of the farmers were making a little money and the banking business was pretty good, many bankers would not admit that the farmers had any trouble to complain of; but now, in the agricultural States at least, our bankers will admit that there is a real farm problem, and that something must be done to save our American farmers, because when the farmers go broke the bankers are going broke along with them in those agricultural States, and business men are going broke with them, and that is why they are a little more liberal now than they have been in the past.

There has been a flood of propaganda telegrams sent in here to Members of Congress in favor of this bill and protesting against the so-called filibuster. Why, from North Dakota there came approximately 200 telegrams from bankers and business men; and, as my colleague [Mr. NYE] indicated the other day, we were informed that those telegrams were sent out at the instigation of the group bankers of our State, with headquarters at Fargo.

I received 20 telegrams from various parts of the State, worded exactly alike, from business men and from bankers—20 telegrams that were worded exactly alike—coming from various parts of the State. Of course, it is self-evident that they did not have just exactly the same thought, because they were long telegrams. If those telegrams were paid for at the usual rates it would cost over $150 to have sent the telegrams that I received from the State of North Dakota.

In the last day or two a few telegrams have been coming in from some of the independent bankers who are waking up to the fact that they perhaps should not have sent the telegrams that they did send, and they are seeking to let us know that they are not as strong for this banking bill as we might think from the telegrams we have received in the past. I will read just one as a sample. It comes from an independent State bank up there:

> We believe our State is best served by independent banks. We urge you to use every effort toward the defeat of the Glass banking bill.

And I have had letters and telegrams from some of the business men along the same line.

But it is said that we are holding up "important legislation" by this filibuster. I want to ask what the important legislation is that is being held up by this so-called filibuster at the present time. One thing is sure: We are not holding up any important farm legislation, because there is no important farm bill on our calendar to-day. We are not holding up any important legislation for the unemployed, because there is no important bill on our calendar for the unemployed to-day. We are not holding up any important bill for the general welfare of the people of the United States, because there is not anything of that kind on the calendar to-day. There are a few such bills in the various committees, but they have not yet been reported out and are not on the calendar; so we are not holding up that kind of important legislation.

What are we holding up, then? We are holding up the passage of the banking bill, that is all, the big bankers' bill. I want to repeat that, in my opinion, the bank bill that is under consideration at the present time is not for the interest of the people, but for the interest of the big bankers.

I had a letter the other day from a farmer out in Iowa in which he said "Congress is fiddling while corn burns"; and he went on to tell about the farmers of Iowa burning corn, because he said the corn was cheaper than coal; and so they were burning corn to keep down expenses.

Yes; we are fiddling while corn burns. We are fiddling here in Congress while thousands of farmers are being foreclosed upon and put out of business. We are fiddling here while there are some twelve to fourteen millions of unemployed going hungry and unable to get jobs. Congress is fiddling and doing nothing for their benefit.

Mr. LONG. Mr. President——

The VICE PRESIDENT. Does the Senator from North Dakota yield to the Senator from Louisiana?

Mr. FRAZIER. I yield to the Senator.

Mr. LONG. I desire to ask the Senator, in connection with what he has just said, whether any Senator in this body has suggested any bill whatever that he proposes to bring up now or to-morrow for the relief of the people of the United States if this bill is sidetracked? If so, would

the Senator object to sidetracking this bill and considering it?

Mr. FRAZIER. Mr. President, I do not know of anything of that kind on the calendar. The Senator from Wisconsin [Mr. LA FOLLETTE] and the Senator from Colorado [Mr. COSTIGAN] have an unemployment bill that I believe would be of great help. It is pending and will be reported out, I understand, in the near future. There is a farm allotment bill before the Agricultural Committee that we hope to get reported out, or at least I hope will be reported out, in the near future; and there is a bill that I introduced, providing for the refinancing of the American farmers' mortgage indebtedness, that was considered by the Agricultural Committee at the last session. We had some discussion of it on the floor of the Senate and, as Senators may remember, it was referred to the Banking and Currency Committee, and is now pending before that committee. We have had some hearings on it. I hope we can get some action on that bill; but the bills to which I have referred are not on the calendar at the present time and, of course, this so-called filibuster can not be blamed for holding up those bills. However, we are being criticized by the newspapers, and these propaganda telegrams have come in criticizing us for holding up "important legislation that should be enacted."

I agree that we are not doing anything to pass important legislation for the benefit of the people who need benefit. It is not the big bankers who need benefit. They have had too much of benefit. They have had too much of special privilege. That is why we are in the condition that we are in to-day. Oh, yes; that is why our farmers are going broke. That is why our business men are going broke—because of the special privilege, special interest laws that have been passed by the United States Congress. Those special privilege, special interest bills should be wiped off the slate, or else our farmers should be given some special-privilege legislation too. Millions of farmers are losing their property, millions of home owners in the cities are losing their property, millions of business men are losing their property. Why, the great municipalities of this country can not pay their running expenses because they can not collect their taxes.

A friend of mine had sent to me from Chicago a copy of the Evening Post of that city of June 30. It has 330 pages, as I remember, and 312 pages of that paper were solid advertisements of 1930 tax sales. I think it was the largest 3 cents' worth of paper ever sold in the history of the United States. It was sold for 3 cents a copy. One of the State officials said, according to a copy of a radio address I have from the Association of Real Estate Taxpayers of Illinois, that approximately 40 per cent or $4,000,000,000 of property in Cook County was being turned over to the State for nonpayment of taxes.

Mr. LEWIS. Mr. President, since the Senator refers to what he speaks of as a privilege, has the Senator's mind been drawn to the fact that the word "privilege" is made up of the two Latin words "privi" and "leges," which really mean "private laws," and that it grew out of the very thing to which the Senator alludes? Privileges were simply private laws which were given for those of favored class against the large mass.

Mr. FRAZIER. The Senator, of course, is correct. In this copy of the Evening Post to which I referred it is stated that there was advertised at tax sales in Chicago 500,000 parcels of land, and, according to this radio address made by John M. Pratt, director of the Association of Real Estate Taxpayers of Illinois, the value was estimated at over $5,000,000,000. It is an amazing situation to think of a great city like Chicago with $5,000,000,000 worth of property advertised at tax sales.

The same condition prevails throughout the Nation. Our States and our cities can not pay their running expenses, because they can not collect their taxes. Yet Congress fiddles. I think that is a good term; Congress fiddles over a bank bill for the big bankers and not for the individual bankers, or the common people, for 21 days. It is called a filibuster, and gentlemen may call it what they like, but I want to say again that I am very proud of a few Democratic Senators who have carried on the so-called filibuster. I wish we had more of their type. I have nothing against the Democrats, but I think a lot of them should be more democratic.

Mr. President, if the pending banking bill passes and becomes the law, it will be a law in the interest of the great bankers and designed to make the Federal reserve system stronger than it is and more powerful. I think it was a mistake when the Federal reserve law was ever enacted. It practically turned the credit of the United States over to a group of bankers. It was said they would avoid all panics, inflations, deflations, and all that kind of thing, but they have not prevented those things. We have had under the Federal Reserve Board the worst panics and the worst inflations and the worst deflations ever known in the history of the country. Anyone will have to do a lot of arguing to make me think that the Federal Reserve Board and their system have not operated for the big banks, the banks having headquarters in the city of New York, rather than in the interest of bankers generally throughout the country.

I am glad the branch banking feature has been cut out of the bill practically, but, in my opinion, the whole bill should fail.

Yesterday we had an interesting spectacle in the Senate. The junior Senator from Montana [Mr. WHEELER] offered as an amendment his free silver bill, so called, and his amendment was debated here for eight hours. If that amendment would do anything, it would help at least to balance our now unbalanced dollar. It would help at least. Our dollar is out of balance. It is too high in comparison with commodity prices and with farm prices, absolutely too high. The 16 to 1 remonetization of silver would help balance the dollar and put more money into circulation, a thing which we need. But after that amendment was discussed and debated here for eight hours, the Senator from Virginia, who has the pending bill in charge, rose and made a motion to table the amendment, and that motion was carried.

We hear much talk about a filibuster. Well, the idea of a filibuster does not scare me at all or worry me a bit, because, as I said before, there is nothing of importance on our calendar to-day to be considered. So that it is hardly fair to call what took place a filibuster, at least to charge anybody with holding up any important legislation. I hope the committees of the Senate will get busy and report some important legislation, some worth-while legislation, legislation which would be for the benefit of our people, the unemployed, the farmers of this Nation, who are going broke or who have already gone broke. Then we can perhaps get down to business and do something to relieve the present deplorable situation which confronts our people.

The VICE PRESIDENT. The question is on agreeing to the first amendment offered by the Senator from New Jersey [Mr. KEAN].

Mr. LONG. I suggest the absence of a quorum.

The VICE PRESIDENT. The clerk will call the roll.

The legislative clerk called the roll, and the following Senators answered to their names:

Ashurst	Davis	Keyes	Schall
Austin	Dickinson	King	Schuyler
Bailey	Dill	La Follette	Sheppard
Bankhead	Fess	Lewis	Shipstead
Barbour	Fletcher	Logan	Shortridge
Barkley	Frazier	Long	Smith
Bingham	George	McGill	Smoot
Black	Glass	McKellar	Steiwer
Blaine	Glenn	McNary	Stephens
Borah	Goldsborough	Metcalf	Swanson
Bratton	Gore	Moses	Thomas, Idaho
Brookhart	Grammer	Neely	Thomas, Okla.
Bulkley	Hale	Norbeck	Townsend
Bulow	Harrison	Norris	Trammell
Capper	Hastings	Nye	Tydings
Caraway	Hatfield	Oddie	Vandenberg
Carey	Hayden	Patterson	Wagner
Connally	Hebert	Pittman	Walcott
Coolidge	Howell	Reed	Walsh, Mass.
Copeland	Hull	Reynolds	Walsh, Mont.
Costigan	Johnson	Robinson, Ark.	Watson
Couzens	Kean	Robinson, Ind.	Wheeler
Cutting	Kendrick	Russell	White

The VICE PRESIDENT. Ninety-two Senators have answered to their names. A quorum is present.

Mr. BINGHAM. Mr. President, I have not taken up much time in debate since the pending bill has been before the Senate. I have been hoping that we might get the bill out of the way as quickly as possible. But during the past two or three days there has been so much talk in regard to inflation and the old question of the coinage of silver at the ratio of 16 to 1 and placing silver on its old basis that a good many people have become somewhat alarmed regarding what might happen with respect to the inflation of our currency.

It seems to me that the one thing we need to get us out of the depression is a return of confidence in the Government of the United States and in its laws. That may be a very old-fashioned thing to say. I realize that it is not anything in the nature of a new doctrine. I realize that this remedy will not act quickly. But I believe that our present civilization is built up on the development of the credit system. It is not so many years or generations ago that credit was hardly known. Those persons in a community who loaned money were considered as usurers and almost as public enemies. Everything was done by barter and by the exchange of actually desired precious metals, such as silver and gold.

But our present economic system is based largely on confidence in the value of certain paper, of certain obligations signed either by persons or by representatives of government. It is serious when one loses confidence in a government and in its obligations, as so many people have lost in the obligations of so many foreign governments at the present time—the bonds of foreign governments have sunk to an unprecedented level. The present depression is due, it seems to me, largely, if not almost entirely, to loss of confidence. If we could do something to restore confidence, then we would restore to health that very sick individual known by the name of "credit." But as long as we trifle with the sacred obligations connected with the world of finance known as "credit," just so long will confidence fail to return and people will be unwilling to trust their money in new enterprises. It is known at the present time that an unprecedented amount of currency has been withdrawn from circulation and is stored in bank vaults and other places. The facts set forth by the Treasury Department, in that the revenue from almost all sources expected out of the last tax bill has been disappointing except for revenue derived from safety vaults and boxes in safety deposit companies, tell a very striking story of the loss of confidence.

Mr. President, there are thousands if not millions of people in America to-day who believe with the Senator from Idaho [Mr. BORAH] and others that what we need is cheap money and inflation. I have before me a few notes on this subject. I shall not detain the Senate long. I hope not even to use more than half the time allotted to me to speak on the amendment. But for my own sake I wish to place in the RECORD a few thoughts in regard to inflation which are so old-fashioned that I had never expected to deliver them, but due to the reputation and the influence of a number of very distinguished Members of the United States Congress and others in America to-day who are preaching the doctrine of inflation, it seems to me perhaps justifiable to take a few minutes to state what I believe would be the result.

Incidentally there is a very distinguished firm of certified public accountants by the name of Ernst & Ernst, who have branches in all the leading cities in the country, who are not interested in the slightest degree in speculation or in the selling of stocks and bonds or in the selling of any evidences of indebtedness. They are not interested in mortgages, insurance companies, railroads, or anything else. They are merely accountants and auditors of the very highest standing and of the very highest reputation. In a bulletin which they have recently issued for their clients they have thought it worth while to carry out a very simple discussion on inflation, calling attention to the remarks which have been made in regard to it and defining it. If anyone is particularly interested in the subject on the point of view of the certified public accountants, I should recommend that he endeavor to secure a copy of this bulletin.

Now, Mr. President, as at present advocated there seem to be two principal purposes of currency inflation, viz:

First. To raise commodity and security prices.

Second. To assist some special groups, as the farmers or the veterans.

Currency inflation, regardless of the means employed or whether "controlled" or "uncontrolled," can mean only just one thing, namely, the devaluation of the dollar in terms of things which can be purchased with it, such as copper, silver, wheat, gold, equities in industrial properties—common stocks—and so forth. This can be accomplished by:

First. Issuing more paper dollars per dollar of gold on deposit in the United States Treasury. At present gold certificates are secured dollar for dollar by gold held in the Treasury. Federal reserve notes are redeemable in gold, although partly secured by commercial paper, and so forth. Greenbacks are partly secured by gold and their amount is fixed by statute.

Second. Reducing the gold content of the dollar. This plan would alter the ratio referred to above and accomplish the same end.

Third. Adding more silver to the gold on deposit and making it the basis of issue for more paper dollars. The present silver certificates are issued against silver dollars on deposit in the Treasury. Their amount is fixed by law. This type of inflation was debated at great length on yesterday, and is included in the proposal of the distinguished Senator from Montana [Mr. WHEELER], who debated it on yesterday and this morning.

Fourth. Various subterfuges permitting the issue of more paper money against securities of various sorts. The amount of bonds carrying the circulation privilege for national-bank notes has already been increased. The Patman bonus bill proposed the issuance of Government bonds to be held by Federal reserve banks against the issuance of Federal reserve notes backed 60 per cent by the bonds and 40 per cent in gold.

However disguised, the purpose of the inflation of currency or the devaluation of the present gold dollar is to debase the present value of our currency in relation to the price of things which the dollar will buy. This was made sufficiently clear by the proposal on January 15 to form a Senate committee "to consider the present value of the dollar with relation to taxes, interest, and debts, and to make recommendations and report a plan or plans for reducing the value of such dollar."

"Going off the gold standard" amounts a good deal to the same thing since it is in effect a refusal to make good the value of a country's paper currency in gold, whereupon the value of the paper dollar falls in terms of gold and of the currencies of other countries. When Great Britain went off the gold standard her pound sterling fell from approximately $4.86 to below $3.20, with the result that what amounted to an equivalent sales tax was placed on all imports (including two-thirds of the foodstuffs consumed). This in effect cut laborers' wages, which previously had not declined with the cost of living to pre-war standards, reduced the cost of manufactured goods, since labor was paid in debased currency, and so placed manufacturers in a better position to compete with foreign-made goods. It also, in effect, lowered the tariff walls of countries still on the gold standard, raised Britain's tariff walls and disorganized foreign trade generally. Incidentally, it forced the French Government to come to the aid of the Bank of France which had previously come to Britain's assistance with a large loan and which lost about $100,000,000 when Britain went off the gold standard. British purchasers of American stocks prior to the change are now in a position to increase their profits materially by selling them on the New York Stock Exchange. Any threat on our part to go off the gold standard would undoubtedly result in wholesale dumping on this market with resultant price depression. Furthermore, the change brought a great deal of gold out of hiding in the form of old jewelry, Indian treasure hoards, and so forth, all of

which commanded a premium in the form of paper currency. Shortly before England went off the gold standard the MacMillan report declared against devaluation in no uncertain terms so that the country's departure from the gold standard must be regarded as unwilling and forced, not as a measure adopted for the country's advantage. While the situation has so far been controlled with great skill, there is no reason to expect that a labor group 80 per cent unionized will not eventually demand higher wages and so offset the principal temporary advantage gained by the country.

The results of inflation in Germany, where an unlimited amount of paper money was issued, were briefly as follows:

First. Commodity prices soared. That is what is promised in this country, and there is no question but what it will happen.

Second. Common-stock prices soared, and that too will happen.

Third. Mortgages and bonded indebtedness, including Government bonds, became worthless.

Fourth. Insurance policies were paid in valueless currency. The classical example is the man who bought a pound of butter with the annuity which was to enable him to live like a prince for the balance of his life.

I call particular attention to the fact that any inflation of our currency will mean that those who have any of it at all or are dependent on insurance policies, whether they be life or fire insurance or annuities, will in the case of inflation get just that much less for their money.

Mr. BROOKHART. Mr. President——

The VICE PRESIDENT. Does the Senator from Connecticut yield to the Senator from Iowa?

Mr. BINGHAM. Not at present.

Fifth. Prices and the cost of living rose so much faster than salaries and wages that factories were forced to pay off twice a day. Eventually there were labor riots and widespread disturbances.

Sixth. The rentier class was ruined and the savings of the poor were lost. Foolish spending took the place of thrift.

Seventh. Thievery and violence increased.

Eighth. Foreign goods were practically excluded and exports were stimulated.

Ninth. After some years of chaos and disturbance the gold standard was reestablished on a basis of the gold rentenmark.

The United States has tried currency inflation from time to time. After the Civil War the country was flooded with greenbacks. The result was summarized by an old merchant of that day who said, "We used to take our money to the grocery in our vest pocket and bring the groceries back in a wheelbarrow. Now we take our greenbacks in a wheelbarrow and bring our groceries back in our vest pocket."

If the United States could go off the gold standard overnight or establish inflation instantly, she might temporarily secure some of the advantages secured by Great Britain. Unfortunately our Government is so organized that considerable discussion will be necessary before a law can be enacted.

Since the object of inflation is to raise prices and relieve debtors, reasonable assurance that inflation is assured should logically result, theoretically, at least, as follows:

First. The more astute members of the community would withdraw their balances from their commercial banks, convert them into gold and place the gold in safe-deposit boxes with a view to later exchanging it for paper money at a premium or making purchases on an undevalued basis. This would result in widespread bank runs and failures and the ruin of individuals and industries who had loans on call which were demanded by the banks in self-protection. Whenever currency inflation has been seriously discussed, as in the case of the Goldberg bill, gold hoarding has increased. Gold withdrawals and conversion could, of course, be controlled by statute if the legislative steps could be taken quickly enough, though there would be considerable difficulty in passing such legislation in advance of devaluation legislation under our present legislative system. Furthermore, it would be difficult to cover the gold already in safe-deposit boxes.

A flight of gold from the country would also be likely to accompany inflation. Most of the countries off the gold standard have had to enact severe laws to prevent the export of gold. Anyone who has traveled in Europe recently will appreciate the fact that at the frontiers one is stopped and asked whether he is taking any gold out of the country, only a very limited amount, in some cases none at all, being permitted to be taken into the neighboring country. This has recently been evaded to some extent in Germany by the purchase of diamonds, which have been exported and later converted into gold, there being no law against the export of diamonds.

Undoubtedly individuals would withdraw their balances from the savings banks, causing failure of many such banks.

Many individuals would cash their life-insurance policies, which would cause the failure of many insurance companies.

They would sell their bonds, thereby causing a panic in the bond market, further weakening the banks and insurance companies, and postponing indefinitely financing by means of bond issues.

Many persons, realizing what would happen, would foreclose all demand mortgages not containing the gold clause.

They would buy common stocks representing equities in property, thereby causing a repetition of the unhealthy inflation of 1929. Already some of the skillful financial writers of Wall Street are advising their clients to buy common stocks at the present low level, in the expectation that there will be passed some inflation legislation which will greatly increase the value of those common stocks and enable the purchasers thereof to make large amounts of money.

Astute individuals would buy commodities and real estate, thereby driving up the prices of both.

The prices of commodities and the cost of living would rise faster than wages and salaries would be raised, resulting in widespread suffering and disorder. That is not a foolish prophesy, Mr. President; that is what has happened in other countries that have adopted the policy of inflating the currency.

The marginal income of the masses necessary to the purchase of semiluxuries would entirely disappear with the great increase in the cost of essential commodities needed for their living, and, as a result, some of our greatest industries would fail.

Those without employment, those without money, would be in no better position to purchase goods than they are at present, so that the necessity for public relief would be increased rather than diminished, and more public relief would have to be provided as the price of essential commodities went up.

The rush to sell Government bonds would destroy the credit of the Government and the possibility of raising relief funds by means of bond issues.

Anyone owing money on mortgages, or notes, or for rent, groceries, or commodities would be able to pay off their obligations in devalued dollars; provided they could secure any such dollars in the financial chaos which would result from uncontrolled inflation. Those producing commodities, the price of which had been artificially raised by inflation, would be in the best position. There can be no doubt about that, Mr. President. This is an appeal to the farmer raising commodities on the ground that his prices would be better. The preferred class under any such scheme would be the farmers; also the owners of mines and the owners of oil wells and the like who have a definite product to sell for which they could receive higher prices.

Furthermore, the owners of sound common stocks of companies dealing in necessities, especially those having large inventories, would be in a position to benefit greatly. Hence the approval of the inflation scheme by certain individuals in New York who might otherwise be expected to oppose it, and hence the letters sent out by some brokerage houses taking advantage of the belief in the probability of inflation and urging the purchase of sound common stock.

Advocates of currency inflation who are at all familiar with the past history of such movements hope to be able to avoid its disastrous results by some method of "control,"

"management," or legislation. No such method has ever proved successful in the past, and there is no good reason to suppose that our present experts will prove any more successful in harnessing the whirlwind, once it is roused, than their predecessors. Moreover, no two experts agree as to the proper means of control. Let it be remembered, Mr. President, that currency inflation does not increase the wealth of our country or of any other country; it simply transfers existing wealth from the creditor class to the debtor class.

Once this transfer is set in motion, it is difficult to insure that the classes it is desirable to protect, such as insurance companies and savings banks holding mortgages, will survive while private mortgage holders are ruined for the benefit of the suffering farmer. Nature has decreed that the rain shall fall equally upon the just and upon the unjust.

Furthermore, the results of currency inflation are violently destructive to social progress. We are already suffering from the destruction of capital, character, and confidence which resulted from the World War. Capital can be restored only by reestablishing a favorable balance of income over expenditures. This applies to individuals, municipalities, States, and countries. Character can be restored only by the practice of economy, efficiency, and common honesty. Once these are established, confidence will gradually return, and the anomaly of a country possessing most of the world's supply of wheat and gold while millions walk the streets without food or money, will be gradually dissipated.

Any course which leads to the repudiation of just obligations, to an orgy of spending, and to wild speculation, which favors the foolish at the expense of the wise, and which promotes the rise of another class of war profiteers can not possibly restore confidence or add to the social progress of the country.

Believing, as I do, that the main thing is to restore confidence, I hope most sincerely that the proposals for inflation of the currency will be defeated, as was the proposal yesterday for returning to the old silver basis, which was so fully discussed in this country in 1896 and adopted at that time by the Democratic Party, but repudiated by a tremendous vote at the polls that year.

Of course, further steps may have to be taken to protect weak spots, moratoriums may be in order, relief steps are inevitable, but these should be planned in accordance with social progress. Budgets should be balanced. Thrift and economy should be encouraged. Efficient personal, corporate, financial, and governmental management should be enforced. Honesty and integrity should be restored. Confidence will then gradually return. Any such currency-inflation scheme as has been proposed can only result in a further destruction of confidence, deter social progress, and drive us deeper into the mire.

Mr. President, I regret to note that several British statesmen during the past few years have been preaching a doctrine absolutely contrary to that which, followed for generations, made Great Britain one of the greatest financial strongholds in the world, a doctrine which they themselves in years gone by would have been the first to repudiate and reprove in any one of the debtor countries that owed them at that time large amounts of money.

The war has destroyed much that we can see and much that we can not see, and it also appears, Mr. President, as though the war has succeeded in destroying in many of the leading minds in Europe all idea that written obligations must be met if we are to continue to see our civilization advance. Our civilization, I believe, has been built up on credit and confidence, confidence in the ability and willingness and determination of the individual to meet his obligations when and as he is able to do so without demanding that his obligations be wiped off the books because he is in trouble and unable to meet them. The attitude taken by some of the European statesmen in regard to their debts to the United States is utterly amazing. As one reads the statements of some of the leading statesmen in Europe regarding the necessity of so doing, and trying to justify it, one can not find fault with anyone in this country who seeks in any measure to repudiate obligations voluntarily entered into and payable in gold coin.

Mr. President, I hope the time will never come when this country will repudiate any of its obligations, and I trust that we may continue to show the world, whatever the cost may be to ourselves, our willingness to stand by our governmental obligations at their face value as and when issued.

Mr. BORAH obtained the floor.

Mr. THOMAS of Oklahoma. Mr. President, will the Senator from Idaho yield?

The VICE PRESIDENT. Does the Senator from Idaho yield to the Senator from Oklahoma?

Mr. BORAH. I was going to say, if we are ready to take a vote, I shall not take the time of the Senate.

Mr. THOMAS of Oklahoma. I think we are not ready for a vote. I suggest the absence of a quorum.

The VICE PRESIDENT. Does the Senator from Idaho yield for that purpose?

Mr. GLASS. Mr. President, has there been any business transacted since the last call?

The VICE PRESIDENT. The Chair is advised that no business has been transacted since the last call.

Mr. GLASS. Then I make the point of order that the roll can not be called.

The VICE PRESIDENT. The point of order is sustained.

Mr. BORAH. Mr. President, as I was saying, I do not want to delay a vote if we can have a vote.

Mr. GLASS. Mr. President, I may say to the Senator that a vote seems hopeless, although we are operating under a unanimous-consent agreement which the Senate thought would dispose of the banking bill at some time.

Mr. BARKLEY. Mr. President, we can not even get a vote on amendments that have been agreed on.

Mr. BORAH. Mr. President, I will take only a few moments.

The Senator from Connecticut made reference to me to the effect that I was an advocate of a cheap dollar. If it will suit his taste just as well, I would prefer to say that I am the advocate of an honest dollar.

The insurance companies of Connecticut and other companies loaned the farmers of the United States a vast amount of money which in 1929 amounted to some $10,000,000,000. Since that time they have made practically no loans to the farmers of the United States, and yet, measured by the wealth of the country, the farmers are now indebted to the insurance companies of Connecticut and other companies in the sum of about $30,000,000,000. How did they get this vast unearned increment? By the appreciation of the dollar. Little wonder that the Senator's constituents are complacent and contented. I do not hesitate to say on the floor of the Senate that a dollar which it takes three times as much wheat to buy, three or four times as much cotton to buy, two or three times as many hogs to buy in 1933 as it did in 1929 is not an honest dollar; it is a dishonest dollar.

I am not seeking by any feeble effort of my own to cheapen the American dollar; I am not seeking that kind of inflation which is uncontrolled, such as the Senator referred to; but I do believe, Mr. President, that it is within the power of the great minds of this country to devise a monetary system which will deal equitably and fairly between the creditor and the debtor, between those who must pay and those who are anxious to collect, and I maintain that under the present system and under present conditions that is not the situation which now confronts us.

Mr. President, we are to-day maintaining in this country what is known as the gold standard. I have no desire to go off the gold standard; I have no desire to destroy the gold standard; I think it is an essential factor in our economic and financial world, and I have no desire to destroy it; but I call the attention of the able Senator from Connecticut and others to the fact that while we are on the gold standard, all the other nations of the world, except France, are on a managed-currency basis. Our dollar is appreciating in value day by day. The money of other countries harmonizes with the price of commodities.

And what is the result? The result is that they are not only taking our foreign markets but, over a high tariff wall, they are taking our domestic market. It is alarming to note the extent to which they are underselling our people here at home, and thus adding to the millions already unemployed.

It may be that inflation, or reflation, or change of the currency situation, is not the remedy; but I ask those who criticize the proposal to state to us how they are going to maintain the gold standard under those conditions. We are losing our markets day by day, both foreign and domestic, and never more aggravatingly than at this very hour. How long can that continue without some remedy? And what is your remedy? How long dare we to continue this drifting toward the brink?

Mr. President, money is not wealth. It is simply a measure of wealth, a medium of exchange; and when the situation has changed so that the lender of money can go out into the country and gather up three times the amount of wealth that he could gather with the same number of dollars three years ago, I say the situation calls for the serious consideration of the people who are in power in the United States.

I repeat that what I am hoping for is not a cheap dollar or a dishonest dollar, but a dollar which does equity between the debtor and the creditor.

I am frank to say that I think our remedy lies first in international action. This is true both as to gold and silver. There the safe and sound and efficient remedy is to be found; that remedy should have been sought three years ago. If we can not secure relief there, then we must seek a remedy here at home—more difficult but not impossible. But the situation is imminent, and speedy action is imperative.

Mr. CONNALLY. Mr. President, I listened with some interest to the Senator from Connecticut [Mr. BINGHAM], and with a great deal more interest to the Senator from Idaho [Mr. BORAH]. I want to say just a few words. It will take me only a moment.

The Congress of the United States is being called upon every day to give relief to every branch of industry in the United States. The insurance companies, many of which probably reside in Connecticut, were anxious last year to have the Government come to their relief by loaning them money. They could not realize on their mortgages on farm property. The farmers were not paying their interest. In other words, they wanted relief so that the insurance companies would be lifted up and put on a parity with the gold dollar.

Now the farmers, the agriculturists, are appealing to us, and we tell them that we are going to restore agriculture. How? By pulling agriculture back up on a level with the gold dollar.

Then, the railroads say they are bankrupt, and they are appealing to the Congress to pull the railroads back up and put them on a level with the gold dollar.

So it is with every industry in the United States. They are demanding that Congress relieve them by pulling them up and keeping them on the same level with the gold dollar.

My proposal is, instead of pulling everything else up on a level with the appreciated gold dollar, requiring perhaps a hundred bills and a hundred operations, by one operation to go up and get the gold dollar and pull it down on a level with other commodities and with other values.

Like the Senator from Idaho [Mr. BORAH], I do not want necessarily a cheap dollar or a fraudulent dollar; but I believe that the only way out of these difficulties is to restore gold to its real value, measured by other wealth in the United States.

Mr. BARKLEY. Mr. President——

The VICE PRESIDENT. Does the Senator from Texas yield to the Senator from Kentucky?

Mr. CONNALLY. I do.

Mr. BARKLEY. I do not claim to know much about gold or silver or any other form of money; but suppose we should bring the gold dollar down to such a level that it would be on a parity with all the commodities for which it is now exchanged, and then later these commodities should start back up the hill; what is going to happen to the gold dollar?

Mr. CONNALLY. I will say frankly to the Senator that I discussed that phase of the matter yesterday.

Mr. BARKLEY. I was in committee and did not hear the Senator's speech. That is not a facetious question.

Mr. CONNALLY. I understand that the Senator is not facetious.

I outlined yesterday that there are two phases to the proposition so far as my own views are concerned. One is to pull the dollar down now and revalue it somewhere in the neighborhood of where it ought to be, not with reference to one commodity but with reference to the average of all commodities and all other property. The second is, after we shall have done that—and I have not matured this—then to provide that as to the future, gold bullion shall be stored in the Treasury and not coined, and from time to time the redemption value of a gold dollar shall be changed as the prices of commodities and other values fluctuate.

That answers the Senator.

Mr. BARKLEY. I do not know whether it does or not.

Mr. CONNALLY. It answers the Senator. It may not satisfy him.

Mr. BARKLEY. It replies to me. It may not answer me.

Mr. CONNALLY. It is hard to answer the Senator in that sense.

Mr. BARKLEY. I thank the Senator for his compliment, but really I am serious about this.

We hear a lot of talk about "stabilizing the dollar." I do not know just what that means. If we are to stabilize the dollar so that the dollar is always, every day in the year and every year, to be worth the same, how can we do that without at the same time stabilizing everything else? How can we stabilize the dollar, for instance, in its relationship to the price of corn or wheat or cotton or tobacco, without at the same time stabilizing the price of those products so that they correspond to the stabilized dollar?

Mr. CONNALLY. Does the Senator think the present system stabilizes it?

Mr. BARKLEY. No; I do not. I, of course, am as much dissatisfied with the present system as the Senator from Texas or anybody else can possibly be, and yet I am not sure that any of us have the remedy. I do not know whether all of us together can work it out; but it is not harmful to make these excursions into the forest of knowledge, in the hope that we may cut down a sapling every now and then and run off with it.

I am tremendously concerned about this economic situation. If there is any way to stabilize the dollar so that it would at the same time be dependable and reliable, so as not to stabilize at too low a price, the thing for which the dollar is exchanged, it may be worth consideration; but at present I am frankly unable to see how we are going to stabilize money of any kind unless at the same time we stabilize the things we need and want which we use that money to purchase.

Mr. CONNALLY. I shall reply to the Senator briefly.

Mr. President, let me say to the Senator from Kentucky that under the present system we undertake to measure every commodity on earth by gold. If gold itself were only a commodity, and were not used as money, it would take care of itself, and would go up and down with other commodities, because, being a commodity, it would respond to the economic laws of supply and demand and would vary according to demand for it as a commodity.

I was trying to answer the Senator. Of course I can not answer a Senator who does not want to be answered.

Mr. BARKLEY. If the Senator will pardon me, I was very much interested, and his answer put it into my mind to turn for the moment and ask the Senator from Virginia [Mr. GLASS] a question entirely pertinent to what the Senator has said. Between the two able and distinguished Senators I hope to receive satisfaction.

Mr. CONNALLY. That is all right so far as the Senator from Kentucky is concerned; but I would not be occupying any of this time now except for the interruption and suggestion of the Senator from Kentucky, and it is very difficult

to answer him if in doing so I have to go through the medium of the Senator from Virginia.

Mr. President, let me say to the Senator from Kentucky that if gold were simply a commodity, without monetary use, it would find its proper level among all other commodities. It is impossible, of course, to take up any individual commodity, unless you do it as you do with gold, and stabilize that particular commodity. My tentative suggestion is not to take one commodity but to take a large number of commodities, and, as the average wholesale price varies over periods of months or weeks, to have a gold dollar that will be redeemable in the Treasury at so many grains of gold, measured by that fluctuation of commodities.

The Senator speaks about stabilizing the dollar and stabilizing everything else. Of course, we are not going to be able to peg the price of every commodity in any one fixed place so that cotton shall sell for 20 cents a pound and tobacco for 2 bits a pound—of course not. All we have done now is to measure every other commodity on earth with gold. The result is that we make gold the master of all commodities; and the more governments go on the gold standard, the dearer gold becomes. The greater the scramble for gold, the higher it goes; and the Senator from Kentucky will concede, I believe, that tobacco from his own State maintains to-day no fair relationship with gold according to the standard that it occupied some years ago.

My suggestion is to undertake to counteract some of the artificial value which gold now has by reason of its monetary use, which increases the demand for it by bringing it down more in accord with the world level of the prices of other commodities.

Mr. BARKLEY. Mr. President, will the Senator yield?

The VICE PRESIDENT. Does the Senator from Texas yield to the Senator from Kentucky?

Mr. CONNALLY. I yield.

Mr. BARKLEY. Of course, I am in sympathy with the object sought to be attained by all of our friends here who are economists.

Mr. CONNALLY. I trust the Senator will not be facetious. He said he was not going to be facetious. The Senator from Texas does not claim to be an economist.

Mr. BARKLEY. I was not charging the Senator with being one, but I am suspicious of the word "stabilize."

Three years ago we were told by the present administration—and I do not want to harp now on the dead—that they were going to "stabilize" the farmer, and they have. They have stabilized him to the extent that if he can stay in the stable now he is lucky. I do not want the same sort of stabilizing process to happen to the dollar or to go any farther in stabilizing the American farmer or any other class of the American people. For that reason I am chronically a little suspicious and fearful of the word "stabilize" as it pertains to any legislative effort to fix prices.

Mr. CONNALLY. I did not introduce the word "stabilize." The Senator from Kentucky introduced the word "stabilize" into the discussion. I was not talking about that.

Now I want to ask the Senator from Kentucky a question or two.

Does the Senator from Kentucky agree that the gold dollar to-day is unduly high and dear and that it ought to be reduced?

Mr. BARKLEY. I agree that all dollars, whether they are gold, silver, or paper, are unduly high as compared with the price of commodities.

Mr. CONNALLY. Well, that is the only kind we have. Then he thinks it ought to be reduced, does he not?

Mr. BARKLEY. I think there ought to be a more equitable relation between the dollar and what it buys. All of us can agree about that.

Mr. CONNALLY. Yes.

Mr. BARKLEY. We may not be sure-footed as to what is going to bring that about, or whether any legislation can do it. If I can be shown that any legislation would do that, I would certainly be sympathetic with it; or if any legislation that has been enacted heretofore has contributed to bring about present conditions, which I think has been done, I will say that I would be in favor of instantly repealing that legislation, especially in so far as it affects our trade relations with other nations, and the disadvantage under which large sections of our people operate under these laws that have produced an artificial condition which has at least made its contribution to this unfortunate situation. We are bound to agree, however, that in so far as the dollar—whatever sort of a dollar it may be—fails to purchase what it ought to purchase in the normal condition of business in this country, it is, of course, an artificial and unwholesome condition which ought to be remedied if it is possible to remedy it.

Mr. CONNALLY. The Senator admits that is the condition now.

Mr. BARKLEY. I do; yes, indeed.

Mr. COUZENS. Mr. President, will the Senator yield to me?

Mr. CONNALLY. In just a moment I shall yield. The Senator from Kentucky agrees that all kinds of dollars are too dear now, and that they ought to be reduced. He seems to make some point about gold dollars and other dollars. The reason why I refer to the gold dollar is that all our money now is either gold or is redeemable in gold. It is measured by gold. The difference between the Senator from Kentucky and myself is that I realize that every dollar is too high, gold dollars as well as silver dollars and paper dollars, because they are all redeemable in gold, and I am trying to reduce them, I am trying to bring them down. The Senator from Kentucky realizes that that is true; he wants to bring them down, and yet he is suspicious of everybody who undertakes to bring them down.

Mr. BARKLEY. No; if the Senator will yield there, I am not suspicious of anybody.

Mr. CONNALLY. The Senator said he was suspicious of any plan.

Mr. BARKLEY. I said I was suspicious of the word "stabilize."

Mr. CONNALLY. The Senator from Kentucky used that word.

Mr. BARKLEY. I did.

Mr. CONNALLY. The Senator used it. I am not trying to stabilize them; I am trying to bring them down.

Mr. BARKLEY. Whether we use the word "stabilize" or not, that is the May-pole around which all our intellectual processes march in order to undertake to bring about some degree of parity between commodities and money. Stabilization, of course, does not mean that every day in the year and every year in the century any given product would be sold at the same price.

Mr. CONNALLY. Certainly not.

Mr. BARKLEY. If the law of supply and demand plays any part at all, there is bound to be an area of fluctuation in prices from day to day and from month to month and from year to year. I was not fortunate enough to hear the Senator's speech yesterday, because I was engaged elsewhere, and I do not know what his remedy is for cheapening the dollar.

Mr. CONNALLY. Reducing the amount of gold in the dollar.

Mr. BARKLEY. What effect would that have on the gold dollars that are now in circulation?

Mr. CONNALLY. If a man had one in his pocket, and you could not get it away from him, he could bring that dollar up to the mint and get about $1.50 for it.

Mr. BARKLEY. Then hereafter, of course, the result of that would be the melting of all the dollars that are now in existence, and their recoining into new dollars with about three-fourths the amount of gold in them that is in the gold dollar now.

Mr. CONNALLY. Whatever amount you determine, two-thirds, or 50 per cent, or 75 per cent.

Mr. BARKLEY. What would happen to the other 25 per cent of gold that is left out of the dollar?

Mr. CONNALLY. It would belong to the man who had it, of course.

Mr. BARKLEY. Of course, and he would take it to the mint and have it coined.

Mr. CONNALLY. Certainly.

Mr. BARKLEY. After it is coined at the mint and made into more dollars, the man still has them; they are still his?

Mr. CONNALLY. Certainly.

Mr. BARKLEY. How am I going to get hold of any of them?

Mr. CONNALLY. I need not tell the Senator how the Senator is going to get hold of them. The Senator knows how he gets hold of the dollars he gets now. The Senator would get hold of that many more dollars.

Mr. BARKLEY. Unfortunately, I do not have any bullion and I do not have any gold dollars to be coined.

Mr. CONNALLY. The Senator said he did not have any what?

Mr. BARKLEY. Bullion.

Mr. CONNALLY. Very well. [Laughter.]

Mr. BARKLEY. I was still talking about gold. There are comparatively few people in this country who have any bullion.

Mr. SMITH. Any what?

Mr. BARKLEY. Any bullion. [Laughter.]

The VICE PRESIDENT. There must be no demonstrations in the galleries. If there is a repetition, the Chair will order the galleries cleared. Senators will address the Chair before they interrupt the Senator having the floor.

Mr. BARKLEY. If the Senator——

The VICE PRESIDENT. The Senator from Kentucky has not been recognized.

Mr. BARKLEY. Mr. President, I have been yielded to by the Senator from Texas.

The VICE PRESIDENT. The conversation has been going on longer than it had a right to continue under the rules. Does the Senator from Texas yield to the Senator from Kentucky?

Mr. CONNALLY. I yield to the Senator.

Mr. BARKLEY. I thank the Chair. Unfortunately, most of us do not have any gold, and however small we make the gold dollar we still will not have any. Only those who have gold can take gold to the mint and have it coined into money, and after it is coined into money the original owner of the gold gets the money back.

Mr. CONNALLY. That is right.

Mr. BARKLEY. What I am interested in is to know, seriously, the process by which Dick, Tom, and Harry all over this country who have no gold, and never had any, and never will have any unless they get it in return for something they have that is not gold, are going to get the benefit of this cheaper gold dollar, which will then represent about 75 per cent of the gold that is now in the gold dollar.

Mr. CONNALLY. Mr. President, I can not reply to the Senator fully, because I made a speech here yesterday in which I tried to point all that out, and I can not go all over it again.

Mr. BARKLEY. Mr. President, if the Senator will yield there, if he explained yesterday how a man who has no gold, and no money, can get some of this new gold that is going to be turned out of the mint, I will relieve him of the obligation of explaining it to me now, and will read his speech; but I did not understand that the Senator went into details explaining the minutiæ as to how this money is to be sifted out amongst the rest of us who have not any gold to be coined into money.

Mr. CONNALLY. Let me say to the Senator, if he is serious about his question, that of course a man who has not any gold, as the Senator says, and never did have any gold, and never is going to get any gold, will not get any under this plan or under any other plan. He must have a commodity or services or something to sell or exchange for money in order to get it. The point the Senator from Texas makes is that when you lower the gold content of the dollar you lower the value——

The VICE PRESIDENT. The Senate will please be in order.

Mr. CONNALLY. If the Senator does not want an answer, I can not take all day to answer him.

Mr. BARKLEY. I am trying to listen to the Senator.

The VICE PRESIDENT. The Senate will be in order, and the Chair will call the names of Senators if they do not come to order.

Mr. CONNALLY. I thank the Chair. If the Senator from Kentucky will read my remarks of yesterday, he will see that it is not so much the gold dollar about which we are concerned, but that is the only kind of standard we have. They are all dollars. If we reduced the value of every dollar in existence by one-third, the man out in Kentucky who never saw a gold dollar, if he got hold of a greenback, or a silver dollar, or a thin dime, would get more money than he does now. He would get more by a third. That is the short cut of it. Of course, the man who has actual gold in his pocket——

Mr. LOGAN. Mr. President——

Mr. CONNALLY. Just a moment. I want to finish this statement. The man who to-day has gold bullion can go to the mint and have it coined into dollars. Under the proposed plan, of course, if a man has gold bullion he will do the same thing. Instead of getting $2, he will get $3; but he will still have the same amount of actual gold. The dollar will be worth less money measured by other commodities.

Somebody may say, "That is altogether a bugaboo. You are going to give the men who actually have gold more value than they have." No; that is not a fact. Suppose one has a farm out in Kentucky and there is a mortgage on it. The farm is worth $15 an acre, we will say, under the present standard of a gold dollar. If gold dollars are reduced by one-third, the value of the farm will go up one-third. You are not giving anything to the man who happens to have gold, because by the same token you are giving every other man who has any kind of property which is measured in gold values the same increase in his property that you give the man with the gold dollar who has it recoined.

Now, I yield to the Senator from Michigan.

Mr. COUZENS. Mr. President, I would like to ask the Senator from Texas if there is any different number of grains of gold in the dollar now from what was in it in 1929.

Mr. CONNALLY. Not a grain.

Mr. COUZENS. Then, when the country is complaining about the high cost of living, I assume, under the Senator's theory, he would add more gold to the dollar?

Mr. CONNALLY. How is that?

Mr. COUZENS. I assume, inasmuch as the Senator now wants to reduce the number of grains in a dollar because commodity prices are low, that when the cost of living rises, and people complain about the high cost of living, then he would add more gold to the dollar?

Mr. CONNALLY. If commodity prices went skyrocketing, measured in gold, it would be fair to let gold go up with other commodities, would it not?

Mr. COUZENS. So, as a matter of fact, we do not standardize gold.

Mr. CONNALLY. No.

Mr. COUZENS. But the Senator spoke a while ago of the fact that the trouble was that Congress had standardized the value of gold.

Mr. CONNALLY. We do.

Mr. COUZENS. That is not a fact.

Mr. CONNALLY. I beg the Senator's pardon.

Mr. COUZENS. Because the number of grains of gold in the dollar remains the same whether prices are high or low.

Mr. CONNALLY. Very well. But let me ask the Senator what makes gold worth what it is worth?

Mr. COUZENS. The value of gold has not changed, because there are the same number of grains in a dollar that there always were.

Mr. CONNALLY. But what makes gold any better than a piece of silver?

Mr. COUZENS. What makes it worth any less when prices are high?

Mr. CONNALLY. I am trying to direct the Senator's attention to the fact that the Government, when it decrees that gold, and gold alone, shall be the only money, arbitrarily adds to the demand for gold and gives it a money value which it does not possess as a commodity. A similar thing happened as to silver. When silver was a standard people wanted it as money, and there was a demand for it, and it maintained a higher value that it has to-day. Governments went off the silver standard, people did not need silver for money, and silver went down and down and down, because when it was demonetized it ceased to be money and became a commodity like so much oats or so much wheat. There is less demand for silver. People do not want silver in the same volume, and silver goes down. When India went off the silver standard and went on the gold standard that added arbitrarily to the value of every gold dollar in existence.

Mr. COUZENS. Mr. President, will the Senator yield further?

Mr. CONNALLY. I yield.

Mr. COUZENS. I will ask the Senator this question. In what respect, then, does the Government control the value of gold, when wheat is $2, and a gold dollar buys only half as much wheat as it does now?

Mr. CONNALLY. I am not going to measure the gold dollar by one commodity. We would have to take the average commodity price.

Mr. COUZENS. Let us take the general commodity price, then, and use that as a basis, instead of one commodity. I submit that the Senator is talking in error, because the number of grains in a dollar——

Mr. CONNALLY. Do not change.

Mr. COUZENS. Do not change.

Mr. CONNALLY. Neither does the Senator from Michigan.

Mr. COUZENS. The Senator from Michigan tries not to get off a sound principle, to the effect that the same number of grains of gold remain in a dollar whether that dollar buys 3 bushels of wheat or buys 1 bushel of wheat.

Mr. CONNALLY. The Senator is absolutely mathematically correct.

Mr. COUZENS. If the Senator now wants to cut the gold content of the dollar in half, he would have to multiply it by three or four in times when commodity prices rose to that extent.

Mr. CONNALLY. Not necessarily.

Mr. COUZENS. The Senator can not have it all one way.

Mr. CONNALLY. I told the Senator a while ago that, of course, it would go up if other commodities went up. But I am not tied to that theory. I am concerned right now with revaluing the dollar now so that the people of the United States can pay their debts. Does the Senator from Michigan contend that the gold dollar now has a fair relationship with other commodities?

Mr. COUZENS. No; the Senator does not contend that; but the Senator contends that when wheat or other commodities are raised 300 per cent, there is the same justification for adding more gold to the dollar that there is for taking it out.

Mr. CONNALLY. I said that. I agreed with the Senator.

Mr. COUZENS. Then, I ask the Senator, how often and in what range we must vary the gold content of the dollar?

Mr. CONNALLY. I say to the Senator, as I have said all along, I have not matured the details of the plan; but there are a number of plans, as the Senator knows. The Goldsborough bill, which passed the House of Representatives, contained a plan for varying the value of the dollar from time to time according to commodity prices. I am not prepared to-day to tell the Senator in detail whether I would change it every week or month or year or six months, or what. I have not matured the matter to that extent, but certainly the principle is the same.

Mr. COUZENS. Will the Senator yield further?

Mr. CONNALLY. Yes; I yield.

Mr. COUZENS. The Goldsborough bill did not propose to change the gold content of a dollar. The Senator referred to the Goldsborough bill. The Goldsborough bill did not propose that at all.

Mr. CONNALLY. It did propose this: It proposed to regulate the value of currency and money in volume by the index of commodity prices, did it not?

Mr. COUZENS. No; the Senator is in error, I think.

Mr. CONNALLY. Will the Senator enlighten me?

Mr. COUZENS. Yes; I will try.

Mr. CONNALLY. I thank the Senator. He probably has a better knowledge of that bill.

Mr. COUZENS. No; I think not. The Senator knows the high regard I have for him. What it did was to stabilize the prices of commodities, not by the variation of the gold content of the dollar. What was proposed was that when the commodity prices went below an average over a period of years, then money would be inflated.

Mr. CONNALLY. For what reason?

Mr. COUZENS. For the purpose of keeping the commodities at a stable price level, not the money.

Mr. CONNALLY. But the Senator knows that the money——

Mr. COUZENS. Wait a minute! I know the Senator's exuberance and his anxiety to debate the question. There was no consideration given in the Goldsborough bill to changing the gold content of the dollar. What was proposed was that when the commodity prices got below a certain average the money would be inflated in an effort to maintain the commodity prices at that particular level. There was no discussion of changing the content of the dollar. Then, when prices got too high above the general average, the deflation was to discontinue and to be absorbed so as to maintain the level of commodity prices, always based, however, on the content of the gold dollar being somewhere about 23 grains.

The PRESIDING OFFICER (Mr. VANDENBERG in the chair). The time of the Senator from Texas has expired.

Mr. CONNALLY. I very much regret that I have not sufficient time to answer the Senator from Michigan.

Mr. LOGAN. Mr. President, I have no desire to delay a vote and I shall occupy only a few moments of the time of the Senate.

As I understand the plan of the Senator from Texas [Mr. CONNALLY], he proposes to reduce the value of the gold dollar by one-third. If we have $5,000,000,000 in gold then that would increase our gold dollars to about $6,800,000,000 or $7,000,000,000, or something like that, roughly speaking. Then, with the present coverage of gold of 40 per cent behind the gold currency, we would have $12,500,000,000 of currency, but if we increased the value of the number of gold dollars to $7,500,000,000 and we would still have a coverage of 40 per cent, then we would increase the currency that might be issued, based upon our gold dollar, to about $17,500,000,000 of money.

If that be true it seems to me the Senator from Texas could achieve his end by amending the law and reducing the coverage in gold as the basis for the issuance of currency. If he could reduce that and say the proportion should be 30 per cent gold and 70 per cent something else, we would get more currency without reducing the value of the gold dollar and without reducing the number of grains in the gold dollar. That is all.

Mr. LONG. Mr. President, will the Senator yield for a question?

The PRESIDING OFFICER. Does the Senator from Kentucky yield to the Senator from Louisiana?

Mr. LOGAN. I yield.

Mr. LONG. I do not want to take credit for the idea, and I am merely trying to propound the question second-hand, because it was suggested to me by another Member of the Senate.

How are we ever going to get out from under this very crude structure where our commodities are only worth one-fourth or one-fifth of what they were and our indebtedness is based upon commodities yielding an amount five times what they now yield, unless we bring up the commodities or

level down the currency structure, one or the other? Does the Senator see how we can ever get out otherwise?

Mr. LOGAN. No; I do not. If we increase the quantity of currency or if we artificially reduce the value of the dollar, that is a pro rata repudiation of outstanding debts and obligations. If we would talk about it in that light, I think we and the country would understand it better. If a man can pay his debts now with dollars worth only two-thirds of what they were worth when he created the indebtedness, of course there has been repudiated for him one-third of his indebtedness. We could reach the same end by reducing the interest rate on long-time bonds or reducing the amount that has to be paid to retire the obligations of farmers. If the farmer is paying 6½ per cent and if that could be reduced until he could pay the same debt in a period of 30 years at 3½ per cent, that would be a repudiation of nearly one-half of his indebtedness.

Mr. LONG. The Senator uses the word "repudiation."

Mr. LOGAN. I mean a lawful repudiation as against a bankruptcy repudiation.

Mr. LONG. After the war, along about 1920 or 1921 or 1922, there were a number of contracts outstanding between street railroads and electric-light companies under which certain services were agreed to be given to cities and towns. For instance, street-railway fares were, most of them, fixed at 5 cents per passenger and railroad fares were fixed in most contracts at 3 cents per mile. Our court made a repudiation of its own of that contract simply by saying the dollar had become so cheap that it would not longer buy the services or the commodities, and the court set aside those contracts.

Mr. LOGAN. Because they were confiscatory.

Mr. LONG. It was held at that time to be a regulation; that the changed condition required that the contracts should be changed. While not confiscatory at the time they were made, nevertheless it was held they had become confiscatory. Is there any difference in the condition we have to-day? Have not the same contracts become confiscatory when a man borrowed enough that 4 bales of cotton would pay his debt and now 16 bales would not pay the same debt? Does not the Senator think the same rule applies?

Mr. LOGAN. I would not attempt to discuss the matter from a legal standpoint. We are confronted with a condition rather than a theory. It is impossible, absolutely impossible in my judgment, for the American people to pay their private debts or their public debts. The sole question is whether there shall be some relief through law or whether the matter shall be liquidated through bankruptcy and foreclosure procedure.

It has been said by the distinguished Senator from Virginia [Mr. GLASS], and approved I believe by my colleague from Kentucky [Mr. BARKLEY], that the banks have plenty of currency. Probably that is true of the larger banks. I do not know. But if we meet 100 men on the streets of this or any other city in the United States, if any Senator will go into the farming communities or the manufacturing communities or the mining communities and ask 100 men that he may meet what they need most, every one of them will say money and that they can not get it.

If we have plenty of currency—and I do not dispute it because I do not know much about these matters—we ought to be able to do something to start it moving. The velocity of circulation is just as important as the quantity of money. If we have the money, as suggested by the very able Senator from Viriginia—and there is not a man in the United States I hold in higher regard than I hold him—then I ask him and the other Senators and the Members of the Congress as a whole, what can we do as the representatives of the people to make the money available to those who are losing their property daily, who can not buy the necessaries of life and who can not pay their interest, the value of whose property has absolutely been destroyed until they have nothing to offer the banks or anyone else to enable them to procure the money.

I am not so much concerned about what kind of currency we are going to have or what kind of currency we do have so long as it is good and sound. But I want some one to tell me how we can devise a plan that will enable the suffering, starving, failing men of America to obtain the money that they need to restore their purchasing power and to carry on their business.

Mr. GLASS. Mr. President, at some suitable time I would be perfectly willing to give my friend from Kentucky, whom I highly respect, an answer to his question, but an answer at this time would serve no purpose whatsoever.

Mr. President, we consumed eight hours of the time of the Senate yesterday in discussing problems that have no more relation to the pending bank bill than the Boxer revolution in China 25 or 30 years ago. Now we have spent 5 hours and 10 minutes to-day doing exactly the same thing. I should like to know when we are going to vote on the amendments to the bill. The pending amendment to the bill, as the managers of the bill have tried to indicate, is not objectionable, and we are perfectly willing to accept it. We think the Senate ought to vote on it.

If there is to be interminable discussion of matters that have no relevancy at all to the provisions of the bill we not only will not get through with this bill, but we will not get through with any remedial or helpful legislation such as the people have been calling for at this session of Congress.

I appeal to Senators to let us vote on the minor and unobjectionable amendments to the bill. Then if there should be any controversial provisions remaining—and I think there is but one and that might be quickly disposed of—Senators may talk upon those controversial provisions of the bill. But why should we lose the time of the Senate in this way? Twenty days have gone by on this bill alone and nothing done, at very great expense of the taxpayers of the country. We are discussing something that is not here for decision, something that some of us regard as impossible of solution, and something that is not proposed now to be decided in any way. Therefore I hope we may have a vote on the pending amendment.

Mr. THOMAS of Oklahoma. Mr. President, the rules of the Senate require that a Senator addressing the Senate shall face the Chair and address the Chair. I ask unanimous consent and permission of the Chair that I may temporarily address the Senate, which will necessitate having my back to the Chair a portion of the time.

The PRESIDING OFFICER. The Senator from Oklahoma will proceed.

Mr. THOMAS of Oklahoma. If I may have the attention of Senators for a few moments, I would like to give to them some facts for their consideration. Let me say as a preface that in my judgment the speech just made by the distinguished senior Senator from Idaho [Mr. BORAH] is worth more to the people than this entire session of Congress will cost the people of the United States.

Mr. President, I have waited for 10 years to have an opportunity of witnessing the Senate seriously considering the money question and by the money question I mean the management of money, and the amount of money and credit, upon the business of the country.

The first thing I call to the attention of Senators is the United States Department of Labor commodity index. This is presumed to be the most stable thing that the genius of mind has developed. Even gold is valued by this index. It is made up of the average of all wholesale and commodity prices. Let me call attention to the following facts:

As measured by this index of values the cheapest dollar we have had in recent years was in May, 1920. In May, 1920, the dollar was worth $0.598, or, in other words, five hundred and ninety-eight one-thousandths of a dollar. For the purpose of the argument, I am going to suggest that a dollar at its lowest period was 60 cents in May, 1920. The highest priced dollar that we have had in recent years—I just said that the cheapest dollar was in May, 1920. That was at a time when we had the largest amount of money in circulation—and by "money" I mean gold, silver, and paper currency that one can spend with a stranger.

In December of last year, 1932, we had the highest dollar that this index has recorded in recent years. At that time the dollar was worth 159$^{7}/_{10}$ cents; in other words, to make

the figures even, the dollar in December last was worth 160 cents. I hope the Senate will get these figures. In May, 1920, when we had plenty of money, the dollar was cheap and only bought 60 cents in value for a hundred cents, so to speak, while in December last month, when we had no credit, and what we had was frozen, and when only a little money was in circulation, most of it being hoarded, we had the highest priced dollar in recent history—a dollar worth 160 cents.

Let me apply, if I may, these figures to present conditions. In May, 1920, I said the purchasing power of the dollar was 60 cents. That was when the bulk of these debts was contracted; that is when we had $26,000,000,000 of Government bonds outstanding. In May, 1920, those bonds in buying power were worth but 60 cents on the dollar. What are those bonds worth to-day? Of the original $26,000,000,000 issue some $20,000,000,000 remain outstanding. In 1920, $20,000,000,000 of these bonds were worth, in buying power, only some $12,000,000,000, but to-day those bonds are worth not 60 cents, but 160 cents on the dollar. Hence the bonds we have outstanding—some $20,000,000,000—to-day have buying power in the sum of $32,000,000,000.

Let me call attention to a second proposition. Interest on these bonds has likewise increased in value. Not only have the bonds gone up in buying power but the interest, which the people likewise must pay, has gone up. The interest on the bonds is about 3½ per cent; the bonds have gone up from 60 to 160 per cent. So the interest to-day in value is not 3½ per cent on $20,000,000,000, but has increased correspondingly in buying power.

Let me call the attention of the Senate to a third proposition. Last winter two eminent economists, Doctor Warren and Doctor Pierson, before the Banking and Currency Committee, in the consideration of the Goldsborough bill, testified that in 1929 the people altogether owed some $200,000,000,000 in debts. Is that the value of those debts now? Much of this indebtedness was incurred prior to and immediately after 1920. When most of these debts were created the dollar was worth only some 60 cents. To-day, to get rid of this indebtedness, we must pay with 160-cent dollars.

Mr. LONG. What I have apparently been unable to get anybody in the Senate to observe is this: In 1920, when the dollar was worth only 60 cents, the Supreme Court of the United States annulled thousands of contracts, private and public, saying that the regulation of the Government was such that it was necessary to revalue the services to be performed on the basis of the value of commodities as of that time. They took a 5-cent railroad fare and made it 8 cents; they took a 2-cent railroad fare and made it 3.6 cents; they cancelled electric contracts and raised them because the dollar had fallen from a dollar to 60 cents. Yet we are breaking the camel's back trying to go against a rule that nobody on earth can dispute.

Mr. THOMAS of Oklahoma. While the massed debts of all the people are estimated to total some $200,000,000,000, yet to liquidate such indebtedness it will take some $320,000,000,000 of value as measured by the present hight-priced dollar.

To-day the people must not only pay high-priced dollars to liquidate their loans but, in addition, they must get high-priced dollars with which to pay the interest.

Let me call the attention of the Senate to another proposition—the tax burden of the Nation. It costs the people of the United States $5,000,000,000 to run the National Government. It costs the people of the States, the cities, the counties, and the districts $7,000,000,000 more to pay their local expenses. Seven and five make $12,000,000,000 of taxes the people must pay each year to meet their tax obligations. But can they pay with $12,000,000,000 of value? Most certainly they can not. Instead of being able to pay with $12,000,000,000 of value, they must pay in these high-priced dollars. Make the computation from the best standard we have and the people, in order to pay their taxes, must part with wealth in the total sum of $19,200,000,000. No wonder the people can not pay their taxes!

The distinguished leaders of this body on both sides and the sponsors of this bill are gone. They will not listen. Mr. President, let me say here that this discussion is joining, in my judgment, the most important issue that this Nation has ever faced. Already upon this bill cloture has been sought to be invoked; then yesterday, before the discussion on an important amendment was concluded, a motion was made to table; and to-day the author of this bill made the threat that cloture was coming again. Well, Mr. President, we must first get rid of the unanimous-consent agreement before cloture can be in order, and if the unanimous-consent agreement is voided and cloture is ordered, such action will further accentuate this issue.

Mr. President, I have some rights on this floor. I have a commission from one of the great sovereign States of this Republic. That commission is about to expire. And when it does, I have a new commission to stand here, if I live, for six years more. During the six years I have been here I have seen many Senators come and go; and during the next six years, if I live, Mr. President, I shall see other Senators go. But again to the discussion.

I was talking about the tax burden, Mr. President. Let me briefly recapitulate. The American people to-day owe value covered by bonds, notes, installments, and mortgages in a total sum of over $320,000,000,000. The people owe interest on this gigantic debt, and such interest must be paid with these high-priced dollars. In order for the people to pay their interest and their taxes, they must part with more value—caused by the excess buying power of the dollar—than the total value of the national income at this time. Yet, we wonder why taxes can not be paid, why interest can not be paid, and why millions of our people are walking the streets looking for shelter and begging for food.

Yet, Mr. President, distinguished Senators allege that if we cheapen the dollar one iota, we thereby are debasing the dollars of the people of the Nation.

Mr. President, interest and taxes alone based upon this high-powered dollar are more than the annual income of the people of the country.

Mr. President, let me next call the attention of the Senate to the excesses—the values the people have to pay more than they should have to pay. What is the excess on the massed debts of the people?

The people owe two hundred billions. In value they are worth three hundred and twenty billion. There is one hundred and twenty billions of wealth, of value, in the hands of those who hold fixed investments that they did not earn and that they have no right to; yet the distinguished Senator from Connecticut [Mr. BINGHAM] this afternoon stated that if anything was done to cheapen the dollar, the creditor class would be injured and ruined. Well, Mr. President, we could take $120,000,000,000 of wealth from the holders of fixed investments and they would suffer no injury. When we take it from the creditor class that did not earn it, hence does not deserve it, and put it back in farm values, in city real-estate values, and in commodity values, no harm has been done such creditor class—only simple justice to the people of the Nation.

Mr. TYDINGS. Mr. President——

The PRESIDING OFFICER. Does the Senator from Oklahoma yield to the Senator from Maryland?

Mr. THOMAS of Oklahoma. For a question only.

Mr. TYDINGS. I should like to ask the Senator if he recalls that in 1920, when prices went higher than the value of the dollar by parity, and an effort was made by the Federal Reserve Board to bring down the prices, the agricultural population of the country, among others, rose up in righteous wrath? Also, while I am no great admirer of Mr. Mellon's talents, may I ask the Senator if he does not remember that prior to the debacle of 1929, when Mr. Mellon warned the country that this very thing would happen, he was denounced in every stock-broker's office, in every farming community, in every business house, as a man who wanted to wreck the prosperity of the Nation?

Mr. THOMAS of Oklahoma. Mr. President, I have tried to say on numerous occasions here that I think the dollar

was too cheap in 1920. It was worth only 60 cents. I stand for a 100-cent dollar based upon the commodity index of 1926. That was the time when wheat was bringing some $1.50 a bushel, when corn was bringing around $1 a bushel, when oats was bringing around 60 cents a bushel, when cotton was bringing around 20 cents a pound.

Mr. TYDINGS. Mr. President, will the Senator yield further?

Mr. THOMAS of Oklahoma. I yield for a question.

Mr. TYDINGS. If the Senator's plan is adopted, when the price of agricultural products goes above the normal price of the dollar, will the Senator favor legislation which will bring down the price of agricultural products?

Mr. THOMAS of Oklahoma. Absolutely; and I have spoken to that effect many times here.

Mr. TYDINGS. Mr. President, will the Senator yield?

Mr. THOMAS of Oklahoma. I yield.

Mr. TYDINGS. I do not mean to question that the Senator would keep his word; but may I say that when he attempts to bring down the prices of agricultural products, he will find about 2,000,000 of the angriest farmers he ever saw right outside the doors here who will want to know why their prosperity is being taken away from them.

Mr. THOMAS of Oklahoma. I am not trying to "bring down" agricultural prices; instead I am trying to raise such prices. I am trying to place some value back in farm lands. I am trying to put some value back in wheat. I am trying to put some value back in cotton, and in corn, and in hogs, and in horses, and in cattle, and in all the things the people produce with which to get money to pay their interest and to pay their taxes; and yet Senators here insist that those who have this wealth that they did not earn, and that they do not deserve, should be permitted to keep it!

Mr. WHEELER and Mr. TYDINGS addressed the Chair.

The PRESIDING OFFICER. Does the Senator from Oklahoma yield; and if so, to whom?

Mr. THOMAS of Oklahoma. I yield first to the Senator from Montana.

Mr. WHEELER. Mr. President, I should likewise like to call the attention of the Senator from Maryland to the fact that Mr. Mellon and Mr. Hoover, instead of trying to bring prices down to meet the dollar, continually said, "Do not sell the country short!" They were constantly bulling the market every time it started to waver in the slightest degree; and if anybody is responsible for the inflation of 1929, it was the Coolidge-Hoover régime.

Mr. TYDINGS. Mr. President, will the Senator from Oklahoma yield for a question?

The PRESIDING OFFICER. Does the Senator from Oklahoma yield further?

Mr. THOMAS of Oklahoma. If the Senator will permit me, I want to finish this line of statistics, and I can do it in a few moments. Then I will yield to the Senator from Maryland because he is interested in this particular question.

Mr. TYDINGS. Then may I ask a question which has some pertinency to that very thing?

Mr. THOMAS of Oklahoma. I yield.

Mr. TYDINGS. I do not mean to say that what the Senator says is not logical about keeping some relationship between money and commodities; but what I should like to ask the Senator is, after we have listened to this debate on the floor this afternoon, whether it would not be well to have a stabilization of facts; namely, the appointment of an outstanding group of monetary experts who could go into this matter and present to the Senate a plan which would be sound, based upon experience and training, rather than to take panaceas which are offered here in the turmoil of a legislative session which is only 80 days long to begin with?

Mr. THOMAS of Oklahoma. I am delighted to have this concession on the part of the distinguished senior Senator from Maryland. I agree that that would be a fine thing. In support of that concession, let me call attention to these facts——

Mr. TYDINGS. Mr. President, will the Senator permit one more question, and then I promise not to interrupt him again?

Mr. THOMAS of Oklahoma. Briefly.

Mr. TYDINGS. I am considering, may I say to the Senator, proposing an amendment to the proposition of the Senator from Mississippi [Mr. HARRISON], now pending, to appoint a commission to see what, if anything, can be soundly done to bring in a remedy that will at least have the best thought that this Nation can produce to equalize this condition, first of inflation and then of deflation, which causes sadness and sorrow and suffering from time to time.

Mr. THOMAS of Oklahoma. That is a most constructive suggestion.

Now, may I say for the special benefit of the distinguished Senator from Maryland that I have prepared the following figures. I knew he was going to ask that question; and if he will give me his attention, I think he and I can come to an agreement.

I have proceeded, in the balance of my figures, on the assumption that the dollar, in buying power, should be 100 cents, not a 60-cent dollar or a 90-cent dollar, but a 100-cent dollar, and not a $1.25 dollar or a $1.60 dollar, as it is to-day.

If my figures are correct, and we do have two hundred billions of debts outstanding, most of those debts are interest-bearing. The average rate of interest on those debts is 5 per cent. So the people must raise, on the basis of a 100-cent dollar, ten billions of such dollars with which to pay their interest. They can not pay it with $10,000,000,000 in value, however. They must pay it with a 160-cent dollar, which makes it necessary to raise sixteen billions of wealth to pay the interest. There is an excess demand on account of interest in the sum of $6,000,000,000.

Mr. TYDINGS. There is no question about that. That is what we are all here to deal with, but may I submit to the Senator that it is perfectly apparent that the remedies which are being offered do not inspire the Senate with confidence.

Mr. THOMAS of Oklahoma. Mr. President, if we can inspire the Senate with a determination to do something, we shall have accomplished our purpose.

Now the second proposition—taxes.

If my figures are correct, that it takes $5,000,000,000 to run the Nation and $7,000,000,000 to run the States and local governments, then our total tax bill is some $12,000,000,000; so with 100-cent dollars it would take $12,000,000,000 to pay our taxes, the overhead expenses of government. But we can not pay with $12,000,000,000 of value. We must pay with 160-cent dollars; so to pay the twelve billions we must raise $19,200,000,000 in wealth to pay our taxes. There is an excess of some $7,200,000,000 in value or wealth the people must raise to liquidate their taxes for local, city, State, and Federal governmental purposes.

Mr. TYDINGS. Mr. President, not only is the Senator right, not only must they raise that much, but may I observe that 12,000,000 of these people are out of employment. There are a million farms sold under mortgage foreclosure. Five thousand banks have failed. I am not standing up here arguing that we are in a period of prosperity, but it is perfectly apparent that we are not going to get any adequate remedy by the character of debate that is going on here. It is simply wasting time without accomplishing anything.

Mr. THOMAS of Oklahoma. Let me summarize again. The people, in order to secure these high-priced dollars with which to pay their obligations, must part with $6,000,000,000 more in value to pay the interest on their debts. They must pay $7,200,000,000 more in excesses on their taxes. These two items alone total $13,200,000,000 that the people must pay that they should not pay, and all because of the present high-buying power of the dollar. It is a dishonest act to force the people to pay this increased value to satisfy the creditors and the tax gatherer. The States are powerless to act. The cities and the counties, likewise, are overpowered with this high-priced dollar. Who can help? Who can give

relief? Only the Congress of the United States; and we are sitting here idle, impotent, and dumb.

Mr. GLASS. Not dumb.

Mr. TYDINGS. Mr. President, will the Senator yield? I do not mean to say that Congress can not do some things. I think we can agree on a lot of things; but one thing we can not agree on is the method of changing the value of the American dollar without the very best testimony from the very best experts within the limits of this Nation. If we do not have that, no man is enough of an expert upon monetary matters, except perhaps, in a few cases, to vote for a remedy that is proposed here just because the conditions exist.

The PRESIDING OFFICER. The time of the Senator from Oklahoma has expired.

Mr. WHEELER presented telegrams and a letter in relation to Senate bill 4412, the pending banking bill, which were ordered to lie on the table and to be printed in the RECORD, as follows:

MISSOULA, MONT., *January 23, 1933.*

B. K. WHEELER,
United States Senate:

Understand that you and other Senators are being bombarded with telegrams urging support of the branch banking features of the Glass bill. I want to assure you that if such telegrams are being received in considerable numbers, they do not reflect the opinion or the desires of the great mass of the people of this State and do not reflect the views of 1 per cent of our business and professional men. The best banks in this State at this time from point of view of soundness and service to the State are the independent banks. In the opinion of unbiased observers Montana's experience with chain banks had been an unhappy and an unfortunate one. It is these same chain banks who are attempting to extend their power in a wrong direction through the Glass bill, and it is they who have inspired the propaganda now reaching you. As usual the people of Montana appreciate and are grateful for the position which you are taking upon this bill.

WALTER L. POPE.

COFFEE CREEK, MONT., *January 24, 1933.*

Hon. B. K. WHEELER,
Care Senate Office Building, Washington, D. C.:

Please kill branch banking bill. Most damaging institution in Northwest. Does not respond to needs of our people. We strenuously object to Mr. Glass in Roosevelt cabinet.

COFFEE CREEK FARMERS UNION (INC.),
T. S. PLATTS,
Manager Coffee Creek Taxpayers Association.
W. F. CRISWELL,
Secretary Coffee Creek Community Club.
F. A. CHAMBERLAIN, *President.*

THE FIRST NATIONAL BANK,
Wibaux, Mont., January 21, 1933.

Senator B. K. WHEELER,
United States Senate, Washington, D. C.

DEAR SENATOR WHEELER: I have your letter of January 18 referring to a telegram supposedly to have been sent by me for you to support the Glass bill. I do not understand this because I never sent any such telegram. I wired you immediately:

"There must be somebody sending phoney telegrams to support Glass bill. I am opposed to Glass bill, and every other independent banker here is. Some big banks must be putting over a fast one again."

Now, the matter of fact is that the two big chain banks of Minneapolis wired us independent bankers to meet them at Glendive, none of us knowing what they wanted, in fact, they wired us to meet a particular officer on an important business matter. When all the independent bankers got there, they found that these Twin City bankers or chain banks wanted the independent bankers to indorse the Glass bill. The discussion at the meeting was that very few independent bankers knew anything very much about the Glass bill, but one thing was—and they were almost unanimous in this opinion—that section 19 of the Glass bill, allowing branch banking, was a death knell to the independent banks and with branch banking throughout the United States, it would only be a short time when Wall Street would own all the finances of this great country.

Therefore a great number of us independent bankers sent you telegrams stating for you to oppose this bill and especially section 19.

This telegram, of course, was sent by one of the officers of the chain banks, and he must have made a mistake or something because his telegram did not convey to you our wishes.

You will find, Senator, that every independent banker in this Northwest is with you and Senator LONG and Senator THOMAS in opposing the Glass bill; and we hope that you will be successful, for you Senators are the only Senators there that are really representing your people at home, and the wishes of your people at home, and we trust that you will defeat it if possible.

We didn't believe that anybody could make a mistake as these boys in the Twin Cities have, and it looks to me like a child could see what the Glass bill would do to us if passed in its present form.

Yours for success, I am, yours very truly,
P. A. FISCHER, *President.*

Mr. REED. Mr. President, on December 14 the Senate ordered to be printed as a Senate document one of the annual studies made by the War Department of battlefields within the United States for commemorative purposes. In printing that document, a mistake was made in garbling a table which was contained in a report, and a mistake was made by myself in not offering with the report two maps that accompanied it. They can be printed with the facilities of the Government Printing Office without difficulty.

I now ask that the report, as it should have been printed, be printed again as a Senate document, with the inclusion of the two maps that accompany it.

The PRESIDING OFFICER. Is there objection?

Mr. GLASS. Mr. President, I have no objection to that if it may be done without being regarded as the transaction of business.

The PRESIDING OFFICER. The Chair knows of no way in which that can be done.

Mr. GLASS. Then I shall be compelled to object to it just now.

The PRESIDING OFFICER. The Senator from Virginia objects. The question is on the amendment submitted by the Senator from New Jersey [Mr. KEAN].

Mr. LONG. Mr. President——

The PRESIDING OFFICER. The Senator from Louisiana.

Mr. LONG. If the Senator from New Jersey [Mr. KEAN] wishes the floor, I will yield to him.

Mr. KEAN. No; I do not wish the floor. I want a vote.

THE ABYSS YAWNS FOR ALL

Mr. LONG. Mr. President, I have not consumed a single minute. We have been in session here nearly six hours to-day. I felt constrained to say nothing at all, and I have not said a word about this amendment.

I do not want to divert the Senate from its discussion of the money question, because I must frankly say that I think a great deal of good has been done by the discussion here to-day. I think it should be said to the credit of the Senator from Virginia that his bill, whether or not it is desired by us all, has served as the means of education and discussion of value in the Senate on the money question.

The Senator from Maryland [Mr. TYDINGS] has said to the Senator from Oklahoma [Mr. THOMAS] in effect, that he ought to be willing to increase the gold content of the dollar or the purchasing power of the dollar when it is abnormally low.

Mr. TYDINGS. Mr. President——

The PRESIDING OFFICER. Does the Senator from Louisiana yield to the Senator from Maryland?

Mr. LONG. I yield to the Senator from Maryland.

Mr. TYDINGS. I shall have to take issue with that. I do not want to be put down as adopting any one of these panaceas that have been offered. I do embrace the general idea that if we can soundly lessen the evils of too wide a fluctuation in commodity prices, it should be done.

My own humble opinion is to the effect that a restoration of world trade, many measures that could be projected to stabilize the currencies of silver countries, a fair consideration of war debts, and an adequate amount of disarmament to a peace-time basis will in themselves accomplish what the Senator from Oklahoma seeks to accomplish by his inflation measure.

I for one think that the "four horsemen" of this depression are riding outside the Congressional corral. They are in the field; they are in international pastures, and they can not be roped by us entirely here. We can help, but they will have to be settled in large measure through international diplomacy and conference and accord; and one reason why I do not want to vote for any of these intermediate measures is because I fear they will delay the ulti-

mate and sound solution which must come in the way I have just mentioned.

For that reason I would not object to a study of this question, but I would not want to do something which would only hamstring the efforts of those in places of high authority which, I believe, will be made after the 4th of next March.

Mr. LONG. Mr. President, the Senator from Maryland calls to my mind a little expression of a certain gentleman back a number of hundred years ago, who went to a Great Teacher and told Him his ideas of what might be eternal life. When he had stated to the Great Teacher, or the Savior, what he thought should be the fundamental ideas of eternal life, the Savior turned to him and said, "Thou art not far from the kingdom."

Had my brilliant friend from Maryland included in the list of wrongs which he gave the further statement that we could not concentrate the wealth of the land in a few hands, he would have himself prescribed a panacea for this trouble in which we now find ourselves. He is near the kingdom, and I want to compliment my friend.

Mr. President, there is a great deal of satisfaction on this further score. It appears that this idea of the law is being cleared up in our minds. The Senator from Oklahoma and the Senator from Maryland have done a great deal here in a few minutes along that line.

When, in 1920, the dollar was worth 60 cents, there were contracts between the Government and the railroads, there were contracts between the States and the railroads, there were contracts between the cities and the street railways and the cities and the electric-light companies, providing for certain charges for service, viz, 5 cents a ride on the street railways, 2 cents a mile in some instances on the steam railroads, as much as 1 cent a kilowatt-hour for electricity, as low as 5 cents a thousand cubic feet for gas; and distinguished lawyers, such as the gentleman who now leaves the Chamber [Senator REED, of Pennsylvania, left the Chamber], went before the Supreme Court of the United States and said, "These contracts do not mean anything. The amount fixed in them is not worth the paper it is written on. In the general interest of society, the dollar must be considered as worth what it will buy, and the power of the Government to regulate overrides the sanctity of contracts."

The Supreme Court of the United States said to the gentlemen at that time representing these interests which wanted to revalue the dollar, that the contracts made by the Government with the railroads were of no value, that they had to be under the regulating power of the Government, which had to be reasonable, and that while that regulated fare might have been reasonable 10 years before, it had become confiscatory for that year, because the dollar had fallen to 60 cents. The same thing applied to the street-railway fares. While the 5-cent fare was legal, having been made when the dollar was worth a dollar, in 1920, when the dollar was worth only 60 cents, the franchises stipulating the fares were no longer valid contracts, but had to be gaged and revalued on the basis of what the dollar would buy in service and products at that time.

All contracts were wiped out that the people had because the value of the dollar had fallen. It would no longer buy what it once bought, and the sanctity of contract, about which they now talk, went as the night, went as the mist before the sun. They were canceled by the thousands because, said the Supreme Court of the United States, the dollar would no longer buy what it once would buy, and the 5-cent fare must be 8 cents, the 2-cent railroad fare must be 3.6 cents, electric-light contracts for a cent a kilowatt were canceled and the rate was made 3 cents, the 5-cent charge for a thousand cubic feet of gas was made 14 cents; and all over the length and breadth of this country the very banking interests which owned the railroads and corporations then, which owned the banks then, and which own them both now, succeeded in having canceled contracts which had been made all over this country in order to protect the vested right of property.

Now the shoe is on the other foot. The dollar is no longer worth 60 cents, as it was in 1920; it is no longer worth a dollar, as it was in 1926; it is now worth $1.60, and now we come and say, "You have had to wipe out contracts, you have had to use the power of regulation of the United States and of the States and of the municipalities in order that human life and property might be regulated, in order that this society might continue, and now, when we come back and say that we can not get now $1.60 dollars to pay the debts we made when the dollar was worth 60 cents, you hold up your arms and holler 'the sanctity of contracts,' when you have canceled millions of dollars of contracts made when the dollar fell to 60 cents."

Society is not only at the water's edge, as the distinguished Senator from Arkansas said this morning; society is in the middle. The water is flowing over the head of struggling humanity to-day because, at the value of commodity prices, interest on the public debt and the taxes to be paid in the United States alone, based upon the standard value of commodities, amount to $45,000,000,000 per year, and there is not $45,000,000,000 of income in the United States to-day. It can not be paid. It is known it can not be paid. The only thing that can be done is to put the human race through the wringer until what property and life remain are more concentrated in the narrow funnel than they are to-day.

There is nothing whatever to the contrary legal proposition, no sound basis for it. What are we going to do? We sat here yesterday and voted down the amendment offered by the Senator from Montana and the amendment which I offered. I do not care whether the Senate takes the amendment the Senator from Montana offered or the amendment I offered, or the amendment which the Senator from Oklahoma suggests, or the one the Senator from Texas suggests, or an amendment anybody else suggests. The fact is that the people of the United States can not pay the taxes and interest of this country on the income based upon the commodity values of to-day.

Then, getting back to the private situation, the private debts, as the Senator from Oklahoma amply shows, amount to $200,000,000,000, gaged upon the 60-cent dollar; $200,000,000,000 of debts were made in this country based upon the 60-cent dollar. To-day those debts amount to $550,000,000,000, based upon the same 60-cent dollar, because it is now a $1.60 dollar. And how can we stop and argue for an unreasonable proposition, that a 12-inch wedge has to go through a 2-inch hole, when there is no way to do it under the living sun, in these depressed circumstances? With all the values of our country estimated not to exceed somewhere around $300,000,000,000 in normal times, and $530,000,000,000 worth of debts based upon standard commodity values, that have to be paid in the United States to-day, how can we go further? It is so unreasonable, so impossible, Mr. President, that it does not require further argument.

The Senator from Maryland says it would be a terrible thing if we undertook to regulate the dollar to the point where it might ever bring down the value of farm crops and surpluses, and so forth. That is not correct at all. I understand that my distinguished friend the Senator from Maryland lives in the country. He may, but he does not understand the country as I do. I want to say, Mr. President, that if the farmer of the South to-day could be guaranteed that he would get 20-cent cotton or 15-cent cotton we would never hear a chirp out of one of them. Immediately following the war we did set the prices of some of the agricultural products in this country, and they had started to set a price on cotton, which it was generally understood would be 15 cents a pound, if the market had not broken and it had not gone below that price, and there was no great calamity at that time. No one need worry about any riot coming from the agricultural and laboring element of this country as long as they are fed. They have shown that we need not worry about any kind of an uprising in seminormal times. They have stood starvation and distress and homelessness and every kind of a calamity known.

Just one more word. I am sorry the Senator from Maryland has departed. I want him to hear these last few words I have to say. I am going to ask one of the pages to ask the Senator from Maryland [Mr. TYDINGS] to come back into the Chamber and hear me for the next three or four minutes. He will do me a great courtesy if he will hear me for just about three or four minutes.

Mr. TYDINGS entered the Chamber.

Mr. LONG. I want to thank the Senator from Maryland for returning to the Chamber and giving me the opportunity of compelling him to listen for the next three or four minutes to what I have to say.

The Senator from Maryland, as I said in the beginning, almost reached the kingdom. Here is the weak part in our armor, because I agree with almost all the Senator from Maryland has said. Whatever I should apply as a weakness of the argument of the Senator from Maryland must also be applied as the weakness in my own discussion.

The Senator from Maryland says that four-fifths of the trouble must be settled internationally. Do we need to settle the trouble of starvation internationally? We have here more stuff to eat right in the United States to-day than the whole human family could eat up in 30 months. It is not in England; the food crop is not over in England. The wheat is not in England. The corn is not in China. The meat is not in Australia. It is right here.

Mr. TYDINGS. Mr. President——

The PRESIDENT pro tempore. Does the Senator from Louisiana yield to the Senator from Maryland?

Mr. LONG. I gladly yield.

Mr. TYDINGS. Of course, in the meantime, we must not permit starvation, and I for one will not hestitate to vote for legislation designed to prevent starvation. But when the meat that we have gets over into Australia, and all the cotton gets over into England, the problem of starvation will largely take care of itself.

Mr. LONG. That is correct. I thank the Senator for his observation. But let me proceed again. The foodstuff with which to feed 120,000,000 people exists in abundance and superabundance within the confines of the American borders. We need not go anywhere to hunt for it; it is right here. We need not go to the Government of Siam to get an international agreement to get meat, corn, wheat, or anything to eat. It is right in the United States. We need not do anything but control the internal affairs in order to have consumed what is in the United States. That is number 1.

We do not need to go anywhere outside of the United States to find enough material to clothe the human family, because we have more cotton and wool in the United States to-day than we could wear out in the next two years if we did not shear another sheep or raise another boll of cotton. So it is not necessary to go anywhere to find the food. It is right in this country to-day, and all we need to do is to look around.

We do not need a spyglass to look around and see what they are doing in the Fiji Islands. All we need to do is to find out how to use what we have here.

Then there is the third problem. We do not need to go anywhere to find homes in which to put the people. We have so many houses in the United States to-day that are empty, that, instead of passing legislation to provide for people to occupy those houses, we enacted a building and loan law so that the building and loan companies could keep them. In other words, we provided for a form of superficial financial integrity by which empty homes could continue to be owned so that the people could walk the streets in the meantime.

We do not need go look underneath the shelters of the Eskimos for the homeless to find a place to hide some one or to warm him. We have houses right here in the United States, more houses than 120,000,000 American people can live in to save their lives.

We do not have to have any treaty with the provisional government we are fixing to set up in the Philippine Islands in order that we can avail ourselves of those houses.

We have fallen down in our domestic policy.

Now I come to the sorrowful feature which I hope may percolate. Senators, you have allowed the property of America to be concentrated in the hands of a few, and you have brought disaster to America. You did that in the face of the warning of every teacher of religion and every teacher of government since time started. When the waves of civilization were beating against the shores of Egypt years before civilization was generally understood to have begun, the only conception they had of law was that in a land of plenty you would have starvation if you had concentration of wealth in the hands of a few. In the face of such a law we have sat here and ignored that policy. It has been pronounced an act of radicalism if one undertook to provide that the fruits and profits of the land should be shared by 120,000,000 instead of being concentrated in the hands of the few.

Mr. President, how much more time have I?

The PRESIDENT pro tempore. The Senator has 10 minutes left.

Mr. LONG. That is more than I shall consume. It will take me but three minutes more to conclude. I am sure the Senate will be relieved to know that.

How surely have we been working along that course! Mr. President, in 1916 President Woodrow Wilson, through a commission of his own, said that a calamity was headed for America because 60 per cent of the people owned only 5 per cent of the wealth and that 2 per cent of the people owned 60 per cent of the wealth. The commission said we were headed toward calamity unless we broke up that inordinate distribution of wealth which prevailed in 1916. And yet in 1932, 16 years having passed, do the 2 per cent still own 60 per cent of the wealth? No! One per cent owns 60 per cent of the wealth. Do 60 per cent of the people still own 5 per cent of the wealth? No! Two-thirds of the American people, 67 per cent of the people, to-day could not pay their debts and have a copper cent left. It is generally estimated that 5 or 6 per cent of the people own more than 85 per cent of the wealth and possibly have a control of a great deal of the remaining 15 per cent.

We have reached the point of stagnation. We have reached the middle of the stream. The abyss yawns. It has yawned for the poor man and he has fallen the victim of it. The abyss has yawned for the middle man and he has fallen the victim of it. Now the abyss yawns for everybody in America unless this condition is corrected. "The abyss yawns for all."

The PRESIDENT pro tempore. The question is on agreeing to the amendment proposed by the Senator from New Jersey [Mr. KEAN], which will be stated.

The LEGISLATIVE CLERK. On page 2, line 23, strike out the words "a majority of the members of its executive committee or."

The amendment was agreed to.

Mr. REED. Mr. President, I renew the request for unanimous consent which I made a short time ago with regard to the printing of Senate Document No. 151 with accompanying maps.

The PRESIDENT pro tempore. Is there objection?

Mr. LONG. I object. I shall not object a few minutes later or an hour or so later, but I object at this particular time. If the Senator will offer his request a little later, I shall not object.

Mr. REED. As I understand, the Senator from Louisiana wants to use my request as the transaction of business so as to give him an excuse for making another quorum call.

Mr. LONG. The Senator does me wrong in reaching any such conclusion as that. I am following the course of the Senator from Virginia [Mr. GLASS]. I want to please him.

The PRESIDENT pro tempore. The Senator from New Jersey [Mr. KEAN] offers another amendment, which will be stated.

The LEGISLATIVE CLERK. On page 3, line 2, strike out "of a member bank" and insert in lieu thereof "of any one member bank."

The PRESIDENT pro tempore. The question is on agreeing to the amendment of the Senator from New Jersey.

Mr. WHEELER. Mr. President, I discussed the question of my bill for half an hour this morning, and I propose to continue a discussion of it now for a short time longer.

This afternoon the Senator from Connecticut [Mr. BINGHAM] said that in the event we had confidence in our Government prosperity would return. It is rather difficult for people to have confidence in their government, for a farmer who produces a bushel of corn and has to sell that corn for the equal of two postage stamps to have confidence in his government. What I am trying to do and what some of us are trying to do is to restore confidence in our Government by bringing up the prices of commodities and by so doing enabling the farmers to pay off their debts.

Likewise the Senator from Connecticut talked with reference to inflating to the extent that Germany did. I have repeatedly said on the floor of the Senate that I am opposed to that sort of inflation.

In Germany the inflation raised the paper value of property and commodities to such an extent that debts, being fixed in terms of marks, soon lost all their former ratio of value. In the United States the deflation has depressed the dollar value of property and commodities. This, in turn, has had the effect of doubling our debts in terms of commodity dollars. In the case of the farmers' mortgages, it has raised their debts fourfold.

What I am trying to say is that money inflation or money deflation does not greatly change the real value of property, but it does shift the burden from one class to the other. That is why the big bankers and financiers in this country, whose banks are filled with money, are opposed to any form of inflation. They want to collect in full, dollar for dollar, with money that will purchase twice as much as the money they loaned.

On the other hand, the debtor wants, and is entitled to, a reasonable inflation, so that he can pay off his debts with dollars of about the same purchasing value as those that he borrowed.

In my judgment, the remonetization of silver as provided in my bill would be the safest way of reflating our currency and restoring the 1926 price level.

There is always danger in a paper inflation. It may go too far. It may lead to what Mr. Charles E. Mitchell, of the National City Bank, calls "a competition in currency depreciation, of which the end is zero for all." The danger lies in the fact that when the people learn how easy and painless it is to pay debts through inflation of the currency, they may demand still greater inflation, and through organized effort control Congress and demand still more inflation. Such action on the part of the people would be just as reasonable and right and just as the attitude now taken by many financial leaders who oppose every move on the part of Congress to restore the 1926 commodity price level by means of reflation. If our financial leaders were wiser than they now appear to be, they would welcome such a movement to restore the 1926 price level. If they succeed now in blocking all measures to reflate, the danger will be that when the dam finally breaks it will be impossible to control the situation. A reasonable inflation now, that would be fair and equitable to all, would avert the danger which now threatens our whole economic system.

Let me invite attention to an article which appears in the Washington Evening Star of this afternoon and which reads in part as follows:

HOOVER SPEEDS PARLEY ON ECONOMIC PROBLEMS—FEARS NEED OF INCREASED UNITED STATES TARIFF AS INFLUX OF GOODS FROM EUROPE SHOWS BIG RISE LAST FOUR MONTHS

President Hoover feels the United States is faced with the necessity either of increasing its tariff walls or action to gain stability in foreign currencies, and to-day he was considering possible moves for speeding up the approach of the world economic conference.

To those who stood here on the floor of the Senate on the other side of the Chamber and said we do not need to do anything except to go home and say that we have confidence in the Government and then prices will come up, I desire to invite special attention to what Mr. Hoover has said. The trouble is that Mr. Hoover was saying for four years just exactly what the Senator from Connecticut and others are saying at the present time. He has at last apparently come to the conclusion that something more must be done, excepting to attempt to extend credit to the people of the country when commodity prices are falling.

Nature has provided the means for such a reasonable and safe reflation.

It would almost seem that a wise Providence had made this provision for man's monetary needs in the manner in which He has placed both silver and gold in the earth. They are distributed throughout the world, they are hidden away beneath the rivers, or they are found in small quantities in conjunction with other metals which men need. They do not rust or corrode and in every respect are ideal for coining purposes. For thousands of years they have both served the monetary needs of mankind. Then a new-fangled idea entered into the minds of some British international bankers, and for their own selfish purposes, so that they might more easily control the money and credit of the world, they persuaded or bribed the leading commercial nations of the world to base their monetary systems on gold alone. This all happened less than 100 years ago, but during this short intervening period of time it has enabled a few small groups of financiers to gain possession and control of the wealth of those nations that adopted the gold standard. Silver, after thousands of years of honorable service as money, has been demonetized, debased, stripped of all its past monetary glory, and like Ishmael of old, turned out to wander through the earth as an outcast.

In the meantime the gold produced in the world has not been sufficient to form a stable base upon which to build the monetary systems of the world.

Gold production has not kept pace with commercial expansion and increase of population. With only eleven billions of monetary gold in the world, it is utter folly to imagine that all the monetary systems of the world could possibly stand upon such a small base. As a matter of historic fact, they can not. Since the World War more than 20 nations have been forced off the gold standard, while many others have debased their currency while still trying to remain on gold. The result has been world-wide confusion. This confusion will continue until a base is found that is large enough for all the leading nations to build their currencies upon. I predict that that base will not be gold, nor will it be silver, but it will be gold and silver at a fixed, definite ratio of value.

The Chicago Tribune quotes Mr. Charles E. Mitchell as saying that it is unthinkable that the United States should depreciate her currency, and that the only way out is for the United States to cooperate with foreign nations "in the efforts to remove such obstacles as may still bar the way of their return to a gold basis."

I do not know to what Mr. Mitchell refers when he speaks of "obstacles" that bar the way to the return of other nations to the gold standard, unless he would have us cancel the war debts or grant them a moratorium or exchange our gold for their commodities and merchandise. It would be interesting to know just how he thinks the United States could put the rest of the world or the leading commercial nations of the world back on the gold standard, and how it would be possible for them to remain on the gold standard once they were back upon it. The very moment any nation hampers in any way the free movement of gold, either into or out of its borders, that very day that nation is off the gold standard. When for any reason there is a run on the gold of any gold-standard nation, if that nation has not sufficient gold to meet the demands made upon it, then it will be forced off the gold standard, either by paying out its gold to meet its obligations or, like England, be forced to restrict the export of her gold in order to save her diminishing gold reserves.

If the money lords of the United States were successful in getting the nations of the world to adopt the gold standard, the demand for gold would be far greater than it is to-day, with the result that its value and purchasing power would increase, and thus lower commodity prices and increase the debt burdens of our people.

The farmers of the country understand how the appreciation in purchasing power of the dollar is driving down the price of farm commodities and how it is also increasing the burden of their debts, and they are demanding that we shall pass some legislation which will restore normal prices by reducing the purchasing power of the dollar.

It is my judgment that Congress must pass some measure to reflate our currency in order to save the country from chaos, and it is also my judgment that the remonetization of silver, as provided in my bill, is the safest and most conservative form of reflation that can possibly save the situation.

The fall in the price of silver bullion throughout the world automatically depreciated the purchasing power of silver currency when that silver currency in any manner came in contact with the currency of gold-standard countries. There is no escape from this fact, for the reason that the silver depreciation is a depreciation from the value of gold. If the silver had not fallen to its present low level, you would not now be hearing this cry about depreciated currencies in silver-using countries and how they are reducing the production costs to such a low level that American farms and factories can not possibly produce in competition as cheaply as they can in these countries with depreciated currencies.

A leading editorial from the Portland Sun, dated April 25, 1896, entitled "Effect of the Two Standards" states—I am not going to take the time to read the editorial, Mr. President, but I ask that it may be inserted in the RECORD as a part of my remarks.

The PRESIDENT pro tempore. Without objection, it is so ordered.

The editorial referred to is as follows:

It is a fact, not a theory, supported not only by the best-known authorities but by the common sense of every individual who carefully investigates the question, that the bullion value of silver directly influences and governs the price of wheat, cotton, and all other products raised in nations on a silver monetary basis. Anyone of ordinary intelligence or rightfully outside the wards of idiocy or the insane asylum appreciates the fact that the products of all nations on a gold monetary basis which are sold in competition with similar products raised by nations on a silver monetary basis are also directly affected by the bullion value of silver. The prices of such products rise as the bullion value of silver rises and fall as the bullion value of silver falls. In evidence of the correctness of these statements, the Sun quotes from the report of the British Royal Commission on gold and silver, held in 1887. Before this commission Mr. J. Shield Nicholson, professor of political economy at the University of Edinburgh and one of the most distinguished economists of Great Britain, gave his evidence in reference to the effect of the competition of India on the price of American and English wheat. The following question, which is precisely to the point, was put to Mr. Nicholson by a member of the commission:

"Indian wheat is the very wheat that is complained of by Secretary Manning, Secretary of the United States Treasury, as having lowered the price of European and American wheat, and he attributes it all to the divergence of gold from silver. You do not think tying gold and silver again would raise the price of English and American wheat by 25 per cent?"

In his reply Professor Nicholson discusses the factors entering into the determination of prices under given conditions, and on the point immediately germane to the point under discussion says:

"Now, it seems to me probable if the price of silver rose to its old level, wheat could not be profitably exported from India until prices rose in a corresponding degree. For India, being a silver country, the price of wheat there is independent of the relative value of gold and silver. An exporter to England at present will give the Indian price in silver, and he can buy his silver for less gold, and thus competition will lower the price. If the price of silver rose, the exporter from India must get more gold. Thus a rise of silver would, on this view, raise the price of wheat to a corresponding degree."

What is true of India is true of Russia, the Argentine, Egypt, and every other competitor of the United States that is on a silver monetary basis. What is true of wheat is also true of every other product raised by nations on a silver standard and sold in competition with products of a similar kind raised in the United States or in other gold-standard nations.

Should any of our readers desire further evidence on this point we would call their attention to Mr. Daniel's work on the Industrial Competition of Asia; also Mr. Bagehot's work on the Depreciation of Silver. Mr. Bagehot was for many years the editor of the London Economist and is to-day one of the most pronounced gold monometallists of Europe, advocating the tenability of his position for the reason that the lower the bullion price of silver the cheaper can Great Britain get her wheat, cotton, and raw materials, for a supply of which she has to depend upon other nations. Mr. Bagehot, in his work just referred to, on page 54, very tersely expresses this fact, as follows:

"The necessary effect of a depreciation of silver as against gold is to give a bounty on exports from India and the other silver-using countries to England. An English merchant can now buy many more rupees than he formerly could with the same number of sovereigns, and therefore he can import from India, though prices at Calcutta are not at a level at which it would have paid him to operate if he had not had the novel facility in getting rupees."

At a meeting of the British and colonial chambers of commerce held in London, 1886, Sir Robert Fowler, a member of Parliament, a banker, and ex-mayor of London, made the following statement:

"The effect of the depreciation of silver must finally be the ruin of the wheat and cotton industries of America and be the development of India as the chief wheat and cotton exporter of the world."

The gentleman's sagacity and farsightedness is clearly demonstrated by present existing conditions. In 1886, the time of the gentleman's prediction, wheat was 87 cents per bushel in Chicago, cotton 10 cents per pound in New York, and silver 99 cents an ounce. Since then wheat has touched 50 cents per bushel in Chicago, cotton 5¼ cents per pound in New York, and silver 56 cents per ounce. To-day there is a speculative rise in silver, due to the probable call by Germany of an international conference, and a consequential rise in cotton, wheat, and all other products of silver-standard nations. A rise approximating 20 per cent is shown by to-day's prices in silver, cotton, and wheat above the lowest figures touched by those commodities.

No better arguments in favor of the free and unlimited coinage of silver can be advanced in the United States than the arguments of the gold monometallists advanced in Europe. The conditions are exactly reversed on the two continents. The United States are producers of breadstuffs and raw materials, exporters, and debtors; Europe, or particularly Great Britain, are consumers of breadstuffs and raw materials, and importers and creditors. Thus it is seen that if the world's price of silver be nearly doubled by the remonetization of that metal by the United States, the present price of cotton, wheat, and our other cereals will rise in price on account of the direct effect and influence that the bullion value of silver has upon the price of those commodities. Under the remonetization of silver, the producers of Oregon would receive, on a conservative estimate, $25,000,000 more for their products annually than they receive on the single gold standard. Every community or State dependent for the greater portion of its wealth upon its agricultural resources has been as directly affected by the demonetization of silver as has the State of Nevada or any other State noted for its silver mines.

Mr. WHEELER. Mr. President, the terrible irony of the situation is in the fact that as gold appreciates in value due to our large stocks of monetary gold, and to the so-called stability of our monetary system, and our great commercial and industrial strength, the prices of commodities fall, while nations not able to maintain the gold standard and whose currencies depreciate accordingly enjoy commercial advantages due to their depreciated currency over those countries which are strong enough to remain on the gold standard. That is why, Mr. President, in England and in other countries that have depreciated their currencies conditions have been improving and unemployment has decreased. What at first thought appears to be a blessing becomes the curse of Midas. What shall it profit a country if it gain all the gold of the world and lose its commerce?

Many remedies have been tried during the past few years to restore prosperity, but they have failed because they did not go to the roots of our economic ills. They aimed to relieve the situation but not to cure it, in the hope that in some mysterious manner, such as that suggested by the Senator from Connecticut, prosperity would suddenly appear around that famous corner. Changes were made in our banking laws liberalizing them in the interests of the bankers; tariff measures were passed with the assurance that prosperity would return within 60 days after the passage of the bill; millions of peoples' money were given to the railroads, the big banks and insurance companies, but still the depression continued; and as the days lengthened into months and the months lengthened into years, our economic conditions have gradually become worse; more farmers are losing their farms through foreclosure or bankruptcy; more home owners are losing their homes through tax sales; more railroads are going into the hands of receivers; more banks are failing, bringing ruin to their depositors; and more people are joining the ranks of the

unemployed tramping the streets searching for food and clothing.

These measures have been weighed in the balance and found wanting because they were, at best, only palliatives.

What I propose to do is something which is far more fundamental and which, in my honest judgment, will not only help break this depression but also, for years to come, prevent a recurrence of times like these.

I am a firm believer in the quantitative theory of money and its relation to commodity prices, providing that due consideration is given to the matter of the velocity of circulation as well as to the amount of money in circulation. Money locked up in deposit vaults in the banks or in the Treasury of the United States can have very little, if any, effect upon commodity prices. We may expand our currency within reasonable limits without affecting prices unless some provision is made to put this money into circulation.

It is low wages, unemployment, and low commodity prices that retard and slow up the velocity of circulation. Every move in this direction reduces circulation and adds further to the depression. Every year the farmers of the United States produce about 800,000,000 bushels of wheat. If they receive only 25 cents a bushel, then their wheat crop will put into circulation only $200,000,000, while if, instead of 25 cents a bushel, they could receive $1 a bushel, they would then put into circulation $800,000,000, all of which would go to pay the merchant, the banker, the farm laborer, and thus it would go back into circulation. The same thing happens when wages are increased or unemployed men are put to work. The increased wages go swiftly into the channels of trade and thus speed up the sluggish circulation of money which in turn will cause commodity prices to rise and thereby break the depression.

I make these observations concerning the quantitative theory of money because I fear some people place too much importance upon the mere increase in the volume of money in bank vaults and fail to appreciate the necessity of placing money in actual circulation; by that I mean in the hands of people who pass it from one to another in return for commodities.

I am in hearty accord with the statement of President Hoover in his message to Congress of December 19, 1932, in which he says:

> It is certain that the most urgent economic effort still before the world is the restoration of price levels. * * * That price levels have been seriously affected by abandonment of the gold standard by many countries and the consequent instability and depreciation of foreign currencies * * *. The depreciation of foreign currencies lowers the cost of production abroad compared to our costs of production * * *. I concur in the conclusions of many thoughtful persons that one of the first and most fundamental points of attack is to reestablish stability of currencies and foreign exchange and thereby release an infinite number of barriers against the movement of commodities, the general effect of which would be to raise the price of commodities throughout the world.

And yet, Mr. President, in the face of the statement made by the President of the United States, we find such Republican leaders as the Senator from Connecticut [Mr. BINGHAM] and the Senator from Pennsylvania [Mr. REED] saying that the remonetization of silver would have no effect except to help a few mining interests in the West, and that it would not affect the rest of the people of the country in the slightest degree.

President Hoover further stated:

> * * * It is a certainty that trade and prices must be disorganized until some method of monetary and exchange stability is attained.

How are we going to attain it? There is only one way we can attain it to any extent by acting independently, and that is by the remonetization of silver, because when we do that we immediately raise the purchasing power of over half the peoples of the world.

Mr. President, I am in perfect agreement with these statements of President Hoover, and had he uttered these truths two years earlier and then thrown all the power of his administration back of a movement to correct this world monetary situation instead of spending many millions of the people's money in economically unsound experiments, there is no question but what the American people would have saved him from such a decisive defeat.

The president of the Chamber of Commerce of the United States, Mr. H. I. Harriman, in a letter of December 16, 1932, points out the baneful effects upon our commerce of the depreciated currency of other nations.

For a year and three months—

He writes—

> depreciated foreign currencies have been exerting an undermining influence upon our economic situation. First, by negativing our tariffs so that in our home markets American goods have been displaced, factory output cut down, and unemployment increased; second, by depressing price levels and preventing any upward price movement to a basis of fair return for American labor and capital * * *. Over half of the products coming into the United States are benefiting from the advantage of depreciated currencies. Over 20 foreign countries have that advantage in undercutting the prices of American products.

Yet, Mr. President, in the face of the statement of the president of the chamber of commerce, Senators will stand upon the floor of the Senate and say that we can continue to be prosperous and remain upon the gold standard, when 40 nations, including practically every industrial nation in the world, except France and the United States, are off the gold standard.

I notice also in the Chicago Tribune of January 11 that Mr. Charles E. Mitchell, of the National City Bank of New York, is quoted as saying:

> Of vital importance to the progress of recovery in this country is the reestablishment of a stable relationship between the dollar and foreign currencies, thus relieving our price structure from the most destructive of all kinds of competition, namely, that of depreciating currencies of competing nations.

Here we have clear-cut concise statements from the President of the United States, and from the president of the Chamber of Commerce of the United States, and from Charles E. Mitchell, of the National City Bank, and each of them states that the depreciated currencies of other countries, which are off the gold standard, enjoy a distinct advantage over the United States for the reason that their depreciated currencies give them a lower production cost for commodities and manufactured goods than the costs of production in the United States.

Again I say the distinguished Senator from Pennsylvania stood upon the floor of the Senate and stated that if we should raise the price of silver it would not affect commodity prices in the slightest degree, and that the only beneficiaries would be a few silver-mining companies.

Let me also quote from an article in the Saturday Evening Post of December 3 last, by Mr. Samuel Blythe. In this article the author enumerates dozens of articles imported from countries that are off the gold standard which are laid down in the United States at a price far below our manufacturing cost in this country. Let me quote briefly:

> There are rubber boots made in Japan that cost, in American money, to land in this country, all charges paid, just under 34 cents a pair, and that can not be made in this country for less than 95 cents a pair. There are rubber boots from Czechoslovakia that cost the Czechs $1.16 to lay down in this country that can not be made here at less than $1.48 a pair. Rubber dolls that Japan sends here for $4.26 a gross and cost Americans to make $7.84 a gross. Japan lands here cotton hit-and-miss rugs at 6 cents each, and we can not make one of these rugs, with our wages, at a less cost than 29 cents. Japan sends grass rugs, 9 by 12 in size, landed here all charges paid for 92 cents each, and they cost our manufacturers $8.88 each to make. They are stuffing the market with electric-light bulbs and flash lights of various sorts. Japan sold in this country in 1932, at a price with which no American manufacturer could compete, 54,500,000 electric-light lamps and bulbs of various sorts. The Foreign Exchange and Trade Institute is authority for the statement that the principal miniature electric light manufacturing company in this country, employing nearly 2,000 people, has recently closed because of this ruinous competition, due to the disparity in exchange and the low wages and prices of materials possible in Japan, with the Japanese yen worth half of the 50 cents it was worth before Japan debased her currency.

Mr. President, I have discussed this problem of depreciated currency with many men, and I have been amazed to find

many intelligent men who can not see how the depreciation of a nation's currency actually gives that nation a distinct advantage, due to the fact that it lowers its cost of production as compared to nations on the gold standard, or nations whose currency has not depreciated.

I think it is of the greatest importance that we first come to understand this aspect of the problem before we attempt to discuss ways and means to solve it. A doctor must first diagnose a case before prescribing a remedy.

When England went off the gold standard, and her currency depreciated 30 per cent, did that give England any advantage in the world markets or is it offset in some manner so that she enjoys no advantage? Mr. Hoover says:

> The depreciation of foreign currencies lowers the costs of production abroad compared to our costs of production.

Is that true of England whose currency is depreciated 30 per cent? Does it lower her costs of production? And what about Japan whose currency is depreciated over 50 per cent, and Argentina with a depreciation of 40 per cent? Does this depreciation in their currencies give them a lower production cost, and thereby enable them to undersell us in the markets of the world? This question can be answered in one word, "yes" or "no." Which is it?

The president of the Chamber of Commerce of the United States says:

> Over half the products coming into the United States are benefiting from the advantage of depreciated currencies. Over 20 foreign countries have that advantage in undercutting the prices of American products.

Let me say to my good Republican friend across the aisle that the remonetization of silver would do more to make tariffs effective in the world market than any other single piece of legislation that could be possibly passed.

What shall we say to that statement of the president of the Chamber of Commerce of the United States? If it is true that the depreciated currencies of 20 nations give them an advantage in undercutting the price of American products, then surely that is something worthy of our serious consideration. If the American manufacturer is thus handicapped, and the foreign manufacturer enjoys an advantage due to his depreciated currency, then would it not be a benefit to the American manufacturer if we depreciated our currency to a level with our competitors? Or would it be better to crucify our manufacturers and farmers on a cross of gold? Must our appreciated, dishonest dollar be left on its high pedestal even though, by leaving it there, an advantage is given to our foreign competitors, and as a result millions of our men must go without work? What is our money system for, anyway? Was it made for man, or was man made for the gold standard? The big bankers put the appreciated gold dollar above the welfare of the people. Mr. Mitchell says that a money inflation is "unthinkable."

In the face of such a situation, it seems to me that Congress could well afford to give all of its attention to so fundamental and basic a problem as this, which directly affects all classes of our people, whether on the farms or in the cities, and for a little while forget beer, booze, branch banks, bonus, and balancing the Budget.

As a matter of fact, the enactment of my bill would bring more revenue into the United States Treasury than would come through the passage of the beer bill; it would help the banks far more than any branch banking law; it would benefit the veterans financially more than the bonus; it would balance the Budget without the aid of nuisance taxes; and it would put more men to work in factories, mines, and on the farms than any other measure that has been proposed in this Congress, because it would put purchasing power in the hands of untold millions of the people of the various countries of the world.

More than a year has passed since I introduced my bill in the Senate, the purpose of which was to remove the trade barriers which President Hoover brought to the attention of Congress in his message of December 19 and to stabilize monetary exchange rates between gold-standard and silver-using nations.

On January 25, 1932, at the close of my speech in this Chamber in behalf of my bill, I said:

> I assert—and challenge intelligent criticism, not mere denial—of the following statements: First, the enactment of my bill into law would immediately thereafter nearly double the volume of the world's primary money, with the resultant increased conservative credit basis of twenty times the amount of primary money thus added to the world's stock.
>
> Second. Within one year after the enactment of this bill the world's price of wheat, cotton, and all agricultural products would be more than trebled.
>
> Third. The purchasing power of over 50 per cent of the entire world's population now using silver as their sole yardstick of exchange and business transaction would contemporaneously be quadrupled; that is, the value of the silver stock would increase from 30 cents to $1.30, resulting in the creation of a market which would more than absorb all the surplus of our raw materials and manufactured products.
>
> Within two years all our present agricultural land values throughout the United States would be more than quadrupled, thereby transforming the present frozen assets of the country banks in agricultural communities into liquid assets.
>
> The unemployed-labor problem would be rapidly solved.
>
> Both labor and capital would be benefited.
>
> Contentment, happiness, and lucrative occupation would be substituted for discontentment and despair, with their inevitable resultant tragedies to follow.
>
> It would relieve starvation in the midst of plenty.
>
> This legislation would do more than all suggestions heretofore combined toward reviving, encouraging, vitalizing, and resuscitating business in this country and throughout the world.
>
> The market prices of securities, especially the common stocks of all corporations enjoying honest, efficient managements and being properly financed, where listed on some of the great stock exchanges of this country, would almost contemporaneously show increased activity and market value.

Since I made this declaration on the floor of the Senate no man has accepted the challenge and brought forth any valid reason or argument to show why the passage of my bill would not accomplish these things.

Questions have been raised, and some have expressed fears, but no argument has been brought forth that would tend to prove the unsoundness of my bill.

To those who object to my bill because they assert that the United States can not maintain this fixed ratio of value between silver and gold, because the production of these metals varies from time to time, let me say that the United States was on the bimetallic basis from 1792 down to 1873. The ratio established in 1792 was 15 to 1. This ratio was made 16 to 1 by the act of 1834, and in 1837 was changed to 15.988 to 1. Great Britain went from bimetallism to the gold standard in 1816, Germany in 1871, and France in the early seventies.

These countries going off bimetallism and adopting the single gold standard did not flood the United States with silver, although we continued on the silver-gold monetary basis at 15.988 to 1, until through trickery and deception the United States Congress demonetized silver in 1873.

Sixty years ago the United States was a debtor Nation, and did not occupy the outstanding, strong financial and commercial position among the nations of the world which she enjoys to-day; yet we were able to tell the whole world that we would exchange 1 ounce of gold for 16 ounces of silver and we were not flooded with silver, and there was no occasion or demand or reason why we should have changed our monetary system from bimetallism to the gold standard. The people of the Nation were not only satisfied with bimetallism but anxious to retain it. No political leader dared openly advocate its repeal. I doubt if it ever could have been repealed had the question been fought out in the open. But it was not fought in the open, because such a course could not have been successful. No one knew this better than the selfish British international bankers, who were determined to force the United States to use the single gold standard in order that they might more easily control the money and credit of the world for their own selfish purposes. Had it been possible for these British bankers to have forced us off bimetallism by flooding the United States with silver, there is every reason why they would have done so. But there has never been, and there is not now in the world a flood of silver available for such a purpose.

Before paying my respects to those who were responsible for the crime of 1873, let me give you some further historical

facts relative to the production of silver and gold which convince me that the United States can maintain the price ratio of 16 to 1, as provided for in my bill, regardless of the amount of silver production we may reasonably expect, as well as the variations in the ration of production between silver and gold.

From 1801 to 1850 the average gold-silver production ratio for the entire world was twenty-eight times as many ounces of fine silver as ounces of fine gold. Yet the average price ratio during that whole period was 15.7 to 1; or, in other words, during this period when the production ratio between silver and gold was 28 to 1, 15.7 ounces of silver were interchangeable with 1 ounce of gold. Official records also show that during the period from 1851 to 1873 there was an average of only six and seven-tenths times as many ounces of fine silver as of fine gold produced in the whole world. Yet, during the same period the relative interchangeability between these two metals throughout the world averaged 15.5 ounces of silver to 1 ounce of gold.

These figures prove conclusively that the monetary use of both silver and gold at a fixed valuation—namely, $20.67 per ounce for fine gold, and $1.29^{29}/_{100}$ per ounce of fine silver—created an unlimited demand during that period as compared with the supply throughout the world, thus establishing a fixed financial yardstick which it was not necessary to alter every time the production ratio between gold and silver changed.

To those who fear that this country would be flooded with silver if my bill were enacted into law let me say, Where would this flood of silver come from?

In the 1930 annual report of the director of the mint, I find that the total amount of silver produced from the discovery of America down to and including 1930 is only 14,976,992,838 fine ounces, and its value, figured at its coining value of $1.29^{29}/_{100}$, is $19,364,192,748. In other words, the total world production of silver during the past 437 years, figured at $1.29^{29}/_{100}$ per ounce, and not at its present bullion value of about 25 cents per ounce, is a little less than $15,000,000,000.

According to these same official figures, the largest annual world production of silver was in 1929, when it reached 260,970,029 fine ounces. These figures, of course, do not include silver that was thrown upon the market through the debasement of British, Belgian, and French coinage and the sale of silver by the Indian Government; but 260,970,029 fine ounces produced in 1929 represent the largest amount of silver produced in one year during the past four centuries.

This bogey cry of floods of silver that promise to sink the United States should we adopt bimetallism is not justified by the official figures relative to the production of silver throughout the world during the past 400 years; and I am inclined to think that this propaganda is put out by our shortsighted international bankers in order to defeat all attempts to remonetize silver.

It has been suggested to me that if this bill passed we might get large withdrawals of gold, and gold would go into hiding. In the first place, let me say that my understanding is that practically all of the gold that was earmarked in this country left the United States about a year ago or more. There are some commercial balances in this country. They might possibly be withdrawn; likewise, there might be some withdrawal of gold upon the part of our own people; but I am informed by what I consider to be one of the highest authorities in this country that in any sort of an inflation, whether it be by managed currency, fiat money, passing the bonus, or the expansion of currency through Government expenditures of large sums of money in payment of projects which it might start, there would be immediately some gold withdrawn, not because it was a silver inflation, but because of the fact that any sort of a money inflation will cause gold to be hoarded for a short time; but I repeat, because of our strategic position, our trade balance, our economic situation, and financial position in the world, gold would continue to come into this country, and what little gold was taken out would soon come back again.

We need not fear a flood of silver, because silver is usually a by-product of copper, lead, or zinc, and its production is governed by the production of these other metals. Hence, the production of the white metal does not respond readily to changes in the price of silver but is influenced by the demand and production of these other metals. In the United States by-product silver is estimated at about 80 per cent of our total production.

Again, much of the hoarded silver of India and China is in the form of ornaments, which are prized highly because of family or religious associations, and would not be used in any commercial way unless all other sources of revenue had been exhausted.

Fear that silver would be offered to the Government for coinage in large quantities following the enactment of my bill is predicated upon the assumption that silver would not be worth the price ratio fixed in my bill. I have talked with one of the leading economists associated with large banking interests, and it is his judgment that as soon as my bill became a law the price ratio between silver and gold would immediately become effective throughout the world due to our commercial and economic standing in the world, and because the other nations would know that we could maintain this ratio no one would be willing to accept less than $1.29^{29}/_{100}$ an ounce for their silver.

Why should any intelligent person imagine that the silver-using nations, representing more than half the population of the world, would voluntarily divest themselves of their only financial yardstick, which is silver, with which they conduct their domestic and foreign commerce, thereby hampering and retarding all business transactions at home and abroad? It is too absurd for serious consideration. The facts of history which I have cited, the limited amount of silver in the world, the financial loss of exchanging it for gold, and the further fact that the oriental nations prefer silver money to gold money all indicate that there is absolutely no danger that we would be flooded with silver as a result of the passage of my bill.

The passage of my bill would stabilize money exchange rates and thereby facilitate international trade. It would do this for the simple reason that it would establish the ratio value of silver and gold, which in turn is the basis of money and currency in all parts of the world. No other measure now before Congress would do this. I need not dwell upon the great importance of this aspect of my bill, for its benefits are obvious. Think of the commercial difficulties involved in the transaction of any business with other countries, where neither buyer nor seller can tell in advance what his money will be worth in terms of the other's money. My bill would eliminate that uncertainty by fixing the ratio value between gold and silver upon which the currency of countries using silver money and those using gold is based.

Not only would it tend to stabilize the exchange between silver and gold standard countries but it would do something which is of far greater importance to the American people: It would establish the exchange on a basis which would enable silver-using countries to purchase our farm products and manufactured goods. It would increase the value and purchasing power of their money in the American market. It would flood the United States, not with silver but with orders for American-manufactured goods and the products from American farms.

Let us just suppose that in defiance of the international bankers, who have wrecked this country in their shortsighted greed for personal gain, the United States Congress in their wisdom should remonetize silver at a ratio of 16 to 1, as provided in my bill. What would be the result?

In the first place, and for psychological reasons, some gold would go into hiding and some would be hoarded, but this would be temporary. Being gold minded, thanks to our international bankers' propaganda, some people who have little knowledge of money, or what constitutes money, or of the ability of the United States to carry out her agreements, would place a higher value on gold than on an amount of silver of equal value. The same thing would happen in silver countries, like Mexico, and for a short time some silver

would be exchanged for gold. This also would be only temporary, for the simple reason that silver would be worth more in a silver-using country, and purchase more goods there, than the gold they could receive in exchange for their silver. Let us suppose an actual case.

We will suppose a merchant in Mexico City ships $10,000 worth of silver to the United States mint at Denver, Colo., and has it coined into American silver dollars. He must now exchange these for gold in whatever way he can. The Government of the United States does not agree to make this exchange for him under the terms of my bill.

After exchanging his silver dollars for gold coin, he must now ship the gold back to Mexico City. This transaction would cost the Mexican merchant handling and transportation charges, plus insurance on his shipment of silver to the United States Mint, refining charges at the mint, and shipping and insurance rates on his gold from the mint back to Mexico City. These charges would be the measure of his loss, due to his desire to convert his silver into American gold. In the case of shipments from China or India, the cost would be much greater.

I will admit that for purely psychological reasons some silver would be shipped into the United States; but it would be only temporary, because it would be financially unprofitable.

I repeat, however, this country would be flooded with orders for American goods for the simple reason that their silver would purchase five times as much American goods as it does at the present time, keeping always in mind the fact that when the currency of a nation depreciates in value it may have no immediate effect upon wages and the cost of living within that country as measured in the currency of that country; yet the full degree of depreciation—whether 10 per cent as in Canada, or 30 per cent in Great Britain, or 40 per cent in Argentina, or 50 per cent in Japan, or whatever the percentage of depreciation may be—is immediately and always effective when money is exchanged from the currency of these countries into the currency of the United States. England illustrates that truth; for, while her currency depreciated 30 per cent, wages, rents, and living costs have not increased accordingly.

This gives England an advantage of 30 per cent on the item of labor in her cost of production. To that extent the American manufacturer is handicapped. In any exchange of goods between England and the United States, England still has an advantage of 30 per cent lower labor cost, due to her depreciated currency alone. Also, in the markets of the world she enjoys the same advantage as a result of her depreciated currency; and she accomplished this without cutting wages or lowering rents or disturbing her domestic affairs in so far as they concern her standard of living. As a matter of fact, in England they do not think of their currency as being depreciated at all. They say it is the gold dollar that has appreciated. They point to the fact that theirs is an appreciated currency in its exchange relation to the currency of Japan and other countries.

England, therefore, has an advantage in the world markets of a 30 per cent lower labor cost, all of which is due entirely to her depreciated currency. Japan has a 50 per cent advantage, due to her depreciated currency, not taking into consideration her lower wage scale. The United States has always been able to successfully compete with such labor when their currencies were at par. American factory workers earn higher wages than the workers in other countries; but they have always been able to produce at a lower labor cost per hundred or per yard than any other country. But a depreciated currency gives our competitors a short yardstick. It gives Japan an 18-inch yardstick and a 1,000-pound ton.

My bill would correct this inequality, because it would fix the ratio of value between gold and silver, the basic money metals of all nations, and it would create an unlimited demand for silver and gold throughout the world as a medium of exchange for commodities, wages, manufactured products, and property of all kinds in all parts of the world.

The passage of my bill would raise the cost of production in the silver-using countries. This would not necessarily disturb their domestic affairs as far as rents, wages, and living conditions are concerned, any more than the 30 per cent depreciation in the pound affected domestic conditions in England. But the increase in the price of silver and fixing its ratio value to that of gold would restore the value of silver as measured in our gold and would establish a uniform yardstick of value throughout the world, no matter whether a nation was on the silver standard or the gold standard or the silver-gold standard.

Let me repeat: The passage of my bill would flood the United States with orders for American-made goods and products from American farms, but it would not flood this country with silver, for the simple reason that trade is not carried on with money but with credit; yet this credit is figured on the basis of the money exchange rate of the different countries.

These orders from silver-using countries for American goods would not be accompanied with silver bullion nor with silver coins. These orders for goods would be paid for by bank drafts or international money orders. We would recognize a given quantity of silver or a given quantity of gold as a legal dollar, but neither metal would enter into trade transactions any more than gold now enters into our domestic transactions.

Of course, if the balance of trade was in our favor, and nations purchased more goods from us than we bought from them, then the balance due us could be paid in either silver or gold. But, first of all, we would have sold them American goods, made in American factories. In such a case we would gladly accept all the silver they could send us.

But the enactment of my bill would do something else for this country which would benefit us just as much as this flood of orders for American goods. It would increase the cost of production in silver-using countries fivefold in terms of American dollars, and this would make it less profitable for our merchants to buy their goods from silver-using countries than at the present time. In other words, it would increase production costs in other countries, as measured in our gold, to such an extent that it would be profitable for Americans to buy steel products and other goods in the United States instead of importing them from foreign countries. It would also enable American manufacturers to operate their plants in the United States instead of moving them to foreign countries.

Just as depreciated currency does not immediately disturb domestic prices, wages, and living conditions in a country, yet it becomes a determining factor and greatly affects prices and business when brought into contact with gold-standard countries, so likewise the increasing of the purchasing power of silver would not immediately disturb the domestic affairs of silver-using nations nor greatly change their wages, rents, and living conditions, yet it would place them in a position where it would be easier for them to buy goods from the United States, due to the increase in purchasing power of their silver.

It would also make it more difficult for our merchants to import their foreign-made goods into the United States, due to the fact that their costs of production would be increased, as measured in United States money, due to the increase in value of their silver.

This would work no injustice upon silver-using nations, as it would still give them a monetary cost-production basis on a par with that in the United States, due to the fact that their silver would be on a par with our dollar. It would, however, take from them the advantage they now have over us as a result of their low production costs, due to their depreciated currencies.

I do not see why anyone should object to giving the American farmer and American laborer an equal chance to compete with the rest of the world by equalizing the money element in the cost of production by fixing the ratio of value between silver and gold throughout the world, as provided for in my bill.

Only shortsighted and traitorous international bankers want an unstable exchange because they think it is to their financial advantage to lend cheap money and require repayment in dollars of enhanced value. If they were wiser, they would know that the equalizing and stabilizing of money values throughout the world would so stimulate and increase commerce and trade that their financial returns would be far greater than they are at the present time, and this could all be accomplished without endangering the very structure of the Government itself.

There are those who think that the international debt question is the most important question before the people of this country. There are those who think that taxation is the most important question. There are those who believe that unemployment is still more important, but what I am going to discuss with you this evening is something far more fundamental. International debts, depreciated currencies, the price of wheat and cotton, unemployment, taxation, balancing the Budget are only special phases of the larger question of money and credits as they affect your living condition and mine.

These other questions, such as taxation, international debts, bulk larger because they are effects and not causes. It is always easier to see effects than causes. I propose to show you to-night how this underlying cause may be removed.

The thing that is fundamentally wrong with this country to-night is the relation of our medium of exchange, or gold, to world commodities. We are all saying to-night that the price of wheat, cotton, copper, silver, and the price of all other commodities are extremely low, but did you ever stop to think that the world price of the basic commodities is relatively about the same as it was in 1926 and 1927? In other words, while wheat, cotton, lumber, and other commodities have fallen, if you restored barter and trade, you could get about as much wheat for cotton, as much copper for this or that as you did in 1926. What has happened is that our medium of exchange, the thing we call money, dollars, gold, has appreciated in value instead of commodity values having fallen.

You would not hear anything about high taxes if lands and property were bringing in the same revenue that they were in 1926. I doubt that you would hear the foreign nations repudiating their indebtedness if the world commodities were bringing the same price that they were when they made their agreements.

Nor would you see the general liquidation going on with its repudiation of indebtedness if commodities had not fallen to their present low level. Nor would it be necessary to cut wages or put millions of people out of work if purchasing power of the people of this country had not been destroyed through the appreciation of our gold dollar, or, stated in another way, the lowering of commodity prices.

You often hear it said, What we want is sound money, money worth 100 cents on the dollar. How can there be any other kind of dollar as long as by law 100 cents constitute a dollar in the same way 2 pints constitute a quart? What do people mean by sound money or the honest dollar? There is no such thing as sound money or an honest dollar. What we want is stable money, money that has the same purchasing power in 1926 as it has in 1932. The thing we are suffering from to-night is the appreciation in the value of our gold dollar. Its purchasing power has increased enormously. It takes three or four times as many commodities to buy an ounce of gold as it did in 1926. When one commodity by reason of overproduction becomes cheaper, then you have a right to say that that particular article has fluctuated in value; but when all commodities in practical unison go down together in their gold value, then you must admit that it is the gold that has appreciated rather than the commodities having depreciated.

The United States to-day is facing the most serious crisis since the Civil War. I think it is a more serious situation than that which confronted Lincoln. It is a much more serious reflection upon the intelligence of those who guide our economic destinies than was the Civil War. Our national income has decreased from eighty-five billions in 1929 to fifty-four billions in 1931.

Twenty billions of this thirty-one billions of decrease in national income was due to lower prices. In the case of agriculture, the gross income of the farms dropped from nearly $12,000,000,000 in 1929 to five billion in 1932, a decrease of over 50 per cent, and all of this was due to falling prices for the farmer's commodities. As a result of falling prices, merchants, manufacturers, railroads, and business and professional men, as well as the farmers of this country, are facing bankruptcy and ruin.

Wage workers' income during the same period has fallen from $53,000,000,000 in 1929 to an estimated income for 1932 of only $28,000,000,000. The farmer's loss of income was due to falling prices, while the wage worker's loss was due to the cutting of wages and unemployment, which in turn was caused by the loss of purchasing power due to falling prices. Unless Congress takes some very prompt and very drastic action to care for our unemployed millions, and to restore commodity prices, we will have a complete collapse of our financial set-up followed, perhaps, with a more severe shake-up of our political institutions than we have ever had or dared think about. I make that statement seriously, after having traveled during the past few months from the Atlantic to the Pacific, and discussing the situation with leaders of industry and finance, as well as with farm and labor leaders.

Make no mistake about that. People are not going to starve in the midst of plenty. The few hundred of hunger marchers who came to Washington to lay their grievances before Congress will be but the advance guard of many thousands who will come unless speedy relief is found for the 11,000,000 of unemployed in this country, and some provision made to save the farmers from the land banks and mortgage companies who are now foreclosing on their farms and taking possession of them at bargain prices.

Just a few days ago bankrupt farmers marched on Washington and, with determination in their voices and fire in their eyes, declared that the banks might get title to their farms but they would never get possession of them.

We must not forget that the bankrupt farmers and the millions of unemployed men who are tramping our streets looking in vain for work, as well as many business and professional men, have lost faith in our financial and political leaders. Not only that, but they are growing impatient and bitter. The well-directed propaganda against Congress has been very effective, but the hatred which it has aroused has not been confined to Congress as was intended but that hatred extends also to the financial and industrial leaders. The people realize that to a large extent financial leaders have been and are the guiding geniuses of both old political parties and have dictated what legislation should or should not be written upon our statute books.

America has reached the crossroads. We are confronted with the choice of either solving our financial and economical problems in the near future, in this or the next session of Congress, or facing chaos. There is no other alternative. Let us not deceive ourselves on this point.

In the face of this national crisis what are our political and financial leaders offering as a solution for this problem? Can anyone name a solitary proposal that has been advanced that deals with the basic and fundamental causes of this depression? I have studied the various remedies that are being offered by the Republican and Democratic leaders, but I fail to find in them any grounds for even a hope that they will save the country at this time or prevent a recurrence of such a disaster in the future. The people of the country to-day are far more advanced in their thinking than are our political leaders.

I need not narrate how millions of people pinned their hopes to the moratorium as they are now pinning their faith with equal foolishness to cancellation of European war debts to liberate them from the clutches of the depression, nor does it seem to me that it is necessary to remind you of the faith that some poor souls have had in the Reconstruction Finance Corporation, the Glass-Steagall bill, the sales tax, and in the so-called home-loan banks, and other bills which

were proposed during the last session of Congress, voted for blindly by the most of those on each side of the Chamber.

When those bills were pending I asked the question as to what there was in each and every one of them that came before Congress that would raise the commodity price level of the thing the producer had to sell upon the world market, or in other words, restore the relation between the dollar and the commodity price level where it was in 1926 and 1927, so that the man who borrowed money at that time could pay it back with money of the same value. Each time I received the same reply. Unless you pour Government money into these banks, insurance companies, railroads, your farmers are going to suffer; but if you pass this legislation, then, they said, smoke will be coming out of the chimneys, railroads will be prosperous, and your farmers will find a ready and rising market for their products. Each and every one of their predictions was wrong, as anyone who made a casual survey of the economic conditions that confronted this country should have known.

But I do not want to look backward. I want to look into the future. Let us go forward from this point on and have the courage to pass the necessary legislation now to bring prosperity back once more to the homes and firesides not only of the farmers and workers but also business and professional men who are likewise suffering.

I think there are several ways in which we can bring this country out of this depression in a very short time. We can do as England and some of the other countries have done, go off the gold standard and resort to a managed currency. We can revaluate the gold dollar, or we can go back and reestablish the money of our forefathers. That is, we can provide that silver shall be used as primary money in this country along with gold, the same as it was used by our ancestors up until 1873, and I am whole-heartedly in favor of the latter as being the most conservative and, at the same time, most effective method.

If some one told you we could quadruple the purchasing power of untold millions of people who are using silver as their only monetary yardstick or are using it as a partial yardstick, you would immediately say to me that that would be a good thing. It would help put millions of our idle men and women to work. It would put the people of the Orient, Russia, and South America in a position to buy the things they want from us, automobiles, radios, boots and shoes, and so forth. Then if some one told you that he could at the same time raise the cost of production to our competitors in foreign countries—of wheat, cotton, and manufactured articles—who are now depressing our prices both in the world market as well as at home, you would feel that that would be an excellent thing to do, would you not? You would not scoff at the idea because, perchance, some one had previously advocated it and it had been defeated in a political campaign.

I introduced into the United States Senate my bill entitled "S. 2487," providing for the remonetization of silver at the ratio of 16 to 1, that is, providing that 16 ounces of silver shall have the same value as one ounce of gold. My bill proposes to do with silver exactly what we have done with gold—nothing more and nothing less. If we should pass my bill, 16 ounces of silver would immediately become the same value of 1 ounce of gold not only in the United States but throughout the world. That statement may be challenged by the uninformed but not by those who have given serious thought to the subject. It would do so because of the fact that the countries of the world know that we would have the power and resources to maintain that price of silver. It would do so because Great Britain, France, and Germany would have to follow or lose their trade with silver-using countries and Russia. The passage of the so-called Wheeler bill would do more than quadruple the purchasing power of untold millions of people throughout the world and at the same time quadruple the value of their money. Quadrupling the value of their money would quadruple their cost of production of wheat, cotton, and manufactured articles, thereby preventing them from selling or dumping their wheat and cotton or manufactured articles upon the world market or in the United States at very low prices, as they are now doing by reason of their depreciated currency about which you have heard so much recently.

After the demonetization of silver in the United States in 1873 and after we in common with most of the countries in Europe went on the gold standard, there was a fall in prices for 20 years after 1873. Business and political leaders said, as they are saying to-day, that overproduction and invention of new labor-saving devices were the causes of the world depression. The depression of 1893 was world-wide, the same as it is at the present time. The London Economist called attention to it and the French and other continental papers of that time admitted it. Shortly thereafter the great discovery of gold in South Africa and in Alaska was made, and conditions throughout the world began to improve.

When the World War broke out practically every nation went off the gold standard and there was the greatest expansion of credit that the world had ever seen. Simultaneously with the expansion of credit throughout the world by both belligerent and neutral nations, prices of commodities rose accordingly and continued throughout the war up to 1920.

In the year 1920, there was held at Brussels a conference of international bankers, the avowed purpose of which was to get the countries of Europe to adopt the gold standard, which meant at that time, curtailment of credits and deflation.

In 1922 another financial conference was held in Genoa, which was attended by the leading international bankers of Europe and America. At this conference, as at the previous conference in Brussels, the object sought by the bankers was deflation and consequently lowering the price level of commodities.

It should have been readily seen that with the increase of population throughout the world, and with a tremendous increase in commerce and debts, the gold of the world would be insufficient to meet the demands of international trade to say nothing of the needs of the various countries for internal purposes. The gold stocks of the world are authoritatively stated to be $11,000,000,000, and the world trade is stated at $400,000,000,000. Assuming this to be a reasonable basis to use for calculation, the gold stocks are 2¾ per cent. A country on the gold standard is supposed to have a minimum of 29 to 34 per cent of gold back of its currency. We have that, but what have we back of our billions of bank credits that is liquid in times of emergency?

By reason of this expansion of commerce and increase in population throughout the world, there was a scramble for gold by the nations of the world.

The gold dollar—the so-called honest dollar of monometallists of years gone by—is to-day worth $1.50 to $2, and the debtor is called upon to pay the creditor an unearned increment of 50 to 100 cents upon every dollar he owes.

The enactment of the Federal reserve act, with its flexible provisions, was supposed to prevent just such a situation as confronts us to-day. I have no doubt it was prompted by the highest motives, but I am convinced it has not worked out as its authors thought and intended it should.

Many bills have been introduced in Congress for inflating our currency, but I want to call your attention to the fact that prices in general may advance as a result of increasing the volume of money in this country without materially affecting wheat, cotton, and other products that come in direct competition with the products of India, Argentina, Australia, Russia, and other wheat or cotton producing countries and some 40 other countries that are off the gold standard for the reason that as the price of silver as a commodity is lowered it takes less gold to purchase currencies of these countries to pay for wheat and cotton. In other words, assuming for the sake of argument that the world price of wheat was 50 cents gold, the American farmer would receive 50 cents in his money, less transportation and handling charges, but his competitor in Argentina would receive 70 cents in his money less transportation charges; and his cost of production is 40 per cent less than the American farmer

because Argentina's money is depreciated, in terms of dollars or gold, 40 per cent. The American farmer is, therefore, unable to compete in the world market, and I seriously doubt that any legislation can be passed to protect him as long as we continue our present financial policy.

I have told you of the effect of the depreciated currencies of other countries upon the farmer; now let me explain the effect upon the manufacturers of the country.

A depreciated currency may have practically no effect upon the cost of production within that country's own borders so long as the country has no dealings with other nations, but confines its business activities within its own borders, but as soon as its manufactured goods are exported to another country, the exchange rate between these countries, due to their appreciated or depreciated currencies, becomes an important matter. It then becomes apparent that the country with a depreciated currency has a distinct advantage in the fact that its cost of production is as much lower than another nation's as the percentage of depreciation of its currency.

I can not overemphasize the importance of this fact. Of all the great commercial nations of the world the United States alone has not depreciated her currency since the World War. I think a better statement of the same fact would be to say that we have doubled the commodity value of our dollar since the war and that we have thus erected a monetary tariff wall against the exporting of our own goods, and at the same time have made it very easy for other nations to flood this country with their products. It might be well for us to think in terms of our appreciated dollar rather than the depreciation of the currencies of other countries.

Let me give a simple illustration of how this principle is working to our disadvantage to-day. Let us suppose that Canadian currency depreciated 50 per cent like that of Japan, and that a shoe manufacturer in Boston and one in Toronto were each paying their labor $6 a day, and that the average cost of making a pair of shoes was in each factory $2 a pair. The Canadian dollar, although depreciated 50 per cent—as measured by our gold dollar—would still buy as much labor or pay as much rent or debt in Canada as the United States dollar would purchase or pay in the United States. To all outward appearances the standards of living and the value of each dollar were identical as long as it operated within its own country. It was only when the dollar crossed from one country to the other that the difference became apparent. The factory cost of production in the Toronto factory and in the Boston factory was $2 per pair of shoes measured in the dollars, respectively, of each country. But see what happens when trade crosses from one of these countries to the other. An American merchant goes to the Canadian factory and finds that one American dollar will purchase one pair of $2 Canadian shoes. This seems like a good bargain to the American, so he imports his shoes from Canada. But let us suppose that a Canadian merchant comes to the Boston shoe factory to purchase American-made shoes valued at $2 a pair in United States money. He finds that it will cost him $4 of his Canadian money to buy one pair of $2 American shoes, and the chances are he will not purchase them.

Now, if you will multiply that simple illustration by many thousands you will understand the great commercial advantage enjoyed by countries with a depreciated currency and why Japan is able to flood this country with her products at a cost delivered here in the United States of less than one-half our cost of producing them.

As gold increases in its exchangeable value for all other commodities, cost of production must increase in the gold-standard countries, and as the bullion price of silver decreases in its exchangeability for all other commodities, the cost of production must resultantly decrease in the silver-standard countries. In the United States, supposedly on the gold standard, as gold increases in its exchangeable value for all other commodities, cost of production must increase in our country, as a corresponding increased volume of products for the liquidation of our debts is required and the bulk of our business is conducted on credit. Whereas in the silver-standard countries, as the bullion price of silver decreases as measured in gold, the cost of production correspondingly decreases as the volume of products for the liquidation of all debts correspondingly decreases. Hence, in the United States, the producer of all raw material, as well as manufactured products, where a surplus exists, is doubly handicapped, first, by the increasing cost of production as gold increases in its exchangeable value for other commodities in our country, and, second and of even greater importance, the decreased cost of production in the silver-standard countries, for competing products in the world's market as the bullion price of silver decreases in the silver-standard countries.

You may double or treble the paper money of our own country, but by so doing you are simply increasing the cost of production in the United States but in no manner increasing the cost of production in the silver-standard nations, whereas the enactment of the Wheeler bill would quintuple the cost of production in the silver-standard nations, but contemporaneously and compensatorily quintuple their purchasing power; and the same financial yardstick would apply the world over in domestic as well as international commerce and establish the world's minimum price of $20.67 per ounce for fine gold and the minimum price of 1.29^{29}/_{100}$ per ounce for fine silver, with the result that the tendency would be to bring the silver-standard nations up to our high standard of living in the United States and our high labor wages, instead of bringing ours down to their much lower standards.

Accredited records show that since the discovery of America in 1492, down to and including the year 1929, covering a period of over 436 years, there were produced a total for the whole world of 1,041,232,774 fine ounces of gold and 14,729,598,697 fine ounces of silver. In other words, there was a little over 13 times as many fine ounces of silver produced as there were fine ounces of gold.

Applying our present coinage value (continued under the proposed Wheeler bill) of $20.67 per ounce for fine gold, the total world's production of gold for this over-436-year period has a monetary value of $21,525,005,673 and the total world's production of silver during this period of over 436 years has, under the coining value of our present standard silver dollars of 1.29^{29}/_{100}$ per ounce for fine silver—unchanged under the enactment of the Wheeler bill—a value of $19,044,329,616.

In the United States the free coinage of both silver and gold as provided for by the act of 1792 was continued unaltered until 1873, although the ratio between gold and silver coins was changed from 15 to 1 as fixed by the act of 1792, to 16 to 1 by the act of 1834, and 15,988 to 1 as fixed by the act of 1837.

Further note that from and including the years 1801 to 1850, the average gold-silver price ratio was 15.7 while the average silver-gold production ratio for the entire world was 28.0. In other words, although the world's production showed that 28 times as many fine ounces of silver as of fine ounces of gold were produced during that period from 1801 to 1850, yet the relative interchangeability the world over of these two metals was 15.7 ounces of fine silver to 1 ounce of fine gold.

Also note that from the period of 1851 to 1875, both inclusive, the average gold-silver price ratio was 15.5 while the silver-gold production ratio was 6.7. That is to say, during this period, although there was only 6.7 times as many ounces of silver produced as there were fine ounces of gold, yet the relative interchangeability between these two metals throughout the world averaged 15.5 ounces of silver to 1 ounce of gold.

The fact that Great Britain adopted gold monometallism in 1816, France several decades later, Germany in 1871, in conjunction with the above-stated average in gold and silver price ratio, together with the world's gold-silver production ratios from 1801 to 1876, prove conclusively the ability of the United States by independent action under the enactment of the Wheeler bill (S. 2487) to maintain a parity of 16 to 1, as provided for in said bill.

These above facts also absolutely disprove any claim that the United States under the enactment of the Wheeler bill would become the dumping ground for the world's silver or that silver, the cheaper metal, would drive out gold, the dearer metal (in the frequently attempted misapplication of the Gresham law), for the reason that neither metal would be cheaper or dearer because of the unlimited demand (compared with nature's limited supply) created for both metals resultant from the free and unlimited coinage of the same by the United States Mint at the fixed values for each metal as provided for under the Wheeler bill.

The claim of some of the gold monometallists that China, India, and other nations that for many centuries have only known silver as their financial yardstick would dump their silver on the market of the United States under the enactment of the Wheeler bill is too absurd and asinine to justify even consideration. Imagine these nations, representing far more than half the population of the civilized world, voluntarily divesting themselves of their only known financial yardstick in their domestic or foreign commerce, thereby necessitating cessation of all domestic business among themselves or foreign business with other nations of the world.

Let me call your attention also to the fact that if we independently and alone should remonetize silver, we would immediately take away from Great Britain, France, and Germany the trade they now enjoy in the Orient, in Mexico, and South America. England is off the gold standard, and is profiting in her foreign trade by reason of it. Is there anyone so naïve as to believe that England would not be forced to adopt bimetallism when she saw her trade in these countries coming to America? Why must we wait on England; why not take the lead?

Under what is known as the remonetization of silver on the basis of 16 to 1, the Government does not purchase the silver or the gold. It simply receives the bullion at the mint. After that it is brought to the proper standard of fineness for coins; and if the bullion requires to be refined, the Government makes a charge equal to the cost of bringing the metal to standard fineness; that is, nine-tenths fine. Then the Government puts its stamp on each piece and turns the coins over to the depositor, and that is all there is to it.

Or the Government may, if it has the coin on hand, at once deliver the coin to the depositor for the bullion; but the Government in no proper sense buys the bullion nor does it become the owner of it. The bullion and the coin made from the bullion belong to the depositor.

Separate provision, however, has been made on account of the greater convenience of a paper circulation, for the issue of notes, dollar for dollar, for the coin or bullion which in that case the Government holds in trust for whoever holds the notes or certificates.

In our United States coinage 23.22 grains of fine gold constitute a dollar, namely, $20.67 per fine ounce for gold, and 371.25 grains of fine silver constitute a dollar, or $1.29 per ounce for fine silver.

The Wheeler bill adopts the same coinage value by providing under section 3, "the dollar consisting of 25.8 grains of gold nine-tenths fine, or of 412.5 grains of silver nine-tenths fine, shall be the standard unit of value," and so forth.

For many, many centuries silver and gold have been the only primary money metals of the entire civilized world.

There is no known compilation giving the amount of gold and silver in the world at the present time. On January 1, 1930, the total monetary stock of the principal countries of the world on the basis of $20.67 per ounce of fine gold was $11,027,370,000, and the total silver stock in banks and treasuries at the same time on the basis of $1.29^{29}/$_{100}$ per ounce for silver was $4,099,914,000.

The present bullion value of silver in the United States is approximately 25 cents per ounce. Under the enactment of the Wheeler bill contemporaneously throughout the civilized world, silver would have a minimum value of $1.29^{29}/$_{100}$ per ounce and interchangeable with gold throughout the civilized world on the basis of a minimum value of $20.67 per ounce. This would contemporaneously quadruple the purchasing power of all the silver-standard nations—well over 60 per cent of the civilized world—establish a rigid financial yardstick for international exchange and provide, in my opinion, an unlimited market at a fixed minimum price for all our surplus of raw material and manufactured products of all kinds which would absorb the products of the automobile, electrical and all other factories for a period of 20 years if run at full capacity; but far greater and more desirable than this, it would insure a profitable price to the agriculturists, representing practically 30 per cent of our population, for their products within two years and quadruple the present land values making same desirable collateral instead of undesirable as same have been the past decade or more.

All must concede that our new wealth is produced entirely from the ground and the waters; and unless cost of production and a fair profit are assured, we shall have no new wealth and ultimately be deprived of the food and sustenance necessary for life itself.

For over 50 years now we have been thrilled or shocked, dependent upon the individual's viewpoint, with rumors of international conferences or international agreements for the remonetization of silver.

Undoubtedly, there are many honest advocates of international bimetallism believing that the United States by independent action can not effect a rigid ratio of interchangeability between the two metals.

Historical facts justify the assertion that there are many gold monometallists bitterly opposed to bimetallism—not only whether established by international agreement or independent action on the part of the United States—who hypocritically pose as international bimetallists, thereby creating a barrage to prevent possible action by the United States alone.

I can understand why China might not want the United States to remonetize silver at a ratio of 16 to 1, as this would increase the cost of production and might injure her notwithstanding the fact that she would be in a measure compensated by the increase in the purchasing power of her silver currency.

I can understand why England might not want to see silver remonetized by the United States, because it is to England's advantage that production costs here should remain at the present high level, as this gives her very great commercial advantage as an exporter of manufactured goods. For the same reason I can understand why Japan and Germany might like to have us remain on our high pedestal of gold so that they can undersell us in the markets of the world.

But as an American citizen and interested first of all in the prosperity and happiness of the American people, I can not understand why anyone who wants prosperity to return to the United States should object to the remonetization of silver by the United States without waiting for the consent of other nations who benefit commercially by the United States remaining upon the gold standard.

I think it was Will Rogers who once said that "The United States has never lost a war and never won a conference." We are not a country of diplomats; and when we have gotten into the intrigues of European diplomacy, our statesmen in the past have been entirely outclassed.

Why should England agree to join with the United States for the purpose of remonetizing silver, when depressing the price of silver enables her to buy cheap wheat and cotton from India?

In addition to the benefits England gets by reason of cheap cotton and cheap wheat from the Orient, her manufacturing interests are able to undersell us in the world markets, due to a depreciation of 30 per cent in her currency since going off the gold standard. In other words, when a manufacturer of shoes in England competes in the world market with the manufacturer of shoes in the United States, he enjoys an advantage of 30 per cent in labor costs alone, because of the fact that wages and living costs in England did not increase when her currency depreciated. This advantage of 30 per cent which England has over the United

States applies to all her industries, whether shoes, textiles, or steel. Quoting again from the article in the Saturday Evening Post by Samuel Blythe:

> Over a period covering 1931 and the first six months of 1932, there were imported into the Pacific coast territory 183,228 net tons of finished steel made by cheap foreign labor and sent here under cheap freight rates in foreign ships.

It is the United States that is suffering from the depreciated currencies of other nations who are our competitors. Why should we expect them to join us in an international conference for the remonetization of silver which would take from them the commercial advantage which they now enjoy? Mr. Mitchell, of the National City Bank, is quoted in the Chicago Tribune as saying:

> Since it is neither practicable nor indeed thinkable for the United States to adopt either the course of attempting to withdraw behind impenetrable tariff walls or that of entering upon a competition in currency depreciation of which the end is zero for all, there remains only the alternative of cooperation with foreign nations in the efforts to remove such obstacles as may still bar the way of their return to a gold basis.

I wonder why Mr. Mitchell assumes that these countries want to return to the gold standard; for there is every indication that England will not do so for many years to come; and if she does, it is very certain it will be with a greatly reduced amount of gold in her monetary unit, the pound.

But why should we wait for England or any other nation to join with us when we know that it is greatly to their advantage to leave us upon our pedestal of gold? And what assurance have we, if we had an international agreement, the countries would keep their word and would not break faith? Practically every nation in the world has broken its treaties and its word when it found it to its economic interest to do so. We have the best example of France, one of the most civilized nations of the world, recently breaking her word and solemn agreement by refusing to pay the installment she owed the United States, not on the ground that she was unable to pay it, but on the ground, notwithstanding she was able to pay it, that she felt it was not to her economic interest to do so.

Why should we seek an international agreement? Did Germany, when she inflated her currency in 1923, have an international agreement with reference to it? Did Austria, when she inflated in 1924, seek the advice, judgment, or consent of the other nations of the world? Did France consult England or any other European country or America when she devaluated her franc from 20 cents to 4 cents? Did England, Sweden, Norway, or any of the 40 nations now off the gold standard, consult with the United States when they took the course they did? And yet men stand here on the floor of the Senate urging, if you please, before we take any steps to regulate our currency as the Constitution of the United States provides that we should do, that we go over to an international conference and ask England, France, Germany, Czechoslovakia, Japan, China, Bulgaria, and Turkey as to what we should do with our money.

I assert that we are to-day the strongest and most powerful Nation in all the world, not because we are on the gold standard but in spite of it; not because of the fact that anything was done by our bankers but in spite of them; not because of the fact that any of our so-called financial and industrial leaders had done anything but in spite of them; but because of the intelligence, integrity, and virility of the American people which were built up under a free Government in a new country possessed of the greatest natural resources, of climatic conditions which go to make strong characters, and because of the fact that our forefathers wrote into the Constitution not only the right of Congress to make but its duty to regulate the currency and fix the value thereof.

But men will stand here on the floor of the Senate and talk of the wisdom of our forefathers; they will sing the praises of Washington on his birthday; they will put a halo around Thomas Jefferson; they will sing the praises of Madison and Hamilton, who you Republicans assert was the greatest Secretary of the Treasury, at least up until the time of Andrew Mellon, but they are afraid to adopt the money which was established by the forefathers of this country.

Why have we weakened? We have weakened because of the fact that the international bankers of this country to-day, the financial and industrial leaders, have dominated every piece of legislation in recent times. They control to-day the railroads and industries; they have muzzled the press and avenues of information and have educated the people of this country to the idea that we could only be prosperous if we let them manage our currency, our industrial life, and our political life.

In the Senate of the United States, January 4, 1932, Mr. WHEELER introduced the following bill, which was read twice and referred to the Committee on Finance:

S. 2487

A bill to establish a bimetallic system of currency, employing gold and silver, to fix the relative value of gold and silver, to provide for the free coinage of silver as well as gold, and for other purposes

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the proportional value of silver to gold in all coins which are by law current as money within the United States shall be as 16 to 1, according to quantity in weight, of pure silver or pure gold; that is to say, every 16 pounds weight of pure silver shall be of equal value in all payments with 1 pound weight of pure gold, and so in proportion as to any greater or less quantities of the respective metals.

SEC. 2. There shall be free coinage of both gold and silver, at the ratio fixed in this act, subject to the conditions and limitations now provided by law with respect to the coinage of gold; and all the laws of the United States relating to such coinage or to recoinage, exchange, or conversion of coin, bars, or bullion of gold, shall apply equally, so far as practicable, to silver.

SEC. 3. The dollar consisting of $25^{8}/_{10}$ grains of gold nine-tenths fine, or of $412\frac{1}{2}$ grains of silver nine-tenths fine, shall be the standard unit of value, and all forms of money issued or coined by the United States shall be maintained at a parity of value with this standard, and it shall be the duty of the Secretary of the Treasury to maintain such parity.

The PRESIDENT pro tempore. The time of the Senator from Montana has expired.

Mr. THOMAS of Oklahoma. Mr. President, I suggest the absence of a quorum.

Mr. BULKLEY. Mr. President, has any business intervened?

The PRESIDENT pro tempore. No business has intervened.

Mr. BULKLEY. I make that point.

Mr. LONG. Mr. President, a point of order: Some business has intervened. We have passed on the last amendment. The last business was the vote on the first amendment of the Senator from New Jersey [Mr. KEAN]; so that business has been transacted.

Mr. THOMAS of Oklahoma. A second point of order, Mr. President——

The PRESIDENT pro tempore. The Chair sustains the statement made by the Senator from Louisiana. Therefore, the clerk will call the roll.

The Chief Clerk called the roll, and the following Senators answered to their names:

Ashurst	Dale	Keyes	Schuyler
Austin	Davis	King	Sheppard
Bailey	Dickinson	La Follette	Shipstead
Bankhead	Dill	Lewis	Shortridge

The PRESIDENT pro tempore. Ninety-four Senators having answered to their names, a quorum is present.

ARRANGEMENTS FOR THE INAUGURAL CEREMONIES

Mr. ROBINSON of Arkansas. Mr. President, I ask unanimous consent for the present consideration of the joint resolution which I send to the clerk's desk.

Yesterday, on behalf of the inaugural committee, two joint resolutions were introduced, Senate Joint Resolution 239, authorizing the granting of certain permits in the District of Columbia, and Senate Joint Resolution 240, to provide for the quartering in certain public buildings in the District of troops participating in the inaugural ceremonies. I am advised that it is necessary to pass these joint resolutions now in order that the preparations may go forward promptly.

The PRESIDENT pro tempore. Is there objection to the request of the Senator from Arkansas for the consideration of Senate Joint Resolution 239?

There being no objection, the Senate proceeded to consider the joint resolution (S. J. Res. 239), authorizing the granting of permits to the Committee on Inaugural Ceremonies on the occasion of the inauguration of the President elect in March, 1933, and for other purposes.

Mr. ROBINSON of Arkansas. Mr. President, I move the following amendment to the joint resolution: In section 4, on page 5, line 21, after the word "permit," to strike out the words "the Western Union Telegraph Co., the Chesapeake & Potomac Telephone Co." and insert the words "telegraph, telephone."

The amendment was agreed to.

The joint resolution was ordered to be engrossed for a third reading, read the third time, and passed, as follows:

Resolved, etc., That the Director of Public Buildings and Public Parks of the National Capital, and such other officers of the District of Columbia and the United States as control any public lands in the District of Columbia, are hereby authorized to grant permits, under such restrictions as they may deem necessary, to the Committee on Inaugural Ceremonies for the use of any reservations or other public spaces in the city of Washington under their control on the occasion of the inauguration of the President elect in March, 1933: *Provided*, That in their opinion no serious or permanent injuries will be thereby inflicted upon such reservations or public spaces or statuary thereon; and the Commissioners of the District of Columbia may designate for such and other purposes on the occasion aforesaid such streets, avenues, and sidewalks in said city of Washington under their control as they may deem proper and necessary: *Provided, however*, That all stands or platforms that may be erected on the public space, as aforesaid, including such as may be erected in connection with the display of fireworks, shall be under the said supervision of the said inaugural committee, and no stand shall be built on the sidewalk, streets, parks, and public grounds of the District of Columbia, not including the area on the south side of Pennsylvania Avenue directly in front of the White House, except such as are approved by the inaugural committee and the building inspector of the District of Columbia, and no stands shall be built on the sidewalks or streets on the south side of Pennsylvania Avenue directly in front of the White House, except such as are approved by the inaugural committee, the building inspector of the District of Columbia, and the Director of Public Buildings and Parks: *And provided further*, That the reservations or public spaces occupied by the stands or other structures shall after the inauguration be promptly restored to their condition before such occupation, and that the inaugural committee shall indemnify the appropriate agency of the Government for any damages of any kind whatsoever upon such reservations or spaces by reason of such use.

SEC. 2. The Commissioners of the District of Columbia are hereby authorized to permit the committee on illumination, of the inaugural committee for said inaugural ceremonies, to stretch suitable overhead conductors, with sufficient supports wherever necessary, for the purpose of connecting with the present supply of light for the purpose of effecting the said illumination: *Provided*, That if it shall be necessary to erect wires for illuminating or other purposes over any park or reservation in the District of Columbia the work of erection and removal of said wires shall be under the supervision of the official in charge of said park or reservation: *Provided further*, That the said conductors shall not be used for conveying electrical currents after March 8, 1933, and shall, with their supports, be fully and entirely removed from the streets and avenues of the said city of Washington on or before March 15, 1933: *And provided further*, That the stretching and removing of the said wires shall be under the supervision of the Commissioners of the District of Columbia, or such other officials as may have jurisdiction in the premises, who shall see that the provisions of this resolution are enforced, that all needful precautions are taken for the protection of the public, and that the pavement of any street, avenue, or alley disturbed is replaced in as good condition as before entering upon the work herein authorized: *And provided further*, That no expense or damage on account of or due to the stretching, operation, or removal of the said temporary overhead conductors shall be incurred by the United States or the District of Columbia.

SEC. 3. The Secretary of War and the Secretary of the Navy be, and they are hereby, authorized to loan to the Committee on Inaugural Ceremonies such hospital tents, smaller tents, camp appliances, ensigns, flags, and signal numbers, and so forth, belonging to the Government of the United States (except battle flags) that are not now in use and may be suitable and proper for decoration, and which may, in their judgment, be spared without detriment to the public service, such flags to be used in connection with said ceremonies by said committee under such regulations and restrictions as may be prescribed by the said Secretaries, or either of them, in decorating the fronts of public buildings and other places on the line of march, between the Capitol and the Executive Mansion and the interior of the reception hall: *Provided*, That the loan of the said hospital tents, smaller tents, camp appliances, ensigns, flags, and signal numbers, and so forth, to said committee shall not take place prior to the 23d of February, and they shall be returned by the 9th day of March, 1933: *Provided further*, That the said committee shall indemnify the said departments, or either of them, for any loss or damage to such flags not necessarily incident to such use. That the Secretary of War is hereby authorized to loan to the inaugural committee for the purpose of caring for the sick, injured, and infirm on the occasion of said inauguration, such hospital tents and camp appliances, and other necessaries, hospital furniture and utensils of all descriptions, ambulances, horses, drivers, stretchers, and Red Cross flags and poles belonging to the Government of the United States as in his judgment may be spared and are not in use by the Government at the time of the inauguration: *And provided further*, That the inaugural committee shall indemnify the War Department for any loss or damage to such hospital tents and appliances, as aforesaid, not necessarily incident to such use.

SEC. 4. The Commissioners of the District of Columbia and the Director of Public Buildings and Public Parks be, and they are hereby, authorized to permit telegraph, telephone, and radiobroadcasting companies, to extend overhead wires to such points along the line of parade as shall be deemed by the chief marshal convenient for use in connection with the parade and other inaugural purposes, the said wires to be taken down within 10 days after the conclusion of the ceremonies.

Mr. ROBINSON of Arkansas. Mr. President, I ask for the consideration of Senate Joint Resolution 240, to provide for the quartering, in certain public buildings in the District of Columbia, of troops participating in the inaugural ceremonies.

The PRESIDENT pro tempore. Is there objection?

There being no objection, the joint resolution was considered, ordered to be engrossed for a third reading, read the third time, and passed, as follows:

Resolved, etc., That the Director of Public Buildings and Public Parks of the National Capital is authorized to allocate such space in any public building under his care and supervision as he deems necessary for the purposes of quartering troops participating in the inaugural ceremonies to be held on March 4, 1933, but such use shall not continue after March 6, 1933. Authority granted by this resolution may be exercised notwithstanding the provisions of the legislative, executive, and judicial appropriation act for the fiscal year ending June 30, 1903, approved April 28, 1902, prohibiting the use of public buildings in connection with inaugural ceremonies.

CROP PRODUCTION AND HARVESTING LOANS

Mr. SMITH. Mr. President, there were inadvertently left out of the crop production loan measure certain words which should have been incorporated, and a concurrent resolution is necessary to insert the words. As time is very essential in this matter, I ask unanimous consent for the present consideration of the concurrent resolution which I send to the desk.

Mr. McNARY. Let it be reported.

The PRESIDENT pro tempore. The concurrent resolution will be read for the information of the Senate.

The concurrent resolution (S. Con. Res. 41) was read, as follows:

Resolved by the Senate (the House of Representatives concurring), That the Secretary of the Senate be, and he is hereby, authorized and directed, in the enrollment of the bill (S. 5160) to provide for loans to farmers for crop production and harvesting during the year 1933, and for other purposes, to insert on page 2, line 9, of the engrossed House amendment, after the figures "1933," the following: "or on livestock."

The PRESIDENT pro tempore. The Senator from South Carolina asks unanimous consent for the present consideration of the concurrent resolution. Is there objection?

Mr. McNARY. Mr. President, let me ask the Senator what would be the effect of the concurrent resolution? Would it modify the conference report passed on yesterday?

Mr. SMITH. Inadvertently certain words were left out, that is all.

Mr. McNARY. Has the Senator conferred with the House conferees?

Mr. SMITH. The House conferees are very anxious to have this action taken and stated that if the Senate would pass the concurrent resolution and send it to the House, they would have it taken care of over there. It is to correct an error in the wording.

The PRESIDENT pro tempore. Is there objection to the present consideration of the concurrent resolution?

There being no objection, the concurrent resolution was considered and agreed to.

BANKING ACT

The Senate resumed the consideration of the bill (S. 4412) to provide for the safer and more effective use of the assets of Federal reserve banks and of national banking associations, to regulate interbank control, to prevent the undue diversion of funds into speculative operations, and for other purposes.

Mr. LONG. Mr. President, we still have under consideration the second amendment offered by the Senator from New Jersey [Mr. KEAN].

The PRESIDENT pro tempore. That is correct.

Mr. LONG. Mr. President, we have been discussing the pending bill under a unanimous-consent agreement. We entered into a unanimous-consent agreement under which each Senator was to have 30 minutes on any amendment and an hour on the bill. I understand that some of those who have unanimously so agreed now wish to break the unanimous-consent agreement by whatever rule of cloture may be necessary.

I am glad to say that we have painted this bill as it should have been painted. I am glad to say that it has no more chance of becoming a law than I have of becoming Pope of Rome, and I am a Baptist. I wish to say that it does not make any difference now what happens here, we have dressed it up and crippled it up in this iniquitous branch-banking feature as well as we could do it in this body, and I do not think it can hobble through another proceeding of any kind or character.

We have been able to point out to the people of the United States that the Senate has consumed 21 days' time on this bill. Twenty-one days' time of the Senate of the United States have been consumed on this bill, the initial purpose of which was to consolidate in the hands of the bankers of this country all the power of the banking resources of the United States. We feel that we have dressed the bill down and taken out as many of the iniquities as we could possibly expect to take out were we to delay it to any time in the future. We will reserve our right, when the time comes again, to do anything to deal a further deathblow to this iniquitous character of legislation, and do the best we can. I do not think we need have any worry. I do not think the measure is ever going to come back to these portals at all. However, I wish it understood that when it goes to the other end of the Capitol it will go having had as much aid and defense by parliamentary process as could be assembled in its defense and to speed it on.

We have let the hungry cry, but we have not had to have a night session for the hungry yet. We have let the naked wail, but we have never had to arrest a single Senator and bring him back into the United States Senate in order to get the Senate to give consideration to the naked. We have let the homeless wander through the highways and the byways. They are crying, they are begging, they are pleading, they are beseeching, but there has never been any suggestion of anything being done in their behalf.

No Senator need fear any kind of cloture. No one here need fear any such thing as an arrest, so long as there is no proposal of legislation except something to help the gigantic banking control of this country. No man need fear anything like any unusual process to carry it through. But 21 days' time of the Senate have been consumed trying to jam the iniquities of this bill down the throats of the starving and the suffering and the struggling American people.

Twenty-one days, Mr. President, have been sufficient so that the men and the women back at the forks of the creek learned enough about this bill, of its iniquities, its unpopularity, its various and sundry forms of perversion of American principles and ideals, and it is now well enough known that we need have no further worry or concern as to what is going to happen to it at this session of Congress. It is not only as dead as a hammer; it never even had the life a hammer ever had, leaving the Senate as it is now leaving it.

Mr. President, I wish to propound this inquiry: What is the next order we have to take up when we leave this bill? May I ask some of the leaders what is next on the program?

Mr. McNARY. Mr. President, a motion could be made to proceed to the consideration of the Treasury and Post Office bill, containing the features of the economy bill.

Mr. BLAINE. Mr. President, I will say to the Senator, and for the information of the Senate, that I shall move to take up for consideration the joint resolution providing for the repeal of the eighteenth amendment, in order that this Congress may have an opportunity to carry out the party platforms of the year 1932.

Mr. WAGNER. Mr. President, did I understand the Senator to say that the joint resolution which has been reported by the Committee on the Judiciary carries out the platform pledges of the parties with reference to the repeal of the eighteenth amendment?

Mr. BLAINE. If the Senator had listened to what I said he would have observed that I said to give the Congress an opportunity to carry out the platform pledges of the parties in the year 1932.

Mr. WAGNER. Very well.

Mr. BLAINE. I assume that that opportunity will not be afforded unless the joint resolution is taken up for consideration.

Mr. WAGNER. I misunderstood the Senator. I apologize.

Mr. CAPPER. Mr. President, will the Senator from Louisiana yield to me?

Mr. LONG. I yield.

Mr. CAPPER. I want to say right here that I am still waiting for an opportunity to renew the motion I made on December 21 to take up Senate bill 97, known as the fair trade bill. I have tried for two months to get that bill before the Senate and I shall try again.

Mr. LONG. Mr. President, I have been very glad to listen to what is expected to be brought up, but I am very sorry that there is no one suggesting anything to give relief to the human race. I was hoping that I might encounter a statement from some Senator that if the pending bill were out of the way he would move to take up something for the relief of humanity. I am very sorry that we have not heard that among the various and sundry suggestions.

Just one more word and I shall be through. I wish to say to the Senate that the discussion which we have had has brought out the fact that the trouble with this country is that the wealth is concentrated in the hands of the few; that the trouble is that with too much to eat you have let the people starve; that you have let them go naked with too much to wear, and homeless with too many houses. Now that you take this carcass out of the Senate—because it is a carcass—I hope that we shall not have to follow the carcass over to the other end of the Capitol. It has received its blow where it should have received it. You have held it over 21 days. You can not blow life into it after it gets out of here.

We have taken off the right leg of the corpse and its right arm and chiseled into its lungs, and now I hope that as you take it out of here, deformed, dehorned, and otherwise as it is, you will make good some of this claptrap and clamor that you have given to the American people, that if you could get this iniquitous bankers' proposal out of here you would pass some legislation for the relief of human suffering. Let us see it when you get it out of here. We are ready for it to go. We do not care now, so far as it becoming law is concerned. That has passed into the far beyond, that bourn from whence no traveler returns.

Now that you can get this iniquitous measure out of here, I hope that distinguished Senators with good motives, good hearts, and pure principles will now have nothing further in their way but will come forward with legislation that will feed the starving in a land of too much to eat and clothe the naked in a land of too much to wear.

Mr. THOMAS of Oklahoma. Mr. President, I desire to make a brief statement probably occupying a moment and then propose a unanimous-consent request. If anyone wants to call a quorum before I proceed I will withhold my request for that purpose.

Mr. President, in some sections it is claimed that those who oppose the passage of the Glass branch banking bill are engaged in a filibuster. If their opposition to the Glass branch banking bill is correctly called a filibuster, then it is a filibuster against a scarcity of money, a filibuster against the absence of credit, a filibuster against hunger, cold, and want, a filibuster against the failure of the Senate leadership in even trying to ascertain the causes of the depression. Hence those who are filibustering against the Glass branch banking bill in the true sense are filibustering against the laggardness of Senate leaders in not even trying to check the ravages of the now almost 4-year-old depression.

Mr. President, I propose the following unanimous-consent agreement, that beginning at 7 o'clock p. m. this day debate be limited to one speech of not to exceed 10 minutes on each amendment, and that the Senate remain in continuous session until a final vote is had upon the pending bill.

Mr. TYDINGS. Mr. President, in perfect good faith, I ask the Senator from Oklahoma if I should offer the amendment of which I spoke earlier in the afternoon, namely, an amendment to provide a commission to inquire what might be done to bring commodity prices and money prices into parity, whether he would not be satisfied then to let that general subject matter go until the time when that proposition could be considered.

Mr. THOMAS of Oklahoma. Mr. President, personally I do not care to modify the unanimous-consent proposal.

Mr. COUZENS. Mr. President——

The PRESIDENT pro tempore. Does the Senator from Oklahoma yield to the Senator from Michigan?

Mr. THOMAS of Oklahoma. Certainly.

Mr. COUZENS. Does the Senator from Oklahoma propose by his unanimous-consent agreement to preclude the offering of any further amendments?

Mr. THOMAS of Oklahoma. No.

Mr. COUZENS. If it does not preclude the offering of any further amendments, then we can keep on offering amendments and consume time interminably.

Mr. LONG. So far, I think, as we are concerned, if the proponents of the bill wish to offer amendments we will have no objection, but we do not care to offer any.

Mr. GLASS. The proponents of the bill do not care to offer any amendments, and I could wish that the Senator would confine his unanimous-consent request to the amendments which have been sent up and printed and not permit any further amendments.

Mr. LONG. We will agree to that if the Senator from Oklahoma is willing.

Mr. THOMAS of Oklahoma. I wish to say to the Senate that I have one amendment which I want to propose, but I will make no speech and be content with a vote, and that is to strike out section 19.

The PRESIDENT pro tempore. The question is on entering into the unanimous-consent agreement. Is there objection?

Mr. TYDINGS. Mr. President, reserving the right to object, may I ask how many amendments are pending?

The PRESIDENT pro tempore. There is only one pending. There are several amendments that are lying on the table.

Mr. GLASS. There are some 8 or 10 amendments, I may state to the Senator from Maryland, lying on the table. Many of them are of a minor nature and unobjectionable. There are no controversial amendments pending.

Mr. TYDINGS. It seems to me if there are 30 or 40 amedments pending, at 10 minutes per Member, that would be 300 minutes per Member, or 5 hours per Member. If 10 Members intend to use 5 hours apiece on all these amendments, that means 50 hours, and at least 3 or 4 legislative days.

Mr. LONG. I think I can assure the Senator we will have the carcass out of here in an hour if he will consent.

Mr. TYDINGS. I did not understand the Senator.

Mr. LONG. I will repeat it. I think I can assure the Senator we will have the bill, to use a more polite term, out of here in an hour if he will consent.

Mr. TYDINGS. I shall not object.

Mr. McKELLAR. Mr. President, may the proposed agreement be read?

The PRESIDENT pro tempore. It will have to be stated before it is entered into. The Senator from Oklahoma proposes the following unanimous-consent agreement, which will be read for the information of the Senate.

The Chief Clerk read as follows:

It is agreed, by unanimous consent, that beginning at 7 o'clock p. m. to-day all debate be limited to one speech not to exceed 10 minutes each on any amendment and that the Senate remain in continuous session until the final vote is had on the pending bill.

Mr. CONNALLY. Mr. President, I have sent an amendment to the desk, and if we can have a vote on it I shall have no objection. I do not want to make a speech.

The PRESIDENT pro tempore. This does not preclude the Senator from Texas.

Mr. GLASS. As I understand from the Senator from Oklahoma, there shall be no further amendments proposed aside from those that have already been proposed and his proposal to strike out section 19.

The PRESIDENT pro tempore. The Chair does not understand that all that can be put in the unanimous-consent agreement. There are printed and lying on the table and eligible to be offered a considerable number of amendments. There is a time limit of 60 minutes of general debate available under the proposed unanimous-consent agreement, but that limitation would be removed if the other unanimous-consent agreement is entered into.

Mr. McNARY. Mr. President, if the proposal of the Senator from Oklahoma is adopted, would that limit debate of all kinds to 10 minutes on each amendment?

The PRESIDENT pro tempore. The Chair would so interpret the new unanimous-consent agreement.

Mr. LONG. May we have the proposed agreement amended so as to exclude the hour of general debate on the bill?

Mr. McNARY. If the conclusion of the Chair is correct and it does not prevent any speech of one hour on the bill, it might keep us here until an unreasonable hour in the morning.

The PRESIDENT pro tempore. No; the Senator from Oregon misunderstood the Chair. The Chair holds that the new unanimous-consent agreement would wipe out the one hour of time on the bill, and that 10 minutes for one speech on each amendment would be all any Senator could use. That is the interpretation of the Chair as the unanimous-consent agreement is proposed. The Chair would so hold. The author of the unanimous-consent agreement can probably state better what he had in his mind.

Mr. THOMAS of Oklahoma. I thought perhaps there might be some objection and there might be a quorum called. I wanted to give ample time to consider the 10-minute proposal. I have no objection to making it begin at 6.15, but I think the whole purpose will be subserved by making it 7 o'clock because we will commence now under the 10-minute limitation.

Mr. McNARY. Is it the opinion of the Senator from Oklahoma that under the proposed unanimous-consent agreement we would not be held here until the early hours of the morning?

Mr. THOMAS of Oklahoma. If what some call a filibuster should break out some place else, I do not know what might happen.

Mr. McNARY. If we are to remain in continuous session without a limitation of some kind, we might be held here until early morning.

Mr. LONG. I will guarantee we will not be here as late as 7.30. If we are, we will make it up in some other way.

Mr. COUZENS. Mr. President, unless it is understood that all amendments are to be filed before 7 o'clock I would not agree. If the amendments are filed before 7 o'clock then the proposed unanimous-consent agreement should be made to read "10 minutes each on any amendment then filed."

Mr. THOMAS of Oklahoma. That is perfectly agreeable to the proposer of the unanimous-consent agreement.

The PRESIDENT pro tempore. The Chair understands the unanimous-consent agreement to be in this form: It is agreed by unanimous consent that all amendments to the pending bill which are to be acted upon must be filed by 7 o'clock and that beginning at 7 o'clock no Senator may thereafter speak more than once or longer than 10 minutes upon any amendment then pending, and that the Senate shall remain in continuous session until the bill is finally disposed of. Is there objection? The Chair hears none, and the unanimous-consent agreement is entered into. The question is on agreeing to the second amendment proposed by the Senator from New Jersey. [Putting the question.] The amendment is agreed to.

Mr. KEAN. Mr. President, I send to the desk the following amendment.

The PRESIDENT pro tempore. Let the amendment be reported.

The CHIEF CLERK. On page 3, line 9, strike out the word "such," and substitute therefor the word "anyone."

Mr. GLASS. There is no objection to the amendment.

The PRESIDING OFFICER (Mr. FESS in the chair). Without objection, the amendment is agreed to.

Mr. KEAN. I send to the desk another amendment.

The PRESIDING OFFICER. The amendment will be stated.

The CHIEF CLERK. On page 3, line 11, strike out the word "such" and insert the word "anyone."

The PRESIDING OFFICER. Without objection, the amendment is agreed to.

Mr. KEAN. Mr. President, I offer the following amendment, which I send to the desk.

The PRESIDING OFFICER. The amendment will be stated.

The CHIEF CLERK. On page 8, line 10, after the word "amended," insert the following:

Provided, That nothing in this paragraph shall be construed to require any bank or trust company to dispose of any investment securities or stocks lawfully held by it on the date of the enactment of the banking act of 1932.

Mr. GLASS. Mr. President, there are already amendments covering that matter, and it will be unnecessary to have this amendment.

Mr. KEAN. Very well; I withdraw the amendment.

Mr. WHEELER. Mr. President, when I concluded my remarks a few moments ago I was in the midst of a speech with reference to my bill. I am wondering if there would be any objection if I extended my remarks so that the speech would be complete. I submit the request.

The PRESIDING OFFICER. Without objection, the request is granted.

Mr. KEAN. Mr. President, I send to the desk the following amendment in behalf of the Senator from Connecticut [Mr. WALCOTT].

The PRESIDING OFFICER. The amendment will be stated.

The CHIEF CLERK. On page 44, section 19, strike out the period after the words "imposed by the laws of the State on State banks" and insert in lieu thereof a colon and the following:

Provided, however, That any such association which is situated in a city having a population in excess of 100,000 may, with the approval of the Comptroller of the Currency, establish and operate such new branches within the limit of such city.

The PRESIDING OFFICER. The question is on the amendment offered by the Senator from New Jersey.

Mr. WALSH of Montana. Mr. President, may we have some explanation of the amendment? It seems to be a matter of some importance.

Mr. KEAN. Mr. President, I have not had time to read the amendment; it was handed to me but a moment ago. The Senator from Connecticut [Mr. WALCOTT], who is a member of the Banking and Currency Committee, is very familiar with this bill. The first I heard of the amendment was when it was handed to me but a moment ago, and I offered it at once. So I am not capable of speaking to it; but the able Senator from Virginia probably knows about it.

Mr. GLASS. Mr. President, of course, I shall raise no objection to the amendment, but I think it fair to state to the Senate that it largely reopens the question of branch banking, and I thought we ought not to do that.

Mr. SHIPSTEAD. Mr. President, this amendment would permit national banks to have branches within metropolitan areas of over 100,000 population in spite of the fact that the State laws do not authorize State banks to have branches in the State. The amendment ought to be defeated.

Mr. NORBECK. Mr. President, we agreed to limited debate to a few minutes, and then amendments are offered that can not even be explained in the time allowed. I consider such tactics utterly unfair. When we agreed to limit the debate, it was understood that the remaining amendments were ones with which we were somewhat familiar.

Mr. MOSES. Mr. President, under the unanimous-consent agreement there can be general debate for the next three-quarters of an hour.

Mr. NORBECK. Yes; for three-quarters of an hour, and now it is proposed to reopen the branch-banking question.

Mr. LONG. Mr. President, I rise to a point of order. May language already adopted be amended? Has not the language to which the amendment is offered been perfected? I make the point of order that it is not subject to further amendment. We have already amended it to provide under what conditions there may be branch banking, and now the Senator proposes to reform the language as to which we have already made a reformation?

The PRESIDING OFFICER. If this amendment is offered as an amendment to what has already been acted upon it is not in order.

Mr. LONG. That is the point of order I make.

Mr. BLAINE. Mr. President, the amendment on branch banking was submitted by the Senator from New Mexico [Mr. BRATTON] as a substitute for the provision in the bill. This amendment would have been in order to that proposed substitute.

The PRESIDING OFFICER. That is correct. The Senate having acted upon it, the only way the amendment would now be in order would be to reconsider the vote by which the so-called Bratton amendment was agreed to. The Chair sustains the point of order.

Mr. KEAN. Mr. President, I offer the amendment which I send to the desk.

The PRESIDING OFFICER. The amendment offered by the Senator from New Jersey will be stated.

The LEGISLATIVE CLERK. On page 35, line 11, it is proposed to strike out "$100,000" and insert in lieu thereof "$1,000,000."

Mr. WHEELER. Mr. President, will the Senator from New Jersey explain that amendment, if he can?

Mr. KEAN. Mr. President, I offer this amendment for the reason that in the case of great banks in such cities as New York, Chicago, St. Louis, and San Francisco the provision that this limitation shall not apply to any such issue the total amount of which does not exceed $100,000 is too restrictive. They may loan $2,000,000 to a corporation, and subsequently the corporation may say, "We can pay off three-quarters of that loan by an issuance of bonds

if you will take $500,000 of them or $750,000 of them," thereby relieving the bank to the extent of a million and a half dollars or so. That is the common practice. The exception in case the issuance of securities does not exceed $100,000, which has been put into the bill, is entirely inadequate to take care of transactions of that kind. That is the reason for raising the amount from $100,000 to a million dollars.

It is only the big manufacturers that come in and borrow $2,000,000 or $3,000,000 and then issue bonds and ask the banks to take a proportion of the issue, so as to help them float the bonds. The bank can invest in such securities more than 10 per cent of its capital and surplus in any event, but if they have enough to loan $5,000,000 or $10,000,000, as some of them have, to an industrial corporation and the industrial corporation says, "We will issue bonds; we can float $1,500,000 worth of bonds if you will take $500,000 worth," it is good business to be able to do that.

Mr. GLASS. Mr. President, I do not regard the amendment as any fundamental departure from the purposes of the bill except that there is no reason why the 10 per cent limitation should be applied to individuals and to small banks any more than to the larger banks. I think it is an undesirable amendment.

The PRESIDING OFFICER. The question is on agreeing to the amendment offered by the Senator from New Jersey.

The amendment was rejected.

Mr. THOMAS of Idaho. I offer the amendment which I send to the desk.

The VICE PRESIDENT. The amendment submitted by the Senator from Idaho will be stated.

Mr. LONG. Mr. President, I have an amendment which I have tried to get up.

The PRESIDING OFFICER. The clerk will state the amendment offered by the Senator from Idaho.

The LEGISLATIVE CLERK. On page 40, line 3, after the word "after," it is proposed to strike out the words "January 1, 1935," and insert in lieu thereof the words "five years after the enactment of the banking act of 1933."

Mr. THOMAS of Idaho. Mr. President, the effect of this amendment is simply to give the holding company affiliate five years within which to build up a reserve instead of until the year 1935.

Mr. GLASS. Mr. President, the Senator brought that amendment to my attention, and, so far as I am concerned, I agree to it. I see no objection to it.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment was agreed to.

Mr. THOMAS of Idaho. I offer another amendment.

The PRESIDING OFFICER. The amendment will be stated.

The LEGISLATIVE CLERK. On page 40, line 19, after the word "after," it is proposed to strike out the words "January 1, 1935" and in lieu thereof to insert the words "five years after the enactment of the banking act of 1933."

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment was agreed to.

The PRESIDING OFFICER. The clerk will now state the amendment offered by the Senator from Louisiana.

Mr. LONG. I ask that the amendment which I sent to the desk last evening may be read.

The PRESIDING OFFICER. The amendment will be stated.

The LEGISLATIVE CLERK. On page 15 it is proposed to strike out lines 6 to 13, both inclusive, and on page 23, line 12, beginning with the word "and," to strike out through the word "section," in line 13.

Mr. LONG. Mr. President, the amendment merely provides that the United States Government shall retain the $125,000,000 it now has in the Treasury, and that the banks shall construct their own liquidating corporation, and not have the Government contribute $125,000,000 of Government money to it. That is all the amendment means.

Mr. GLASS. Mr. President, I do not care to review the discussion on that point. I have discussed it fully before the Senate, and I hope very much that the amendment will not prevail.

The PRESIDING OFFICER. The question is on agreeing to the amendment offered by the Senator from Louisiana.

The amendment was rejected.

Mr. GEORGE. Mr. President, I send an amendment to the desk and ask that it may be stated.

The VICE PRESIDENT. The amendment submitted by the Senator from Georgia will be stated.

The LEGISLATIVE CLERK. On page 38, line 25, after the word "it" and before the period, it is proposed to insert "or authorizing the trustee or trustees holding the stock for its benefit or for the benefit of its shareholders so to vote the same."

Mr. GEORGE. Mr. President, I have submitted the amendment to the author of the bill and those most actively engaged in promoting its passage in the Senate, and I think there is no objection to it. It simply enables the trustees who may happen to hold the stock of a holding company to vote it as well as the holding company itself.

Mr. BULKLEY. Mr. President, there is not only no objection to this amendment on the part of the committee but, on the other hand, we think that it cures a slight defect in the drafting of the bill, and I hope the amendment will prevail.

While I am on my feet I wish to call attention to a statement which I inadvertently made last night in the course of the debate which proved to be incorrect. The amendment which I sent to the desk to come in on page 35, line 7, and again in line 14, made a slight alteration in those lines; but I said that it struck out the words "and held." Neither of the amendments struck out those words, and they should not be stricken out. The purpose was to protect banks with respect to securities already held in their portfolios, but the language which was in the amendment adopted by the Senate, which was to strike out the word "hereafter," and after the word "purchased" to insert "after this section as amended takes effect" accomplishes that purpose, and the words "and held," in both cases, should remain as written in the bill.

The PRESIDING OFFICER. Without objection, the amendment offered by the Senator from Georgia is agreed to.

Mr. BLACK. Mr. President, I have an amendment which I desire to offer, and which I gave notice last week I should offer, an amendment to strike section 19 from the bill. I do not desire to discuss it. I do think, however, that there should be a record vote in the Senate, in order that we may know just what the vote is on branch banking of any kind. I am, therefore, sending the amendment to the desk with the hope that I may be given a record vote on striking section 19 from the bill.

The PRESIDING OFFICER. The amendment will be stated.

The LEGISLATIVE CLERK. On page 44, beginning in line 18, it is proposed to strike out section 19.

Mr. GLASS. Mr. President, I do not care to resume discussion on that question. Section 19 as we now have it provides an exceedingly limited degree of branch banking in only those States the laws of which permit branch banking, and only to the extent that the State laws permit branch banking, and I think it would be most unfortunate to strike that section out.

Mr. COPELAND. Mr. President, I think I understood the Senator, and that is my own thought about it, that as we have amended the bill it permits branch banking only in those States where the State laws permit branch banking by State banks.

Mr. GLASS. Only in those States and to the extent that the State laws permit branch banking.

Mr. COPELAND. I so understood.

Mr. BLACK. I ask for the yeas and nays on my amendment.

The PRESIDING OFFICER. The question is on the amendment offered by the Senator from Alabama to strike out section 19, on which the yeas and nays are demanded.

The yeas and nays were ordered.

Mr. BLAINE. Mr. President, if there is going to be a yea-and-nay vote, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

Mr. LONG. Mr. President, a parliamentary inquiry. Is this a quorum call or a vote?

The PRESIDING OFFICER. The roll is about to be called for the purpose of ascertaining the presence of a quorum.

The legislative clerk called the roll, and the following Senators answered to their names:

Austin	Dickinson	King	Schuyler
Bailey	Fess	Long	Sheppard
Barkley	Frazier	McGill	Shipstead
Black	George	McKellar	Smith
Blaine	Glass	McNary	Steiwer
Bratton	Glenn	Moses	Thomas, Idaho
Bulkley	Goldsborough	Neely	Thomas, Okla.
Bulow	Gore	Norbeck	Townsend
Byrnes	Grammer	Nye	Trammell
Capper	Hale	Oddie	Tydings
Carey	Harrison	Patterson	Vandenberg
Connally	Hastings	Pittman	Wagner
Copeland	Hayden	Reynolds	Walcott
Costigan	Howell	Robinson, Ark.	Walsh, Mont.
Couzens	Hull	Robinson, Ind.	Watson
Dale	Kean	Russell	Wheeler
Davis	Keyes	Schall	

The PRESIDING OFFICER. Sixty-seven Senators having answered to their names, a quorum is present.

The question is on the amendment of the Senator from Alabama [Mr. BLACK] to strike out section 19, the branch-banking section, upon which the yeas and nays have been ordered. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. BULOW (when his name was called). On this question I have a pair with the senior Senator from Connecticut [Mr. BINGHAM], and therefore withhold my vote.

Mr. DAVIS (when his name was called). I have a general pair with the junior Senator from Kentucky [Mr. LOGAN], and withhold my vote.

Mr. LONG (when his name was called). On this question I have a pair with the senior Senator from Pennsylvania [Mr. REED], and withhold my vote. If at liberty to vote, I should vote "yea," and if the senior Senator from Pennsylvania were present he would vote "nay."

Mr. NEELY (when his name was called). On this question I am paired with the junior Senator from Rhode Island [Mr. HEBERT], and therefore withhold my vote. If I were at liberty to vote, I should vote "yea."

Mr. ROBINSON of Indiana (when his name was called). I have a general pair with the junior Senator from Mississippi [Mr. STEPHENS]. I transfer that pair to the senior Senator from Wisconsin [Mr. LA FOLLETTE] and will vote. I vote "yea."

Mr. SHIPSTEAD (when his name was called). On this question I am paired with the senior Senator from Florida [Mr. FLETCHER], and withhold my vote. I understand that if he were present he would vote "nay." If I were at liberty to vote, I should vote "yea."

Mr. GLASS (when Mr. SWANSON's name was called). If my colleague [Mr. SWANSON] were present, he would vote "nay." He is unavoidably absent.

Mr. TYDINGS (when his name was called). I have a general pair with the senior Senator from Rhode Island [Mr. METCALF]. I understand that if he were present he would vote in the same way that I shall vote. I therefore feel at liberty to vote, and vote "nay."

The roll call was concluded.

Mr. GLENN. I have a general pair with the senior Senator from Virginia [Mr. SWANSON], who is absent. The colleague of that Senator has stated that if present he would vote as I shall vote. Being therefore at liberty to vote, I vote "nay."

Mr. BYRNES. I have a pair with the Senator from Nebraska [Mr. NORRIS], who if present, I understand, would vote "yea." I transfer that pair to the Senator from Virginia [Mr. SWANSON] and will vote. I vote "yea."

Mr. FESS. I desire to make the following announcements:

The Senator from West Virginia [Mr. HATFIELD] is paired with the Senator from Illinois [Mr. LEWIS]. If present, the Senator from West Virginia would vote "yea," and the Senator from Illinois would vote "nay."

The Senator from New Jersey [Mr. BARBOUR] is paired with the Senator from Arkansas [Mrs. CARAWAY]. If present, the Senator from New Jersey would vote "nay." I am not advised how the Senator from Arkansas would vote.

The Senator from Maine [Mr. WHITE] has a general pair with the Senator from Washington [Mr. DILL].

The Senator from Iowa [Mr. BROOKHART] is paired with the Senator from Missouri [Mr. HAWES]. If present, the Senator from Iowa would vote "yea," and the Senator from Missouri would vote "nay."

The Senator from New Mexico [Mr. CUTTING] has a general pair with the Senator from Massachusetts [Mr. WALSH].

The Senator from Arizona [Mr. ASHURST] has a general pair with the Senator from California [Mr. SHORTRIDGE].

The result was announced—yeas 17, nays 45, as follows:

YEAS—17

Black	Frazier	Reynolds	Trammell
Blaine	McGill	Robinson, Ind.	Wheeler
Capper	Norbeck	Schall	
Carey	Nye	Sheppard	
Connally	Patterson	Thomas, Okla.	

NAYS—45

Austin	George	Kean	Steiwer
Bailey	Glass	Keyes	Thomas, Idaho
Barkley	Glenn	King	Townsend
Bratton	Goldsborough	McKellar	Tydings
Bulkley	Gore	McNary	Vandenberg
Byrnes	Grammer	Moses	Wagner
Copeland	Hale	Oddie	Walcott
Costigan	Harrison	Pittman	Walsh, Mont.
Couzens	Hastings	Robinson, Ark.	Watson
Dale	Hayden	Russell	
Dickinson	Howell	Schuyler	
Fess	Hull	Smith	

NOT VOTING—34

Ashurst	Coolidge	Kendrick	Shipstead
Bankhead	Cutting	La Follette	Shortridge
Barbour	Davis	Lewis	Smoot
Bingham	Dill	Logan	Stephens
Borah	Fletcher	Long	Swanson
Brookhart	Hatfield	Metcalf	Walsh, Mass.
Broussard	Hawes	Neely	White
Bulow	Hebert	Norris	
Caraway	Johnson	Reed	

So Mr. BLACK's amendment was rejected.

Mr. KEAN. Mr. President, I send an amendment to the desk which I desire to offer.

The PRESIDING OFFICER. The clerk will state the amendment.

The LEGISLATIVE CLERK. On page 49, line 5, after the word "currency," to insert the words "shall bring to the attention of the Federal reserve bank and with their approval."

Mr. GLASS. Mr. President, in my view that would limit the power of the Comptroller of the Currency in a way in which it ought not to be limited, and I hope the amendment will not prevail.

Mr. KEAN. Mr. President, under the pending bill, as it is at the present time, the Comptroller of the Currency would have such absolute powers that he could destroy any bank. If this bill shall be enacted, he can destroy any bank in the United States. Having had some experience with a Comptroller of the Currency under Mr. Wilson's administration, I feel very strongly that the powers of the comptroller to destroy a bank should be limited. This amendment would merely refer the matter to the Federal Reserve Board, who are the heads of the banking system of the United States. I hope that Senators will vote for the amendment.

Mr. GLASS. Mr. President, the power contained in this section has been vested in the Comptrollers of the Currency for a long period of time, and I am not aware that they have abused the power in any respect. I think we should not now undertake to limit the authority of the Comptroller of the Currency in this manner.

Mr. KEAN. In reply to the Senator from Virginia, I will say that unfortunately he has never managed a bank. If he had managed a bank when Mr. Williams was Comptroller of

the Currency, he would be as enthusiastic for some amendment of this kind as I am.

Mr. GLASS. I do not think so.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment was rejected.

Mr. KEAN. Mr. President, I send to the desk an amendment at the request of the Senator from Rhode Island [Mr. METCALF].

The PRESIDING OFFICER. The clerk will state the amendment.

The LEGISLATIVE CLERK. On page 46, to strike out all of section 22.

Mr. LONG. Mr. President, I would like to make an announcement. I have a general pair on this bill with the senior Senator from Pennsylvania [Mr. REED], and I will have to refrain from voting on any of these amendments, as well as on the bill. On the final vote on the bill, if I were permitted to vote, I would vote against the passage of the bill, and the Senator from Pennsylvania would vote in favor of it.

Mr. BULKLEY. Mr. President, the section which the amendment just offered by the Senator from New Jersey seeks to strike out would limit loans to affiliates. It was carefully considered by the committee, and the committee believes the limitation is in the interest of good banking and hopes that the amendment will be voted down.

The PRESIDING OFFICER. The question is on the amendment offered by the Senator from New Jersey.

The amendment was rejected.

Mr. KEAN subsequently said: Mr. President, in offering the amendment for the Senator from Rhode Island, I should have presented the explanation of the amendment which he left with me, but, thinking the amendment was going to be agreed to, I failed to do so. I should like to have the explanation printed in the RECORD, and I ask unanimous consent that that may be done.

The PRESIDING OFFICER. Without objection, it is so ordered.

The matter referred to is as follows:

EXPLANATION OF THE AMENDMENT TO STRIKE OUT SECTION 22

This amendment would strike out section 22, which provides that section 5200 of the Revised Statutes be amended so that limitations placed upon the loans of a national bank to any one obligor shall be considered to include the obligations of all subsidiaries of any borrower. The present law provides that no national bank shall lend to any borrower in excess of 10 per cent of the amount of its capital stock and 10 per cent of its unimpaired surplus. It would seem to me that this limitation is rigid enough in itself, and that by considering all subsidiaries of any corporation as one borrower, we are proposing a dangerous innovation.

This amendment is exceedingly unjust because it is an outright discrimination against the national banks. Its application has no reference whatever to State banks. This is the only place in the whole bill where State member banks and national banks are not treated with equality. To enable State member banks to conduct their loans to corporations under the present law while adding a severe restriction to the conduct of the business of our national banks is contrary to the spirit of fair play which the authors of this bill have exhibited in other sections.

This amendment would make impossible the renewal of loans where the obligations of any one or any group of subsidiaries of a corporation equal the 10 per cent limitation now in existing law. For example, the Atlas Portland Cement Co. is a subsidiary of the United States Steel Corporation. In case the Atlas Portland Cement Co. has borrowed 10 per cent of the capital and 10 per cent of the unimpaired surplus of any bank, that bank would be prohibited by law from lending the United States Steel Corporation or any subsidiary of the United States Steel Corporation any sum of money. It is quite obvious that the conduct of business, the general assets and liabilities, the seasonal credit needs, of a cement company must differ in many aspects from the business of manufacture or distribution of steel products. The management of a subsidiary such as I have just mentioned is an integral unit in itself, and the impairment of the credit of an organization simply because it is a subsidiary would appear to me to be a discrimination of the worst kind.

This amendment would make the lending of funds to subsidiaries on their own credit exceedingly difficult. I believe none of us can realize the exact situation which might be created by the adoption of this amendment. Many subsidiaries of large corporations negotiate loans without the knowledge of, or consultation with, their parent corporation. These are loans which are often vital to the efficient conduct of business. I think we are striking in the dark when we attempt to adopt a section of a bill which might do serious damage to the credit of sound corporations operating numerous businesses as distinct and separate units.

The adoption of this section would force these subsidiaries to attempt the establishment of new lines of credit. Banks which have long been familiar with the business conditions of subsidiaries and which are familiar with the assets of these subsidiaries, would be forced to turn good business from their doors simply because we refuse to recognize a subsidiary as a going business in itself.

This section strikes at the credit facilities of our corporations. In these distressing times we should do everything we can to encourage sound corporate loans, and not attempt to discourage them. To hamper the credit of industry and commerce is most certainly no way to encourage or assist industrial recovery.

In addition to these objections to section 22, it is vague in phraseology. Who is there in this Senate, or in the courts of the United States, who can define what is meant by "controlling a majority interest"? This section states that the limitation on loans shall include the subsidiaries in which a corporation "controls a majority interest." I maintain this language is vague, and conducive to much dangerous misinterpretation. I have attempted, on this floor, to emphasize the point that it is impossible to legislate good credit sense among bankers. For us to say that only so much money may be loaned to one organization or to one group is putting us in the position of determining the ability of those organizations to pay their obligations. It is thoroughly possible for a bank to make excellent and safe loans up to much more than 10 per cent of its capital and 10 per cent of its surplus to one organization, while to other obligors a loan of one-half of 1 per cent would be dangerous. For us to attempt to legislate credit sense into the management of our banks is, to my mind, the worst kind of folly we could commit. Consequently, I believe that this section should be stricken from the bill.

Mr. BULKLEY. Mr. President, I offer an amendment, which I send to the desk, to come on page 8, line 20.

The PRESIDING OFFICER. The clerk will state the amendment.

The LEGISLATIVE CLERK. On page 8, beginning with line 20, the Senator from Ohio moves to strike out all through the period in line 23, and to insert in lieu thereof the following:

Each State member bank affiliated with a holding-company affiliate shall obtain from such holding-company affiliate, within such time as the Federal Reserve Board shall prescribe, an agreement that such holding-company affiliate shall be subject to the same conditions and limitations as are applicable under section 5144 of the Revised Statutes, as amended, in the case of holding-company affiliates of national banks. A copy of each such agreement shall be filed with the Federal Reserve Board. Upon the failure of a State member bank affiliated with a holding-company affiliate to obtain such an agreement within the time so prescribed, the Federal Reserve Board shall require such bank to surrender its stock in the Federal reserve bank and to forefeit all rights and privileges of membership in the Federal reserve system as provided in this section.

Mr. BULKLEY. Mr. President, this amendment would not change the intent of the bill as originally drafted. The difficulty we saw was that we had presumed to legislate with respect to corporations incorporated under State law, and there was a question about our jurisdiction to do so. The amendment is offered so as to apply against a member bank and require the member bank, as a condition of continuing membership, to secure the consent of its holding-company affiliate.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment was agreed to.

Mr. BULKLEY. Mr. President, I offer an amendment, which is already at the desk, on page 23, line 11, to strike out the word "sum" and to insert in lieu thereof the word "amount," so as to read:

(m) The corporation is authorized and empowered to issue and to have outstanding at any one time in an amount aggregating not more than twice the amount of its capital and the amount authorized to be appropriated pursuant to paragraph (c) of this section, its notes, debentures, bonds, or other such obligations, to be redeemable at the option of the corporation before maturity in such manner as may be stipulated in such obligations, and to bear such rate or rates of interest, and to mature at such time or times as may be determined by the corporation.

The PRESIDENT pro tempore. The question is on agreeing to the amendment.

The amendment was agreed to.

Mr. BULKLEY. Mr. President, I move to amend on page 23, lines 12 and 13, by striking out the words "and the amount authorized to be appropriated pursuant to paragraph (c) of this section," so as to read:

(m) The corporation is authorized and empowered to issue and to have outstanding at any one time in an amount aggregating not more than twice the amount of its capital, its notes, debentures, bonds, or other such obligations, to be redeemable at the option of the corporation before maturity in such manner as may be stipulated in such obligations, and to bear such rate or rates of interest, and to mature at such time or times as may be determined by the corporation.

This is merely a formal amendment, to make the bill conform with other amendments.

The PRESIDENT pro tempore. The question is on agreeing to the amendment.

The amendment was agreed to.

Mr. BULKLEY. Mr. President, I have another formal amendment, on page 40, line 5, to strike out the word "the" and to insert the word "any," so as to read:

(b) After January 1, 1935, every such holding-company affiliate (1) shall possess, and shall continue to possess during the life of such permit, free and clear of any lien, pledge, or hypothecation of any nature, readily marketable assets other than bank stock in an amount not less than 12 per cent of the aggregate par value of all bank stocks controlled by such holding-company affiliate, which amount shall be increased by not less than 2 per cent per annum of such aggregate par value until such assets shall amount to 25 per cent of the aggregate par value of such bank stocks.

The amendment was agreed to.

Mr. BULKLEY. On page 40, line 16, before the figure "25," I move to insert the word "such," so as to read:

And (2) shall reinvest in readily marketable assets other than bank stock all net earnings over and above 6 per cent per annum on the book value of its own shares outstanding until such assets shall amount to such 25 per cent of the aggregate par value of all bank stocks controlled by it.

The amendment was agreed to.

Mr. BULKLEY. Mr. President, I ask for the correction of the title of the act on page 1, line 3. The first section reads:

That the short title of this act shall be the "banking act of 1932."

I move to amend so as to read:

That the short title of this act shall be the "banking act of 1933."

And wherever in the bill the words "banking act of 1932" occur, I move to amend so as to read "banking act of 1933."

The amendment was agreed to.

Mr. STEIWER. Mr. President, I offer the amendment, which I send to the desk.

The PRESIDENT pro tempore. The amendment will be stated.

The LEGISLATIVE CLERK. On page 50, after line 18, the Senator from Oregon proposes to insert the following new section:

SEC. —. In any case in which, in the opinion of the Comptroller of the Currency, it would be to the advantage of the depositors and unsecured creditors of any national banking association whose business has been closed for such association to resume business upon the retention by the association, for a reasonable period to be prescribed by the comptroller, of all or any part of its deposits, the comptroller is authorized, in his discretion, to permit the association to resume business if depositors and unsecured creditors of the association representing at least 85 per cent of its total deposit and unsecured credit liabilities consent in writing to such retention of deposits. Nothing in this section shall be construed to affect in any manner any powers of the comptroller under the provisions of law in force on the date of enactment of this act with respect to the reorganization of national banking associations.

Mr. STEIWER. Mr. President, the purpose of this amendment is self-evident. It is to be noted, however, that the power with which the Comptroller of the Currency is clothed by the amendment is only permissive. There is nothing mandatory in the amendment, and the whole purpose is to give the comptroller an additional facility with respect to the opening of closed banks.

I might say to the Senate that the amendment is patterned to some extent after the law of the State of Florida, although I think that the amendment proposed is an improvement upon the Florida statute. The amendment was drawn in our drafting room; it confers upon the Comptroller of the Currency a power which will be most helpful if exercised in those areas in which so many banks are closed, and where there is oftentimes long delay in securing the waiver of 100 per cent of the depositors to any retention arrangement between the bank and its depositors.

Mr. GLASS. Mr. President, when this proposed amendment was presented to me, I entertained what I always have and hope I always shall entertain, a very earnest desire to accommodate the Senator from Oregon. I told him that I saw no particular objection to the amendment as he proposed it.

I communicated with the office of the Comptroller of the Currency, however, and the Acting Comptroller of the Currency stated that he could not sanction the amendment because he believed it to be unconstitutional; that a Federal court in Nebraska had declared a similar provision to be unconstitutional, as resulting in the taking of property without due process of law. He also told me, however, that a State court in Florida had pronounced a similar State statute valid; and there we are.

The Senate may determine, as well as I, whether it shall embody in the bill a provision which has already been decided by a Federal court to be unconstitutional, and which would seem, to an ordinary layman, to be in some sense confiscatory. The Senate may decide the question. I am not disposed to make any vigorous objection to it.

Mr. STEIWER. Mr. President, I had hoped I might be relieved of the necessity of the discussion of any constitutional aspect of this proposal. Inasmuch as the unanimous-consent agreement providing 10-minute limitation on debate will shortly be applicable. I would not have time in any case to develop it fully.

The Florida law, which goes a little further in conferring power upon the banking department than does this proposal, was sustained by the supreme court of that State, as has been stated by the Senator from Virginia. The Nebraska law also goes further than does this proposal; that law was held invalid by a Federal Court upon the ground that it impaired the obligation of the contract between the depositor and the bank.

I assume that there will be no contention here that the Congress of the United States is affected in its powers by the provision of the Constitution against the impairment of the obligations of contracts. We are, however, affected by the due-process-of-law provision and in submitting this matter to the legislative counsel of the Senate I called their attention specifically to the possibility that this constitutional question might be raised. The proposed amendment, which varies in its language from both the Florida law and the Nebraska law and incidentally from the Michigan law, which has never yet been tested, is prepared in such a way as to avoid, we believe, the objection that it will be a taking of property without due process of law. The limitation here upon the authority of the comptroller that he shall exercise this power only to the advantage of the depositors and unsecured creditors, and only for a reasonable period of time, makes this power relate to the remedy only; it does not take away any substantive right of the depositor. Therefore there is no tenable objection that the exercise of the power will violate the constitutional guarantee against the taking of property without due process.

I hope the Senator will permit this amendment to go into the bill. There will be ample time before the measure is enacted into law for the comptroller to give further consideration to the matter. I discussed this matter with the comptroller also, and I was impressed with the fact that he knew less about the subject—and I say that with all respect to him—than the attorneys of our own legislative counsel. I will say with all due respect, also, that I believe I have given the matter more study than has the banking department up to this time. Moreover, and I add this in fairness to the comptroller, the amendment offered has been modified since it was presented to the comptroller. It is my own humble opinion that that amendment is not

unconstitutional on its face. It is possible, I think, that the Comptroller might attempt to exercise unwarranted power but we should assume that he would not do so and that the law, being constitutional upon its face, would be sustained by the court.

Mr. GLASS. Mr. President, the Senator will understand I am not opposing the amendment, but I thought it fair to the Senate to state the facts that I have stated.

Mr. STEIWER. The Senator is quite right.

The PRESIDENT pro tempore. The question is on agreeing to the amendment of the Senator from Oregon.

The amendment was agreed to.

Mr. GORE. Mr. President, I desire to call up an amendment which I submitted and had printed a few days since. I will ask that the first section only be read.

The PRESIDENT pro tempore. The clerk will read as requested.

The LEGISLATIVE CLERK. On page 30, after line 13, insert a new section, as follows:

SEC. 10a. Section 22 of the Federal reserve act, as amended, is further amended by adding at the end thereof two new subsections (g) and (h) reading as follows:

"(g) No officer of any member bank shall borrow from or otherwise become indebted to any member bank of which he is an officer, and no member bank shall make any loan or extend credit in any other manner to any of its own officers. If any officer of any member bank borrow from or if he be or become indebted to any bank other than a member bank of which he is an officer, he shall make a written report to the chairman of the board of directors of the member bank of which he is an officer, stating the date and amount of such loan or indebtedness, the security therefor, and the purpose for which the proceeds have been or are to be used. Any officer of any member bank violating the provisions of this subsection shall be deemed guilty of a misdemeanor and shall be imprisoned not exceeding one year or fined not more than $5,000, or both; and any member bank violating the provisions of this subsection shall be fined not more than $10,000 and may be fined a further sum equal to the amount so loaned or credit so extended."

Mr. GORE. Mr. President, I shall detain the Senate only a moment. I may say the amendment was drafted in the comptroller's office, therefore the draftmanship is not subject to question, as I take it.

There is but one point involved in the amendment and that is to prohibit the officers of a member bank from borrowing from their own bank. There is a limitation now upon such borrowing. This undertakes to lay a prohibition upon such borrowing. My view is that when a group of men organize a bank, invest their capital in its stock, have themselves elected officers of the institution, prevail upon the public and upon their friends to deposit their money for safe-keeping in this institution, these officers ought not to borrow the money of their depositors. They ought in the first instance to keep their own money in their own possession and venture it into such enterprises as they see fit rather than induce the public to intrust money to their safe-keeping and then borrow money from their own banks and venture it into enterprises, sometimes safe, of course, sometimes speculative and dangerous.

I was impelled to offer the amendment out of this consideration. During the summer last past I interviewed a good many bankers, officers of Federal reserve banks, including the receiver of a very large failed bank, to ascertain what causes contribute most to the failure of banks and to account for the epidemic of bank failures which has swept over the country. It was the consensus of opinion among these men that perhaps more than one-third of the failures were due to the borrowing by officers from their own banks, improvident borrowing, reckless and unsecured borrowing, borrowing for speculative and other unwarranted purposes.

I can see no harm that could possibly come from the amendment. I can see great advantages which might follow its adoption. If these authorities be correct that such borrowing accounts for a large percentage of failures, it would put an end at least to that cause of such failures and such calamities.

Mr. GLASS. Mr. President, may I inquire of the Senator from Oklahoma, for whose judgment I have the utmost respect, if the prohibition would apply to the directors of a bank or to the executive officers of the bank?

Mr. GORE. It was not my intention, when I conferred with the comptroller, that it should apply to directors. I do not think that it does. I think it would apply to officers only.

Mr. GLASS. I think the Senator will concede that if it would apply to the directors of a bank it would be very difficult to get any directors.

Mr. GORE. I think that is true, and yet I think we ought to amend the existing law. There is a limitation, of course, upon the power of directors to borrow from their own banks, or the banks of which they are directors. It ought to be further limited so they could not borrow in excess of the amount of stock which they own. It also should be amended so that all the directors combined could not borrow in excess of a certain percentage of the capital stock of the bank, because those directors sit around the same board, directors of the same bank, perhaps all of them borrowing from the same bank, and they oblige each other. There ought to be a limit to the total borrowings which could be made by the directors of a bank. But that is not involved in this amendment, I would say.

Mr. GLASS. Usually the directors of a bank are among its largest depositors. If they were prohibited from patronizing the bank of which they were directors it would be and extremely difficult thing to get any directors for the bank. I did not listen intensely to the reading of the amendment. My attention was diverted. I would suggest that the Senator, if the language does not already imply what I mean, ought to use the term "executive" officers of the bank so that it may be understood that it does not apply to directors, because if it should there would be no directors.

Mr. GORE. I accept that suggestion of the Senator from Virginia.

The PRESIDENT pro tempore. The Senator from Oklahoma modifies his amendment as suggested by the Senator from Virginia.

Mr. COUZENS. Mr. President, I would like to have the amendment read as modified, because I am very much in sympathy with the efforts of the Senator from Oklahoma.

The PRESIDENT pro tempore. The clerk will read the amendment as modified.

The legislative clerk read as follows:

On page 30, after line 13, insert a new section reading as follows:

SEC. 10a. Section 22 of the Federal reserve act, as amended, is further amended by adding at the end thereof two new subsections (g) and (h) reading as follows:

"(g) No executive officer of any member bank shall borrow from or otherwise become indebted to any member bank of which he is an executive officer, and no member bank shall make any loan or extend credit in any other manner to any of its own executive officers. If any executive officer of any member bank borrow from or if he be or become indebted to any bank other than a member bank of which he is an executive officer, he shall make a written report to the chairman of the board of directors of the member bank of which he is an executive officer, stating the date and amount of such loan or indebtedness, the security therefor, and the purpose for which the proceeds have been or are to be used. Any executive officer of any member bank violating the provisions of this subsection shall be deemed guilty of a misdemeanor and shall be imprisoned not exceeding one year or fined not more than $5,000, or both; and any member bank violating the provisions of this subsection shall be fined not more than $10,000 and may be fined a further sum equal to the amount so loaned or credit so extended."

Mr. COUZENS. Mr. President, I would like to ask the Senator from Oklahoma to give his interpretation of an "executive officer." I ask that particularly because it is not an unknown practice to have a man of alleged high standing in the community take the presidency or chairmanship of the board of a bank and receive no salary, and yet use the bank for borrowing purposes. I wondered if his language would include a nonpaid president as an executive officer.

Mr. GORE. Mr. President, I would request the Senator from Virginia to answer the Senator from Michigan and interpret the significance of the word "executive" as now included in the amendment.

Mr. GLASS. Mr. President, I would unhesitatingly say that the president of a bank, whether a salaried officer or not, would come within the definition of an "executive offi-

cer." The chairman of the board would be an executive officer and the cashier would be an executive officer. I do not think that a director is an executive officer, and I am perfectly certain that if it is intended to comprehend directors we will not have any directors.

Mr. COUZENS. May I ask the Senator whether or not he would construe as executive officers the members of the executive committee who are only directors and yet pass upon loans?

Mr. GLASS. No; it is their business to pass upon loans and not to borrow. I would not regard them as executive officers. They simply pass upon loans. I think the executive officers of a bank are the salaried or nonsalaried officers such as the president, cashier, and chairman of the board, who is usually a higher-priced executive than the president himself.

But what I desire to do is to exclude the directors of banks from this requirement, because, as the Senator knows—he is a business man and knows better than I—usually the directors of a bank are among its largest depositors.

Mr. COUZENS. And it is equally true that they are oftentimes among its largest borrowers.

Mr. GLASS. Well, that is true, though there is a limitation in the existing act about what a director may borrow.

Mr. COUZENS. As long as we have a record of what is meant by "executive officers" I shall not object.

SEVERAL SENATORS. Question!

The PRESIDENT pro tempore. The question is on agreeing to the amendment proposed by the Senator from Oklahoma [Mr. GORE].

The amendment was agreed to.

Mr. GORE. Mr. President, now I call up the next amendment, which merely completes the one already agreed to and applies to the spouse, brother, sister, and so forth, of an officer of a member bank who may borrow money from such bank.

I ask that the same correction be made in this amendment and that the word "executive" be inserted before the word "officer."

The PRESIDENT pro tempore. Without objection, the amendment as so modified will be stated.

The LEGISLATIVE CLERK. After the amendment just agreed to it is proposed to insert:

(h) If a spouse, a brother, or a sister, a lineal ancestor, or a direct descendant of an executive officer of any member bank borrow from or if he or she be or become indebted to such member bank, such executive officer shall make a written report to the chairman of the board of directors of the member bank of which he is an executive officer, stating the date and amount of such loan or indebtedness, the security therefor, and the purpose for which the proceeds have been or are to be used. Any executive officer of any member bank violating the provisions of this subsection shall be deemed guilty of a misdemeanor and shall be imprisoned not exceeding one year or fined not more than $5,000, or both.

Mr. GORE. I merely wish to add one sentence. I conferred with the receiver of a very large bank which failed last fall. The limit placed by existing law upon the amount which the president of that bank could borrow is $65,000. He had borrowed $300,000 through stool pigeons and accommodating friends of one sort and another. The bank failed, and its president is now in the penitentiary.

The amendment merely requires a report when the spouse, father, mother, son, and so on, of an executive officer, shall borrow from the bank. The amendment places no limitation upon their borrowing, but requires that a record shall be made of it, so that the examiner may observe it and report to the comptroller.

The PRESIDENT pro tempore. The question is on agreeing to the amendment proposed by the Senator from Oklahoma, as modified.

The amendment was agreed to.

Mr. WALCOTT. Mr. President, on page 42, I think, there is an error. An amendment was adopted changing the limitation as to affiliates from three to five years. The correction has been made, I understand, in the first instance on page 40, but on page 42 the same sentence again occurs, reading, "Within three years after the filing of such application." It is purely a clerical error, and I move that the word "three," on page 42, line 11, be stricken out and that the word "five" be substituted, so as to make it consistent with the amendment already adopted.

Mr. BULKLEY. Mr. President, I do not understand where the amendment comes in.

Mr. WALCOTT. On page 42, line 11, the last word in that line should be "five," instead of "three."

The PRESIDING OFFICER (Mr. FESS in the chair). Without objection, the amendment is agreed to.

Mr. REED. Mr. President, I should like to ask the Senator from Virginia a question with regard to section 14. I have examined the amendments which have been made to that section, but it occurs to me that the bill as it stands is still completely unfair to those State banks which have not resorted to the device of security affiliates. As I understand, under the bill in its present form the day after the bill shall be signed by the President any such bank would have to quit absolutely the business of buying and selling investment bonds for its customers, whereas if it had resorted to the device of organizing an affiliate it would have five years within which to get rid of that affiliate. In other words, the State bank or trust company which has been doing business in a way that is not objectionable would be penalized more severely than the one that has resorted to the device of an affiliated company. I am sure the Senator from Virginia does not intend any such result as that; and I am wondering whether he would not consent to an amendment that would make section 14 take effect at the same time the other section takes effect, which requires the sale of affiliated companies.

Mr. GLASS. Five years?

Mr. REED. Yes, sir.

Mr. GLASS. I have no objection to that.

Mr. REED. I thank the Senator. Then, at the end of section 14, I move to insert the words "This section shall take effect five years after the date of the approval of this act."

Mr. GLASS. I have no objection to that.

The PRESIDING OFFICER. Without objection, the amendment is agreed to.

The bill is before the Senate and open to amendment. If there be no further amendments, the question is, Shall the bill be engrossed for a third reading and read the third time?

The bill was ordered to be engrossed for a third reading and read the third time.

The PRESIDING OFFICER. The question is, Shall the bill pass?

Mr. ROBINSON of Arkansas. I ask for the yeas and nays.

Mr. THOMAS of Oklahoma. Let us have the yeas and nays.

The yeas and nays were ordered, and the legislative clerk proceeded to call the roll.

Mr. DAVIS (when his name was called). I have a general pair with the Senator from Kentucky [Mr. LOGAN]. I am informed that, if present, he would vote as I intend to vote. Therefore I feel at liberty to vote and vote "yea."

Mr. GLENN (when his name was called). I have a pair with the senior Senator from Virginia [Mr. SWANSON], who is absent. I understand he would vote as I intend to vote. Therefore I am permitted to vote and vote "yea."

Mr. NEELY (when his name was called). On this vote I am paired with the junior Senator from Rhode Island [Mr. HEBERT]. I do not know how he would vote, and therefore withhold my vote.

Mr. REED (when his name was called). I have a pair on this question with the Senator from Louisiana [Mr. LONG]. I transfer that pair to the Senator from Rhode Island [Mr. METCALF] and will vote. I vote "yea."

Mr. ROBINSON of Indiana (when his name was called). I have a general pair with the junior Senator from Mississippi [Mr. STEPHENS], who is unavoidably detained from the Senate. I understand that if he were present he would vote "yea," and if permitted to vote I should vote "nay." I withhold my vote.

Mr. GLASS (when Mr. SWANSON's name was called). My colleague [Mr. SWANSON] is unavoidably absent. If present and permitted to vote, he would vote "yea."

Mr. TYDINGS (when his name was called). I have a general pair with the senior Senator from Rhode Island [Mr. METCALF]. That pair having been transferred to the junior Senator from Louisiana [Mr. LONG], I am at liberty to vote, and vote "yea."

Mr. WALCOTT (when has name was called). I have a pair with the junior Senator from North Carolina [Mr. REYNOLDS]. If he were present, he would vote "nay." I find that I can transfer that pair to the Senator from California [Mr. SHORTRIDGE]. I make that transfer and will vote. I vote "yea."

The roll call was concluded.

Mr. THOMAS of Idaho (after having voted in the affirmative). On this question I have a pair with the junior Senator from Montana [Mr. WHEELER]. I transfer that pair to the Senator from Virginia [Mr. SWANSON] and let my vote stand.

Mr. FESS. I desire to announce the following general pairs:

The Senator from Wisconsin [Mr. BLAINE] with the Senator from Florida [Mr. FLETCHER];

The Senator from Nebraska [Mr. NORRIS] with the Senator from South Carolina [Mr. BYRNES];

The Senator from New Mexico [Mr. CUTTING] with the Senator from Massachusetts [Mr. WALSH];

The Senator from New Hampshire [Mr. KEYES] with the Senator from Alabama [Mr. BANKHEAD];

The Senator from West Virginia [Mr. HATFIELD] with the Senator from Illinois [Mr. LEWIS];

The Senator from New Jersey [Mr. BARBOUR] with the Senator from Arkansas [Mrs. CARAWAY];

The Senator from Maine [Mr. WHITE] with the Senator from Washington [Mr. DILL]; and

The Senator from Iowa [Mr. BROOKHART] with the Senator from Missouri [Mr. HAWES].

I wish also to announce that the Senator from Rhode Island [Mr. HEBERT], the Senator from Maine [Mr. WHITE], and the Senator from New Jersey [Mr. BARBOUR], if present, would vote "yea," and that the Senator from Iowa [Mr. BROOKHART] and the Senator from West Virginia [Mr. HATFIELD], if present, would vote "nay."

The result was announced—yeas 54, nays 9, as follows:

YEAS—54

Ashurst	Davis	Johnson	Schuyler
Austin	Dickinson	Kean	Smith
Bailey	Fess	Kendrick	Steiwer
Barkley	George	King	Thomas, Idaho
Bingham	Glass	McGill	Townsend
Black	Glenn	McKellar	Trammell
Bratton	Goldsborough	McNary	Tydings
Bulkley	Gore	Moses	Vandenberg
Capper	Grammer	Oddie	Wagner
Carey	Hale	Patterson	Walcott
Copeland	Harrison	Pittman	Walsh, Mont.
Costigan	Hastings	Reed	Watson
Couzens	Hayden	Robinson, Ark.	
Dale	Hull	Russell	

NAYS—9

Bulow	Howell	Schall	Shipstead
Connally	Nye	Sheppard	Thomas, Okla.
Frazier			

NOT VOTING—33

Bankhead	Cutting	Logan	Smoot
Barbour	Dill	Long	Stephens
Blaine	Fletcher	Metcalf	Swanson
Borah	Hatfield	Neely	Walsh, Mass.
Brookhart	Hawes	Norbeck	Wheeler
Broussard	Hebert	Norris	White
Byrnes	Keyes	Reynolds	
Caraway	La Follette	Robinson, Ind.	
Coolidge	Lewis	Shortridge	

So the bill was passed.

TREASURY AND POST OFFICE APPROPRIATIONS

Mr. HALE. Mr. President, I move that the Senate proceed to the consideration of H. R. 13520, the Treasury and Post Office Departments appropriation bill.

Mr. McKELLAR. Mr. President, as I understand, it is not the intention of the Senator to go on with the bill to-night, but merely to make it the unfinished business?

Mr. HALE. It is not my intention to go on with the bill to-night.

The PRESIDENT pro tempore. The question is on the motion of the Senator from Maine.

The motion was agreed to; and the Senate proceeded to consider the bill (H. R. 13520) making appropriations for the Treasury and Post Office Departments for the fiscal year ending June 30, 1934, and for other purposes, which had been reported from the Committee on Appropriations with amendments.

STUDY OF BATTLEFIELDS FOR COMMEMORATIVE PURPOSES

Mr. REED. Mr. President, earlier in the day I made a request for unanimous consent for the reprinting of a report on a study of battlefields for the purposes of commemoration, a matter which is annually reported to us by the Secretary of War. The request was objected to by the Senator from Louisiana [Mr. LONG]. I am advised that he has now withdrawn his objection. Therefore, I renew the request that Senate Document No. 151, Seventy-second Congress, may be reprinted with corrections, together with the accompanying maps or charts which were sent to us by the department.

The PRESIDENT pro tempore. Is there objection?

Mr. McNARY. Mr. President, let me add to the RECORD that earlier objection was made by the Senator from Louisiana [Mr. LONG], and I spoke to him, and he has withdrawn his objection.

Mr. REED. I thank the Senator.

The PRESIDENT pro tempore. Is there objection? The Chair hears none, and it is so ordered.

DISTRIBUTION OF GOVERNMENT-OWNED COTTON—CONFERENCE REPORT

Mr. BINGHAM. Mr. President, last Saturday I made a request of the Senator from Utah [Mr. KING] that we might get up the conference report on the bill granting cotton to the American Red Cross. At that time he objected because the Senator from Tennessee [Mr. McKELLAR] was out of town, and said that it might come up on Tuesday.

As we were fully occupied with this bill yesterday and to-day, and I did not like to interfere with its passage, I made no effort to call up the conference report; but I now express the hope that to-morrow, at the earliest possible moment—for there is real need for haste in the adoption of this conference report—we may succeed in getting a unanimous-consent agreement to take it up and dispose of it briefly without interfering with the appropriation bill.

STATEMENT BY HON. WILLIAM LEMKE ON THE FRAZIER REFINANCING BILL

Mr. FRAZIER. Mr. President, I ask unanimous consent to have printed in the RECORD a statement by Hon. William Lemke, Representative elect from North Dakota, on the refinancing bill, S. 1197.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

The Frazier bill is again up for consideration before the Committee on Banking and Currency of the United States Senate. It is universally recognized that if this bill is passed, it will bring immediate relief to thousands of farmers who are about to lose their homes and to the starving millions of this Nation.

The following State legislatures have passed resolutions asking Congress to pass this bill without delay: Montana, North Dakota, South Dakota, Minnesota, Wisconsin, Illinois, and Nevada. Resolutions are pending in other States to the same effect.

Besides these resolutions from State legislatures, there are thousands of resolutions and requests from farm organizations, labor organizations, business and professional men and women, asking Congress to pass this bill without further delay. Therefore, it is important that we know just what this bill provides.

It will take about two and one-half to three billion dollars of Federal reserve notes as a revolving fund with which to refinance the nine and one-half billion dollars of farm indebtedness. If this bill becomes a law and the Government refinances all of the existing farm indebtedness at 1½ per cent interest and 1½ per cent principal on the amortization plan, then it will make a gross profit in 47 years of approximately $6,345,000,000.

This bill asks for nothing new. During the war the Government virtually doubled the money in actual circulation by issuing Federal reserve notes, secured by commercial and agricultural paper—promissory notes—indorsed by the local banks. This was done so that the Government—the people of the United States—could assume the indebtedness that foreign nations owed to the

international bankers, who had bet on the wrong horse over in Europe to the extent of billions of dollars. If our Government could do this to save the international bankers, why not do the same thing now to save the farmers and the starving millions?

If the farmers' relief bill becomes a law, then there will be issued and put into circulation among the people several billion dollars of new money, Federal reserve notes, the natural consequence being that it will raise farm-commodity prices. It will again give purchasing power to the people—the farmer will pay his banker, his merchant, his lawyer, and his doctor, and they in turn will pay their bills—and all will start in again repairing and improving their homes; unemployment and starvation will cease; the enforced idleness of 14,000,000 men and women will disappear, and we will hear no more of overproduction; consumption will again be normal; real prosperity, the kind we had in 1919, will return.

We have not enough money to do the money business. Money is a yardstick with which we measure the energy of our people; we have not enough yardsticks to measure that energy; that is why there are 14,000,000 people out of employment and why at least 30,000,000 go to bed undernourished and hungry every night, while many more million need new clothes and other necessities.

We are being reduced to a nation of Indians, to a nation of trade and barter. Farmers are trading oats for gasoline, wheat for newspaper subscriptions, cabbages and eggs for wearing apparel; ranchers are exchanging horses for vegetables, cows and hogs for groceries; and colleges are even exchanging education for wheat; and all because there is not money enough to do the money business, not sufficient yardsticks to measure our energy. In Kansas recently a young man paid his wedding fees with a few sacks of wheat, and in West Virginia a young couple traded a basket of grapes to the county clerk for a marriage license; not even enough money to do the marriage business.

Hundreds and thousands of cities and towns are now using or contemplate using scrip as a substitute for money, because there is not enough money in circulation to do the money business and our National Government seems to lack the wisdom and courage to save this situation by promptly enacting S. 1197—the Frazier bill.

Nearly all of the money—the yardsticks with which we measure our energy—is in the hands of a few international bankers who are too ignorant to know how to use it and whose greed, if not checked, will bring ruin, desolation, and destruction to this Nation.

Within the last two years the Federal reserve bank increased the Federal reserve note circulation over a billion and a quarter dollars in the large cities, so as to save the larger banks—the cat's-paws of the international bankers—from closing their doors, and so that they could gamble and buy more foreign bonds and stocks and make loans to foreign nations at the expense of the American people. None of this money reached the farmers, the smaller banks or business men, or the starving millions. We repeat there is not enough money to do the money business, and that the farmers' farm relief bill, known as the Frazier bill, if enacted into law, is the remedy.

The benefits of this bill not only extend to the farmers who are still hanging on, but also extend to anyone who has lost his farm by mortgage foreclosure or indebtedness since 1920, and to the tenant who has actually resided on and operated a farm for at least three years prior to the passage of the bill.

RECESS

Mr. HALE. I move that the Senate take a recess until 12 o'clock noon to-morrow.

The motion was agreed to; and (at 7 o'clock and 40 minutes p. m.) the Senate took a recess until to-morrow, Thursday, January 26, 1933, at 12 o'clock meridian.

HOUSE OF REPRESENTATIVES

WEDNESDAY, JANUARY 25, 1933

The House met at 12 o'clock noon.

The Chaplain, Rev. James Shera Montgomery, D. D., offered the following prayer:

O Thou who has not forgotten to be merciful and gracious unto us, we call upon Thee to replace our weakness with strength. Let performance to duty be our delight and service for our country our vocation. With minds calm and earnest may we patiently and seriously work to encourage and bless our fellow men. For them we would reveal strong action, appealing emotion, and be masters of situations. In whatever station, remind us of Thy pure teaching, searching appeals, and solemn warnings. O may they be laid on all our hearts and be pondered in our inner thoughts. Hear us, Father, in solitude, meditation, and in prayer may we deepen and quicken our spiritual natures; thus may our characters break into new life and beauty. Amen.

The Journal of the proceedings of yesterday was read and approved.

REPUBLICAN CAUCUS

Mr. SNELL. Mr. Speaker, may I make an announcement? There will be a Republican conference in this Chamber this afternoon at 4 o'clock.

DEPARTMENTS OF STATE, JUSTICE, COMMERCE, AND LABOR APPROPRIATION BILL

Mr. OLIVER of Alabama. Mr. Speaker, I move that the House resolve itself into the Committee of the Whole House on the state of the Union for the consideration of the bill (H. R. 14363) making appropriations for the Departments of State and Justice, and for the judiciary, and for the Departments of Commerce and Labor, for the fiscal year ending June 30, 1934, and for other purposes. Pending that I would like to have an understanding with the gentleman from Pennsylvania [Mr. SHREVE]. There are numerous requests on this side of the aisle, and my thought is that since evidently there are but few controversial matters in the bill, the one, perhaps, that there will be more speeches made upon than any other being that relating to the item for the enforcement of the prohibition law, and since it appears we will be able to reach a definite agreement on that, limiting the time by consent, which we will ask the House to approve; and if so, after careful consideration I feel we can finish this bill Friday afternoon. My thought is if we devote to-day to general debate, reserving to the gentleman from Pennsylvania [Mr. SHREVE] and to myself the right, in the morning, to make statements confined to the bill itself before taking it up, we should finish it by Friday afternoon. So if agreeable to the gentleman from Pennsylvania, I ask unanimous consent, Mr. Speaker, that general debate to-day be equally divided between and controlled by the gentleman from Pennsylvania [Mr. SHREVE] and myself.

Mr. SHREVE. The arrangement is perfectly satisfactory to me, Mr. Speaker. I see no reason why we can not finish the bill by Friday night if we follow the program outlined by the gentleman from Alabama [Mr. OLIVER].

Mr. OLIVER of Alabama. I have reason to believe that Members of the House will gladly cooperate to the end that such program may be carried out. I have been endeavoring to learn what items of the bill Members are interested in discussing, and it will not be my purpose to try to prevent fair discussion of such items. There are only a few, so far as I can learn, and we will try to give fair opportunity for an intelligent discussion of those items.

Mr. SHREVE. This side of the House will be perfectly satisfied with that arrangement.

Mr. LAGUARDIA. Will the gentleman yield?

Mr. OLIVER of Alabama. I yield.

Mr. LAGUARDIA. I am looking up some law this afternoon, and I do not believe I will be ready by to-day. In the event I would like to make reply to the opinion by the Attorney General on to-morrow, does the gentleman think I would be able to have 10 minutes?

Mr. OLIVER of Alabama. If for any good reason any Member feels during the consideration of the bill he should be heard by the House on any important matter they are interested in, I will submit a unanimous-consent request, if the time request is reasonable, that such Member be allowed to speak out of order, and leave to the House whether such request should be granted.

Mr. LAGUARDIA. That is perfectly satisfactory.

Mr. BLANTON. With the understanding that the action of the 4 o'clock Republican caucus this afternoon does not prevent the gentleman.

Mr. LAGUARDIA. The gentleman knows better than that. We never bind our Members.

Mr. OLIVER of Alabama. Mr. Speaker, I was not aware there was to be a caucus this afternoon at 4 o'clock. I wonder if the House would be willing to hold a night session, purely for the purpose of general debate, if the time which the gentleman from Pennsylvania [Mr. SHREVE] and I have tentatively promised does not permit finishing such general debate?

Mr. SNELL. We have arranged for an evening session on Friday.

Mr. OLIVER of Alabama. But Members are not required to attend to-night unless they wish to. Nothing will be taken up except general debate. It is only for the purpose of enabling gentlemen who might otherwise be denied the right to make speeches on some subject in which they are interested. We could meet at 7 o'clock and adjourn at 9.30 or meet at 7.30 and adjourn at 9.30.

Mr. BLANTON. Mr. Speaker, may I ask the gentleman from Alabama why he does not suggest to the gentleman from New York [Mr. SNELL] that they have the Republican caucus to-night, and then that would relieve most of the Members from attending the night session?

Mr. SNELL. I really do not quite understand what the gentleman is driving at.

Mr. OLIVER of Alabama. The idea being that the time which we have tentatively promised will not permit Members to whom such time has been promised to speak before 4 o'clock. Unless we hold a night session we can not carry out tentative promises made to many Members of the House.

Mr. SNELL. I shall not object to having general debate this evening from 7.30 to 9.30.

Mr. OLIVER of Alabama. Mr. Speaker, I ask unanimous consent that it shall be in order to-day to move that the House take a recess until 7.30 o'clock to-night, and that there be general debate on the pending bill from 7.30 until 8.30.

The SPEAKER. Is there objection to the request of the gentleman from Alabama?

Mr. SNELL. With the understanding that it is simply for general debate?

Mr. STAFFORD. No other business is to be transacted?

Mr. OLIVER of Alabama. That is correct. The evening session will be confined merely to general debate.

The SPEAKER. Is there objection to the request of the gentleman from Alabama?

There was no objection.

Mr. OLIVER of Alabama. Mr. Speaker, I ask unanimous consent that the time for general debate be equally divided and controlled by the gentleman from Pennsylvania [Mr. SHREVE] and myself, and that the time be limited to the close of the session to-night, with the further understanding that the gentleman from Pennsylvania [Mr. SHREVE] and I may have the right to make a statement to the House on the bill to-morrow morning just before it is taken up for consideration. We will not be long.

The SPEAKER. Is there objection to the request of the gentleman from Alabama?

There was no objection.

The SPEAKER. The question is on the motion of the gentleman from Alabama [Mr. OLIVER].

The motion was agreed to.

Accordingly the House resolved itself into the Committee of the Whole House on the state of the Union for the consideration of the bill, H. R. 14363, the Departments of State, Justice, Commerce, and Labor appropriation bill, with Mr. OLIVER of New York in the chair.

The Clerk read the title of the bill.

The CHAIRMAN. Without objection, the first reading of the bill will be dispensed with.

There was no objection.

Mr. OLIVER of Alabama. Mr. Chairman, I yield 20 minutes to the gentleman from Texas [Mr. BLANTON], a member of the subcommittee handling this appropriation bill.

Mr. BLANTON. Mr. Chairman, I ask permission to revise and extend my remarks and to incorporate certain excerpts to which I shall refer.

The CHAIRMAN. Is there objection to the request of the gentleman from Texas?

There was no objection.

Mr. BLANTON. Mr. Chairman, with reference to the suggestion from the White House, not made until recently, however, that there should be certain bureaus abolished and certain consolidations made, I want to make a few comments.

Were I to suggest the abolishment of some bureau, the workings of which the people I represent were not directly interested in, I might be considered as doing so because of partisanship. All of my constituents are interested in agriculture. Therefore, when I mention agricultural bureaus no one will accuse me of wanting to abolish something just simply because my constituents are not interested in the project.

I honestly believe that it would be to the best interests of the farmers of the United States if you would abolish three-fourths of the bureaus of the Department of Agriculture. [Applause.] I honestly believe that if the President of the United States would take some of these so-called long-haired scientists who draw high salaries from the Government from these various bureaus in the Agricultural Department off of the pay roll and send them back home it would be to the benefit of every farmer in the United States. [Applause.]

I wish the Committee on Printing would take proper action now that would not permit another agricultural yearbook to be printed in 10 years. It is a duplication of statistics each year and is a waste. I do not believe there are 20 farmers in any district in the United States who have ever read 25 pages in that big book that is published and republished every year. The basement of the House Office Building is stacked to the ceiling with them.

I took occasion the other day to write to one of these scientists in the Department of Agriculture and ask him a few questions. I wanted to get specific answers. He could have answered my questions in one page. He did not attempt to answer them himself, but he turned them over to the head of the department to answer. Why could he not answer when he was in charge of a division? Why did he have to turn it over to the head of his bureau? And it took 15 typewritten pages for that bureau head to answer my few questions. About 14 of those pages are excuses, trying to explain away condemning facts. They are admitting the facts but trying to get around them with excuses and extended explanations.

Now, I want to read some of the questions I propounded, and I want you to note the bureau's answers to them. I want to show you just what exists in one bureau as to one agricultural commodity, the Katahdin potato—just one particular item, and show what it has cost the United States. My letter was addressed to Dr. E. C. Auchter, who is in charge of the division of horticultural crops and diseases.

Mr. JONES. Mr. Chairman, will the gentleman yield?

Mr. BLANTON. I yield.

Mr. JONES. I agree with the gentleman that some bureaus should be abolished and others curtailed, but why limit it to the Department of Agriculture? Why does not the same need apply with reference to the Department of Commerce and other departments of the Government? Why not go right down through all of them instead of singling out the Department of Agriculture?

Mr. BLANTON. I am glad to hear the gentleman say that. I am not confining my attention to it. I am after them all. We will carefully weigh all of them. I do not think the gentleman heard the premise of my statement. He and I represent districts that are interested in agriculture. The gentleman from Texas [Mr. JONES] is chairman of the legislative Committee on Agriculture; his committee has charge of all legislation that affects the Agricultural Department. I want to go along with him to knock the unimportant bureaus and unnecessary bureaus out of all 10 departments, but because he and I represent agricultural districts and because our constituents are interested in agriculture no one could accuse us of wanting to get rid of something simply because our people were not interested. Therefore I took up for discussion this morning one commodity in one division of one bureau in the Department of Agriculture.

Mr. JONES. That seems to be the idea of everyone here; whenever they criticize governmental activities they always take the Department of Agriculture as their illustration. I think as the gentleman does. I am glad he made that statement.

Mr. BLANTON. I am going to submit to the incoming President a bunch of bureaus, taken from every single department of this Government, that ought to be wiped out and abolished.

Mr. JONES. Now, I think that is the correct position to take.

Mr. CLARKE of New York. Mr. Chairman, will the gentleman yield?

Mr. BLANTON. I am always glad to yield to the gentleman from New York.

Mr. CLARKE of New York. Did not the gentleman have a chance to go along with such a program this week?

Mr. BLANTON. That was not a program that would save any money. It did not propose any real consolidation or abolishment. I want to see a program of real abolishment.

Mr. KETCHAM. Mr. Chairman, will the gentleman yield?

Mr. BLANTON. In just a minute.

I directed my letter of inquiry to Dr. E. C. Auchter, in charge of the division of horticultural crops, in the Bureau of Plant Industry, in the Department of Agriculture. My first question to him was:

How long have you been with the department?

The head of the bureau, Dr. William A. Taylor, had to answer for him. He said:

Doctor Auchter was appointed November 16, 1928.

My next question was:

What is your present salary?

The answer was:

Doctor Auchter's present salary is carried on our rolls at the rate of $6,400 a year, with the 8⅓ per cent legislative furlough.

Then I asked:

What salary did you draw and what position did you hold when first entering the Government service?

Answer. Doctor Auchter was appointed November 16, 1928, as principal horticulturist at a salary of $5,600 per annum.

Then I asked:

Please give all the changes made in your salary since you first entered the Government service up to the present time?

Answer. July 1, 1929, Doctor Auchter was promoted to a salary of $6,000, an increase of $400. January 16, 1930, he was further promoted to a salary of $6,400, an increase of $400.

Mr. LaGUARDIA. What was the subsequent record the gentleman asked for?

Mr. BLANTON. I am getting to that. He did not tell what position he was holding with the Maryland University or what salary it paid him when the Government first employed him at $5,600 per annum.

Then I asked:

Please state whether or not you are professor of horticulture in the Maryland State University, what salary is now paid you by said university, and for how many years have you been connected with such university?

He says:

That university does employ Doctor Auchter as a lecturer on certain horticultural problems at a stipend of $750 per annum.

A stipend. Do you know what Webster's Dictionary says about "stipend"? It says it is "a small gift made in small coins." Doctor Taylor sees fit to call this annual $750 a mere "stipend." Doctor Auchter at this time is a $6,400 scientist for our Government, and at the same time a drawer of a $750 stipend from the Maryland University for lectures delivered to the university, while he is at the head of the potato department of the Government drawing another $6,400 stipend from the American people.

Now, listen to this explanation of why the Department of Agriculture permitted Doctor Auchter to remain as professor of horticulture at the Maryland University for a long time after he had been employed by the United States:

At the urgent insistence of university officials the Secretary of Agriculture approved an authorization for Doctor Auchter to continue to direct certain courses at the University of Maryland, the time for performing this service being partly outside of official hours. With the establishment of Doctor Auchter's successor as professor of horticulture at the University of Maryland, Doctor Auchter has been changed to the status of lecturer, as indicated above.

That shows you that they are partly within the hours of Government official duties when he delivers these lectures, and he admits that for a long time Doctor Auchter was permitted to be full professor of the University of Maryland, with time partly taken out of Government hours.

Then I asked him:

Please state whether or not you have caused to be rented from the Maryland University about 7 acres of land at approximately $1,000 per year for a term of years?

And Doctor Taylor, replying, admits that they rented 9 acres at $100 per acre, which would be $900 annual rental, or approximately $1,000 a year paid for the rent of 9 acres. But he used about three pages trying to explain and excuse such action. I quote from his answer the following:

This division of the bureau recommended that a cooperative agreement be entered into with officials of the University of Maryland covering experimental activities with sweetpotatoes and certain other truck crops—

And so forth.

Such an agreement was entered into between the director of the Maryland experimental station and the chief of this bureau, dated April 1, 1929, at the rate of $100 an acre for 9 acres.

In other words, as soon as Doctor Auchter got employed by the Government at $6,400 a year, although still holding his position with the Maryland University, his Government bureau leased 9 acres of land from the Maryland University and pays the university $900 a year rental for the 9 acres; and that is done notwithstanding that we have got the Arlington experimental farm of 350 acres owned by the United States over here that ought to be adequate for the Agricultural Department experimental work. And the Government has other experimental farms. And I maintain that it was ridiculous for the Agricultural Department to pay a rental of $100 per acre per annum for this land when it was at the same time also paying a rental of $10.21 per acre per annum for 325 acres of land also over in Maryland for alleged experimental purposes.

Mr. COLE of Iowa. What is the land worth?

Mr. BLANTON. I do not know, I will state to my friend from Iowa, but I know that some good farm land down in Texas, in the black land belt, which at one time could have been sold for $250 an acre, could not be sold to-day for $40 an acre. I know that just now you can not find a market for land anywhere, and the idea of the Government paying $100 an acre rental on land to the Maryland University for Doctor Auchter, lecturer for the Maryland University, to use for experimental purposes, is most ridiculous when we have this big experimental farm at Arlington of 350 acres owned by the Government. Is not it ridiculous?

But, wait; I want you to know what Doctor Auchter has been doing with all of this land, and what benefits for the people he has been getting with all this money. I asked him this question:

Please state whether or not last year you caused to be rented a farm in Maryland comprising about 415 acres, situated about 13 miles from the Capitol. And if so, please state: (a) The date you rented same; (b) the number of acres in such farm; (c) what is paid for it annually; (d) for how many years is it rented; (e) for what purpose is it rented; (f) what has been accomplished with it.

Are not these pertinent questions? From Doctor Taylor's reply I quote:

In the appropriation act for the fiscal year 1931, an increase was provided in this item particularly for leasing land. * * * Careful survey of land in the vicinity of the District of Columbia was made and finally an area was determined upon near Beltsville, Md. * * *. Two adjoining tracts were leased January 9, 1932, and February 1, 1932. The acreage in these two tracts totals 425 acres.

Now, what does he pay for the lease of it—this 425 acres?

The Government pays $4,340 a year for this land, or $10.21 an acre.

This is 425 acres at $10.21 an acre, or an annual rental for same of $4,340 paid by the Government, and there is also

the 9 acres for which an annual rental of $100 an acre is paid, with all of this 350-acre experiment farm at Arlington already owned by the Government. He says:

These leases are annual, but subject to renewal at the option of the department until December 31, 1936.

Illustrative of some of the accomplishments Doctor Taylor and his bureau claim they have produced for the farmers, I quote the following:

Ten acres of Jerusalem artichokes have been grown in cooperation with the Bureau of Standards. A very keen nation-wide interest is being manifested in this crop not only as a vegetable but because of its importance for producing a special sugar (levulose). It appears that this sugar can be utilized by persons suffering from diabetes with less danger than other forms of sugar. Levulose is about 75 per cent sweeter than cane sugar. Chemists of the sugar section of the Bureau of Standards have developed new and improved methods for recovery of levulose from the Jerusalem artichoke, and accordingly we have cooperated in the production of tubers for this study. Breeding and selection work and variety tests in an effort to develop larger, smoother, and higher yielding strains have been conducted on this farm during the past summer. Some strains have as high as 17 per cent levulose and the indications are that by analysis and yield of tubers a production of 2 tons of sugar per acre might be obtained.

For Doctor Taylor to demonstrate to us successfully that he has benefited the American people by paying $100 per acre annual rental on the acreage paid the University of Maryland and by paying $10.21 per acre annual rental for the 325 acres near Beltsville, Md., he should have named some farmers at least whom he had started into the business of growing Jerusalem artichokes, and just how much levulose they had produced from their Jerusalem artichokes, and how many hundreds of thousands of dollars they had received for their levulose made from Jerusalem artichokes. These long-haired scientists dream and theorize and spend money in the name of agriculture and the American farmer, and in his name have wasted manifold millions, and yet have accomplished very little of value for the farmer, who is now worse off than ever before in the history of the Nation.

Then I asked the head of this bureau the following question:

You have probably seen the statement of Prof. L. C. Fitch, of Iowa, in Market Growers Journal of November 15, 1932, that the United States Department of Agriculture spent $250,000 in developing the new Katahdin potato. Please advise me whether this is true, and in such connection advise me the amount of money the Department of Agriculture has spent in developing the Katahdin potato.

From Doctor Taylor's answer I quote the following:

We have seen the statement of Prof. L. C. Fitch, of Iowa, in the Market Growers Journal of November 15, to which you refer—

And so forth.

And Mr. Fitch stated:

Uncle Sam spent about $250,000 in developing the Katahdin potato—

And so forth.

Now, notice that he admits spending over $250,000, for from his reply I quote:

A little more than $250,000 has been expended since 1910 in potato breeding and selection work.

He admits it. He admits what your distinguished official in Iowa had accused his department of doing, of spending $250,000 to develop one kind of potato, the Katahdin potato, for that is the only kind it so far has developed.

Now, I want to show you something else.

Mr. SUMMERS of Washington. Will the gentleman yield?

Mr. BLANTON. I yield.

Mr. SUMMERS of Washington. I know nothing of the controversy, but they did not make the statement implied by the gentleman there, surely, that they had spent all of this time since 1910 and this amount of money in developing one variety of potato.

Mr. BLANTON. Oh, they say they had experimented with various varieties, but thus far had developed only one but expected soon to develop another.

Mr. SUMMERS of Washington. And they have had many problems under consideration.

Mr. BLANTON. Doctor Taylor stated definitely that of the various varieties they have experimented with, up to this time only one variety had been named and commercially distributed, and that is the Katahdin potato. He said they expect to put out another variety at an early date, but this is the only one they have put out thus far.

After I had made him admit that "a little more than $250,000 has been expended since 1910 in potato breeding," I then asked questions that made him admit that he had so far developed and named but one potato, the Katahdin.

[Here the gavel fell.]

Mr. OLIVER of Alabama. Mr. Chairman, I yield the gentleman five minutes.

Mr. SHREVE. Mr. Chairman, I yield the gentleman five minutes.

Mr. BLANTON. I thank both my friends, and I want to say in behalf of my friend from Pennsylvania [Mr. SHREVE], who on this bill has backed 100 per cent the chairman [Mr. OLIVER], that it is a public calamity for him to be taken out of public service here in this House on March 4. [Applause.] The gentleman from Pensylvania knows all about the various bureaus of at least four departments of this Government. He knows as much about them as the heads of the bureaus themselves. He is a man who has fought here earnestly and faithfully and loyally to decrease the expenses of this Government. He is one man who can be depended on in every vote he casts, aside from partisan matters where you Republicans caucus him and force him to vote with you Republicans on sustaining the President's vetoes, and so forth, but outside of being shackled by Republican caucuses, he votes for the people every time he says "yea" or "nay" in this House, and I am one who is sorry he is going out. It is a great loss to the Nation. [Applause.]

Then I asked this bureau this question:

You are probably aware of the statement that the department has been breeding potatoes since 1910 and has put out only one variety to this date. Please advise if this is true.

Now listen to this answer. He says:

It is true that at the present time only one of a considerable number of promising potato seedlings has been named and commercially distributed.

And that is the Katahdin. He says:

Another variety will be named shortly and given an extensive field test in 1933.

Now, let us see what this famous $250,000 Katahdin potato has accomplished for the farmers of the United States.

Then I asked this bureau this question:

You have probably seen the statement made by Prof. A. G. Tolaas, in the American Potato Journal of October, 1932, that the average yield of your new Katahdin potato on eight farms in Minnesota was 240 bushels per acre, while the old well-known variety of Irish Cobbler potato yielded 269 bushels per acre on the same farms. Please advise me your reaction on this statement.

From Doctor Taylor's reply, I quote:

We have seen the statement of Prof. A. G. Tolaas in the American Potato Journal of October, 1932, stating that the average yield of the Katahdin potato on eight farms in Minnesota was less than the yield of the Irish Cobbler variety.

Then he tries to explain, from which I quote:

In Mr. Tolaas's report to this department, giving the results of this season's study, he states:

"There has been a great deal of interest in this variety, and I believe that it does have a commercial possibility in this region."

Regarding one of our other seedlings, he states:

"From what I have seen of this seedling it probably would be even more suitable to our conditions than is the Katahdin."

Then I asked this bureau the following question:

You have probably seen the statement of Dr. John Bushnell in the proceedings of the seventeenth annual meeting of the Ohio Vegetable Growers' Association, 1932, that in three trials in Ohio the new Katahdin potato yielded 232 bushels per acre, while the old well-known russet rural variety yielded 286 bushels per acre. Please give me your reaction on this statement.

From Doctor Taylor's reply, I quote:

We have seen the statement of Dr. John Bushnell given in the proceedings of the seventeenth annual meeting of the Ohio Vege-

table Growers' Association, and we have personal reports from Doctor Bushnell. His report on the Katahdin this year, as well as last year, indicates that it is not especially suitable under his conditions.

Thus, you see Doctor Taylor did not deny the criticism made by Dr. John Bushnell, of Ohio, that after the Agricultural Department had spent $250,000 since 1910 developing the Katahdin potato, the old well-known russet rural variety in Ohio had produced 54 bushels of potatoes more per acre than the $250,000 Katahdin.

Mr. COLE of Iowa. The gentleman will agree that that is reducing the surplus.

Mr. BLANTON. I would rather have our potato farmers get all that is coming to them.

Mr. KNUTSON. This russet variety is an Irish potato.

Mr. BLANTON. Dr. John Bushnell refers to it as the "old well-known russet rural variety." It cost the farmers nothing, yet it is far more valuable than the $250,000 Katahdin.

Mr. COLE of Iowa. No; this russet variety is a white potato.

Mr. BLANTON. I think Prof. L. C. Fitch, of Iowa, Prof. A. G. Tolaas, of Minnesota, and Dr. John Bushnell, of Ohio, know more about potatoes than the gentleman from Minnesota [Mr. KNUTSON].

Then I asked this bureau this question:

Please advise me whether or not the Katahdin potato is a late potato and not good in sections where early varieties are used, and also whether or not it has a bitter taste when cooked.

From Doctor Taylor's reply, I quote:

Katahdin is a late variety and will not compete with Irish Cobbler, if they are dug when the Cobbler is mature and the Katahdin is still immature. A few Katahdins were reported strong by one or two of the judges.

Then I asked this bureau for the following information:

Please advise me the date when F. J. Stevenson, of Minnesota, was employed by your department to assist in breeding potatoes. (a) What is his salary at the present time? (b) Is it not a fact that he has been paid by the Agricultural Department $1,000 more than he received at the time he was employed? (c) Also please advise me whether or not it is a fact that said F. J. Stevenson never did any potato work until he was appointed to breed potatoes for the United States?

From Doctor Taylor's reply, I quote:

Dr. F. J. Stevenson, of the University of Minnesota, was selected from the civil-service list and employed by this bureau to assist in breeding potatoes on July 15, 1930. Doctor Stevenson's present salary is normally $4,200 per annum, with the legislative furlough. He had been receiving a salary of $3,300.

You will note that he was receiving only $3,300 at the time he was employed by the Agricultural Department at $4,200. Doctor Taylor then admits:

Doctor Stevenson had not specialized on potato breeding prior to his work in this bureau.

If he were not a potato expert, why did the Department of Agriculture pay him $4,200 per year to assist $6,400-per-year Doctor Auchter to spend $250,000 raising and developing the Katahdin potato which is not as good as old varieties?

Then I asked this bureau:

Please advise me how many acres of land are in the Arlington experimental farm conducted by the Department of Agriculture.

Doctor Taylor replied:

Three hundred and fifty acres, exclusive of railroad and highway crossing the farm.

Is not that 350-acre Arlington farm owned by the Government enough for them to experiment with, without paying $100 an acre annual rental to the University of Maryland for one tract of nine acres—$900 at one whack; and without paying $10.21 an acre for 425 acres, or $4,340, annual rental to Maryland? If we do not wake up and stop spending these millions that are being wasted by these long-haired scientists in the Department of Agriculture in the name of the farmers, from which the farmers do not get a dollar's benefit, we are going to merit the disrespect and contempt of every farmer in the United States. Do you not think it is time for us to do something about stopping it?

Mr. COLE of Iowa. Mr. Chairman, will the gentleman yield?

Mr. BLANTON. Yes.

Mr. COLE of Iowa. May it not be true that the same farmers are getting tired of Congress' spending millions of dollars making laws for their relief that do not relieve?

Mr. BLANTON. Certainly, they are tired of it. And we must stop it. I wonder if my friend from Iowa followed his leader yesterday and the rest of the Republican bellwethers who voted to put that extra $550,000 in the Army appropriation bill, and yesterday evening also voted to put $2,500,000 additional into that bill? I do not believe my friend voted with his leaders, did he?

Mr. COLE of Iowa. Let me say——

Mr. BLANTON. It is a matter of record.

Mr. COLE of Iowa. I voted against every increase.

Mr. BLANTON. Good. I am glad to hear it.

Mr. COLE of Iowa. And I am going to continue to do so.

Mr. BLANTON. Good. And so am I.

The CHAIRMAN. The time of the gentleman from Texas has again expired.

Mr. BLANTON. Mr. Chairman, will the gentleman let me have just two minutes more?

Mr. OLIVER of Alabama. I yield the gentleman two minutes.

Mr. SHREVE. Mr. Chairman, I yield the gentleman three minutes.

Mr. BLANTON. I thank both my friends.

Mr. FINLEY. Is the gentleman going to add to what he said a few minutes ago about the gentleman from Pennsylvania [Mr. SHREVE]?

Mr. BLANTON. Oh, I could speak an hour properly praising him.

Mr. COLE of Iowa. The gentleman is making a good speech, and he is entitled to additional time.

Mr. BLANTON. I want to say to my Republican brethren over here across the aisle that just because you are going out of power, does it not behoove you, just as much as it does every other Member of the House, to cut down expenses? Does it not behoove you, as much as anyone else, to reduce the cost of government so as to balance the Budget? I want you to look over that roll call yesterday on the $550,000 amendment that was added to the bill, and you will see that your leader, the gentleman from Pottsdam, and your other big Republican leaders here, all voted for it, with the exception of my friend from Iowa [Mr. COLE], and you likewise voted for the additional $2,500,000 amendment and passed both of them.

Mr. MARTIN of Oregon. Mr. Chairman, will the gentleman yield?

Mr. BLANTON. Oh, I know how the general stands. He was one of the Democrats who jumped over the traces and voted with the Republicans.

Mr. MARTIN of Oregon. Do not forget us Democrats who voted that way yesterday.

Mr. BLANTON. Oh, some of these days I am going to name all who voted that extra $3,000,000 into the Army bill and who gave the limousines to the Secretary of War and medical officers.

Mr. MARTIN of Oregon. Do not put all the blame on the Republicans.

Mr. BLANTON. Oh, just a handful of Democrats jumped the traces and voted with the Republicans for these big increases.

Mr. MARTIN of Oregon. There was enough to put it over all right.

Mr. BLANTON. They were practically all Republicans, plus a few Democratic major generals over here, like my friend from Oregon.

Mr. MARTIN of Oregon. We put it over all right.

Mr. BLANTON. Yes; you and the Republicans did; $550,000 you put in at one whack and $2,500,000 at another whack, right against the recommendation of the Budget, against the recommendation of the President, and against the recommendation of your Democratic Committee on Appropriations. How are you going to square that when

you go home? I am glad that we are going to have a recess between March 4 and April 20, so that when the general gets home, as soon as he gets up there, somebody is going to say, "General, did you vote to increase expenses?"

Mr. MARTIN of Oregon. Will the gentleman yield? I have been home and got a very flattering support. Just look at my majority and compare it with your own.

Mr. BLANTON. I can not yield further. I had no opposition in the November election. I got enough votes in the primary to be back with the general in this Congress next year, and I am going to help hold him down on expenditures. I am going to help hold these spending major generals down. They are for spending every dollar that they can get out of the Treasury of the United States; I do not give a continental what it is for. They learn it at West Point, they learn it at the War Department and at the various corps areas of the United States. What do they care about the Public Treasury here? They want to spend continually, and I am going to help hold him down. You watch him in this coming Congress.

Mr. MARTIN of Oregon. That is the way we get votes.

Mr. BLANTON. That is not the way I get votes. He is going to quit that some time and he and I are going to get along together. He is going to wake up some time and see that the interests of the people demand that he stop this Army spending and this Navy spending, and he is going to cut loose from this Army and Navy Club some day and will stand here and help us vote for the people. You watch him. We are going to convert him, in spite of your big spending bunch of bellwethers on the Republican side of the House.

I want to say this to you in conclusion. I put some evidence in here the other day about Major Hoffman, and if the War Department does not investigate that, we ought to know why. Some of the newspapers in the country said, "Oh, BLANTON is always making charges." When I first brought to the attention of the officials here and of this House the facts about Colonel Forbes, the newspapers said that I ought to be thrown out of Congress and that my charges ought to be put in the wastebasket, that caused a complete investigation to be made, and when the officials got through with him he went to the penitentiary, did he not?

When I first made public my investigation of the facts to the officials of Washington and to the Members of this House respecting Albert B. Fall, the newspapers said my charges ought to go into the wastebasket and that I ought to be thrown out of Congress. But when the Department of Justice got through with him he finally went to the penitentiary, did he not? And when I first filed charges against former Insurance Commissioner Miller I was violently criticized by the press, but after my evidence against him was carefully investigated Miller was removed from office. When I got after Colonel Rudolph, with the help of Judge GIBSON, he finally resigned. When I got after Colonel Sherrill, he quit and resigned. When I got after Captain McMorris, superintendent of park police, newspapers said it was all false, but he was removed from the office. When I got after Col. Frederic A. Fenning, he resigned, and when I produced the facts on Maj. Wolff Smith he resigned. I have gotten after many of them. The newspapers at first said concerning all of these cases that the charges ought to be thrown into the wastebasket and that I ought to be put out of Congress, but when investigations were concluded they changed their minds, and I am still in Congress.

We must stop these abuses and this waste of public money.

[Here the gavel fell.]

Mr. SHREVE. Mr. Chairman, I yield 10 minutes to the gentleman from Illinois [Mr. CHINDBLOM].

Mr. CHINDBLOM. Mr. Chairman, a most extraordinary performance was witnessed in the House of Representatives last evening. A veto message came from the President, accompanied by an official communication from the Attorney General, to which the President referred, stating that the opinion of the Attorney General set forth some of the reasons for the President's objections to the first deficiency appropriation bill, 1933, which he returned without his signature. The Attorney General's opinion was not read in connection with the message, but on the contrary unanimous consent for its reading was refused by the objection of a member of the majority party, which controls procedure here now.

I think there has been considerable misapprehension as to the duty of Congress upon the receipt of a veto message. I fear there are many who believe that when the Constitution provides for a reconsideration that requirement means only that there shall be a new vote and that the Congress shall pay no attention to the views of the President. I will read the provision of the Constitution:

> Every bill, which shall have passed the House of Representatives and the Senate, shall, before it become a law, be presented to the President of the United States; if he approve, he shall sign it, but if not he shall return it, with his objections to that House in which it shall have originated, who shall enter the objections at large on their Journal, and proceed to reconsider it. If after such reconsideration two-thirds of that House shall agree to pass the bill, it shall be sent, together with the objections, to the other House, by which it shall likewise be reconsidered, and if approved by two-thirds of that House, it shall become a law.

What reconsideration did the House give last evening to the President's veto? The only one who spoke upon it, with some interruptions, was the distinguished Chairman of the Committee on Appropriations [Mr. BYRNS]. I submit in all candor and without any purpose whatever to criticize, that neither the remarks of the distinguished gentleman from Tennessee nor the interruptions which may be illuminating in connection with his remarks, gave the House any information upon which it might well proceed to a reconsideration, and to a new vote upon the bill in question.

The argument of the gentleman from Tennessee [Mr. BYRNS] was based entirely upon the theory that the language, to which the President's veto related, provided only for consideration by the joint congressional committee of refunds or credits of taxes, in order to give the House information upon which it might act in the passing of appropriations. That was perhaps the purpose of the original provision on this subject in the revenue act of 1928, although the avowed purpose of that amendment to the revenue act of 1928, at the time of its passage, was to provide publicity for these refunds. I call upon the Members of the House who may not be familiar with those provisions, to turn to the revenue act of 1928, to see what it actually does provide. It reads as follows:

> No refund or credit of any income, war-profits, excess-profits, estate, or gift tax, in excess of $75,000, shall be made after the enactment of this act, until after the expiration of 30 days from the date upon which a report giving the name of the person to whom the refund or credit is to be made, the amount of such refund or credit, and a summary of the facts and the decision of the Commissioner of Internal Revenue is submitted to the Joint Committee on Internal Revenue Taxation. A report to Congress shall be made annually by such committee of such refunds and credits, including the names of all persons and corporations to whom amounts are credited or payments are made, together with the amounts credited or paid to each.

That provides for information to the Congress. It provides for publicity as to these refunds and credits, but the argument last evening, as indeed upon the passage of this provision in the House as a part of the first deficiency act, was based very largely upon the theory that this was merely a reduction of the amount of refunds and credits to be investigated from the minimum of $75,000 to that of $20,000. In that connection I will read a portion of the debate—in fact, the whole colloquy between the gentleman from Arkansas [Mr. RAGON] and the gentleman from Tennessee [Mr. BYRNS]—and I submit whether it is not placing the provision which was vetoed entirely upon a reduction of the amount of refunds and credits which are to be subject to examination. I read from page 2448 of the CONGRESSIONAL RECORD for yesterday:

> Mr. RAGON. Will the gentleman yield?
> Mr. BYRNS. I yield.
> Mr. RAGON. I understand the President objects to the provision that gives Congress the right to investigate and refund amounts

that are above $20,000. We have the right, or have been assuming the right, to examine all amounts above $75,000. Has anyone ever objected to the constitutionality of the act that gave us that authority?

Mr. BYRNS. None that I am aware of. I thank the gentleman for his suggestion.

Mr. RAGON. Can the gentleman conjure up in his mind any reason, if we have the right to review refunds above $75,000, why we should not have the right to investigate refunds above $20,000?

Mr. BYRNS. Absolutely not. This seems to be an afterthought to protect those big refunds concerning which there has been so much suspicion in the past decade. No one should object to publicity. Mr. Speaker, I move the previous question.

That ended the brief argument of the gentleman from Tennessee [Mr. BYRNS], and no one else had an opportunity to speak on the veto message. There is nothing anywhere in the remarks of the gentleman from Tennessee to indicate that there was any substantial change in the provision of the first deficiency act, which was vetoed, from the provision of the revenue act of 1928, while the truth is that while the provision in the revenue act of 1928 provided for nothing but publicity and information to the Congress, the deficiency act, in its provision, provided that the joint congressional committee should have absolute and final power to determine whether a refund or credit should be paid. That feature was the main argument against the vetoed proposal. That is the argument upon which the Attorney General bases his opinion, but nothing was said last evening in the debate before this House on that phase of the question. It was only assumed that there was opposition on the part of the President to the matter of giving publicity or to the matter of the Congress getting information in regard to these refunds and credits.

Compare the language of section 710 of the revenue act of 1928, which I have quoted, with the language of the provision vetoed by the President, and the basic difference becomes apparent at once. The latter reads as follows:

Provided, That no refund or credit of any income or profits, estate, or gift tax in excess of $20,000 shall be made after the enactment of this act until a report thereof giving the name of the individual, trust, estate, partnership, company, or corporation to whom the refund or credit is to be made, the amount of such refund or credit, and the facts in connection therewith are submitted by the Commissioner of Internal Revenue to the Joint Committee on Internal Revenue Taxation and action thereon taken by said committee. The said committee or its duly authorized staff shall have full access to all the papers and shall examine into and pass upon the case, and no refund or credit in excess of $20,000 shall be made until the Joint Committee on Internal Revenue Taxation shall have so passed on such refund or credit, fixed the amount thereof, and made its report to the Commissioner of Internal Revenue; and no refund or credit in excess of $20,000 shall be made without the approval of said committee. This proviso shall not apply to refunds or credits made pursuant to a judgment of a court having jurisdiction over the subject matter, or a decision of the United States Board of Tax Appeals, which has become final.

The nature of the consideration given the veto message before the vote last evening is further shown by the following excerpt from the only speech made in regard to it:

I have not had opportunity to read the opinion of the Attorney General, which is quite lengthy. It covers quite a number of pages—some 12 or 14—and the very fact that it does cover so many pages leads me to believe, possibly, the Attorney General found some difficulty in arguing himself into the idea that this bill is unconstitutional.

In fact, no one had an opportunity to read the opinion of the Attorney General. As I have said, objection was made even to allowing it to be read to the House, and that objection came from one of the real leaders on the Democratic side.

The President of the United States, who sent the veto to the Congress yesterday, is going out of office on the 4th of March. This legislation, which he vetoed yesterday, will have very little effect during his administration. It will not be his duty to operate under it, but the incoming administration, the administration of the gentlemen who refused to uphold the President's veto, the administration of the gentlemen who preferred to retain the provision which was enacted here, that administration will be operating under this act; and it starts out with a vote of nonconfidence on the part of the Congress of the United States in this session, that it, forsooth, will not be able or may not be trusted to give a fair enforcement of the provisions of the revenue act of 1928, but drastic action must be taken now to prevent refunds and credits from being allowed and paid by the executive department of the incoming administration; and the next Congress, the Seventy-third Congress, must, through its own agency, examine and determine upon these questions.

[Here the gavel fell.]

Mr. CHINDBLOM. Will the gentleman yield me five additional minutes?

Mr. SHREVE. Mr. Chairman, I yield the gentleman from Illinois five additional minutes.

Mr. CHINDBLOM. The Republican leader, the gentleman from New York [Mr. SNELL], was compelled to ask unanimous consent that by the kind indulgence and sufferance of every Member of the House the opinion of the Attorney General might be printed in the CONGRESSIONAL RECORD, and so we have been privileged to read it this morning.

Are we thus to dispose of serious matters brought to us by the President of the United States?

Oh, the gentleman from Tennessee said that if there is any delay in this matter the cause of that delay and the blame for it does not rest upon him or upon the Congress but upon the President. That is the plain inference. Should the President of the United States refrain from the performance of his plain duty because there happened to be in an appropriation bill some items which are urgently needed? We all regret, for instance, that the appropriation for relief in the District of Columbia may have been delayed by this procedure, but most certainly it is the duty of the President of the United States to call the attention of Congress to the fact, which he believes to be a fact, that Congress is encroaching upon the prerogatives of the Executive authority. Not upon him, not upon President Hoover, was this Congress attempting to encroach, because he will shortly be going out of office, but upon his successor in office, upon the presidential authority, upon the Executive authority, no matter who the President may be, was the Congress attempting to impose an encroachment by assuming for itself an executive function.

Now, I am not taking the position that Congress does not have full right to pass all appropriations to pay refunds and credits. I think if Congress were disposed to do so it might pass a law that money once paid into the Treasury of the United States shall remain there forever and never be returned. That would not be a wise or just policy, but Congress would have the power to enact it into law.

I am not taking the position that Congress may not seek all the information it desires, that Congress may not require that there shall be a separate appropriation, for every single refund and every single credit, and that information shall be given Congress upon which an appropriation may be based for each individual refund and each individual credit. If Congress wishes to do that, well and good, but of course it would be in continuous session from the 1st day of January to the 31st day of December of every year. But I do say there can not be delegated to a joint congressional committee, as was so well stated in the opinion of the Attorney General, either the executive authority of the President, the judicial authority of the courts, or the legislative authority of the Congress of the United States.

The provisions to which the President objects did not even provide that Congress itself should have the final action in this matter, but that a joint committee, sitting when Congress is in session and when Congress is not in session, should have the authority to determine who is to receive refund or credit, not only by affirmative action, but by failure to act, by nonaction, or inaction, because if that joint congressional committee sees fit to ignore a refund or a credit which has been reported to it and takes no action whatever, no payment can be made.

O Mr. Chairman, I think upon reflection the House will not be proud of its action and conduct last evening. If the membership will read, and stop and consider the opinion of the Attorney General, they will reach a different

conclusion than was reached here yesterday upon the pretended reconsideration of this bill.

Mr. BACON. Mr. Chairman, will the gentleman yield?

Mr. CHINDBLOM. I yield.

Mr. BACON. I may suggest to the gentleman that President Wilson took exactly the same stand in defending the position of the Executive.

Mr. CHINDBLOM. That is absolutely true. One of the first actions of the late President Wilson that came to my attention after my membership in this House, which began in 1919, was the message from President Wilson in which he vetoed the law for the establishment of the office of the Comptroller General on the ground that Congress was encroaching upon the rights of the Executive. Who is to protect the rights of the Executive authority unless the President himself does it?

Mr. HASTINGS. Mr. Chairman, will the gentleman yield?

Mr. CHINDBLOM. I yield.

Mr. HASTINGS. Even the gentleman admits that Congress can pass or not pass an appropriation. Now, does the gentleman contend that Congress can not put any limitation it wants to upon the appropriation that it itself may make as to how it shall be disbursed and upon what condition it shall be disbursed? How can Congress refuse to make an appropriation except with a condition attached to it?

Mr. CHINDBLOM. It can not.

Mr. HASTINGS. There is no doubt about that.

Mr. CHINDBLOM. We can appropriate $10,000 for the salary of the Chief of Staff of the Army of the United States, but we can not compel the money to be expended for salary to John Jones, to be appointed by the President. Of course Congress would have the physical power to insert such a provision in an appropriation item, but the net result would be no appropriation at all, for we could not make the limitation effective. You can not compel the President to appoint John Jones as Chief of Staff in order that the appropriation shall become available.

Mr. HASTINGS. But this is not compelling the President to appoint this committee. It is done by the legislation itself.

Mr. CHINDBLOM. The effect of this legislation is that no refund shall be paid or provided unless it is approved by a committee of Congress. Such a committee is not Congress itself; it is not even a legislative authority of the United States and certainly is not the Executive authority of the United States.

Mr. HASTINGS. Does the gentleman contend that we could not take it away from the Internal Revenue Bureau altogether and give it to a committee to pass upon it finally once and for all? Does the gentleman contend that we could not do that?

Mr. CHINDBLOM. I am not contending that you can not control the matter of appropriation, but you can not delegate the authority of Congress to a joint congressional committee; nor can Congress usurp an Executive function. [Applause.]

Mr. Chairman, under the leave granted to extend my remarks, I wish to make brief answer to the observations made by the gentleman from South Carolina [Mr. STEVENSON] in response to the foregoing. The gentleman is entirely correct in saying that I voted to override the veto of President Wilson in the legislation for the establishment of the office of the Comptroller General. Since that time, the United States Supreme Court, in the Myers case, confirmed the sole power of the President to remove officers appointed by him, even by and with the advice and consent of the Senate. It was believed that the Comptroller General would be held to be an officer representing the legislative branch of the Government for the control and audit of the expenditure of appropriations. Still, President Wilson and his advisers believed the provision for the removal of the Comptroller General, by Congress alone, infringed upon the powers of the Executive. That question has not been tested and will not arise unless a President should seek to exercise the power of removal in the case of the Comptroller General. My point was and is, that even in that case, which involved an attempt by Congress to establish a service to aid the legislative branch in the enforcement of laws as against all other executive officers, President Wilson, fully within his rights, sought to practice the Executive authority.

The gentleman from South Carolina, in dissenting from my view of the constitutionality of the provision involved in this discussion, refers to the decisions of the courts as to the power and jurisdiction of the Interstate Commerce Commission. That reference is quite unfortunate. The courts have distinctly held, as to the powers given the Interstate Commerce Commission, that the delegation of legislative power to that commission is not unlimited or arbitrary or even discretionary, but merely empowers the commission to carry out the policies and discretion of the Congress within well-defined limits and according to established standards. As was said recently—January 5, 1931—by Mr. Justice Sutherland, of the United States Supreme Court, in United States of America and Interstate Commerce Commission *v.* Chicago, Milwaukee, St. Paul & Pacific Railroad Co. (282 U. S. 311):

> Congress can not delegate any part of its legislative power except under the limitation of a prescribed standard.

Citing Union Bridge Co. *v.* United States (204 U. S. 364, 384, 385). In addition Congress, in establishing the Interstate Commerce Commission, must act strictly within the constitutional grant of authority to regulate interstate and foreign commerce. Upon the same line of reasoning, and holding that the authority granted was to be exercised in the manner and within the rules and standards fixed by Congress itself, the United States Supreme Court sustained the power granted the Tariff Commission in the flexible provisions of the tariff laws. Even if the Joint Congressional Committee on Internal Revenue Taxation were properly constituted for the consideration of tax refunds and credits for and on behalf of the Congress, what limitations upon their authority, what rules and standards for their action, what curtailment upon their exercise of arbitrary discretionary power is there in the provision vetoed by the President in the deficiency appropriation act? None whatever. The power given the committee is complete, full, and final, not only by affirmative action, but even by failure or refusal to act. How can such delegation of its authority by Congress pass the test of constitutional validity? Fortunately, the House vindicated itself, through the minority of its membership, by sustaining the President's timely veto.

Mr. SHREVE. Mr. Chairman, I yield 10 minutes to the gentleman from Missouri [Mr. DYER].

Mr. DYER. Mr. Chairman and members of the committee, in a short time the Secretary of State will issue a proclamation announcing an additional amendment to the Constitution of the United States. This will change the beginning of the service of the Members of Congress and of the President. It will do away with what has been known generally as the "lame-duck Congress."

It has been claimed by a good many Democratic leaders and newspapers that the necessity for an extra session of the next Congress is caused by there intervening between the election and the inauguration of a new President a session of a Congress containing many Members oftentimes, as this one does now especially, who are not reelected.

I voted for the resolution submitting it to the legislatures, but I have never been thoroughly convinced that it would change the situation at all legislatively on the part of the Congress. I have too much regard during my service here for the Members with whom I have served to believe that a defeat at the polls would change their judgment or their votes upon matters pertaining to the welfare of our common country. But the Democratic Party has hit upon this as an excuse for their failure to enact legislation that they pledged themselves to enact when they held their convention in Chicago, which resulted in their election in November.

Mr. Chairman, I am unable to see in what way the minority in this House or the Members who were not reelected to the next Congress have interfered with any program that the Democratic Party has presented. In fact, I do not know of any program that the leaders in this House

have presented for consideration at this session, unless it was that provision in their platform and in their pledges that declared for the repeal of the eighteenth amendment and the enactment of legislation changing the prohibition enforcement act so as to permit the manufacture and sale of beer.

Now, Mr. Chairman, we all remember the resolution submitted by the leader of the Democratic majority, at the request and demand of the Speaker, on the 5th day of December. That was a resolution to submit to State conventions the repeal of the eighteenth amendment. That was in the Democratic platform at the very top of it.

In my State it was the chief issue upon which the people were called upon to vote and upon which they did vote. Yet, Mr. Chairman, when this resolution was voted upon in the House December 5 last, a pledge of the Democratic Party presented by the Democratic leader recognized by the Speaker of this House under suspension of the rules, the resolution failed to pass by 6 votes.

Yet we find in the CONGRESSIONAL RECORD of that date where 44 Democratic Representatives in Congress voted against it. Thirty-three of them were elected to the next Congress and 11 were not. The names of these Members are as follows:

Ayres, of Kansas; Blanton, of Texas; Browning, of Tennessee; Busby, of Mississippi; Cartwright, of Oklahoma; Collins, of Mississippi; Cooper, of Tennessee; Dominick, of South Carolina; Doxey, of Mississippi; Driver, of Arkansas; Ellzey, of Mississippi; Eslick, of Tennessee; Fuller, of Arkansas; Glover, of Arkansas; Goldsborough, of Maryland; Greenwood, of Indiana; Hall, of Mississippi; Hare, of South Carolina; Huddleston, of Alabama; Johnson, of Oklahoma; Lankford, of Georgia; Larsen, of Georgia; Ludlow, of Indiana; McClintic, of Oklahoma; McKeown, of Oklahoma; Miller, of Arkansas; Mobley, of Georgia; Morehead, of Nebraska; Norton, of Nebraska; Parker, of Georgia; Parks, of Arkansas; Patman, of Texas; Patterson, of Alabama; Polk, of Ohio; Ragon, of Arkansas; Rankin, of Mississippi; Sandlin, of Louisiana; Shallenberger, of Nebraska; Swank, of Oklahoma; Tarver, of Georgia; Taylor, of Colorado; Wilson, of Louisiana, Wingo, of Arkansas; and Wright, of Georgia.

Of the 44 Democrats who voted against repeal, 33 were reelected, whereas but 6 additional votes were needed to pass the resolution. These Democrats were committed to outright repeal by their national platform. Reelected Republicans were not bound by their national platform to outright repeal, while those Republicans who were not reelected naturally go back to the national platform of 1928 for their mandate on the proposition. The full blame, therefore, for the failure of submission at this session of Congress lies squarely upon Democratic leadership and upon the Democatic Party, and not upon the lame ducks, either Republicans or Democrats.

Is this to be charged to the Republicans or to those who were not reelected, or is it to be charged to the responsibility of the party in power that promised repeal of the eighteenth amendment?

Mr. Chairman, I said in the Congress at the last session that the promise of the Democratic Party in its platform at Chicago, pledging itself to repeal of the eighteenth amendment by conventions, was nothing more than molasses to catch flies. I repeat it now. A resolution submitted to the people of this country to repeal the eighteenth amendment by conventions will never pass.

We know that a majority of the Southern States, and almost solidly Democratic, would never indorse an amendment to repeal the eighteenth amendment by conventions. If the Democratic Party were sincere in its desire to repeal the eighteenth amendment, the resolution would have provided for its submission to State legislatures as the lame-duck amendment was submitted and as every amendment to the Constitution has been submitted heretofore. It is nothing but molasses to catch flies. There is no intention on the part of the Democratic Party, if they insist upon such a resolution going to conventions, to repeal the eighteenth amendment.

Mr. Chairman, do you know what it would cost the people of this country for conventions to be called to vote upon repeal of the eighteenth amendment? It would cost not less than $10,000,000, for the setting up of the machinery, and so forth, either by the Government or by the States, to hold such conventions. In these times of financial distress, is it sensible or thinkable that any party charged with responsibility will submit this resolution to conventions?

The members of most of the legislatures were elected at the same election on November 8 that Mr. Roosevelt and Mr. Garner were elected, and the Democrats in the Senate and in the House were elected. Why, then, is there any excuse for submitting this matter to conventions instead of to legislatures when it would not cost the people anything at all to submit it to the legislatures? I can not fathom any other excuse for it except that the Democratic Party is not sincere and does not intend really to get rid of the eighteenth amendment.

Another evidence that this Democratic Congress does not expect to put an end to prohibition is that this bill appropriates $9,120,000 for enforcing prohibition from July 1, 1933, to June 30, 1934.

It is likewise with their other promises and pledges with respect to changing the enforcement act.

[Here the gavel fell.]

Mr. SHREVE. Mr. Chairman, I yield the gentleman five minutes.

Mr. DYER. The same thing is true, Mr. Chairman, as to that matter. The Democratic Party said they were for beer. In my city this was the only issue they held out—vote the Democratic ticket and you will have beer at once. I am told, in fact, there were some people down at an old ramshackle brewery that used to be in operation, on the morning after the election with their buckets, going to get this Democratic beer. Yet, Mr. Chairman, when this matter was voted upon in the House on December 21 last, and when the question came up of whether or not we should have this beer that the Democratic Party had promised us, we found 64 Democrats of this House voting against it. They are as follows:

Allgood, of Alabama; Almon, of Alabama; Ayres, of Kansas; Bankhead, of Alabama; Barton, of Missouri; Bland, of Virginia; Blanton, of Texas; Briggs, of Texas; Browning, of Tennessee; Burch, of Virginia; Busby, of Mississippi; Castellow, of Georgia; Clark, of North Carolina; Collins, of Mississippi; Cooper, of Tennessee; Cox, of Georgia; DeRouen, of Louisiana; Disney, of Oklahoma; Dominick, of South Carolina; Doxey, of Mississippi; Driver, of Arkansas; Ellzey, of Mississippi; Eslick, of Tennessee; Fishburne, of Virginia; Flannagan, of Virginia; Glover, of Arkansas; Goldsborough, of Maryland; Green, of Florida; Greenwood, of Indiana; Gregory, of Kentucky; Hare, of South Carolina; Hastings, of Oklahoma; Huddleston, of Alabama; Johnson, of Oklahoma; Jones, of Texas; Lambeth, of North Carolina; Lanham, of Texas; Lankford, of Georgia; Ludlow, of Indiana; McClintic, of Oklahoma; Miller, of Arkansas; Moore, of Kentucky; Morehead, of Nebraska; Nelson, of Missouri; Norton, of Nebraska; Oliver, of Alabama; Parks, of Arkansas; Patman, of Texas; Patterson, of Alabama; Ramspeck, of Georgia; Rankin, of Mississippi; Rayburn, of Texas; Sanders, of Texas; Sandlin, of Louisiana; Shallenberger, of Nebraska; Stevenson, of South Carolina; Sumners, of Texas; Swank, of Oklahoma; Tarver, of Georgia; Weaver, of North Carolina; Whittington, of Mississippi; Wilson, of Louisiana; Wood, of Georgia; Wright, of Georgia.

The people, as the great Lincoln once said, like to be fooled and you can fool them three times. They have been fooled on prohibition by the Democrats several times. In my State they were fooled the third time upon the question of prohibition. Once it was in the election of James A. Reed to the Senate; then again in the election to the same office of HARRY B. HAWES; then the third time in the last election.

I am surprised, Mr. Chairman, that the Democratic Party would come in here, or in the campaign speeches they are now making, and say that the Democratic Party's policies and platform pledges with respect to putting into effect their program, have been defeated by the Republicans. The truth is that the Democrats used prohibition to get into office, and a lot of Republicans were fooled into believing them. The Democratic Party has one thing in mind always and that is to get into office. They will promise anything and do anything to accomplish that. O my Republican friends, what fools you are to trust the Democratic Party ever.

I yield to my distinguished friend from Texas, for whom I have a great regard, for I know he is sincere in his advocacy

of the dry cause—I yield to him to tell wherein the Republicans or anybody on our side has prevented the Democratic Party from putting into law any of their policies or program.

Mr. BLANTON. Let me ask the gentleman from Missouri, did he not vote for the resolution of December 5 to submit the matter to conventions?

Mr. DYER. I did, because it was brought up under suspension of the rules, and there was no other way.

Mr. BLANTON. Then the gentleman voted for something that he says would cost the country $10,000,000.

Mr. DYER. It would; but I want to say that I tried to get the Judiciary Committee to report out a resolution providing that it be submitted to the legislatures, but I was not sustained. There were Democrats on the committee and Republicans who would not vote it out. But the Democrats were in control of the committee. They could have voted it out. They are in control of the House, and they can not go to the people upon the question of prohibition and say that they have kept their word. They have not, and I think it will be a long time before they do.

In my State, what was the issue? We had a state-wide campaign by Representatives in Congress who had to be nominated and elected at large, because we did not have a redistricting of the State. The 13 Democratic candidates for Congress, some of whom had been here for years, and never in their life voted for any wet legislation, pledged themselves in writing that they would support the repeal of the amendment and beer.

Mr. Chairman, how men can change so quickly, I do not know. I do not question the sincerity of my colleagues.

In view of the fact that 44 voted against the repeal amendment and 64 voted against beer, I ask you to tell the people whether you have assisted your party to carry out its policies and program promised in your platform.

[Here the gavel fell.]

Mr. BLANTON. Mr. Chairman, I yield 12 minutes to the gentleman from Oklahoma [Mr. HASTINGS].

Mr. HASTINGS. Mr. Chairman, I want to discuss briefly a bill which I have introduced, H. R. 14135, to create Federal rural mortgage land banks, through which loans may be made direct to farmers throughout the country on first mortgages.

The necessity for such legislation is recognized by all. The bill creates 12 Federal rural mortgage land banks under the supervision of the Federal Farm Loan Board and authorizes loans to be made direct to farmers on first mortgages.

Federal rural mortgage land banks are to be created under the terms of the bill, one in each of the Federal farm land bank districts, with a minimum capital stock of $25,000,000 each, which may be increased to $40,000,000 each, all of which is to be subscribed by the Secretary of the Treasury with funds to be provided by the Reconstruction Finance Corporation, as in the case of the Federal home-loan banks.

Loans are provided to be made to farmers upon their applications direct, or through agents appointed at convenient points throughout each district, at 3 per cent interest per annum, plus an amount to be paid to amortize the principal, and to follow the rule applied with reference to the Federal land banks, which, extended over a period of 34½ years, would amount to 1 per cent per annum, or one-half of 1 per cent semiannually, which would make the total interest and amortization payment amount to 4 per cent per annum, and this 4 per cent would pay both the principal amount of the loan and interest.

The bill provides for the issuance of bonds secured by first mortgages on farm lands bearing a rate of interest of 3 per cent per annum, exempt from all taxation, Federal, State, and local, and the payment of the bonds, both principal and interest, is guaranteed by the Federal Government.

The directors of each Federal rural mortgage land bank are to be appointed by the Farm Loan Board and approved by the Secretary of the Treasury, and the employees of the banks, including attorneys, examiners, appraisers, and clerical force, are to be appointed by the respective banks with the approval of the Secretary of the Treasury and the Farm Loan Board.

The bill provides that money may be borrowed to the extent of 60 per cent of the appraised value of the land, plus 25 per cent of the value of the permanent insured improvements, for the purpose of paying off the present indebtedness against the land, to pay taxes, and for other farm expenses. Loans are provided to be made only to farmers; and in order that excessive loans may not be made to any individual, the maximum amount that may be loaned to one individual is limited to $10,000 and the minimum loan is to be $200. The limitation as to the amount is provided in order to extend the benefits to a larger number of small borrowers.

The bill follows in a general way the rural credit act approved July 17, 1916, except that the organization of local loan associations is not required, and instead of them agents are provided to be appointed at convenient places, who may serve one or more counties, to receive applications for loans and forward them to the Federal rural mortgage land banks for consideration. They would, of course, furnish blanks and give all needful information to prospective borrowers.

Mr. GARBER. Will the gentleman yield?

Mr. HASTINGS. I yield.

Mr. GARBER. I am much interested in the legislation which the gentleman is so ably describing in his bill, but in that connection I would like to ask the gentleman, does his bill put any limitation on the acreage on which any one individual could borrow? Should there not be a limit of 160 acres?

Mr. HASTINGS. In reply to my colleague—and I know he is in sympathy with this character of legislation—permit me to say that there is a limit to the amount that any one can borrow in the sum of $10,000, so while there is no limitation on the acreage there is a limitation on the amount that any individual may borrow. I think that meets the suggestion of my colleague.

Loans may be made only on first mortgage, and the borrower is prohibited from making a second mortgage on the land. This is for the purpose of requiring the farmer to retain an equity in his farm so that he will not be discouraged by a heavy mortgage indebtedness which he realizes he will be unable to pay.

Three things must be embodied in any successful legislation: First, the interest rate must be low; second, a second mortgage must not be permitted to be made, so that the borrower may always have an equity in his land; and third, the loans must be made for a time long enough to enable farmers to amortize the principal of their loans at not to exceed 1 per cent per annum, to induce them to take new courage and to inspire within them renewed hope that despite temporary setbacks and occasional disappointments they may ultimately be able to pay out.

The records show that 42 per cent of the farms throughout the country are mortgaged and the total amount of the farm-mortgage indebtedness is estimated by the Bureau of Economics to be $9,241,390,000.

Literally, unnumbered thousands of mortgages are being foreclosed, farms are being sold for taxes, and the situation is extremely critical. Farm products are selling at ruinously low prices and below the cost of production. Corn is netting the farmer in my State around 12 cents per bushel, wheat 30 cents, oats 10 cents, and all other farm products and livestock are below the cost of production.

The Federal land banks are not utilized as the agency of the Government for the making of loans in the bill because the majority of the stock in most, if not all of them, is owned by borrowers or local loan associations who elect the majority of the directors to manage the banks, and the banks have approximately $1,200,000,000 of loans now outstanding. For this reason it is thought desirable to create a new agency under the complete supervision of the Federal Government, acting through the Farm Loan Board and the Secretary of the Treasury. The farm-land banks will not be hurt but helped in two ways: First, it will be the means for finding new purchasers for foreclosed lands, and second, this bill, if enacted into law, will enhance the value of all farm lands, including those upon which farm-land banks hold first mortgages, and strengthen their assets.

In this bill the Farm Loan Board, with the approval of the Secretary of the Treasury, appoints all the directors of the banks and either appoints or approves the appointment of all of the subordinate officials of the banks, and in that way keeps the entire supervision and control of the banks.

With honest and intelligent management and rigid supervision there should be no loss to the Government or expense other than administrative expenses.

Under the bill the banks are authorized to issue, with the approval of the Secretary of the Treasury and the Farm Loan Board, 3 per cent bonds, secured by first mortgages, not in excess of twenty times the amount of their capital stock, exempt from all taxation, and it is believed that such bonds will sell at par, because their payment is to be guaranteed by the Government, both principal and interest, and the banks, being under the supervision of the Government, with honest and efficient management, should cause no loss to the Government. Hoarded money will readily seek investment in these bonds, and relief will be extended to not only the farmers but to all dependent upon them. The recent offering of Treasury notes in the sum of $250,000,000 for five years, bearing interest at 2⅝ per cent, was oversubscribed.

The Reconstruction Finance Corporation is directed to transfer the amount of money necessary to pay for the subscription of stock by the Secretary of the Treasury. The minimum capital stock of each bank is fixed at $25,000,000, with authority to increase the amount to $40,000,000.

From the capital stock and the proceeds of the bonds authorized to be sold, to the amount of twenty times the capital stock authorized to be issued, it is estimated that an adequate sum of money would be realized to relieve the distressed financial condition of the farmers.

Titles to the lands secured by the mortgages must be examined and approved and the lands appraised by appraisers appointed with the approval of the Farm Loan Board.

Money was subscribed by the Secretary of the Treasury for the Federal home-loan banks, and was furnished by the Reconstruction Finance Corporation, in the same manner and language as is provided in this bill. Why not aid agriculture, the most distressed industry of them all?

Large sums of money have been loaned to banks, railroads, insurance companies, and corporations throughout the country, and I insist that the farmers, being the most distressed class of people, should receive immediate and direct assistance and be placed on a parity with industry.

The farmers have been in a very distressed condition for the past 10 years. Agriculture is one of our leading basic industries, upon which the happiness and prosperity of the entire country depend. The farmers have lost their purchasing power. As a result of this, all other classes of business dependent upon the farmers are on the verge of bankruptcy. The merchants in the agricultural sections sell less goods, and as a result buy less from the manufacturers in the East, and this has resulted in the closing of factories and in aggravating the unemployment situation. It is estimated there are approximately 12,000,000 people out of employment in this country at this time. Unfortunately, the number continues to increase.

Other legislation should be enacted for the benefit of the farmers, but, of course, all necessary legislation can not be included in one bill. It will require a series of bills to meet the situation. The bill which I have introduced covers the question of the mortgage indebtedness of the farmers and will unquestionably aid the thrifty and hard-working tiller of the soil if it is passed.

Other bills have either passed the House or are pending consideration before committees, and we hope for favorable action at an early date; if not at the present session, surely at the next session, which it is generally predicted will be called in April.

I shall not enter into a detailed discussion of the other remedies at the present time, but in my judgment, among others, we should modify our tariff laws, so as to regain our foreign markets for the surplus products raised by the farmers throughout our country.

We regularly export about 200,000,000 bushels of wheat. Foreign governments because of our tariff legislation have retaliated against us, and as a result our foreign market for wheat is all but destroyed, and the farmers are forced to sell their surplus wheat upon a domestic market, which has depressed its price to around 30 cents per bushel.

We sell abroad about 60 per cent of the cotton we produce, and our foreign market for cotton being measurably destroyed, as in the case of wheat, our surplus cotton must be sold to domestic spinners, and as a result sells for less than the cost of production, and around 6 cents per pound.

The same is true of all other farm products, of which we regularly raise an exportable surplus. There can be no permanent recovery until our foreign market is restored.

We have passed in the House a temporary emergency bill commonly known as the domestic-allotment plan, which has for its purpose making the tariff applicable to certain farm products named in the bill, including wheat, cotton, hogs, and tobacco, of which we regularly produce or raise an exportable surplus.

Corn is, of course, largely fed to hogs, and will, therefore, be benefited. The terms of the bill require a reduction of acreage. This legislation would not be necessary if our tariff laws were amended so as to induce foreign governments to repeal their retaliatory laws and regulations, thereby restoring the foreign markets for our surplus products, both for industry and agriculture.

Second, I believe that legislation should be enacted for the expansion of the currency and for raising commodity price levels. Bills are pending in both branches of Congress, which I hope may receive favorable consideration at an early date. They are receiving the most intensive study of thoughtful people everywhere, both in and out of Congress. I do not minimize their importance. Let me repeat that all of these remedies can not be embodied in one bill.

Finally, permit me to say that the farmers of the country can not survive unless they are relieved from burdensome ad valorem taxes. This relief, of course, must come through State legislation. The farmers of the country are unable to pay their taxes and the upkeep of their farms, with all farm products selling below the cost of production.

The Federal Government can not enact legislation affecting ad valorem taxes on farm lands, but can set the State governments an example in economy by the reduction of Federal taxes, in the hope that the various State governments will reduce their expenditures and revise their State revenue laws so as to reduce the ad valorem taxes on farm lands. Unless this is done all other remedial legislation will fail.

At present the tenant farmers are perhaps in a better position than the owners of farm lands. The acute situation in Iowa, recently brought to our attention, is measurably true in every other part of the country. It is estimated that 42 per cent of the farms are mortgaged. Farms are being abandoned, forcing mortgagees, through agents, to take possession of the farms. The lands are eroding. The improvements are deteriorating in value and farm lands are becoming less productive. The House has passed the bill to extend crop-production loans to farmers to enable them to make their 1933 crops.

Congress should do everything within its power to relieve the situation; and while we have enacted legislation for the benefit of other classes, I submit that adequate legislation has not been enacted to enable the thrifty hard-working farmers to secure money to meet their bare necessities and enable them to retain their homes. This bill will enable them to do that if it is passed. The interest rate on loans is so low that it will not be burdensome. The passage of this bill will aid in restoring the prosperity of the farmers and every other class dependent upon the farmers will be benefited. It is easily understood. The Farm Board is already appointed. It can begin making loans in 30 days. This bill is conservative, will not involve the Government in any loss in excess of the administrative costs, and will

relieve agriculture and every other business dependent upon it. By requiring borrowers to subscribe for stock it is the hope that in a few years, not to exceed 10, that they will take over the control of these rural mortgage banks and relieve the Government of any further financial responsibility, except to maintain a continuing supervision through the Federal Farm Loan Board.

This bill, if enacted, will encourage farmers to help themselves. The Government gives them nothing except to lend them its credit and aids them through supervision. The hope and purpose of the bill is to lead unnumbered thousands back to the soil, encourage them to own their own homes, be independent and self-sustaining citizens, and, as agriculture is restored, lend a helping hand to every person, class, or business dependent upon the prosperity of the farmer.

If this bill is enacted, it is expected that it will result in the readjustment and scaling down and the settlement of innumerable claims secured by mortgages. A large number of individuals, insurance companies, corporations, and banks have claims and notes secured by farm mortgages who realize that there has been a depreciation in land values as well as in all other classes of commodities, and certainly it would not be to their advantage to bring foreclosure suits, secure a decree, and have the lands advertised and sold at public sale because they appreciate that, in the first place, if the lands were sold at forced sale they would not bring a sufficient amount to pay their mortgage indebtedness; in the second place, court costs and attorneys' fees would have to be paid; and, in the third place, there would be a delay of a year or more in instituting suit and securing a decree and in having the land sold at a forced sale, and during this time there would be a deterioration in the value of the improvements and in the erosion of the soil which would decrease the amount the mortgagee would ultimately receive.

It is therefore expected that a large percentage of the mortgagees would prefer to scale down their indebtednesses and accept the amount which could be borrowed upon the land under this bill, which is 60 per cent of the present appraised value of the land, plus 25 per cent of the appraised value of the permanent insured improvements, in payment of their indebtednesses and give a release so that the prospective borrowers would be able to give a first mortgage to the Federal rural mortgage land bank to secure new loans.

The borrower is prohibited by the terms of this bill from making a second mortgage upon the land, and those who have claims against him, which have been scaled down, will realize that they can not take a second mortgage on the land.

Agents representing the Federal rural mortgage land banks will be able therefore to adjust most of the claims secured by the mortgages and get releases in full by payment of the proceeds which the borrower may be able to secure from the banks upon first mortgages on the land.

I have no hesitancy in saying that this bill is workable and, if passed, will bring a great measure of relief to the farmers throughout the country.

Rules and regulations can be promulgated and loans made available to farmers within 30 days after the banks are established under the provisions of this bill.

This bill would in my judgment do more to stabilize conditions among the farmers than any other that is being considered by Congress at the present time. This and the other bills referred to, if enacted, will stop foreclosures of farm lands, enhance the value of farm products, and will not only relieve the farming class but all others dependent upon them. [Applause.]

Mr. SHREVE. Mr. Chairman, I yield 10 minutes to the gentleman from Washington [Mr. SUMMERS].

Mr. SUMMERS of Washington. Mr. Chairman, a campaign of tremendous proportions is under way all over the United States to have Government research abolished. Research is vital for the health and prosperity of the people, for the proper enforcement of laws, and for the national defense. It costs, on an average, 25 cents per person of the population per year. For every dollar spent in research the national wealth is increased enormously. The dollar is spent once, but the benefits continue indefinitely. If research is curtailed by the United States, those nations continuing it, like England, Germany, and France, will rapidly secure most of the world's trade. Universities and private agencies are incapable of carrying on the kind of research necessary.

FALSE ECONOMY PROPOSED

The Chicago Daily Tribune on August 30 last contained an article advocating various economies in Government expenditures. A list of appropriations was given which, it is claimed, the National Organization to Reduce Public Expenditures wishes to be discontinued. This program includes the discontinuance of practically all Federal research, the Federal control over foods and drugs, the meat-inspection service, and various other activities which are absolutely essential to the health, happiness, and prosperity of our people.

On October 15, 1932, the Chamber of Commerce of the United States issued a booklet entitled "Government Competition With Private Business," which also advocates the abolition of numerous activities of the Government. It maintains that all scientific research that does not have a necessary relation to Government properly belongs to our universities, which are claimed to be better equipped and qualified for such service.

It is my purpose to consider some of the consequences that must follow if the above campaign succeeds in abolishing Government research or in transferring it to universities.

NATURE OF GOVERNMENT RESEARCH

The United States conducts research for three purposes:

First. To promote the general welfare;

Second. To determine how to administer the laws most efficiently; and

Third. To increase the efficiency of the country in war.

The research work of the War and Navy Departments and of the National Advisory Committee for Aeronautics is primarily intended to satisfy the third purpose.

Studies of methods for crime detection and of food and drug adulteration, and much of the work of the Tariff Commission are examples of research of the second class.

The first kind of studies includes investigations of human, animal, and plant diseases, insect pests, soils, and fertilizers, dust explosions, standardization of all sorts of commodities, utilization of industrial wastes, and development of our natural resources.

The Government has no research projects the solution of which will benefit only single industries or small groups of people. The development of commercial articles or processes is left to private enterprise.

Most of the problems attacked by the Government require a large organization to offer any hope for complete success. These organizations are two kinds: First, those where a number of different kinds of scientists work on various phases of a single problem under the direction of an official who coordinates their activities; and second, those where several agencies work together simultaneously on the same problem. An example of the first kind folows:

RESEARCH AIDS GROWER AND CONSUMER

Commercial apple orchards can no longer be operated in much of this country without spraying to control the insects. For certain pests nothing was available but sprays containing arsenic, but arsenic leaves a residue on the apples which is injurious to health. When Great Britain refused to admit our apples, and various States passed laws on the subject, something had to be done quickly. As a temporary expedient, machines were quickly developed to wash the apples, but it was realized that this was too expensive for a permanent solution of the problem. Then it was decided to try to develop an insecticide that would be cheap, effective in killing insects, and harmless to man, domestic animals, and to vegetation.

Realizing the vast importance of this research to the fruit growers and consumers of the Nation, I have fathered a

small annual appropriation for this work during the past several years.

Toxicologists were put to work to find such a poison. Derris root, used by the South American Indians to paralyze fish which they afterwards eat, was finally decided upon as a likely clew. The natives of Sumatra and the natives of central Africa were found procuring their fish in the same manner. Then chemists studied derris root and found that rotenone was the substance that gave derris the properties of poisoning fish but not men. Entomologists started a series of tests on many kinds of insects and discovered that derris would kill equally well by contact or when eaten. Plant physiologists studied the effects of derris on plants, and nutrition experts studied its effects on rats and guinea pigs and then on men. Soil experts studied its effects on the soil, because the continued use of arsenates finally ruins certain types of soil for agriculture, and found that rotenone is harmless to the soil, to plants, and to warm-blooded animals. Pharmacologists sought other plants that would contain rotenone. Devil's-shoestrings, which grows as a noxious weed in the United States, was found to contain from 1 to 4 per cent of rotenone. It is now hoped that a way will be found to synthesize rotenone cheaply from some raw material like coal tar or sawdust.

Mr. KETCHAM. Mr. Chairman, will the gentleman yield?

Mr. SUMMERS of Washington. Yes.

Mr. KETCHAM. Has the gentleman any information as to whether or not this new product of which he speaks can be produced in sufficient quantities and at a price that will make it available for the large spraying operations in his State and mine?

Mr. SUMMERS of Washington. That is a practical question. I am informed the solution of the entire problem is near at hand, and the development of an insecticide that will satisfactorily replace arsenic sprays also solves the problem of saving the health and lives of many workers in arsenic factories.

I might say further that there are enormous quantities of the derris plant growing in the deep interior of South America, and that it has been transplanted to some parts of the United States and, as I understand, is grown now successfully in an experimental way in this country. The devil's-shoestrings is a noxious weed in many parts of the country, and it is now found to contain, as I stated, 3 or 4 per cent of rotenone, the active ingredient of derris root, which contains the poison that kills the insect.

Mr. KETCHAM. Has the gentleman had experience in his section similar to that I referred to some time ago in our own section, as to the discriminations being quite prevalent between certain sections where the restrictions are enforced rigidly, concerning arsenical residue?

Mr. SUMMERS of Washington. That is what induced the research that is being made to develop a spray that would not be quarantined against even when a residue is left on the fruit. We have had that experience with our western fruit, which we are overcoming at this time by washing first with an acid solution and then rinsing with water, and then a drying process, all of which is rather expensive and requires expensive machinery. However, our fruit now comes to market in attractive appearance and ready for consumption as is.

Mr. KETCHAM. Can the gentleman say whether or not the experiments with rotenone are approaching a practical stage where we can look to its use in the near future, instead of arsenical sprays?

Mr. SUMMERS of Washington. I am informed that we are rapidly approaching that stage.

An example of the cooperative type of study is that of the most efficient method of applying fertilizers to crops. It was found that a considerable part of the fertilizer bought by farmers was being wasted through inefficient methods of application. A project was then organized in which agricultural engineers were entrusted to develop the machines necessary to try out various methods of application. Fertilizer technologists prepared the necessary fertilizers, and various State experiment stations furnished the necessary land, labor, and care. Agronomists were assigned to the problem, by both the Government and the National Fertilizer Association. As a result of this group of scientists working together, it has been found that placing the fertilizers uniformly in bands at the sides of the seeds will produce much better returns to the farmer than will the old methods of application. Farm implement manufacturers are now building the necessary improved distributors. A single scientist working by himself could never have solved this problem.

SHOULD GOVERNMENT RESEARCH BE TRANSFERRED TO UNIVERSITIES?

The Chamber of Commerce of the United States claims that research not necessary for functions of government should be carried on by our universities. Who will provide the funds if this is done? If they are not provided from some source outside the universities, this class of research probably will not be carried on at all by the universities. In the final analysis, scattered research would cost the taxpayer vastly more than concentrated research now costs.

The Government can not depend upon promiscuous research projects at the universities, but must control its own research in order to have done those things that are necessary to the proper conduct of the public business. Any fact-finding work done outside the Government is subject to the possibility of being regarded as biased by the political or commercial connections of the persons conducting the work. Under any circumstances, it could not have the authoritativeness and command the confidence that Government reports do.

However, much excellent research is being done at our universities, but it is largely of an entirely different type from that being done by the Government. College research, as a rule, is carried on by professors in their spare time, assisted by graduate students, and the nature of the problems studied depends upon the interest of those making them.

The Government has already provided itself with facilities necessary for the highest types of research. Much of this equipment can be found nowhere else in this country, or in the world. It includes complete files of the world's scientific and patent literature, which are found in the Library of Congress, the library of the Department of Agriculture, the Surgeon General's library, the Patent Office library, and other special libraries located in Washington. Certain kinds of important research require access to complete collections of scientific specimens, such as those in the National Museum and the Department of Agriculture.

Research is greatly promoted by ability of the scientist to consult with other scientists. This can be done nowhere as it can in Washington. This is appreciated by many of the large trade associations, which have built their research laboratories in Washington, as, for example, the National Canners Association, the National Institute of Dyers and Cleaners, and so forth. A number of other scientific institutions neither connected with industries nor the Government, such as the National Research Council, the Carnegie Institution, and the headquarters of the American Chemical Society, are located in Washington and employ many scientists, who are all mutually helpful to each other and to the Government in scientific work.

To transfer the research work of the Government bodily to universities would involve abandoning facilities already provided, and the building of new ones at large expense, which when built would not be entirely satisfactory. It would ultimately lead to duplication of effort, study of problems having no bearing upon the welfare of the people, and the ignoring of problems vital to the welfare of the country. It would also cost the taxpayer more than it does now, with less results.

NECESSITY FOR GOVERNMENT RESEARCH

The necessity for study of means to control human diseases and eradicate them, if possible, is apparent to nearly everyone and needs no argument. The absolute necessity for constant research on plant and animal diseases and insect pests is not, however, so apparent to many people. Every year new diseases and insect pests gain entrance into this coun-

try or native species break loose from the control exercised by nature until the advance of civilization upsets the balance.

In the past 20 years a number of potato diseases became epidemic. Any one of these would have made the growing of potatoes impossible in this country except for the prompt research and control work of the Department of Agriculture.

The rusts and smuts would have wiped out the wheat belt if it were not for timely research.

Because of lack of research, the blight has practically exterminated our native chestnut trees, and mosaic disease at one time had wiped out our sugarcane industry, which research, however, has since restored.

Those in a position to know predict that this country would face famine in 10 years if all research on plant diseases and pests ceased in the meantime. Not all research projects are undertaken to prevent disaster, but when such is not the case they have to offer hopes of big returns to our people before they are undertaken.

COST OF RESEARCH

A survey of detailed appropriations indicates that the total spent for all kinds of research in the present fiscal year will be less than 1 per cent of the total Budget and only about 25 cents a year per person of the total population.

PROFIT FROM RESEARCH

In 1927 Dr. A. F. Woods, director of scientific work, Department of Agriculture, made a careful study of the financial return for every research project in his department. The details are given in the May 11, 1927, issue of the Official Record. Examples will show how this study was made.

The number of people killed and injured and the property losses from explosions in industrial plants was increasing each year before 1922 at an alarming rate. Flour mills, planing mills, collieries, and many other kinds of factories suddenly exploded with terrific violence, and no one could explain the reason for it or how to prevent these explosions. No one industry could be expected to make a thorough study of this problem, because it affected many industries. In 1922 the Department of Agriculture set to work on the problem, and soon was able to demonstrate that static charges of electricity generated on moving belts were capable of igniting many kinds of dusts when floating in the air. At that time I sponsored a small annual appropriation to eliminate dust explosions and resulting fires in wheat-threshing machines and grain fields. This problem is now well-nigh solved, with the happy result of lower insurance rates on machines and grain and the prevention of many destructive fires.

With the application of preventive measures, the difference in the financial losses from dust explosions in the five years before and after the work of the department was published was over $1,000,000 annually. Doctor Woods, to be conservative, only credited half of this saving to the research on the subject. No attempt was made to evaluate the saving of life and limb in terms of dollars.

Small, damaged, and misshapen citrous fruits, together with the unsalable surplus in extra good years, were formerly worse than wasted because it cost money to dispose of them. Research has developed processes for creating valuable products from them. These products include essential oils, citric acid, pectin, and many other valuable commodities which can be stored until needed. This work to date has yielded an income of $7,000,000 to the growers of citrous fruits besides providing employment to many people and a chance for enterprising individuals to establish new industries.

The 23 projects of the Bureau of Animal Industry completed at the time of the study mentioned, at a cost of $50,900, have resulted in a saving to the people of this country of $62,000,000 annually.

As one might expect, some projects were much more profitable than others, but most of them had been so successful that on an average for every dollar spent the wealth of the country has been vastly increased annually. It should be borne in mind that the dollar was spent only once, but the return continues every year thereafter, and that no allowance is made in this estimate for the saving of lives or the increase in health, comfort, and happiness of the people.

RESEARCH AND OVERPRODUCTION

Recently the argument has been advanced that research is responsible for overproduction and that research should be stopped. It is true that research in the last 20 or 30 years has made it possible to do the Nation's work with much less drudgery and with fewer hours of labor, and at the same time has increased the length of our lives, improved our health, elevated our standard of living, and added in a thousand ways to our comfort and convenience.

The present excess of goods is due to a reaction from the conditions produced by the war and to the rapid decrease in purchasing power of the people, rather than to too efficient production. If by working with the improved tools and methods which research has provided more can be produced in an 8-hour day than can be consumed, industry and agriculture should be reorganized on the basis of a shorter day.

If the United States should abandon research the other countries of the world by continuing research would quickly outstrip this Nation in efficiency. The result would be that we should in a very short time not only be unable to compete with England, France, Germany, or Holland for world trade, but we should actually be unable to compete in our own home market in spite of any tariff we could impose. The United States would cease to be self-supporting and its industries and workmen would be forced to emigrate to countries where modern methods and progress remained the rule. A research holiday, like disarmament, must be world-wide or else the nation continuing research will reap an easy advantage over the nation that suspends her research activities.

Mr. ARNOLD. Mr. Chairman, I yield 10 minutes to the gentleman from Texas [Mr. JONES].

Mr. JONES. Mr. Chairman, in connection with the farm bill which we had under discussion a few days ago, I rise for the purpose of calling attention to the English wheat act, which is on all fours practically with the act which the House passed the other day, but which applies only to wheat. I was unable to get a copy of that statute which was enacted on May 12, 1932, until last Saturday, and I want to call the situation to the attention of the House so that anyone who is interested may have a chance to read the act. The act is published in Chitty's Annual Statutes for 1932, and is to be found on page 58, volume 28, part 1. This is a very interesting statute, because it parallels almost literally the act which we had under discussion. In this act the standard price of $1.44 per bushel is established for wheat, and translated into the present rate of exchange it means $1.01 per bushel for wheat, American money. It levies a processing fee on the miller for the difference between the general average level of prices prevailing in the Kingdom and the standard price. It provides for the payment of that difference as a premium to the wheat grower. The bill has exactly the same underlying philosophy. It provides for determining the average price of wheat, then establishing a standard price, charging a processing fee on the domestic wheat and imported wheat, and paying the premium to the producer of that wheat. Since I did not have the citation to the actual statute, I merely mentioned it the other day in the discussion. I have secured several comments from English newspapers on the operation of that act. Here is a comment which I wish to read, from the London Times of Monday, December 5, 1932. The London Times is one of the great newspapers of the world. In this act a wheat commission was established to administer the law. I am going to read the comment which appeared in that paper on the date mentioned:

The wheat commission's announcement that an advance payment will be made this month under the wheat act is very welcome to corn growers. The amount of the payment is larger than had been expected in view of the fact that we are not halfway through the cereal year and that many farmers have of necessity cashed a larger proportion of the crop in the first three months after harvesting. It will be noted that the interim deficiency payments of 13s. 6d. per quarter will be made only on wheat certificates which were delivered to the commission by

November 30, but Lord Peel, the chairman, has announced that another interim payment will be made early in the new year on account of wheat sales completed during the next few weeks. A tribute is due to the wheat commission and the local panels representing growers and merchants who are operating the novel machinery of the wheat act so successfully. When the measure was before Parliament there were some gloomy forebodings about the operation of the act, but even poultry keepers, who were particularly apprehensive about the effect on the market price of home-grown wheat, should now be satisfied that the assistance given to wheat growers does not injure other interests.

Here is a little earlier comment, in the London Times of November 1, 1932:

The wheat act has its critics among farmers as well as politicians, but if the experience of other European countries is any guide this measure will result in a substantial alleviation of the financial distress felt most acutely in the arable areas of eastern and southern England.

The entire article can be found in the Congressional Library if anyone desires to read it.

Here is another communication of December 2, in the London Times, entitled "The Prosperity of Agriculture":

Speaking at Louth, Lincolnshire, last night Major Elliot said that the prosperity of agriculture could not be built upon exploitation of the towns. To-day, for the first time, they had the sympathy of the towns for the countryside. It was essential that that sympathy should not be lost.

Therefore in all their schemes they had to see that the countryside did not forget what the towns had so often forgotten, that the towns and the country sank or swam together. * * *

The wheat act insured a profitable price for this year's crop. * * *

The Minister of Agriculture was asked if this action would be permanent or temporary.

He could assure them and the agriculturists of the country that the policy of securing a rise in wholesale prices was the firm determination of the Government, not lightly undertaken and not lightly to be cast aside.

The article also refers to the Ottawa agreement, and may be found in the London Times in the Library.

I read these comments and call attention to the citation of the act, so that anyone who is interested may know that there are similar plans being tried and similar conditions sought to be healed in other countries as well as our own. The measure which we prepared is of a temporary nature, in the hope that it will give relief to the temporary condition that prevails here and elsewhere.

Mr. HALL of North Dakota. Will the gentleman yield?

Mr. JONES. I yield.

Mr. HALL of North Dakota. I may say to the gentleman from Texas that the issue of the New York Herald Tribune a week ago last Sunday carried a much more extensive report on the operation of that farm wheat bill in England.

Mr. JONES. Yes. I was getting these comments from the English papers to show what they themselves thought. There was also an article in the New York Times of last Sunday in discussion of this particular act.

Mr. KVALE. Will the gentleman yield?

Mr. JONES. I yield.

Mr. KVALE. Is the English plan a temporary plan?

Mr. JONES. The English plan has no time limit in it. However, I have read the discussions in the report of the parliamentary debates, as far as I had the time to do so. The emergency situation seemed to be the basis of the discussion and the enactment, although there appears, as far as I can learn, no time limit.

Mr. KVALE. Is it interknitted with the Ottawa agreement with reference to the preferential treatment of Canada?

Mr. JONES. No. It is entirely separate from the Ottawa agreement.

Mr. BOILEAU. Will the gentleman yield?

Mr. JONES. I yield.

Mr. BOILEAU. England has no exportable surplus of wheat.

Mr. JONES. No. And they have no acreage limitation in the act. I intended to state that the distinction between their bill and ours is that they have no exportable surplus and they naturally provide no acreage limitation. They are endeavoring to get a fair price, as they term it, for the commodity that is grown, and to relieve the distress that exists in the agricultural section.

Mr. BOILEAU. It is working quite satisfactorily, even though there is no exportable surplus?

Mr. JONES. That would seem to be the indication according to these reports. These are the latest comments upon its actual operation. It is interesting to note that one of these issues carries a notice of a dividend declared by one of the milling institutions. It did not seem to put them out of business anyway.

The CHAIRMAN. The time of the gentleman from Texas has expired.

Mr. SHREVE. Mr. Chairman, I yield 15 minutes to the gentleman from Massachusetts [Mr. GIFFORD].

Mr. GIFFORD. Mr. Chairman, I desire to have an opportunity of speaking for a few minutes about the instrumentalities which we recently set up for the relief of our people, and, if possible, contrast them with some of the inflationary schemes that are being advanced by so many who are, no doubt, sincerely desirous of doing something to relieve the present distress. It is, however, necessary that we subject these seemingly plausible propositions to careful analysis.

I wish first particularly to refer to the home-loan bank, to the functioning of which instrumentality my attention has been especially directed, because I was very enthusiastic about its possibilities as a relief aid when it was established by the Congress.

I fully realize the great discouragement and disappointment attendant on the seeming failure of these home-loan banks to function as we intended that they should. During the Christmas recess I took special occasion to interview the officials of the bank in my own section and was fully informed as to the progress which it had made. I had previously requested and received much of this information in writing. What I desired to know, if possible, was the reason for its failure to make loans and do so expeditiously.

I am not to-day going to take too critical an attitude, but it seems that possibly both I and some of the rest of you may need to apologize for some of the injudicious statements which we may have made on the stump as a result of our enthusiasm and expectation of what the home-loan bank was going to do. We said, "Wait patiently until October 15 when we shall have the set-up." To our financial institutions we said, "Hold back. Do not foreclose mortgages until these establishments have had a chance to begin functioning. Relief will surely be made available for large numbers of mortgage holders without the necessity of resorting to foreclosure."

October 15 came; November 15 and December 15, with no relief in sight. I acknowledge that in my section of New England all but one State would have to alter their laws before our institutions could subscribe to the stock of the home-loan bank, but I learned that one New England State had already—on the approval of its attorney general—made such subscription and that small sum was all the funds in the possession of the local home-loan bank for carrying on its activities, principally, of course, taking care of its personnel pay roll. The bank which had subscribed doubtless needed money quickly, but no Federal funds had been apportioned to New England up to about January 1 of this year.

I wish it to be fully understood that I am blaming no one in particular for this. In the set-up of such an executive organ there should not be too hasty and ill-advised action, of course. The board is working daily far into the night, trying to formulate proper safeguards and issue instructions to the regional institutions on the subject of proper banking methods and procedure.

I asked these officials the question, "Suppose you are called upon to appraise a piece of property for a direct loan, how would you proceed?" and was informed that some 32 pages of instructions had been issued to them by the central board telling them what should be done. Doubtless the exacting methods and customary governmental red tape were required.

I then asked, "What about the Couzens amendment in the creating act, under the provisions of which they were supposed to be able to make direct loans up to 40 per cent of valuation, possibly to relieve unemployment, if made for the purpose of repairing property or new construction?" The answer was, "Well, the Washington board does not approve of that sort of direct loan, and we have not been authorized to make it."

I said, "How many applications have you had for such loans?"

The answer, "About 3,000."

I asked, "How many under the category of direct loans for new construction—new homes—which would put people to work?"

"Possibly 200."

I then inquired of the central board as to its attitude toward making direct loans of this nature, and the answer was, "We have to be extremely careful in formulating these rules. This is a permanent organization set up by Congress. We must be very strict in order that this may be a sound institution, since we have got to sell a very large amount of bonds to the public in order to obtain funds to build it up."

They advised me to look at the Federal land bank set-up, where only 50 per cent is loaned. They suggested that I look up the present value of this Federal land bank's bonds. "We have weeded out these applications for direct loans very carefully," they told me, "and can find few, if any, which we could say would be safe for us to make a loan upon." They maintain that a man is not a home owner until his house is actually built, and that their attorneys have advised that it is not proper to make a loan on such premises until they are actually occupied by the owner.

In consequence if a man has sold land to a party and in all good faith told him that he would be able to get a direct loan for construction up to 40 per cent, because new construction, which would help to relieve unemployment, would be particularly favored, he has now got to advise him that no direct loans are favored, as not being the real purpose of the Congress.

Of course, if I were a member of the board and had to help in formulating rules and regulations so that the bank would be a permanent institution, which would not lose its stockholders' money, I, too, should naturally be very cautious in establishing the policies to be followed. It is probable that the board does not believe in the Couzens amendment, and consequently direct loans will not be made, except under pressure. Seemingly the board does not consider it "good banking" and believes that this home-loan bank was intended only as a reservoir of credit for savings banks, cooperative banks, and other home-lending institutions.

Let me now refer to the Federal reserve bank—the most important instrumentality of our banking system. When I returned home last summer I called at the reserve bank for my district and said, "Congress has passed the Glass-Steagall bill, which allows your institution during the next six months to loan direct to customers. Are you going to do it? Congress has expressed the intention that you do so, when necessary. Is your own objection to this manner of banking to outweigh the intent of the Congress?"

It could readily be seen, of course, that there was no desire to engage in this form of banking, but I was finally informed that if I had any constituents who could prepare a good financial statement and furnish a guarantor, who could also present such a statement, I might send them to the bank and they would receive consideration. But I am pretty well satisfied that the Federal reserve bank has made few such loans. Upon inquiry I have been told that the New York Federal Reserve Bank has made a very limited number, but I do not think that they particularly wish to do so.

We Members of Congress thus seem to be unable to pass any sort of a law which will be effective in forcing bankers to do something which may be contrary to what they consider to constitute a proper banking transaction. In this respect our efforts with the Federal reserve banks have been unavailing.

Now, you know and I know that our bankers, taken as a whole, are not open to strong criticism. Last year I visited many of the banks in my district and asked to see their latest reports. I have words of only the highest commendation for their officials. They have loaned all the money they could with safety. Under existing conditions they naturally hesitate to rediscount for new businesses and have even been forced to curtail their loans to established concerns. You and I are continually receiving word that much needed credit can not be obtained. Those who have loans in banks are being requested to repay them rather than being allowed additional credit. We can not criticize our banks for that, the situation being as it is. In my district, banks have in the past made liberal loans for the upbuilding of their own localities and now find real-estate mortgages and other similar collateral to be frozen assets in their hands.

And now I also wish to say a word about the Reconstruction Finance Corporation, for which I have high praise. It has undoubtedly saved hundreds of our institutions and the depositors therein. It is now loaning large sums to the regional agricultural credit corporations and is greatly assisting the farmers through this agency. However, many local banks to which these farmers owe money are demanding that they go to the regional credit corporation and obtain money to repay such loans to the local bank, which is in turn being pressed by the larger bank to which it is indebted.

In other words this instrumentality, too, is primarily saving the large financial institutions, which is of course good—and it incidentally saves their depositors—but now something must be done so that the country can proceed to do business. Not only new business, but business as it has been carried on in the past. We must do something more than has been done. I desire to be conservative and careful in the matter. I tried to be sympathetic with the viewpoint that what was needed was more currency, when I voted for the Goldsborough bill, last session. [Applause.] I do not want you to applaud that statement, because I should now vote against it. [Applause from the other side.]

I have changed my viewpoint as to the necessity of such legislation because during the action on the Goldsborough bill the Federal Reserve Bank did buy bonds in the open market and extended almost a billion dollars of credit to the member banks—credit which the banks would not make use of. There is still large credit available to the member banks, but it is seemingly undesired.

Print all the currency you wish and apparently the banks will not take it. There is $42,000,000,000 of deposits in our banks to-day, and we think that our credits in these banks are as good as gold certificates, or Federal reserve notes earmarked as gold, or other lawful money, whether earmarked with gold, or not. Yes, there is now $42,000,000,000 on deposit in banking institutions against only about $4,000,000,000 in actual gold. There is no need of any more currency to be provided by any process of inflation.

I have read and reread Mr. BUSBY's recent speech. He does not care about leadership, or rules, if only he can carry out his honest viewpoint. He says:

> I am for the poor people and want a billion dollars of currency issued within 30 days. If this should not be sufficient to raise prices, issue another billion in the next 30 days. If this is still not enough, put out a third billion the same way. Have the Federal reserve banks furnish this new currency to the Government at, let us say, 4 per cent—

Although he believes that 1 per cent may be enough—

> and have the Federal Government pay its employees and debts in such actual currency. It will then really get into circulation, producing velocity in business and thus cure the present situation in short order.

Give us our salaries in currency and we will run right down to the bank and deposit it, just as we do our checks. Nobody desires to have much currency in his possession. We prefer credit at the banks, subject to check or order. People want and need more credit—as much as possible of that

credit on which, as Mr. BUSBY says, nine-tenths of the business is done in normal time.

Mr. BUSBY. Will the gentleman yield?

Mr. GIFFORD. Have I criticized the gentleman so that I need to yield? I do not want to yield unless I have criticized the gentleman.

Mr. BUSBY. You have not criticized me yet.

Mr. GIFFORD. I have sympathy and great admiration for the gentleman for his sincerity and his studious attention to the subject.

Mr. BUSBY. I do not want your sympathy. What we need is to find relief for the people instead of having this condition continue.

Mr. GIFFORD. I am not ready to criticize the gentleman because possibly he knows much more than I; and I stand here to-day merely to say to the gentleman that, while I do not pretend fully to understand all the theories of finance, like many others, I am trying to analyze his proposition.

I want to protect the depositors of that $42,000,000,000 who believe that their bank accounts are as good as gold. So long as such confidence remains unimpaired, and we cease to propose highly debatable schemes of inflation which put fear into the hearts of our people and into the institutions which grant credit based on honest money, we have a chance of returning to normal. I will say to the gentleman from Mississippi that these repositories of the people's money have good reason to fear such inflationary measures.

[Here the gavel fell.]

Mr. SHREVE. Mr. Chairman, I yield the gentleman five more minutes.

Mr. GIFFORD. In mentioning the gentleman from South Carolina [Mr. STEVENSON] I wish to say that I have the very highest regard for him, and that I have followed his reasoning in banking legislation with much interest and appreciation. I realize that he is perhaps the best-informed man in the House on these matters. But when he tells us that we should balance the Budget by using the Goldsborough idea of expansion, by having the Federal reserve banks print currency in return for Government bonds at 1 per cent, it is impossible for me to follow him. He says that in these hard times that is the way to balance the Budget and that in good times, when we are making money, we can gradually retire this currency. This, coming from a man like the gentleman from South Carolina [Mr. STEVENSON], is most alarming.

Mr. STEVENSON. Will the gentleman yield?

Mr. GIFFORD. I shall be glad to yield.

Mr. STEVENSON. How are you balancing the Budget now? How has your Secretary of the Treasury been doing it? He has been selling 3 and 4 per cent bonds and getting the money in this way and getting us worse in debt every day.

Mr. GIFFORD. I fully understand; that is why I am worried. The gentleman asks how are we balancing the Budget and answers by saying we are borrowing from the bank and still further tying up and freezing credit. I realize this, but why are we not selling long-term bonds now? Why are we continually going behind and still selling these short-term bonds and still further freezing credit? The gentleman knows, as well as any other man, the very grave danger that we may shortly be in when the banks will not be able to absorb all this credit.

Large corporations with big deposits may soon need this money for the normal channels of trade and commerce. Temporarily, it is about the only safe place for investment. But what of the success of a sale of long-term bonds? At what rate?

Mr. STEVENSON. Since the gentleman has asked me the question, I will say that I think the present administration which let the country get some $4,000,000,000 in the hole will have difficulty in selling them except at a high rate of interest, but I think probably after the 4th of March we may so change the picture that we may be able to refund the big debt which you and you party have put upon us.

Mr. GIFFORD. That is the sort of an answer we get from the gentleman from South Carolina—the political aspect was injected by the gentleman from Maryland [Mr. GOLDSBOROUGH] in his recent speech. Oh, why can we not read a speech by some of these gentlemen, who profess to know all about this difficult subject, which will be devoid of prejudice through the fact that they are of another political party? Show that your inflationary proposition is really sound. Let us hear speeches which do not seem so prejudiced that we can not trust the reasoning therein. In these very serious times we must follow the opinion of those who can think clearly on the proposition of currency expansion.

Mr. BALDRIGE. Will the gentleman yield?

Mr. GIFFORD. I yield.

Mr. BALDRIGE. The gentleman spoke about agricultural credit corporations, and I would like to inform the gentleman that the Agricultural Credit Corporation in the Middle West and in my district has saved hundreds and hundreds of farmers, men who had farms with no stock on them, but through this agency they have been able to stock their farms, which gives them a new lease on life, because the price of cattle is fair to-day. This has been the greatest thing possible for the people of the Middle West.

Mr. GIFFORD. I am glad to have that statement, because they say to us so often that we do nothing for the farmers. We have no agricultural credit corporations in New England, and of the $64,000,000 loaned last year my section of New England borrowed only about $10,000. I am glad to have that testimony, but I repeat that the local bank urges your farmers who owe them to borrow money of this Federal agency to pay off their debts. I can refer you to authorities already recited in the RECORD.

[Here the gavel fell.]

Mr. SHREVE. Mr. Chairman, I yield the gentleman one minute.

Mr. GOLDSBOROUGH rose.

Mr. GIFFORD. I referred to the gentleman from Maryland and I now yield to him.

Mr. GOLDSBOROUGH. I was under the impression the gentleman stated a minute or two ago that my speech of last Wednesday indicated I was in favor of branch banking and the concentration of wealth.

Mr. GIFFORD. Oh, no, indeed. I said nothing of the kind.

Mr. GOLDSBOROUGH. Then I misunderstood the gentleman.

Mr. KELLER. Will the gentleman yield?

Mr. GIFFORD. I yield.

Mr. KELLER. I am very much interested in what the gentleman has said. What is the gentleman going to do about it?

Mr. GIFFORD. I am going to be extremely careful in trying to understand the situation and extremely careful about indorsing these inflationary proposals.

You may say that I know nothing about these matters, but I find that there are other Members of the House who appear to be as uncertain on the subject as I am. I have been taught to believe in sound money and must be convinced as to the merit of these proposals before I can indorse them.

In speaking about the home-loan banks, while I have had to express disappointment I must at the same time commend the care which has been exercised in the original set-up of the institutions. I believe that with respect to the 10 lending agencies which we have established, we should stop carping at them merely because they are largely conducted by members of the Republican Party.

Mr. KELLER. I am not interested in that.

Mr. GIFFORD. We should strive to retain the confidence of our people in these lending agencies rather than urge so many highly inflationary schemes which tend to frighten and hence retard our return to normal conditions.

[Here the gavel fell.]

Mr. STEVENSON. Mr. Chairman, I yield 20 minutes to the gentleman from Alabama [Mr. HUDDLESTON].

Mr. HUDDLESTON. Mr. Chairman, the money plank of the Democratic platform of 1932 is in these words:

We advocate a sound currency, to be preserved at all hazards.

It is said that it is the strongest declaration in behalf of the integrity of our money system ever made by a political party.

It is obvious that the supreme factor in the restoration of normal business conditions lies in the strengthening of confidence. This confidence is not the kind expressed in blind hope or unfounded optimism. It is the kind of confidence that moves a clear-headed citizen to believe that he will be able to conduct his enterprise successfully and with a profit.

Upon a previous occasion I pointed out sound measures which I felt that Congress might adopt, which would tend to produce that kind of confidence. I will not repeat now what I said then.

There is, of course, no magic wand which may be passed over our dormant economic situation to quicken it at once into full activity. Confidence is both a cause and an effect, and necessarily is of slow growth. There can be no full confidence until, through passage of time, the slow processes of construction, thrift, and industry have had a chance in which to operate. Nevertheless, progress can be made, and there is no reason why we should delay doing those helpful things which the Congress ought to do, and which we can do.

As I have said, there are legitimate measures which Congress may adopt for the rebuilding of confidence. There are also measures which Congress may take which would further impair confidence and delay or defeat recovery and neutralize any other beneficial action we might take. Among these measures which might work for evil I know of none which has such dangerous possibilities as the debasement of our money.

EFFECTS OF INFLATION

It is beyond human foresight and wisdom to foretell with any certainty the results of inflation. It is as impossible as to foretell the result of the explosion of a bomb. No man can tell where the pieces may fly. And no man can foretell what particular harm will be done nor, indeed, that any harm will necessarily follow from an inflationary measure. All depends upon conditions.

I have in mind the inflationary measures adopted at the last session, as carried in the Steagall-Glass Act and the Borah amendment to the Home Loan Bank Act. Apparently those measures had no effect, either for good or evil. It is certain that they did not help price levels, as was promised by the inflationists, and that they have not had the tendency to restore business, as they had predicted.

A given amount of fiat money put into circulation at a certain time might not have the slightest effect on prices. The same amount issued at another time might result in a vast inflation of prices. All this relates to the fact that the purchasing power of fiat money, or other money which is supported in whole or in part by the credit of the Government, depends upon faith or confidence. To the extent that the people believe in the financial integrity of the Government, and that the money will be acceptable to others at face value—to that extent it will not increase prices. In the degree that the people lack faith will such money be depreciated in purchasing power, with a corresponding lifting of prices, until finally, if all faith should be gone, the fiat money becomes a worthless piece of paper.

Under given conditions billions based wholly on Government credit might be issued, yet circulate at par without any effect upon prices—then might come a loss of faith and, without the issuance of an additional dollar, the value of that previously issued be extinguished altogether.

"CONTROLLED INFLATION" IMPOSSIBLE

For this reason there can be no such thing as "controlled inflation," if by that phrase is meant the cautious pumping of paper into circulation, all the while watching the effect on prices, and with the intent to suspend the process when prices are raised to a certain level. Operation of the process merely to the effect of slightly stirring prices, though stopped there, might have subsequent effect to seriously impair the value of the money previously issued. There can be no such thing as "controlled" inflation any more than a "controlled" explosion of dynamite.

In forecasting the consequences of inflationary measures we are put to speculation and must rely on probabilities. No prediction of results can be removed from the field of probability. What, then, may we reasonably expect from the issuance of, say, some billions of money based wholly upon the credit of the Government?

First, there is the difficulty of stopping the operation. Though in good faith the intent may be to limit the issue, there is great difficulty, once prices begin to be influenced by the ebbing of confidence, in suspending it. As the value of the money falls, more and more of it is needed to carry on our daily economic life, for, manifestly, $2, with the purchasing power of only $1, will do the work of only $1, so that as the money falls a real lack of money appears. Also, the ease with which obligations may be paid in depreciated money is a constant temptation and an increasing influence to continue in a policy which has been entered upon. There are additional reasons which I will not attempt to state.

Second, once it is recognized that two kinds of money are in circulation—one kind based upon a medium of intrinsic value and good at par in all the markets of the world, and the other based upon faith and good only so long as the Government's credit is sustained—the one good if hoarded away but the other of possibly falling value—there will be an increasing pressure to obtain the first and to convert the latter kind of money. The fiat money will inevitably drive all gold and its equivalents from circulation or to an increasing premium, so that we must rely more and more upon the use of the fiat money, with an increasing lack of faith.

PRICES INCREASE ONLY AS FAITH DIMINISHES

Third, with the diminishing of faith, but only as faith passes, there will be an increase in prices. This increase in prices will occur only when faith has weakened. In the latter stages this increase will represent merely the effort of holders of the depreciating money to buy commodities or to make other investments having a permanent value, before its purchasing power has further diminished or is totally lost. This movement proceeds with increasing velocity until a total loss of value is reached unless in the meantime some measure of restoration or stabilization is adopted.

In the meantime business activities are greatly hampered, if not made impossible. No man with money will make a loan when it appears that he will be repaid in money of less value. No business man will embark on an enterprise when he can not reasonably foresee what standard of value he must operate under. There will be no credit; debts will be progressively wiped out; the chief activity will be in the effort to invest in things which will have a real value when the fictitious value attached to the money shall be gone.

As I have said, these are mere probabilities. They are not even predictions. It can not be said with certainty that either or any of these results will follow, but it must be admitted that any or all of them are possible. This is mere history. The vice of inflation, adulteration, and coin clipping has been often resorted to—always in some degree and to some extent with tendencies toward results such as I have outlined.

MONEY GOVERNED BY LAW OF SUPPLY AND DEMAND

An effort has been made for inflation through open-market purchases of bonds, an effort which has brought into circulation a net of nearly one billion additional money since 1929. But try as they might, those charged with the duty of carrying on these operations have been unable to keep their money in circulation. They have bought the bonds. There was no "demand" for the money. It returned to the source from which it came and was canceled. So that since last July the demand of business for money being so weak there has been a reduction in circulation of above $50,000,000.

Money is governed by the law of supply and demand. I hear men say that there is a great scarcity of money and that there is a demand for money. A shocking error—the demand for money has never in the history of this country been so little as it is to-day. Interest rates, the wages of

money have never been so low. There has never been so little opportunity for men with money to use it to advantage as now. There has never been so little opportunity for men in business to use money in their business as there is now. There is no scarcity of money. The scarcity lies elsewhere. It lies in lack of opportunity for profitable and safe investments.

There has been no deflation of circulation—to the contrary there has been an increase in circulation of $1,000,000,000 since the peak of 1929. I hold in my hand the last report of the Secretary of the Treasury. It shows that the money in circulation in 1929, when business was booming, was $4,746,297,000, or $39 per capita, and that money in circulation on July 1, 1932, was $5,695,171,000, a per capita circulation of $45.63.

And here may I observe that this subject is attended with more fallacies, with more erroneous assumptions of fact and more misinformation than any other public question whatsoever. It is attended with more misrepresentation, more intolerance, more appeals to class and other prejudices, and more unwillingness to listen to reason and fact—this has characterized the inflationists since the beginning of the demand for fiat money in the seventies.

THE CRY OF "DISHONEST DOLLAR"

The inflationists point to the fall of commodity prices and blame it upon lack of money; they call our dollar a "dishonest dollar." When, may I ask, did this culprit dollar turn criminal? Was it in 1920, when prices had been expanded to an index of 154, when men who had loaned 100-cent dollars in 1913 were forced to accept payment in dollars with a purchasing value of only 64 cents? I heard no cry of "outrage" from these gentlemen then.

I know a man who bought a 20-payment life insurance policy in 1892. He paid it off. In purchasing value that policy was worth in 1920 less than one-half of what he had paid for it; and to-day it is worth only about 80 per cent of what he paid for it. When did this dollar turn crooked? "In 1929," they say.

It is an amazing dollar that it should be so discriminating and unequal in its "dishonesty." The price of cotton is on an index of 23 compared to 100 as the average for 1923 to 1925, so that the dollar is 77 per cent dishonest in buying cotton. With wheat on an index of 33 the dollar is 67 per cent dishonest. With agricultural prices generally at 41 it is 59 per cent dishonest; it is only 39 per cent dishonest on nonagricultural products with index at 61, only about 20 per cent crooked on clothing, 30 per cent on iron and steel, and when you reach the item of steel rails it is only 7 per cent dishonest. So this vicious dollar adds to its other crimes the crime of discrimination among its victims.

Is it needed for me to say to any sensible man that the mere recital of these figures demonstrates beyond any doubt that the trouble is not with the dollar but with the prices? The trouble is not with the yardstick, it is with the cloth. Yet the inflationists, blind to the realities, would cut off the yardstick to make it conform to the shrunken cloth instead of taking the course which intelligence would dictate, of trying to deal with the cloth so as to restore it, until what was formerly a yard would again become a yard. The course of intelligence now is not to debase our money, which is merely a measure of value, but to do something to restore prices. And there are legitimate measures which may be taken to restore prices and place them on a basis of fair equality, but none of these have they yet been able to see or, if able to see, have they chosen to advocate.

LEGISLATION FOR THE DEBTOR CLASS

The inflationists say frankly that they want to do something for the debtors of the country, and they point to the fact that the average price for farm produce which used to sell for a dollar is now only 40 cents; that debts were incurred with prices upon the former level which it is unfair to require to be paid with prices upon the lower level. They see in that a reason why we should water down the dollar, with the view to raising the price of commodities.

In logic, any effort to depreciate the purchasing power of money would operate equally upon all commodities. If by inflation the value of the dollar is reduced to 50 cents so as to lift the price of cotton 100 per cent so that it will reach an index of 46, in logic it will lift the price of wheat to 66, agricultural products generally to 82, nonagricultural products to 122, and steel rails to 186. This will leave the farmer in exactly the same position and suffering from the same inequality of prices as he now is.

But bear in mind that the farmer who is not in debt is suffering now not so much from price deflation as from the inequality of the deflation. And bear this also in mind: This inequality of price levels is due to the unsheltered position of the farmer and other producers of raw material, whereas the industrial and other interests have been able to shelter themselves behind protective tariffs, monopolies, oppressive trade practices, and all that other collection of means whereby they are able to evade the laws of supply and demand.

They have had the strength of position to protect themselves behind those bulwarks. If you inflate our money to a point as would double the farmer's price, the likelihood is that because of the weakness of his position, he would be unable to realize the full advantage of the increase; it is rather unlikely that he would be able to cash in on the debased money and get the benefit that was coming to him. But as to those interests which are protected, having the strength of the position which has enabled them to resist deflation, it is certain they would be able to get their full measure in the increase in prices. It would be expected in that situation that the farmer would not be able to get up to his inflation index of 82, but that the price of the producer of steel rails, having a monopoly, would be lifted to the full limit of 186 contemplated by the program, and that other industrial prices would be lifted on a corresponding scale. The result would be that the farmer would be still further victimized and his relative position made worse.

The movement for inflation is frankly a debtor's proposal. The idea is to take governmental action which will make it easier for the debtor to pay his debts.

I protest that such a purpose is intolerable. I am unwilling to legislate for any particular group, be they either debtors or creditors. It is intolerable that we should deliberately juggle with our money system to benefit any selfish interests, and the debtors are just as selfish as the creditors. The part of statesmanship is to legislate for all the people and for the common good, and not in behalf of any group or class.

I have in mind the prudent, thrifty citizen whose interests, either as debtor or as creditor, are not paramount, and I want to protect him. He has his rights, and I would defend him in them. I am unwilling that he should be crushed and his future jeopardized and probably destroyed through class legislation on behalf of either of these interested groups of debtors or creditors.

WHO ARE THE DEBTORS—WHO THE CREDITORS?

I wonder if the champions of the debtor class realize just whom they represent. Do they know who are the debtors and who are the creditors? Perhaps an analysis of the figures would be of some help. The total public and private debts in the United States are, in round figures, $200,000,000,000. Of this the Federal Government owes about $20,000,000,000; States, counties, and cities, $14,000,000,000; railroads, utilities, and other industrial groups, $50,000,000,000; farm mortgages, $9,000,000,000; city mortgages, $27,000,000,000; banks, $47,000,000,000. Insurance companies have $110,000,000,000 in policies, representing a present cash liability of $16,000,000,000. Of course, there is some duplication in these figures.

The biggest item of private debts are those of railroads and other industrial groups, with an aggregate, as stated, of $50,000,000,000. Generally speaking, the higher we go in the financial world the greater is the burden of debt. If we should divide the population into two groups, one composed of the 10 per cent composing the capitalist class and the other of the 90 per cent constituting the masses of the people, it will be found that the latter include a relatively larger percentage of the creditor class.

I have in mind not only the millions of bank depositors and of holders of insurance policies and other credits, small as to each but aggregating a vast total, but also some 3,000,000 recipients of veterans' relief and insurance, industrial pensions, and similar payments, and another 3,000,000 or more of minor public employees, many of whom have already had drastic cuts in pay. I also have in mind that each wage earner with a job is in real effect and substance a creditor who receives upon each pay day an installment of his debt, and recognize that ingenuity could not devise a more wholesale raid upon wages than through an inflation which would reduce real wages, the purchasing power of the workers' money. It is quite true that most individuals are both debtors and creditors; in classifying them I have taken their chief interest into account.

It is rather strange to find some of the ardent advocates of cash payment of the soldiers' bonus also championing the cause of inflation. They are insisting upon payment of the bonus and upon reduction in its real value at the same time. Some of them are also active in opposition to reductions in veterans' pensions and in wages of Government employees—yet at one blow they would reduce the Government's ability to pay and the real value of the pensions and salaries paid.

"Friends of labor" are found insisting upon inflation and at the same time upon high wages. They would extend the shadow but withdraw the substance, hold nominal wages up yet cut real wages down by reducing the purchasing power of the worker's pay. At the same time, their action would not provide a single additional job, but in all probability, by paralyzing business activities through destruction of confidence, take away even the jobs which yet remain.

I note among the advocates of inflation some who have distinguished themselves as supporters of relief for the unemployed, the poor, and others in distress. The effect of their proposal for inflation would be to take away from these starving beneficiaries a part of even the little which they are now receiving.

INFLATION IMPAIRS STABILITY, THE ESSENCE OF CONFIDENCE

There is no lack of money in circulation. There is merely a lack of velocity in the movement of money. A dollar changing hands once a month is $1, changing hands once a day it is $30. This lack of velocity is due largely to lack of opportunity for safe and profitable investment. Fundamentally, the lack is of confidence of the kind which I have described. There is hoarding, but this also is due to lack of confidence and to lack of opportunity for the profitable use for money. The crying need is for more confidence, yet the inflationists would further impair the economic stability, which is the essence of confidence, and take away even that little which yet remains.

To sum up, the gold standard is not at fault; there is plenty of gold upon which to transact the world's business; the world's money gold stock was $11,072,370,000 in 1929; it had increased in 1931 to $11,940,606,000; as relates to gold, the trouble lies in the inequality in which it is held by the nations. We have plenty for all purposes.

The amount of money in circulation is ample. There is a serious shortage of credit. Credit has been deflated some $25,000,000,000, of which $12,000,000,000 is in bank credit alone—a deflation due to lack of confidence plus lack of demand. Potential borrowers have been unable to find safe investments; potential lenders can not find safe loans; creditors, losing faith in their debtors, have been pressing for collection.

Of course, restoration of confidence, however strong, is not alone sufficient for business recovery. It must be accompanied by "business opportunity." Our fundamental trouble is with distribution, now snarled with multiplied barriers to the free play of commerce and to the operation of the laws of supply and demand.

I close by saying this: You have read history. The adulteration of money once entered upon never knows where to stop. The adulteration of money is the first step toward revolution. You have read the story of the French Revolution. It is unnecessary for me to point out to you that its real cause was economic and that it arose out of the progressive debasement of money. It broke when the printing of paper money had progressed to the point that it had no purchasing value and the masses were starving. Beware! [Applause.]

The CHAIRMAN. The time of the gentleman from Alabama has again expired.

Mr. SHREVE. Mr. Chairman, I yield 10 minutes to the gentleman from Ohio [Mr. MURPHY].

Mr. MURPHY. Mr. Chairman, I ask unanimous consent to revise and extend my remarks and to insert some testimony which I gave before the Committee on Ways and Means when that committee was considering the tariff bill of 1930.

The CHAIRMAN. Is there objection to the request of the gentleman from Ohio?

There was no objection.

Mr. MURPHY. Mr. Chairman, we are making history fast. To-morrow a subcommittee of the Committee on Ways and Means will hold hearings to try to find some way to take care of business that is being ruined in America by reason of the depreciated currency used in more than 30 countries of the world, sending merchandise into the United States to compete with our merchandise, produced under the gold standard. I hope the membership will all take notice and attend that meeting, because it is intended to correct, if possible, a situation that it seems to me could be more easily taken care of if the Members of Congress could get together on a policy to take care of America first.

One of the great newspaper publishers of this land has undertaken to create sentiment in this country to help the people to help themselves. He has adopted a slogan of "Buy American." A few short weeks ago all the great business minds of the British Empire were assembled in the city of Ottawa, Canada. They were called there to discuss the question of the condition of the times in the Empire. While there they mingled their ideas, and their best brains clashed in trying to strike fire and find something that would be helpful to the people who lived under their flag. Out of that great conference came the little slogan "Buy British," and all throughout the great world to-day, where the British flag flies, great electric signs are flashing "Buy British."

Well, when folks do not stop long enough to think for themselves, then it is worth while to copy ideas from those who have taken the time to think. The British people did take the time to think, and out of the combining of their thoughts has come that slogan "Buy British." Now, our great American newspapers have taken up the slogan "Buy American." Already this propaganda is having its effect. One of the newspapers in my district published a story the other day of the annual sales meeting of the pottery and glass manufacturers in this country, held in Pittsburgh the first of this month. The article stated that the foreign buyers of the chain stores and the great importing houses were in attendance at Pittsburgh, and they said they were not going to go abroad to buy this year, and that they were ridding their shelves of foreign-made goods just as rapidly as they could, to the end that they would not get stuck because of the awakening of the American people to helping themselves by "buying American."

So, on Saturday next there is to be a hearing before the Tariff Commission. The purpose of that hearing is to try to find the very best ideas of the people of our country with reference to finding some way to stop imports into this country under world conditions as they are to-day.

Before the Ways and Means Committee in the last few years hearings on American valuation have been held. I think the current tariff law has a couple of paragraphs with reference to American valuation. I think there is a provision there which says that when the President exercises his right to add 50 per cent to the tariff now existing and that does not effect a cure of the trouble, then a way can be found to use American valuation. They are using the American valuation in the chemical industry in the United States to-day, and if we had the American valuation of all imports that come into this country, if we could take merchandise

made in Czechoslovakia and put it on the table here and put on the other side of the table the same grade of merchandise manufactured in the United States and then say to the importer: "This piece of merchandise manufactured in the United States costs so much to manufacture; that shall be the value of this piece of imported merchandise."

We would not need a high tariff if we had American valuation at the port of entry, because then we could reasonably figure out just what the costs would be. Deflated currency, or depreciated currency, would have no worries for us if we had American valuation. Yet to-morrow we are going to have hearings on depreciated currency.

We have just finished listening to one of the greatest addresses made in this House in years, by the gentleman from Alabama [Mr. HUDDLESTON], on inflation. I am going to get copies of that speech and send one to every manufacturer and every banker in my district. It will give him something to think about. We might as well begin thinking now of America first. We had better buy American and we had better put American valuations on all imports that come into America. Then we can lower the tariff walls, because we will all have an equal chance at the American market, at the starting point. As it is now, a merchant buys a shipload of merchandise from Czechoslovakia, and another one loads with ware from France, another loads with ware from England, and they all set sail to America. The conditions surrounding the production of each piece of merchandise they carry to this the greatest market on the globe are all different, but if they were valued here at the market to which they are sent according to the cost of production of similar articles here, plus a reasonable tariff, then our wheels would again turn and the music of the hum of industry would be the sweetest song the laborer could bring home to his family, and we would again prosper.

I hope everyone within the sound of my voice will give this subject some thought, and when they do I do not fear the verdict. I thank you. [Applause.]

Mr. Chairman, I yield back the balance of my time.

Mr. SHREVE. Mr. Chairman, I yield 15 minutes to the gentleman from Maine [Mr. BEEDY].

Mr. BEEDY. Mr. Chairman, on the 6th of this month the House passed what is now known as the Howard resolution. That resolution, as you know, makes it compulsory upon the Reconstruction Finance Corporation to make public all the loans which it has made from its inception. That resolution was reported by the Committee on Banking and Currency of the House—without my vote, let me say. I understand that the Speaker of this House told the chairman of that committee that if the resolution were not reported he would recognize the gentleman from Nebraska under the rule which makes such resolutions privileged.

Mr. STEVENSON. Now, will the gentleman yield?

Mr. BEEDY. I yield.

Mr. STEVENSON. Was it discretionary? The rules of the House made it absolutely privileged on the day when it was called up, and the Speaker certainly would have violated the rules of the House had he refused recognition to the gentleman from Nebraska.

Mr. BEEDY. That is my understanding of it, and that is what I thought I said. If I did not make it clear, I am glad the gentleman from South Carolina has.

From the first I have felt, and I am now very firm in my conviction, that that resolution will be instrumental in undoing much of the very helpful work which has thus far been accomplished by the Reconstruction Finance Corporation. I am one, I think I may say, who has a great deal of tolerance for another's point of view. I have lived just long enough to find that many conclusions at which I have arrived are not right. Therefore, with an open mind at all times, I try to get the other fellow's point of view.

I have tried to understand the point of view of the gentleman from Nebraska who introduced this resolution, but I confess myself at an utter loss to do so.

I take this opportunity to say just this to the committee: The Reconstruction Finance Corporation is altogether bipartisan in its make-up. The president of the corporation told me to-day that if there were an irresponsible member on the board he did not know it; he told me that he is seriously disturbed by the passage of the Howard resolution.

Presently, within a few hours I understand, the Reconstruction Finance Corporation will comply with the mandate of this resolution. I do not know what may be the consequences. I sincerely trust that the destructive consequences which have already followed the publication of the first list by the Clerk of the House will not follow upon the publication of this list which will include all loans made from the beginning of the corporation's operations. I want to cite you one or two illustrations of what happened when the first list was published.

Mr. COCHRAN of Missouri. Mr. Chairman, will the gentleman yield?

Mr. BEEDY. I yield.

Mr. COCHRAN of Missouri. I was going to ask the gentleman to enumerate those destructive consequences.

Mr. BEEDY. Yes; I will.

Mr. COCHRAN of Missouri. Let me say to the gentleman that the corporations out in my city, St. Louis, do not seem to wait for the report to be made to the House. They are announcing to the public the fact that they borrowed money. One insurance company borrowed $6,000,000. There has been no destructive consequence as a result of that announcement.

Mr. BEEDY. I think if I had anything to do with the management of a bank, or an insurance company, or a railroad which had borrowed from the Reconstruction Finance Corporation I would rather make the announcement myself than to be left in the position of having the Government disclose the facts.

My attention was called recently to the case of a small bank which some time ago had occasion to go to the Reconstruction Finance Corporation for a loan.

The report had been spread that the bank was unsound. A serious run on the bank was in progress. The Reconstruction Finance Corporation lent that bank $17,000. The gentleman from Alabama [Mr. BANKHEAD], whom I see before me and for whom I have as high respect as for any other Member in this House, may perhaps know about this bank. I am informed that the bank in question is in the gentleman's own State. The Reconstruction Corporation loaned the bank $17,000. The bank immediately proceeded to assure depositors that they could meet any demands and the fear of immediate failure was destroyed. The bank proceeded in the course of its normal business. But, suddenly, the first list of Reconstruction Finance Corporation loans was published by the Clerk of this House and this little bank was listed as having borrowed $17,000. Two days later a run was started upon the bank, which resulted in its failure with the attendant losses to hundreds of poor people in the community.

Now, what has happened to some of our insurance companies? As you know, insurance-company funds are invested in real-estate mortgages, but, more generally, I take it, in good bonds, the best that can be purchased in the market; but with this fall in prices that is upon us, the market value of all these securities has shrunk while demands for loans by policyholders have increased. Thus a heavy strain has been put upon many insurance companies. After this first list of borrowers, to which I have made reference, was published we find that some insurance companies took advantage of the situation presented. They have advertised that they are sound, that their policyholders need have no fear, that they have never had recourse to the Reconstruction Finance Corporation, and thus the strain and pressure upon other companies has been increased.

The whole purpose of the Reconstruction Finance Corporation, as you know, was not to make loans to individuals

in extremities, but by making loans to banks, to railroads, and to insurance companies, to preserve our national credit structure in order that a succession of bank failures might be arrested and losses occasioned to thousands and thousands of poor depositors might be stopped. Much good has been accomplished.

But we are living in an era of fear, suspicion, and apprehension. Fear is a great force with which we are unable to deal in this day of many troubles, and I suspect that the publication of this list of all borrowers from the Reconstruction Finance Corporation will only give added power to the fear which is even now upon us.

I do not know what the motive back of the sponsorship of the Howard resolution may have been. I do not doubt that when this corporation finally renders a full account of its dealings it will be found that some loans reflect errors in judgment. It would, indeed, be most remarkable if such were not the case. However, I doubt if this corporation, administered by outstanding men in both parties, will ever have been found to do anything that is irregular. If the sponsors of this resolution believed such to be the fact, the wrong could be reached very easily without the Howard resolution. If anyone connected with the management of the Reconstruction Finance Corporation has done anything criminal, we can make our investigation, secure the evidence, and punish the wrongdoer.

If anybody has done anything irregular and not amounting to a crime, we can and should impeach him. The men who are to-day sitting upon the board would welcome any investigation that this Congress may see fit to make. I know this to be a fact. If there is any irregularity that is suspected, they want us to look into it, so that they may be absolved even from innuendo and unjustifiable inference.

Mr. Chairman, there is nothing wrong with these loans. I have faith to believe that such is the fact. I regret that the passage of the Howard resolution should have been made a party issue and that the Reconstruction Finance Corporation, which both great parties in the Nation, which men sitting on both sides of this aisle joined hands to set up in an hour of national extremity, is now facing a situation pregnant with possibilities for the destruction of helpful results which it has worked.

Mr. RICH. Will the gentleman yield?

Mr. BEEDY. I yield.

Mr. RICH. I quite agree with the gentleman that it is going to create fear and is liable to do a lot of injury to the banks that have borrowed money from the Reconstruction Finance Corporation. Can the gentleman tell me any good that can come from the publication of this list of borrowers?

Mr. BEEDY. No; I have said that I am at a loss to see any possibilities for good, and I have tried honestly to understand what good public purpose might be served by the provisions of the Howard resolution. I trust I am not bigoted in my views. I wish some Member on either side of this aisle would tell me what good he thinks will come of it.

Mr. RAGON. Will the gentleman yield?

Mr. BEEDY. I yield.

Mr. RAGON. I am in thorough sympathy with what the gentleman is saying. I, however, disclaim, so far as I am concerned, any partisanship in the matter. I have talked the matter over with some Members here who seem to think that the passage of the resolution was in conformity with the institutions of a republican form of government and that the people have the right to know what is done with their money. In normal times this may be correct, but as I see it, the Reconstruction Finance Corporation, in its creation and in its functions, is evidence of abnormal times, and certainly you can not have any restoration to normalcy as long as you do things that stir up this fear that the gentleman has been talking about.

Mr. BEEDY. I think the gentleman is correct.

Mr. RAGON. I suggested to one of these gentlemen the other day—in fact, to the author of the resolution—that I thought if they would simply stop at making the facts available to Congress and the Members thereof they would certainly be going far enough.

Mr. BEEDY. That might serve the purpose.

Mr. RAGON. But I am against broadcasting the information as has been done. I am sorry I have had to disagree with some of my friends, but I think it is one of the most injurious things that has ever happened to this country in the present situation.

[Here the gavel fell.]

Mr. OLIVER of Alabama. I yield one minute more to the gentleman, and I wish to say that I share the views expressed by the gentleman from Arkansas [Mr. RAGON].

Mr. BEEDY. Knowing the caliber of the gentleman from Alabama, I would expect him to make the statement he has. The gentleman is one of the students of this House and one of the fairest men on the floor. This, I may say, is also true of the gentleman from Arkansas [Mr. RAGON].

Mr. COCHRAN of Missouri. Will the gentleman yield?

Mr. BEEDY. I yield to the gentleman.

Mr. COCHRAN of Missouri. The gentleman says that he has confidence in the Reconstruction Finance Corporation——

Mr. BEEDY. Yes; particularly in its personnel.

Mr. COCHRAN of Missouri. The gentleman knows that the Reconstruction Finance Corporation has not loaned a dollar except they have sound collateral back of the loan.

Mr. BEEDY. The law provides that no loan shall be made except on "adequate security." That is a flexible term. Men may well differ as to what constitutes adequate security but ultimately all the operations of this corporation will be reported to Congress. That is consistent with what the gentleman from Arkansas has referred to as the spirit of a republican form of government. When the present crisis has passed and normal days return the act which gave life to this corporation will compel a full report of its actions to this House and the country. Nothing will be withheld. That is as it should be. The Howard resolution serves no useful purpose. It may prove harmful. It operates in a poor field for political gesture.

Mr. COCHRAN of Missouri. Does not the gentleman think it would be better for the gentleman from Maine to come in here and tell the country that there is no reason for the people of this country to fear because the Reconstruction Finance Corporation has loaned any institution money than it is for him to come here and make the speech that he has, which might create fear?

Mr. BEEDY. Well, I had not finished my speech, but the gentleman has helped to finish it for me.

Mr. BARBOUR. Will the gentleman yield?

Mr. BEEDY. I yield.

Mr. BARBOUR. Is it not a fact that a committee of the Senate has investigated the Reconstruction Finance Corporation and has found nothing irregular?

Mr. BEEDY. That is a fact. I now reiterate my faith in the Reconstruction Finance Corporation and its personnel. I am saying what I have in the hope that a message will go out through the press that the people should have no fear when this list of borrowers is published. We are passing over the great depth of this depression courageously and with a fortitude which becomes a great nation. We shall soon begin to ascend the ladder of world recovery. I trust that the publication of the names of borrowers from the corporation which we created in an emergency to meet abnormal needs will be received with that reasoned calm and firm faith which should characterize every citizen who would serve rather than injure his country.

Mr. RICH. Will the gentleman yield?

Mr. BEEDY. Yes.

Mr. RICH. Would not it be just as sensible for this Congress to request that the national banks make their loans to individuals a matter of public record as it is to require the Reconstruction Finance Corporation to make public the loans that they grant?

Mr. BEEDY. That is a view which might be taken by many. Of course, national banks loan the money of their

stockholders, while the Reconstruction Finance Corporation is loaning public money.

Mr. WHITE. Will the gentleman yield?

Mr. BEEDY. I yield.

Mr. WHITE. Is the bank in any worse position borrowing from the Reconstruction Finance Corporation than it was two years ago borrowing from a great bank in New York, except that they are borrowing from an institution controlled by the Government?

Mr. BEEDY. Most of the institutions which have borrowed from the Reconstruction Finance Corporation are undoubtedly in much better shape to-day than they were a year or two ago, because many of the securities on which they borrowed from the Reconstruction Finance Corporation have appreciated in value. In many cases the securities on which they borrowed have appreciated to an extent that has made possible the full repayment of the loans.

Mr. HOPE. Mr. Chairman, will the gentleman yield?

Mr. BEEDY. Yes.

Mr. HOPE. These banks, of course, can rediscount paper with the Federal reserve banks and through the Intermediate Credit Corporation, and some of them are doing it. Is there any more reason why the Reconstruction Finance Corporation should publish its loans to these banks than that the intermediate credit banks or the Federal reserve bank should?

Mr. BEEDY. If we applied the principle of the Howard resolution to the banking operations of the Federal reserve system, we could not continue business in this country with any assurance of continued progress. Business in general and individuals as such have a right under any decent government to a reasonable degree of privacy in the conduct of their affairs.

Mr. RICH. I know of a bank in my district that has borrowed money from the Reconstruction Finance Corporation which they did not need. They did not need the money, except that they are glad to be fully prepared against even the possibility that there might be people who would want to take out their deposits. They do not need the money in their vaults.

Mr. OLIVER of Alabama. Mr. Chairman, I yield 10 minutes to the gentleman from Texas [Mr. PATMAN].

THE PUBLIC ENTITLED TO KNOW HOW PUBLIC FUNDS EXPENDED

Mr. PATMAN. Mr. Chairman, I can not agree with the gentleman who has just said that the expenditures made by the Reconstruction Finance Corporation should not be made public. I think all public expenditures should be made subject to public inspection. Secrecy is the badge of fraud, and not only should the expenditures made by the Reconstruction Finance Corporation be made public, but income-tax returns should be made public, as they are in many of the States of the Union to-day. Were that true, I suspect that the Budget would not be so much unbalanced as it is.

EXPANSION OF THE CURRENCY

I want to say a few words about expansion of the currency. I listened with interest to the remarks made by the gentleman from Alabama [Mr. HUDDLESTON]. He made a very interesting talk, but it was based upon conclusions that I do not concede are warranted. The first conclusion was that there is no demand for money in the United States to-day—that the demand is lower than it has been in many years. The second conclusion is that our trouble is not with money, but that it is with the price of certain commodities. It is my opinion that prices are fixed not by reason, necessarily, of the supply and demand of a particular commodity, but are determined as well by the supply and demand of the American dollar. I believe there is a strong demand for dollars at this time. Whenever you make dollars scarce, you make dollars high, and whenever you make dollars high you make everything else cheap, except debts, taxes, and certain fixed charges, including electricity, gas, water, telephone and telegraph, and railroad freight and passenger rates, and other commodities or services where the prices are fixed. Everything else goes down automatically in price as the purchasing power of the dollar goes up.

HOW PRICES CAN BE INCREASED

If you inflate credit, or money, you increase the price of certain commodities like wheat, cotton, hogs, and so forth. If credit is paralyzed and is not working, money can be put into circulation, which will increase the price of these certain commodities, where the prices are not fixed. It will not increase debts or taxes; it will not increase the interest charges or the railroad rates or the telephone and telegraph and electricity and gas and water rates or any of those fixed charges. None of them will be affected.

GOLD TRANSFERRED TO BANKERS

A few days ago England paid the United States $95,000,000 in gold on a war-debt installment. Ordinarily that gold would be sent to this country, and if we carried out the policy that this Congress adopted many years ago we would use every dollar of it to issue $2.50 in money by the Treasury of the United States, and use that money to pay Federal employees or for any other purpose. It would have a coverage of 40 per cent in gold. That was not done. Not a dollar of it will be used for expansion in this country; and only yesterday I heard the Secretary of the Treasury admit that they have already sold England $25,000,000 of that gold back. They are not even going to bring it to this country, and $25,000,000 more of it is earmarked and I venture to say will never be brought to this country. Every dollar of new gold, instead of using it to expand our currency as this Congress has endorsed many times, is transferred to the Federal reserve system, and the Federal reserve system uses it to issue credit which the people must pay interest on to the amount of $33 to every $1 in gold. You might just as well put more idle box cars on a railroad and expect more commodities to be transported over that railroad as to expect business to pick up if we put more idle dollars into the hands of people who do not use those dollars. For that reason the money issued under the Glass-Borah amendment and the Glass-Steagall bill will not reach the people. It will go to banks that already have plenty of money.

SECRETARY MILLS FIAT MONEY ADVOCATE

I heard the Secretary of the Treasury Monday morning before the Banking and Currency Committee advocate the issuance of fiat money. He is the same gentleman who went all over this country last summer and fall talking about fiat money and rubber dollars and using such terms as that against those of us who want to go back to the Constitution and back our money with gold and let the Treasury issue it, comes out now and advocates the issuance of fiat money. He wants the money issued on the credit of the Nation to a few favored banks. It is all right, if he can dictate who will get the money, it is not fiat, according to his version. He was advocating the passage of the Glass-Steagall bill, which is worse than a fiat-money scheme, a scheme that was denounced by the Democratic Party in 1900; one that permits money to be issued on a Government debt. He advocated bond-secured currency. Mr. Mills believes, evidently, that no money is fiat that the few powerful bankers will get, but all money that is proposed to be furnished to the people is fiat. That is his test.

GLASS-BORAH AMENDMENT

If this money is issued, as Mr. Mills would like for you to issue it, and as he advocated before the Banking and Currency Committee of the House Monday, January 23, 1933, it will go to certain large institutions. You can not escape that. Under the Glass-Borah amendment on the home loan bank bill, a few banks can deposit a billion dollars in Government bonds drawing 3⅜ per cent, and get $1,000,000,000 in money, except 5 per cent, which remains as a reserve, and at the same time they use the money they get interest on the bonds. Under that bill the Chase National Bank of New York can get $148,000,000 and the National City Bank of New York $124,000,000, or a total of $272,000,000. Under the Glass-Steagall bill, which Mr. Mills advocates, it is fiat money, if we use Mr. Mill's definition of the term "fiat money." These two New York banks will not be restricted to

$272,000,000, but may obtain an unlimited amount of money by depositing Government bonds to secure it. It is a big racket.

MR. MILLS FOR INFLATION

Last year he said that kind of money was fiat money. He referred to it as rubber money. I believe he is in sympathy with a certain kind of inflation. Yes; the kind of inflation that inflates the purchasing power of the dollar. In 1929 the dollar would purchase probably about the right amount of certain commodities. Had it remained that way everything would have been well and good, but by changing our economic system and order, by the contraction of currency and credit, commodities went down while money went up in purchasing power. What we are hoping and trying to do is to just restore that money to its normal purchasing power.

FARMERS AND WAGE EARNERS PAY TWO TO FOUR DOLLARS FOR EVERY ONE BORROWED

People voted bonds on themselves to build schoolhouses and highways and make other public improvements when wheat was a dollar a bushel and cotton 20 cents a pound. Now it takes four times as much cotton or wheat to pay these debts as it would have when the debts were contracted. Wage earners, giving their notes for automobiles, homes, furniture, and for other things which they purchased in 1929, have had their wages reduced more than 50 per cent. Today, instead of paying $1 on debts, they are paying the equivalent of $2 for every one they contracted to pay, in the only thing they have on earth to pay with, their own labor. Instead of paying 10 per cent as most of the installment contracts provide for they are paying the equivalent of 20 per cent interest. Instead of paying the same rate for electricity, gas, water, telephone, railroad rates, and other fixed charges, they are paying the equivalent of twice as much. [Applause.]

The CHAIRMAN. The time of the gentleman from Texas has expired.

Mr. OLIVER of Alabama. Mr. Chairman, I yield five minutes to the gentleman from North Carolina [Mr. BULWINKLE].

Mr. BULWINKLE. Mr. Chairman, we have heard a great deal in this Congress about the economic plight the Government and the people of the United States are in. History always repeats itself and there is nothing new under the sun. In the House of Representatives 109 years ago in March these words were uttered by one of America's great statesmen, which are nearly identical with the present-day statesmen:

> In casting our eyes around us, the most prominent circumstance which fixes our attention and challenges our deepest regret is the general distress which pervades the whole country. It is forced upon us by numerous facts of the most incontestable character. It is indicated by the diminished exports of native produce; by the depressed and reduced state of our foreign navigation; by our diminished commerce; by successive unthreshed crops of grain, perishing in our barns and barnyards for the want of a market; by the alarming diminution of the circulation medium; by the numerous bankruptcies, not limited to the trading classes but extending to all orders of society; by an universal complaint of the want of employment, and a consequent reduction of the wages of labor; by the ravenous pursuit after public situations, not for the sake of their honors and the performance of their public duties but as a means of private subsistence; by the reluctant resort to the perilous use of paper money; by the intervention of legislation in the delicate relation between debtor and creditor; and, above all, by the low and depressed state of the value of almost every description of the whole mass of the property of the Nation, which has, on an average, sunk not less than about 50 per cent within a few years. This distress pervades every part of the Union, every class of society; all feel it, though it may be felt at different places in different degrees.
>
> It is like the atmosphere which surrounds us—all must inhale it and none can escape it. In some places it has burst upon our people without a single mitigating circumstance to temper its severity. In others, more fortunate, slight alleviations have been experienced in the expenditure of the public revenue and in other favoring causes. A few years ago the planting interest consoled itself with its happy exemption; but it has now reached this interest also, which experiences, though with less severity, the general suffering. It is most painful to me to attempt to sketch or to dwell on the gloom of this picture. But I have exaggerated nothing. Perfect fidelity to the original would have authorized me to have thrown on deeper and darker hues. And it is the duty of the statesman, no less than that of the physician, to survey with a penetrating, steady, and undismayed eye the actual condition of the subject on which he would operate; to probe to the bottom the disease of the body politic if he would apply efficacious remedies.

Those were the words of Henry Clay on March 30, 1824, 109 years ago.

Then, again, in the thirties, 100 years ago, twice we had the same statements. The same speeches that are made here to-day were practically made then by those who could see nothing in the future, and yet America has withstood it; and America will withstand it because the hearts of the people are sound. [Applause.]

I yield back the remainder of my time, Mr. Chairman.

Mr. OLIVER of Alabama. Mr. Chairman, I ask unanimous consent that I may insert as a part of my remarks two statements furnished me, at my request, by the Director of the Bureau of Prisons, with reference to articles published in certain newspapers as to preferential treatment accorded Al Capone at Atlanta prison. These statements which I will insert show the falsity of the published articles.

The CHAIRMAN. Is there objection to the request of the gentleman from Alabama?

There was no objection.

The matter referred to is as follows:

DEPARTMENT OF JUSTICE,
BUREAU OF PRISONS,
Washington, January 24, 1933.

Hon. WILLIAM B. OLIVER,
House of Representatives, Washington, D. C.

DEAR MR. CONGRESSMAN: Lee E. Molnar, the author of the articles appearing in a chain of newspapers with reference to preferential treatment to Alphonse Capone, was released from the Atlanta Penitentiary on January 16, 1933, having completed a term of three years for impersonating a Government officer. Molnar's record is as follows:

As Leopold Wood, jr., No. 17074, received at Ohio State Reformatory, Mansfield, Ohio, September 19, 1924, from Cuyahoga County, Ohio, to serve indeterminate sentence on charge of robbery. Paroled November 13, 1926.

As Lee Woods, arrested in Akron, Ohio, January 16, 1927, charge B. and L. Held to grand jury under $2,500 bond. Indicted February 11, 1927. Indictment nolled September 11, 1927.

As Joe Molner, arrested in Akron, Ohio, July 9, 1929. Charge: Investigation. Released.

As L. E. Molner, received United States penitentiary, Atlanta, Ga., October 30, 1930, from Philadelphia, Pa. Crime, impersonating United States officer; sentence, three years.

This discharged prisoner came to the office of the Bureau of Prisons on Saturday, January 21, 1933, making demands for certain money allowances which had not been granted to him at the penitentiary. He intimated that he had something to tell and that he would go to the newspapers and disclose these facts unless certain things were done for him. Of course, any such offer was refused; and two days later the article appeared.

The warden at the Atlanta Penitentiary has categorically and specifically denied all of the statements made as to extra privileges being given to Capone. On orders from the Department of Justice he has been treated as has every other prisoner, and any statements to the effect that he has had special clothing, special privileges, or special treatment are said by the warden to be false in their entirety.

Yours very truly,

SANFORD BATES, *Director.*

DEPARTMENT OF JUSTICE,
UNITED STATES PENITENTIARY, OFFICE OF THE WARDEN,
Atlanta, Ga., January 24, 1933

DIRECTOR BUREAU OF PRISONS,
Department of Justice, Washington, D. C.

DEAR SIR: I wish to call attention to charges made by ex-convict No. 35503, who claims to have been released from this institution January 28, 1932, that Al Capone, register No. 40886, is receiving special privileges in this institution. Answering the charges made I beg to advise as follows:

First. Is he permitted to go out of the prison at night?

No. This statement is absolutely false. He has only been out of the prison twice since his incarceration here May 4, 1932, and then to the United States court in Atlanta.

Second. Does he keep up a voluminous business correspondence?

No. No more than the regular prisoners. He has asked for only one special letter since his arrival.

Third. Does he go to his job an hour or two late and then hang around?

No. He is absent from his work only on the doctor's orders when taking a course of treatment as outlined in report of the chief medical officer, Public Health Service, copy of which is inclosed.

Fourth. Does he have special hours on the tennis court?

He has 30 minutes per day, the same as the other men; that is, from 3.25 to 3.55. During this time he can select his own exer-

cise—pitching horseshoes, indoor baseball, tennis, or walking, as he chooses.

Fifth. Does he ever spend the nights in the hospital?

He has been committed to the hospital on orders of the doctor twice.

Sixth. Does he have extra visits without a guard?

Positively no. On account of reports that his friends would probably try to smuggle money and guns to him, we have not been permitting his interviews to be held with other prisoners, but each interview is held in the presence of an officer and where his movements could be watched and his conversations clearly heard.

Seventh. Does he sometimes eat alone?

He eats his meals along with the other men in the regular dining room.

Eighth. Is he permitted the use of all the money he wants to buy special articles from the commissary?

He can only spend $10 per month in the commissary. His account shows that he has withdrawn $97 since May 4, 1932. This covers $10 per month with the exception of December, when $5 extra is granted all prisoners, and he spent $2 in returning his clothing and a package to his home.

Ninth. Did he have a special brand of cigars put in the commissary?

No. He has never made such a request.

Tenth. Does he wear silk underwear?

No. This has been verified by his foreman and the medical officer in the United States Public Health Service, the foreman stating that he has noticed his underwear from time to time and also noticed it this morning and that he had on the regulation underwear. The medical officer states that he has had occasion to strip him for examination, and he also states that he wears regulation underwear.

Eleventh. Does he wear special tailor-made suits?

No. This is verified by his foreman, the deputy warden, and the medical officer United States Public Health Service.

Twelfth. Does he wear $25 shoes?

No. His foreman in the shoe shop says that he is wearing the regulation shoes manufactured in the penitentiary shoe shop at Leavenworth, Kans.

Capone, during his incarceration in this institution, has had no special favors not granted all other first-grade prisoners. It was made clear to me by the officials in Washington, at the time Capone was committed to this penitentiary, that he could have absolutely no favors or special privileges not granted other prisoners, and these instructions have been carried out.

Yours very truly,

A. C. ADERHOLD, *Warden.*

Mr. OLIVER of Alabama. Mr. Chairman, I yield five minutes to the gentleman from South Carolina [Mr. STEVENSON].

Mr. STEVENSON. Mr. Chairman, this morning we had a very powerful and, I take it, sincere criticism of the majority party on its action last night in voting to override the veto of the President of the United States on the first deficiency appropriation bill. The gentleman from Illinois [Mr. CHINDBLOM] fortified his position by reminding us that for the same reason President Wilson vetoed the Budget bill as originally passed, and as subsequently passed, by the way, because of its assuming to infringe upon the prerogatives of the Executive.

The bill provided for the appointment of the Comptroller General of the United States, and provided that he could not be removed except by resolution of Congress or by impeachment. President Wilson vetoed it on the ground that the power of appointment involved the power of removal, and that to deny the President the right to remove was an infringement of the prerogatives of the Executive. The two cases are largely parallel. The gentleman from Illinois [Mr. CHINDBLOM] was correct about that; but I want the House to understand that it depends on which party is up and which party is down how people act. Immediately that message came in, the motion to pass over the President's veto was made, and the Republican Members unanimously voted in favor of the motion, and amongst them was the gentleman from Illinois [Mr. CHINDBLOM]. So that the gentleman from Illinois voted at that time, on an occasion which he cites as a rebuke to the recreant Democrats, exactly as we did last night, to override the President's veto on account of the infringement of his prerogatives.

How much more did the gentleman do? The President suggested in that message that he would be glad to sign the bill if we would repass it and leave that out.

Did they do it? No; they said, "No." Mr. Good, the chairman of the committee, took it under his arm, marched out, and said: "We will have a President next year who will," and they passed it after Mr. Harding came in, with that identical clause in it, and it is in it to-day, in which the Republican Party went on record as having deprived the Executive of the power to remove a man whom he had the power to appoint and was directed to appoint. They have administered that law from that time to this, yet they come in here complaining about our having undertaken to assume the right to have a committee of this Congress pass upon claims that this Congress could refuse to pay at all without the claim being established for our Committee on Claims.

The distinguished gentleman made another statement that was unguarded, and he is a splendid lawyer. He said this Congress could not delegate the scanning of things of that kind, even to a committee of its own. Why, the gentleman has not read the decisions of the Supreme Court of the United States on the power of Congress to delegate its power when it held that the Interstate Commerce Commission was merely a delegate of the Congress of the United States and that Congress had a right to create commissions and delegate legislative powers to them. The Supreme Court has held that every action of the Interstate Commerce Commission is an action of legislation when it fixes rates and does all of those things that Congress could do of itself.

Now, this is all I wanted to say. Our record stands. We adopt the language of Mr. Wilson and we ask the gentleman from Illinois [Mr. CHINDBLOM] why he fired up then and voted to establish a law with the very same infringement of the rights of the Executive that he now makes so much fuss about, our attempt to scan some of the scandalous refunds of taxes that have been made by the present agencies of the Government? [Applause.]

Mr. SHREVE. Mr. Chairman, I yield five minutes to the gentleman from New York [Mr. LAGUARDIA].

Mr. LAGUARDIA. Mr. Chairman, for the last few days Members have been receiving telegrams of protest against the resolution of the House requiring the Reconstruction Finance Corporation to make public the names of borrowers and commitments prior to the time when such publication was required by an act of Congress.

Yesterday I received a telegram from the State superintendent of banks of my State. Owing to my very high regard for that official, Mr. Broderick, I wired him to give his reasons, if he could, why a publication of the moneys borrowed by the banks could in any way injure a bank, when as a matter of law the banks are compelled to make stated reports of their financial condition, and loans must reflect in that report. I am quite sure that this State superintendent of banks of New York acted at the request and behest of the bankers of his State and was prompted by the best of motives. I want to submit, and I am going to put his letter in the RECORD, that the reasons given are surely not sufficient to justify the howl and the protest that has been made to us, and in all likelihood to him and other bank officials.

For instance, in reply to my query why it is that the public record and publication of a loan made from the Reconstruction Finance Corporation should be treated any different than a loan made by the same bank from any other source he states:

The public appears to regard such borrowings as a signal of distress—

Mr. Chairman, we might as well be frank about it. Hiding the facts will not help the condition of the banks. I continue quoting—

and assumes that they represent a last resort, available only when all accommodations in other directions have been exhausted.

Why, Mr. Chairman, that is true. That was the very reason for the enactment of the law which created the Reconstruction Finance Corporation and established it as the agency to supply funds as a last available resort. Let us be frank about it. The time has passed when we can hide existing conditions. That is the very purpose of the law. Then he says:

On the other hand, it has been our observation that the appearance of the borrowings of the financial institutions in their published statements does not create the same reaction. In the

first place published statements of conditions do not itemize the various sources whence funds are obtained.

Why, gentlemen, it makes no difference whence funds are obtained; the important matter is whether they are obtained. My purpose to-day is to point out to the depositors of the banks that the loans from the Reconstruction Finance Corporation are certainly to their benefit. In fact, as depositors they are better off because of the loan. Their bank has a liquidity which, under present conditions, it would not otherwise have. Perhaps the United States may be worse off. Perhaps loans are made on long-distance collateral, but that is not to the detriment of the depositors of any particular bank. That is something with which we will eventually be confronted. Now, it is wrong to create the impression and the fear that publication of a loan will be detrimental. The banks themselves are creating this fear. Why, Mr. Chairman, in many instances banks have advertised the fact that they are liquid because they have obtained loans from the Reconstruction Finance Corporation. It is well known, and if the banks have not informed their depositors they should do so, that loans can be obtained from the Reconstruction Finance Corporation only on collateral. Therefore, if a bank is in a position to obtain this loan on collateral as required by the law it indicates that it has the right kind of and sufficient collateral. There is nothing in the making of such a loan which should in any way cause this fear which has been created by the banks themselves, and if they have created the fear in the hearts of their depositors it is their own fault and not the fault of Congress in demanding that this public information be made public.

Mr. GIFFORD. Mr. Chairman, will the gentleman yield?

Mr. LAGUARDIA. I yield.

[Here the gavel fell.]

Mr. SHREVE. Mr. Chairman, I yield the gentleman one more minute.

Mr. GIFFORD. The logical conclusion and the next step in the gentleman's argument would be that because it is the people's money in the local bank, the depositors therein should have actual knowledge of the persons to whom the money may be lent and that a general statement of the amount lent, perhaps, would not disturb them, and for creating confidence they ought to have the privilege of knowing the actual people involved so that they may pass upon the loan. Does the gentleman advocate that?

Mr. LAGUARDIA. The question shows absolutely that the gentleman has not given one moment of thought to his question. Of course, there is no analogy to that, but the bank itself must show in its statement, at certain intervals, as required either by State law or Federal law, its condition; and if it borrows money, it has got to show it.

Mr. GIFFORD. I may say to the gentleman that I visited a bank last year and I said, "Where did you get that money?" They said, "From the Reconstruction Finance Corporation; but we hope it will not be made public, because it would be damaging to the bank." A hidden transaction sometimes is well for a bank in order that it may soon recover.

Mr. LAGUARDIA. I can not agree with the gentleman about that. A mere and casual investigation of the history of banks will disclose that "hidden transactions" have invariably been the cause of bank failures.

[Here the gavel fell.]

NEW YORK, N. Y., *January 23, 1933.*

Hon. FIORELLO H. LAGUARDIA,
House of Representatives, Washington, D. C.:

We have to-day wired Speaker JOHN N. GARNER as follows: "We are informed that Reconstruction Finance Corporation report to be rendered to House on Wednesday, containing list of all banks who took loans, or even arranged for them, from very beginning, will be published under Howard resolution. We consider such publicity extremely dangerous at this time."

J. A. BRODERICK,
Superintendent of Banks, State of New York.

JANUARY 24, 1933.

Mr. J. A. BRODERICK,
State Superintendent of Banks, New York City:

Reference your wire re publication Reconstruction Finance Corporation loans, will you kindly write me just why publication of these loans dangerous? Bank statements are matter of public record. Loans made by banks would naturally have to be reflected in their statements to State bank departments or Comptroller of the Currency. Inasmuch as I have urged publicity of Reconstruction Finance Corporation loans, would very much like to get your views in detail on this. I would very carefully consider your views owing to my high regard for you and confidence in your judgment.

F. H. LAGUARDIA,
Member of Congress.

STATE OF NEW YORK,
BANKING DEPARTMENT,
New York, January 24, 1933.

Hon. FIORELLO H. LAGUARDIA,
House of Representatives, Washington, D. C.

MY DEAR MR. LAGUARDIA: Superintendent of Banks Joseph A. Broderick, who was out of town when your wire reached us, has authorized me to respond to your request for further comment on the subject of the publication of loans to financial institutions made by the Reconstruction Finance Corporation.

Several instances have been brought to our attention by bankers in which the publication of such information has resulted in newspaper publicity disturbing to the majority of readers. We are informed, in fact, that in some instances such borrowings have become the subject of headlines in local newspapers. This has created alarm among depositors, resulting in substantial withdrawals.

The public appears to regard such borrowings as a signal of distress, and assumes that they represent a last resort, available only when accommodation in other directions has been exhausted.

On the other hand, it has been our observation that the appearance of borrowings by financial institutions in their published statements does not create the same reaction. In the first place, published statements of condition do not itemize the various sources whence funds are obtained. Secondly, the published statement of condition presents in summary form many more facts with regard to the financial standing of an institution, both as to its assets and its liabilities.

Comparing the two methods of publishing institutional borrowings, I believe you will agree that publication of loans or applications for loans by the Reconstruction Finance Corporation has an element of danger not present in the publication of the usual statement of condition, in that in the case of the former the public is informed of only one feature of the condition of the institution, a feature which they interpret to be an unfavorable one.

Our observations of the effect produced by the past publication of Reconstruction Finance Corporation loans to banking institutions have led us to fear that the proposed publication of a list of all banks who took loans, or even arranged for them, from the very beginning is likely to lead to the very result which the Reconstruction Finance Corporation purposes to forestall. Moreover, we have been informed by bankers in touch with the situation throughout the Nation that the present mental attitude of depositors is disturbed by recent bank closings.

It is for these reasons that we consider that the publicity contemplated under the Howard resolution to-morrow would be extremely dangerous, coming at this time.

Faithfully yours,

AUGUST I. DEFELD, Jr.,
Deputy Superintendent of Banks.

Mr. OLIVER of Alabama. Mr. Chairman, I yield four minutes to the gentleman from Arkansas [Mr. RAGON].

Mr. RAGON. Mr. Chairman, I want to follow the remarks of the gentleman from New York [Mr. LAGUARDIA] and the gentleman from Maine [Mr. BEEDY]. I think they are both correct, in part, in what they have said, first, with reference to what the gentleman from Maine has said about the inadvisability of making these loans public, and then the remarks of the gentleman from New York with reference to there being no justification for the fear that apparently exists in the country about these loans.

The gentleman from New York is correct when he says that banks have to make statements, but I think it is generally understood that banks never refer to the source of the indebtedness, and it is generally carried under the general classification of loans; but I would call the gentleman's attention to the fact that whether it is justified or not there seems to be a psychological condition in this country that points the finger of suspicion at the financial condition of any bank that has to resort to loans from the Government. Sitting where you and I sit, acquainted with the operation of the Reconstruction Finance Corporation, we know there is no justification for this suspicion or for this fear, but those who are in the position of depositors or stockholders, who have not access to the information that the gentleman from New York and other Members of Congress and business men in general have, seem to have a lurking suspicion in

their minds that such a bank could not get money anywhere else and that out of the desperate condition of the bank they take advantage of this opportunity of securing a loan from the Government.

There is no occasion for the fear that exists with reference to the source of these loans. In the first place, we have seven directors of the Reconstruction Finance Corporation. The Congress, composed of both the Senate and the House, and the President, have seen fit to trust to these seven men the control of this corporation's business and the lending of this money. The law has circumscribed their actions so as to make it practically impossible for them to make loans that are unwise, and from the personnel of the directorate of this corporation, many of whom have nation-wide reputations as outstanding business men, we know they would act on these financial questions with the very greatest of prudence, and since they require collateral which may, it is true, be temporarily frozen, but may be just as good as any other collateral, save and except the possibility of its liquidity, it is just as good collateral as they could otherwise get.

So I think notice should go to the American people that notwithstanding the publication of these loans, it is not to the detriment of any bank or any insurance company or any corporation that may avail itself of the opportunity of borrowing from the Government. I am strongly opposed to the legislation making these loans public for several reasons, but we all know there is no necessity for the fear which may exist in some centers. The fact that a bank can qualify to obtain these loans should be sufficient to establish confidence on the part of the public as to its solvency and its unquestioned ability to carry on. [Applause.]

Mr. OLIVER of Alabama. Mr. Chairman, I yield five minutes to the gentleman from New York [Mr. DICKSTEIN].

Mr. DICKSTEIN. Mr. Chairman, I am definitely opposed to any curtailment of pay as proposed in President Hoover's message and will unequivocally oppose any such reduction as he recommends to Congress.

The present state of the Treasury makes it unfortunately incumbent upon us to continue for another year the so-called furlough system, which is now a part of our appropriation laws, but I shall not vote to make this reduction in pay any greater than it now is. I most particularly call to the attention of the House how dangerous it would be to impose an additional 11 per cent salary cut on our representatives abroad.

In my official work as chairman of the Immigration Committee, I had the opportunity during my sojourn in Europe at the time Congress was in recess to observe the details of the work performed by the consuls and their representatives abroad.

In this connection I visited a number of countries and become personally acquainted with a large number of our officials on the other side.

We have in our consulates abroad not only members of the Foreign Service of the United States but in a few places medical officers as well, who are detailed to perform their duties in accordance with the requirements of our immigration laws.

I was curious to see how the financial depression which has so largely affected life and living in the United States was reflected abroad. I concluded generally that, while food was very much lower in price than it is in the United States, nevertheless living conditions generally were at a much higher scale, and particularly it was quite difficult for our consuls and other officials of the Foreign Service to make both ends meet, in view of the fact that these men are obliged to live rather better than the average run of individuals on the other side of the ocean; they are obliged to maintain the dignity and prestige of our Government, and that by doing so they must incur liabilities which other citizens are not obliged to undergo.

I also made a little study of the compensation paid to our officer, and I find, for example, that in 1906 the salary of the consul general at the most important posts in Europe was about $12,000 a year. This salary continued until 1924, when Congress passed a reorganization act which reorganized the Foreign Service of the United States, and, among other things, doing away with individual salaries fixed for individual posts, but designating our consuls and other foreign officers by rank instead of the post to which they were assigned.

Congress no longer designates the salary of a man in the Consular Service by the post to which he is assigned. A man's salary depends on the length of service and the rank which he bears in the Diplomatic and Consular Service of the United States.

It therefore in many cases resulted in a reduction of pay which our representatives suffered after the passage of the act of 1924. The salary of the consuls in principal places was then reduced from $12,000 a year to $8,000 a year, quite a sizable reduction when we consider the fact that the cost of living in 1906 was decidedly much lower than it was in 1924.

Anyone whose memory can go back eight years or so will know that this was the time of our almost greatest prosperity, and that salaries in the United States in 1924 in private business were at their highest level, and that everybody was earning much more money in 1924 than he did in 1906, and much more money than he does in this year of grace of 1933. So that we find ourselves with this situation: A consul in the highest post received $12,000 a year in 1906, while his salary in 1924 is $8,000 per year. Nineteen hundred and twenty-four, by the way, is the year in which we saw fit to increase our own salaries from $7,500 a year to $10,000 a year.

A few years later, Congress realizing that the compensation paid to our consuls or foreign officers of the highest class was inadequate, increased their salaries by $1,000, giving them a maximum of $9,000, and in view of the fact that it became necessary to hire quarters, pay rent, light, and heat in the consulate offices, Congress made an additional appropriation of not exceeding $1,550 for that purpose, from which the consul had to pay for light, heat, and rent. If the cost of these services was in excess of $1,550, the consul had to make it good out of his own pocket. If it was less than $1,550, he was obliged to refund the money to the Government. As a matter of fact, I have reliable information to the effect that not a single consul was able to save one cent out of this allowance of $1,550, and in larger places, like London, Paris, and Berlin, the cost of rent, light, and heat was in excess of $1,550 per annum.

A year later, when complaints were made to Congress that this sum of $1,550 was inadequate, we raised this sum to $1,900; but in last year's budget, in view of the economy which we decided to practice in our national expenditures, we reduced it to $1,140, so that at the present time there is no question but that this sum is absolutely inadequate to meet the running expenses of our consulates in the larger cities.

We find, therefore, this situation to deal with. As you know, the furlough act makes a cut of 8⅓ per cent in the compensation of our Federal officers receiving a salary of $1,000 or more, so that the salary of a consul of the highest class, instead of being $9,000 a year, is reduced by $750 and now actually amounts to $8,250. From this $8,250 the officer must pay an income tax to the Federal Government which amounts, roughly, to about $500, and he must also make good any additional expenditures over the allowance of $1,140 for rent, light, and heat. I estimate that, at best, the Foreign Service officer is at least $250 short on his allowance for these items.

Now, if the President's plan of a further 11 per cent cut goes through, in addition to the existing 8⅓ per cent, I have no doubt but that it is going to stint our splendid men in the Foreign Service to such an extent that many of them will be obliged to resign their places and come back to live in the United States.

I know of many instances where our Foreign Service officers are obliged to send large sums of money to the United States for the education of their children, whom they do not wish to grow up in a foreign atmosphere. Most consuls have their wives with them, but wish to see their children

educated in the United States. This makes quite an expense in the ordinary run of the consul's activities, and I do not believe our Government wants to see real distress among them.

Now, forgetting for a moment the men in the highest-salaried class of the Government, see how this proposed cut is going to affect men and women in the civil service of the United States.

The average salary received by the Government employee who has given years of his time to the Federal service is about $2,000 a year. This proposed additional cut of 11 per cent is a sum of money which these poor workers could not possibly stand. It is true that the cost of living has decreased somewhat, but in most families the number of dependents has grown higher, and owing to the fact that business conditions in the United States leave a large gap in the employment of most of us, the burden of supporting those who are without employment to-day has fallen to a very large extent upon the shoulders of Government employees. Every employee of the Government, be it of the Federal Government, or of the State, or of the county, or of the city has had his share in taking care of his unemployed relatives, and while he is or has been more or less secure in his employment, he has this added burden to contend with, which makes living very precarious and which makes it utterly impossible for him to stand the strain of a further salary cut.

Now, at this point I desire to insert a few statistics showing the effect of these cuts in compensation to our Federal employees in civilian activities.

In January of 1932, I understand the Bureau of the Budget compiled data and statistics as to the Government pay roll and the number of Government employees, both civil and military.

From the figures in this compilation it appears there were at that time in civilian employment for the Government (Federal), 732,460 persons. Of this number only 124,678 were receiving compensation of less than $1,000 per year, and were, therefore, exempted from the reduction of the economy act.

The balance of these persons, or about 607,762 persons, were paid a basic compensation to a total of $1,012,661,614.98. The economy act reduced this total to $928,273,147.07. The new proposal for an additional reduction of 11 per cent would reduce this total to $816,880,369.42.

This means that this additional reduction of 11 per cent, superimposed on the reductions effected by the previous "economy act," would make a total reduction so that these 607,762 persons would receive an average yearly compensation of only $1,344.22 per year.

I originally voted against the furlough bill, because I did not believe that by cutting the pay of Government servants we are advancing the cause of prosperity. On the contrary, I think that it is the duty of our Government to keep employment and salaries at as high a level as possible consistent with the state of our National Treasury, because all of these men and women receiving Government pay circulate money so received freely and help in our national prosperity.

By taking away and withdrawing from the market moneys ordinarily expended by these servants of our Government, we create a condition of affairs which can only retard our financial recovery.

I have spoken quite at length on the subject of our higher-paid employees, but the argument is so much more applicable to the plight of the lower-paid employee that I believe no words are necessary to draw an elaborate picture of the difficulties in which you are going to place the average Government worker if you persist in reducing his income.

True that the example which we are setting on this basis is a vicious one and will be followed by other subdivisions of government, as well as by private business. A system by which wages and salaries are cut is detrimental to the well-being of the Nation and harmful to the country in general.

I have recently received a copy of the January, 1933, issue of the Railroad Trainman, which is the official publication of the Brotherhood of Railroad Trainmen.

There is a very interesting article in that issue which is more or less pertinent to the subject I am discussing to-day, and I desire to read it to you at this point. It is as follows:

FEDERAL GOVERNMENT INCREASES NUMBER OF UNEMPLOYED

One thing on which there should be no disagreement is that the number of unemployed should not be increased. Certainly the people have a right to expect that the Federal Government will not increase unemployment.

During the last several years our Government has not been a model employer. In 1929 President Hoover asked industrial leaders not to reduce wages. But last year he forced Government employees to share their small wages, through the so-called furlough system, which had the effect of substantially reducing the yearly incomes of Government employees. In addition to this the Government employees were also deprived of their vacations with pay during the present fiscal year and their vacation period was permanently reduced.

It is understood that President Hoover now favors additional wage cuts for Government employees. It is well known that he believes that all workers, in and out of Government service, should be reduced to a common level of poverty through the so-called share-the-work plan, which seeks to make additional reductions in the yearly incomes of workers, even after three years of vicious wage cutting and unemployment.

Recently the press carried the information that the United States Labor Department will discharge 300 employees. Not only are these servants of the people to be thrown into the streets with the already far too numerous unemployed citizens, but the very system of Federal employment bureaus is being threatened. It is reported that 59 job-locating offices of the Department of Labor may be closed.

It is extremely unfortunate that our Federal Government would magnify grave conditions by pursuing the very policies which have destroyed effective mass purchasing power and imperiled our social and economic structures. If our Government is unable to bring about legislative reforms which will solve our ridiculous panic of plenty whereby millions of our citizens are hungry and in dire need in the presence of bounteous supplies of nearly everything, the least that may be expected of our Government leaders is that they attempt to set a worthy example for private industrial leaders and not resort to the short-sighted policy of wage cutting and lay-offs.

I think it worth while to repeat the last clause for emphasis:

The least that may be expected of our Government leaders is that they attempt to set a worthy example for private industrial leaders and not resort to the short-sighted policy of wage cutting and lay-offs.

Let me say that there has recently come to my attention a letter on the stationery of the National Federation of Federal Employees, which all of you probably received. There are a few statements in that letter which I believe it will be well to emphasize at this time. I read in this letter as follows:

The pay of employees of the Federal service has always been far behind when wage and salary levels in private industry rose. The Federal employee who received the inadequate temporary increases in 1918 and 1919 and such additional increases granted by the classification act of 1923 and the Welch Act of 1928 nevertheless found himself on the date the economy act went into effect with a material lag between the apparent amount of aggregate compensation received for the years 1913 to 1932, inclusive, and the purchasing power of such aggregate compensation as shown by the index of the United States Bureau of Labor Statistics.

It is a poor philosophy of economics that purposes lessening the purchasing power of wage earners to improve general conditions. To the contrary, for the Government of the United States to take such a further backward step can only accentuate the depression.

On June 20, 1932, I spoke on this floor against salary cutting of Federal employees. At that time I said, among other facts:

Mr. Speaker, I am opposed to any salary cut affecting the incomes of the thousands of loyal men and women who work for our Government in humble capacities and receive meager pay which we see fit to give them for their services. I have before me a chart prepared from official sources, which shows that out of the 732,460 men and women who receive pay or compensation from the Federal Government, 124,618, or approximately one-fifth of the entire total employed by our Government, receive less than $1,000.

After all, these 124,618 persons receiving a salary of $1,000 or less and the others composing the balance of 732,460 Govern-

ment employees affected by this proposed legislation are not producers but consumers of goods.

If we stop this source from which this great purchasing power of our Nation comes and if by our own action we prevent these thousands of employees from spending for the necessities of their lives, we will be thereby diminishing the recuperative powers of the Nation and prevent great industries from turning out goods to satisfy the wants and needs of these thousands. Every cent withdrawn from circulation in this manner will simply mean that by that we shall retard and not advance a resumption of normal business and national prosperity.

My office is being flooded with letters expressing strong opposition to any extension or in fact any continuation of the policy of salary cutting of the employees of the Federal Government; many of these letters reveal dire suffering that has already been caused by prevailing legislative and administrative cuts experienced in the past six months, so I trust this session of Congress will wake to the hardship and poor national economy involved in these practices.

[From the American Federation of Labor Weekly News Service, January 7, 1933]

GREEN URGES ROOSEVELT TO OPPOSE WAGE CUT FOR GOVERNMENT EMPLOYEES

AMERICAN FEDERATION OF LABOR'S PRESIDENT DECLARES IMPROVEMENT IN ECONOMIC CONDITION CAN NOT RESULT FROM SLASHING BUYING POWER OF THE MASSES—WAGE REDUCTIONS FUTILE AS ECONOMY MEASURE

WASHINGTON.—William Green, president of the American Federation of Labor, sent the following telegram to President-elect Franklin D. Roosevelt asking him in his conference at New York with Members of Congress to look with disfavor upon any and all suggestions providing for a reduction in the wages paid Government employees:

"In the consideration of any and all plans providing for economy in the administration of government I most respectfully request that you look with disfavor upon any and all suggestions providing for a reduction in the wages paid Government employees.

"Improvement in the distressing economic conditions which prevail throughout the Nation can not be brought about through further reduction in the buying power of the masses of the people.

"Reduction in the wage standards of Government employees is bound to result in further depression in the wage standards of those employed in private industry.

"I have repeatedly emphasized the futility of wage reductions for Government employees as an economy measure or as a means to be employed for the improvement of the economic and industrial situation throughout the Nation.

"I sincerely hope and trust you will resolutely stand against any lowering of living standards or any reduction in the wages of Government employees."

A few days ago I had occasion to present to this House at length the effect of our short-sighted policy of wage cutting and lay-offs as it had affected and is likely to affect the employees in our Bureau of Immigration unless we change our methods of trying to balance the Budget. I wish to expand a little upon what I said during that debate.

Under date of March 28, 1932, the Secretary of Labor in a letter addressed to Senator Wesley L. Jones stated some facts relative to proreductions of appropriations for the Bureau of Immigration which are now history, and I would like to read a part of that statement for current information.

Secretary Doak stated, on page 7557 of the CONGRESSIONAL RECORD for the proceedings of April 6, 1932, as follows:

Appropriation requested, $10,855,485; reduced by Bureau of the Budget, $198,455; reduced by House of Representatives, $137,570; total reductions, $336,025; amount allowed by House of Representatives, $10,519,460; salary obligations, $7,987,360; percentage salary obligation to total, 75.8.

Continuing further on, the Secretary says:

I wish to call your attention also to the fact that expenditures for this service are to some extent counterbalanced by receipts, which amounted to $2,657,471 for the fiscal year ending June 30, 1931.

The effective guarding of our borders and the carrying on of the numerous other activities, especially a vigorous prosecution of the work of deporting undesirable aliens, can not be accomplished with a smaller personnel than at present, which is 75.8 per cent of the appropriation allowed by the House of Representatives.

An additional cut of 10 per cent in the appropriation would seriously affect the efficiency of the service.

Notwithstanding the statement of Secretary Doak at that time, the appropriation finally approved by the President for the Bureau of Immigration amounted to $9,450,000; or a further general reduction of $1,069,460, or about 10⅛ per cent below the amount allowed by the House of Representatives.

The current estimates of the deficit of the Bureau of Immigration indicate that if the present rate of activity shall be carried on until the end of the current fiscal year about $1,192,026, of which there is $606,726 chargeable as deficit on salary accounts for the present personnel of the Bureau of Immigration numbering in all 3,669 faithful men and women.

Just for comparison let us look further into the facts as stated in that letter by the Secretary of Labor last March. He said:

The reduction already made by the Bureau of the Budget and the House of Representatives * * * reduces the funds available for salaries in the amount of $168,810.

By references, the Secretary further indicated that of the total appropriation, at that time before the Senate Committee on Appropriations for the Bureau of Immigration there was $7,987,360 left for salary obligations. This was further reduced by pro rata of the total further reductions so that the total reductions made for salary obligations amounted to about $980,860 less than the amount requested before the Bureau of the Budget started the reducing process.

So there is a definite relationship between the amount that was taken away from the estimates of the Department of Labor as to the needs during the current fiscal year and the amount now estimated to be a deficit in the available funds for salary obligations. I sincerely trust that before this Congress adjourns sine die we may find a way to provide the needed money to meet the full salary obligations for this fiscal year in the Bureau of Immigration and also for the current fiscal year for our Foreign Service officers and consular officials abroad so that these faithful servants of our Government shall not be subjected to deprivations and loss of official dignity in the performance of their important duties at home and abroad.

We provided another means of cutting salaries in the economy bill of the last session, I refer to the so-called administrative furloughs designed to enable the head of Government departments and independent establishments to operate within the reduced appropriations. Only the other day I referred to a current report made which indicated the effect of this extra pay-cut provision, at that time I said—

Mr. DICKSTEIN. That is correct.

And, in addition, I wish to call to the attention of the House some figures just last Sunday published in the press of this city.

The Civil Service Commission reported to the Senate Economy Committee the force with which the administrative furlough provision of the economy act is hitting the personnel of the Government services.

The employees of the State Department, the Treasury Department, the Post Office Department, the Government Printing Office, the Veterans' Administration, and 18 other Government establishments have not been subjected to loss of compensation resulting from an administrative furlough in addition to the legislative furlough.

The employees in the Commerce Department, the Agriculture Department, the Interior Department, the Justice Department, the Navy Department, the War Department, the Labor Department, the White House, and 12 other Government establishments have had to accept administrative furloughs without pay over and above the time covered by the legislative furlough.

In those departments and establishments where administrative furloughs without pay has been resorted to there are estimated to be 172,592 employees, and of these about 20,015 were given a payless furlough.

From the figures appearing last Sunday it appears that over 81 per cent of the total number of employees given this payless administrative furlough are being paid a salary of less than $3,000 each per year and only 3,679 have salaries of upward from $3,000. So that the bulk of the salary loss to individual employees is laid upon those who get a normal salary of downward from $3,000.

The Department of Commerce, with its 14,796 employees, furloughed 9,139 of them; while the Interior Department, with 12,511 employees, only furloughed 79. The Navy Department, with a personnel of 50,106, has only furloughed 1 person, while the War Department furloughed 732 out of its 47,349 total personnel.

The tabulation further indicates that the principle of administrative furloughs, which was held out as the embodiment of the "spread work" idea, and could be applied to about 485,-

141 employees in the executive civil service, is, as a matter of actual application, reaching only about 4 per cent of that number, and these 4 per cent stand a loss totaling over $4,000,000 of their normal annual income.

Let us not go any farther than we have already gone along this line. The temptation to balance the Budget by decreasing the pay of Government workers is a great one.

Particularly in a Congress, which like the present has no responsibility to voters, the tendency to do mischief is more than prevalent.

We had an instance of it the other day when on the vote relating to prohibition repeal Members of this House who will not come back after March 4 recklessly cast their vote contrary to the platform pledges of both political parties and contrary to the wishes of the great majority of their constituents.

It is a time when all of us who still represent our constituents have the responsibility of doing the greatest good for the greatest number. Remember that the balance of the Budget, while an important task in itself, shall not be at the expense of those who are least able to carry the burden. If the Budget must be balanced, let us place a tax burden where it belongs and not penalize poor public servants by reducing their pay. [Applause.]

Mr. SHREVE. Mr. Chairman, I yield five minutes to the gentleman from Oklahoma [Mr. GARBER].

Mr. GARBER. Mr. Chairman, members of the committee, it is not inappropriate to pause for a brief period during the consideration of this bill to express a word of appreciation of one who recently lost his life in the service of his country.

On last Friday, January 20, the Associated Press dispatches announced the sudden death of Lieut. Irvin A. Woodring while engaged in the most dangerous flying of the Air Service in testing an experimental attack plane submitted to the Government for its use. While approaching Wright Field, near Dayton, Ohio, his plane was seen to explode in the air, rendering escape impossible. On last Monday, January 23, his remains were laid to rest with military honors in the National Cemetery at Arlington, a 5-plane formation with one blank file from Bolling Field participating at the service, Chaplain Ralph C. Deivert officiating. Acting as honorary pallbearers were Maj. Asa M. Duncan, Capt. Harlan W. Holden, Capt. William J. Flood, Capt. George C. McDonald, Capt. Edwin J. House, and Capt. Charles M. Cummings.

Lieutenant Woodring was born and raised on a farm near my home city of Enid, Okla. He attended the public schools and thereafter entered the service. I knew him as a modest, unassuming lad, ambitious, conscientious, and appreciative. He received his flying training at Brooks and Kelly Fields and was graduated in pursuit flying in September, 1924. Upon several different occasions early in his career I had the privilege of recommending him for consideration to the War Department, and each time he made such recommendations good. He proved his merit, he honored the traditions of his profession for bravery and gallantry. His signal service to his country is his best eulogy.

When Colonel Lindbergh made his tour following his successful New York–Paris flight in 1927, from the many courageous fliers in the Government service Lieutenant Woodring was selected as his escort.

In 1927 he won the Mitchell speed trophy race for Army pilots at Dayton, Ohio.

He climaxed his aviation exploits in October, 1930, when he carried the Japanese ratification of the London naval treaty from Vancouver, British Columbia, to Newark, N. J., in record time. On that occasion his escort pilot, Lieut. William Caldwell, was killed while flying through a Wyoming blizzard, but Lieutenant Woodring pushed onward, arriving safely after two forced landings. For this feat he received the distinguished-flying cross, an exceptionally laudatory citation.

In 1930 he became a member of the Caterpillar Club when he took to his parachute during a "dog fight" in the air in Sacramento, Calif., after his plane became disabled.

He was the last of the famous daring "Three Musketeers of the Air," so designated because of their skill and dauntless courage in aerial navigation, flying solo or as a unit. He was recognized as one of the outstanding fliers in the service. He was but 31 years of age at the time of his death on January 20, when he made his last flight. He undoubtedly has joined his comrade musketeers. His high courage, daring, skill, and outstanding achievement in his chosen career have won for him honor and fame. His exemplary life of self-development and achievement affords a worthy example to the boys of our land in the common walks of life—the assurance to them that the doors of opportunity are still open wide to those, however humble, who have the industry and courage to enter. His death is mourned by the entire Nation. [Applause.]

Mr. OLIVER of Alabama. Mr. Chairman, I move that the committee do now rise.

The motion was agreed to.

Accordingly the committee rose, and the Speaker having resumed the chair, Mr. OLIVER of New York, chairman of the Committee of the Whole House on the state of the Union, reported that that committee having had under consideration the bill H. R. 14363, had directed him to report that it had come to no resolution thereon.

SPEAKER PRO TEMPORE FOR THE EVENING SESSION

The SPEAKER. The Chair designates the gentleman from Illinois [Mr. RAINEY] to preside at the evening session.

ENROLLED BILL SIGNED

Mr. PARSONS, from the Committee on Enrolled Bills, reported that that committee had examined and found truly enrolled a bill of the House of the following title, which was thereupon signed by the Speaker:

H. R. 8750. An act relative to restrictions applicable to Indians of the Five Civilized Tribes in Oklahoma.

BILL PRESENTED TO THE PRESIDENT

Mr. PARSONS, from the Committee on Enrolled Bills, reported that that committee did on this day present to the President for his approval a bill of the House of the following title:

H. R. 8750. An act relative to restrictions applicable to Indians of the Five Civilized Tribes in Oklahoma.

RECESS

Mr. OLIVER of Alabama. Mr. Speaker, pursuant to the order of the House, I move that the House take a recess until half-past 7 this evening.

The motion was agreed to; accordingly the House, under its previous order, took a recess until 7.30 o'clock p. m.

AFTER RECESS

At 7 o'clock and 30 minutes p. m., the House was called to order by Mr. RAINEY, as Speaker pro tempore.

MESSAGE FROM THE SENATE

A message from the Senate, by Mr. Craven, its principal clerk, announced that the Senate had passed the following concurrent resolution, in which the concurrence of the House was requested:

Senate Concurrent Resolution No. 41

Resolved by the Senate (the House of Representatives concurring), That the secretary of the Senate be, and he is hereby authorized and directed, in the enrollment of the bill (S. 5160) to provide for loans to farmers for crop production and harvesting during the year 1933, and for other purposes, to insert on page 2, line 9, of the engrossed House amendment, after the figures "1933," the following: "or on livestock."

STATE, JUSTICE, THE JUDICIARY, COMMERCE, AND LABOR APPROPRIATION BILL, FISCAL YEAR 1934

Mr. OLIVER of Alabama. Mr. Speaker, I move that the House resolve itself into the Committee of the Whole House on the state of the Union for the further consideration of the bill (H. R. 14363) making appropriations for the Departments of State, Justice, Commerce, and Labor, for the fiscal year 1934, and for other purposes.

The motion was agreed to.

Accordingly the House resolved itself into the Committee of the Whole House on the state of the Union for the further consideration of the bill H. R. 14363, with Mr. OLIVER of New York in the chair.

The Clerk read the title of the bill.

Mr. OLIVER of Alabama. Mr. Chairman, I yield seven minutes to the gentleman from Georgia [Mr. LANKFORD].

Mr. LANKFORD of Georgia. Mr. Chairman, I ask unanimous consent to extend my remarks and to read in my time during the course of my present discussion an article from the pen of the late Senator Watson, of Georgia, entitled "Planting Corn."

The CHAIRMAN. Without objection, it will be so ordered.

There was no objection.

Mr. LANKFORD of Georgia. Mr. Chairman, there are innumerable farm-relief proposals—a few good and many bad. There is not enough wheat and entirely too much chaff.

There is not enough of the eternal sparks of truth and justice, and too much noise and smoke. Too much legislation is labeled "farm relief" which could be more appropriately marked "deadly poison." The Federal farm loan act is a vicious and malicious outrage of this type. It was labeled "for the farmer," and is to-day doing more to rob the farmers of their homes than all other governmental and private agencies combined, and Congress—over the bitter protest of a few of us—is aiding and abetting this high-handed outrageous performance. Many of the Federal land banks lead the farmers to secure loans from them on the idea that they were specially favored agencies of the Government with a divine mission to serve the farmer, and yet their every move is actuated by motives as selfish and base as ever actuated a cutthroat or dominated a pirate of old. It is publicly charged, and not denied, that they are cruelly and relentlessly waging a warfare more terrible and devastating than Sherman's march to the sea, and still Congress at last session brushed aside those of us who dared object, and voted $125,000,000 more for these selfish and criminal purposes, to be used in an even fiercer and more destructive warfare on innocent men, women, and children whose homes are mortgaged to the Federal land banks, or who own stock in them.

These banks are applying the same murderous tactics to the farmers and the bank's bondholders that the highwayman uses when he finds a man and his family alone and commits the double crime of robbery and wholesale murder. And the awful tragedy is that not only is Congress making no bona fide effort to stop this most awful crime of the age, but now it is becoming evident that millions and even billions of dollars more are to be squeezed out of the people and graciously delivered into the hands of these enemies of the home owners of our country, so they can build a more powerful death trap for the innocent and operate their mortgage-foreclosure guillotines with greater speed and in a more devastating manner. If Congress votes more billions of dollars to further carry on this national carnage, I beg that the legislation be not labeled "farm relief" but instead be branded "for the humiliation, robbery, and destruction of the last survivors of a once noble and independent group of our citizens known as the independent, individual, home-owning American farmers."

My convictions on this matter are well known to those familiar with my record here, so with these observations I wish to briefly state my views on what I feel is a real farm-relief program.

During this emergency I would pass some legislation with a real "kick" in it to bring immediate relief. If within my power, I would put into effect at once a program to refinance the debts of the farmers and other home owners so as to cut these debts in half or, to a greater extent, with interest entirely eliminated or reduced to a minimum. The farmers' debts now are being reduced to this extent, but others are getting their homes, and the Federal land banks and others are getting all the benefits of these reductions and the farmers are being driven into abject poverty and the most cruel slavery.

In order to put the farmers on a parity with the banks, I would monetize farm mortgages and if necessary farm products by providing for the issuance of tax-free currency on these properties of the farmers up to 80 per cent of their present market values. This would enable the Government to refinance the farm loans as I have just mentioned and insure the return of homes taken over by foreclosures and prevent future losses of this character. This currency would be as safe as that now issued, would at once put sufficient money into active and effective circulation, stop loan foreclosures, eliminate the unemployment menace, and make the farmer financially independent.

It would also provide an efficient method and means of enabling the farmers to finance their production of crops and their marketing problems. With the farmers' lands and produce monetized, the working of my contract system of controlling production, marketing, and prices would become perfection itself.

All these with exemptions of homes from all taxes and such other remedial legislation as should naturally follow, would constitute farm relief, pure and undefiled.

To my mind there is no reason for anyone urging that the monetization of farm lands and farm products is extreme or means the abandonment of the gold standard. The farmers' paper now is used as part of the monetary base of our currency. The only difference is that now the big banks get the benefits of issuing tax-free bank notes or currency and charge the farmer interest on the money issued on and secured by the farmers' securities. We now pay the banks a bounty to issue money, a privilege that should be exercised by the Government for the benefit of those—the farmers in this instance—who furnish the base or security for the issue. But it is urged that this would be fiat money and only backed by the Government's promise to pay. This is equally the case with much of the money issued to-day by the banks.

Congress now does the absurd thing of providing for the issuance of Government bonds which, when sold, can be placed back on deposit with the Government as the base for the issuance of currency by the banks.

The Government—the people, all of us pay the banks millions of dollars interest to issue interest-free money and hoard it to the destruction of the Nation. This money has nothing back of it except Government bonds—the promise of the Government. The money I am pleading for in behalf of the farmer would have exactly the same promise of the Government backed up by absolutely safe farm land and farm products as security. In fact, the farmers' currency, I am now pleading for, would be secured not only by the Government's promise to pay but also by gilt-edge liens on farm lands and farm products. Why not do for the farmers just what we are doing for the banks except that the relief I am seeking for the farmers would be much safer—better secured—and would not cost the taxpayers the interest on bonded indebtedness that is now being paid on the bonds used by the banks for the base of much of their issue of currency.

Since the Government is so fully committed to the use of Government bonds as the base for the issuance of currency, why not require the Government to issue billions of bonds if needed and sell them to the farmers for first liens or mortgages on farm lands, based on a reasonable valuation of the lands and improvements? Let these bonds which the farmers get be for 30 or 50 years at, say, 4 per cent interest, and also let the indebtedness secured by the farmers' mortgage be for the same term of years at the same rate of interest; both to be tax free.

This would be simply swapping farm mortgages for Government bonds with the maturity date and interest on both to be the same. The interest on the farmers' bonds would exactly pay the interest on the mortgages held by the Government on the farmers' lands; both would be tax free and come due at the same time. As the years rolled by, the interest on one would exactly pay the interest on the other. It would be simply a matter of bookkeeping in the Treasury Department. This is better than what happens now with the banks, for the banks now get real money to the song of

hundreds of millions of dollars per year out of the bonds left on deposit to secure the banks' issue of currency.

Now, since upon the deposit of bonds with the Treasury Department as a monetary base on which currency can be and now actually is issued, and since the farmers of the country would own billions of bonds under this plan, why not let them deposit their bonds just as the banks now do, and receive the equivalent in currency to be used by the farmers in settling in full their loans, which they, of course, would have to settle in order to furnish a first lien to the Government. The Government would have a first lien on the farmers' land to secure the payment for the farmers' bonds and would also hold the farmers' bonds to secure or furnish the base for the money issued for the farmer. The net result of this arrangement would be that the farmer would get issued and delivered to him enough money to pay off his present long-term loan at a tremendous discount, and would owe the Government the amount of the money received, secured by a first lien on the farmers' property, to become due in 50 years without the payment of either interest or any installment during this long term of years, and with the privilege of renewal for another 50 years at the end of the first 50. With loans now being settled for much less than the face value, this plan would enable the farmers of the country to settle their present loans for about one-half of their present value or even less and get the money for the settlement for 30 or 50 years without interest.

This sounds too good to be true, but it is not as great a privilege or benefit as the Government allows the banks at this very moment.

But they say this would get all the farmers' lands tied up for a long term of years. It would not get it tied any worse than it is at present. Then, again, as the farmers land became more valuable, it could be remortgaged and additional money issued from time to time.

With this plan carried into effect, there would not be the slightest need for the issuance of any script or tax money now advocated by some as an emergency measure. This would put an abundance of money into immediate use and the life-insurance companies, long-term loan companies, saving-deposit banks, and others now loaded down with frozen long-term farm paper would have plenty of money and a rejuvenated prosperity, permanent in its nature, would be evident on every hand.

I also favor the use of farm products as the base for currency when those farm products are held in large quantities, properly warehoused, by the farmers for the purpose of securing a proper marketing arrangement. This would enable the farmers to hold their products and feed into the market only so much as could be absorbed at a fair price. As the farm products were sold, the mortgage held by the Government against the products must be reduced; and, of course, the money received for the farm products when sold would be paid to the governmental agency; and in this way the money of the country would increase or diminish in accordance with the prosperity of the Nation from an agricultural standpoint, and a few international bankers or other big financiers could not corner the money of the Nation and leave the farmer and his folks to languish and die.

This arrangement, advocated by me, would give the very greatest liquidity to liens on farm lands and products and insure an elasticity to our currency, so much needed by our Nation.

Let us give this monetary system to the farmers and work out a contract system as advocated by me, to enable them to control their production and marketing so as to elevate and stabilize their prices, and then give them similarly fair legislation as to taxes and other problems, and we will have given them real farm-relief legislation as promised for hundreds and hundreds of years, and as yet never before granted.

Mr. Chairman, to my mind this would be farm relief pure and undefiled. This would put the farmers on a parity with the banks and other industries—nothing else in my humble judgment will at all approach such an equality.

No real argument can be made against giving the farmers the same benefits now accorded the bankers. Let us give our farmers a square deal if we wish the return of real and lasting prosperity.

Mr. Chairman, in speaking of the farmers' problems my mind invariably goes back to the time when I was a boy on the old farm down in Clinch County, Ga., and often I remember again the splendid article from the pen of the late Senator Thomas E. Watson, of my State, descriptive of a farm picture familiar to many of us and telling of a great truth that should be universally recognized.

Senator Watson loved the country folks, and they loved him. There is no prettier or truer tribute to the farmer in literature than Senator Watson's Planting Corn. The picture is so true to life; I can see my father now in the "old bay fields" plowing and we children dropping corn. It is a true picture of millions of farmers and their children planting corn. Here it is:

The bluebird was out to-day—out of his blossiest plumage, his throat gurgling with song.

For the sunlight was warm and radiant in all the South, and the coming of spring had laid its benediction on every field and hedge and forest.

The smell of newly plowed ground mingled with the subtle incense of the yellow jasmine, and from every orchard a shower of the blossoms of peach and apple and pear was wafted into the yard and hung lovingly on the eaves and in the piazzas of the old homestead—the old and faded homestead.

Was there a cloud in all the sky? Not one, not one.

"Gee, mule! ! !"

"Dad blast your hide, why don't you gee-e-EE! !"

"Co-whack" goes the plowline on the back of the patient mule—the dignified upholder of mortgages, "time price" accounts, and the family credit, generally.

Down the furrow and up the furrow, down to the woods and up to the fence—there they go, the sturdy plowman and his much-enduring but indispensable mule.

For the poplar leaves are now as big as squirrel ears, and it's "time to plant corn."

On moves the plowman, steady as a clock, silent and reflective. Right after him comes the corn dropper, dropping corn.

The grains fairly chink as the bare feet of the corn dropper hurry past; and before the corn has well cuddled itself into the shoe heel of the plowman's track down comes the hoe of the coverer, and then the seeds pass into the portals of the great unknown—the unknown of burial and of life renewed.

Peeping from the thicket near at hand the royal redbird makes note of what is going on, nor is the thrasher blind to the progress of the corn dropper. And seated with calm but watchful dignity on the highest pine in the thicket is the melancholy crow, sharpening his appetite with all the anticipated pleasures of simple larceny.

The mocking bird circles and swoops from tree to tree, and in his matchless bursts of varied song no cadence is wanting, no melody missed.

The hum of the bees is in the air; white butterflies, like snowflakes, fall down the light and lazily float away.

The robin lingers about the china tree, and the blue jay, lifting his plumed frontlet, picks a quarrel with every feathered acquaintance, and noisily asserts his grievances.

The joree has dived deeper into the thicket; and the festive sapsucker, he of the scarlet crest, begins to come to the front, inquisitive as to the location of the bugs and worms.

On such a day, such a cloudless, radiant, flower-sweetened day, the horseman slackens the rein as he rides through lanes and quiet fields, and he dares to dream that the children of God once loved each other.

On such a day one may dream that the time might come when they would do so again.

Rein in and stop here on this high hill. Look north; look east where the sun rises; look south; look west where the sun sets—on all sides the steady mule, the steady plowman, and the children dropping corn.

Close the eye a moment and look at the picture fancy paints. Every field in Georgia is there, every field in the South is there. And in each the figures are the same—the steady mule and the steady man and the pattering feet of the children dropping corn.

In these furrows lies the food of the Republic; on these fields depend life and health and happiness.

Halt those children and see how the cheek of the world would blanch at the thought of famine.

Paralyze the plowman and see how national bankruptcy would shatter every city in the Union.

Dropping corn! A simple thing, you say.

And yet, as those white seeds rattle down to the sod and hide away for a season, it needs no peculiar strength of fancy to see a Jacob's ladder crowded with ascending blessings.

Scornfully the railroad king would glance at these small teams in each small field; yet check those corn droppers, and his cars would rot on the road, and rust would devour the engines in the roundhouse. The banker would ride through those fields thinking only of his hoarded millions, nor would he ever startle himself with the thought that his millions would melt away in mist were those tiny hands never more to be found dropping corn.

The bondholder, proud in all the security of the untaxed receiver of other people's taxes, would see in these fields merely the industry from which he gathers tribute; it would never dawn on his mind that, without the opening of those furrows and the hurrying army of children dropping corn, his bond would not be worth the paper it is written on.

Great is the might of this Republic; great in its schools, churches, courts, legislatures; great in its towns and cities; great in its commerce; great in its manufactures; great in its colossal wealth.

But sweep from under it all these worn and wasted fields, strike into idleness or death the plowman, his wife, and his child, and what becomes of the gorgeous structure whose foundation is his fields?

Halt the food growers and what becomes of your gold and its intrinsic value?

How much of your gold can you eat?

How many of your diamonds will answer the need of a loaf? But enough.

It is time to ride down the hill. The tinkle of the cowbell follows the sinking sun—both on the way home.

So, with many an unspoken thought, I ride homeward, thinking of those who plant the corn.

And hard, indeed, would be the heart that, knowing what these people do and bear and suffer, would not fashion this prayer to the favored of the Republic:

"O rulers, lawmakers, soldiers, judges, bankers, merchants, editors, lawyers, doctors, preachers, bondholders, be not so unmindful of the toil and misery of those who feed you!"

Mr. OLIVER of Alabama. Mr. Chairman, I yield to the gentleman from Oklahoma [Mr. SWANK] such time as he may desire.

Mr. SWANK. Mr. Chairman and members of the committee, this short session of Congress convened on the 5th day of December, 1932, and since that time appropriation bills have been passed amounting to the sum of $1,485,455,833.57, and I sometimes wonder where the money is coming from to pay these expenses. It is true that nearly all money to pay the expenses of the Federal Government is derived from an income tax, and those with the taxable incomes pay most of the taxes. We must not overlook the fact, however, that incomes are greatly decreasing and many of the large incomes of former years have dwindled to nothing. The Treasury Department says that in the last year there has been a shrinkage of 23 per cent in the incomes of the people. In 1929, 513 men paid tax on an income of $1,000,000. In 1930 the number decreased to 150 and in 1931, 75 men paid a tax on an income of $1,000,000. We can not continue to appropriate billions of dollars each year without provisions for getting the money.

The best way to balance the Budget is to reduce expenses of Government and provide work for our people, instead of looking for additional methods to lay further taxes upon their bended backs. National, State, county, and local taxes must be reduced. Most of the taxes that burden our people are taxes other than Federal, such as State, county, and the taxes we vote upon ourselves. The people have not paid so much attention to this tax question until the depression arrived, but now the homes of our people are being sold for taxes, interest charges, and mortgages.

Mr. Chairman, the American home is the foundation of this Republic, and we should do everything possible to preserve the home and family life. With a happy and contented people we will have a firm and stable Government. This Government can not much longer survive with the great discontent on every hand, with people losing their homes, and with 12,000,000 men and women walking the streets and highways looking for work, and this number increasing daily. Home life can not be promoted with the continuance of high taxes. Even now, when our people are crying for tax relief to save their farms and homes, we hear the ominous sound of an attempt to levy a sales tax upon our people. Their homes have been taken for taxes, and now the great powers that have so much influence in our Government desire to levy a sales tax upon our people. If the money can be derived by a sales tax or any other tax, then expenses of Government will not be reduced. I favor a large reduction in expenses and am also opposed to a general sales tax.

In the early days of this session the House passed the eighteenth amendment repeal resolution and the beer bill, but a return to legalized liquor will not return prosperity. Speaking of platforms, I wish to call the attention of my Democratic colleagues to the fact that the Democratic platform of 1932 advocates "the enactment of every constitutional measure that will aid farmers to receive for their basic farm commodities prices in excess of cost." That platform also advocates an immediate and drastic reduction of governmental expenditures to accomplish a saving of not less than 25 per cent in the cost of Federal Government. If such a reduction were made in Federal expenditures, no additional tax levy would be necessary.

In the last session of Congress I introduced H. R. 7797, which is the Farmers' Union plan for farm relief. This bill provides a plan whereby farmers would receive at least cost of production on that part of their crops consumed in this country. The Democratic platform goes farther than that and advocates prices in excess of cost of production. The House has passed the domestic allotment farm bill, which I believe will bring a measure of relief to a stricken agriculture, if enacted into law.

The Washington Post, the chief Republican and special-interest paper of this section, in its issue of January 14, 1933, contained an editorial entitled "Farm Parity." It says that no sound remedy for the farmers' ills is known, and criticizes the allotment bill that passed the House a few days ago. The same paper, January 19, 1933, criticizes any money-expansion plan and the sponsors as "quack economists and politicians." This paper does not criticize the huge tax refunds in the sum of $65,000,000 for the year 1931. Statements have been put in the RECORD showing that many of those who have always received these big refunds have been liberal contributors to the Republican campaign. Well, thank goodness, this Washington Post will not have anything to do with the next administration, which will be administered for the whole people, but it has wielded a powerful influence since March 4, 1921.

In the last session of Congress a moratorium on foreign debts owing us was passed in the sum of $252,000,000 and the $2,000,000,000 Reconstruction Finance Corporation act was passed for the benefit of big business, thinking that perhaps a few pennies would trickle down to the average man, but not much of it has trickled. Congress should stop its policy of legislating for the big-business interests of this country and pass laws for all the people alike. There will be no return to prosperity until it returns to the farm, and the farmers can not continue to produce the necessities of life at less than cost.

Mr. Chairman, we are now standing upon the brink of disaster unless Congress acts for the people. Legislation can be enacted that will restore prosperity, provide a reasonable price to our farmers for their products, put people to work, rehabilitate business, and restore the purchasing power of our citizens. Some 100 Members of Congress of the different political parties have organized a "congressional forum," which has for its purpose the enactment of relief legislation. It is necessary that something be done at once and, for that reason, a bill was prepared by a special committee of this forum, of which I am proud to be a member, and this bill has been introduced. It authorizes and directs the Secretary of the Treasury to borrow money on the credit of the United States not exceeding $3,000,000,000 upon 1 per cent bonds issued by the Treasury Department, and immediately transferred by the Secretary of the Treasury to the Federal reserve agents of the Federal reserve banks. This bill provides for the issuance of Federal reserve notes or paper money against these bonds and a 20 per cent gold reserve. I believe the bond provision should be stricken from the bill and the currency issued without any bonds.

The Federal reserve act of December 3, 1913, provides that every Federal reserve bank shall maintain reserves of gold of not less than 40 per cent against its Federal reserve notes in actual circulation. We now have gold coin and bullion in the sum of $4,339,545,395. The circulation statement of the Treasury Department says that we have in circulation in all kinds of money the sum of $5,647,000,000. While that money is outside of the Treasury Department and is therefore said to be in circulation we must remember that there is not

probably more than half that amount actually circulating. If this bill or a similar bill were enacted into law and money put in circulation, relief would at once be had. Under our present gold standard law requiring a 40 per cent gold reserve, which is a high reserve, $11,000,000,000 in Federal reserve notes and currency could be issued, or an increase of nearly $6,000,000,000 over the amount of money now in circulation, as given by the Treasury Department.

When a national bank desires to have currency issued to it to loan to its customers it deposits United States bonds with the Treasury Department, and this department has the Bureau of Engraving and Printing issue money to the bank in the denominations desired. The bank is required to make a deposit in money of 5 per cent of the amount issued. When the bonds are taken up by the bank this 5 per cent deposit is returned. The only other charges on the bank are one-half of 1 per cent per annum for printing the money, 70 cents to $1.10 per $1,000 for redemption, which covers postage and destruction of old currency, and $5 per year for a Washington representative. The bank gets the interest on the bonds and then loans the money to its customers and collects interest charges. If the Treasury Department can issue money to the banks to loan to the people, it can also issue money upon as sound a basis as provided in this bill, and the money would be used to pay salaries, pensions, and other expenses of government, and thus be placed in circulation.

The report of the Comptroller of the Currency shows that the banks of this country have cash in their vaults in the sum of $791,627,000 and deposits of $45,390,269,000. From these figures it is seen that the amounts the banks have in their vaults is less than 2 per cent of their deposits, and yet we hear the objection of issuing currency against our gold reserve on our gold-standard basis of 40 per cent.

During the past 12 years 1,571 national banks, with deposits of $1,143,857,000, failed in this country, and State and private banks to the number of 8,913 failed, with deposits of $3,738,624,000. This makes a total of 10,484 bank failures in this time, with total deposits of $4,882,481,000. Legislation must be enacted to put a stop to these failures and that can be done. If more currency is placed in circulation and business revived, we will have accomplished the greatest result in this direction. Most of these failures have been no fault of the local banks and bankers, but by reason of the currency contraction and deflation by the Federal Reserve Board, and by reason of loans which were good when made and are uncollectible now. The Federal Reserve Board can, under its authority now, put the needed money in circulation, under the gold standard act, and no further law is needed if the board would act for the best interests of the people. In my judgment, one of our greatest needs is a complete reorganization of the personnel of the Federal Reserve Board, and the appointment of men who are in complete sympathy with the masses of our citizens, and who will act for the best interests of our country. I hope and believe that when the incoming administration is inaugurated this needed change will be made. The personnel of the board should be changed or the Federal reserve act should be repealed.

In addition to this measure, I believe silver should be remonetized and used as a basis for issuing silver certificates or currency, the same as gold certificates are issued against gold in the Treasury Department. Several good silver bills have been introduced, and I trust that some of them will be enacted into law in the next Congress. What this country needs is more stable money in circulation, and I have never heard a single Member of Congress nor any economist deny that fact. The gold dollar is too high and farm commodities too low, by reason of the increased price of gold. A decrease in the exchange value of money always means a corresponding increase in commodity prices and vice versa. The question of the return to prosperity must be solved by a change in our monetary system, and the control of our money must be taken out of the hands of the international bankers who are trying to cancel the debts that foreign governments owe us, and the power "to coin money and regulate its value" must be returned to Congress, as provided in the Constitution. Money provided to be issued by the direction of the Treasury Department, as provided in the bill mentioned, and the issuance of silver certificates against silver can not be called dishonest or fiat money. It would all be done under our present gold standard law and would put money in circulation.

The original standard English pound was a bar of silver, which represented a pound in value; and this was divided into 20 parts, called shillings; and the shilling was divided into 12 parts, called pence. During the reign of King Edward III he needed money to pay his debts, and he ordered the pound of silver to be divided into 22 parts, and by proclamation ordered that each of these pieces should be called a shilling and should be accepted as such in payment of the debts of the country and also of private debts. History says that this caused an increase in the prices of commodities. Bills have been introduced in this Congress to lessen the gold content of the dollar in a similar manner.

There would be no surplus of farm products if the people could find work and earn money to enable them to buy the necessities of life. The selfish money interests of the country will no doubt oppose bills of this nature, as they have done in the past, but in the last election the people of this country were enthroned, and I believe a different policy is going to be pursued. Everyone says that something should be done, but there is no action taken, and we can not expect any during the continuance of the present régime. On the 4th day of March, however, a new administration will be inaugurated to take over and administer the affairs of this Government. That administration was elected upon a platform of reform and progressivism. The people are expecting relief, and I believe that they will not be disappointed. The big money interests of the country, the financial wizards, and captains of industry have imposed upon the people long enough and they are not going to submit much longer, like galley slaves or peons. Almost daily we read in the papers where law-abiding farmers have assembled at courthouses and stopped foreclosures on homes, and this action just shows the determination of the people to have remedial legislation passed. I can not understand why those in charge of the affairs of government will not advocate something that will bring relief to all the people, instead of legislation for a few of the big boys who contribute so liberally to campaigns.

Mr. Chairman, our people have been patient and long suffering and we have about arrived now to the place where action must be taken. After the 4th of March the Democratic Party, of which I am proud to be a member, will be in charge, and I hope and believe a change will be had for the benefit of all the people of the country, big and little alike. The $208,000,000,000 of debts in this country can not be paid with the present value of the gold dollar. Most of the mortgages upon homes of the people of this country were made when wheat was selling for $1 or more per bushel and cotton at not less than 15 cents per pound; and now, if paid at all, they must be paid with wheat at 25 cents per bushel and cotton at 5 to 6 cents per pound. There must be a decrease in the value of the gold dollar and an increase in the price of farm products, or else a great reduction in mortgages, if they are ever paid.

Why talk, discourse, and argue, when such a crisis confronts us? It is time for action. Put sound money in circulation, restore business, put people to work, and we can meet expenses without any further tax bill; yes, we can eliminate from the present tax law many of the nuisance taxes, have money with which to run our schools and save the homes of our people. The people are waiting for the new administration. The time for argument will soon be over and the people are going to have action. We must not have revolution in our country, but the people must be protected. Special laws, like our present tariff laws, for a privileged few must not be continued, and the clutches of a few selfish money interests must be removed from the Treasury of the United States. I feel confident that the new administration, so overwhelmingly elected last November, will

bring about the needed change and that a reasonable prosperity will soon be with us again. [Applause.]

Mr. OLIVER of Alabama. Mr. Chairman, I yield five minutes to the gentleman from Arkansas [Mr. GLOVER].

Mr. GLOVER. Mr. Chairman, I am sorry, indeed, that the entire membership was not present this evening to listen to the eloquent address by the gentleman from Georgia [Mr. LANKFORD] on dropping corn. It made me think of my boyhood days when, as a barefoot lad, I performed that task myself, and thus I appreciate those good days. [Applause.]

Possibly there is no question now before the American people that has been discussed more than the paying of the adjusted-service certificates to the soldiers of the World War. This question should be solved and the soldiers of this country cared for as they should be.

Many of those who went to war had the business they were engaged in at that time broken up and have returned home to try to start again in life and under this time of distress and depression many of them are having to fight another hard battle. The soldiers of this country have been poorer paid than any nation of like ability. Besides that, the United States furnished the most of the money to carry on the World War.

Our boys were called under the selective draft, drafted and sent into the foreign land to fight under the command of the officers of this Government. It was not a matter of choice with them, but became a duty when called into service. They were without fear, not knowing what the consequences might be to them and their loved ones. More than 200,000 of our American boys fell in this great conflict and many thousand more were injured for life.

A bill was introduced last year and discussed at great length trying to solve the problem of how to pay the adjusted-service certificates with the result that nothing was accomplished. Again it has been considered and nothing done during this session of Congress. It would be a matter of impossibility now to raise enough funds to pay off these adjusted-service certificates.

I think that my bill H. R. 14362 will be highly satisfactory to every holder of an adjusted-service certificate and will be fair and just to both the soldier and the National Government. The protest made against the payment of the certificates now has been that the Government was not able to pay them. My bill takes care of that situation and properly cares for the soldier and does not place a burden on the Government that it can not well afford to bear.

Section 1 of my bill provides as follows:

That from and after the passage of this act the adjusted-service certificates issued to the veterans of the World War, under the act of 1924, due and payable in 1945, shall bear interest at the rate of 3½ per cent, payable annually by the Treasurer of the United States Government, out of any funds not otherwise appropriated.

The service certificates issued to them were payable in 1945 without interest. The soldier to borrow money on his service certificate has been required to pay 3½ per cent interest on the amount he borrowed. My bill reverses the interest charge, and provides for the annual payment of the interest on these service certificates by the Government.

Section 2 of my bill is as follows:

Said adjusted-service certificates are by this act made negotiable and may be negotiated as any other negotiable paper, but shall not be sold for less than their face value.

Under this provision of the bill the adjusted-service certificate could be cashed without any hesitancy and would put $2,400,000,000 immediately into circulation, and it would go to every corner and part of the United States.

The great trouble we have had in the past in trying to expand the currency is how to get it out and get it into immediate circulation. This bill would put the $2,400,000,000 immediately into service and use.

This section also provides that they shall not be sold for less than their face value. That prevents the soldier from being deprived of the full value of his certificate. Government bonds sell to-day at a rate of interest much less than this, and every adjusted-service certificate could be cashed within 30 days after they were allowed to be negotiated as provided for in this bill.

Section 3 of the bill provides as follows:

Any sale or exchange of said certificate for less than face value is hereby declared void.

And, Section 4 simply repeals the laws in conflict with this act.

This bill will serve two great purposes: First, it will do justice to the soldier; and second, it will put money enough into circulation to stimulate business and start us forward again. Not only this, but it will prove to be economical for the Government to pay this rate of interest for this reason. As every informed person knows, the cause of an unbalanced budget is the fact that our revenues from incomes have fallen off within the last two years nearly $1,000,000,000. This amount of money, $2,400,000,000, put into circulation and used at once, would so stimulate business and trade that the revenue derived from incomes from the effects of this bill would very much more than care for the interest amount that the Government would be required to pay. The Government would not be required to pay anything until the end of one year, and then only the interest, and the interest then paid annually from that time on until 1945. The soldier who might be able to do so could well afford then to hold his certificate.

Mr. HOOPER. Will the gentleman yield?

Mr. GLOVER. I yield.

Mr. HOOPER. Is this money due yet?

Mr. GLOVER. Well, not under the act. It is not due under the act, but morally it is due.

Mr. HOOPER. Why should we pay the money 12 years before it is due?

Mr. GLOVER. I am not asking that you pay it. I am not asking the Government to pay it until it is due in 1945. I am simply saying to that man who fought a battle and won a victory for you that he ought to have the right to handle his own paper; he ought to have the right to sell it. It does not cost your Government anything. It would not cost one penny's interest for one year, until all this money is put out into use, and the Government could get in revenue collection from the operation of that money in business, and then we would not have to have any inflation or even talk about it.

A table was placed into the RECORD last year showing how much would go back to each State if this amount of money was paid to the soldier, and it showed that more than $25,000,000 would be paid back to my State, the State of Arkansas, and much larger sums would be paid to the States of greater population and having more soldiers.

The moral and patriotic effect that this would have on the boys who fought in the last war would be wonderful. This would show to the boys who went and fought for our liberty that we meant what we said when we told them to go and make good soldiers and we would take care of them.

This bill simply puts the matter up to Congress as to whether or not they are willing to pay the adjusted-service certificates and the debt that the National Government owed to these boys. If this should be done now, and they were ever called again to service, they would know the attitude of the United States Government toward taking care of them after they have made the great sacrifice.

Mr. LANKFORD of Georgia. Mr. Chairman, will the gentleman yield?

Mr. GLOVER. I yield.

Mr. LANKFORD of Georgia. The statement is made that this debt is not due. It is an honest obligation owed by the Government. Does not the gentleman think if we owe this money that we should consider paying it at the present time? It takes two to make a contract. Congress said this money is not due for many years, but the individual veteran did not agree to this extension. I feel it should be paid now.

Mr. GLOVER. I agree with the gentleman. It was manifestly unjust to agree to give them this additional sum for their services and then defer its payment until 1945 and put on a scheme of interest which would take up every dollar the soldier has in it, or practically so.

When this call was made by foreign nations to come over and help them make the world safe for democracy, no one then ever dreamed that in so short a time these nations would forget the great sacrifice of men and money that we made to help them.

France was fighting with her back to the wall, and her capital would soon have fallen had it not been for the rushing of American soldiers into the battle line to save them. Now they have shown their lack of appreciation of this by default in the payment of that which was due us on borrowed money and interest this year.

The United States Government sold bonds and raised money to loan to this nation and others to fight their battles. These bonds are outstanding now and bearing interest, and it is unthinkable that this nation, which is one of the richest nations now in the world, would repudiate their debt and place this burden of paying for this money borrowed on the backs of the taxpayers of the United States.

I for one shall contend to the last moment that they shall pay every dollar that they owe this Government with interest. In the settlement made with them around $4,000,000,000 were given them in the settlement. Now to think they would try to withhold the other is absolutely incomprehensible. We hope they will reverse their action, and I believe they will, and pay this debt that they so justly owe the United States Government.

Mr. HOOPER. Mr. Chairman, will the gentleman yield?

Mr. GLOVER. I yield.

Mr. HOOPER. Are the soldiers in any different position than any other person as regards the payment of their money before it is due?

Mr. GLOVER. Oh, the gentleman ought to recognize that this is a legislative body.

Mr. HOOPER. I do.

Mr. GLOVER. I do not propose to change the time of paying this debt. If the gentleman will read the bill he will find that it does not mean that the Government redeems a single one of these certificates until 1945, and not one penny of interest is paid for one year.

Mr. HART. Mr. Chairman, will the gentleman yield?

Mr. GLOVER. I yield.

Mr. HART. Would it be any worse for us to adjust the time, or adjust the contract with the soldier, than for us to adjust the contracts of France, England, and Italy when they have agreed to pay?

Mr. GLOVER. I believe we ought to do justice first to our own boys. We had 200,000 of them who fell in foreign fields. Others are back here wounded and diseased in our hospitals to be cared for. Many others who were in good businesses were taken out by the selective draft, taken away from their businesses and put into a foreign land. This calamity has come upon them and they are in the greatest distress.

Mr. HOOPER. Will the gentleman yield again?

Mr. GLOVER. I yield.

Mr. HOOPER. Does the gentleman know of any other country that would pay a debt to any group of its citizens before it was due?

Mr. GLOVER. The gentleman can not be informed, I am afraid. I have told the gentleman three or four times that we are not going to pay these certificates before they are due.

In the same sense that France is obligated to pay her indebtedness to the United States Government, just so is the United States Government obligated to pay the soldier his adjusted-service certificate. My bill, H. R. 14362, makes this possible, and I hope we may pass it before the adjournment of this session of Congress. [Applause.]

Mr. OLIVER of Alabama. Mr. Chairman, I yield 10 minutes to the gentleman from Ohio [Mr. WEST].

Mr. WEST. Mr. Chairman and gentlemen of the committee, while we are discussing the various appropriation bills during this session of Congress, there are a number of important considerations which should guide us in determining the extent to which we are going to carry out what we believe are wise and sound principles of economy in the administration of public affairs during the coming year.

There is at the present time, as all of us know, a widespread and well-founded feeling throughout the country that a determined effort must be made to bring the cost of government within reasonable limits and bring the tax burden down to such a size that it will not carry with it too severe and unreasonable a hardship upon the people during this time of depression.

There was a time a few years ago when the income of the American people amounted to $90,000,000,000. At that time the total cost of Government, in the Nation and in the States and in the various local areas of government, amounted to about $10,000,000,000. This tax burden constituted about 10 per cent of the total income of our people, but during the course of this depression as we have gone on year after year and seen such drastic reductions in the income of the American people, we have come to the time when the total national income has been reduced, to a sum which is estimated this year at about $45,000,000,000. But instead of there being a corresponding drastic reduction in the cost of government in the Nation and in the States, this tax burden has gone on year after year, and we have increased the appropriations in the Federal Government and in the State governments until we are spending in this country practically $15,000,000,000 on government, or more than 30 per cent of the income of the people. This tax burden has become so great, and is resting so heavily upon the American people, that it will soon become intolerable. The cost of government must be reduced. The responsibility for this reduction so far as the Federal Government is concerned rests upon us.

But along with the realization of this increased burden there must be also a recognition upon our part that we should discriminate very carefully in regard to the appropriations that we make, so that the essential functions of government should not be impaired, and the definite obligations resting upon the Federal Government should not be ignored.

During this present session of Congress probably we shall appropriate $3,600,000,000. I presume that this is more than $100,000,000 under the President's recommendation. Our Appropriation Committee and the various subcommittees dealing with these various bills have very ably endeavored to bring this total down as reasonably and to as low a level as is consistent with the essential activities of the Government and in accordance with desirable standards of efficiency in the administration of public affairs. In this total you find in three items nearly three-fourths of our total expenditures. The item for the maintenance of the debt service, the interest on the national debt, and the sinking fund, amount to $1,200,000,000. We are spending somewhat over $900,000,000 on the various agencies of the Veterans' Administration.

We are spending something like $700,000,000 on the maintenance of the various establishments for the military and nonmilitary and naval activities of our Government.

This total is $2,800,000,000, leaving a balance of $800,000,000 for the maintenance of the civil establishment of the Government. If you take out of this the $141,000,000 or so that we spend on public works and highways, take the annual appropriation for the District of Columbia, take the post-office deficit, which a short while ago was $67,000,000 and which I have just been told by a member of the Appropriations Committee may run over $100,000,000 this year, we would be taking off of this balance of $800,000,000 something like $250,000,000 more, leaving for the maintenance of the civil establishment of the Government about $550,000,000.

This is only 14 per cent of the total of our appropriations. Eighteen years ago, back in 1915, when the total appropriation, of course, was only somewhat over $700,000,000, then the item for the maintenance of the civil establishment of the Government represented about 30 per cent of the total. We have cut the proportionate cost of the civil government 50 per cent in 18 years.

Let us realize, very definitely and very frankly, that the so-called untouchables in our Budget, those items that are fixed, those items which at the present time constitute the great bulk of our expenditures, are the ones that should

cause us serious concern; and that we can not, without impairment of our national administrative services, cut some of these appropriations in the bills before us more drastically than they have been cut through the work of our Appropriations Committee.

We must face frankly the fact we are not receiving an income at the present time, during this period of depression, sufficient to maintain all of these various items. The President says we will only get about $2,900,000,000, and this may fall short $300,000,000 and bring us down to $2,600,000,000.

Mr. Chairman, this is the condition that confronts us. If you would, for one year, suspend every activity of government in the civil establishment, abandon the activities of Congress and the various departments for one year, you are not getting enough in revenue during this time to maintain the civil establishment of our Government.

This matter of Government economy is a matter that is a challenge to us at the present time in this session, and this problem will become increasingly acute unless we realize very frankly the nature of these appropriations; on the one hand, the necessity that the services of Government that are maintained to promote the public welfare shall not be impaired, and, on the other hand, that we should very frankly and courageously take into account those elements in our National Budget that are constituting the bulk of Federal expenditure at the present time.

We are facing a crisis in our country that is almost beyond the endurance of our people. Unless we lighten this burden, unless we bring the tax burden in our Federal Government expenditures and in our various State expenditures down to a level that is commensurate with the national income at the present time, we are not going to bring relief to our people but are going to add to their distress and definitely retard business recovery.

This, it seems to me, is one of the elements in the problem of economy as we consider the various parts of this appropriation bill and the others that are before us in this session, and demands our most earnest and courageous attention if we are properly to discharge our responsibility to the people at this time. [Applause.]

Mr. OLIVER of Alabama. Mr. Chairman, I move that the committee do now rise.

The motion was agreed to.

Accordingly the committee rose; and the Speaker having resumed the chair, Mr. OLIVER of New York, Chairman of the Committee of the Whole House on the state of the Union, reported that that committee, having had under consideration the bill H. R. 14363, the State, Justice, Judiciary, Commerce, and Labor appropriation bill, had come to no resolution thereon.

LEAVE OF ABSENCE

By unanimous consent, leave of absence was granted to Mr. ROMJUE, indefinitely, on account of illness.

ADJOURNMENT

Mr. OLIVER of Alabama. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 8 o'clock and 12 minutes p. m.) the House adjourned until to-morrow, Thursday, January 26, 1933, at 12 o'clock noon.

COMMITTEE HEARINGS

Tentative list of committee hearings scheduled for Thursday, January 26, 1933, as reported to the floor leader:

WAYS AND MEANS

(10 a. m.)

Subcommittee hearings on H. R. 13999, depreciated currency.

LABOR

(10 a. m.)

Continue hearings on 5-day week and 6-hour day proposals.

DISTRICT OF COLUMBIA—SUBCOMMITTEE ON THE JUDICIARY

(10 a. m., caucus room)

Continue hearings on District beer bill.

BANKING AND CURRENCY

(10.30 a. m.)

Continue hearings on farm mortgage and silver bills.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of Rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

881. A letter from the Secretary of the Treasury, transmitting the final report, prepared by the Surgeon General of the Public Health Service, on the extent and circumstances of cooperation by the Public Health Service with State and local authorities in the conduct of rural health work in the drought-stricken areas under the terms of the appropriation for the period February 6, 1931, to June 30, 1932 (H. Doc. No. 530); to the Committee on Interstate and Foreign Commerce and ordered to be printed.

882. A letter from the Secretary of the Navy, transmitting draft of a bill for the relief of St. Anthony Hospital, at Michigan City, Ind., Dr. Russell A. Gilmore, Emily Molzen, nurse, and the Hummer mortuary; to the Committee on Claims.

883. A letter from the Secretary of the Navy, transmitting draft of a bill for the relief of Mrs. Carlysle Von Thomas, sr.; to the Committee on Claims.

884. A letter from the Secretary of War, transmitting draft of a bill to amend the act of May 22, 1928, to authorize the collection, in monthly installments, of indebtedness due the United States from enlisted men, and for other purposes; to the Committee on Military Affairs.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of Rule XIII,

Mr. SHALLENBERGER: Committee on Interstate and Foreign Commerce. S. 5235. An act to extend the times for commencing and completing the construction of a bridge across the Missouri River at or near Brownville, Nebr.; without amendment (Rept. No. 1910). Referred to the House Calendar.

Mr. LEA: Committee on Interstate and Foreign Commerce. S. 5357. An act to extend the times for commencing and completing the construction of a bridge across the Columbia River at or near Astoria, Oreg.; without amendment (Rept. No. 1911). Referred to the House Calendar.

Mr. SHALLENBERGER: Committee on Interstate and Foreign Commerce. H. R. 14126. A bill authorizing John C. Mullen, John H. Hutchings, both of Falls City, Nebr., and William Shepherd, of Rulo, Nebr., his or their heirs, legal representatives, and assigns, to construct, maintain, and operate a bridge across the Missouri River at or near Rulo, Nebr.; with amendment (Rept. No. 1912). Referred to the House Calendar.

Mr. CHAPMAN: Committee on Interstate and Foreign Commerce. H. R. 14129. A bill to extend the time for the construction of a bridge across that portion of Lake Michigan lying opposite the entrance to Chicago River, Ill.; and a bridge across the Michigan Canal, otherwise known as the Ogden Slip, in the city of Chicago, Ill.; with amendment (Rept. No. 1913). Referred to the House Calendar.

Mr. CORNING: Committee on Interstate and Foreign Commerce. H. R. 14200. A bill to extend the times for commencing and completing the construction of a bridge across the St. Lawrence River near Alexandria Bay, N. Y.; with amendment (Rept. No. 1914). Referred to the House Calendar.

REPORTS OF COMMITTEES ON PRIVATE BILLS AND RESOLUTIONS

Under clause 2 of Rule XIII,

Mrs. KAHN: Committee on Military Affairs. H. R. 636. A bill to convey certain lands in the county of Los Angeles, State of California; with amendment (Rept. No. 1908). Referred to the Committee of the Whole House.

Mr. SWANK: Committee on Claims. H. R. 14040. A bill for the relief of Edgar Stivers; with amendment (Rept. No. 1909). Referred to the Committee of the Whole House.

CHANGE OF REFERENCE

Under clause 2 of Rule XXII, committees were discharged from the consideration of the following bills, which were referred as follows:

A bill (H. R. 13442) for the relief of William George O'Neal; Committee on Military Affairs discharged, and referred to the Committee on Naval Affairs.

A bill (H. R. 12070) granting an increase of pension to Clarence W. Failor; Committee on Pensions discharged, and referred to the Committee on Invalid Pensions.

PUBLIC BILLS AND RESOLUTIONS

Under clause 3 of Rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. SIROVICH: A bill (H. R. 14410) to amend section 3 of the act of May 28, 1928, relating to salary rates of certain civil-service positions; to the Committee on the Civil Service.

By Mr. GARNER: A bill (H. R. 14411) to extend the time for the construction of a bridge across the Rio Grande at Boca Chica, Tex.; to the Committee on Interstate and Foreign Commerce.

By Mr. WARREN: A bill (H. R. 14412) to enable the United States Roanoke Colony Commission to carry out and give effect to certain plans for the comprehensive observance of the three hundred and fiftieth anniversary of the birth of English-speaking civilization in America; to the Committee on the Library.

By Mr. CONNERY: A bill (H. R. 14413) to protect American labor by equalizing the cost in the United States of articles imported from foreign countries, the currency of which has depreciated; to the Committee on Ways and Means.

By Mr. SWEENEY: A bill (H. R. 14414) to permit payment of any sum due under the civil-service retirement act to a deceased employee or a former employee who has become incompetent where no demand has been made by an administrator, executor, or guardian; to the Committee on the Civil Service.

By Mr. REED of New York: A bill (H. R. 14415) to repeal the tax on certain grape juice; to the Committee on Ways and Means.

By Mr. COLLIER: A bill (H. R. 14416) to make the Federal gasoline tax effective until June 30, 1934; to the Committee on Ways and Means.

By Mr. STEAGALL: A bill (H. R. 14417) to provide emergency relief with respect to agricultural indebtedness, and for other purposes; to the Committee on Banking and Currency.

By Mr. MURPHY: A bill (H. R. 14418) to fix an American valuation of imported merchandise for the assessment of customs duties; to the Committee on Ways and Means.

By Mr. McCORMACK: A bill (H. R. 14419) to amend section 3 of the act of May 28, 1928, relating to salary rates of certain civil-service positions; to the Committee on the Civil Service.

By Mr. McLEOD: A bill (H. R. 14420) to provide a tax on the sale on margin of corporate securities; to the Committee on Ways and Means.

By Mr. BLAND: A bill (H. R. 14421) enlarging section 270, title 40, United States Code, and providing, and relating to, a remedy for the enforcement of the payment of all wages due, and to become due, to all laborers and mechanics under the terms and provisions of an act approved March 3, 1931, entitled "An act relating to the rate of wages for laborers and mechanics employed on public buildings of the United States and the District of Columbia by contractors and subcontractors, and for other purposes"; to the Committee on the Judiciary.

By Mr. HAWLEY: A bill (H. R. 14428) to prevent loss of revenue, to provide employment for American labor, and to protect the industries and agriculture of the United States against the effects of depreciation in foreign currency; to the Committee on Ways and Means.

By Mr. FITZPATRICK: Joint resolution (H. J. Res. 576) to limit the reductions in compensation applicable to certain employees whose compensation for any month is less than the monthly rate of compensation to which the economy act applies; to the Committee on Expenditures in the Executive Departments.

MEMORIALS

Under clause 3 of Rule XXII, memorials were presented and referred as follows:

Memorial of the Legislature of the State of New York, memorializing Congress to adopt the relief bills proposed by Senator WAGNER; to the Committee on Banking and Currency.

PRIVATE BILLS AND RESOLUTIONS

Under clause 1 of Rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. BRUMM: A bill (H. R. 14422) granting a pension to William F. Yeager; to the Committee on Invalid Pensions.

By Mr. HORNOR: A bill (H. R. 14423) for the relief of Edwin M. Rapp; to the Committee on Military Affairs.

By Mr. MANLOVE: A bill (H. R. 14424) granting a pension to Sallie Babb; to the Committee on Invalid Pensions.

By Mr. MOORE of Ohio: A bill (H. R. 14425) granting a pension to Sarah Ellen McCall; to the Committee on Invalid Pensions.

By Mr. MURPHY: A bill (H. R. 14426) granting an increase of pension to Ursula Gates; to the Committee on Invalid Pensions.

By Mr. SWING: A bill (H. R. 14427) granting a pension to John Burton Hughes; to the Committee on Pensions.

PETITIONS, ETC.

Under clause 1 of Rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

9880. By Mr. BACON: Petition of sundry citizens of Patchogue, N. Y., opposing the modification or repeal of the Volstead Act or the repeal of the eighteenth amendment; to the Committee on the Judiciary.

9881. By Mr. BULWINKLE: Petition of citizens from the tenth congressional district of North Carolina, protesting against any change in the prohibition law; to the Committee on the Judiciary.

9882. Also, petition of citizens of Mecklenburg County, protesting against prohibition repeal; to the Committee on the Judiciary.

9883. Also, petition of citizens of Gaston, Lincoln, and Catawba Counties, protesting against prohibition repeal; to the Committee on the Judiciary.

9884. By Mr. CHRISTGAU: Resolution adopted by the Woman's Art Class, Winona, Minn., urging support of Senate bill 1079 and Senate Resolution 170; to the Committee on Interstate and Foreign Commerce.

9885. Also, resolution adopted by the Ringe Mother and Daughters' Club, of Rochester, Minn., urging support of Senate bill 1079 and Senate Resolution 170; to the committee on Interstate and Foreign Commerce.

9886. Also, resolutions adopted by the Minnesota Implement Dealers' Association, favoring tax reduction, passage of the Capper-Kelly resale bill, change in bankruptcy laws, voluntary domestic-allotment proposal, and criticizing the reports of the Bureau of Agricultural Economics with reference to implement prices, and urging abolition of the Federal Farm Board; to the Committee on Agriculture.

9887. Also, resolution unanimously adopted by the Woman's Christian Temperance Union of Lynd, Minn., protesting against any repeal or modification of the eighteenth amendment, and urging adequate appropriations for law enforcement and for a campaign of education in law observance; to the Committee on the Judiciary.

9888. Also, resolution adopted by the Hibbing Advertising Club on January 13, 1933, urging the restoration of the 2-cent postage rate; to the Committee on Ways and Means.

9889. Also, petition of the Ada Woman's Christian Temperance Union, Ada, Minn., protesting against any repeal or modification of the eighteenth amendment, and urging ade-

quate appropriations for law enforcement; to the Committee on the Judiciary.

9890. Also, petition of the Farm Bureau unit in Florence Township, Red Wing, Minn., protesting against any proposed sales tax; to the Committee on Ways and Means.

9891. Also, petition of citizens of Morris, Minn., protesting against any repeal or modification of the eighteenth amendment and urging adequate appropriations for law enforcement; to the Committee on the Judiciary.

9892. Also, petition of Trinity Lutheran congregation, of Minneapolis, Minn., protesting against any repeal or modification of the eighteenth amendment and urging its strictest enforcement; to the Committee on the Judiciary.

9893. Also, petition of the Woman's Christian Temperance Union of Rochester, Minn., protesting against any repeal or modification of the eighteenth amendment and urging adequate appropriations for law enforcement; to the Committee on the Judiciary.

9894. By Mr. CROWTHER: Petition of citizens of Amsterdam, N. Y., opposing legalization of alcoholic liquors stronger than one-half of 1 per cent; to the Committee on Ways and Means.

9895. Also, petition of citizens of Long Lake, N. Y., urging passage of the stop-alien-representation amendment to the United States Constitution, House Joint Resolution No. 97; to the Committee on the Judiciary.

9896. By Mr. DELANEY: Petition of the World Calendar Association (Inc.), of New York, urging the reform of the present calendar as soon as possible; to the Committee on the Judiciary.

9897. Also, petition of the Leghorn Trading Co. (Inc.), of New York, protesting against the amendment relative to oils and fats in the farm relief bill recently passed by the House; to the Committee on Agriculture.

9898. By Mr. HAINES: Resolution of York County (Pa.) Patriotic Order Sons of America, supporting cardinal American principles and protesting against the pardon of communists and admittance of foreign-mined coal into our country; to the Committee on the Judiciary.

9899. By Mr. HANCOCK of New York: Petition of Rev. DeWitt S. Hooker and other residents of Onondaga County, N. Y., favoring the stop-alien amendment to the Constitution; to the Committee on the Judiciary.

9900. By Mr. HOOPER: Petition of residents of Battle Creek, Mich., protesting against the passage of House bill 13742, or other measures in opposition to the eighteenth amendment; to the Committee on the Judiciary.

9901. By Mr. MARTIN of Massachusetts: Petition of George E. Massey and sundry residents of Blackstone, Mass., asking for legislation to revaluate the gold ounce; to the Committee on Banking and Currency.

9902. By Mr. MURPHY: Petition of 10 residents of East Liverpool, Ohio, urging the adoption of the Sparks-Capper stop alien representation bill; to the Committee on the Judiciary.

9903. By Mr. PERKINS: Resolution adopted by the Bergen County (N. J.) Woman's Christian Temperance Union, an organization of 633 members, protesting against the nullification, weakening, or repeal of the eighteenth amendment and the Volstead Act, and for adequate appropriations for law enforcement and a campaign of education in law observance; to the Committee on the Judiciary.

9904. By Mr. RUDD: Petition of Leghorn Trading Co., New York City, referring to the Andresen amendment to the farm relief bill, H. R. 13991; to the Committee on Agriculture.

9905. By Mr. SHREVE: Petition of the Woman's Christian Temperance Union of Spartansburg, Pa., urging the passage of the stop-alien-representation amendment to the Constitution; to the Committee on the Judiciary.

9906. By Mr. SPENCE: Petition of the cities of Pineville, Earlington, and Covington, Ky., referring to the removal of restrictions against using Federal funds on municipal streets where they are a part of the Federal system of roads; to the Committee on Roads.

9907. Also, petition of Frank J. Fedders, Mrs. Edward Ehme, John G. Exterkamp, and others, of Covington, and Leo J. Schweer, Dayton, all of the State of Kentucky, referring to the revaluation of the gold ounce, mass-production banking legislation; to the Committee on Banking and Currency.

9908. By Mr. STALKER: Petition of Oswald Baker and 25 other residents of R. F. D. No. 2, Ithaca, N. Y., urging support of the stop-alien-representation amendment to the United States Constitution to cut out aliens, and count only American citizens, when making future apportionments for congressional districts; to the Committee on the Judiciary.

9909. Also, petition of Louise Huttel and 58 other residents of Berkshire and Richford, N. Y., urging support of the stop-alien-representation amendment to the United States Constitution to cut out aliens, and count only American citizens, when making future apportionments for congressional districts; to the Committee on the Judiciary.

9910. Also, petition of 1,576 members of the missionary societies of the churches of Elmira, N. Y., signed by the following secretaries of the societies: Mrs. W. W. Goodwin, Pennsylvania Avenue Methodist Episcopal Church; Esther Saterlee, Park Church; Mary Carrol, Baptist and Methodist Episcopal Church, Breesport; Emma Banks, Riverside Methodist Episcopal Church; Mrs. Charles C. Cornish, Centenary Methodist Episcopal Church; Mrs. J. W. Faust, West Side Methodist Episcopal Church; Hattie M. Rockwell, Hedding Methodist Episcopal Church; Lottie S. Hurley, First Baptist Church; and Mary Brownlow, First Methodist Episcopal Church, to vote against the return of beer and against the repeal of the eighteenth amendment; to the Committee on the Judiciary.

9911. By Mr. SWICK: Petition of Dr. C. E. Imbrie and 78 members of the First United Presbyterian Church of Butler, Butler County, Pa., urging that the eighteenth amendment to the Constitution of the United States and the Volstead Act be retained as they are, and requesting the adoption of the stop-alien amendment providing for the exclusion of aliens from the count to apportion Representatives; to the Committee on the Judiciary.

9912. By Mr. WHITLEY: Petition of citizens of Rochester, N. Y., opposing any reduction in the number of the personnel of the United States Marine Corps; to the Committee on Appropriations.

9913. By Mr. WOOD of Indiana: Petition signed by residents of Lowell and Shelby, Ind., asking favorable action on the stop-alien-representation amendment to the United States Constitution; to the Committee on the Judiciary.

9914. Also, petition signed by residents of Earl Park, Raub, Elkhart, and others of the State of Indiana, urging the enactment of the stop-alien-representation amendment to the United States Constitution; to the Committee on the Judiciary.

9915. Also, petition signed by the young people of the second congressional district of Indiana, against the repeal or modification of the eighteenth amendment; to the Committee on the Judiciary.

9916. Also, petition signed by voters of the second congressional district of Indiana, against the repeal or modification of the eighteenth amendment; to the Committee on the Judiciary.

9917. Also, petition signed by residents of Hamlet and Pierceton, Ind., against the repeal or modification of the eighteenth amendment; to the Committee on the Judiciary.

9918. Also, petition signed by Rev. W. D. Archibald and other residents of Indiana, against the repeal or modification of the eighteenth amendment; to the Committee on the Judiciary.

9919. By the SPEAKER: Petition of the City Council of Newark, Ohio, urging no repeal or modifications of existing Federal laws enacted for the benefit of veterans and their dependents, and that the Federal Government issue to the holders of adjusted-compensation certificates some medium of exchange which will be exchangeable as currency and

redeemable by the Federal Government in 1945; to the Committee on Ways and Means.

9920. Also, petition of residents of the District of Columbia, protesting against relief being granted only to married men and single women; to the Committee on the District of Columbia.

SENATE

THURSDAY, JANUARY 26, 1933

(Legislative day of Tuesday, January 10, 1933)

The Senate met at 12 o'clock meridian, on the expiration of the recess.

MONTHLY REPORT OF RECONSTRUCTION FINANCE CORPORATION

The VICE PRESIDENT laid before the Senate a letter from the chairman of the Reconstruction Finance Corporation, reporting, pursuant to law, on the activities and expenditures of the corporation for December, 1932, together with a statement of loans authorized during that month, showing the name, amount, and rate of interest in each case, which, with the accompanying tables, was referred to the Committee on Banking and Currency.

PRESIDENTIAL POST OFFICES (S. DOC. NO. 176)

The VICE PRESIDENT laid before the Senate a letter from the secretary of the Civil Service Commission, transmitting, in further response to Senate Resolution 303 (submitted by Mr. MCKELLAR, relative to lists of positions or places not under the civil service), a list of post offices of the first, second, and third classes, being Table IX, presidential post offices (first, second, and third classes), arranged alphabetically by States, with date of expiration of commission and salary of each postmaster, which letter and accompanying table were referred to the Committee on Civil Service and ordered to be printed.

SENATOR FROM NEW HAMPSHIRE

Mr. MOSES. Mr. President, I present the credentials of my successor and ask that they be read and placed on file.

The credentials were read and ordered to be placed on file, as follows:

STATE OF NEW HAMPSHIRE,
EXECUTIVE DEPARTMENT.

To the PRESIDENT OF THE SENATE OF THE UNITED STATES:

This is to certify that on the 8th day of November, 1932, FRED H. BROWN was duly chosen by the qualified electors of the State of New Hampshire a Senator from said State to represent said State in the Senate of the United States for the term of six years, beginning on the 4th of March, 1933.

Witness: His excellency our governor, John G. Winant, and our seal hereto affixed at Concord, this 14th day of November, A. D. 1932.

JOHN G. WINANT, *Governor.*

By the governor.
[SEAL.]

ENOCH D. FULLER,
Secretary of State.

CALL OF THE ROLL

Mr. HALE obtained the floor.

Mr. FESS. Mr. President, will the Senator yield to enable me to suggest the absence of a quorum?

The VICE PRESIDENT. Does the Senator yield for that purpose?

Mr. HALE. I do.

The VICE PRESIDENT. The clerk will call the roll.

The legislative clerk called the roll, and the following Senators answered to their names:

Ashurst	Carey	Goldsborough	La Follette
Austin	Connally	Gore	Lewis
Bailey	Coolidge	Grammer	Logan
Bankhead	Copeland	Hale	McGill
Barbour	Costigan	Harrison	McKellar
Barkley	Couzens	Hastings	McNary
Bingham	Cutting	Hatfield	Metcalf
Black	Dale	Hawes	Moses
Blaine	Davis	Hayden	Neely
Borah	Dickinson	Hebert	Norbeck
Bratton	Dill	Howell	Norris
Brookhart	Fess	Hull	Nye
Bulkley	Fletcher	Johnson	Oddie
Bulow	Frazier	Kean	Patterson
Byrnes	George	Kendrick	Pittman
Capper	Glass	Keyes	Reed
Caraway	Glenn	King	Reynolds
Robinson, Ark.	Shortridge	Thomas, Okla.	Walsh, Mass.
Robinson, Ind.	Smith	Townsend	Walsh, Mont.
Russell	Smoot	Trammell	Watson
Schall	Steiwer	Tydings	Wheeler
Schuyler	Stephens	Vandenberg	White
Sheppard	Swanson	Wagner	
Shipstead	Thomas, Idaho	Walcott	

The VICE PRESIDENT. Ninety-four Senators have answered to their names. A quorum is present.

After the Vice President laid before the Senate resolutions which appear under the heading "Petitions and Memorials," several Senators addressed the Chair.

Mr. HALE. I yield to Senators for the transaction of routine business.

PETITIONS AND MEMORIALS

The VICE PRESIDENT laid before the Senate a resolution adopted at a prohibition dinner held under the auspices of the Woman's Christian Temperance Union in the Presbyterian Church at Blairsville, Pa., protesting against the repeal of the eighteenth amendment to the Constitution or the repeal or modification of the national prohibition law, which was ordered to lie on the table.

The VICE PRESIDENT also laid before the Senate the following joint memorial of the Legislature of the State of Washington, which was referred to the Committee on Finance:

UNITED STATES OF AMERICA,
STATE OF WASHINGTON,
DEPARTMENT OF STATE.

To all to whom these presents shall come:

I, Ernest N. Hutchinson, secretary of state of the State of Washington and custodian of the seal of said State, do hereby certify that the annexed is a true and correct copy of House Joint Memorial No. 2, as received and filed in this office on the 20th day of January, 1933.

In testimony whereof I have hereunto set my hand and affixed hereto the seal of the State of Washington. Done at the capitol, at Olympia, this 20th day of January, A. D. 1933.

[SEAL.]

ERNEST N. HUTCHINSON,
Secretary of State.

By A. M. KITTS,
Assistant Secretary of State.

House Joint Memorial No. 2

To the Honorable the Senate and House of Representatives of the United States of America in Congress Assembled:

We, your memorialists, the Senate and House of Representatives of the State of Washington, in legislative session assembled, most respectfully present and petition your honorable body as follows:

Whereas the immediate and greatest need of this Nation is to establish a fully employed citizenship, and normally functioning private industry offers the most desirable employment opportunities, and the primary and largest market for American produce and manufactures is found in meeting the wants of the American people, and the necessary employment in supplying these wants belongs first to American workmen; and

Whereas without the free flow of gold, the common medium of international values, the exchange rates of many nations' currencies have, by application of the law of supply and demand, become divorced from the actual values of those currencies as measured in buying power within the bounds of the nation issuing the currency; and

Whereas depreciated currency is seriously handicapping American industry, and our foreign markets are stifled, and our domestic industries face destruction by increased imports from depreciated-currency nations; and

Whereas the economic life of the State of Washington is derived from basic industries such as lumber, fish, pulp, wheat, fruits, coal, cement, and their allied industries, and the very existence of capital, industry, employment, wages, and our standards of living are based on the profitable operation of these basic industries; and

Whereas the Nation faces an emergency and the differences in money levels have existed for a long period and have not become adjusted; and

Whereas nations whose currencies are depreciated are able to ship merchandise into the United States, pay the existing tariffs, accept American currency in payment, and to make a greater profit on their merchandise than if sold in their own markets; and

Whereas such importations from more than 40 nations of the world into the United States under the existing depreciated-currency conditions has the effect of not only eliminating all tariff structures, but of enabling such merchandise to be sold at such a low price in the markets of the United States as to handicap and paralyze American industry and increase unemployment, and the industries of the United States are facing bankruptcy and destruction; and

Whereas we believe that unless this legislation is immediately passed, chaos and ruin threaten the financial and governmental structure of the United States; and

Whereas Congressman SAMUEL B. HILL, of the State of Washington, has introduced in the present session of Congress House

bill 13999, the official title of which is, "A bill to prevent loss of revenue, to provide employment for American labor, and to maintain the industries and agriculture of the United States against the effects of depreciation in foreign curriencies"; and

Whereas the delay in enacting this bill into law at the present session of Congress is causing continued and alarming increase in unemployment in our industries, American industry and agriculture are being seriously harmed, and in many instances ruined, by this disastrous new form of competition, which is forcing hundreds of thousands of workmen to sacrifice their jobs; and

Whereas the Government of the United States is being deprived of vast customs revenue under existing conditions; and

Whereas equalization measures must be adopted to preserve American jobs for American workmen: Now, therefore, be it

Resolved, That the Senate and House of Representatives of the State of Washington respectfully urge the present Congress now in session, and the President of the United States, to promptly enact into law House bill 13999; and be it further

Resolved, That this memorial be immediately transmitted to the proper officers and committees of the United States Senate and House of Representatives, and a copy sent to each of the Representatives and Senators representing the State of Washington in the United States Congress; and be it further

Resolved, That this memorial be immediately forwarded to the legislatures of all the States of the United States requesting that they pass and present similar memorials to Congress.

And your memorialists will ever pray.

Passed the house January 18, 1933.

GEO. F. YANTIS,
Speaker of the House.

Passed the senate January 19, 1933.

VICTOR A. MEYERS,
President of the Senate.

Mr. TYDINGS presented the petition of the Young Woman's Home Missionary Society of the Mount Vernon Place Methodist Episcopal Church, Baltimore, Md., praying for the prompt ratification of the World Court protocols, which was ordered to lie on the table.

Mr. KING presented a resolution adopted by the Board of Commissioners of Salt Lake County, Utah, favoring the passage of necessary legislation to put into effect a plan of J. Parley White to relieve unemployment and absorb all idle labor by means of the issuance of scrip, and also a revenue-stamp proposal, etc., the scrip to be redeemed by the Government, which was referred to the Committee on Finance.

He also presented the following concurrent memorial of the Legislature of the State of Utah, which was referred to the Committee on Post Offices and Post Roads:

STATE OF UTAH,
OFFICE OF SECRETARY OF STATE.

I, M. H. Welling, secretary of state of the State of Utah, do hereby certify that the following is a full, true, and correct copy of Senate Concurrent Memorial No. 1, by Mr. Booth, entitled "Memorializing Congress to appropriate to Federal aid for highways," as passed by the Legislature of the State of Utah on January 18, 1933, and approved by Gov. Henry H. Blood on January 19, 1933, as appears on file in my office.

In witness whereof I have hereunto set my hand and affixed the great seal of the State of Utah at Salt Lake City this 20th day of January, 1933.

[SEAL.]

M. H. WELLING,
Secretary of State.

Memorializing the Congress of the United States to pass and the President to approve Senator ODDIE's (of Nevada) bill authorizing appropriation of $125,000,000 for highways

Be it resolved by the Legislature of the State of Utah (the governor concurring therein), That—

Whereas the Oddie bill authorizing the appropriation of $125,000,000 for Federal aid for highways has recently passed the Senate, will aid materially toward the completion of the at present incomplete Federal highway system in this and other States, and will make possible creating work for large numbers of our citizens now unemployed:

We, therefore, respectfully urge the House of Representatives to pass and the President to approve said bill, that the provisions thereof may become effective at an early date; be it further

Resolved, That the secretary of state forward certified copies of this memorial to the President of the United States and Speaker of the House of Representatives and to Utah's delegation in Congress.

FARM RELIEF

Mr. FLETCHER. Mr. President, I present a letter from a farmer who, out of the ordinary trend of such letters, takes an unusual position with reference to farm relief. I think this ought to be printed in the RECORD, and I ask that that may be done, and the letter referred to the Committee on Agriculture and Forestry.

The VICE PRESIDENT. Without objection, it is so ordered.

The letter is as follows:

BUNNELL, FLA., *January 21, 1933.*

Hon. DUNCAN U. FLETCHER,
Washington.

DEAR SENATOR: Notice in yesterday's paper where you are proposing to change the laws so an individual farmer can borrow money from the Government as cooperatives do now.

Now, I live in the so-called potato section (Hastings Bunnell district) and I can plainly see and feel the results of loaning to cooperatives here.

This section through cooperatives have borrowed from the Government $240,000 this year to plant potatoes. As a result, if we have fair seasons, that not a dollar will be made on new potatoes. We will make so many potatoes they will not have the demand for them. On the other hand, if the Government had not piled all this money in here most farmers would have managed to plant a few. And every farmer would have made money, as the demand would then take care of the smaller production.

I am a farmer and so far have planted, what I do plant, independent; that is, I don't borrow. But I can't raise potatoes in competition with the Government. And there are plenty of farmers here getting their eyes open to this condition.

Congress now claims to be trying to help the farmer and it's durn poor policy to pour money out to them so as they can raise more stuff, when we are raising so much now we can't give it away.

The United States bought millions of bushels of wheat, as you know, to help the wheat farmer. If he had dumped it in the ocean it would have helped; instead he stored it and I don't believe it ever helped the price to the farmer one penny. Now, they are giving this wheat away, through the Red Cross. I know and you know, this is helping the wheat farmer.

If you really want to help the farmer, just cut down taxes to where he can pay them and quit loaning him money. Every time you loan him money you make him just that amount worse off.

The farmer is beginning to think just a little; times like these are going to make him think more. What our potato growers need is not more money—we are getting too much now—but an organization to sell them. We are not, as a rule, kept well-enough posted to know what markets need our produce. And I say I would be glad to ship my produce through a good, honest, competent organization that would know where to place a car to bring the most money. But, for the Lord's sake, quit loaning him money to plant more stuff when we are raising more stuff than we can sell.

I say, let the farmer strictly alone and he will work out his own salvation.

I have at least five neighbors right here in this little vicinity that have lost their homes through loans from Federal land banks. If there had never been any such banks to have helped these farmers, they would have had their farms to-day. So, not only for the Lord's sake, but for the farmer's sake, quit loaning the farmer money.

Please loan all this money you are now loaning the farmer to the McCormick Deering Plow Co., the United States Steel Co., etc., too numerous to mention, so as they may be able to reduce the price of plows and steel low enough that the farmer can buy them. This will help the farmer more than any money you can loan him.

I am a farmer. I can easily see and feel more plainly than I can see the effect of Government loans to us. And I am only hoping it can be stopped before we, as a class, shall be reduced to serfdom.

Yours very truly,

W. E. KNIGHT.

MODIFICATION OF THE VOLSTEAD ACT—ALCOHOLIC LIMITATION

Mr. HAWES. Mr. President, I ask unanimous consent that a statement on the subject of the power of Congress in the matter of modifying the Volstead Act, made by Congressman JAMES M. BECK before one of the Senate subcommittees, be inserted in the RECORD and referred to the Committee on the Judiciary.

Mr. BECK, formerly Solicitor General of the United States, a well-known authority on the Constitution and author of numerous books on that subject, discussed the power of Congress in the matter of defining an alcoholic limitation. His discussion is so clear that it will be helpful to the Members of the Senate when that question comes upon the floor for discussion.

The VICE PRESIDENT. Without objection, it is so ordered.

The statement was referred to the Committee on the Judiciary and it is as follows:

STATEMENT OF HON. JAMES M. BECK, REPRESENTATIVE IN CONGRESS FROM THE STATE OF PENNSYLVANIA

Mr. BECK. Gentlemen of the committee, as the chairman of this subcommittee has been good enough to say, I am here by invita-

tion. Otherwise, I might have hesitated in submitting my views, for the reason that every member of this subcommittee is a member of the bar, and all of us have for the last 10 years been giving consideration and considerable time to the true interpretation of the eighteenth amendment, and therefore I should have had a very great diffidence in coming before this committee and endeavoring to submit my views as to that interpretation had it not been for the invitation.

Mr. Chairman, you have been kind enough to refer to my service as Solicitor General. In that connection I may be pardoned for saying that as Solicitor General I probably had as much to do with the judicial interpretation of the eighteenth amendment as any preceding or succeeding Solicitor General, not by any merit or demerit of my own, but simply due to the fact that the amendment was then comparatively new, and the Volstead law required considerable interpretation. Therefore I gave to that work my very best effort, and, while I frankly stated to those in sympathy with the eighteenth amendment that I had not favored it at any time, nevertheless I recognized it as part of the law of the land, and as such I would leave nothing undone to enforce it.

As a matter of fact, some of the most drastic decisions in the Supreme Court under the Volstead law, and indeed the validity of the amendment itself, so far as the methods of ratification were concerned, were cases that I argued in the Supreme Court, and my contention prevailed. Therefore it is not without some study and thought that I comply with your invitation, and yet it is hopeless to try and convey to the members of this committee any thought that has not previously occurred to them.

I shall defend the constitutionality of this Collier bill, about which I have a reasonably strong conviction, and I am going to preface my argument as to the interpretation of the eighteenth amendment, which after all is the fundamental question, by addressing to myself, possibly in a Socratic method, certain questions in endeavoring to give them an equally frank answer. In that way the nature of my contention will be developed.

The first question is this:

Taking the Collier bill as a tax upon beer or malt liquors, and if hereafter I speak of beer, I am speaking of malted liquors, does it matter what its alcoholic content is, so far as the constitutionality of the tax is concerned? To that I think the answer must be, It does not.

The Supreme Court has explicitly said that Congress is competent to impose a tax upon an article or an act otherwise forbidden by law. I am not here advocating that it is a moral thing for Congress to do. Personally, I think it is of questionable morality to encourage the perpetration of an act which is forbidden by law, and then tax the subject matter, but the constitutional power to do so seems to me so clear that it is one of the few answers to my self-propounded questions as to which I am going to be rather positive.

Now, the second question is this, and it goes to the very heart of the problem:

Has Congress the constitutional power, in whole or in part, to leave the prohibition of the first section of the eighteenth amendment unenforced?

To that again my reply is yes; and so far as this Collier bill is concerned, so far as it can be interpreted to repeal the enforcing section as against malted liquors of 3.2 per cent or under, it would seem to me clear that Congress has this legislative discretion to leave it unenforced.

That arises not merely because, as I shall presently argue, the eighteenth amendment so intended. I do not say the proponents of the eighteenth amendment so intended, but that the eighteenth amendment so intended, but I base it upon a far larger and more fundamental consideration, and that is that the legislative power under the Constitution was vested in a Congress, when its framers were acting under the great political traditions of the political revolution in England in 1689. Congress became the great council for the Republic, and in it there is a very broad discretion as to whether it will or will not pass enforcing statutes, and, as I have said in respect to the eighteenth amendment, it has been confirmed by the peculiar language of the law. I do not mean by that—and I will illustrate what I mean presently—that many imperative mandates of the Constitution admit of any discretion by Congress. They do not.

When the Constitution says every 10 years there shall be a census taken, there is no legislative discretion in Congress. It can fail of its duty, but nevertheless it is imperative that it comply with that regulation. But there are many other powers vested in Congress, as to which the question as to whether they shall be exercised, and, if so, to what extent, is vested in the Congress as the great council of the Republic.

The third question, therefore, is:

Does this Collier Act attempt to legalize malted liquors of 3.2 percentage of alcohol? I think that is fairly open to interpretation, although it seems to me that a reasonable interpretation would be that indicated by the chairman of the subcommittee at the opening of this session, that it was not intended to validate anything except to prescribe the method whereby a brewer could take out a permit for the purpose of the tax and authorize him to brew beer of the desired percentage, but if the other interpretation should be adopted, that there is an expressed validation of 3.2 per cent, so that affirmatively Congress declared that 3.2 per cent liquor is not intoxicating within the eighteenth amendment, has Congress power to make such declaration?

That, of course, involves the fourth question, which is:

Has Congress the power under the eighteenth amendment to prescribe the permissible alcoholic content of so-called intoxicating liquors? The answer to that is, I think, that it has, and that the eighteenth amendment so provided.

Is this power in Congress unlimited? The answer is that it is not; that there is a reasonable field of legislative discretion within which Congress can act, being solely responsible, each Congressman, to his constituents, but beyond those boundaries Congress can not go.

The next question is:

Who will prescribe those boundaries of power of Congress in the matter? My answer is that primarily the Congress prescribes those boundaries.

But is their declaration as to whether they are within the field of legislative discretion final? The answer is, It is not.

It is unquestionably within the power of the Supreme Court to mark out the boundaries of this field of legislative discretion.

How, then, will the court define those boundaries? The answer is, Only by the process of inclusion and exclusion, taking each concrete case as it arises.

What would then be the attitude of the Supreme Court in respect of this very delicate duty of sitting in judgment upon the action of the Congress, it claiming to act within a field of legislative discretion that belongs to it?

I think the answer is that the Supreme Court would give the greatest respect to any declaration of Congress on the subject, and that any declaration would be accepted by the Supreme Court that would not be plainly arbitrary; or, Mr. Chairman, in other words, primarily it is a question for Congress to determine, and it is only when the legislative discretion of Congress has been plainly abused that the judiciary will interfere.

Those, it seems to me, are the underlying questions to which one must address himself.

Then comes the final question:

Is, then, the percentage of 3.2 provided in this act within the field of legislative discretion of Congress? That is, of course, the heart of the problem.

In my judgment it is a question about which fair-minded men may reasonably differ. I do not regard that as an open and shut question. It probably is a question that can only be finally determined by the Supreme Court of the United States. My own judgment is that the Supreme Court of the United States will say of 3.2 per cent, instead of one-half of 1 per cent, that while it might not commend itself to the court as a just definition of a permissible percentage, yet it was not so plainly arbitrary and capricious that the Supreme Court would disturb it.

Having thus outlined the questions to which I will address myself and indicated the character of the answer, I now want, as possibly the only novel feature of my argument, to suggest to the members of the subcommittee why my answers to these questions are justified by a true interpretation of the eighteenth amendment. I am not now concerned with what the capable draftsmen of that amendment intended. It must be judged by the plain import of its own language, in other words, by what the Congress meant when they proposed it. It must be judged by its own language, which is the only criterion by which we can determine its meaning.

Senator DILL. You heard one of the witnesses this morning read a quotation from Justice Holmes, in which he referred to the intent of the amendment to abolish this whole business.

Mr. BECK. I remember that exceedingly well. It was one of the cases I argued as Solicitor General. It was simply a question of whether liquor could be taken across the country in bond from Canada to Mexico, and Justice Holmes, who was often giving to saying much in a few words—but there is always a danger of saying much in a few words—did utter a sentence which as a general abstraction is true.

Senator DILL. It was rather obiter dictum?

Mr. BECK. Yes; obiter dictum, because the whole scope of the eighteenth amendment was not before the court, but a narrow question of transporting in bond from Canada to Mexico. I think the case was Grogan *v.* Walker.

But while I have said the views of the proponents of the eighteenth amendment are not controlling on the question of what this amendment means, it is enlightening to consider what were their difficulties when they drafted this amendment. It evidently was drafted with considerable care, and after a prolonged deliberation. I take my hat off to the skill with which it is drawn, and the nature of that amendment is rather disclosed by the difficulties with which they were confronted, because at that time the Congress was rather disposed to accept the draft which they thought would be effective to the end.

What was the situation? Section 1 began—I will not quote the language; it is so familiar—the manufacture, transportation, and sale of intoxicating liquors for beverage purposes is hereby prohibited. You will have noted that they did not there generically try to prohibit a large variety of beverages which could or could not be intoxicating according to the alcoholic content, but they grouped it all under the expression "intoxicating liquors" and added "for beverage purposes"; that is, for purposes of drinking. The motive and purpose of the drinking was wholly unimportant, for if it was in potable form it was forbidden. That section, as it stood alone, is largely not self-executing. I do not think anybody will dispute that. Certainly so far as any criminal enforcement of the first section is concerned, it would be impossible unless there was enforcing legislation. I will not say, because I would be lacking in candor with the committee, that it is wholly unenforceable, because it has an inhibitive negative force that could be invoked to stop things that otherwise might take place.

Therefore it can not be said to be a brutum fulmen, because the language is very explicit.

It is clear it is not self-defining, and it was not self-defining for the very obvious reason that they were face to face with the fact that there had to be some elasticity in administration to bring the law within reasonable restraints, and the two considerations that were most appealing to them, and it is the monstrous moral paradox of this prohibition question, that there was written into the Constitution a prohibition which was to be followed up by a statute which forbade even the possession of an article of commerce which was used by the three great divisions of religious faith of western civilization for the holiest of their rites.

In other words, they were confronted with the appalling position that what they were attempting to do was to take from the rabbi in the Jewish family, or the priest of the Roman Catholic Church, or the pastor of the Protestant congregation, the power to do what had been done from the beginning of the Christian religion, and from the Jewish religion from the remotest time, the use of wine, not in an ordinary rite but in the most sacred and solemn ceremonial of those religions.

Now they did not dare write into the first section as they would like to have done, "Intoxicating liquors for beverage purposes, except for sacramental purposes," because that would have been abhorrent to put in the very text of the Constitution that a thing was so criminal that you could send, as has been said, under the Volstead law, over 500,000 men, women, and children of this country into criminal courts, and yet it was perfectly permissible when the priest or the rabbi or pastor of a church used it in a manner, in the case of the Christian churches, commemorating the holiest event in the life of the Savior. They did not dare to do it, and, therefore, it was essential that they should allow legislative discretion to make exceptions for the use for sacramental purposes. They did not want the exceptions, but they just had to do it, because they could not affront the cause of religion, Protestant, Catholic, Jewish, and gentile, by putting into the Constitution that these holy priests of religion could only use a thing which was forbidden to every other man, woman, or child in the country.

But that was not all. It was recognized by them that for thousands of years the use of alcohol for medicinal purposes and as a beverage was perfectly proper. Doctors may differ about it, but it does not matter whether they differ or not. There is a very considerable body of respectable medical opinion which holds that under proper circumstances the use of an alcoholic beverage has pathological value to people in ill health, and they did not dare put that in the body of the Constitution.

Thus arose the significant second section of this eighteenth amendment, one to which too little attention has been paid, but which was designed to meet the difficulties which I have outlined to this committee. And what was that? I can not quote it verbatim, but I can give it to you substantially. Congress and the several States shall have concurrent power to enforce this amendment by appropriate legislation.

If you will take your copy of the Constitution, you will find that even in that instrument, though admirable and of almost perfect clarity, there is no distinction so obvious as the distinction between provisions that Congress shall do a thing or Congress shall not do it, on the one hand, and Congress shall have power to do it, on the other hand.

The words "shall have power" always import in the Constitution the vesting of a legislative discretion in the Congress of the United States. It is then for the Congress to determine whether it will exercise the power or whether it will not exercise the power. As I have said before, Congress is directed to take a census every 10 years. Congress is directed to count the electoral votes. Congress is directed to do a number of things, and, upon the other hand, it is prohibited from doing many things, and as to those no legislative direction is vested in Congress; but when Congress is given the power to regulate commerce, it does not necessarily have to regulate it.

For 100 years we never exercised the commerce power, which has now grown so portentous. These wise old framers of the Constitution knew enough to know that you can not "crib, cabin, and confine" the genius of a people within any one written instrument. You must leave a measure of elasticity somewhere, and that medium was the legislative council of the Nation, the Congress, and so in many provisions of the Constitution it used those apt words "shall have power" and in every instance a legislative discretion and not a command or mandate was thus vested in the Congress.

That being so, why did they do it? Do you doubt whatever the very earnest and noble-minded men who framed this eighteenth amendment? I think President Hoover was entirely right when he said it was "noble in motive." I think it was, and it is not the first time in the history of human affairs where just men made great mistakes, as did the draftsmen of this amendment; but I do not question the nobility of motive which prompted the eighteenth amendment, and I do not doubt, therefore, that they wanted to make it as drastic as they dared to make it, and, therefore, they would have clearly said, if they dared, Congress shall enforce this by appropriate legislation, but it did nothing of the kind.

It not only said Congress shall have power, but it did the unheard-of thing, absolutely the unheard-of thing, of saying that Congress and the States shall have concurrent power, evidently contemplating that Congress might refuse to exercise the power, and the States could then do it within their borders on their own account, or that the reverse might take place, and the States refuse to exercise the power and the Congress would be obliged to do it.

Senator KING. You mean obliged to do it or have the authority to do it?

Mr. BECK. Have the authority to do it.

There is also significance in those words "by appropriate legislation." I recognize that in the interpretation of "appropriate" enforcing laws must not be contrary to the prohibition of the first section. But it conveys an idea that is very helpful to the constitutionality of the Collier bill, that somebody must judge of this question of appropriateness.

Government is a very practical matter. You can not write down in any words in all the dictionaries, even if you had the vocabulary of Shakespeare, the exact boundaries and definitions of any major legislative problem. It is impossible to do it; and as it is impossible, there can only be a recognition of the practical side of any problem, and there can only be, as long as human nature is as frail as it is, and the mind as finite as it is, an approximation to the general result. There can not be any precise conformity to any legislative standard.

If I am right in that, then my answer to one of the questions that I addressed to myself seems to be sound, that there is a field of legislative discretion in respect to prescribing the permissible and the nonpermissible percentage of alcohol in malted beers. Therefore I do not think the Supreme Court of the United States would interfere with Congress if the 3.2 beer were adopted, because it certainly is not arbitrary; but the real question is, Can we fairly say 3.2 per cent beer is within that field of legislative discretion that either meets or promotes the evil prohibited by the eighteenth amendment? And that is, of course, a question about which men can widely differ. The testimony before this subcommittee and other committees of Congress has been conflicting.

You see, I am not as dogmatic as one of the gentlemen who spoke this morning, who seemed to have an admirable and, I may say, enviable certitude about every proposition he advanced. I can not claim to have that certitude which he possesses that enables me to say that beyond doubt 3.2 per cent is not an unreasonable dead line below which malted liquors can be sold and above which they can not be sold.

Before addressing myself to that, I want to ask whether there is any countenance in any expression of the Supreme Court upon the line of argument that I have been presenting. I think there is, and I am going to refer to what that singularly careful Justice of the Supreme Court, Mr. Justice Brandeis, said in the case of Rupert *v.* Cafey. With his usual learning—I do not mean merely legal learning, but his profound grasp of facts—Justice Brandeis called attention to this fact, that you can not enforce practically a liquor law if to every juror is left the question of what is or what is not intoxicating, and that therefore a legislative standard is indispensably necessary.

Then he goes on to call attention to the wide and conflicting views of the various legislatures of the different States as to what is the dead line, and he finds that in 17 States beverages are forbidden without reference to the quantity of alcohol, thus conforming to the estimable lady who testified this morning and who thought one-thousandth part of 1 per cent was forbidden. In 18 States Justice Brandeis said the dead line was one-half of 1 per cent. I do not know how one-half of 1 per cent ever got into our jurisprudence. I heard one statement this morning, but I recall during the recent campaign meeting socially the former Governor of New York, Al Smith, and he told me that was taken from a New York statute which was passed not to prohibit the traffic in alcoholic liquors, because it was before the eighteenth amendment, but purely as a taxing measure. So one-half of 1 per cent has been taken from a taxing statute and carried into the Volstead law.

Senator KING. I think you will find it in one of the revenue acts of the United States, going back into the sixties.

Mr. BECK. That is very interesting to me.

Senator BLAINE. That was for the purpose of having some standard on which the law could be administered.

Mr. BECK. That was a taxing statute.

Senator BLAINE. It was not intended to define what intoxicating liquor was, in fact, except for revenue purposes.

Mr. BECK. Exactly.

Senator KING. It was a taxing measure.

Senator DILL. Based on the theory if it did not have any more than that it was not worth bothering with.

Mr. BECK. In 18 States the dead line was set at one-half of 1 per cent, 6 States at 1 per cent, and so forth, which shows that legislatures have found it difficult as a matter of practical government to draw a dead line, whether for purposes of taxation or otherwise. I will call attention to what Justice Brandeis said:

"Only two States permitted the question of the intoxicating character of an enumerated liquor to be put in issue. In three other States the matter has not been made clear, either by decision or legislation."

And then he says—

"The decisions of courts as well as the acts of the legislatures make it clear, or at least furnish good proof, that Congress reasonably might conclude that a rigid classification of beverages is an essential of either effective regulation or effective prohibition of intoxicating liquors."

That is, that the legislature not only had the right but it was essential to the enforcement of the law that there should be a rigid classification. Then he goes on to say, discussing the point in Rupert *v.* Caffey—

"That even though the beer in that case was nonintoxicating in fact, there was this field of legislative discretion where, if it were essential to enforce the prohibition, they could go below what was nonintoxicating in fact."

Finally Justice Brandeis, speaking for the great court, said:

"It is, therefore, clear, both that Congress might reasonably have considered some legislative definition of intoxicating liquor to be essential to effective enforcement of prohibition, but also that the definition provided by the Volstead law was not an arbitrary one."

I do submit that bears out my thought, not merely as to this field of legislative discretion, free from judicial interference within its boundaries, but also that the limit of judicial power is simply to forbid such abuse of that legislative discretion as might be conceived to be arbitrary.

Senator DILL. I take it, then, if we were to amend the law so that we prohibited the manufacture and sale of liquor above a certain content there would be little question of the constitutionality of that.

Mr. BECK. In my opinion, none whatever. Of course, I have been addressing myself to the possible interpretation that this is an affirmative authorization of 3.2 per cent.

Senator DILL. That would remove it?

Mr. BECK. That would remove it, in my judgment. I do not want to get dogmatic myself. Now, of course, this inevitable implication of the words "shall have power" is enforced by the inevitable necessity of defining the so general expression "intoxicating liquor." As to that, there are two possible interpretations, in my judgment. The first is favorable to the dry cause, and that is that the expression "intoxicating liquors" was merely a phrase to describe generically all kinds of beverage liquors which were brewed, fermented, or distilled, without respect to alcoholic content, which as to any kinds of them could be intoxicating. In other words, it forbade 1.5 per cent as much as 5 per cent, because it said a beer. That is one interpretation, and if so, all ales and beer, and so forth, whether they contain one-half of 1 per cent, 1 per cent, or one-thousandth of 1 per cent, are forbidden, because it is a malted liquor. But I do not believe that is the true interpretation of the eighteenth amendment.

Senator BLAINE. I think in the majority of those cases with reference to statutes that exist in the respective States it will be found that during that period of the history of those States beer was generally known to contain a very high alcoholic content.

Mr. BECK. I imagine near beer was unknown.

Senator BLAINE. I doubt if the process of dealcoholizing was ever engaged in in those days.

Mr. BECK. I should think that was so.

Senator BLAINE. So you had the highest degree of alcohol in beer that could be accomplished through the processes of manufacturing beer, if it were permitted to ferment to its highest degree.

Mr. BECK. Yes.

Senator BLAINE. We all knew that.

Mr. BECK. Yes.

Senator BLAINE. It was common knowledge, and many of those decisions, but not all of them, if you study them, you will find are based upon what I have stated.

Mr. BECK. That accords entirely with my view, although I have not made a search of all those State decisions. I think it is a fair inference that that is true from the known history of the conditions that prevailed prior to the eighteenth amendment. As you say, there was no desire and possibly no method of dealcoholizing so as to reduce the alcoholic content. Whether that is so or not I do not know. I do think the interpretation of intoxicating liquors means what it says, and, therefore, requires legislative definition, and if it does require legislative definition, it inevitably requires the power somewhere to draw a dead line. That dead line can not be drawn by the judiciary. The judiciary can regard whether the legislature has abused the power——

Senator KING. Is it not a fact that is conceded that on the interpretation of a statute a legislative declaration on a question of fact is usually regarded as conclusive?

Mr. BECK. Generally so, yes; even when the court itself does not believe in the fact.

Senator KING. Exactly.

Mr. BECK. You take the flexible tariff law. I do not mean the last one, but the first one. It was based upon two assumptions of fact which, in the practical administration of the law, were shown to be inaccurate.

Take the decisions in the regulation of the livestock exchanges and grain exchanges in Chicago, Chief Justice Taft based the question of the constitutional power upon the findings and reports of committees of Congress. He said:

"We can not investigate this. Congress has said so. They have investigated it. We are a branch of the Government which requires us to assume facts which Congress has assumed as the basis of their legislation."

I am very confident that the Supreme Court would not disturb 3.2 beer, and would accept it out of respect to a branch of the Government that had investigated it.

Leaving that argument aside, the term "intoxicating liquors" being the expression chosen, requires obviously a legislative definition. What do we mean by it? I gave one possible interpretation which carries the thing to such extremes, I mean in prohibiting even the slightest trace of alcohol, I do not think that would ever be adopted. The fact is like the drawing of the dead line, the question of what is intoxicating liquor is a question of practical statesmanship. As a question of practical statesmanship what do we mean by it? Do we mean every pathological reaction to a glass of wine or beer, or do we mean something that goes much farther in disturbing the responsibility of a man who drinks it?

The difference between the two I can illustrate by one quotation from the Scriptures, and another from another form of scripture to me, and that is Shakespeare.

The Scriptures say, "Wine that maketh glad the heart of man." Everybody knows if you take a glass of wine, unless you are not normal, there is a sense of well-being. If you felt unkindly to the world, if you take a glass of wine you will have a little more kindly view afterwards. You can see that in any public banquet.

Tired business men in the big cities came in in the old days. They would be silent and morose in having to come out to a public dinner, but by the time they had a glass of wine there was a crescendo in the conversation, and by the time the speakers arose, their auditors could follow with a quickened intelligence what the speakers were saying, and the joke that might not have seemed so funny before they drank champagne, suddenly became witty.

It is the attitude embodied in the scriptural phrase, "Wine maketh glad the heart of man."

It has had that recognized effect from the dawn of history down. Nothing is so amazing to me where, as in Syria and Palestine, the wine vintage was the glad celebration of the year, that we should take the Puritanical ground that the wine is so bad that one is subject to the danger of going to jail for merely possessing it. But that is another question.

The first speech I ever made out of my native city was in Gettysburg, and I was following a Member of the United States Senate. I do not believe any of the three of you would know who it was, but it was Senator Wallace, of Pennsylvania, and Senator Wallace that evening at the dinner we had at the tavern in Gettysburg took entirely too much turkey and sausage. I can vouch for it he did not drink a thing, and he got on that platform and tried to make an extemporaneous speech, and his mental processes were so clogged by the process of digestion that he stumbled around and gave me a chance as a young man to get up and make a speech, which I tried to do. But that was an illustration of the pathological effect food had and yet we would not say this distinguished Senator was intoxicated. He did not have any beverage. It was a pathological effect of digestion.

What was the Shakesperian quotation to which I desire to call your attention? It was that pathetic scene in Shakespere's Othello, where Iago got Cassio drunk and that part of the story turned the whole story of Othello and Desdemona in a tragic channel. Cassio, at a pathetic moment, said, "Oh, that man should put an enemy in his mouth to steal away his brains!"

You can not misunderstand what that means. That means that intoxication has taken away a man's brain, and he is no longer responsible. He may be maudlin, silly, provoking quarrels, or dead to the world. Now, I do not say that intoxicating liquors mean only that which carries to the full Cassio's lament. I say as a measure of practical statesmanship, in defining intoxicating liquor, you must somehow draw a line as a practical matter between that which really will abate the great mischief which the eighteenth amendment has done and which will leave men to lead their lives in their own way, without undue interference of government. You can not define that. That is one of my illustrations. You can not put in words a line of demarcation. It has to be by exclusion and inclusion. Of course, I am not contending now that intoxicating liquors only mean liquors that would not intoxicate if used by a normal man in a normal way. I wish I could think that; but, of course, I appreciate that this experiment was noble in motive and intended to penalize 95 per cent who were temperate for the benefit of 5 per cent who were intemperate, and therefore I recognize fully and frankly, when you come as a matter of legislative discretion to draw this dead line, you must have in mind five erring brethren who, by inheritance or otherwise, just simply can not leave well enough alone, and, therefore, if we were trying to pass a law authorizing whisky, of course, it would be absurd as long as the eighteenth amendment is what it is, because no legislative discretion is left in a matter in which any attempt to permit the high alcoholic content and the known sequence of the abuse of whisky by any country.

Therefore, you come to a question which is primarily a food, beer.

Senator DILL. Do you think there is any constitutional question involved in picking out one kind of liquor, one kind of beverage, and fixing an alcoholic content and forbidding all others?

Mr. BECK. I do not think so. I was suggesting the marked difference between malt liquors and distilled liquors, assuming that you can apply the word "liquors" to malt liquors. Some have disputed the accuracy of the phrase.

Senator KING. Congress passed a law forbidding the prescription by medical men of beer for medicinal purposes. They singled out one liquor having an alcoholic content and forbade the use of that for medicinal purposes, and the Supreme Court—much to my surprise, and I think they were wrong—held that was constitutional, but not for the reason it discriminated. I felt it was in violation of the Constitution.

Mr. BECK. Not on the ground of discrimination but on the ground it was not within the purview of the eighteenth amendment.

Senator KING. It had to be for beverage purposes and not medicinal.

Mr. BECK. I remember the case very well. Of course the Supreme Court gave the most extreme interpretation to every question, and I think they did so under the principle which I think General Grant originated, and that is, the only way to repeal a bad law is to enforce it. In other words, they have enforced it to the limit. When you take another one of my cases as Solicitor General—it was the Ship Stores case, and in that case the question was whether ships could come into our docks and keep their liquor under seal where they were going to leave for another port, whether that was a violation of the law. My opinion as Solicitor General was that that was a very unreasonable interpretation of the law. I so advised the then Attorney General, but he did not agree with me, and we had to argue the case in court.

In the argument in that case in court I presented this theory of the eighteenth amendment. I mean to say as to why Congress was given the discretionary power instead of an imperative mandate. The court neither affirmed or disaffirmed it, because they found the language of the Volstead law was so sweeping they could not permit even the temporary possession of liquor within our docks to be permitted. It was an illustration, as I have said.

That followed Grogan versus Walker, to show the extremes to which the administration of the Volstead law was taken.

I was about to say, and I am almost through, because I have trespassed too long upon your patience—I was about to say that when you come to the question of malted liquors of a percentage of 3.2, I have already indicated my opinion that it is within the field of legislative discretion.

The question then is, Within the field of legislative discretion what should the individual legislator do under his obligation to support the eighteenth amendment? You can not argue from the extreme case, whether a 1-month-old infant would be affected by one-half of 1 per cent, or in another case a man would have such a prodigious absorbing capacity be could drink many bottles of beer without being affected at all. You can not take extreme cases. As a matter of practical statesmanship, you must take the problem as a whole, you must reasonably consider that which is within the mischief and that which is without it, and as to that I think it is a matter of common knowledge that beer of that content have been used all over the world by large numbers of people without any possible harm, and all of this talk, some of which we had this morning, as to the terrible toxic character, is contradicted by a perfect volume of medical testimony. The fact of the matter is that wholesome beer is a very nutritious and very valuable food to the human body.

I was amused this morning when I heard the terrible effects of 2.75 beer, where the men drank for 12 continuous hours, and they would have had considerable capacity to have gotten over 12 hours of continuous drinking. I was amused at that, because if ever foreign nations in the world showed endurance, stamina, intelligence, and power beyond anything in recorded history, it was Germany and France in the World War. You can not read what they did for four years without being amazed, and all through that war it was the French peasant whose great power and vigor kept him even when he was retreating 170 miles, beaten back day by day and day by day, little to eat, little rest, when he turned about on the Marne and won one of the great battles of the war. It was not merely the brilliance of General Joffre, it was the ordinary endurance of the French peasant, and if you asked a French peasant to have a drink of water he would be amazed. They do not know the use of water as a drink. They take their light wines. They are as hardy a peasantry as there is in the world, and as intelligent and effective.

If you cross the Rhine and go to Germany, think of Germany for four years battling three-fourths of the world, and remember they are people who have been beer drinkers for generations.

Of course, if you are going to draw your legislative standard by taking some remote and almost impossible case as typical of the existing condition of affairs, then, of course, I conceive that a man might get drunk on 3.2 beer.

In a beer with a moderate alcoholic content, like 3.2 per cent, you can imagine a very extreme case where a man could make such a hog of himself that he might be visibly affected, but you can not legislate for a Nation of 120,000,000 people upon remote and supposititious cases. You must strike a fair balance of human experience, and in that balance 3.2 per cent, in my judgment, is not so intoxicating, or at least is not intoxicating within the meaning of the eighteenth amendment. At all events, it is within the field of the legislative power of Congress and would be respected as such by the courts.

There is one final thought and I am through: There is in this field of legislative discretion, both to mark a dead line and also to determine whether to enforce it, a consideration that might well prompt the conscience of Congress, and that is this. Congress may say if we had beer of a small alcoholic content we would far more effectively promote the objective of the eighteenth amendment than by forbidding it, because the vice of intemperance is very largely that of hard liquors. It is hard liquors that make the alcoholic addict. He has got to the point where he has to have it. It has mastered him.

You could say, "We are not content to enforce this law as to a low percentage," which we define to be 3.2 per cent, because we believe that will discourage the use of hard liquors, or you can say in view of all the conflicting opinions of what is the dead line, Congress is not disposed to enforce as against beer of 3.2 and under, but will leave each State to determine that dead line for itself. Either of those things is within the field of legislative discretion. Either of those views is exactly what was implied in the language of the second section—that Congress shall have power, and upon that definition of "shall have power" I rest my argument.

Senator BLAINE. I want to ascertain whether or not my mind is entirely clear on this proposition. I assume the general rule is a legislative body that can not diminish or expand the Constitution, but the legislative body, having to enact legislation for the enforcement of constitutional provisions for the general welfare, may fix standards that apparently may involve definitions, and yet those standards fixed by the legislative body are not arbitrary or capricious or unreasonable, and the courts will not say the legislative body has trespassed on the judicial field.

Mr. BECK. You have stated my contention with great clarity. Instances could readily occur to many of us. You take in our import duties or in revenue and many others. There comes to my mind that when I was a boy there used to be a play which, as I recall, was called "engaged," and in the play the hero was always saying, "Well, you must draw the line somewhere."

That is the trouble with the legislator. His concern is not with defining theories. He is not concerned with abstractions. He has to deal with a concrete case, and to deal with any concrete public measure there is generally the necessity of drawing a line so that the law can be administered without fear, favor, or affection.

Just as you say, there is this power to prescribe a legislative standard below which Congress is disinclined to enforce the eighteenth amendment.

I am much obliged to you for listening so patiently.

REPORTS OF COMMITTEES

Mr. LOGAN, from the Committee on Claims, to which was referred the bill (S. 2469) for the relief of Nellie E. Treuthart, reported it with an amendment and submitted a report (No. 1111) thereon.

Mr. TOWNSEND, from the Committee on Claims, to which was referred the bill (S. 3676) for the relief of Frank Anderson, reported it without amendment and submitted a report (No. 1112) thereon.

He also, from the same committee, to which was referred the bill (S. 327) to reimburse the estate of Mary Agnes Roden, reported it with an amendment and submitted a report (No. 1113) thereon.

Mr. HOWELL, from the Committee on Claims, to which was referred the bill (S. 4303) for the relief of Elsie Segar, administratrix of C. M. A. Sorensen and of Holger E. Sorensen, reported it with amendments and submitted a report (No. 1115) thereon.

He also, from the same committee, to which was referred the bill (S. 2203) for the relief of John Pearce Cann, reported it with an amendment and submitted a report (No. 1114) thereon.

He also, from the same committee, to which were referred the following bills, reported them severally without amendment and submitted reports thereon:

S. 257. An act authorizing adjustment of the claim of the Baltimore branch of the Federal Reserve Bank of Richmond (Rept. No. 1116);

S. 1067. An act for the relief of Agnes M. Angle (Rept. No. 1117); and

S. 4930. An act for the relief of Avery G. Constant (Rept. No. 1118).

Mr. WHITE, from the Committee on Claims, to which was referred the bill (S. 5286) for the relief of Addie I. Tryon and Lorin H. Tryon, reported it without amendment and submitted a report (No. 1120) thereon.

Mr. STEIWER, from the Committee on Indian Affairs, to which was referred the bill (S. 3731) to amend the act entitled "An act authorizing the attorney general of the State of California to bring suit in the Court of Claims on behalf of the Indians of California," approved May 18, 1928, as amended, reported it without amendment and submitted a report (No. 1119) thereon.

Mr. VANDENBERG, from the Committee on Commerce, to which was referred the bill (S. 5431) to grant the consent of Congress to George Washington-Wakefield Memorial Bridge, a corporation, to construct a bridge across the Potomac River, reported it with amendments and submitted a report (No. 1122) thereon.

INTERNATIONAL MONETARY AND ECONOMIC CONFERENCE

Mr. BORAH, from the Committee on Foreign Relations, reported a joint resolution (S. J. Res. 242) authorizing an appropriation for participation by the United States in an

international monetary and economic conference to be held in 1933, which was read twice by its title and ordered to be placed on the calendar; and he submitted a report (No. 1121) thereon.

BILLS INTRODUCED

Bills were introduced, read the first time, and, by unanimous consent, the second time, and referred as follows:

By Mr. CAREY:

A bill (S. 5519) to grant an honorable discharge to Claris N. Corwine (with accompanying papers); to the Committee on Military Affairs.

By Mr. DAVIS:

A bill (S. 5520) for the relief of John J. Foley; to the Committee on Military Affairs.

By Mr. ODDIE:

A bill (S. 5521) granting a pension to Mary L. Oxborrow; to the Committee on Pensions.

By Mr. McGILL:

A bill (S. 5522) granting a pension to Wilbur T. Lardie;

A bill (S. 5523) granting a pension to Jesse A. Straw; and

A bill (S. 5524) granting an increase of pension to Adelaide K. Dalrymple; to the Committee on Pensions.

By Mr. FRAZIER (by request):

A bill (S. 5525) to extend temporary relief to water users on irrigation projects on Indian reservations, and for other purposes; to the Committee on Indian Affairs.

By Mr. THOMAS of Idaho:

A bill (S. 5526) authorizing certain contractual changes relating to the payment of certain construction costs of the Minidoka irrigation project; to the Committee on Irrigation and Reclamation.

By Mr. BARBOUR:

A bill (S. 5527) providing for the sale of port of Newark Army base to the city of Newark; to the Committee on Military Affairs.

By Mr. REED:

A bill (S. 5528) to repeal the proviso contained in the act of Congress approved February 20, 1931 (Public No. 692, 71st Cong.); to revive certain acts of Congress repealed by the said proviso of the act approved February 20, 1931; and for other purposes; to the Committee on Military Affairs.

By Mr. TYDINGS:

A bill (S. 5529) granting an increase of pension to Adolph A. Linnenbrogger (with accompanying papers); to the Committee on Pensions.

By Mr. KEYES:

A bill (S. 5530) to provide for placing the jurisdiction, custody, and control of the Washington City Post Office in the Secretary of the Treasury; to the Committee on Public Buildings and Grounds.

By Mr. NORBECK:

A bill (S. 5531) to provide that income, war-profits, and excess-profits tax returns shall constitute public records; to the Committee on Finance.

CHANGE OF REFERENCE

On motion of Mr. BORAH, the Committee on Foreign Relations was discharged from the further consideration of the bill (S. 4229) to carry out the findings of the Court of Claims in the case of the Wales Island Packing Co., and it was referred to the Committee on Claims.

MATERIAL USED IN ERECTION OF PUBLIC MEMORIALS AND BUILDINGS

Mr. DALE submitted an amendment intended to be proposed by him to the joint resolution (S. J. Res. 226) to provide for the use of granite and/or marble in the erection of certain memorials and public buildings, which was referred to the Committee on Public Buildings and Grounds and ordered to be printed.

AMENDMENT TO TREASURY AND POST OFFICE DEPARTMENTS APPROPRIATION BILL

Mr. GORE submitted an amendment intended to be proposed by him to House bill 13520, the Treasury and Post Office Departments appropriation bill, which was ordered to lie on the table and to be printed, as follows:

On page 79, beginning with line 18, to strike out section 16 in the committee amendment and in lieu thereof to insert the following:

"SEC. —. Section 319 of Part II of the legislative appropriation act, fiscal year 1933, is repealed as of June 30, 1932; and the rate of interest to be allowed upon judgments against the United States and overpayments in respect of internal revenue taxes shall be the rate applicable thereto prior to the enactment of section 319 of such act."

PAPERS RELATING TO THE ADMISSION OF MICHIGAN INTO THE UNION

Mr. VANDENBERG submitted the following resolution (S. Res. 341), which was ordered to lie over under the rule:

Resolved, That the Secretary of the Senate is instructed to make photostatic copies of the following papers and documents and deposit them in the Senate files, and thereupon to transmit the originals to the Michigan State Library in the capitol building at Lansing, Mich.:

(1) Original copy of S. 81, reported from the Senate Judiciary Committee on December 29, 1836, the same being a bill to grant statehood to Michigan.

(2) Original copy of the message of President Andrew Jackson submitted to the Senate on December 10, 1835, the same being the Executive notification of Michigan's action in qualifying for statehood.

(3) Original credentials of United States Senators Lucius Lyon and John Norvell from Michigan, who took their seats on January 26, 1837, the same being the date of Michigan's admission to statehood.

SETTLEMENT OF WAR CLAIMS ACT OF 1928—AWARDS OF THE MIXED CLAIMS COMMISSION

Mr. BORAH submitted the following resolution (S. Res. 342), which was referred to the Committee on Foreign Relations:

Whereas Germany has exercised certain of the rights conferred by the agreement of June 23, 1930, between the United States and Germany permitting the suspension of payments by Germany of the sums payable under that agreement on account of awards of the Mixed Claims Commission, and no such payments have been made under that agreement since March 31, 1931, and suspensions of payments by Germany under the terms of that agreement without the consent of the United States are limited to a period not exceeding two and one-half years from the date of suspension of payment; and

Whereas the settlement of war claims act of 1928 was passed upon the understanding by Congress that all breaches of neutrality by Germany falling within the terms of the treaty of Berlin affecting American nationals could and would be ascertained and assessed against Germany and paid from the said funds in the Treasury of the United States; and the Mixed Claims Commission, United States and Germany, has unanimously found that Germany authorized destructions of property within the United States while the United States was at peace with Germany, and witnesses called before the Mixed Claims Commission by Germany who are admitted by Germany to have been authorized official employees of the German Government, as well as witnesses who testified for the United States, have sworn that they did perform within the United States pursuant to their instructions from the German Government serious breaches of neutrality by spreading fire and disease germs in the United States while the United States was at peace with Germany, but the Mixed Claims Commission has not been able as yet to ascertain what particular destructions Germany accomplished; and the Government of Germany has declined requests made by the Secretary of State to consent to the issuance of subpœnas by the Mixed Claims Commission under the act of Congress of July 3, 1930 (46 Stat. 1005) to compel the testimony of witnesses previously in the employ of Germany and now within the territorial jurisdiction of the United States; and the Government of Germany has declined requests of the Secretary of State to extend the time for filing of claims of certain American nationals against Germany as provided by Senate Joint Resolution 157, Seventy-second Congress, adopted by the Senate on June 24, 1932; and

Whereas the full amount of all of the principal of awards of the Mixed Claims Commission has already been paid by the Secretary of the Treasury under the provisions of the settlement of war claims act of 1928, as well as the full amount of interest on the smaller awards of less than $100,000 and on all awards for personal injuries; and the only funds remaining to be paid from the Treasury under the settlement of war claims act consist of certain interest payments to American nationals having awards in excess of $100,000 and certain payments to German nationals; and there is no requirement by law for payment by the Secretary of the Treasury of further funds under the settlement of war claims act of 1928 prior to the completion of the work of the Mixed Claims Commission; and further payments by the Secretary of the Treasury may result in claims being made against the Government of the United States: Therefore be it

Resolved, That it is the opinion of the Senate that the Secretary of the Treasury should not make further payments out of the funds in the Treasury under the settlement of war claims act or release any of the bonds of Germany now held in the Treasury of the United States pursuant to the terms of the agreement

between Germany and the United States signed June 23, 1930, until the Mixed Claims Commission, United States and Germany, shall have completed its work and the United States shall have consented to its discontinuance; and, furthermore, that the Secretary of State should not consent to the discontinuance of the work of the Mixed Claims Commission until proper provision has been made and consented to by the Government of Germany for the full ascertainment of Germany's liability to the United States by reason of breaches of neutrality falling within the terms of the treaty of Berlin, and until the discontinuance of the labors of the Mixed Claims Commission shall have been approved by the Congress of the United States.

FINANCIAL QUESTIONS—ADDRESS BY HON. ROBERT L. OWEN

Mr. FLETCHER. Mr. President, a former member of this body, Hon. Robert L. Owen, former chairman of the Banking and Currency Committee, has been devoting himself very largely to a study of the whole financial question involving currency and credit. He delivered recently a radio address on this subject, broadcast by the National Broadcasting Co. I think it throws a great deal of light on the situation and I ask that it may be printed in the RECORD.

The VICE PRESIDENT. Without objection, it is so ordered.

The address is as follows:

HONEST MONEY—THE RANKIN-THOMAS BILLS

Friends of the radio audience, by the courtesy of the National Broadcasting Co. and the National Grange I discuss Honest Money and the Means of Obtaining It Through the Rankin-Thomas Bills (S. 5292 and H. R. 13012).

A couple of weeks ago I promised to explain the Rankin-Thomas bills proposing a plan "to regulate the value of money," as required by the Constitution of the United States, Article I, paragraph 8.

The Rankin-Thomas bills offer the concrete means of regulating the value of money by expanding the volume of money when money is too high and contracting the volume of money when money is too low. These bills proposed to use the Secretary of the Treasury, as the agent of the sovereign power of the United States, to issue Treasury notes as money and to pay the deficit in such money until the general commodity index goes from its present low point of 61.9 back to 100. If it goes to 103, to contract currency until it falls to 100; if it goes below 97, to expand currency until it rises to 100; and by thus expanding the currency and controlling the volume of currency to keep the general commodity index within 3 per cent of par. This is exactly the same thing as saying, to keep the purchasing power of the dollar, in terms of wholesale commodities, within 3 per cent of par—for the one is the complement of the other. It means the same identical thing—expressed in the one case in terms of the general commodity index and in the other case in the index representing the purchasing power of money.

When the purchasing power of money is at 100 the general commodity is at 100; if the commodity index goes to 101, the dollar would go to 99; if the dollar would go to 99, the commodity index would go to 101. The rise of the one is represented in inverse ratio in the fall of the other.

The principle of the Rankin-Thomas bills appears in the Goldsborough bill—which, after long study by Congress, was finally passed by the House of Representatives by a vote of 289 to 60—117 Republicans and 172 Democrats voting for it. This bill declared it to be the policy of the United States to restore and maintain the purchasing power of the dollar at the average ascertained by the Department of Labor for the years 1921–1929, inclusive. This represents the same average of the years 1914–1930, and is a stable and just measure of the value of an honest dollar. The purpose of that bill was to establish an honest dollar between debtor and creditor—to establish a dollar that would prevent commodities going too high or too low—to prevent the dollar from going too high or too low.

The purpose was to establish a just measure of value between debtor and creditor—between those who produce commodities and those who buy commodities. Of course, all of our people are engaged, in some form, in creating and distributing commodities and in consuming such commodities. It, therefore, is of great importance to those who produce commodities to be able to know that they will get a fair value for what they produce; such as cotton, corn, wheat, oats, rye, barley, cattle, sheep, poultry, butter, eggs, and also such commodities as made of cotton, wool, flax, silk, of leather, rubber, steel and other metals. It is of the greatest importance to those who produce and labor to produce and are employed to produce that they should have uniform employment and uniform labor, so that they may be certain of being employed at reasonable wages and continuously. When you allow the dollar to become a dishonest dollar and to buy 4 times as much wheat, or 6 times as much corn, or 10 times as much United States Steel stock—it means a terrible loss to those who sell and an unfair gain to those who buy under such conditions. Under such a depression as we have—where the dollar has risen to a fantastic value in terms of commodities and other forms of property—it means that the consumption of all sorts of products has dropped to one-half of what it was before. Of course, when consumption falls one-half production falls in the same way and employment falls in the same way. Unless the people get enough for what they produce, they do not have the means from what they produce with which to buy. And since there is $230,000,000,000 of debts to be paid in the United States, if you destroy the value of the property with which such debts are secured, the debtor is absolutely ruined when he is compelled to sacrifice his property at one-half or one-fourth of its value as a means of paying the creditor. It also injures the creditor in many ways, because he loses when he is compelled to take unproductive property at such time and he has no means of administering such property.

There are some of great intelligence and great financial power who seem to prefer extending the depression by refusing any remedy, who denounce any effort to give stability to the purchasing power of the dollar and to restore the dollar to normal, that is, to bring the purchasing power of the dollar down to where it was before the depression. These people demand liquidation on the present purchasing power of the dollar—and liquidation means turning over to them the property of other people at one-half or one-fourth of its normal value. They benefit by it because they are able to use a dishonest dollar.

If I borrow $800 when corn is worth 80 cents a bushel, I could pay for it with 1,000 bushels; but if the dollar rises in purchasing power, so that corn sells for 10 cents a bushel, I must return 8,000 bushels of corn for the 1,000 bushels I borrowed. Such a dollar measure as this is thoroughly dishonest. It is unsound money. It is a "robber" meeting me on the highway with a policeman at his back and the court behind the policeman, commanding me to pay eight times as much as I got, because my debt was payable in dollars, and not in corn; and the dollars, having been made artificially valuable, have suddenly changed my debt and increased it in terms of corn eight times. It bankrupts me and makes me hate the fellow who uses the dishonest dollar to my disadvantage; but it justifies me in demanding of the Government of the United States that it shall exercise its sovereign power of issuing money and regulating the value thereof—to discharge its duty and regulate the value—so that I shall not be subjected to this cruel wrong.

In my last radio address I pointed out the terrifying results to the country when I discussed "What Is the Matter with the Country?"; and now I am showing you a lawful, constitutional remedy to expand, under Government control, the volume of money until the dishonest and unsound dollar again becomes an honest dollar and sound money and a fair measure of all commodities and services.

We are justified in demanding that the Government shall not only do this but maintain this policy for all time in the future as long as human society shall last. We have waited for this relief from the day we adopted the Constitution of the United States, and the time has come to give the world a fair measure of value in the form of money that shall be stable.

The Rankin-Thomas bills and the principle thereof have the support of the National Farmers Union, the National Grange, the American Federation of Farm Bureaus, the American Federation of Labor, and all informed progressives. The action of Congress and the Senate will depend upon enlightened public opinion—and you must do your part—

(1) In understanding this matter clearly and in making your opinion felt through every organization with which you are connected.

(2) By requests in the public press which you personally write or which you have your editor friends write.

(3) By direct appeals to your Senators and Congressmen.

I urge you, therefore, to back up the great farm organizations in every way you can.

The objection which will be offered is that we must not inflate money. The word "inflation" means to expand in an unsound way; but sound expansion and justified expansion are not inflation. The Rankin-Thomas bills prevent inflation, while they do propose to expand the volume of money until the purchasing price of money is restored to the average purchasing power for the years 1921–1929—which is a fair average and a just measure. This will establish and maintain "sound money."

The opponents will say that this will be "fiat" money. This charge is false, because fiat money means money not at par with gold; and the Rankin-Thomas bills expressly declare that the gold standard act shall be in full force, keeping all forms of money at par with gold.

The opponents will say that you endanger the gold standard by expanding currency. There is no foundation whatever for these pretenses. We have four and one-half billions of gold in this country and we gain at least one hundred millions a year on an average.

There is no demand for gold for pocket money.

The redemption of reserve notes is by cross entry in the Treasury, and no gold moves.

One hundred and fifty million dollars of gold coin put in the Treasury in 1900—to keep all forms of money at parity with gold—remains untouched. The demand for gold for hoarding after three years of depression is fully supplied and does not reach as much as $100,000,000.

We do not need gold for foreign shipment.

The only demand for gold remaining is for industrial purposes, and this does not quite equal one-twentieth of a billion per annum; while the demand for dollars in 1932—exhibited by checks cashed in bank—exceeded $600,000,000,000. In other words, the demand for the dollar was twelve thousand times the demand for industrial gold.

When the Rankin-Thomas bills pass—either as such bills or in principle through some other bills—the United States will have established a relatively standard measure of money—or the dollar. And when we know that the dollar will have a stable purchasing power, many advantages will follow:

(1) Our manufacturers will know approximately what their materials cost and will cost in the future; what their products are worth and will be worth in the future. The merchants who buy the goods will know what the reasonable value of such goods will be on the market, and, therefore, will be justified and able to forecast with dependable certainty their business contracts and inventories. This is of supreme importance.

(2) Under such conditions of stability every debtor and creditor will know that his contracts will have stability, that the creditor will be paid what he loaned with interest, and the borrower will be assured he will not have to pay more than he borrowed.

Under these conditions the fear of depression should diminish. We would have a justified basis of confidence in our banking structure and in our business life. People would therefore consume freely, and the more they consume the more they would produce until their wants were all satisfied, and the more they produce the more employment, until their wants were satisfied. Here is the foundation stone for stability in our business life, in our banking structure, in our manufacture and distribution of goods, in consumption, production, and employment.

When this great reform is established, it will be the beginning of an era of very great and permanent prosperity. It would then be easy to immediately prevent overexpansion or undercontraction. It would prevent a violent bull market or a violent bear market. It would stabilize our whole business life, and the depression, with its terrifying consequences, would be permanently a thing of the past.

I appeal to you, therefore, to do your utmost to create public sentiment and to urge your Congressmen and Senators to study this question so that they may act upon it with complete understanding and with the soundest judgment and support these principles.

I express my great appreciation to the National Grange for the time allotted to me and to the National Broadcasting Co. for its courtesy and to you for your attention.

Let us be thankful to Divine Providence for giving us the radio as a means of enlightening public opinion.

DUTIES OF CONGRESS

Mr. GRAMMER. Mr. President, Miss Bertha M. Hall, of the Brookline School, Seattle, has sent me a letter addressed to the Congress of the United States in which she presents her own unique views with respect to the duties of the Congress during the remainder of this session. I shall not take the time of the Senate to read her letter, but I ask unanimous consent that it may be printed in the CONGRESSIONAL RECORD.

The VICE PRESIDENT. Without objection, it is so ordered.

The letter is as follows:

SEATTLE, WASH., *January 1, 1933.*

To the Congress of the United States, Washington, D. C.

GENTLEMEN OF CONGRESS, HONORABLE SIRS: "Ye can not serve two masters" (St. Matthew vi, 24), said our great Teacher, Christ Jesus. "Is not that what frail mortals are trying to do?" (M. B. E.) says a modern writer. It has recently been proved that we can have but one President of the United States. Is it not the duty of the Congress of the United States to carry on with the President of the United States, whoever he may be? Is it not the highest office in our land which we are to respect, no matter who the incumbent may be? Are we using the Golden Rule when we do otherwise? Would you be willing to receive the courtesy(?) you are extending to the highest office in the land, were you filling that office?

O men, lay down personalities and work together for the highest good. Do that which seems the nearest right under the circumstances. Live and work for to-day, not half-heartedly by peering into the uncertainty of to-morrow, which may never come. You do not have to listen to two voices, only one. Put aside political jealousies and do the work you were originally elected to do.

I mean especially at present balance that Budget now with the means you have at hand. Many of you were agreed that the general sales tax seemed the only way. That seems a certain way to take care of it; any other is an uncertainty. "Who did hinder you that ye did not obey the truth?" (Gal. v, 7) which you saw? Can you evade the duty of to-day with impunity? "If thine eye be single thy whole body shall be full of light." Let no interference by unauthorized suggestion divert your attention.

The electorate of this entire country just as surely placed the present incumbent in the presidential office up until the 4th of next March, as that the same body elected another to officiate after that date. What you do or do not do reflects to your credit or otherwise.

Do you not know that an unbalanced national Budget has a bad psychological effect on every individual of this Nation? Then please do all you can as far as you now see to correct this situation immediately. The way has been shown; you have only to carry on. Whether we like it or not, we have to do our duty, do we not?—

"Act, act in the living present,
Heart within and God o'er head."

Respectfully submitted and thanking you,

BERTHA M. HALL (a voter).

AGRICULTURAL RELIEF

Mr. NYE. Mr. President, I ask unanimous consent to have printed in the RECORD an article entitled "Helping the Farmer Out," by Owen P. White, which appeared in Collier's for October 8, 1932. The article deals with the relief funds voted by Congress to Federal land banks last year.

The VICE PRESIDENT. Without objection, it is so ordered.

The article is as follows:

[From Collier's for October 8, 1932]

HELPING THE FARMER OUT

By Owen P. White

As a dispossessed southwestern cotton planter bitterly expressed it to this writer, what the Federal and joint-stock land banks have done to the farmers in this country is to darn near ruin them.

Originally these banks were intended to aid agriculture by making it easy for the farmers to borrow money. They did that. For 12 years, from Maine to California, they helped the farmers to get into debt, but now that hard times are upon them they are not helping them to get out.

On the contrary, by bringing foreclosure proceedings against 16,601 American farms during 1931 and selling many of them for whatever they would bring under the auctioneer's hammer, these land banks have decreased by many millions of dollars the average value of farm lands and thus have seriously crippled the credit of thousands of farmers not directly involved in any of their transactions.

Naturally, behind the activities of these banks there is a motive. That motive is profit. Although governmentally fostered, these banks are privately owned. Consequently, as between the farmers, out of whose pockets the banks' profits come, and the stockholders, into whose pockets those profits go, there is no common interest.

Furthermore, there is one other very important element that must be taken into consideration. That is the public. Stored away in their tin boxes the conservative investors of this country now hold about seventeen hundred million dollars' worth of tax-free bonds, issued by these land banks, upon which they can to-day charge off a loss of approximately half a billion. To be sure, there is nothing remarkable about this. All classes of bonds are down, but when we add together the two losses referred to—loss to the farmers of their lands, plus loss to the bondholders of their money—we are amazed to find that the result is profit to the land banks.

Now, how can any such financial miracle as this be performed? In order that we may find out, let us look into the case of a gentleman who requests that his name be withheld from the record but whom we will call Mr. Williamson, and who, we will say, lives in Alabama. A couple of years ago Mr. Williamson was a successful farmer; to-day he is merely a farmer in the past tense, and so has plenty of time to discuss his predicament.

NO CAUSE FOR UNEASINESS

"Yes," he told his Congressman, "I did have a good farm; 400 acres of it, standing me better than $25,000, on which, up to 1925, there had never been even a splinter of a mortgage. In that year along came an agent for a Federal land bank, who held out temptation to me, and I fell. Yes, sir; I fell for the picture that that fellow drew of a nice farm home with all kinds of city fixings built into it, and almost before I knew it I had signed up for a loan of $10,000, 5 per cent of which was held out on me and invested in stock in a national farm-loan association, which association in turn invested a like amount in stock in the Federal land bank, thus making the whole deal cooperative, as they told me, and at the same time making me believe that the Government was working right along with me.

"After that, for the next three years, I didn't have any more trouble than the cotton farmer always does have. In spite of having to fight leaf worm one year, and getting a couple of workers poisoned with arsenic doing it—but not fatally—and having to fight the boll weevil every year, I got the new house built, thereby raising my investment in the place to $35,000, made my crops regular, paid my installments and interest on the loan right slap on the barrel head, and was, in fact, feeling so good about everything that in the spring of 1930 I wasn't overly worried about it when along came a flood that drowned a lot of my livestock, washed down a couple of new barns that the paint wasn't hardly dry on yet, and set me so far back in my planting that I knew ahead of time I was going to make a pretty short crop that fall.

"It was short, and so, as the price of cotton was low, after I'd paid off the flood damage all I had left to turn in on $617 that came due in November was $300. But, of course, that didn't cause me a lot of uneasiness. I believed that I was borrowing from the Federal Government, which ever since 1920 had been

making violent love to all us farmers, and felt that as a stockholder, just once removed, in the Federal land bank I would be given some consideration.

"I just hopped into my car, drove to town, went to the bank, told the manager all about the flood and the low price of cotton, and, planking my three hundred down on the counter, I asked him to take it and let the other $317 ride until the next year.

"But do you think that without some additional security he was willing to do that? Not on your life he wasn't. That bank already had a $35,000 farm back of a $10,000 loan, but just the same that manager drew up a chattel mortgage against me covering 7 head of mules, all my farming machinery, my automobile, my equity in 40 bales of cotton in storage, and then, that being all he could think of, I reckon, he handed me the pen and said, 'Sign it there, Mr. Williamson.' I did.

TOO GOOD TO PASS UP

"I signed just where he told me to, and then that winter and the next spring, by selling off some of my feed and getting my tenants to trade their cottonseed for meal, I managed to get my planting done, and that year I got in a good crop. You know, though, what kind of a season 1931 was for a cotton farmer, and so there's no use in my explaining to you why last fall I still couldn't pay off that $317 balance. But, as I had made both ends meet for my own family, and had also made a living for my three tenant families, I wasn't entirely without hope when I went back to the bank and told them just what the situation was—that I was broke and that I couldn't pay what I owed, but that it wasn't my fault. I had worked hard; I was willing to keep on working hard; and so I suggested that if they'd just let me stay with the place I'd manage to finance my tenants another year and would give them a chattel mortgage on the 1932 crop. If you don't want to do that, I told the manager, then you'll have to foreclose, because, although I've got a $35,000 farm back there in the country, I haven't got 35 cents in cash.

"Well, he said he'd think it over and let me know, and so I went on home to do some thinking my own self. That happened in November, just before Congress met; and then, early in December, after it had met, I picked up the paper one morning and saw where a bill had been passed and signed by the President giving the Federal land banks a lot of money, $25,000,000 of which was to be used to help out delinquent farmers, who, as Mr. Hoover wrote when he signed the bill, had done their best but, because of circumstances beyond their control, had been unable temporarily to make the grade. The other hundred million carried in that bill was to extend new credit to farmers, but that didn't interest me any. All that I wanted—and somehow I felt pretty sure I was going to get it—was $317 out of that specified $25,000,000.

FARM RELIEF WITH A VENGEANCE

"But did I get it? Listen: You don't know anything at all about the way to run a Federal land bank. My mortgage was just too good, from the bank's standpoint, to ever come back to me; and so, just about three weeks after that huge sum for delinquent farmers became available, I got my share of it in the shape of a letter telling me that the foreclosure lawyers and the sheriff would be dropping around to see me in a few days."

And that, so far as Mr. Williamson is personally concerned, is about all there is to his story. Where he was once a busy man with a happy family, he is now idle with a hungry one, and therefore, as the Federal land bank contemplates the scene, he is entirely removed from the picture. But his farm isn't. It is still there, and it still represents something. It represents $35,000 worth of honest value that Williamson created that is back of $10,000 worth of bonds that the bank issued against his mortgage. And as those bonds have been selling for some time at about 87½, the logical thing for the bank to have done would have been this: Just as soon as it foreclosed on Williamson's land it could have taken $8,750 from the fund for delinquent farmers, out of which it wouldn't let him have $317, and with that cash bought back $10,000 worth of its own bonds. Naturally, by that procedure the bank would have made a neat profit on its own bonds. Moreover, it would also own a nice farm that hadn't cost it one penny out of its capital, which it could sell all over again under a mortgage against which it could again issue bonds which it could again peddle to the public.

So much then for Mr. Williamson's experience. There is nothing complicated about it. Loss to him of his land, plus loss to the bondholders of their money, has enabled the Federal land bank to come out of the transaction with a nice showing of profit for its stockholders.

But how do the joint-stock land banks, which, as we will see farther on, are not financed by the Government, manage to perform the same miracle? For an illustration of their methods we will jump clear across the country from Alabama to Michigan and will hear from a farmer we shall call Mr. Ferguson, who after gazing sadly out at the broad acres and the nice home that once were his, after speculating ruefully as to what he will do for his family during the coming winter and after softly cussing himself for having placed any faith in the misleading phrase, "instrumentalities of the Government," proceeds in a commendably restrained fashion to tell us his story.

"About seven years ago I took out a loan of $8,000 on my farm, which the appraisers for the joint-stock land bank had valued at twenty, and which was worth every dime of it. Thereafter, for the next four years, with wheat selling at a fair average price, I made my payments without any trouble, sent my three kids to school and kept up the installments due on a combine, a tractor, and an automobile. Then along came the depression and the first think I knew I was licked. But not by the depression, because neither it nor anything else has yet taken a dollar away from the basic value of that old chunk of ground of mine. Together it and I could produce just as much to-day as we ever could, and therefore when conditions get back to normal again we could, if we only had the chance, work our own way out and pay off our mortgage.

"But you see when that day gets here I won't be on the land to do that, because when I found out that I couldn't meet one of my interest payments, and went around to ask the bankers to carry me along for another year, I ran into a state of affairs that I hadn't ever paid any mind to but that they certainly had been keeping their eyes focused on.

PROFITS FROM LOSSES

"That was their bonds, and just in case you don't know how this bond business affects the farmers' mortgages I'll tell you about it. Under their charters these joint-stock land banks have the power to issue tax-free bonds against the mortgages which they take from the farmers. These bonds, of course, are peddled to the public, which, until the depression came along, has gobbled them up at par because, although they are really no such thing, they are labeled 'instrumentalities of the Government.' Well, what was making my banker's heart sing with joy was that when I went around to ask for more time those bonds were selling in the open market at 53. This made any farmer who owned a good farm but couldn't pay his interest too good an opportunity for them to overlook. Consequently they just said 'no' to me in a hurry, cracked down on my mortgage, sold my $20,000 farm for $6,000, and by taking that cash and repurchasing their own bonds with it they turned what would otherwise have been a $2,000 loss into better than a $3,000 profit.

"All of which is what I would call just about the sweetest kind of a * * *."

But at this point, as Mr. Ferguson's narrative seems about to become acrimonious, we will censor it. Apparently the idea he was about to express is that there is something unfair about the manner in which the joint-stock bank conducts its business, because a moment later when he was asked why he didn't do what the bank did—that is, buy bonds in the market and with them pay off his own mortgage—he is reported to have answered:

"Huh, that would have been pretty nice if I could have done it, but they wouldn't let me. No, sir; the privilege of buying in their own bonds at a heavy discount and with them taking our mortgages out of their portfolios, as they call them, is one that these land banks reserve exclusively for themselves."

Now, is this true, and are the other things that have been hinted at in regard to the activities of the land banks also true? Not knowing, I went to Washington, studied the situation and, going clear back to the origin of these institutions, here is what I found out about them:

To begin with, ever since 1917 when the Federal and the joint-stock land banks began to operate they have enjoyed a peculiar privilege. Under the law which fostered them by clothing privately capitalized, profit-seeking corporations with semigovernmental authority, it was the business of these banks to lend money to farmers on approved first-mortgage liens, against which mortgages they were empowered to issue bonds characterized as "instrumentalities of the Government" and hence tax free. Furthermore, as their one source of profit, they were permitted to charge 1 per cent more for the money they loaned to the farmers than they paid to their bondholders, thus making it necessary for them, if they wanted to prosper, to do two things: First, they had to find farmers to lend money to; and, second, they had to find buyers for their tax-free bonds. In neither case did they have any difficulty, because by carefully not stating that they were not lending Government funds and by carefully not asserting that they were not selling Government bonds they encouraged the impression to get abroad—and the United States Treasury permitted them to do so—that in both instances the contrary was actually the case. And did business boom? It certainly did. In the comparatively brief period of their existence ending December 31, 1931, these banks made loans to 635,926 farmers of the staggering sum of $2,449,325,856. Against these loans they of course issued their tax-free bonds of which, on March 31 of this year, there were outstanding $1,164,609,815 worth of those bearing the Federal land bank label and $536,410,260 of those branded joint stock.

But how do these two types of banks, both of which have the quasi-governmental power of issuing tax-exempt bonds, differ from each other? That can be briefly explained: The Federal land banks, of which there are 12, make their loans chiefly through and with the indorsement of farm-loan associations, which are chartered corporations with memberships composed exclusively of borrowers from Federal land banks. The farmer who obtains a loan from a Federal land bank must subscribe 5 per cent of his loan to stock in the association through which he gets his loan, and that association in turn must subscribe to a like amount of stock in the Federal land bank.

PAMPERED PETS

Thus this whole scheme is one of cooperative, private ownership, with the cooperative principle still further evidenced by the fact that each bank is liable for the bond obligations of all the others. Furthermore, in contrast with the joint-stock banks, as we shall see in a moment, these Federal institutions are the pampered pets of the Treasury. They began life on a fund of a few millions borrowed from our national hoard, and, as business

was very good at the start, they soon paid that back. Then trouble developed. Just what trouble is immaterial. Possibly the interesting fact that shortages, defalcations, and other irregularities which bonding companies had to make good developed in connection with the administration of more than 10 per cent of the farm-loan associations may have had something to do with it. But in any event, the Government has come across with about $600,000 per annum to help these 12 Federal land banks pay their overhead. For this annual contribution that they make to the Federal land banks the taxpayers get no return, even though those 12 banks, under their legalized 1 per cent spread already alluded to, and as indicated by the total of their outstanding bonds, should be collecting something in excess of $11,000,000 in gross profits annually from the farmers.

In comparison with the above-described set-up, that of the joint-stock banks is simplicity itself. Like the Federal banks, they are under the general supervision of the Farm Loan Bureau, and they also issue tax-free bonds, but right there all similarity between the two abruptly ceases. The joint-stock banks are not cooperative, they are strictly privately owned, and as no indorsement from any organization is required on their loans, they stand forth as actually independent operators in the field of farm finance.

Under such forms of organization, then, it would seem that these land banks would be very lenient with farmers. But they are not. On the contrary, as has already been indicated, now that a combination of "broke" farmers and low-priced bonds has produced a situation whereby the banks can foreclose mortgages with profit to themselves, and hence slight regret in any other direction, that is exactly what they are doing.

Nor do these instances of lack of feeling for the welfare of the farmer that have been cited represent exceptional cases. If necessary, the record could be made to teem with them. In fact, at a hearing held last March in Washington in regard to the activities of these banks, so much was brought out that was repugnant to his sense of justice that Chairman HENRY B. STEAGALL of the Banking and Currency Committee exploded with the following remark:

"I wash my hands of all pride in the Federal farm loan act and of all responsibility for it. I never dreamed, and I know the other men who passed that law never dreamed, that such things could come of it. If the officials of these banks will put just a little common sense and human sympathy into the administration of their institutions, and pay a little regard to the recent law giving them the authority to spread these mortgages over a period of five years, much good will come of it. As it is, the farmers have no incentive to try to pay out."

Nor was the good Congressman's ire, as might have been the case, aroused by any testimony laid before him by dispossessed farmers. It was the bankers themselves who did it. One, for example, testified that it was the custom of his institution to take chattel mortgages on the personal property of delinquent farmers, thus rendering it impossible for them to secure credit elsewhere, and "thereby hastening," as one Congressman sarcastically suggested, "the desirable foreclosure process." And yet another banker, Mr. Frank W. Blair of the Joint Stock Bank of Detroit, frankly admitted that by using money obtained from the sale of foreclosed farms his outfit had, in the preceding 14 months, repurchased $1,125,000 worth of its own bonds at an average of 53. Thus, at the expense of goodness knows how many farmers, the Detroit bank made for itself in a little more than a year a profit slightly in excess of half a million dollars.

"But why not?" asked a Congressman. "Those bonds represent your obligation to the public; the mortgages represent the farmers' obligation to you, and therefore why wouldn't it be entirely fair for the farmer to hand you back your obligation, for which you have already received par and hence are not out anything, and ask you please to hand him back his?"

"No, no," wailed all the bankers in chorus, "that wouldn't be fair, because it isn't legal."

"Fiddlesticks!" snorted the Congressman. "I did not ask you anything about the legality of the proceeding, because we can make a law that will fix that part of it. I asked you if it would not be fair. Answer that."

HELPING THEMSELVES

There was no answer, and neither, as a matter of vital public interest, have the Federal land banks ever answered the question as to what they have done, not only with the $125,000,000 already referred to as advanced them from the Federal Treasury but also with an additional $30,000,000 allotted them by the Reconstruction Finance Corporation. All of this huge sum of money was intended to percolate through to the farmers and help them out. So far, however, it appears not to have done so. To be sure, the stated policy of the Government is to extend additional credit to farmers rather than to foreclose on them, and yet what has happened? During 1931 twice as many farmers were dispossessed of their farms as in 1930, and, in so far as the extension of additional credit goes, the land banks' own figures show that for the first six months of this year, even with the vast sums above mentioned available to them, their loans to farmers were only about half of what they were during the same period in 1931.

Naturally, then, this question arises: In view of the fact that it can be profitably done, have these Federal land banks taken any part of the funds that were given them for the aid of the farmers and with them bought back at a substantial discount their own bonds?

Bluntly speaking, they have. To what extent this has been done I do not know, but I do know this: I know that when the chairman of the House Agricultural Committee asked the Assistant Commissioner of the Federal Farm Loan Bureau the direct question, "Have the Federal land banks used any of the recently appropriated fund for the repurchase of their own bonds?" the answer was "Yes."

A BETTER WAY

Contrast the policy of the insurance companies, which hold about 22 per cent of the farm mortgages in this country, with that of the land banks and an interesting situation develops. On the one hand we find constructive efforts; on the other destructive selfishness. For example, in Iowa at the present time at least one insurance company that I know of maintains a flying squadron of mechanics—carpenters, painters, plumbers, etc.—which goes around to condition and keep in repair the houses, barns, and outbuildings on farms which have been taken over, but whose owners, in most cases, are encouraged and allowed to remain thereon. These places are not being sold at auction by the insurance company. But now take a look at the Delta section of Mississippi—the richest agricultural portion of America—and note what is going on. Down there, where governmentally sponsored mortgage agencies reign supreme, farmers are being dispossessed by the score, buildings are falling to pieces and under the hammer of the auctioneers, who are disposing of even the chattels of the people, mowing machines are being sold for $16, wagons for $6, and plows for as little as a dime.

The reason for this difference in policy is obvious. The insurance companies have been in the mortgage business too long and have had too much experience with former depressions to want to be anything except lenient. They know that the values back of their farm mortgages are sound. Heretofore by keeping the farmers and their land together and giving them time to work their way out, the insurance companies have weathered every depression they have encountered with no loss whatever on the gross total of their farm mortgages. Thus they are not disturbed or worried by present conditions.

The privately owned, governmentally sponsored land banks, however, are all panicky and upset. Apparently they don't know what to do. In their complicated rôle they are trying to serve too many masters. As private institutions they must pay dividends to numerous stockholders; as Government agencies they must make records to which vote-seeking politicians can point with pride; and as their only method of achieving these two ends they have adopted the scheme of playing the bondholder against the farmer, to the very serious detriment of both.

DEBT READJUSTMENTS UNDER FEDERAL LAWS

Mr. COSTIGAN. Mr. President, I ask unanimous consent to have printed in the RECORD an address by Mr. David Lawrence, well-known editor of the United States Daily, delivered at Washington, D. C., on January 22, 1933, on the subject of Debt Readjustments Under Federal Laws.

The VICE PRESIDENT. Without objection, it is so ordered.

The address is as follows:

THE NEW WAY TO PAY OLD DEBTS

When the history of this depression is written it will be said that the year 1933 was characterized by a general readjustment of debt—a vital step in economic recovery.

The Congress of the United States is about to enact legislation of such far-reaching significance, not only in its relief of those who owe money but in the protection of those to whom money is owed, that I thought I would give you to-night an outline of this all-important proposal, which in some respects may be called the most important piece of legislation developed since 1929.

The bill has the support of Republicans and Democrats. Its passage is desired by President Hoover and by President-elect Roosevelt. It is the work of both parties in the common interest, not merely of creditors and debtors, but of the vast number of people who have been thrown into unemployment by the clogging of the wheels of business with unbearable debt.

What the measure provides, in a nutshell, is that those who wish to pay their debts but can not pay them as they now mature, or those who can pay them in part over a period of time, may voluntarily adjust or agree with their creditors on a plan for reorganization or extension, which will have the protection of the courts of the United States.

But, you will say, debt is a contract, and no court can under the Constitution take away anybody's property or modify a contract without the consent of the owner. Yes; that is correct under one section of the Constitution, but it does not apply in case of bankruptcies. The Constitution gives Congress the right to establish uniform laws on "the subject of bankruptcies," and these laws have always superseded all contracts when there is a liquidation or distribution of assets ordered by a court.

The new legislation, however, does not purport to be a bankruptcy proceeding in the sense that we have known the word. It does not put the stigma of bankruptcy on those who apply for relief. Bankruptcy usually means forced liquidation and distribution of assets and the complete destruction of the going value of a business with resultant unemployment. The new law would

bring just the opposite, namely, preservation of assets and protection against enforced sale and the preservation of going businesses.

How then, it will be inquired, can the protection of bankruptcy be given to a debtor and yet not compel him to become a bankrupt in a legal sense. The answer is that various decisions of the Supreme Court of the United States have held that a law on the subject of bankruptcies is a law "making provisions for cases of persons failing to pay their debts" and for the whole subject of relations between creditors and nonpaying debtors, including readjustment without bankruptcy in the popular sense.

Thus the framers of the new bill have taken the position that there is abundant power under the Constitution to draw a distinction between a debtor and a bankrupt and to afford relief to the debtor without adjudicating him a bankrupt; in fact, directly aiding him in preventing bankruptcy, which has usually meant liquidation.

This week the House of Representatives is expected to act on the bill, which has been reported favorably by Representative SUMNERS of Texas, chairman of the House Judiciary Committee. This bill is a combination of the bills introduced by Representative LAGUARDIA, of New York, Republican, and Representative MCKEOWN, of Oklahoma, Democrat, and is along the same lines as a bill introduced last spring by Senator HASTINGS, of Delaware, Republican, which was based on an exhaustive investigation of the subject made by the present Solicitor General, Thomas D. Thacher, formerly a judge on the United States district bench in New York City.

Embodied in the measure now are some amendments suggested by Senator JOE ROBINSON, of Arkansas, the Democratic leader of the upper House, who has been engaged for several months in a study of agricultural indebtedness, and who wishes to see set up special machinery whereby the farmer will be able to consult conciliation commissioners to aid in the adjustment of farm indebtedness in every county of the United States.

Let me quote to you now the explanation made by Chairman SUMNERS, of the House Judiciary Committee, as to the main bill for the relief of debtors. He says:

"The objectives of this bill may be summarized in this way:

"If a man has a going machine—a going business—and it is encumbered with debts that tend to interfere with its operation, we want to facilitate the process of getting the debt off the machine, instead of breaking up the machine and scattering the parts; and we want, also, if possible, to leave the original operator in charge. That mixes metaphors, but it gives an idea of our objects.

"Moreover, if we can avoid the present crisis—avoid having to settle debts now—the element of time would probably work to help save individuals and companies that are in difficulties because of debts.

"We hope, also, that creditors finding that they can not collect all of their debts will be content to take what they can get without breaking down the business of the debtor. They probably would get more if they were so content.

"For instance, if a man owes $300 and he has only $100, a bankruptcy proceeding might well yield for the creditors only $50, the remainder being taken up in administrative expenses of the settlement. If they deferred action against the debtor and agreed to take what he could afford to pay them, he probably could pay them more than the $50—maybe $85 or even $100—and still keep his business operating.

"Many persons find themselves victims of the present economic situation through no fault of their own, and not even through any serious business fault. They should be kept in the economic system instead of being forced out.

"Another objective which we have written into the bill is aid for farmers owing mortgage debts and in financial distress. The city man, if a foreclosure is brought against his house, may move a block down the street into another house and go along much as he did before. But with the farmer it is different. Foreclosure on a farm house means not only that the farmer loses his home and probably has to move some distance away, but also he loses his means of making a living. We want to help him if we can."

Now let us see what the bill as a whole provides for all classes, first the individual, second the corporation doing a general business, third the railroads, and fourth the farmers.

The procedure in all four instances is much the same, that is, a petition or affidavit is filed in a Federal court stating simply an inability to pay debts that are maturing. Please note that the law refers to all persons or corporations "unable to pay their debts at maturity." It does not say all persons seeking to be adjudicated bankrupts. Nor can it ever be said that an applicant for relief was a bankrupt unless, of course, the plan of reorganization failed and ultimately the person or corporation became a bankrupt in the usual sense. It is expressly provided that there shall be no adjudication in bankruptcy unless the reorganization plan fails and the creditors or debtor seek a bankruptcy status.

When the petition is voluntarily filed by the debtor, that is, the person who owes the money, the court takes notice of it and gives the debtor a reasonable time to meet with creditors and work out a plan. While that procedure is under way, the creditors can not throw the debtor into bankruptcy and get possession of his assets, forcing a liquidation or sale. The mere fact that the court takes notice of the petition acts as a preventive of bankruptcy while the plan of reorganization or extension is under consideration.

In the case of individuals, the debtor must get the consent of a majority of his creditors both in number and amount owed. In the case of corporations, there must be obtained the consent of two-thirds of the creditors of each class, secured and unsecured. In the case of railroads, the Interstate Commerce Commission must give its opinion on the merits of the reorganization plan, though the court is not bound to accept the commission's opinion as final.

Heretofore one of the principal difficulties in reorganizing companies has been the nuisance tactics of certain minority stockholders or bondholders who have brazenly refused the most reasonable plans for composition or extension of debts, thinking their claims would be bought off by the majority rather than have the whole plan collapse.

The most vital thing about the new legislation is that it makes possible a court order which is binding upon minority or dissenting creditors. But it should not be supposed that the disagreeing creditors or holders of bonds or stocks will not have their rights protected. Every provision is made to obtain a fair appraisal of the property, every opportunity is given to the minority to come into court and prove that the plan of settlement is unfair and should not be accepted. The very fact now that the court will not tolerate nuisance tactics on the part of minorities may make unnecessary the filing of petitions for reorganization in many instances for it will be possible to reach agreements outside of court, though to be sure a confirming order approving the plan may often be sought as a formality to protect against obstructive legal proceedings later on.

Ample protection is given under the proposed law to the creditors in case they have agreed to something which later turns out to be fraudulent, for the courts are empowered to reopen the case and order an adjudication in bankruptcy and a forced sale or liquidation if it turns out that the applicant misrepresented or was dishonest in the procedure at any stage.

Also, if an agreement is reached with creditors for an extension of payments, let us say for three years, and a particular payment is defaulted during that time or some other promise is not fulfilled though there may be no question of integrity or honest intent but simple incapacity to pay, the owner of the business or the individual is in the same status then that he was before the agreement was reached, namely, he may be forced into bankruptcy by his creditors or he may approach them again in an effort to get a further extension and have it approved by the court.

Theoretically, the purpose of the law is to retain in management so far as possible the individual or individuals who have been managing the business and who know most about it or to whom the creditors are willing to entrust the future operations of the business. But, on the other hand, if at the first meeting of creditors, a majority of those present shall say that they wish another manager appointed or new management personnel put in, they may ask the court to direct that such a step be taken. The owner may preserve his ownership rights, but he can not preserve his management position if most of his creditors think some other management would be preferable. Also, to protect creditors a custodian of property can be appointed if the creditors should desire or the court shall deem it wise, thus enabling one representative of the court to take possession on trust of property no matter where in the United States it may be located. This is designed to avoid the ancillary receiverships that have made the reorganization of American corporations such a heavy expense in itself upon overburdened companies.

Now you may ask how does the relief of debtors relate to economic recovery. There are literally thousands of companies which have their assets tied up and their deposits impounded because they now are in receivership. These can be lifted out of receivership through the new law without going through bankruptcy or foreclosure proceedings.

There are many companies which dare not proceed to disburse funds because they can not prefer one set of creditors over another without involving themselves in acts of bankruptcy and any three creditors may throw them into bankruptcy overnight. They live in fear of such proceedings, hence they do not go forward.

But worst of all is the forced sale of assets when once liquidation is ordered. Thus, when a company is liquidated its property is thrown on the market and virtually a public auction is held, at which a price is paid which is lower than the property is really worth. This price becomes publicly known and depreciates the value of similar property or securities. And when there is a forced sale the amount realized is oftentimes ridiculously low and the creditors might have gotten many times that sum if the business could have been continued or liquidation postponed until a more favorable time for all concerned.

Forced liquidation of assets, or deflation, as it is sometimes called, has taken a terrible toll already from the American people and the threat of more liquidation has depressed values on every side. Now, with a method of adjustment of debt between creditors and debtors, this can be prevented where it is to the interest of both parties to accept such a voluntary readjustment under the protection of the courts.

Many businesses now will be promptly reorganized and enabled to reemploy labor. Many corporations will be able to resume payments to their stockholders or bondholders. This means a release of money that can be converted into purchases or investments. It must not be forgotten that the savings of the Nation are directly or indirectly involved in a stabilization of the whole problem of debt.

Once debts are spread over a period of time or scaled down by mutual agreement so that operations can be resumed, the stimulus to business as a whole will be incalculable. That is why I have called the pending legislation the most important prepared since the depression began. Speaker GARNER has announced that he will have a special rule brought in so that the bill may go through the House of Representatives this week, and there is every reason to believe the Senate will act just as promptly and that the measure will become law within the next two or three weeks.

PROPOSED FAIR-TRADE LEGISLATION

Mr. BROOKHART. Mr. President, I ask leave to have published in the RECORD a statement of Representative CLYDE KELLY, of Pennsylvania, in reference to the Capper-Kelly fair trade bill, being Senate bill 97.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

In a memorandum issued December 12, 1927, the Federal Trade Commission stated:

"The question of resale price maintenance is one of the most troublesome with which the commission has to deal in the present state of the decisions. The early Federal cases trace the principle to a passage in Coke on Littleton dealing with restraints on alienation. Courts, in attempting to apply these ancient principles, have fallen into hopeless confusion. Orders of the commission, issued under its organic act, have been upheld in some circuits and set aside in others on almost undistinguishable states of fact.

"Until the commission's inquiry no comprehensive effort had been made in this country to develop the essential facts in reference to resale price maintenance. Such inquiries have been made in Canada and New Zealand, and certain of the Scandinavian countries have given attention to the subject and have laws legalizing resale price fixing with provision for seasonal sales, bona fide competition based on superior efficiency and sustained over a considerable period of time, etc."

I believe that this question is one of the most important which confronts the business world to-day.

Upon its solution depends in some measure the character of American business to-morrow and the day after to-morrow, and, as every man, woman, and child is dependent upon business for life and welfare, the character of business is vital to the Nation.

Now, we who favor price standardization propose to do certain things. We propose to permit the producer of a standard, trademarked, identified, guaranteed article to enter into a contract with his distributors that his product shall be sold at a specified price. The producer who makes such a contract shall be in competition with other producers of the same class of goods and there shall be no agreement between producers, nor between wholesalers, nor between retailers as to sale or resale price.

We provide that any such contract, whatever other features it may have, shall be deemed to have the implied condition that the goods may be sold for less than the specified price under reasonable contingencies, such as the distributor going out of business, the deterioration of the goods, or the conduct of the business by receiver, trustee, or other court officer.

The provision is permissive, not mandatory. The contract will only be entered into by the producers who wish to protect their products against manipulation of prices and by the distributors who believe such a policy to be beneficial. It will not be used for marketing goods of quickly changing fashion or seasonal value. It can not be used for marketing bulk or unidentified merchandise.

What is the reason for such a proposal? It is to meet the grave evils caused by predatory price cutting on standard, identified goods, a system which has grown up because of Supreme Court decisions in the past 16 years, largely through cases brought before it by department-store firms and chain-store proprietors. We simply propose to prevent dealers who will not rely on their own good will and reputation from using publicly approved, identified goods of stable quality and value as bait to deceive the public into believing that all articles sold by them are at similar bargain rates and savings.

Surely there is no difficulty in discovering the evils of price cutting on standard articles. The procedure is simple. They proceed upon the theory that if they cut the prices on well-known standard goods, whose value is well fixed in the public mind, to a point below cost to them or below the basis of a reasonable living profit, they will be able to attract the customers of their competitors and secure their patronage. Through this plan they expect to sell enough unnamed, unidentified merchandise at excessive profits to reimburse them for the loss on the bait merchandise upon which they take the loss by cutting the fair price.

The price cutters issue flaming advertisements declaring that articles which are known to everybody at a certain price are to be sold at a deeply cut price. An article which costs the price cutter 75 cents will be advertised at 69 cents. A 25-cent article will be marked down to 14 cents. The public is expected to believe that these are but examples of the universal savings to be made by dealing at such a store.

Of course such a practice immediately injures the maker of the goods. The public loses its confidence in them, for they seem overpriced in view of such reductions. The price cutter does not desire to sell the goods, for the more he sells the more he loses. He endeavors to substitute other goods on which he makes an unfair profit. His reliance is that the customers will buy unstandardized goods on which there is no way of telling the real value and the fair price.

The effect of this practice is felt immediately by other dealers. They must meet the cut price or lose their trade in the goods. If they follow the price cutter they, too, must prevent the buyer, wherever it is possible, from buying goods on which a loss is involved. If they refuse to cut prices they must stop handling the goods which the public wanted and on which at standard prices they could make a fair profit.

Is that not an evil business practice? My contention is that it is not necessary to decry the evil with such weasel words as "certain forms" of price cutting, meant to apply to all forms except the one which the particular price cutter is using.

The evil is in plain sight. It is the practice of cutting prices on standard goods by dealers who are at present permitted to destroy honest values, good names, and square business with impunity and for ulterior purposes of their own.

We say we can remedy the evil in effective fashion by putting into the hands of independent manufacturers and dealers the power to end this unfair, dishonest sales system through price control by the maker of the goods.

Right here let me emphasize the fact that only the use of cuttlefish tactics can make of this proposal anything new and revolutionary. From the time the cave man made a stone hatchet and bartered it to his neighbor, it has been the universal, inherent right of the owner of any article to name the price at which he will sell it.

Here in the early days the makers of goods sold them direct to their customers and named the price. Then as transportation facilities developed they sent out their agents to sell to customers at the price specified.

The next step was to sell to retailers, and the producers who identified their goods and desired it had the undisputed right to specify the retail price. Later the wholesaler entered the field of distribution as a necessary agent and the producer, through free contract, named the final selling price.

The courts upheld these contracts as lawful and proper. There are splendid judicial defenses of them in hundreds of court cases. The courts declared them to be valid and enjoined those who tried to break the contract.

Remember that point. The right of contract has been taken away from the business man in America and we seek to restore it to him. It was not taken away by express law, but wholly by court decisions.

It was the Supreme Court of the United States that changed the entire course of merchandising. In the Doctor Miles Medical Co. case, decided in 1911, the court ruled that this contract system of controlling the resale price was in conflict with the antitrust law as a restraint of trade.

Seven judges said that, and that "grand old man" of the Supreme Court, Justice Holmes, wrote the dissenting opinion. He stripped the question bare when he wrote:

"I can not believe that in the long run the public will profit by this court permitting knaves to cut reasonable prices for some ulterior purpose of their own, and thus impair if not destroy the production and sale of articles which it is assumed it is desirable that the public should get."

Seven men on the Supreme Court bench took away from independent business men the right to contract as to the resale price of identified goods.

But did they declare that controlling the resale price by the producer was illegal and void? They did not. Neither in the Doctor Miles case nor in any other decision has the Supreme Court ruled that there is anything wrong about price maintenance by manufacturers. They only ruled that certain methods of accomplishing the result were wrong.

They have strongly affirmed that some methods of accomplishing exactly the same results are right and commendable. Three years ago the Supreme Court gave a clean bill of health to the General Electric Co. and upheld its right to control resale prices. The Supreme Court gave judicial benediction to price maintenance after the General Electric plan. Here is what the court said:

"The owner of an article patented or otherwise is not violating the common law or the antitrust law by seeking to dispose of his products directly to the consumer and fixing the price by which his agents transfer the title from him directly to such consumer."

The General Electric sold its lamps through the retailers, but by consigning the goods and calling the retailers agents they named the price at which the goods may be sold to the consumer.

This decision means that only a great corporation which is financially and commercially in a position to use the expensive and cumbersome system of consigning goods to the retailer can protect his goods. The little manufacturer who can not use such a system is prohibited from doing it through contract with his distributors. The Supreme Court has also held that the maker of goods may control his price through his own retail agencies. If a piano manufacturer will start a retail store in every city, he can control his price and no questions asked. But let him undertake to sell through the regularly established wholesalers and retailers and his attempt to control his price becomes a criminal act.

Can anyone deny that there is a grievous wrong in such a state of affairs? Price standardization is either right or it is wrong. If it is wrong for the Doctor Miles Medical Co., it is also wrong for the General Electric. If it is right for the General Electric, it is also right for the little, independent producer.

I maintain that it is inherently right. It means honest business. It was right and just for the United States Government to prohibit cut prices on railroad freight rates and passenger tickets—the universal practice years ago. It is right and just for the United States Government to maintain a one-price-to-all policy for postage stamps and Government publications. It is right and just that insurance agents shall not cut prices on insurance policies.

I maintain that it is equally right and just that the man who puts his life and money and character into a product which he brands with his name and guarantees with his cash shall also have the right to contract with his distributors that they shall not manipulate his price to his injury.

Why does this inconsistency and injustice exist? Because of blindness to progress and modern merchandising. In our own time has come about the nation-wide business which enables the buyer in San Francisco to purchase the same article of identical quality and value as the buyer in New York city. One of the greatest boons in American history was the adoption of the trade-mark. It standardized production, made uniform quality possible, and eliminated many crooked business practices. It made possible the market extension which resulted in mass production and lowered the cost on every unit for the benefit of the ultimate consumer.

The manufacturer depends upon public good will as the greatest asset in his business. He must protect his product into the home of the consumer if he is to build up good will. He must deliver good quality at a fair price. When he sells goods to the distributor he does not lose interest in them. In fact, his article is not sold until it is bought by the consumer.

The Supreme Court acted upon the assumption that when the manufacturer has sold his goods outright and received full payment they belong wholly to some one else, and he could not expect to control the resale price.

The fallacy in that is that it classifies trade-marked, identified goods exactly the same as unidentified bulk merchandise. The truth is that with standard goods the advertiser is the seller and the public is the buyer, with the distributor an essential agency between.

Procter & Gamble make Ivory soap, a standard article. They will make soap cakes of exactly the same kind, let us say, for a distributor but without the brand "Ivory" on it. They do not care what price the dealer gets for that unbranded soap, for they are not responsible for it after it leaves their hands. But if that dealer takes Ivory soap and cuts the price until it is injured in the eyes of the consumers, and makes other retailers refuse to push its sale, they are vitally interested. In the cases of some companies their very lives are at stake.

We who uphold the principle of price maintenance simply say to distributors: "Give up the trade-mark if you cut prices. Take the identification off and you may treat the goods as you desire. But if you use a name and reputation, made valuable by honest goods at honest prices, you shall not use them for dishonest purposes."

Now, I have shown two things: First, price control by makers of identified goods was the American system of doing business before 1911. Contracts for that purpose were legal and valid until the Supreme Court stripped the business men of the right to make such contracts. Second, such price control is perfectly legal and proper to-day if done by great corporations that can afford to consign their goods and wait until they are sold before payment or to establish their own retail stores.

I submit that the burden of proof is upon opponents to show why such contracts, entered into voluntarily by business men, are wrong in policy and effect. Also why, since price maintenance is legal for the big concern, it should not be legal for the small enterprise that desires to use the regular channels of distribution through wholesaler and retailer.

Opponents must explain why they favor a system under which, if a small manufacturer attempts to protect his good will by requiring dealers to maintain the price he believes fair, he becomes a criminal, subject to imprisonment and loss of citizenship, while the big manufacturer may do exactly the same thing by consignment and agency and be honored as a worthy, law-abiding citizen.

Will they say they favor taking away the manufacturer's right to sell at a specified price through his own agents and agencies? No; they will do no such violence to common sense. They know that any such action would mean anarchy in business.

Then, are they not forced to admit that the present conditions, brought about by judge-made laws, mean for one set of producers a prohibition and for the other set a blessing? With one hand the law restrains; with the other it sanctions.

Can anyone defend that condition of affairs before men who believe in the American doctrine of "equal rights to all, special privileges to none"? If they can not, it is proof that price maintenance is the only method to secure a square deal for the little independent competing manufacturer of standard goods.

I propose to prove also that price control is the only method of securing a square deal for the distributor.

The opponents of price standardization declare that if we permit the little manufacturer to have his equal rights as to resale price, then the wholesaler will become only a manufacturer's agent, while the retailer will become only an animated slot machine, handing out standard goods over the counter.

I might as well consider that proposition as I go along and use it in connection with my presentation of the subject.

That argument sounds like a high regard for the independent distributor, does it not? Of course, if it is sound and the retailers are to be injured by price maintenance, it is strange that 90 per cent of all the independent retailers of the United States are solidly supporting it. It is still more strange that when a referendum on this question was taken by the United States Chamber of Commerce the vote was 1,079 in favor of the price-maintenance principle to 911 opposed.

Shall we say that all these business men are fools, blind to their own interests? With all respect, I would rather take the views of John Smith, the corner druggist, on a question as to the best interests of the independent distributor than those of any owner of a great selling system.

I must admit that I greatly fear that the opposition are not so much concerned about making the small retailer a stalwart, independent man of upstanding individuality and inflexible backbone as they seem.

They defend a system through which they profit, a system brought about by court decisions in cases originated by themselves, a system which is steadily monopolizing merchandising, destroying wholesaler and retailer and making them hired men, little cogs in a vast machine.

The destroyer of independent, individual business is not price maintenance but price manipulation; not price standardization but price cutting.

That has been true all through our history. Did you ever hear of a trust squeezing out a small rival by raising the price or maintaining one price to all? Never. Standard Oil cut prices in order to destroy competition. The Tobacco Trust built its monopoly on cut prices.

Supreme Court Justice Brandeis was exactly right when, as a member of the bar, he said:

"Americans should be under no illusions as to the value and effect of price cutting. It has been the most potent weapon of monopoly and means of killing the small rivals to which the trusts have resorted most frequently. It is so simple, so effective."

The Sherman antitrust law and the Clayton antitrust law were passed to prevent the restraints of trade caused by the price-cutting tactics of would-be monopolists. It is indeed strange to see those same laws now being used to provide safe shelters for piratical price cutters in building monopolistic retailing agencies.

The danger in monopoly is that it shuts the door of opportunity to the individual. To-day the most menacing sign on the business horizon is the monopoly tendencies in the field of distribution. If it continues, great numbers of men who in the future seek to enter into independent business will find the door shut tight against them.

The little business man everywhere is being displaced by the huge corporation with its multitude of employees, its absentee ownership, and its financier control. Let us go into that a little.

I am not going to emphasize the danger to independent business men from the chain-store systems, serious as that danger is. But I ask, Is it a coincidence merely that these chain stores have grown like mushrooms only since the Supreme Court put into their hands the greatest weapon known to monopoly—cutthroat price cutting on standard goods?

Let us give the little retailer a square deal and see if he is not able to live and serve his community more efficiently than any giant combination on earth.

Remember, I ask no special favors for him. If he can not manage his store and render as good service in his neighborhood as the city department store in a far-distant location, let him fail. If the independent retailer can not meet the fair competition of any rival, big or little, let him give way before it and make room for finer and better service.

It is vitally important that every business man of independence, courage, and honesty be enabled to serve business and the public by standing out against would-be monopolists. The strongest laws in defense of honest business are those that compel fair competition. I desire no backward steps nor turning back of the hands of the clock of progress. I want to see every business enterprise reach its correct size, which will be when it is able to serve most efficiently and economically.

Those great department stores, mail-order houses, chain stores, and the like came into being to cut the cost of distribution. But, instead of being able to do business with less overhead than the little fellow, it costs them more. They pay the highest rents and operating expenses. You may be sure that if they sell some goods at cost they must make a tremendous profit on others.

They say they are superior in efficiency, economy, and service. All right, I say to them, prove your statement and I will agree. But there must first be a fair and open field. Unfair competition, such as price cutting on standard goods as "bait," must be stopped. Let these great concerns do business on a fair and square basis. Then if they are able to destroy the small dealers and consolidate into these giant chains by natural and normal means, I will accept the outcome. But if their logic is correct and we are inevitably bound to move onward from many great chains to one great chain and finally to one owner, then state socialism is assured, and we must master monopoly by Government fixed prices.

I am not ready to accept that situation. These great combinations have not yet proved they can honestly and in fair competition wipe out all small rivals.

Once let price maintenance become again the settled business policy, and you will see a sudden halt to this giant consolidation. You will see red-blooded American manufacturers saying to the man who buys for 40 department stores, "You shall sell our goods on an honest basis or not at all. You shall not use them as

spider-web bargains to entrap unwary customers. We will allow you a fair profit, exactly the same as other dealers, no more and no less. Sign a contract that you will do it or you do not get our goods no matter how big you are."

Now, I have pointed out that the power to control resale price through free contract is essential if a square deal is to be given the independent manufacturer and distributor.

I have done that only to prove that such a right to them means a square deal to the public. After all the first and foremost question is the public interest.

Of course, it is true that there are 12,800,000 persons earning their livelihood through the manufacturing industry. They and their families dependent upon them make up a part of the public. There are 3,500,000 persons making their living in the retailing business. They and their families also form a part of the public.

But I not only admit, I contend, that this question must be decided solely upon the effects upon true public welfare.

First, honest and fair competition is always of public benefit; unfair competition is always of public injury. It is that truth, learned through bitter experience, which has led to the enactment of antitrust laws and all the other measures curbing jungle competition in the United States. Under unrestricted, cutthroat competition the strongest and most unscrupulous must triumph and the public must pay the bill.

The one-price-to-all policy means more competition, but it sees to it that it is fair competition. It is competition in quality and individuality. The maker puts his own name and guaranty behind his product and names his price competitively. He makes his appeal direct to the public in keen competition with other producers. There is no price jockeying, no price juggling in the retail market to deceive and dupe the public. There is increased true competition between makers bidding honestly for public favor.

Price maintenance on standard articles in a competitive field can not lead to profiteering prices. If the maker fixes his price too high he does it at peril of building up business for his competitors.

He will lower his standard price to widen his market, but he will fight desperately against increasing it and restrict his market. We saw that in the World War conditions. I have the report of the War Industries Board, which made an exhaustive study of prices during the war period.

It shows that while prices on bulk, unidentified merchandise skyrocketed in price, jumping 1,000 per cent in many cases, practically every article, advertised nationally as to price, remained firm at the former low levels.

The War Industries Board says that that was because the makers of such articles would sacrifice almost everything to keep from increasing a price which advertising had associated with the article.

Will it be said that lowered costs are not reflected in the standard price? That is exactly what does happen under price maintenance. Look at the automobile business. Henry Ford, as the mightiest auto maker of them all, has built his wonderful business on exactly that principle. He has continually reduced the price while increasing the quality.

Ford's car is sold to-day and always has been sold on price-maintenance principles. Before 1911 he sold under contracts with his distributors on the plan I am advocating. When the Supreme Court ruled against such contracts, Ford immediately established exclusive agencies of his own.

He had the resources and he did it, just as any manufacturer with great capital can do it. Ford did not propose to have his car slaughtered to make a department-store holiday. He did not propose to have his car serve as bait to lure the unwary until his good will had been destroyed.

His present system is more expensive and less efficient than the contract plan, open to every distributor, but it is infinitely better for the public than having it turned over to the mercy of price cutters.

Time after time Ford has reduced the price to the public, but every time it was one price to everybody. He did not change the price every month if there was a slight difference in production cost. That would have brought chaos in the business and discriminated against many buyers, with loss of good will. He stabilized the price for the season and he gave the public the benefit of savings through increased production.

Oh, no; those who argue that price maintenance leads to stationary high prices must shut their eyes to the automobile industry, that most astounding development within the past 25 years, which has been built up on price-maintenance principles.

Well, what about the distribution cost? Our opponents say that a uniform price means that the stores with low costs of operation will have to sell at the same price as the high-cost stores. That would mean an unnecessarily large profit for the low-cost stores, and they could not share this profit with their customers.

That is an upside-down argument. Do the price-cutting stores line up in the rank of the low-cost establishments? Not at all. Their costs are the highest of all. Are the profits allowed them under standard price distribution too high? No, again.

The efficiently conducted neighborhood store, owned and operated by its own proprietor, is the low-cost store. These are the business men who ask the protection of price standardization. They want a fair price and a fair profit—no more and no less.

Then, too, identified goods at standard prices benefit the public by encouraging high-quality goods of uniform value which can be secured by anyone, any place, any time.

Mrs. J. Borden Harriman, chairman of the National Consumers' League, some months ago went to Europe. On her return she said:

"The shopper's only safety lies in the purchase of goods she has tried with satisfaction and which she knows will always measure up to the same standards of quality and value. In Europe the American woman is without such protection and guidance."

That was the situation in the United States before identified goods came to benefit the public. It is the situation now on nameless, unidentified merchandise. The Association for the Improvement of the Condition of the Poor in New York City made an investigation into retail prices. It found that coffee shoveled out of a bin went to one store and was sold at 35 cents a pound. Coffee shoveled out of the same bin went to another store in the same chain ownership and was sold at 60 cents; unnamed, unidentified coffee. Tea, coming from the same bag, went to one store and was sold at 35 cents. The same tea went to another store in the same chain and was sold at 70 cents.

Is the public served by any such system as that? To-day all the resources of chemistry and applied science may be used to fool the purchaser. Imitation and adulteration and dishonesty may defy the most intelligent.

Only last year I heard Health Commissioner Harris, of New York City, say that he had issued an order forbidding a Brooklyn milk company from invading the territory of a milk company in Manhattan. He said he knew that such invasion would lead to price cutting, and that would surely lead to milk adulteration.

If price cutting leads to the adulteration of the milk upon which the lives of babies depend, it is an evil system. And the truth is that, carried to its logical conclusion, price cutting on standard goods is always bound to lead to lowered quality, substitution, and adulteration.

Under present law the manufacturer of a standard article can legally restrain a dealer who adulterates his product. Why should he not have the right to restrain a dealer from destroying the product entirely through fake price-cutting methods?

Well, what about the benefit to the consumer who goes to a great city department store and buys an article for 14 cents when the standard price is 25 cents. Is that not a benefit?

No; that is not a real benefit. The consumer does save 11 cents on that one purchase, but he pays out much more in unduly high prices on other purchases. If consumers would pledge themselves to buy only these well-known standard goods at cut prices, I will agree that they would benefit. They would have their savings in their pockets, and in a very short time the store would be out of business. I am willing to agree that in most cases that would be a benefit.

But if they buy other unnamed goods, then they are helping to make the price cutters masters of the merchandising field. When that happens prices go up and the public pays the bill.

There is no benefit in saving a few pennies on standard goods and losing dollars on unidentified, unknown goods. There is no public benefit in saving a dollar to-day and being robbed of $10 next year. Those are the real alternatives in this problem.

But what about the enormous expenditures of nationally famous goods for advertising? Does that not mean higher prices? It does not. It means lower prices. Advertising means increased production and a lower cost on every unit. Do you think Henry Ford could sell the Ford car at his price if he only sold 10,000 a year? Mass production is possible only through advertising, and that means lower not higher prices. Advertising is the cheapest salesmanship. Without it the Nation's business would be but a shadow of what it is to-day. And remember, there is one thing advertising can not do with all its power. It can not compel the American people to buy year after year any identified article which is not right in quality and price. Fair competition makes sure that in the long run good value and service and fair price are the friends and not the enemies of success.

Now, I submit that I have proven beyond the shadow of a doubt the existence of grave evils not alone through certain forms of price cutting but through the whole system of price cutting on standard goods.

That evil now can only be cured by national legislation. It should not require that to give freedom of contract to American business men, but it does. The Supreme Court, through judicial decision, has taken away that right as it applies to standard goods and their resale price. The Government of the United States should assure fair competition. Fair price will follow. Shall the Government directly regulate the price? Only if there is combination on the part of manufacturers to control their field or on the part of distributors to control their field. That is expressly forbidden in the antitrust laws and in the principle of my bill.

No person need hold up his hands in horror at the thought that if individual competing producers of standard goods are given the right to name the resale price through free contracts the Government must step in and shield the public with its mighty arm against unfair prices, thus putting the Government into business.

I submit to you in all fairness that the danger comes from the other quarter. If monopolization of distribution continues, the Government will be forced to interfere. If the "all-conquering distributor," the chain department store, is to win, then the logic is that we must come at last to one chain and then to one proprietor. If concentration is essential to efficient, economical distribution in part, it is essential in all.

But with distribution in the hands of one interest the Government dare not leave it alone. Then the Government would go into business, indeed, and state socialism would be here.

I have pointed out the evils of uncontrolled price cutting on standard goods and have tried to prove that the only remedy is a restoration of the right of contract to American business men.

I have shown the injustice to the little manufacturer from a condition where his giant competitor can protect himself against unfair prices, while if he attempts to do the same he is branded a criminal.

I have shown that the little distributor, though able to give superior service, is being crushed out of existence by those who are endeavoring to monopolize merchandizing through unfair practices.

I have shown that the public is being injured by fraud to-day and that if present conditions continue they will be devoured by extortion in the future. I have shown that under price maintenance the public gets the advantage of a fair price, fixed under competitive conditions, between rival producers; that it means a lower distributing cost than under costly consignment and agency systems; that it means honesty in business, the greatest benefit which can come to the public.

I am willing to rest my case on the principle that public policy requires that independent business men of full age and competent understanding shall have the right to contract to uphold a uniform price policy on standard goods, and that such contracts, entered into freely and voluntarily, shall be held good and shall be enforced in courts of justice.

AGRICULTURAL AND UNEMPLOYMENT RELIEF

Mr. SCHALL. Mr. President, there has just come to my notice a speech delivered in New York before the Hamilton Republican Club by William S. Bennet.

Mr. Bennet was a colleague of mine in the House for many years. He is an able lawyer, and in the House was an able, diligent, conservative representative of business.

This speech contains statistics on depreciation of currencies worthy of note to the Senate and to the House. Also, the thought expressed on agricultural problems is worthy of study, and is especially hopeful to those looking forward to agricultural help through legislation when uttered by Mr. Bennet, who in the past has, I believe, given little or no attention to its urgent problems. It bears out the thought diligently expressed here by us who have felt the necessity of agriculture—us who have consistently fought for its recognition, claiming that when agriculture is not a paying proposition it means depression in time to all our people. You can burn down your cites, but if agriculture is healthy they will spring up overnight, while if agriculture is sick and dying, grass will grow in their streets and 10,000,000 men beg for bread.

Mr. Bennet's speech is especially hopeful because it shows that eastern representation, business-minded men, are at last coming to see and understand the problems of the farmers. I ask that his speech be printed in the RECORD, that it may give, through its beautiful English and well-stated thought, benefit to both statesman and layman. The address is entitled "First Things First."

There being no objection, the address was ordered to be printed in the RECORD, and it is as follows:

Mr. Levis and friends, it is good to be back in the old district; good, too, to see some of the "old timers"; and good to have the privilege of speaking on our common national problems to a sympathetic and understanding audience.

The west side of Manhattan Island means much to me. Here Mrs. Bennet and I spent nearly 25 of our 37 years of married life. We often speak of the west side and its people, and always of our life here as interesting, pleasant, and happy. Our four children were all born here and, except when they were with us in Washington, attended to and through high school, our city's excellent public schools.

Politically, this territory honored me repeatedly and greatly. From here I went to the assembly and to the Congress, and this territory is embraced in that of the municipal court district in which I served as judge by appointment of Mayor Low.

Twice the west side tried to nominate me for governor, and the old nineteenth assembly district made me its executive member and kept me there until I resigned to manage the anti-Tammany fusion city-wide campaign of 1909, which campaign resulted in the election of an anti-Tammany board of estimate, which, reelected in 1913, gave the city eight years of the best government it ever had.

The names of John Purroy Mitchel, William A. Prendergast, George McAnany, Marcus M. Marks, Cyrus C. Miller, Lewis H. Pounds, Douglas Mathewson, and George Cromwell will not soon be forgotten by those who are devoted to good city government.

I like also to remember our then organization. We were all young men. I was an assemblyman at 30, a judge at 32, and a Congressman at 34. Our State senator, John Ford, was young; so was Ed Fallows, our assemblyman, and Armitage Matthews, our alderman. Our leader, Mr. Gruber, who radiated happiness and sparkling wit and waxed eloquent on Republican doctrines, was young.

As party men we were still of the days of Benjamin Harrison, Tom Reed, James G. Blaine, and William McKinley.

I was elected to the assembly in 1900 on the McKinley ticket and to Congress in 1904 on the ticket with Theodore Roosevelt. Those were great and happy days, not only for our party but for our country as well.

Speaking here, with a background of memories of great days, strong friendships, and loyal supporters; of family memories of happiness, content and modest well being; and in a political headquarters where my own portrait, the old-time gift of old-time friends, still hangs in an honored place, every tradition of friendship and gratitude; every memory of loyal friends now dead and every sense of loyalty to old friends still living make it a grateful duty to say that, and that only, which experience and conviction lead me to believe to be words of truth, of soberness, and of reasoned judgment.

In this spirit, and none other, I approach the discussion of national problems of common interest to us all.

Our situation is not pleasant. There are many here who I do not know personally, but it is, unfortunately, safe to say that there is no person here who, since 1929, has not suffered either a lost position; lowered wage or salary; failure, if a young person, to obtain a position to start in; depreciated property values, or had properties completely swept away. We are all in the same boat. What shall we do about it? One thing is sure, if we have the old-time American spirit we will not sit down and do nothing.

Americans are neither snivelers, whiners, nor quitters. We can take it on the chin and come back.

Since I left Congress in 1911, I have, except for my brief return to Congress in 1916, been, almost continuously, a legal adviser to substantial business interests; not big banks and large trusts, but operating organizations, honestly capitalized in seven and eight figures. Such organizations frequently require analytical advice, and therefore I have some training along that line.

From the analytical angle, what is our country? Continental United States is, geographically, about 3,000,000 square miles of the earth's surface. From every standpoint it is most advantageously situated. Except for Alaska, it escapes ice-bound areas on the north and, on the south, it escapes the torrid heat of the equatorial region. It has, however, warm climates and soils in the South which produce some tropical fruits and cotton and bring fruits and vegetables of a wide zone early to markets to which the colder climate of our northern areas brings them later.

In the North we grow in abundance every product of the Temperate Zone. North, South, East, and West provide grazing and pasturage for useful domestic animals. Valuable and necessary minerals underlie our soils in abundance and we have adequate forests. Oceans bound us both east and west; a great gulf forms a large part of our southern boundary; while four great lakes and a commensurate river form a great segment of our northern boundary.

The greater portion of the middle section of our country is the watershed of a truly mighty river, rising near our northerly border and emptying into the Gulf at the south.

These and other waterways furnish avenues of cheap transportation, teeming with fish high in food value, and, by their evaporation, add to our rainfall and equalize our temperatures.

We have the great advantage of a common language and of a vast productive area under one central government without trade barriers between different parts. What Briand sought for Europe through his United States of Europe, and what Great Britain and her dominions sought for that Empire at the Ottawa conference we thus already have for ourselves in our own country. Ours is what is called a self-contained country. We consume 92½ per cent of what we produce and need to import only a few things that we do not produce, such as silk, coffee, tin, rubber, and tea. We import tropical fruits because they are useful and we like and enjoy them, but we could get along without them. In fact, we could get along without any of our imports, except rubber. Without rubber we would have to revise our method of life considerably. There are some medicines, too, that we would miss. While we have used, and to some extent misused and wasted, our natural resources, we have, nevertheless, transformed a great deal of them into permanent national wealth.

When our distinguished fellow citizen, Elihu Root, reached his fifth birthday, in 1850, our country had a population of 23,191,876 and a national wealth of $7,136,000,000. Fifty years later, in 1900, the population had risen to 75,974,575, a growth of over 300 per cent, but the national wealth had risen to $88,517,000,000, a rise of 1,250 per cent. Wealth rose four times as rapidly as population.

Between 1900 and 1930 population rose from 75,974,575 to 122,775,046, only about 60 per cent, but wealth rose from $88,517,000,000 to $329,700,000,000, about 350 per cent. Our national income concerning which we have no census figures, is estimated to have reached eighty-five billion in 1929; to have dropped to seventy-one billion in 1930, to fifty-four billion in 1931; then to thirty-seven and a half billion in 1932. So, while we are in distressing times, we have a country which has demon-

strated tremendous productive power, is advantageously situated, has great resources, common speech, no trade barriers between its own products and its own people, is self-contained, and has the best form of government on earth. While 10,000,000, and perhaps more, of us are unemployed, 30,000,000 and more are still employed. From this survey it is evident that if we are not a wholly successful and a happy people the trouble lies solely with us, nature and nature's God have dealt bountifully with us.

What, then, do we need?

First: More faith. No great thing can be done without faith. When Saul of Tarsus, one of the greatest lawyers ever known and the most eloquent and convincing of writers, wrote "Faith is the substance of things hoped for, the evidence of things not seen," he based it on the history of the Hebrew people, of whom he was one, but his message was to the Gentiles as well as to the Jews.

Manhattan Island is a monument to faith. Hendrik Hudson sailed by faith; the tiny Dutch settlement of over 300 years ago was founded by faith; by faith we became a flourishing British colony; by faith we joined the Revolution, our merchants formed the committee of safety; our Kings College students raised the liberty pole; our people turned the leaden statue of King George into patriot bullets; some of our people died in the British prison near the present city hall, others gave their lives or their property or both. When we were still a young Nation, faith built the Erie Canal and the fast Yankee clippers, which between them made New York's incomparable harbor the seat of a great commerce. I could continue illustrations, but, as Paul said in his recital, "Time fails me."

What do we need to get more faith?

A great spiritual revival. Not a Protestant or a Catholic or a Jewish revival but a Protestant and a Catholic and a Jewish revival. We all need a religious awakening. None but a people of deep religious convictions has a great faith and does great deeds.

The religious conviction may be a hard one, such as the Puritans had, or a mistaken and clouded one, such as that of the ancient Greeks, but a religious conviction is indispensable. It is better, of course, if it is the proper one, as each of us severally thinks his or hers is, but religious conviction there must be. Without it we are unsettled drifters, driven hither and yon by every wind of doctrine, incapable of stability, fearful, timorous, whimpering, useless, and indeed dangerous. This country was built on faith and must be rebuilt on faith.

Given faith, what next do we need?

Brains, leadership, application, devotion, concentration, a sense of nationalism, careful planning, and the will to succeed. I do not mention ability to succeed, because we unquestionably have it. I do not hesitate to say "a sense of nationalism," because I firmly believe, as Senator LEWIS expresses it, that Americans should be for America.

What is our most pressing problem?

To get our 10,000,000 unemployed back to work. Everything else can wait, if the doing of it interferes with that.

Can we solve that?

Certainly. I was born and trained in a religious conviction. I answer that question in a convinced and certain faith, and I say with equal conviction that to that portion of our people still under 50 years of age better days are coming than any which have gone before. It is simply impossible to be otherwise.

Two things certainly are responsible for a lot of our unemployment, the substitution of machinery for men and the closing of our factories through the competition of cheap foreign goods. There are other causes also, of course, but these account for the greater part of our idle people.

Economists allude to men out of work, because of the substitution of machinery, under the phrase, "technological unemployment." That started centuries ago when the first man used the first lever to move a log, or a rock, thereby displacing the hand labor of one or more men. Through our national history, at least, new industries have until recently absorbed the displaced men. In his annual report for 1927, however, Secretary of Labor Davis called attention to the fact that we were "developing new machinery at a faster rate than we have been developing new industries." By 1928, in a time of great industrial expansion, our million normal unemployed had grown to 2,000,000 and this in a big year like 1928. In the decade between 1919 and 1929 the output of our factories had increased 38 per cent in quantity but the number employed therein had decreased about 3 per cent. Somewhere from four to six million of our unemployed may now come from technological unemployment. The solution of this problem must at first be a temporary one. We can not talk a permanent solution until we are sure that the problem is a permanent one. The desired new industries may develop and the technological unemployment disappear quickly. In the meantime, the problem is being met by staggered employment, the cessation of child labor, short work weeks and shorter work days in some industries, the discharge of married women whose husbands are able to support them. Legislation is not needed; at least yet. Investigation to determine facts would probably be helpful. Experts not only disagree as to the extent of technological unemployment, but some even deny its existence at all, and back up their assertion by figures.

The closing down of our factories and industries and what did it is easier to prove than what is the extent of technological unemployment. The recent census of manufacturers made by the Government for the years 1929 and 1931 gives us some figures to start with. Here is the table:

Summaries of totals for all manufacturing industries, 1931 and 1929

	1929	1931	Per cent
Number of establishments	210,959	174,135	−17.5
Wage earners (average for year)	8,838,743	6,511,647	−26.3
Wages	$11,620,973,254	$7,225,587,464	−37.3
Cost of materials, containers for products, fuel, and purchased electrical energy	$38,549,579,732	$21,420,124,017	−44.4
Value of products	$70,464,863,443	$41,333,108,998	−41.3
Value added by manufacturing	$31,885,283,711	$19,912,984,981	−37.5

Since 1929, 32 nations have gone off the gold standard and thus reduced their costs. Most of this has occurred since the adoption of the tariff act of 1930. When a foreign nation reduces costs it, in effect, reduces our tariff against its products by exactly the amount of such reduced costs. Then its goods come into our markets, displacing our domestic manufacturers, throwing our people out of work, or lowering their wages, and closing some of our factories. This results in the depressing figures set out in the table just read.

Customs officials estimate the number so thrown out of work at 200,000 in deep-sea fishing alone, and a total of 1,000,000 for the entire country.

The Ways and Means Committee of the House of Representatives in its recent report on the beer bill estimates that for every man put to work in a capital industry three people are put to work elsewhere. Mr. Hearst, in his "Buy American" campaign, says that the average pay per hour of an American factory worker is 60 cents. This, for an 8-hour day, would be $4.80. Using these figures, let us see what it would mean to us if these 1,000,000 people were reemployed. First, it would mean, multiplying the 1,000,000 by 4, the reemployment of 4,000,000 people and the solving of two-fifths of our unemployment problem.

Let us see what it means in dollars, counting 300 days to the year. We find that it totals $5,760,000,000 in yearly wages. But the customs estimate may be a little high, and those of the Ways and Means, too, while Mr. Hearst's 60 cents an hour may not apply to some of the 1,000,000; then, too, men and women do not average 300 days a year of steady employment. But even if we cut the figures in two, it still leaves $2,880,000,000, or $9,600,000 a day. We can remedy this by enacting depreciated-currency legislation, and every day Congress delays enacting this legislation costs the workers of this country at least $9,600,000 in wages.

Customs collection figures recently made public by the Treasury Department, comparing certain imports for the first eight months of 1932 with the first eight months of 1931, from countries which have gone off the gold standard, are of startling significance. I alluded to the virtual wiping out of our deep-sea fishing industry. Listen to the increases in imports of fish from depreciated-currency countries for the first eight months of 1932 as compared with the first eight months of 1931:

	Per cent
Sardines, Portugal	100.46
Cod and other salted and pickled fish, Denmark	3,729.8
Cod and other salted and pickled fish, Norway	156.9
Fish in air-tight containers, Norway	58.3
Salmon, fresh or frozen, Japan	2,511.8
Tuna and other fish in oil, Japan	558.9
Cod and other salted and pickled fish, Japan	123.2
Fish in air-tight containers, Canada	4,669.9
Clams in air-tight containers, Canada	131.9
Fish, Mexico	80.7

This is not a complete list, and, as is natural, considering our tremendously reduced aggregate national income, there are some reductions, but this avalanche of importations, coming on top of this depression has just about wrecked our great fishing industry. Beaufort and Morehead City, N. C., are especially hard hit. Carteret County in which they are situated has recently defaulted on its county bonds.

I shall comment on a few of the other large increases in importations during the same period. New York is a cheese State. Cheese is down in price, and coincidentally the increase in importation of one kind of cheese from Denmark is 136.3 per cent.

We have many American factories making wrapping paper, but the increase in importation of such paper (other than kraft) from Sweden is 615.9 per cent.

The iron miners on the Mesaba Range, Minn., expect no more than 10 per cent of operation during 1933, and lessees are allowing valuable leases on which they have spent hundreds of thousands of dollars, to go back to the lessors, yet importations of pig iron increased as follows: From Sweden, 181 per cent; United Kingdom, 611.3 per cent. These increased imports are caused not only by depreciated currencies but by the fact that the rate on pig iron in the tariff act of 1930 is too low. This is shown by the fact that imports of pig iron from Holland, a gold-standard country, increased 482.9 per cent.

New York manufactures shoes. Imports of footwear with fabric uppers from Japan increased 129.7 per cent and of men's and boys' boots and shoes from the United Kingdom 30.7 per cent. New York also manufactures buttons. Imports of ocean-pearl buttons from Japan increased 117 per cent. Combs, except metal, another

New York product, face an increase of 220.1 per cent from Japan. New York also has a leather district. Imports of belting and welting leather from the United Kingdom are up 105.7 per cent, goat and kid leather from the United Kingdom, 157.3 per cent.

At Amsterdam and throughout the Mohawk Valley, New York has woolen mills. Wool and other yarns from the United Kingdom have increased 221.2 per cent. Other increases of interest to New York are: Inlaid linoleum, United Kingdom, 82.3 per cent; Portland cement, United Kingdom, 271.6 per cent; and candy and confectionery, United Kingdom, 219.7 per cent.

Paterson, N. J., is a silk center. Silk fabrics over 30 inches, not Jacquard, and figured are imported from the United Kingdom with 212.4 per cent increase.

Long-staple cotton from Egypt and British India but transshipped from the United Kingdom has increased 1,128.1 per cent and 1,283.1 per cent. These large increases are giving southern cotton planters real concern.

The agricultural schedule in the tariff act of 1930 was unanimously planned to be adequate, still, dried peas from New Zealand increased 477.3 per cent, while from Canada came the following increases: Fresh pork, 237.9 per cent; hams, 157.9 per cent; cream, 200 per cent; dried milk, 125.5 per cent; and, from Mexico, dried beans, 80.7 per cent. From Argentina came cattle hides, increased 173.6 per cent.

These increased imports are the direct result of the depreciated currencies of the several exporting countries. Such increases in imports, covering so wide a range, were probably never before reported covering so short a period as eight months. They certainly displaced American labor and give an idea why customs authorities believe that depreciated currencies have put 1,000,000 Americans out of work.

It is not fair to blame Congress, yet, for this continued loss of $9,600,000 in wages every day. The figures I am giving you have been public only a short time and were absolutely unknown to the one Senator and the one Representative to whom I have shown them. I shall, however, send a printed copy of this talk to each Senator and Representative. The figures will be noted and checked, and, if found correct, Congress will undoubtedly act. There is no political significance in correcting a condition due to depreciated currencies in other countries. It simply means making our tariff law mean what it says; pending whatever action the new administration takes after it comes into power on March 4.

Democrats and Republicans are all Americans first, and no American wants to see American labor continue to lose $9,600,000 daily because of bad currency conditions in other countries. In 1894 when there was another hard depression, the Democrats controlled the Senate and the House, as they will again after March 4. They passed depreciated-currency legislation then. And this time one, at least, of the several bills introduced to remedy the condition is introduced by a Democrat—Representative HILL of the State of Washington. Mr. HILL is a member of the Ways and Means Committee which considers such legislation, and his bill is H. R. 13790. The committee will probably consider it in the very near future.

So much for depreciated currency. Its effect is disastrous and the Congress will undoubtedly take early action.

But there are increases from gold-standard countries. For example, braid for straw hats 474.5 per cent; cattle hides, wet salted, 42.9 per cent from Italy; edible gelatin 306 per cent, unedible gelatin 2,083 per cent; candy 525 per cent; cotton cloth 39.5 per cent, cotton quilts and bedspreads, cotton floor covering 1,351.9 per cent; Portland cement 331.1 per cent; sheet iron and steel 399.3 per cent, hoop or band iron 198.7 per cent, and hoop band or scroll iron 93.1 per cent, all from Belgium. Pig iron 482.9 per cent, and glycerine, refined, 95.2 per cent, from Holland; and clothing wool 1,061.8 per cent, from British South Africa, now off the gold standard, but then on it. This simply proves what many of us have always said, that some of the rates in the tariff act of 1930 are too low.

Unlike the depreciated-currency situation, this does raise a political question. What the new Democratic administration will do about it, no one knows. These increases in imports from gold-standard countries, unquestionably, like those from depreciated-currency countries, are causing unemployment and reduced wages in America.
